21 p3692 A69-38686

Relaxation equations for oscillatory degrees of freedom of molecular supersonic binary gas flow in Laval nozzle, obtaining population inversion

21 p3693 A69-38692

Fluidic angular rate sensor, obtaining rate information by sensing laminar jet flow deflection from nozzle, discussing advantages over mechanical rate sensors

21 p3722 A69-38766

Simultaneous passage of two unmixed gas flows through joint two circuit turbojet nozzle into ambient medium

21 p3785 A69-39094

Turbulent gas jet mixing in chamber with four inlet nozzles

21 p3785 A69-39102

Liquid hydrogen pumping for Phoebus reactor, discussing feed systems, nozzles, configurations, design, testing, etc [AIAA PAPER 67-478]

21 p3769 A69-39751

Condensation and probe interference in planar expansion deflection nozzle measurements [AIAA PAPER 69-170]

21 p3645 A69-39769

Quasi-one dimensional analysis for nonequilibrium flow of dissociated diatomic gas through converging-diverging nozzle, discussing critical mass flow rate

22 p3927 A69-40583

Flexible string extraction from bobbin through nozzle, solving equations of motion by neglecting bending rigidity, extensibility, drag, internal friction, etc

22 p3930 A69-40585

Carbon dioxide free jet expanding from conical nozzle into low density atmosphere, using freeze up method

22 p4000 A69-40594

Flowfield properties of two dimensional supersonic jet near sonic nozzle exit by numerical method of characteristics

22 p3860 A69-40920

Starting process in nozzle with one dimensional flow treated numerically by finite difference method using pseudoviscosity term

22 p3860 A69-40926

Ionized He and Ar plasmas nonequilibrium nozzle flows, noting temperature difference between electron gas and atom-ion gas, calculating flow parameters

22 p3861 A69-41047

Dissociational nonequilibrium transonic flow near nozzle throat analyzed for diatomic gas with equilibrium vibrational energy, using perturbation method

22 p3861 A69-41177

Swirl influence on choking constraint in transonic flow through nozzle throat [AIAA PAPER 68-693]

23 p4151 A69-41887

Transonic expansion analysis applied to flow through convergent-divergent nozzles with small throat radius of curvature, noting coordinate system selection

23 p4060 A69-41906

Rarcfaction onset along streamline from rocket nozzle with small Knudsen number at exit plane

23 p4152 A69-41920

Underexpanded plane hypersonic gas jet injection into resting medium from straight nozzle, discussing shock wave formation

24 p4246 A69-43484

Flow discharge characteristics of nozzle during swirling gas flow ejection, considering isentropic and isothermal limiting cases

24 p4247 A69-43499

Boundary layer and heat transfer measurements for turbulent boundary layer laminarizing in conical nozzle flow with wall cooling [ASME PAPER 69-HT-56]

24 p4303 A69-43538

Uniform flow and wall boundary layer growth measurement in conical nozzle of reflected shock tunnel operating at high enthalpy conditions

24 p4247 A69-43575

Electron temperature and density of inviscid free molecular nozzle flow of shock tunnel measured with thin wire Langmuir probes

24 p4317 A69-43648

High enthalpy shock tube and nozzle gas flows for incident shock Mach numbers analyzed for laminar boundary layers and boundary layer transitions

24 p4305 A69-43664

NOZZLE GEOMETRY

Sonic nozzle optimal profile determination with and without cylindrical throats, noting sonic line curvature importance on discharge coefficient

02 p0188 A69-12037

Short cylindrical diffusers efficiency in supersonic wind tunnel with exchangeable nozzles with conical supersonic section

03 p0365 A69-14226

Soviet book on gas dynamics of solid fuel rocket motors covering combustion chamber flow, nozzle and thrust characteristics, pressure relaxation and channel charge

04 p0647 A69-15493

Condensation and probe interference in planar expansion deflection nozzle measurements
[AIAA PAPER 69-170] 06 p0863 A69-18059

Aerobell extendible nozzle rocket engine design and performance, cold flow and simulated hot flow test results
[AIAA PAPER 69-4] 06 p0985 A69-18195

Optimum fixed geometry ramjet in Mach range of 3 to 7 with successively subsonic and supersonic combustion
[ONERA-TP-656E] 07 p1203 A69-18415

Variable geometry intake and convergent-divergent nozzle design for supersonic aircraft, noting subsonic installations
08 p1253 A69-21164

Asymptotic boundary curves for two dimensional and axisymmetric incompressible irrotational flows into throat of convergent duct
10 p1680 A69-23893

Venturi meter design, discussing effects of turbulent velocity fluctuations, hole size and internal geometry on differential pressure measurement
11 p1880 A69-24468

Supersonic nozzle design ensuring desirable flow field in inviscid core of viscous gas flow, using boundary layer equations
11 p1820 A69-25473

Aircraft test setup design and techniques to simultaneously measure engine thrust and engine thrust minus drag, noting nozzle configurations variations effect
[AIAA PAPER 68-395] 12 p2059 A69-26769

Wet steam injector power losses in nozzle as function of humidity, noting compensation of nozzle throat diameter and fluid flow rates
13 p2246 A69-27490

Axisymmetric hypersonic wind tunnel nozzle design by determining inviscid contour and correcting for turbulent boundary layer growth
[AIAA PAPER 69-337] 13 p2200 A69-28273

Diffuser inlet geometry, studying effects of straight section length on flow pattern and diffuser resistance
14 p2391 A69-29899

Collapse pressure of flush cylindrical nozzle axisymmetrically intersecting conical pressure vessel for rigid plastic shells
15 p2704 A69-30289

Jet noise causes and suppression, discussing nozzle exit area geometry
15 p2671 A69-30372

Solid rocket propellants tests, considering propulsion performance measurements, altitude simulation problems, internal flow patterns, nozzle geometry, etc
16 p2765 A69-31751

Compressor surge effect on mixed compression inlet flow from numerical solution of one dimensional unsteady inviscid flow equations in variable area duct
[AIAA PAPER 69-484] 16 p2841 A69-32682

Turbulent base flowfields in multinozzle configurations, considering adiabatic flow and determining base pressure distribution from reverse jet impingement
[AIAA PAPER 69-570] 16 p2733 A69-32751

Constant chamber pressure thrust throttling of expansion-deflection rocket nozzle, calculating wall static pressure and thrust by characteristics method, discussing performance
[AIAA PAPER 69-435] 16 p2846 A69-32776

Viscous convergent-divergent nozzle flow slender channel approximations, discussing roles of nozzle geometry, Reynolds number and wall temperature, calculating velocity, enthalpy, etc
[AIAA PAPER 69-654] 17 p2894 A69-33502

Shock tunnel steady flow starting process in two dimensional reflection nozzle, using multiple shadowgraphs and interferograms, noting nozzle geometry influences
18 p3085 A69-34471

Pyrolytic graphite coated composite as nozzle throat material for high energy metallized solid propellant motors
19 p3357 A69-35539

Fluidic direct impact modulator design, studying effects of pressure levels and nozzle geometries
[ASME PAPER 69-FLCS-38] 20 p3465 A69-37983

Jet efflux from two dimensional symmetric nozzles of arbitrary shape determined using conformal mapping and Riemann-Hilbert solution to mixed boundary value problem
21 p3692 A69-38686

Condensation and probe interference in planar expansion deflection nozzle measurements
[AIAA PAPER 69-170] 21 p3645 A69-39769

Swirl influence on choking constraint in transonic flow through nozzle throat
[AIAA PAPER 68-693] 23 p4151 A69-41887

Internal flow measurements in transonic region of supersonic nozzle with small throat radius of curvature compared with prediction data
23 p4060 A69-41900

Tridimensional infrasonic diffuser geometry effects on operational efficiency, considering opening angle, outlet/inlet section fields ratio and diffuser length/hydraulic radius ratio
24 p4243 A69-42560

Large contoured nozzle fabrication using liquid epoxy as casting material, presenting molding process based on experimental data
24 p4318 A69-42643

NOZZLE INSERTS

Precracked ceramic rocket nozzle throat inserts, discussing improved thermal displacement accommodation, load transmission, fracture tolerance, articulation capability, etc
02 p0334 A69-12369

Supersonic nozzle cross section and diffuser throat in MHD generator calculated by continuity equation
11 p1826 A69-25348

NOZZLE THRUST COEFFICIENTS

Nomogram for nozzle thrust coefficient evaluation
03 p0365 A69-14102

Convergent conical nozzles discharge coefficient calculated as function of operation mode and nozzle geometry
24 p4364 A69-43074

NOZZLE WALLS

Nozzle ablations based on chemical mechanism, discussing pure or reinforced phenolic resin
11 p1999 A69-24908

Boundary layers coalescence on plane convergent channel walls investigated with analytic formulas for velocity distribution, shear stress, layer thickness, etc
15 p2592 A69-31009

Density and density fluctuations in hypersonic turbulent boundary layer on shock tunnel nozzle wall measured using electron beam probe
16 p2770 A69-31907

Graphite rocket engine nozzles chemical erosion at various temperatures, comparing reaction and diffusion rates
23 p4180 A69-42156

NOZZLES

Conducting and insulating construction materials at high temperatures for MHD conversion nozzles, noting lifetimes
21 p3751 A69-38456

NRX-A REACTOR

U NRX REACTORS
U NUCLEAR ENGINE FOR ROCKET VEHICLES

NRX REACTORS

Remote disassembly and inspection methods for evaluating NRX-AG reactor components performance
[AIAA PAPER 69-511] 16 p2810 A69-32712

NUCLEAR AUXILIARY POWER UNITS

NT SNAP 8
NT SNAP 10A
NT SNAP 13
NT SNAP 21
NT SNAP 27
NT SPACE POWER UNIT REACTORS

Nuclear reactors for powering electrical engines and current supply for satellite devices, noting ROVER project and Kiwi reactors
07 p1179 A69-19739

Radioisotope energized Stirling engine for spacecraft auxiliary electric power, discussing system configurations, weight and fuel requirements
23 p4190 A69-42281

NUCLEAR BINDING ENERGY

Approximate ionization potentials for high ionization stages of elements with atomic numbers 31 to 92 obtained by binding energy calculations
14 p2488 A69-29923

NUCLEAR CAPTURE

U ELECTRON CAPTURE

NUCLEAR CHEMISTRY

Computer-analyzer system for nuclear chemistry, noting advantage of on-line data acquisition and analysis coupled with time sharing economy
05 p0725 A69-16584

NUCLEAR-ELECTRIC MOMENTS

U ELECTRIC MOMENTS

NUCLEAR ELECTRIC POWER GENERATION

NT THERMONUCLEAR POWER GENERATION
Nuclear reactors for powering electrical engines and current supply for satellite devices, noting ROVER project and Kiwi reactors
07 p1179 A69-19739

High temperature and power gas diodes and thyatrons for nuclear electrical space power systems
11 p1847 A69-24744

Nuclear energy systems, discussing U.S. reactor concepts with emphasis on thermionic systems and space applications
14 p2404 A69-29278

Nuclear energy conversion for long space missions, comparing dynamic Brayton, liquid metal MHD gas, dynamic Rankine and LMMHD Rankine cycles
16 p2810 A69-31748

Nuclear thermal and electrovoltaic batteries design and operation, discussing applications
20 p3464 A69-37288

Space nuclear electric power systems applications and development, summarizing current status and near future programs
[AAS PAPER 69-305] 24 p4364 A69-42865

NUCLEAR ELECTRIC PROPULSION

Nuclear reactors for powering electrical engines and current supply for satellite devices, noting ROVER project and Kiwi reactors
07 p1179 A69-19739

Performance boundaries of space propulsion systems containing nuclear electric stages
[AIAA PAPER 69-249] 09 p1538 A69-21249

Reactor and mission requirements interaction for unmanned thermionic nuclear electric propulsion, discussing lifetime, payload, power levels, etc
[AIAA PAPER 69-250] 09 p1539 A69-21253

Low thrust space probe mission to Halley comet, utilizing nuclear electric propulsion
10 p1772 A69-22864

Thermionic reactor systems, discussing hybrid nuclear rocket/nuclear electric Mars mission, design features, performance and electric power characteristics
14 p2480 A69-29183

Out-of-core thermionic systems with heat pipes usable in space applications, meeting advanced auxiliary power and nuclear propulsion requirements
14 p2480 A69-29188

Space nuclear electric power systems applications and development, summarizing current status and near future programs
[AAS PAPER 69-305] 24 p4364 A69-42865

NUCLEAR EMULSIONS

Permanent magnet and nuclear emulsion for measuring He nuclei momentum spectra up to 100 gv rigidity
06 p0989 A69-17277

Density measurements of particle tracks in nuclear emulsions utilizing digitized video scan, discussing operation and instrumentation
[IEEE PAPER 2A-7] 07 p1133 A69-19185

Energy spectrum of primary cosmic ray helium nuclei from nuclear emulsion stacks exposed in sounding rocket flights
08 p1378 A69-20264

Nuclear emulsion high energy nucleon-nuclei interaction model accounting for two maxima track formation
13 p2303 A69-28371

Trans-iron nuclei flux in primary cosmic radiation determined through high altitude balloon exposure of interleaved layers of nuclear photographic emulsion and plastic detectors
21 p3787 A69-38327

Primary cosmic ray nuclei studies during Gemini 2 flight by nuclear emulsion detector with time resolution capability, describing experiment design and equipment operation
21 p3787 A69-38350

NUCLEAR ENERGY LABORATORIES

U LABORATORIES

NUCLEAR ENGINE FOR ROCKET VEHICLES

Nuclear rocket engine exhaust gas cooling by injecting water jet eliminates need for secondary cooling
[AIAA PAPER 68-604] 04 p0591 A69-15516

Radiation effects on NERVA out-of-core instrumentation, discussing cryogenic temperature measurements and transducer measuring pressure at gamma heating rates
06 p0956 A69-16882

Thermal performance of pressure transducers, accelerometers, displacement transducers, resistance thermometers and control mechanisms for NERVA reactor
06 p0956 A69-16885

NERVA transfer functions evaluation by computer data processing, using Fourier algorithm
[IEEE PAPER 2B-2] 07 p1179 A69-19187

Instrumentation design problems connected with NERVA, considering high gamma and neutron radiations and temperature environments
[IEEE PAPER 2D-5] 07 p1134 A69-19189

NERVA rocket engine with 200,000-250,000 lb thrust to replace Saturn 5 upper stage for manned interplanetary flights, discussing Mars flight
08 p1410 A69-21029

Air backflow in nuclear exhaust system duct for ground testing of NERVA engines, noting overpressure effect
[AIAA PAPER 69-325] 09 p1479 A69-22390

NERVA engine cooldown system for emergency shutdowns using high pressure liquid H followed by gaseous H warmup and liquid N cooldown
[AIAA PAPER 69-512] 16 p2810 A69-31846

Water moderated beryllium reflected reactor design for testing NERVA or Rover type fuel elements in nuclear environment, noting core location
[AIAA PAPER 69-513] 16 p2810 A69-32656

First generation nuclear flight stage with 75000 lb thrust NERVA flight engine, discussing applications design and hardware options
[AIAA PAPER 69-534] 16 p2810 A69-32707

Neutron and photon transport properties in liquid hydrogen obtained from measuring radiation environment in propellant tank mockup suspended above NERVA reactor
[AIAA PAPER 69-475] 16 p2810 A69-32716

NERVA engine operational cycle and performance, discussing startup, thrust buildup and shutdown
[AIAA PAPER 69-515] 18 p3170 A69-34809

NERVA program technological developments usability in nonspace industrial community
18 p3170 A69-35075

NERVA technology development, discussing reactor technology program, downward firing and flight-like configuration engine
[AIAA PAPER 68-612] 19 p3371 A69-35942

Water injection cooling of exhaust gases during stage testing of NERVA engine, discussing exhaust duct configuration and flow characteristics, spray nozzle geometry, etc
[AIAA PAPER 69-514] 19 p3372 A69-36301

Nuclear rocket program status and plans, presenting NERVA reactor and engine system tests
[AIAA PAPER 68-610] 21 p3768 A69-39219

NUCLEAR EXPLOSION EFFECT

Nuclear explosions electromagnetic effects on electronic systems, considering signals emitted from fireball and signal attenuation by changed atmospheric propagation
13 p2234 A69-28344

Ground military equipment hardening against nuclear environment, selecting worst case levels from isodamage curves
15 p2651 A69-30380

Solar cells designed to survive exposure to fission/fusion neutrons and electromagnetic spectrum products of nuclear weapon detonation
19 p3251 A69-35689

High altitude nuclear explosions detected by distinguishing artificial from natural sudden enhancement of atmospheric (SEA) phenomena
20 p3492 A69-37701

Crater formation by gas erosion in vent of 4.3 kiloton nuclear explosion detonated at 280 ft depth in layered trachytic volcanic rocks
22 p3937 A69-40409

NUCLEAR EXPLOSIONS

NT THERMONUCLEAR EXPLOSIONS

Inner radiation zone including data on electrons, protons and heavier particles and results from high altitude nuclear tests
12 p2152 A69-27144

Computer codes describing nuclear weapons effects associated with X ray transport, neutron transport and X ray interactions with material, fireball, blast environments, etc
15 p2652 A69-30381

Radiation effects produced by high temperatures of shock waves and nuclear explosion fireballs, air cooling, laser emission-matter interaction and optical phenomena
18 p3230 A69-34926

Air pressure wave forces on missile from silo wall motion resulting from close nuclear blast, using acoustic wave equation for concentric cylinder flow
21 p3691 A69-39765

Radiation hardened microcircuits and transistors for protection against transient radiation released by nuclear weapons
23 p4135 A69-41528

NUCLEAR FISSION

Lithium 6 and 7 fission following pion capture, searching for H 4 and 5
12 p2132 A69-26296

Single cell fission powered thermionic converters design and testing
14 p2399 A69-29195

Meteorite Li isotopic composition variations to determine neutron role in nucleosynthesis of solar system light elements
19 p3408 A69-36084

Spontaneous symmetric fission of superheavy elements near doubly magic nucleus as explanation for Xc and Kr isotopic composition anomalies in meteorites
20 p3601 A69-37503

Dirac cosmological principle of nuclear decay compared to Rutherford theory with respect to radioactive ages of terrestrial rocks and meteorites
22 p4017 A69-40176

NUCLEAR FUEL ELEMENTS

In-core thermionic sodium cooled uranium oxide fueled reactor for space vehicle power plant
02 p0279 A69-12666

Thermionic converter with external fuel surrounding inner emitter annulus for use in in-core reactors
14 p2480 A69-29185

Output current and efficiency of vapor thermionic converters obtained in terms of electrodes and interelectrode gas parameters, exemplifying nuclear fuel element
14 p2400 A69-29222

Water moderated beryllium reflected reactor design for testing NERVA or Rover type fuel elements in nuclear environment, noting core location
[AIAA PAPER 69-513] 16 p2810 A69-32656

Reactor testing, fuel elements and support materials for nuclear rocket program, discussing Phoebus 2A, Pewee I and nuclear furnace
[AIAA PAPER 69-556] 16 p2811 A69-32739

Thermionic reactors for auxiliary space power and electric propulsion applications, discussing converter development regarding nuclear fuel elements
23 p4186 A69-42246

NUCLEAR FUELS

Aerothermal-structural reentry safety evaluation for SNAP-27 radioisotope Graphite Lunar Module Fuel Cask at orbital and superorbital velocities
[AIAA PAPER 68-1166] 03 p0465 A69-13561

Nuclear reactor space power system concept using thermionic diodes, heat pipes and rod control, emphasizing neutronic aspects and feasibility
04 p0630 A69-14799

Critical end-on impact velocities calculated for reentering solid and granular radioisotopic fuel rods with solid and granular earth materials
04 p0630 A69-14800

Heat exchanger type low power solid-core fast nuclear rocket design, discussing fuels, safety aspects and space propulsion applications
17 p3004 A69-33342

Acrothermal-structural reentry safety evaluation for SNAP-27 radioisotope Graphite Lunar Module Fuel Cask at orbital and superorbital velocities
[AIAA PAPER 68-1166] 22 p3979 A69-40551

NUCLEAR FUSION

NT CONTROLLED FUSION

Neutrino radiation in universe with emphasis on stellar neutrino radiation, analyzing emission during nuclear fusion of C-N, He and Ne-Na cycles
01 p0145 A69-10754

Thermonuclear fusion program, discussing plasma instabilities suppression, toroidal installations, magnetic trap systems, plasma heating and dynamic stabilization
01 p0156 A69-11065

Nuclear fusion reactor development, discussing magnetic field confinement of hot dense plasmas and electric power production economic possibilities
08 p1361 A69-20124

Pu 244 and I 129 abundances in early solar system and continuous galactic synthesis model of element formation in stars
08 p1397 A69-20695

Nucleosynthesis in stars and early stage expanding universe, considering related nuclear reactions, helium abundances and kinematics of stars in Galaxy
08 p1357 A69-20893

S-process nucleosynthesis and temperature averaged neutron capture cross sections studied in relation to solar system, considering elemental and specific isotopic abundances
08 p1357 A69-20896

Lead isotopes nucleosynthesis by three mechanisms and contribution of mechanisms to abundances, noting chronology in nucleosynthesis
08 p1357 A69-20897

Nucleosynthesis in dynamics of massive star cores, noting element synthesis by neutron capture in supernova explosions
08 p1401 A69-20898

Model for nucleosynthesis of Li, Be and B in solar system from mass spectrometric measurements of high energy proton production of light elements
08 p1401 A69-20901

Solar element abundances from nucleosynthesis standpoint, discussing measurements with high resolution spectrometer used in double pass with intermediate slit
08 p1402 A69-20906

Radioactive decay products concentration from extinct radioisotopes in meteorites with estimation of formation interval, discussing fissionogenic xenon and solar system nucleosynthesis
08 p1405 A69-20924

Book on stellar, galactic and nucleosynthetic evolution covering nuclear, Fermi, electromagnetic and gravitational interactions roles
11 p1964 A69-25413

Low beta fusion research in open end magnetic mirrors covering scope, end losses, fusion economics, flute instability, stabilization, etc
14 p2498 A69-29843

General algorithm for eruptive plasma instabilities in fusion plasmas, flares and novae, yielding time behavior and dissipative effects
14 p2499 A69-29850

Nucleosynthesis based on stellar spectra and nuclear reactions data, discussing elements in sun and stars, meteorites, solar neutrinos, etc
14 p2529 A69-29985

Plasma physics and controlled nuclear fusion research - Conference, Novosibirsk, U.S.S.R., August 1968, Volume 2
17 p3014 A69-33826

Solar energy release by quark fusion catalysis of alpha reaction without production of neutrinos, noting temperature dependent reaction rate
18 p3186 A69-34643

Synthesis of proton rich nuclei in highly evolved stars, considering p elements production in interior by isobaric transformation
19 p3428 A69-36837

Elements nucleosynthesis during thermonuclear burning of carbon at series of temperatures and for several initial compositions
20 p3612 A69-38163

Big bang and little bang nucleosynthesis, discussing electron-neutrino or electron-antineutrino excess role in He production
21 p3801 A69-38813

Neutrons, protons and alpha particles abundance resulting from nuclear evolution of nondegenerate matter exploding at very high temperatures
22 p3980 A69-40148

Primordial He 3 and deuterium production from magnetic effects during nucleosynthesis epoch of big bang cosmologies
22 p4035 A69-41210

Main sequence star models for diverse solar masses, covering hydrogen burning phase in core and conditions for dynamic instability and mass exchange
23 p4208 A69-41286

Carbon isotopes compared in interstellar formaldehyde transition for galactic nucleosynthesis, discussing spectrum analysis of radio astronomical telescope observations
23 p4220 A69-42376

Nuclear theory of elements origin, discussing nucleosynthesis to interpret abundances
24 p4386 A69-43334

NUCLEAR HEAT

Thermal-chemical rocket based on thermal heating by energy input from nuclear fission process
03 p0496 A69-13666

Plane and cylindrical thermionic converters, considering electricity generation by heating through flame, solar radiation and nuclear flux
14 p2419 A69-29178

Heat generation in meteorites by radioactive isotopes generated by early solar proton irradiation prior to solar system solidification
19 p3411 A69-36098

NUCLEAR INTERACTIONS

NT ELECTRON CAPTURE

NT SPIN-ORBIT INTERACTIONS

Cosmic rays extensive air showers from interaction of particles with nuclei of elements in atmosphere
01 p0144 A69-10752

Strong interactions at energies above 100 Gev, examining use of cosmic ray experiment for qualitative studies of interaction process
03 p0498 A69-12939

Slow proton irradiation of ribonuclease thin layers, determining differential inactivation cross section for various proton energies
03 p0371 A69-13482

Seyfert galaxies high excitation broad emission lines and quasars resemblance, discussing causes of spiral galaxies violent nuclear activity
04 p0657 A69-14689

Natural orbital expansion coefficients of LCAO-MO-SCF-CI wave functions for ground state of H molecule
06 p0960 A69-17112

Isotopic composition in near-surface regions of meteorites due to nuclear processes with low energy solar particles
06 p0989 A69-17282

Muon component of extensive cosmic ray showers, discussing effect of multiplicity of secondary particles created by high energy nuclear interactions
07 p1207 A69-19325

Cosmic ray composition and nuclear interactions at very high energies, comparing results of Monte Carlo simulations with various experimental data
12 p2149 A69-26475

Inelastic interactions between Tev cosmic particles and light element nuclei, describing design and operation of measuring apparatus and derivable data
12 p2093 A69-26583

Superdense stars energy yield from neutrino emission, assuming incomplete degeneration of elementary particle Fermi gas
13 p2336 A69-27435

Nuclear emulsion high energy nucleon-nuclei interaction model accounting for two maxima track formation
13 p2303 A69-28371

Gamma quanta produced during high energy nucleon-nuclei interaction of air atoms recorded with X ray film
13 p2303 A69-28376

High energy nuclear interactions in graphite block at high altitude, recording gamma quanta produced
13 p2330 A69-28377

Wilson chamber and ionization calorimeter determination of cosmic ray particle-carbon nuclei interaction energy characteristics
13 p2330 A69-28379

Fireball events, isobars and meson resonances in very high energy nuclear interactions, discussing dispersion and four momenta transfer methods
13 p2303 A69-28380

Angular distribution of penetrating shower particles produced in nuclear interaction of cosmic rays with C, Sn, Cu and Pb
13 p2330 A69-28381

Pionization cross sections at 100 gev for interactions of cosmic ray neutrons and pions with C and Pb nuclei
13 p2330 A69-28382

Inelastic interaction cross sections of nuclear active particles at C and Fe in 70 to 1000 gev energy range
13 p2330 A69-28383

Inelastic interaction cross sections of nuclear active cosmic ray particles with atomic Fe and Pb in 100 to 1000 gev range
13 p2330 A69-28384

Mean free path of interaction of nuclear active particles in Fe with energies greater than 530 gev
13 p2303 A69-28385

Nuclear interactions between high energy nuclear active particles and C nuclei, studying electron-photon component energy with nuclear photoemulsions
13 p2331 A69-28388

Pion and nucleon interactions with nuclei, analyzing showers for symmetry and isotropy
13 p2331 A69-28389

Asymmetrical showers in interaction of high energy nuclear active particles with atomic nuclei, estimating target particle mass
13 p2303 A69-28391

Nuclear active cosmic ray component energy spectrum determined from calorimetric ionization burst measurements, discussing nuclear particle interactions absorption coefficients
13 p2331 A69-28393

Nuclear active cosmic ray component particle energy spectrum and nuclear cascade avalanches curves, using ionization calorimeter with Pb absorber
13 p2303 A69-28399

Sea level fluctuations of electron-photon, muon and active nuclear components of extensive cosmic ray showers determined, obtaining shower parameters
13 p2332 A69-28406

Soviet book on nuclear interactions in spacecraft shielding covering proton-Al nuclei inelastic interactions, secondary radiation, solar radiation effects, radiation belts, etc
14 p2481 A69-29817

Three dimensional Monte Carlo calculations for hadronic component of extensive air showers using semiempirical model high energy nuclear interactions
15 p2678 A69-31482

Near horizontal air showers relationship to direct muon production and heavy triplet particles of unit charge, discussing nuclear interactions and muon bremsstrahlung
15 p2678 A69-31499

Cosmic ray particle Pb nucleus interaction energy transfer to electron photon cascade in first inelastic collision, noting dependence on particle energy
17 p3008 A69-33387

Black body radiation at very high temperatures, discussing pion-nucleon interaction in pion gas in thermal equilibrium
23 p4238 A69-41358

NUCLEAR ISOBARS

Photoemulsion stacks irradiated by protons in magnetic field, determining nuclear isobar generation during quasi-nucleon interactions
13 p2303 A69-28373

Fireball events, isobars and meson resonances in very high energy nuclear interactions, discussing dispersion and four momenta transfer methods
13 p2303 A69-28380

NUCLEAR MAGNETIC RESONANCE

NT PROTON MAGNETIC RESONANCE

Raman spectra and temperature dependent nuclear quadrupole resonance frequencies of p-dichlorobenzene and p-dichlorobenzene-D, calculating librational amplitudes
01 p0122 A69-10286

Cl 35 nuclear quadrupole resonance spectra of 3,6-dichloropyridazine, tetrachloropyridazine, 2,6-dichloropyrazine and chloropyrazine
01 p0123 A69-10290

Low temperature thermometer based on temperature dependence of frequency of F-19 nuclear magnetic resonance in antiferromagnetic manganese difluoride
06 p0927 A69-17703

Superconductors with overlapping energy bands studied by nuclear magnetic resonance method
07 p1198 A69-18513

Gas-liquid and thin layer chromatography and nuclear magnetic resonance techniques to steric analysis of diketopiperazines
07 p1075 A69-19498

Quadrupole splitting of Na 23 nuclear magnetic resonance /NMR/ to investigate spontaneous polarization, coercive field and domain characteristics in Rochelle salt ferroelectric phase
09 p1559 A69-22283

Multiple particle production and resonance events during high energy particle collisions
13 p2303 A69-28372

Self diffusing substance /salt/ distribution in turbulent water flow at different Reynolds numbers by NMR, obtaining diffusion function consistent with experiments
14 p2430 A69-29424

Nuclear magnetic resonance flowmeter operating from outside pipe walls, discussing operating principles and applications
15 p2616 A69-31290

Validity of Lorentz invariance, discussing nuclear magnetic resonance test on torque for spin of electrons, muons and neutrons
18 p3176 A69-35007

Nuclear magnetic resonance of epsilon and delta phases in NbN system with nitrogen mole fractions
19 p3383 A69-36445

Boron 11 nuclear quadrupole coupling constants in solid boron halides, finding fine structure on nuclear magnetic resonance in boron fluoride
20 p3483 A69-36935

Energy level NMR spectral analysis for spin systems with sets of magnetically nonequivalent chemical-shift equivalent nuclei
20 p3579 A69-37348

NT HYPERONS

NT NUCLEONS

NT PHOTOELECTRONS

NT PIONS

NT POSITRONS

Low energy muons and nuclear active particles measured with extensive air showers array composed of scintillation detectors, spectrometer and Geiger counters
06 p0990 A69-17299

Nuclear particle plastic dielectric track detectors to record distribution of fissionable and heavy elements in nature and cosmic radiation
08 p1401 A69-20899

Mean free path of interaction of nuclear active particles in Fe with energies greater than 530 gev
13 p2303 A69-28385

Nuclear active particles energy in extensive air showers measured with ionization calorimeter, noting discrepancy attributed to ionization bursts
13 p2331 A69-28387

Nuclear interactions between high energy nuclear active particles and C nuclei, studying electron-photon component energy with nuclear photoemulsions
13 p2331 A69-28388

Angular distribution of nuclear particles dispersed during motion determined from photon energy and inelasticity coefficient
13 p2303 A69-28390

Asymmetrical showers in interaction of high energy nuclear active particles with atomic nuclei, estimating target particle mass
13 p2303 A69-28391

Cosmic ray postinteraction nuclear active particle energy spectrum measurements with ionization calorimeter, noting energy underderrating
13 p2331 A69-28392

Nuclear active cosmic ray component energy spectrum determined from calorimetric ionization burst measurements, discussing nuclear particle interactions absorption coefficients
13 p2331 A69-28393

High energy nuclear active particles and muons studied with calorimeters, noting cascades muon origin and muon energy spectra
13 p2331 A69-28395

NUCLEAR PHYSICS

NT REACTOR PHYSICS

Superdense matter possibly present in neutron stars, discussing relation with Einstein theory and nuclear physics
06 p1012 A69-18240

Nuclear science - IEEE Conference, Montreal, October 1968
07 p1179 A69-19184

NUCLEAR POWER PLANTS

Electric position servosystems for 50 ton telemetry reception antenna and 1200 ton loading turntable of nuclear power plant
04 p0585 A69-15184

Dissociating gas as working fluid for space plant, noting role in radiator area reduction
04 p0551 A69-15313

Nuclear power plant licensing, discussing public safety considerations by AEC and applicant responsibility in assuring freedom from undue risk
10 p1723 A69-23398

Solar and nuclear electric power technology for electric propulsion
[AIAA PAPER 69-826] 16 p2741 A69-32709

Nuclear aircraft power plant, discussing safety, economy and obstacles
[AIAA PAPER 69-554] 16 p2811 A69-32761

STAR /Stud and Rocker Panel/ four couple section improved by incorporating bonded tungsten electrical contacts for PbTe thermoelectric elements
23 p4188 A69-42261

NUCLEAR POWER REACTORS

NT SNAP 8

NT SNAP 10A

NT SPACE POWER UNIT REACTORS

Nuclear reactor space power system concept using thermionic diodes, heat pipes and rod control, emphasizing neutronic aspects and feasibility
04 p0630 A69-14799

Polonium 210 production for radiothermal propulsion via bismuth irradiation in graphite gas power reactor
05 p0791 A69-15594

Nuclear fusion reactor development, discussing magnetic field confinement of hot dense plasmas and electric power production economic possibilities
08 p1361 A69-20124

Nuclear power supply with in-core thermionic reactor for space power source and use in satellite TV, discussing theory, design and components
08 p1350 A69-20871

Power generating equipment operating with high temperature plasma as working medium requiring reactors with plasmized nuclear fuel coupled to MPD generators
10 p1738 A69-23489

Systems analysis of Rankine cycle nuclear-electric potassium space power system using Li cooled fast reactor and high temperature turbine inlet
23 p4189 A69-42266

NUCLEAR POWERED SHIPS

Performance potential of high speed ocean-going air cushion vehicles with aircraft nuclear power plants [AIAA PAPER 69-416]
15 p2550 A69-30480

NUCLEAR PROPELLED AIRCRAFT

Performance potential of high speed ocean-going air cushion vehicles with aircraft nuclear power plants [AIAA PAPER 69-416]
15 p2550 A69-30480

Nuclear aircraft power plant, discussing safety, economy and obstacles [AIAA PAPER 69-554]
16 p2811 A69-32761

NUCLEAR PROPULSION

Thermal-chemical rocket based on thermal heating by energy input from nuclear fission process
03 p0496 A69-13666

Low thrust nuclear engine using hydrogen suitable for transfer missions
05 p0791 A69-15598

Advanced electrical and nuclear propulsion systems for European launchers, comparing performances with chemical propulsion
06 p0984 A69-17628

Fluid and thermodynamic modeling for ground test simulation of nuclear rocket vehicle liquid hydrogen propellant behavior [SAE PAPER 690201]
07 p1178 A69-18306

Monograph on requirements for high speed interplanetary flights with nuclear engines and refueling at destination
09 p1586 A69-21298

Common nuclear propulsion modules for wide spectrum of manned planetary missions, discussing payload, mission and program flexibility [AIAA PAPER 68-590]
09 p1539 A69-21984

Book on theory and design of jet, rocket, nuclear, ion and electric propulsion systems noting combustion, detonation, fluid injection and space mission applications
11 p1943 A69-25582

Nuclear rocket propulsion, discussing solid core and fluid core systems for reactors, nozzles, feed systems, control, component design and performance
11 p1914 A69-25590

Space propulsion by radioisotope energy noting thermal heating, thruster configurations, propulsion system, mission capabilities and current thruster technology
11 p1914 A69-25591

Problem areas within cryogenic chemical and nuclear propulsion systems for space missions, noting available technology and limitations [AIAA PAPER 67-454]
12 p2174 A69-26782

Electric rocket propulsion, discussing roles of plasma and gas discharge physics in development of electromagnetic, electrostatic and thermoelectric nuclear systems
13 p2325 A69-28253

Zirconium hydride thermoelectric power system for space missions, discussing compactness, shield weight, temperature capability, reliability and SNAP 10A program
16 p2809 A69-31723

Solar and nuclear electric power technology for electric propulsion [AIAA PAPER 69-826]
16 p2741 A69-32709

Heat exchanger type low power solid-core fast nuclear rocket design, discussing fuels, safety aspects and space propulsion applications
17 p3004 A69-33342

Nuclear powered surface effects machine performance estimates, calculating reactor power and payload fraction for various clearance heights, gross weights and velocities
18 p3171 A69-35180

Technology, design, development, qualification and operational elements noting effects on performance, economics and scheduling of nuclear vehicle [AIAA PAPER 68-591]
21 p3769 A69-39752

Nuclear propulsion for solar system exploration, discussing NERVA solid core nuclear fission rocket,
21 p3792 A69-39572

nuclear-electric rockets and hybrid nuclear rocket/nuclear electric rocket systems [AAS PAPER 69-330]
24 p4349 A69-42871

NUCLEAR RADIATION

NT BETA PARTICLES
NT FAST NEUTRONS
NT GAMMA RAY BEAMS
NT GAMMA RAYS
NT PHOTONEUTRONS
NT SPALLATION
NT THERMAL NEUTRONS

Nuclear radiation dose rate and atmospheric ionization from radioactive fallout and natural sources, discussing fallout effect on population
01 p0145 A69-10982

Nuclear radiation damage vs thermal decomposition of diaminitrotrinitrobenzene and hexanitrostilbene, analyzing unchanged residual compound
02 p0304 A69-12500

Iris satellite experiments in astrophysics including nuclear and solar induced electromagnetic radiation
03 p0427 A69-12849

Explosive containment capsule for nuclear reactor irradiation
04 p0629 A69-14480

Book of engineering compendium on nuclear radiative shielding, discussing radiation sources, attenuation methods, induced heat generation, ducts and voids in shielding technology and design
05 p0791 A69-15830

Nuclear radiation influence on pool boiling heat transfer to liquid helium, using irradiated copper as boiling surface [ASME PAPER 68-WA/PID-3]
05 p0791 A69-16164

Nuclear and space radiation effects - IEEE Conference, University of Montana, July 1968
06 p0973 A69-16861

Nuclear pulsed radiation dosimeter based on strain gage measurement of induced thermal expansion, noting separation of neutron and gamma ray components
06 p0922 A69-16892

Laboratory simulation methods for cosmic nuclear radiation, discussing dosimetry methods
11 p1862 A69-24875

Soviet monograph on nuclear radiation effect on structure and properties of metals and alloys covering electron, gamma and neutron radiation
12 p2114 A69-26469

Baryon passive nuclear state nonexistence indicated by above and below ground calorimetric telescope method of nuclear cascade observation
13 p2331 A69-28401

Sirene 302 thermionic converter lifetime during irradiation in Triton immersion pile, considering effects on conversion efficiency
14 p2481 A69-29198

Diurnal variations in gamma rays produced by proton bombardment ascribed to geomagnetic time dependence for low energy solar proton cut-off
16 p2850 A69-32308

Aluminum capsule used in test reactor to irradiate explosive and propellant samples, determining radiation effects
17 p3004 A69-32945

Mossbauer spectroscopy, discussing nuclear resonance fluorescence and equipment
18 p3099 A69-34622

Nuclear environment irradiation effects on materials, emphasizing radiation chemical processes affecting polyimide and copolymer of styrene and alpha-methylstyrene
19 p3356 A69-35530

Primitive low energy Fe-group nuclei irradiation of meteoritic crystals from studies of pyroxene and feldspar from meteorites, discussing astrophysical implications
20 p3590 A69-37569

Transient effects of nuclear radiation bursts on dielectric properties of refractory low loss ceramics at L, S and X bands
20 p3584 A69-38065

NUCLEAR RADIATION SPECTROSCOPY

Nuclear gamma ray astronomy utilization for stellar interior detection, showing identification of key radioactive nuclei of supernova at explosion time
21 p3792 A69-39572

NUCLEAR REACTIONS

NT ANNIHILATION REACTIONS
NT CONTROLLED FUSION
NT ELECTRON CAPTURE
NT ELECTRON SCATTERING
NT HIGH ENERGY INTERACTIONS
NT NEUTRON EMISSION
NT NEUTRON SCATTERING

NT POSITRON ANNIHILATION
NT PROTON-PROTON REACTIONS
NT PROTON SCATTERING
NT RADIOACTIVE DECAY
NT RESONANCE SCATTERING
NT SPALLATION
NT SPIN-ORBIT INTERACTIONS
NT THERMONUCLEAR REACTIONS

Preatmospheric meteorite size determination from distribution of radioactive isotopes resulting from nuclear reactions produced by cosmic rays, discussing error sources
01 p0159 A69-11375

Absorption cross section for 68 Mev positive pion absorption by $1p\ 3/2$ neutron in C^{12} nucleus followed by single proton emission at 11 degrees
02 p0282 A69-11460

Absolute cross sections for coincidence detection of deuteron breakup by 42 Mev alpha particles, showing He 5 and Li 5 final state interaction peaks
03 p0472 A69-13469

Neutrino groups generation in internal regions of sun, analyzing flux ambiguities due to error of cross section parameter of nuclear reactions
10 p1757 A69-22827

Line spectrum of flare gamma radiation due to atmosphere nuclei excitation by high energy proton acceleration
11 p1945 A69-24241

Equilibrium state of matter at high temperatures and densities with respect to nuclear reactions, determining neutron-proton ratio
11 p1957 A69-24403

Neutrons overloaded nuclei role studied for neutronization of matter at high densities in statistical equilibrium with respect to nuclear reactions
11 p1957 A69-24404

Negative pion from 600 MeV synchrocyclotron stopped in thin Li 6 target in search for excited states of triton
12 p2132 A69-26297

Nuclear energized pulsational instability of stars based on linear quasi-adiabatic theory, including models with hydrogen burning shells
13 p2340 A69-27576

Proton initiated nuclear cascade in atmosphere calculated using Monte Carlo method, relating electron number to primary proton energy
13 p2331 A69-28397

Cosmic ray chain reaction particles energy spectrum determination in heavy media, discussing cascade parameter application in showers development
13 p2303 A69-28412

Solar system light elements investigated assuming Li, Be and B abundance as nuclear reaction products of high energy particles accelerated in early sun formation
13 p2354 A69-28495

Stellar Si burning at constant temperature studied for various initial abundance compositions, noting convergence toward pure Si relaxation
14 p2529 A69-29983

Validity range of nuclear quasi-equilibrium approximation for stellar silicon burning, discussing time rates of nuclear abundance changes and temperature effect
14 p2529 A69-29984

Nucleosynthesis based on stellar spectra and nuclear reactions data, discussing elements in sun and stars, meteorites, solar neutrinos, etc
14 p2529 A69-29985

Neutrino and antineutrino emission by URCA process calculated, assuming nuclear reactions in static and beta processes in kinetic equilibrium
15 p2674 A69-30542

Na 22 and H 3 production rates determined in stone meteorites exposed to 3 Gev isotropic protons, using radionuclide distribution data of exposed thick stone target
19 p3425 A69-36423

Stellar nuclear reactions at low energies studied to provide predictions of cross sections in carbon burning
20 p3612 A69-38164

Abundance compilations of elements due to nuclear processes, discussing carbonaceous chondrites character
21 p3789 A69-38812

Angular distributions for Sc 45-Ti 46 nuclear reactions involving 41 Mev alpha particles bombardment described by Born approximation
22 p3988 A69-41044

Equilibrium state of matter at high temperatures and densities with respect to nuclear reactions, determining neutron-proton ratio
24 p4391 A69-43793

Neutrons overloaded nuclei role studied for neutronization of matter at high densities in statistical equilibrium with respect to nuclear reactions
24 p4391 A69-43794

NUCLEAR REACTOR CONTROL

Nuclear reactor space power system concept using thermionic diodes, heat pipes and rod control, emphasizing neutronic aspects and feasibility
04 p0630 A69-14799

Pneumatic instrumentation line transfer function approximated by system model for simplifying reactor control system analysis
[IEEE PAPER 2D-6] 07 p1059 A69-19190

NUCLEAR REACTOR MATERIALS

U REACTOR MATERIALS

NUCLEAR REACTORS

NT BREEDER REACTORS
NT FAST NUCLEAR REACTORS
NT GAS COOLED REACTORS
NT GASEOUS FISSION REACTORS
NT LIQUID COOLED REACTORS
NT LITHIUM COOLED REACTOR EXPERIMENT
NT MOLTEN SALT NUCLEAR REACTORS
NT NRX REACTORS
NT PHOEBUS NUCLEAR REACTOR
NT PLUM BROOK REACTOR
NT SNAP 8
NT SNAP 10A
NT SPACE POWER UNIT REACTORS
NT WATER MODERATED REACTORS

NASA Plum Brook Reactor Facility /PBRF/ for determining radiation tolerance to support nuclear power application in space for propulsion and power
03 p0463 A69-13128

Thermal-chemical rocket based on thermal heating by energy input from nuclear fission process
03 p0496 A69-13666

Explosive containment capsule for nuclear reactor irradiation
04 p0629 A69-14480

High temperature eddy current crack detection technique for atomic reactor components under high thermal gradients
04 p0607 A69-14972

Ultrasonic thermometry for nuclear reactors based on temperature dependence of sound velocity in solids, discussing simulation experiments
[IEEE PAPER 1C-4] 07 p1134 A69-19186

Control system utilizing digital and linear integrated circuits for low power testing of Pewee 1 reactor of Rover program
[IEEE PAPER 2B-6] 07 p1179 A69-19188

Nuclear reactors for powering electrical engines and current supply for satellite devices, noting ROVER project and KIWI reactors
07 p1179 A69-19739

Engineering and reactor parameters associated with ionization of gas passing through nuclear reactor used as closed cycle MHD system working fluid
10 p1723 A69-23485

Thermionic converter power from satellite nuclear reactor for TV satellites, discussing direct heat utilization and applications
12 p2016 A69-25869

Turbomachinery buffer seals, buffer gas regulation and cleanup systems for operation of closed Brayton cycle power conversion system with gas cooled nuclear reactor
13 p2268 A69-27367

All metal nuclear thermionic modular converter, discussing applications, design and material requirements or limitations
14 p2398 A69-29181

Nuclear energy systems, discussing U.S. reactor concepts with emphasis on thermionic systems and space applications
14 p2404 A69-29278

Reactor testing, fuel elements and support materials for nuclear rocket program, discussing Phoebus 2A, Pewee 1 and nuclear furnace
[AIAA PAPER 69-556] 16 p2811 A69-32739

Monte Carlo method application to neutron streaming in hemispherical air-filled ducts in water tank to determine leakage through nuclear reactor shields
18 p3171 A69-35178

Nuclear reactor/thermoelectric power system design for manned orbiting space station, discussing station integration and operation
23 p4187 A69-42256

NUCLEAR RESEARCH AND TEST REACTORS

NT NRX REACTORS
NT PLUM BROOK REACTOR

Cavity reactor consisting of dilute fuel core surrounded by moderating reflector to attain very high temperatures in gaseous cores
07 p1179 A69-18954

SNAP 8 developmental reactor vacuum system providing space environment simulation for nuclear reactor ground testing
13 p2241 A69-28086

Aluminum capsule used in test reactor to irradiate explosive and propellant samples, determining radiation effects
17 p3004 A69-32945

NUCLEAR ROCKET ENGINES

Feasibility of nuclear stage for space missions, discussing Saturn 5 third stage replacement, payload gain, reactor and engine size
08 p1409 A69-20158

Out-of-core thermionic reactor power increase by using central heat pipe in coaxial cavity
09 p1441 A69-21836

Stability analysis including delayed collector and structure coefficients, showing thermionic reactor instability with all negative reactivity coefficients
09 p1442 A69-21841

Nuclear rocket propulsion, discussing solid core and fluid core systems for reactors, nozzles, feed systems, control, component design and performance
11 p1914 A69-25590

Electric and ion propulsion with solar array or nuclear reactor energy sources, discussing thermal thrusters, electrostatic thrusters and plasma thrusters
11 p1944 A69-25592

Nuclear rocket propulsion operation, design, properties and performance of electrostatic, electrothermal and electromagnetic systems
13 p2297 A69-28254

Nuclear type cylindrical thermionic converter with porous adsorbent structure and liquid cesium tank
14 p2397 A69-29174

Fast and thermal thermionic reactor systems characteristics including fissile material, components mass, power output and flattening and design features
14 p2480 A69-29182

Thermionic reactor systems, discussing hybrid nuclear rocket/nuclear electric Mars mission, design features, performance and electric power characteristics
14 p2480 A69-29183

Thermionic reactor design for electric propulsion with emphasis on reactor power and fuel energy and fast neutron flux
14 p2509 A69-29184

Thermionic converter with external fuel surrounding inner emitter annulus for use in in-core reactors
14 p2480 A69-29185

Out-of-core thermionic reactor concept for space power supply using lithium heat pipes in crossed layers
14 p2480 A69-29187

In-core thermionic reactor space power plants stability and control criteria, comparing linear and non-linear models
14 p2481 A69-29189

Deposition and interdiffusion of W layers on Mo emitter of in-core thermionic reactor, investigating microstructure of transition zone
14 p2462 A69-29210

Thermionic reactors U.S.S.R. space and other programs, considering power output, heat exchange and losses, neutron physics and design parameters
14 p2404 A69-29277

Nuclear energy systems, discussing U.S. reactor concepts with emphasis on thermionic systems and space applications
14 p2404 A69-29278

Analog computer for design of control systems used in nonnuclear testing of nuclear rocket engine components and subsystems
15 p2589 A69-31289

Nuclear rockets as Saturn 5 third stages, emphasizing increased payload or velocity utility and resulting engine and stage requirements
[AIAA PAPER 69-555] 16 p2867 A69-31849

Nuclear solid core rocket engine performance for interplanetary orbital launch of spacecraft by multiorbit injection
[AIAA PAPER 69-535] 16 p2810 A69-32660

Gaseous reactor fluid mechanics for nuclear rocket engines, discussing experiments on geometries used in open cycle engine for acceptable uranium loss rate
[AIAA PAPER 69-477] 16 p2811 A69-32728

Reactor testing, fuel elements and support materials for nuclear rocket program, discussing Phoebus 2A, Pewee 1 and nuclear furnace
[AIAA PAPER 69-556] 16 p2811 A69-32739

Heat exchanger type low power solid-core fast nuclear rocket design, discussing fuels, safety aspects and space propulsion applications
17 p3004 A69-33342

Fluid dynamic simulation of gas core nuclear rocket chamber for separating light and heavy gas via centrifugal force produced by MHD-driven rotational flow
[AIAA PAPER 69-727] 17 p3004 A69-33483

Secondary flows in confined viscous vortex for nuclear rockets, employing rotating disk in chamber end wall for recirculation
19 p3296 A69-35756

Liquid, solid, hybrid propellant and nuclear, electric and air breathing rocket engines, discussing orbiting payload cost, controllability, operating environments, velocity, etc
19 p3395 A69-36321

Nonintegral burn of solid core nuclear rockets, discussing modular stage concepts approach to low cost space exploration
[AIAA PAPER 68-589] 21 p3768 A69-39026

Time-optimal nuclear rocket propellant start-up with thermal stress constraints based on distributed parameter model, deriving algorithm for flow rate increase
21 p3768 A69-39632

Cement materials to attach thermocouple to stainless steel tubing in nuclear rocket engine nozzle, considering thermal conductivity, bond and tensile and compressive strengths
21 p3753 A69-39699

Technology, design, development, qualification and operational elements noting effects on performance, economics and scheduling of nuclear vehicle
[AIAA PAPER 68-591] 21 p3769 A69-39752

Thermionic reactor concepts and development in U.S., comparing strengths and weaknesses
23 p4186 A69-42245

Thermionic reactors for auxiliary space power and electric propulsion applications, discussing converter development regarding nuclear fuel elements
23 p4186 A69-42246

West German research in thermionic diodes and reactors, describing terrestrial version of thermal in-core thermionic reactor project
23 p4188 A69-42258

NUCLEAR SCATTERING

NT NEUTRON SCATTERING

NT RESONANCE SCATTERING

Asymmetry of polarized protons scattered from He 4 at 540 Mev for laboratory angles between 4 and 42 degrees
04 p0632 A69-14966

Surveyor scientific instruments and operation on moon, reviewing TV camera, alpha scattering instrument and surface sampler
[JPL-TR-32-1358] 08 p1312 A69-19850

Angular distribution of nuclear particles dispersed during motion determined from photon energy and inelasticity coefficient
13 p2303 A69-28390

Inelastic scattering cross sections calculated, comparing results for various nuclear states expressed as Wood-Saxon radial and harmonic oscillator functions
14 p2504 A69-29006

Core polarization effects in inelastic scattering cross sections for several nuclei in 2s-1d shell, using Hartree-Fock wave functions and Born approximation
14 p2487 A69-29007

High energy scattering approximation valid from small to large angles, discussing errors and proton scattering by He
14 p2487 A69-29008

K meson-light nucleus scattering lengths calculated using multiple scattering theory with Kim zero range
15 p2655 A69-30309

Coulomb interference corrections in pion-He scattering, discussing three specific formalisms
18 p3176 A69-35008

Approximations for meson-nucleus scattering length from energy level measurements on mesonic atoms, emphasizing formula for negative pi mesonic atoms
22 p3987 A69-41004

Scattering of high energy Ar beams by room-temperature Ar, He and H molecules, deriving interaction energies at internuclear distances
22 p3988 A69-41187

Intermediate energy protons elastic and quasi-elastic scattering from light nuclei, correlating p-D, p-He-3, p-p and p-He-4 data with various scattering models
24 p4352 A69-43123

Positronium formation in positron-helium scattering, including polarizability in potentials appearing in final equations
24 p4353 A69-43815

NUCLEAR SHIELDING

U RADIATION SHIELDING

NUCLEAR SPIN

Proton spin-lattice relaxation time in dilute liquid and gas solutions of orthohydrogen in parahydrogen, noting dependence on temperature, density and composition

06 p0961 A69-17141

Proton spin maser oscillator with emission coils coupled by prepolarized liquid, discussing tuning and detuning

08 p1324 A69-20231

Deep freezing of nuclear precession magnetometer elements for improving instrument characteristics

14 p2446 A69-29083

Energy level NMR spectral analysis for spin systems with sets of magnetically nonequivalent chemical-shift equivalent nuclei

20 p3579 A69-37348

Low noise nuclear precession magnetometer noise rejection optimization design specifications for measuring geomagnetic field components

23 p4165 A69-41868

NUCLEAR STRUCTURE

Cosmic rays origin, measurements of energy spectrum and stellar diurnal variations

10 p1757 A69-22823

Nuclear theory of elements origin, discussing nucleosynthesis to interpret abundances

24 p4386 A69-43334

NUCLEAR SUBMARINES

U SUBMARINES

NUCLEAR WEAPONS

Air carrier liability for nuclear weapons damage, discussing international agreements

11 p2003 A69-24260

Computer codes describing nuclear weapons effects associated with X ray transport, neutron transport and X ray interactions with material, fireball, blast environments, etc

15 p2652 A69-30381

Polaris and Poseidon nuclear missile systems, considering efficiency and launching depth from nuclear submarine

19 p3432 A69-36687

NUCLEATE BOILING

NT LEIDENFROST PHENOMENON

Nucleate pool boiling heat transfer of liquid nitrogen from circular disks with different surface conditions including copper and nickel mirror finishes, roughness and coatings

02 p0352 A69-12207

Pool boiling heat transfer from stainless steel coated with Teflon to produce nonwetted surfaces [ASME PAPER 68-WA/HT-12]

05 p0847 A69-16119

Nucleate pool boiling heat transfer data extended to relate effect of heating surface characteristics [ASME PAPER 68-WA/HT-22]

05 p0847 A69-16125

Nuclear radiation influence on pool boiling heat transfer to liquid helium, using irradiated copper as boiling surface [ASME PAPER 68-WA/PID-3]

05 p0791 A69-16164

Natural convection heat transfer for incipient vapor formation in liquid H and N and for nucleate boiling of liquid H [ASME PAPER 68-WA/PID-4]

05 p0848 A69-16165

Inception of nucleate boiling with liquid nitrogen, noting surface finish effects [ASME PAPER 68-WA/PID-10]

05 p0848 A69-16167

Temperature measurement associated with bubbles leaving heat source in subcooled pool boiling carbon tetrachloride analyzed, using high speed motion pictures by schlieren optical system [ASME PAPER 68-HT-47]

13 p2374 A69-27779

Microlayer thickness in nucleate boiling, studying liquid-vapor interface motion of growing bubble near heated surface

13 p2375 A69-27789

Functionality between heat flux and imposed operating conditions during nucleate pool boiling

13 p2376 A69-28142

Nucleate boiling burnout heat flux data for ethane, ethylene and ethane-ethylene mixtures at various pressures, discussing applicability of Noyes equations

15 p2671 A69-31118

Bubble boiling onset in forced fluid flow, deriving equations for calculating minimum temperature difference between wall and fluid, discussing applicability range

16 p2878 A69-31954

Heat transfer from cylindrical copper surface to liquid helium at 4 degrees K, discussing temperature fluctuations in nucleate boiling region

17 p3074 A69-33780

Book on heat transfer from horizontal heating surfaces to stationary boiling liquids, heating surface roughness effect and bubble formation

20 p3633 A69-37917

Induced convection effect on peak pool-boiling heat flux under variable gravity, pressure and size conditions and various boiled liquids

24 p4409 A69-43516

Heat transfer during nitrogen tetroxide nucleate boiling at various pressures and heat fluxes [ASME PAPER 69-HT-58]

24 p4411 A69-43536

Film-nucleate boiling transition for liquid nitrogen in vertical forced flow in electrically heated tube, discussing conduction model and agreement with visual experiment [ASME PAPER 69-HT-26]

24 p4412 A69-43542

Nucleate boiling effect on operation of low temperature heat pipes, using everted stainless steel to permit visualization of wick structure and bubble nucleation [ASME PAPER 69-HT-24]

24 p4412 A69-43544

NUCLEATION

NT CLOUD SEEDING

Ferrite and sigma phase formation in austenitic stainless steels with nickel and chromium content

02 p0269 A69-12764

Condensation-enhanced vaporization rates in nonisothermal systems, noting fume nucleation augmentation of rates into cooler environments

03 p0532 A69-13122

Multiple high field domain nucleation in GaAs, discussing dependence on contact inhomogeneities

05 p0807 A69-15959

Kinetics of homogeneous and heterogeneous growth of centers of new phase of semiconductor during ion bombardment as function of radiation dose

06 p0978 A69-16985

Thermal accommodation coefficient and critical supersaturation for nucleation of mercury vapor on pyrex glass

13 p2321 A69-28005

Dropwise condensation, analyzing nucleation sites, growth, vapor capture, heat transfer rates and surface texture

13 p2376 A69-28143

Semiconductor films synthesis and properties, discussing single crystal films, epitaxial nucleation, nuclei surface distribution, layer kinetics, doping and film-substrate interface

15 p2670 A69-31046

Moon density and nucleation of planets, explaining low density and absence of heavy core by late aggregation from nonmetallic particles

16 p2865 A69-32808

Metal purity effect of nickel and Ni-Mo alloy on nucleation and recrystallization nuclei growth following 80 percent plastic deformation

18 p3159 A69-35449

Aluminum oxide droplets condensation from atmosphere of metal vapor and oxygen, studying temperature and time effects on particle nucleation, growth and distribution

21 p3783 A69-38799

Impurities effects on single crystal film formation of fcc metals on alkali-halide cleavage planes, stressing stacking fault energy importance

22 p3992 A69-39899

Einstein development of theory of fluctuations applied to homogeneous nucleation, calculating activation energy, liquid drop-vapor system equilibrium state peculiarity, etc

22 p3938 A69-40448

NUCLEI

Cosmogonic nature of galactic nuclei activity, emphasizing streamers ejection and new formations in galaxies

12 p2163 A69-27016

Lallemand electronic camera application for spectroscopic observations of unsteady phenomena in galactic nuclei at 4000 A, noting radial velocities

12 p2163 A69-27017

Successive explosions produced two gas systems observed in six Seyfert galaxy nuclei by spectrophotometry, using diffraction spectrographs

12 p2164 A69-27022

Galactic nuclei congeneric and coexisting peculiarities, including hot star planar formations in spiral galaxies

12 p2164 A69-27027

Spiral galaxy nuclei, relating nuclei luminosity to galactic luminosity

12 p2165 A69-27028

Photographic magnitudes of galactic nuclei, presenting plots for stellar magnitude distribution of galactic nuclei

12 p2165 A69-27029

Spiral galaxies with connectors observed in Southern Hemisphere, noting galactic nuclei differences and nucleus relation to galaxy morphological type

12 p2165 A69-27030

Radio emission correlation to nuclei shape in normal galaxies

12 p2166 A69-27040

Comet Ikeya-Seki 1965f primary nucleus splitting date and rate established from dynamic solutions

14 p2524 A69-29710

Nongravitational force dynamic effect and model for rotating cometary nucleus, including changes in orbital elements

14 p2524 A69-29713

Galactic nuclei nature, activity, evolution and classification

14 p2527 A69-29896

Gasdynamic model of comet nucleus region, discussing molecular collisions, surface brightness distribution and dust particle motion

15 p2684 A69-30520

Expression relating gas density, radial velocity and temperature at comet nucleus surface to nucleus surface temperature, applying results to unsteady sublimation process

15 p2684 A69-30521

Spectrophotometry of elliptical galaxy NGC 1052 nucleus from 3400 to 6300 A for relating radio properties and optical characteristics

16 p2853 A69-31610

Physical characteristics of young planetary nebulae and nuclei, discussing classification of objects I 4997, M 3-27 and M 1-2

19 p3423 A69-36226

Inelastic proton scattering cross sections for target nuclei in 2s-1d shell calculated in distorted wave Born approximation with projected Hartree-Fock wave functions

22 p3988 A69-41045

NUCLEI [NUCLEAR PHYSICS]

NT ALPHA PARTICLES

NT DEUTERONS

NT HEAVY NUCLEI

Iodine 123 decay via gamma ray emission, noting energies of several transitions

03 p0470 A69-13099

Lithium, Be, B and fluorine nuclei in cosmic radiation, discussing nature of spectra

06 p0988 A69-12721

Spectra analysis of proton and He nuclei having different charge-to-mass ratios to obtain information on solar modulation and injection spectra

06 p0988 A69-12722

Cosmic ray nuclei energy spectra and abundances above 20 Mev/nucleon determined by OGO-1 satellite experiment, considering He, B, C, N, O, Ne, Mg, Si, Mn, Fe, Co and Ni

08 p1378 A69-20067

Low energy multiply charged cosmic ray nuclei propagation and source characteristics, considering two component model based on OGO satellite measurements

08 p1378 A69-20068

Energy spectra of carbon and oxygen nuclei in primary cosmic radiation, comparing results to earlier measurements and satellite observation

08 p1380 A69-20632

Spatial distribution of residual nuclei produced in thick Fe targets by one and three Gev protons, noting total production and longitudinal variation of production

10 p1760 A69-23411

Neutrons overloaded nuclei role studied for neutronization of matter at high densities in statistical equilibrium with respect to nuclear reactions

11 p1957 A69-24404

Nuclear component energy flux absorption in Fe measured with ionization calorimeter

13 p2330 A69-28386

Form factor of nucleus effect on high energy muons bremsstrahlung cross section

13 p2333 A69-28422

Core polarization effects in inelastic scattering cross sections for several nuclei in 2s-1d shell, using Hartree-Fock wave functions and Born approximation

14 p2487 A69-29007

Nuclear level density and mass shell corrections relationship for deformed and undeformed nuclei

14 p2488 A69-29337

Superdense stars torsional oscillations and crystallization among nuclei from comparison with melting

temperature and transverse shear wave velocities of dense conventional matter
17 p3037 A69-33643

Cosmic ray propagation equilibrium model for rays origin and storage in galaxy, considering energy dependence of nuclei relative abundances
18 p3185 A69-34276

Elastic scattering cross sections for 21-Mev incident protons measured for nuclei differing in mass, determining optical model potential
18 p3179 A69-35489

Quarkian core substance in superstars of great masses, discussing existence as primordial state forming baryon and nuclei and origin in stellar gravitational contraction
19 p3401 A69-35912

Meteorite minerals as detectors for studying fossil record of cosmic ray nuclei, emphasizing feldspars and pyroxenes
20 p3590 A69-37568

Primary cosmic ray nuclei studies during Gemini 2 flight by nuclear emulsion detector with time resolution capability, describing experiment design and equipment operation
21 p3787 A69-38350

Primary H nuclei flux and spectrum near geomagnetic equator, discussing emulsion stack exposure
22 p4005 A69-40520

Relative abundances U-235/U-238, Th-232/U-238, Pu-244/U-238 and I-129/I-127 at solar system formation time to obtain time evolution of gamma process nuclei
22 p3986 A69-40766

Differential cross section and polarization measurements for elastic scattering of high energy protons from light nuclei
24 p4352 A69-43125

Neutrons overloaded nuclei role studied for neutronization of matter at high densities in statistical equilibrium with respect to nuclear reactions
24 p4391 A69-43794

NUCLEIC ACIDS
NT RIBONUCLEIC ACIDS
NT URIDYLIC ACID

Protein and nucleic acid building blocks sequence differences influence on evolutionary relationship of living organisms, comparing fish and mammal globins
11 p1828 A69-25456

Quantitative gas-liquid chromatographic analysis of nucleic acid components including purine and pyrimidine bases, nucleosides or nucleotides
13 p2217 A69-28260

NUCLEON-NUCLEON INTERACTIONS
Underground search for massive strongly interacting cosmic ray particles, using shower selecting extension array and interaction detecting telescope
02 p0310 A69-12831

High energy cosmic ray research facility at mountain altitudes, noting nucleon-proton interactions, particle identification and momentum analysis
03 p0499 A69-12942

High energy inelastic particle collisions observed at high altitude station, using Monte Carlo computations for nucleon-nucleon collision model
13 p2330 A69-28374

Pion and nucleon interactions with nuclei, analyzing showers for symmetry and isotropy
13 p2331 A69-28389

Frequencies of charged secondaries numbers emitted from nucleon-nucleon and pion-nucleon inelastic collisions, observing multiplicity regularity
18 p3177 A69-35009

Cosmic ray neutron studies of atmospheric nucleon component equilibrium and flux fluctuations at atmosphere top
22 p4002 A69-40092

NUCLEON POTENTIAL
Born-Mayer parameters simplifying computation of interatomic potential, tabulating numerical values for 104 mononuclear pairs of neutral ground state atoms
13 p2301 A69-27453

He II excitation spectrum for interparticle potential using pair Hamiltonian with repulsive core and attractive well
17 p3008 A69-33118

NUCLEONICS
Aircraft nucleonic fuel gauging system, using radioactive gas to emit gamma rays for fuel mass sensing
18 p3139 A69-35468

NUCLEONS
Cosmic ray solar diurnal variations for nucleonic component, discussing differential response functions
03 p0501 A69-13751

Extensive air showers characteristics based on models of high energy interactions of nucleons and pions with air nuclei
06 p0990 A69-17301

Fluorine nuclei in primary cosmic radiation identified by counter telescope measurements on Pioneer 8 spacecraft
15 p2676 A69-30886

Cosmic rays nucleonic component latitude at solar minimum activity, using IGY neutron monitor
19 p3396 A69-36411

Errors due to neutron counter radioactivity in cosmic rays nucleon measurements analyzed in reducing readings to barometric pressure
23 p4206 A69-41855

High energy nucleons and electrons accelerated in solar flares, considering interplanetary magnetic field effect on radiation properties near earth orbit
24 p4372 A69-43617

NUCLEOPHILES
Synthesis and nucleophilic reactions of stable alpha-bromoorganolithium reagent
07 p1074 A69-19479

NUCLEOSIDES
NT ADENINES
NT ADENOSINE TRIPHOSPHATE [ATP]

Purines, pyrimidines and nucleosides absorption by Li-, Na-, Mg- and Ca-montmorillonite in aqueous solutions over range pH 2-12 by cation exchange
05 p0716 A69-15973

NUCLEOSYNTHESIS
U NUCLEAR FUSION

NUCLEOTIDES
NT ADENINES
NT ADENOSINE TRIPHOSPHATE [ATP]
NT PYRIDINE NUCLEOTIDES
NT URIDYLIC ACID

Unique sequence of oligonucleotides located in tobacco mosaic virus ribonucleic acid
03 p0370 A69-13461

Binding of lysine-rich proteinoids to organismic or thermally synthesized polynucleotides, noting polyanhydroamino acid interactions with polynucleotides
07 p1074 A69-18635

DNA replication in vivo as function of temperature sensitive polynucleotide ligase mutant Th, tsA80 in strand synthesis
10 p1647 A69-24188

Cell origin in self organizing natural polymers in terms of molecular evolutionary priority of polynucleotides and poly alpha amino acids
22 p3896 A69-40781

Exonuclease function of DNA polymerase from Escherichia coli, discussing hydrolysis of polydeoxyribonucleotides and resistancy of oligonucleotides
22 p3898 A69-41073

Fluorescence properties of nucleotides, polynucleotides and phosphorylated derivatives as function of temperature, pH and ionic strength
22 p3898 A69-41078

Production rates of nuclides measured in stack of glass plates under proton irradiation for calculating cosmic ray production rates in stone meteorites
06 p0989 A69-17283

Meteorite and primordial matter composition related to possible fractionation processes influence, discussing nuclear species abundance
19 p3406 A69-36073

Cosmic-ray-produced stable and long-lived nuclides in iron meteorites, considering shielding effect on spallation production
19 p3411 A69-36099

NULL REFERENCE GLIDE PATH
U GLIDE PATHS

NULL ZONES
Mars entry capsule ionized wake producing circularly polarized antenna radiation null region, noting effect on communication blackout time
22 p3914 A69-40701

Numerical solution method for equation of electric field affected by permanent flux of identical ions
01 p0128 A69-10364

Graphical and analytical interpolation methods for representing initial compositions in equilibrium thermodynamic systems
01 p0176 A69-10403

Complex chemical equilibrium calculation, analyzing thermodynamic principles and solution to nonlinear equations
01 p0023 A69-10588

Three leveled computer program library compiled for numerical analysis
01 p0036 A69-10709

Numerical analysis of temperature variation of spherical spinning satellite with and without radiatively coupled inner shell containing heat source
01 p0162 A69-10761

General predictor-corrector method for system of m ordinary first order differential equations proved stable

if Hermitian forms with coefficients are positive definite

01 p0105 A69-10807

Numerical evaluation of curvilinear integrals and areas, using digital computer

01 p0106 A69-10867

Collection of papers on computational fluid dynamics

01 p0061 A69-10916

Eigenproblem for displacement integral equations with finite cosine transform kernels, extending Roark-Wing numerical method for eigenvalues to kernels

01 p0106 A69-10986

Numerical filtering procedures for gust spectrum analyses compared for gain and phase lag frequency response characteristics, discussing gust acceleration spectra

01 p0084 A69-11052

Numerical method for determining group velocity of waves in homogeneous anisotropic medium, using implicit function from dispersion relation

01 p0131 A69-11117

Stable high order implicit methods to solve numerically differential equation systems with matrix coefficients used for heat conduction equation

01 p0107 A69-11364

Generalized alternating-direction implicit method involving extra parameter for solving Laplace equation used for 3d model problem

01 p0107 A69-11366

Transverse plasma velocity component effect on boundary layer structure between cold plasma and confined magnetic field

02 p0235 A69-11424

Six level model for numerical geopotential forecast allowing for quasi-static and quasi-geostrophic approximations

02 p0273 A69-11434

Numerical method of solving optimum control problems through reduction to solution of simple minimization problems by constructing suitable sequence of auxiliary functionals

02 p0271 A69-11649

Numerical differentiation formulas for coefficients of given characteristic function, using tabulated Stirling numbers

02 p0271 A69-11653

Analytical model of geomagnetic field constructed from Cosmos 49 data using spherical analysis

02 p0240 A69-11698

Numerical calculations for oscillatory solutions of system of nonlinear differential equations, noting circularly polarized magnetic oscillations observed near earth bow shock front

02 p0241 A69-11729

Computer stress analysis may result in automated designs, emphasizing finite element technique

02 p0341 A69-12153

Monograph of lectures on numerical solutions of linear, singular and nonlinear differential equations for boundary value problems using finite differences

02 p0272 A69-12157

Grobner formulas for numerical analysis of differential equations, discussing applications to orbit computations in celestial mechanics

02 p0322 A69-12250

Numerical regularization of single binary collision in n body gravitational problem

02 p0322 A69-12268

Numerical solution on UNIVAC 1107 for model describing symmetrical gravitational collision of two four body systems

02 p0322 A69-12269

Numerical solutions of elastic problems by conformal mapping and finite difference method applied to circumferentially grooved shafts in torsion

02 p0346 A69-12419

Numerical solutions elastoplastic torsion of circumferentially grooved shafts based on flow and deformation type theories

02 p0346 A69-12420

Numerical solution for ambipolar diffusion and kinetic decomposition of rotating body of complex chemical composition in ionized airstream

02 p0191 A69-12580

Automatic determination of relaxation and retardation spectra for linearly viscoelastic materials from experimental data using simple numerical techniques

02 p0348 A69-12605

Numerical estimates for degenerate pinch in InSb, determining pinch parameters

02 p0300 A69-12638

Iterative transfer of boundary values to fictitious contour in numerical solution of partial differential equations [ONERA-TP-646]

03 p0454 A69-12874

Bounded solutions for systems of ordinary second order differential equations

03 p0455 A69-13257

Tabulation of high accuracy gamma function values for some rational arguments, noting applications to Gaussian quadrature formulas, fractional Bessel functions and Airy functions

03 p0455 A69-13375

Collection of Soviet articles on computer methods and programming covering fluid flow by numerical methods

03 p0362 A69-13649

Numerical computer results applied to supersonic flow of perfect gas past staggered cones

03 p0363 A69-13659

Ideal gas flow near stagnation line for blunt bodies, applying van Dyke series truncation method to numerical solution

03 p0364 A69-13660

Numerical technique using transfer matrices to solve boundary value problems in structural analysis

03 p0526 A69-13736

Two dimensional problem of elasticity by numerical solution, outlining program for computer

03 p0527 A69-13750

Digital simulation based on guided missile experience, discussing numerical methods for ordinary differential equations, literature, choice of method and simulation languages

03 p0401 A69-13763

Numerical method for explicit solution of aircraft mass problem based on linearization of equations describing individual aircraft section masses

03 p0367 A69-13790

Three dimensional boundary layers on cones at small angle of attack, presenting numerical solutions with heat transfer effects for wind tunnel model [ASME PAPER 68-WA/APM-24]

04 p0541 A69-14389

Plates yield point loads limit determination formulated as mathematical programming problem, using finite element representations for velocity and moment fields [ASME PAPER 68-WA/APM-21]

04 p0670 A69-14405

Difference approximation with second order accuracy of numerical solution for parabolic type equations

04 p0622 A69-14618

Numerical solution of chemically reacting boundary layer equations, noting loss of accuracy due to numerical cancellations

04 p0588 A69-14737

Method for solving propellant sloshing in rotationally symmetric rocket tanks with arbitrary internal boundaries

04 p0665 A69-14840

Numerical solution of nonlinear two point boundary value problems of boundary layer type, noting shock wave formation in supersonic nozzle

04 p0544 A69-14889

Cavitation stream calculation methods for ideal incompressible fluid with free boundaries, noting cavitation generators and Riabouschinsky problems

04 p0589 A69-14994

Mathematical analysis for mechanism of spherical comet nucleus division as effect of nonuniform surface heating during rotation

04 p0659 A69-14997

Numerical solution of elliptic equations by iteration result in convergence prevention and solution of Laplace and Poisson equations with singular Laplace operator

04 p0625 A69-15133

Boundary condition description effect on numerical accuracy of series solution to boundary value problem by direct method

04 p0681 A69-15283

Characteristic coefficients in method of integral relations calculated by Lagrange interpolation, noting application to numerical solution of differential equations

06 p0857 A69-17102

Numerical method for stress function of elastoplastic torsion of hollow bars during quasi-static monotonic twist compared with relaxation method solution

06 p1023 A69-17370

Optimum control problems solved numerically on computer, noting multivalence of extremal solutions and application to orbital transfer in central gravitational field

06 p0903 A69-17539

Numerical method for attacking-lifting problems of general three dimensional wing executing arbitrary motion in potential flow [AIAA PAPER 69-23]

06 p0862 A69-18040

Aerodynamic coefficients from observed motion of body in flight, eliminating need for closed form solutions by employing numerical solutions to equations of motion

[AIAA PAPER 69-134]

06 p0864 A69-18161

Digital computer methods and numerical techniques to evaluate temperature distributions in spacecraft structures, discussing thermal modeling [SAE PAPER 690199]

07 p1239 A69-18301

Shock waveforms lengthening due to propagation to high altitudes derived from computed numerical values, studying N waves from SST

07 p1054 A69-19463

Soviet book on theory of approximate methods and applications to numerical solution of singular integral equations

07 p1174 A69-19580

Numerical analysis of periodic solutions of restricted three body problem in sun-Jupiter system, noting genealogy of periodic orbits

08 p1382 A69-19874

Numerical studies of initial value problems by boundary value techniques for cases having available asymptotic estimates or periodicity of solutions

09 p1532 A69-21610

Low sensitivity electric circuits synthesis based on analytical and numerical analysis of sensitivity function characteristics of selective polynomial circuits

09 p1472 A69-21780

Finite difference numerical solutions to free streamline axisymmetric potential fluid flow, noting independent and dependent variables consideration in boundary value problem

09 p1481 A69-21920

Digital computer programs for aerodynamics of subsonic gas turbine combustion systems applicable to incompressible flow with specified flow boundaries, noting vortices distribution

09 p1573 A69-22621

Numerical analysis for stresses in finite or infinite plate with arbitrary holes, considering boundary value problems

10 p1793 A69-22882

Numerical solution for three dimensional boundary layers based on stability determinations for linearized difference equations

10 p1631 A69-22902

Numerical orthonormalized system of functions for formulating functional equations in potential and elasticity theory, considering boundary value problems

10 p1801 A69-23687

Iterative method for numerical solution of linear algebraic equations for stationary probability distributions in queueing and reliability theory

10 p1721 A69-23691

Numerical solutions for incompressible Newtonian flow around circular cylinder for various Reynolds numbers

11 p1867 A69-24279

Numerical method for coupled moments of inertia and integral equations of boundary value problems for fluid in moving cavities

11 p1868 A69-24774

Boundary value problems numerical solutions accuracy assessed as function of grid spacing size

11 p1908 A69-24789

Integral representation for Wiener Hopf factorization of functions of complex variables for numerical processing of radiation problems

11 p1851 A69-24998

Dynamic programming approach to numerical solution of elliptic boundary value problems, using Laplace equations

11 p1910 A69-25411

Numerical prediction for nonlinear transient response of structures, considering geometric and material nonlinearities in systems with line elements

11 p1993 A69-25526

Excitation coefficients of waves subjected to sudden expansion in radiating waveguide using integral relations, noting convergence

11 p1855 A69-25621

Numerical computation method for evaluating transition matrix of linear time invariant system, estimating error propagated in transient response

11 p1910 A69-25660

Analytical synthesis of dynamic plant model to insure desired output in response to cyclic action

11 p1861 A69-25714

Exact solutions for two state potential curve crossing in subexcitation molecular collisions in terms of various decoupling schemes

12 p2131 A69-25983

Dahlquist linear multistep methods of stability analysis for ordinary differential equations extended to Volterra integrodifferential equations

12 p2123 A69-26753

Externally pressurized gas lubricated bearings treated theoretically using unevenly distributed supercharging method, noting Reynolds equation numerical integration [ASME PAPER 68-LUBS-44]

13 p2267 A69-27283

U.S. Navy Numerical Value Rating System computing method of selecting lowest cost design approach to accomplish specific function

13 p2383 A69-28098

Numerical methods for solving steady state and transient heat transfer problems suitable for high speed digital computer

13 p2376 A69-28141

Numerical method for time dependent compressible Navier-Stokes equations applied to axisymmetric flow field produced by hypervelocity impact, examining viscous effects [AIAA PAPER 69-354]

13 p2366 A69-28288

Hypervelocity impact of spheres on thin targets studied with numerical solutions utilizing STEEP code two dimensional technique based on hydrodynamic elastoplastic model [AIAA PAPER 69-357]

13 p2366 A69-28290

Energy transfer by simultaneous conduction and radiation between two media in intimate contact, detailing numerical solution method for resulting coupled nonlinear integrodifferential equations

13 p2378 A69-28340

Analytical model of geomagnetic field constructed from Cosmos 49 data using spherical analysis

13 p2258 A69-28729

Numerical solution of differential equations for two channel PFM with pulse element, applying Dirac pulse sequence to input

14 p2426 A69-29148

Numerical analysis for spreading of free turbulent gas jets with arbitrary uneven initial distribution of momentum and heat and mass fluxes

15 p2590 A69-30157

Optimum order for column orthonormalization of sparse matrices, applying results to Gram-Schmidt and Householder methods

15 p2644 A69-30425

Multistage rocket trajectories optimized by second order numerical technique and digital computer program, considering coasting, vacuum flight and transition times

16 p2857 A69-32154

Numerical analysis of asymptotic solution for earth-moon particle trajectories in idealized restricted three body problem

16 p2857 A69-32155

Numerical procedure to optimize complex structures by determining relative proportions of selected elements attaining flutter speed with minimum total mass

16 p2874 A69-32163

Numerical absolute stability test for nonlinear discrete systems using bilinear transformation

17 p2994 A69-32848

Book on quasi-reversibility application to partial differential equations covering parabolic, nonparabolic, elliptic equations and boundary conditions control

17 p2994 A69-33205

Transient thermal analysis of space radiators excluding finite difference equations, noting computer adaptability and time saving [AIAA PAPER 69-615]

17 p3070 A69-33261

Nonlinear rarefied gas flow problems with thermal nonequilibrium solved by numerical methods, considering intermolecular collisions effect

17 p2952 A69-33325

Mach disk and Riemann wave location, size and strength in underexpanded jet flows, proposing model for conservation equation satisfaction [AIAA PAPER 69-665]

17 p2954 A69-33460

Numerical solution of boundary value problems, discussing spectral domain and scattering matrix formalisms

17 p2929 A69-33882

Simultaneous integral equations numerical solution for open optical resonator mode analysis, using kernel function and Fresnel approximation

17 p2983 A69-33883

Book on numerical methods in applied theory of elasticity, discussing oscillations of twisted rods for theory of steam and gas turbine blades

18 p3211 A69-34331

Earth atmospheric large scale motion simulated in laboratory and by numerical technique

18 p3127 A69-34668

Iteration process by difference scheme for numerical solution to Dirichlet problem of two dimensional Poisson equation

18 p3164 A69-34701

Parabolic differential equations solved by variational methods, constructing numerical representations for solutions of initial boundary value problems

18 p3164 A69-34841

Spectral inhomogeneity effect on spectrum of modes emitted by semiconductor p-n junction/ laser

18 p3152 A69-35023

Numerical program for gas dynamics of hydrodynamic flow and radiation transport in diffusion and grey body approximations

19 p3450 A69-36356

Numerical simulation of macrophysical and microphysical processes in convective cloud, including cloud geometry and equations describing dry and moist phases

19 p3362 A69-36497

Moon to earth trajectories analyzed numerically to determine effect of specified earth entry conditions on hyperbolic elements near moon for abort [AAS PAPER 68-089]

20 p3595 A69-37174

Numerical solution of equations of motion of rocket under thrust in inverse square force field, discussing effects of initial acceleration

20 p3595 A69-37203

Numerical evaluation of geometrical optics radar cross sections of general doubly curved convex conducting body using surface fitting method

20 p3494 A69-37848

Book on heat and mass transfer in recirculating flows, presenting elliptic differential equations and numerical solutions by computer

21 p3691 A69-38333

Nonlinear computing schemes examined for necessary and sufficient conditions of stability as derived from Mikhlin linear operators and Frechet derivatives

21 p3678 A69-38746

Reduction of boundary value problems to initial value problems through variables transformation, considering application to eigenvalue problems

21 p3754 A69-38747

Shooting method difficulties in boundary value problem numerical solutions using computer programs to integrate differential equations

21 p3755 A69-38753

Combined analytical and numerical method for thermoelastic boundary problem of unidirectional infinite strip

21 p3836 A69-38927

Stratified cloud transport and evolution, solving kinetic equations by numerical method

21 p3759 A69-39119

Vertical factor equation numerical solution for radio wave propagation in vertically inhomogeneous troposphere

21 p3674 A69-39121

Numerical procedure for structural systems analysis, discussing computer application to hydrodynamic, electric, magnetic, thermodynamic, elastostatic and elastodynamic problems [AIAA PAPER 67-955]

21 p3839 A69-39216

Natural convection in rectangular cavity with nonuniform lateral surfaces temperature, using finite difference scheme with numerical analysis

21 p3855 A69-39853

Numerical method for solution of nonlinear systems applied to damped and undamped motion with symmetrical and asymmetrical elasticity under harmonic excitation

22 p4040 A69-39937

Algorithm for numerical modeling by Monte Carlo method of diffusion bounded light beams in dispersive media, applying to light pulse in cloudlike medium

22 p3981 A69-40248

Small curvature effect on prevention of vibration in shallow shells under random loading numerically analyzed for component modes using linear theory

22 p4044 A69-40600

Numerical analysis of plane Couette flow of rarefied binary gas mixture using relaxation type kinetic model equations, discussing slip velocity, friction coefficient, etc

22 p3931 A69-40778

Liquid drop in electric field numerically analyzed for disintegration dynamics and instability through cross section computation at time intervals

23 p4151 A69-41694

Numerical methods for radiation transport for inviscid stagnation flows, detailing spectral nature of radiation emission and absorption [AIAA PAPER 68-664]

23 p4059 A69-41890

Numerical procedure obtaining scattering matrix of passive reciprocal two port from standing wave measurements, using image circle in Smith chart

24 p4281 A69-42617

Earth-Mars and earth-Venus economical transfers derived for optimal conditions with respect to characteristic velocity, obtaining exact numerical solution [ASME PAPER 69-241]

24 p4380 A69-42855

Numerical methods for nonlinear Volterra integral equations of second kind avoiding special starting procedures, giving convergence theorem

24 p4340 A69-43228

Apollo type reentry trajectory optimization numerical methods

24 p4386 A69-43281

Optimization problems solution applied to separable but bounded state variable problem, providing control over commercial errors

24 p4292 A69-43286

Numerical solutions for time dependent boundary value problems governed by heat equation applied to transient heat conduction in irregularly shaped two dimensional regions [ASME PAPER 69-HT-50]

24 p4410 A69-43521

NUMERICAL CONTROL

Fluidic numerical controls of linear or rotating motors, discussing pneumatic, hydraulic, hybrid logic components and amplifiers

04 p0550 A69-15082

Computer graphics and manufacturing, discussing man computer system for transformation of blueprint to numerically controlled machine tape with no time delay

07 p1089 A69-19741

Numerical control as manufacturing tool, with application to aircraft engine precision components

24 p4318 A69-42710

NUMERICAL INTEGRATION

NT RUNGE-KUTTA METHOD

Phase plane diagram utility in toppling stability analysis of spacecraft, emphasizing numerical integration time reduction

02 p0334 A69-12376

Numerical integration stability of differential equations, noting limiting integration step size for unsteady distillation

02 p0273 A69-12478

Finite difference numerical integration technique for large elastoplastic deformation transient and permanent deflection responses of thin shells

02 p0347 A69-12518

Optimum addition of abscissas in quadrature formulas by expansion of abscissas equation in Legendre polynomials

03 p0455 A69-13372

Integration formulas based on set of Gauss or Lobatto points

03 p0455 A69-13374

Implicit finite difference scheme to integrate unsteady boundary layer equations for compressible gas

03 p0416 A69-13656

Acceleration of charged particles in strong DC magnetic field by electrostatic waves with spatially varying phase velocities integrated numerically on IBM 360/65

03 p0479 A69-14028

Integral equations solved numerically for general nonhomogeneous elastic inclusion problem, using linear elasticity theory

03 p0530 A69-14064

Numerical integration of elliptic mixed boundary value problem in region with curved boundary programmed in FORTRAN for general linear second order partial differential equation

04 p0625 A69-15287

Continuous dynamic systems digital simulation, noting run-time program determined by numerical integration structure

04 p0565 A69-15339

Hybrid computer algorithm for numerical integration of partial differential equations, using assumed sum separation of variables

04 p0566 A69-15346

Recursive formulas for numerical evaluation of real convolution integral for simulation of control systems and electrical networks on digital computer

06 p0947 A69-17250

Chemical kinetic numerical integration techniques applied to equations for chemical relaxation [WSCI PAPER 68-45] 07 p1073 A69-18315

Parasitic eigenvalue in integration of equations governing one dimensional flow of chemically reactive gas 07 p1118 A69-18317

Numerical analysis of stabilization of one component conducting plasma in two dimensional coaxial duct 07 p1190 A69-18757

Numerical method for three dimensional boundary layer equations, applying perturbation technique and independence principle to rotating flat blade [AIAA PAPER 69-227] 07 p1051 A69-19560

Numerical double integral evaluation technique for antenna radiation patterns, discussing error data 08 p1282 A69-20042

Numerical integration of motion equations of electrons subject to electrostatic waves, considering turbulent heating 08 p1368 A69-20806

Second order system response with variable damping computed by stepwise numerical integration 08 p1418 A69-20849

Numerical and kernel expansion procedures for laser mode, discussing Gaussian quadrature numerical integration for conversion to matrix equation 08 p1328 A69-21091

Multistep integration formulas treated as transfer system to examine properties in frequency domain for selection in digital simulation programs 09 p1460 A69-21417

Integration time reduction for equations of motion of vehicle center of mass during parabolic reentry, using Runge principle 09 p1532 A69-21763

Numerical integration of equations of three dimensional laminar boundary layer in conical flow, using integral relation method 09 p1430 A69-21789

Krause numerical solution applied to normal injection in three dimensional incompressible laminar boundary layer [DVL-902] 09 p1482 A69-21971

SNODE /spectra numerical ordinary differential equations/ computer program for solving differential equations and integration with basic time sharing system 10 p1659 A69-23142

Stability and error bounds in numerical integration of ordinary differential equations, determining highest possible degree of stable finite difference form 10 p1719 A69-23518

Integration routines performance used in dynamic systems simulation by digital programs, comparing speed, accuracy and convenience 10 p1661 A69-23854

Instabilities of numerical integration of ordinary differential equations on digital computer, considering difference approximation containing extraneous solutions 10 p1721 A69-24042

Numerical methods for time integrating first order differential equations, emphasizing atmospheric oscillations in baroclinic model, evaluating errors 13 p2290 A69-27636

Isothermal H II region dynamics for moving central star, integrating equations numerically using holograph transformation and Riemann invariants 13 p2347 A69-27712

Monte Carlo method for integral of monotonic continuously differentiable function 13 p2288 A69-27735

Matrix eigenvalues for nonlinear simultaneous algebraic equations, discussing computer program for numerical integration 13 p2289 A69-28227

Equations for steady state combustion of fuel drops in oxidizing atmosphere integrated numerically, obtaining ignition and extinction conditions 13 p2379 A69-28456

HNO role in hydrogen-NO reaction rate data reexamined by numerical integration of governing differential equations 13 p2218 A69-28457

Electron flux-atmosphere interaction solved by numerical integration on computer, discussing auroral ionosphere 14 p2513 A69-29069

External wind shear influence on isolated cumulus cloud evolution based on hydrodynamic and thermodynamic equations numerical integration 15 p2648 A69-30644

Modified Chaplygin method for approximate integration of Cauchy problem for differential equations, estimating rate of convergence 15 p2644 A69-30656

Chetaev /A, lambda/ estimates of approximate integrations of system of ordinary differential equations, analyzing stability with aid of Liapunov functions 15 p2644 A69-30664

Economical computer techniques for numerically integrated finite elements, creating 96 element square matrix 15 p2711 A69-30873

Aerodynamic properties calculations of arbitrary slender supersonic wings using sum of simple integrals 15 p2548 A69-31170

Pseudo Runge-Kutta methods stability in numerically integrating two point Cauchy problems 15 p2646 A69-31261

Numerical integration of subdominant solutions of systems of ordinary differential equations, using partial Wronskians 15 p2646 A69-31519

Finite difference schemes for barotropic fluid free surface model primitive equations tested for numerical integration stability and accuracy 17 p2997 A69-33691

Plane problems of elasticity theory solved numerically using conformal mapping 18 p3219 A69-34709

Numerical methods using analog computer in linear one dimensional transient heat conduction 18 p3229 A69-34835

Cowell equations modified for exact integration of pure Keplerian orbits, considering secular effects 18 p3165 A69-34842

Satellite motion perturbations in vicinity of critical inclination, using Encke method of numerical integration 19 p3397 A69-35607

Ordinary differential equations integration method, presenting algorithm based on double constraint of maximum accuracy and stability 19 p3279 A69-35805

Elliptic system of twelfth order equations describing elastic equilibrium of plate with kinematic functions analyzed by integration procedure 19 p3438 A69-36203

Computer program for numerical integration of chemical reaction rate equations behind steady state hydrogen-oxygen shock wave 19 p3451 A69-36366

Wind and temperature profiles in Ekman boundary layer, using numerical integrations of dynamic equations including time derivative terms 19 p3363 A69-36501

Numerical integrations for modified model incorporating ozone production equation and heating from ozone radiation absorption and long wave cooling for upper atmospheric circulation 19 p3363 A69-36502

Long term integration of fluid motion equations with finite difference scheme using hexagonal grid system to avoid nonlinear computational instability 19 p3364 A69-36508

Numerical integration of atmospheric motion equations in global domain using hexagonal grid, including sphericity corrections and Coriolis term 19 p3364 A69-36509

Numerical integration of lunar motion equations to investigate lunar theory for high precision applications and to examine motion departures from gravitational theory 20 p3603 A69-37560

Nonlinear partial differential equations numerical solution applied to solving Cauchy problem encountered in Goursat problem 20 p3569 A69-38293

Jupiter mass determined by applying Cowell numerical integration to equations of motion for ninth satellite 21 p3795 A69-38468

Navier-stokes equation numerical integration for three dimensional incompressible flow, discussing annulus thermal convection and trigonometric transforms algorithm 21 p3694 A69-38770

Laplace transforms in heat conduction theory in three dimensional infinite homogeneous body 21 p3851 A69-39011

Encke type analytical-numerical integration for solving differential equations of modified set of Lagrange planetary equations, obtaining satellite ephemeris for orbit prediction [AIAA PAPER 69-908] 21 p3807 A69-39340

Numerical calculations for boundary layer flows allowing similar solutions, using iterative numerical integration of integral equation 22 p3929 A69-39925

Navier-Stokes equations numerical integration based on biharmonic operator inversion by alternating direction method of Douglas-Rachford type 22 p3932 A69-40928

Numerical integration of double integral with Cauchy type singularity for calculation of aerodynamic or hydrodynamic load on lifting body 23 p4182 A69-41913

Grobner method of Lie series applied to numerical integration of spacecraft trajectories and n-body problems 23 p4223 A69-42476

Sufficient conditions theorems for investigation of instability of numerical integration methods to solve differential equations 24 p4339 A69-42646

Iterative integration method of numerical quadrature over finite interval for analytic function, taking into account simple nonanalytic singularities in integrand 24 p4341 A69-43229

NUMERICAL WEATHER FORECASTING

Automated layered-nephanalysis and numerical total cloud cover prediction program using moisture data from Tiros 7 photographs 01 p0110 A69-10691

Optimum overrelaxation factor in diagnostic and forecast calculations 03 p0458 A69-13033

Mean meridional pressure profiles and atmospheric mass readjustment time dependence for initially at rest atmosphere with mean baroclinity, using frozen gradient model 04 p0627 A69-15086

Multilevel numerical weather forecast scheme with stable initial data 05 p0789 A69-16636

Energy integral of equations used in studying atmospheric motions in quasi-geostrophic approximation 05 p0759 A69-16641

Multilevel objective weather analysis system for stratosphere and upper troposphere over Australia, using stream function analysis 06 p0950 A69-17787

Truncation error reducing scheme for balanced forecast models 07 p1176 A69-19629

Synoptic process predictability, discussing forecasting of large and small scale processes by mathematical formulas and statistical description 12 p2126 A69-26576

Multilevel numerical weather forecast scheme with stable initial data 14 p2472 A69-28792

Energy integral of equations used in studying atmospheric motions in quasi-geostrophic approximation 14 p2433 A69-28797

Error sources in forecasts for heights of isobaric surfaces obtained by numerical integration of prognostic equations of equivalent barotropic models 19 p3361 A69-35770

Numerical weather prediction using four level primitive atmospheric model for studying frontogenetic processes in deepening cyclone 19 p3303 A69-36408

Numerical weather prediction - Conference, Tokyo, November-December 1968 19 p3362 A69-36496

Operational circulation model numerical experiment suggesting elimination of spurious divergence-on-divergence interactions from implied vorticity equations in primitive equations 19 p3363 A69-36503

Optimum aerological network design, discussing atmospheric model, numerical analysis, data acquisition, weather forecasts, rms measurement error, etc 19 p3364 A69-36505

Numerical wind field prediction based on advection equations and quasi-geostrophic wind assumption, considering equatorial belt in case of zonal pressure field 19 p3364 A69-36506

Mesometeorology in central Europe, discussing applications of numerical techniques to forecasting 20 p3570 A69-37427

Numerical prediction experiment for dynamical structure of tropical atmosphere in equatorial latitudes, constructing pressure, temperature and vertical motion distributions from wind field 20 p3573 A69-37910

Weather prediction, considering mathematical and empirical procedures, computer applications, atmospheric instability, etc

21 p3757 A69-38324

Friction and orography effects on vertical currents in planetary boundary layer and numerical forecasting of baric field

21 p3758 A69-38837

Storm location and severity prediction by pattern recognition theory, using quantized radar data, compared with statistical prediction

21 p3678 A69-39458

Meteorological data real time processing for automatic weather analysis and prognosis, program used and computer output charts

22 p3977 A69-40732

Numerical weather forecasting at high and middle latitudes, discussing geostrophic forecasting equations and barotropic models

23 p4183 A69-42024

Initialization technique for primitive forecast equations balancing Coriolis and pressure forces effects on atmospheric observations

24 p4344 A69-43065

Angular grid spacing resolution near poles effect tests in global prediction model for geophysical fluid dynamics, investigating forecast height and wind fields

24 p4344 A69-43066

NUSSLETT NUMBER

Free convective heat transfer of cylinder in rarefied gas yielding Nusselt number as function of Grashof, Prandtl and Knudsen numbers

05 p0846 A69-15904

Two term expansion for Nusselt number for laminar natural convection about isothermal horizontal cylinder in fluid with vanishingly small Prandtl number

17 p3068 A69-33014

Heat transfer in radial flow between two parallel plates, calculating Nusselt number for laminar and turbulent flows

20 p3633 A69-38176

Heat transfer in curved channel as function of inlet configurations, obtaining Nusselt number equations for thermal and mixed convection and laminar flow

21 p3850 A69-38866

Local Nusselt number beyond abrupt circular channel expansion tested for Reynolds numbers with air as working fluid

[ASME PAPER 69-HT-35] 24 p4411 A69-43532

Transition from turbulent to laminar regime as consequence of high heating rates for internal convective flow, noting roles of Nusselt numbers and friction factors

[ASME PAPER 69-HT-9] 24 p4304 A69-43559

NUTATION

Nutational stability of multibody spin stabilized satellites, discussing moment of inertia ratios role with energy dissipative damper on despun platform

06 p1015 A69-17585

Motion of gyroscopic integrator of linear accelerations, analyzing nutational vibrations imposed on precession

06 p0927 A69-17688

Diurnal nutation and periodic terms of local coordinates using OPL model of Danjon astrolabe, presenting harmonic and Fourier analysis

09 p1596 A69-22059

Instantaneous rotational impulse imparting steady motion of disk determined for coupled gyroscope

13 p2264 A69-28527

Periodic solutions for small nutation angle of quasi-linear autonomous system of equations of motion of heavy solid body moving around fixed point

14 p2445 A69-28896

Liquid filled toroidal shaped rotating damping tube containing bubble, discussing parameters variation effect on spacecraft nutation

16 p2868 A69-32561

Nutation period of 18.6 years using data from International Latitude Service

17 p3027 A69-32868

Boundary layer theory application to dynamics of gyroscope in gimbal suspension, defining nutational and precessional motion

18 p3135 A69-34559

Optimal nutation damping of spin stabilized bodies, using Pontryagin maximum principle to optimize time, consumption and linear time-consumption combination

18 p3208 A69-34774

Time and fuel optimization of angular momentum alignment and nutation elimination of spin stabilized bodies with inertial reference direction

18 p3208 A69-34775

Earth polar wanderings attributed to rotation axis angular displacements generated by density redistribution on geologic time scale

20 p3535 A69-38192

Coordinate transformation of Euler equations governing precession and nutation of self gravitating bodies of viscous fluid in inertial coordinates

21 p3797 A69-38539

Envelope plotting of nutational vibrations of astatic gyroscope under influence of dissipative forces, noting quasi-elastic model

21 p3723 A69-38889

Earth-pole wobble /1951-1966/ by spectral analysis using least square fit method

21 p3716 A69-39244

Motion and stability characteristics of dual spin satellite system with pendulous type nutation dampers, noting mass unbalance effect

[AIAA PAPER 69-857] 21 p3823 A69-39385

Wobble tolerance influence on axis deflection affecting accuracy during assembling of turbine rotors and stators

21 p3733 A69-39719

Controlled motion of space vehicle about center of mass analyzed by equation expressing nutation angle invariance

21 p3830 A69-39839

Eulerian equations for precession and nutation of self gravitating fluid globes of arbitrary structures in inertial coordinates, discussing coplanar case, tidal breathing, etc

22 p4030 A69-40904

NUTATIONAL OSCILLATION

U NUTATION

NUTRIENTS

Human requirements for nutrients under stress responses to space flight, considering synthetic food and hothouse plants

15 p2560 A69-31462

NUTRITION

Nutritive value of protein from discolored algae biomasses on groups of rats kept on algae biomass, casein and soybean diets

02 p0198 A69-11510

Handbook on metabolism and nutrition containing tables, charts and diagrams on food composition, material incorporation into organism, energy exchange and end products

04 p0553 A69-14908

Chlorella seaweed hybrid strains containing larger amounts of amino acids than original parent species

13 p2216 A69-28620

Monosaccharide production from carbon dioxide from respiration or human waste incineration, evaluating toxicological effects of synthetic monosaccharides

15 p2557 A69-31471

Nutritive value of mycelium of *Cantharellus cibarius* mushroom on rats compared with eggs and fresh and sour milk

22 p3892 A69-40273

Glider pilots fatigue attributed to nutritional habits

23 p4106 A69-41796

NUTRITIONAL REQUIREMENTS

NT CALORIC REQUIREMENTS

Biological, psychological and technological requirements in astronaut nutrition programs, examining preservation and reconstitution techniques

04 p0554 A69-15388

Mineral nutrition elements concentration stabilization by correcting solution additions during prolonged *Chlorella* cultivation with medium recycling

10 p1646 A69-23578

Hypokinesia and nutrition deficiency effect on blood coagulation, noting combination with accelerations may lead to hypocoagulation

13 p2212 A69-28625

Human requirements for nutrients under stress responses to space flight, considering synthetic food and hothouse plants

15 p2560 A69-31462

NUTS [FASTENERS]

Crimping method for preventing nuts loosening, discussing elliptical deformation and point crimp for obtaining maximum interference fits

22 p3957 A69-40828

Screw-nut feeder and adjuster systems with compensation for clearance and wear of cutting tools, determining efficiency for conversion of rotary to translational motion

23 p4168 A69-41414

NYLON RESINS

U POLYAMIDE RESINS

NYQUIST DIAGRAM

Circle criterion for stability of nonlinear time varying systems, considering integrator and infinite sequence of impulses in impulse response

06 p0905 A69-17949

Single purpose analog computer with analog and hybrid elements for calculating Nyquist diagrams for feedback circuits

08 p1278 A69-20397

Apollo-Saturn 5 propulsion and structure feedback loop, analyzing Pogo components and Nyquist plot application

[AIAA PAPER 69-877] 21 p3824 A69-39403

NYQUIST FREQUENCIES

Multivariable automatic control systems stability, discussing applicability of Nyquist theorem and alternate frequency criterion

04 p0581 A69-14601

Frequency domain stability criterion for pulse width modulated feedback

06 p0904 A69-17942

External impedance controlled nucleation of Gunn effect domains studied theoretically by Nyquist criterion

06 p0981 A69-18217

Noise emission and Landau damping of plasma resonances related by network theory including Nyquist formula, discussing noise temperature in free fall region

16 p2822 A69-32038

NYSTAGMUS

U ASTIGMATISM

O

O RING SEALS

Wear ring seals evaluation program for application to high pressure high speed liquid rocket turbopumps impeller wear rings

[ASME PAPER 68-WA/LUB-1] 05 p0768 A69-16129

Glass vacuum systems grease free assembly method using heat shrinkable polyolefin sleeve tubing connector for compression of O ring joints

08 p1320 A69-20529

Aircraft onboard weighing system, eliminating O ring seal friction to permit accurate measurement of oleo strut pressure

[SAWE PAPER 748] 18 p3137 A69-34883

O STARS

Far UV spectra of O and B stars in Orion photographed from Aerobee rocket, describing wavelength measurements and line identifications

02 p0327 A69-12712

Hydrogen alpha line strength in 951 O, B and early A stars from narrow band photoelectric measurements for stellar luminosity

03 p0511 A69-13435

Rapid differential rotation effect on massive main sequence O and B stars, discussing bolometric magnitude deficiencies and shifted position in Hertzsprung-Russell diagram

07 p1220 A69-19390

Expanding atmospheres in OB supergiants from radial velocity measurements, proposing tentative temperature and velocity fields

08 p1387 A69-20091

Mass loss observed in Of, Wolf-Rayet and OB supergiant stars from P-Cygni profiles in far UV resonance lines

08 p1395 A69-20641

Far UV spectra of zeta Puppis and gamma super two Velorum with 1.6 A resolution photographed with all reflective objective spectrograph on Aerobee rocket

10 p1788 A69-24120

Least squares iterative program, deriving orbits for O binaries HD 93403 and HD 135240

11 p1963 A69-25257

Pulsars and neutron star formation based on stellar evolution theory, suggesting massive O stars as origin

13 p2337 A69-27517

OB stars absolute magnitude and intrinsic colors in Cleveland system related to MK system

13 p2348 A69-27806

Radial velocities of southern OB stars and supergiants noting tabulation of information

14 p2519 A69-29368

Spectral classifications and UVB photometry for southern association Sco OB 1 containing cluster NGC 6231

15 p2692 A69-30771

Surface gravity and temperature model atmospheres for O-type stars with UV line blanketing
15 p2693 A69-30778

UBV photoelectric observation of OB and open cluster Tr 16 stars in Carina-Centaurus, suggesting no limit in depth distribution
18 p3200 A69-35133

Galactic rotation in Cassiopeia region, studying O, B and A stars circular velocities as function of distance from galactic center
18 p3201 A69-35142

O stars spectrograms study for luminosity and temperature criteria
20 p3598 A69-37463

Southern stars of spectral types between O5 and A3 analyzed for equivalent widths and equatorial rotation velocity from direct intensity spectrogram tracings
20 p3600 A69-37491

MK spectral types for bright southern O and B stars
20 p3612 A69-38161

Faint OB stars data tabulation between Carina and Centaurus, noting open clusters and MK classification
23 p4211 A69-41488

Radial velocities for O and B stars in Milky Way field in Scorpius determined from prism spectrograms with specific dispersion at H gamma line
23 p4211 A69-41489

O stars absolute magnitudes scales, discussing use of Balmer discontinuity in magnitude calculations
23 p4213 A69-41699

OB stars near emission nebula RCW 103, describing galactic structure in Norma
23 p4220 A69-42384

0AO

Active optics system for obtaining perfect mirror figure in orbiting astronomical telescope, using laser and white light sources, interferometers and data converter
12 p2092 A69-26423

Astronomical UV radiation observation by OAO 2 satellite, discussing solar images, corona, chromosphere and UV spectrum, stellar evolution, etc
15 p2689 A69-30597

Orbiting Astronomical Observatory thermal test and evaluation program, discussing equipment and role in experimental design
[AIAA PAPER 69-995] 22 p3920 A69-40373

Spaceborne stored program computer design for OAO-C, noting auxiliary command storage, spacecraft monitoring and malfunction reporting, etc
23 p4132 A69-41736

0AO-A

U OAO

OBESITY

Body composition of USAF flying personnel, evaluating obesity by using radioactive potassium /K-40/ method
14 p2409 A69-29295

OBULATE SPHEROIDS

Earth oblateness, discussing geometric interpretation and direct measurement
01 p0064 A69-10447

Ground coverage of oblate planets by spin stabilized satellites, determining ground areas visible to satellite by solution of quadratic equations
03 p0522 A69-14244

Solar atmosphere model calculations of solar oblateness, discussing flux difference and Dicke experiment on general relativity
08 p1383 A69-19899

Earth ellipsoid fundamental parameters for calculation of earth flattening and normal acceleration due to gravity
09 p1487 A69-21633

Free vibration frequencies and mode shapes for thin orthotropic oblate spheroidal shells, noting isotropic oblate spheroidal shell and isotropic spherical shell
09 p1613 A69-21719

Solar interior rotational angular velocity influence on solar oblateness, noting reduction by turbulent mixing
09 p1600 A69-22201

Motion of satellite of very oblate planet, investigating axisymmetric potential
10 p1774 A69-22969

Solar oblateness and differential rotation time development due to solar wind torque
12 p2157 A69-26308

Satellites trajectories under influence of earth oblateness and low radial thrust acceleration by nonlinear mechanics asymptotic method, discussing osculating orbits
16 p2856 A69-32009

Upper limit of solar oblateness determined from secular stability of differential rotation during evolution
18 p3202 A69-35214

Periodic orbits of Poincare and Schwarzschild types in motion of artificial satellite in disturbed gravitational field of axisymmetric oblate spheroid
21 p3795 A69-38441

Neptune equatorial radius, diameter, flattening and upper atmosphere optical properties determined from photometric curves of star BD-17 occultation
21 p3796 A69-38471

Satellite position perturbation due to earth oblateness using Hansen method
[AIAA PAPER 69-909] 21 p3807 A69-39341

Solar oblateness observed by Dicke and Goldenberg as interaction between slow uniform rotation and turbulent convection
22 p4017 A69-40175

OBlique COORDINATES

Equations for bending of elastic cantilever plate with parallelogram shape in oblique angle coordinate system, constructing functions satisfying Poisson conditions at contour
15 p2710 A69-30861

OBlique SHOCK WAVES

Linear wave interaction with oblique shock waves, noting dependence of transmission, reflection and generation coefficients on Mach number
03 p0414 A69-13137

Boundary conditions in oblique reaction waves in supersonic flow, adding or subtracting heat by chemical reaction
05 p0697 A69-15828

Oblique shock wave propagation through two dimensional steady nonuniform incoming flow, discussing higher order theory via irrotational or rotational disturbances of arbitrary amplitude
[AIAA PAPER 69-39] 06 p0913 A69-18103

Oblique shock wave separation conditions in supersonic gas flow past wedge
09 p1483 A69-22665

Diffraction accompanying reflection of plane shock wave obliquely impinging on walls of obtuse wedge at finite incidence, considering Lighthill method
11 p1873 A69-25135

Oblique shock wave properties with free stream Mach number and flow deflection angle as independent variables, noting explicit solution
11 p1819 A69-25378

Final states of density, velocity and pressure in gas, comparing states reached after transition through single oblique hydromagnetic shock and two successive shocks
15 p2664 A69-31217

Oblique hydromagnetic shock waves in magnetized hydrogen plasma enclosed in pyrex chamber by oscillatory zeta discharge, probing for front development and structure
17 p3013 A69-33823

Multistep axisymmetrical supersonic exit cones optimum geometry design diagram based on external oblique and normal compression shock
21 p3785 A69-39104

OBSCURATION

U OCCULTATION

OBSEVATION

NT SATELLITE OBSERVATION

NT VISUAL OBSERVATION

Observed values concept applied to general relativity theory, considering gravitational energy problem
14 p2483 A69-28858

Epochs and ephemerides of asteroid Amor for 1916, 1924 and 1972, noting unfavorable observing conditions in future
17 p3038 A69-33723

Observer theory application to hybrid inertial navigation systems, discussing error estimation and correction, real time mechanization, eigenvalues, etc
17 p3003 A69-34099

OBSERVATION AIRCRAFT

NT CL- 84 AIRCRAFT

NT F- 5 AIRCRAFT

NT G- 91 AIRCRAFT

NT OH- 6 HELICOPTER

NT OV-10 AIRCRAFT

NT P-1127 AIRCRAFT

NT RECONNAISSANCE AIRCRAFT

Atmospheric measurements and experiments using aircraft as platforms, noting aircraft operation in severe weather, electrical supply problem and aircraft wake problem
[AIAA PAPER 69-157] 06 p0869 A69-18153

NASA Earth Resources Survey Aircraft Program, describing aircraft and remote sensors characteristics
19 p3312 A69-36259

OBSERVATORIES

U ASTRONOMICAL OBSERVATORIES

U GEOPHYSICAL OBSERVATORIES

U JODRELL BANK OBSERVATORY

U LUNAR OBSERVATORIES

U OAO

U OGO

U OGO-D

U OGO-E

U OGO-F

U OSO

U OSO- 3

U OSO-C

U SOLAR OBSERVATORIES

OBSDIAN

U MOLDAVITE

OBSTACLES

U BARRIERS

OBSTRUCTING

U BLOCKING

OCCIPITAL LOBES

Resting EEG and parieto-occipital response changes evoked by slowly repeated flashes in case of severe hypothyroidism secondary to panhypopituitarism
07 p1064 A69-18634

OCCCLUSION

Arterial occlusion effects on retinal structure in cats, describing degrees of cell degeneration
22 p3884 A69-40883

OCCULTATION

NT LUNAR OCCULTATION

NT SOLAR ECLIPSES

NT STELLAR OCCULTATION

S-band radio occultation for probing atmospheres of Mars and Venus
[AAS PAPER 68-185] 02 p0311 A69-11470

Radio occultation measurements of Venus and Mars atmospheres using Mariner spacecraft
02 p0320 A69-12115

Radio amplitude and phase measurements during Mariner-Mars encounter, providing evidence for Martian atmospheric models
02 p0320 A69-12116

Stellar image and spectrum distortions during occultation observed from satellite, discussing recovery of atmospheric composition data from stellar spectra
03 p0421 A69-13346

Radio occultation measurements of planetary atmospheres and ionospheres from orbiting pair
[AIAA PAPER 69-53] 06 p1011 A69-18104

Mercury transits in 1970 and 1973 to resolve prominence threads and spicules, sunspot fine structures, etc
11 p1958 A69-24434

Pioneer 6 S band telemetry carrier Faraday rotation during corona occultation measured by deep space tracking antenna
15 p2700 A69-31419

Meteorological parameters-radio propagation characteristics correlation, studying feasibility of data acquisition by occultation satellite system
21 p3705 A69-38374

Earth atmospheric density measurement by microwave radio occultation techniques, transmitting coherent radio signal to repeater spacecraft from master station
21 p3705 A69-38375

Venus atmosphere structure determined from Mariner 5 flyby S band radio occultation measurements of ionosphere and atmosphere at illuminated and dark sides
21 p3794 A69-38380

OCCUPATION

Occupational attrition estimation methods for determining personnel separation through marriage, death, retirement and transfer applied to engineering and nursing
07 p1245 A69-19728

OCEAN BOTTOM

Aerial photography for near-shore ecology, noting biological cover on ocean floor, submarine biological communities and human activities on submarine life
22 p3894 A69-40995

OCEANOGRAPHY

Orbiting satellite global all-weather oceanographic data acquisition to complement higher resolution data from ships, buoys and aircraft remote sensors
[UN PAPER 68-95878] 01 p0064 A69-10491

NOMAD buoy telemetry system for synoptic oceanographic and meteorological data, using digital processing and dual frequency transmissions
03 p0391 A69-13223

Remote sensing platform requirements for oceanographic and meteorologic observations, discussing orbital and aircraft platforms
[AIAA PAPER 69-154] 06 p1044 A69-18122

Ocean circulation as climate regulator, discussing role in redistributing climate-changing energy input from solar radiation or lunar tidal friction into atmosphere
12 p2067 A69-26333

Remote oceanographic sensing from ships, aircraft and spaceborne platforms, using active /radar and laser/ and passive sensors in visible, IR and microwave regions
12 p2075 A69-26997

Three dimensional model of atmospheric drift currents in equatorial region of world ocean system based on nonlinear differential equations
14 p2472 A69-29405

Passive remote sensing at microwave frequencies for meteorology, oceanography and geology, reviewing physics of wave interactions, mathematics of data interpretation, etc
14 p2414 A69-29514

Satellite observation of ocean surface and subsurface features, discussing onboard equipment and proposed orbits
15 p2607 A69-30190

Sand ridge origin and dynamical setting, discussing morphology-tidal current system equilibrium indicated by theory and field measurements
15 p2596 A69-30443

Spacecraft radar altimetry applied to study of sea surface slopes, tides, tsunamis, storm surges and submarine geology
15 p2609 A69-30461

IR measuring techniques for water surface temperature remote sensing
15 p2617 A69-31543

Sea surface temperature remote sensing by Nimbus 2 satellite using TV camera and medium and high resolution IR radiometer
18 p3130 A69-35057

Oceanographic sensing satellite systems, discussing applications, data requirements, sensors, booster and earth coverage capabilities
18 p3210 A69-35091

Eclogite fractionation role in creation and spreading of suboceanic lithospheric plate, discussing density determination at 100 km depth
18 p3132 A69-35434

Angular dependence of ocean surface-cloudless atmosphere reflectance for solar radiation studied with digitized camera signals from ATS 1 satellite
21 p3704 A69-38372

Tethered polyethylene balloon carrying radio controlled camera for time lapse photographs of wave generated near shore currents
22 p3865 A69-40808

SNAP 21 radioisotope powered thermionic generator with multiple couple Pb-Sn-telluride/Bi-Sb-telluride flat plate configuration for deep sea applications
23 p4069 A69-42248

Synoptic remote sensing oceanography from ships, aircraft and spaceborne platform, discussing fisheries
[AAS PAPER 69-062] 24 p4307 A69-42822

OCEANS

NT ARCTIC OCEAN
NT ATLANTIC OCEAN
NT INDIAN OCEAN
NT PACIFIC OCEAN

Satellites and ocean platforms for civil aviation operations over North Atlantic, noting cost justification dependence on supersonic traffic increase
[UN PAPER 68-95887] 01 p0113 A69-10521

Model for radiative transfer in atmosphere-ocean system by Monte Carlo method, considering Rayleigh and Mie scattering
11 p1877 A69-24851

Airborne magnetometer application for remote measurement of ocean wave spectra, obtaining wave noise power spectra and wave height profile
12 p2075 A69-26998

Radar radiometer by adding radar to scanning microwave radiometer, discussing applications to spacecraft measurement of oceanic winds, waves and precipitation
14 p2421 A69-29528

Ocean and atmospheric interactions analyzed by using hydrodynamic equations for boundary layers
14 p2442 A69-29838

Ocean and water surface temperature measurement by IR remote sensing from aircraft and satellites, discussing accuracy and data correction
[AIAA PAPER 69-590] 17 p2973 A69-33286

Heat flow through ocean floor by measuring temperature gradient and thermal conductivity in ocean sediment
21 p3718 A69-39733

Airborne microwave radiometric measurements of simulated ocean surface under various conditions, suggesting possible wind velocity measurement by satellite
21 p3726 A69-39750

OCTAHEDRITE

U ANATASE
U MINERALS

OCTAHEDRONS

Crystal and molecular structure of mu-oxo-bis/chlorobis/2, 4-pentanedionato/titanium/IV//chloroform solved by symbolic sign determination method and Patterson map interpretation
01 p0023 A69-10411

OCTANE

Electrocatalysts for direct electrochemical oxidation on n-octane in fuel cells, discussing platinum consumption reduction
[ECS PAPER 8] 03 p0368 A69-13856

OCULOGRAVIC ILLUSIONS

Human vestibular reactions at various bodily rotation rates and planes, including counterrotation illusion and nystagmic reaction
12 p2020 A69-26564

Human angular acceleration sensitivity using rotation and oculogyral illusion perception as indicators, relating to spatial orientation and flight control task precision
23 p4101 A69-41674

OCULOMOTOR NERVES

Ocular motor failures in pilots due to convergent and divergent strabismus, discussing low pressure chamber tests and blood pressure effects on cranial nerve
03 p0370 A69-13470

Visual feedback mechanisms in simulated high altitude conditions, discussing physiology of ocular homeostasis adaptation
06 p0882 A69-17647

Oculomotor activity of cosmonauts during orbital flight, analyzing electrooculograms taken during vestibular tests
07 p1063 A69-18594

Electrooculographic method to study eye movements control system for fixation on stationary point or following discretely or continuously moving target
09 p1447 A69-22675

Circadian rhythm of optic nerve impulses in isolated eye of sea hare Aplysia californica in total darkness
14 p2406 A69-28870

Soviet book on nervous mechanisms of vestibular reactions emphasizing mathematical description of operation, neurohythmic changes in cerebral cortex and oculomotor activity modeling
16 p2746 A69-32605

Phase and tonic activity of oculomotor apparatus of rabbits during vestibular reflexes and postrotational nystagmus
20 p3469 A69-37243

Multilevel mathematical model of oculomotor apparatus using neuron networks and complex activators, including computer analysis
20 p3470 A69-37245

Electronystagmographic method of eye movement recording, noting applications to vestibular and visual analysis and study of oculomotor nuclei- vegetative centers relations
20 p3481 A69-37273

Visual suppression association with smooth following and saccadic eye movements in tracking slow moving target
22 p3879 A69-40842

Physiological experiments to investigate aerospace flight stresses effects on oculomotor equilibrium, noting cardiovascular reaction and mechanism for interpretation
23 p4087 A69-41804

Alcoholic hangover effects on human balance system from flying demands viewpoint, discussing ocular-vestibular system disturbances
23 p4089 A69-41817

OFF-ON CONTROL

Optimal control problems with discontinuities, noting jump discontinuities in state variable derivative arising in bang-bang control problems
01 p0049 A69-10003

Performance cost functions for reaction jet controlled system during on-off limit cycle for stable and unstable plant
02 p0278 A69-11965

Predictive logic control of on-off system with one position sensor
[ASME PAPER 68-WA/AUT-14] 05 p0830 A69-16134

Nonlinear bang-bang optimal control problems solution based on differential dynamic programming, noting use of Pontryagin adjoint variables
11 p1860 A69-25444

Hysteresis of on-off element with proportional feedback around element, noting autooscillations and results for electromagnetic relay
12 p2053 A69-26506

Time optimal pitch motion of satellite in circular orbit based on maximum principle, considering variable and constant controls
18 p3207 A69-34677

On-off limit cycle controllers for reaction-jet controlled systems, investigating delay effects
24 p4291 A69-43271

OGEE WINGS

U VARIABLE SWEEP WINGS

OGO

NT OGO-D
NT OGO-E
NT OGO-F

Magnetic field data from OGO-2 spacecraft and surface magnetic observatories, noting magnetic storm occurrence and magnetosphere inflation and detection of polar ionospheric currents
01 p0069 A69-11125

Deployable appendages of OGO attitude controlled spacecraft design
06 p1017 A69-17606

Magnetospheric ELF noise, discussing OGO 3 spectrum analysis
07 p1124 A69-18834

Low energy charged particles in earth magnetosphere observed by OGO satellite
07 p1208 A69-19358

Low energy electrons in magnetosphere from OGO-1 and OGO-3 observations, discussing plasma sheet, magnetic bay activity, electron pressure, temperature and density gradient
07 p1209 A69-19373

Satellite trajectory determination and expected errors for OGO 4 and Geos 1 orbits, noting geopotential, aerodynamic drag and integration contributions
15 p2698 A69-31331

UV OGO observations of atomic hydrogen and oxygen in airglow, comparing results to exospheric models of hydrogen geocorona
15 p2603 A69-31400

Geocoronal Lyman alpha short term and 27-day variations observed by OGO 4 spacecraft attributed to flux variability at solar emission line center
15 p2699 A69-31404

OGO program failure rate analysis with respect to cost, schedule and performance tradeoffs, considering component and systems design and reliability, prelaunch feedback, etc
18 p3207 A69-34519

OGO for conducting diversified measurements to study earth atmosphere, earth-sun relationship, etc
19 p3432 A69-36674

OGO triaxial search coil magnetometer for measuring earth magnetic fluctuations, discussing design rationale and observation results
19 p3284 A69-36675

OGO 4 UV airglow spectrometer consisting of Ebert-Fastie monochromator and photomultipliers with cesium telluride and cesium iodide channels
19 p3315 A69-36682

OGO 5 spacecraft detector instrumentation for measuring electrostatic and electromagnetic waves electric fields with coupled antennas, describing in-flight operation
19 p3315 A69-36683

OGO-D

Thermally excited oscillation experienced by OGO 4 boom antenna demonstrated by mathematical model, showing nonplanar coupled bending-torsion oscillation by solar radiation
07 p1227 A69-18333

OGO-E

Electron detector for OGO-E to measure flux and energy spectrum of electrons in primary cosmic rays
[IEEE PAPER 3C-4] 07 p1135 A69-19198

OGO 5 spectrometric studies of topside ionospheric ion concentrations, noting difference between nighttime and sunlit pass 15 p2599 A69-31345

OGO 5 satellite measurements of intensity and width of Lyman alpha line scattered by hydrogen geocorona 15 p2699 A69-31412

Solar X ray detector aboard OGO 5 satellite observing two components in energetic solar X ray bursts, attributing impulsive component to bremsstrahlung 22 p4007 A69-40775

OGO-F

Solid state detector for electron spatial distribution measurements on OGO-F satellite, discussing design emphasizing reliability 19 p3284 A69-36676

OGO-F electric and electromagnetic fields measurement for ionosphere using dipole antenna, emphasizing broadband observation covering whistler mode waves 19 p3284 A69-36677

OGO-F neutron monitor for measuring cosmic ray neutron flux near earth, locating sensor on boom to minimize spacecraft produced neutrons 19 p3314 A69-36678

Gas-surface energy transfer experiment on OGO-F satellite, measuring upper atmosphere kinetic energy flux to determine accommodation and drag coefficients, density, etc 19 p3255 A69-36680

OGO-6 design, research program, orbits and instrumentation, emphasizing relationship between particle activity, aurora and airglow, geomagnetic field, atmospheric and solar energy interrelations 24 p4393 A69-43132

OH- 6 HELICOPTER

Air engineering flight testing of OH-6A helicopter, presenting test program and results 06 p0867 A69-17659

OH-6A drive system design for lightweight, low cost high performance helicopter, discussing reliability from RVN combat data [AHS PAPER 374] 17 p2900 A69-33514

Air OH-6A helicopter light weight design, considering effects of WRAP /weight, radius, area, power/ factors on empty weight [SAWE PAPER 781] 18 p3091 A69-34870

OHMIC DISSIPATION

NT SHOCK HEATING

P-n junction cut-off current density and ohmic losses effect on injection laser efficiency determined by using quality parameter 01 p0091 A69-10883

Energy release by Joule magnetic field dissipation in solar atmosphere 03 p0516 A69-14041

MHD generator and compressor Joule losses effect on thermoelectric energy conversion closed cycle efficiency with electrical conductivity maintained by nonequilibrium ionization • 03 p0369 A69-14152

Conductivity and electron temperature in coaxial MHD generator plasma with magnetic field, studying Joule heating effect on performance 10 p1735 A69-23463

Avalanche transistor pulse circuits temperature increase due to power dissipation, noting effects of external resistance grounding base and pinch in 11 p1845 A69-24570

Joule heating role in generating internal gravity wave energy in auroral electrojet region, using linear model 12 p2064 A69-26010

P-n junction cut-off current density and ohmic losses effect on injection laser efficiency determined by using quality parameter 12 p2109 A69-26647

Fringing effects on electric efficiency variation with slip for cylindrical induction MHD device operable as accelerator, generator or Joule heater [AIAA PAPER 67-714] 16 p2736 A69-32152

OIL ADDITIVES

Sulfide addition agents for diester lubricating grease and organic resin solid film lubricants, noting formulation and tests for steel and molybdenum 01 p0102 A69-10907

OILS

NT CRUDE OIL
NT FUEL OILS
NT LUBRICATING OILS
NT MINERAL OILS

Diffusion pump oil reflectance and absorption coefficients measured in three thicknesses using light source, monochromator and detector 10 p1725 A69-23647

Oil quench vacuum furnace with graphite cloth heating elements 14 p2456 A69-29894

Differential capacitance transducer measuring small displacements in heated transformer oil, air, castor oil or glycerin 22 p3946 A69-40439

OLEFINS

U ALKENES

OLFACTORY PERCEPTION

Olfactory bulb removal effects on uptake decline of telencephalic norepinephrine, noting use for mapping adrenergic pathways 22 p3871 A69-40055

OLIVINE

Deformation microstructures in shock loaded olivine, discussing planar features 05 p0818 A69-15607

Mossbauer spectra of Fe minerals in unequilibrated ordinary chondrites, noting ratios of olivine to pyroxene iron 19 p3408 A69-36082

Equation of state measurements of earth materials by, shock wave techniques, applying to olivine for earth mantle constitution problem 22 p3937 A69-40188

Olivine-bronzite chondrite fragments found near Oshkosh, Wisconsin, in fall of 1961 22 p4021 A69-40413

OMEGA NAVIGATION SYSTEM

OMEGA position location equipment /OPLE/ test data to demonstrate feasibility of using OMEGA navigational system in conjunction with synchronous satellites 07 p1176 A69-19135

Hybrid OMEGA inertial system for following vehicle maneuver without lag developed by combining Schuler tuned inertial data and radio position data 07 p1177 A69-19209

OMEGA airborne navigational computers, discussing earth ellipticity and phase variations problems for signal conversion into latitude and longitude coordinates 08 p1347 A69-20778

Flight test performance of airborne Omega radio navigation system capable of worldwide coverage, discussing diurnal variations effects in phase velocity 08 p1348 A69-21191

Airborne computerized Omega Navigation set from combination of functional analysis of Airborne Omega Navigation Receiver with capabilities of current airborne computers 08 p1349 A69-21197

OMEGA VLF navigational transmission phase delay variations and field strength measurements on transatlantic propagation path, noting effect of directional change 09 p1538 A69-22595

Omega/VLF transmission range rate measurements for satellite Doppler navigation to provide velocity and location data, noting propagation error 14 p2479 A69-29857

Atomic and astronomical time and frequency measurement via Loran C and VLF/Omega phase tracking receivers 15 p2615 A69-31285

VLF wave propagation phase velocity prediction for airborne Omega computer, using scatter model based on abnormal ionosphere 17 p3002 A69-34077

Propagation effects on lane ambiguity resolution ability of Omega VLF navigational system, noting waveguide mode interference 21 p3673 A69-38756

Omega aircraft navigation, discussing digital computer applications, SNR environment, carrier interference and accuracy requirements for signal reception 23 p4186 A69-42539

Surface and aerospace navigation by VLF radio network, discussing Omega transmitting station location, operational modes and daytime-nighttime accuracies [AAS PAPER 69-405] 24 p4347 A69-42834

OMNIDIRECTIONAL ANTENNAS

NT MONOPOLE ANTENNAS

Radiation pattern, gain and polarization of omnidirectional antenna consisting of dipoles or monopoles arranged along circular cone 01 p0046 A69-10738

Balanced symmetrical four arm conical equiangular spiral antenna providing omnidirectional circularly polarized radiation pattern in azimuthal plane 03 p0404 A69-13471

Airborne S-band telemetry antennas for omnidirectional patterns of polarization component, discussing design, pattern measurements and application 07 p1106 A69-19112

Log periodic antenna with vertically polarized omnidirectional radiation constant over bandwidth 08 p1281 A69-20033

Electronic multibeam switching X band antenna system design with separate transmitting and receiving antennas for use on continuous wave surveillance radar 08 p1289 A69-20967

Self focusing aerial antenna arrays with full angular coverage for two way airborne communications 08 p1289 A69-20971

Siting two antennas for combining signals to obtain all-around coverage in aircraft communication 08 p1289 A69-20972

Frequency independent antenna far field radiation approximated for gain, polarization, field amplitude and phase, defining omnidirectional antenna with wide-band goniometry 08 p1295 A69-21149

Wave-mode converter with feed for omnidirectional antenna excitation, discussing H to E wave conversion, waveguides, emitter, etc 11 p1854 A69-25616

Wave propagation in 11.7-12.7 GHz range studied for application to TV transmission, describing emitter, omnidirectional antenna and receiving station 11 p1841 A69-25637

Spacecraft antennas properties, structure and problems including frequency ranges, external influences, omnidirectional radiation, input impedance, etc 16 p2763 A69-32584

Residue series representation of radiation fields for azimuthal leaky wave antenna on conducting cylinder, showing zeroth term correspondence to omnidirectional antenna 20 p3506 A69-37834

Multifunction lightweight antenna system package for spin stabilized near synchronous satellite having axis normal to orbital plane 22 p3913 A69-40694

Omnidirectional microwave parallel plate waveguide fed antenna design for flush mounted broadband spacecraft, noting equatorial and polar patterns 22 p3913 A69-40697

Simple antenna with good circular polarization over wide space sector, showing geometry, normalized orthogonal field distributions and beamwidth range, considering slot combinations 23 p4137 A69-41590

Frequency diversity technique simplifying airborne antennas for UHF telemetry, useful on spin stabilized vehicles requiring omnidirectional antenna coverage 23 p4122 A69-41777

OMNIRANGE NAVIGATION

U VHF OMNIRANGE NAVIGATION

ON-LINE PROGRAMMING

Error and sensitivity analysis of on-line algorithms for fixed point linear smoothing 01 p0050 A69-10238

Nonlinear system on-line identification in presence of noise, using stochastic methods and analog equipment 03 p0401 A69-13764

Artificial intelligence application to design of off-line and on-line learning control systems for controlling spacecraft attitudes 04 p0581 A69-14568

On-line ground flight test data processing system 05 p0725 A69-16757

On-line analysis with digital computer, noting system designed for vibration and random vibration analysis 05 p0726 A69-16761

On-line optimization of stochastic control systems based on learning controller model, discussing computer simulation results 06 p0900 A69-17354

Asynchronous on-line digital data acquisition system with immediate access to on-site numerical real time printout for rocket engine performance tests [AIAA PAPER 69-323] 09 p1478 A69-22381

Adaptive control algorithm operating on-line to make discrete time adjustments in controller parameters of continuous time control system 09 p1474 A69-22441

Ground station integrated flight test data system with interactive data input terminals, on-line assembly and responsive program development 10 p1633 A69-23271

Time and space on-line simulation of analog, digital and hybrid block diagram systems
16 p2755 A69-31709

On-line central data processing system connected to time shared computer for recording data from test facilities, discussing hardware configuration, software considerations and advantages
17 p2932 A69-33106

Network Analysis for Systems Application Program development for batch and on-line solution of circuit problems
18 p3111 A69-34680

Dynamic Automated Reporting Technique /DART/ system for on-line conversational information storage and retrieval for use in large programs management
18 p3107 A69-35095

Network analysis for systems application program /NASAP/ in FORTRAN for batch and on-line analysis of electronic circuits
21 p3856 A69-39662

Image disappearance or reappearance time controlled by inducing changes in alpha occurrence probability, executing on-line closed loop program detecting alpha rhythm
22 p3871 A69-40159

Closed Loop Ionogram Processor /CLIP/ on-line computer processing system for ionospheric data [AIAA PAPER 69-952]
22 p3904 A69-40334

Adaptive control systems analysis and application, noting off-line and on-line optimization, dynamic programming, linear systems, etc
24 p4289 A69-42946

ONBOARD EQUIPMENT

NT AIRBORNE EQUIPMENT
NT AIRBORNE/SPACEBORNE COMPUTERS
NT AIRCRAFT EQUIPMENT
NT SPACECRAFT ELECTRONIC EQUIPMENT

Apollo landmark sighting by astronaut using Apollo onboard navigation system, simulating cloud cover effects with Monte Carlo technique
01 p0110 A69-10692

Electron concentration in ionospheric outer regions determined from coherent frequencies recorded on-board OGO-A
01 p0147 A69-11323

Spacecraft device for photographing and transmitting TV pictures noting limitations and spatial conditions adaptations
02 p0207 A69-11829

General purpose satellite computer, discussing on-board processor /OBP/ design, memory, central unit, input/output and software
05 p0725 A69-16710

Onboard solid state neon cryostat for IR detector, noting resistance to missile vibration, acceleration and shock tests
06 p0906 A69-17103

Narrow and wide angle actinometric instruments on-board Cosmos 122, 144 and 156, describing optical and data acquisition systems
06 p0929 A69-17977

Informative properties of IR scanning equipment of meteorological satellites, discussing radiative flux measurements and thermal mapping
06 p0929 A69-17979

Onboard calibration system for gamma ray spectrometers and X ray detector in earth satellites, describing fabrication and test results for radioactive sources [IEEE PAPER 3A-6]
07 p1134 A69-19193

IMP F and G solar cosmic ray spectrometer utilizing FET analog multiplier for onboard particle identification data processing [IEEE PAPER 3C-3]
07 p1135 A69-19197

Dielectric constant and loss angles measurement in Ku band used for onboard radars
07 p1112 A69-19544

Biomedical experiment onboard Cosmos 110 concerning nonpathological changes
08 p1261 A69-19827

Spacecraft applications of Langmuir probes, obtaining data from current-voltage characteristics for electron/ion concentrations, ion mass spectra and charged particle energy distribution
08 p1316 A69-20474

Digital telemetry from spacecraft, discussing on-board processing, data compression, coding, sequence detection and receivers
08 p1276 A69-20592

Electrical energy production on board space vehicles including solar batteries, chemical reagents and possible nuclear energy utilization
08 p1259 A69-21036

Manual onboard computation procedures and devices for determination of maneuvers for orbital navigation and guidance
08 p1348 A69-21184

Airborne computerized Omega Navigation set from combination of functional analysis of Airborne Omega Navigation Receiver with capabilities of current airborne computers
08 p1349 A69-21197

Satellite-borne terrestrial radiodetermination systems, noting VLF transmissions usage to overcome coverage problem
09 p1537 A69-21287

Spacecraft onboard checkout systems and design of ground support equipment and software, noting adaptive dynamic analysis and maintenance /ADAM/ concept [AIAA PAPER 69-307]
09 p1478 A69-22382

Onboard test and fault isolation design for airborne systems considering tradeoff parameters for optimum reliability, performance and cost [AIAA PAPER 69-306]
09 p1434 A69-22389

Transpondersondes for atmospheric measurements, considering ground tracking, radiosondes, rocket-sondes and flight results
10 p1692 A69-23257

Onboard aircraft weighing system /OBAWS/ for accurate gross weight and CG measurements, describing axle shear deflection transducer system
10 p1693 A69-23276

Onboard test instrumentation for monitoring aircraft communication, navigation and identification systems, noting adaptive programming
11 p1866 A69-25080

Onboard checkout system concept, discussing philosophy, requirements, underlying considerations, system description, development and techniques of system selection
11 p1866 A69-25081

Onboard magnetic anomaly detection system for Canadian helicopter, discussing magnetometer location, boom design and testing and equipment installation [AIAA PAPER 68-487]
12 p2094 A69-26771

Radiation dosimetry and shielding onboard Cosmos 110 artificial satellite, noting earth belt proton radiation
13 p2356 A69-27702

Satellite observation of ocean surface and subsurface features, discussing onboard equipment and proposed orbits
15 p2607 A69-30190

Flight worthiness of mishandled electronic equipment, analyzing fragility and performance of shock exposed components and connections
15 p2576 A69-30362

ESRO 1 and 2 satellites onboard remote control system, discussing tone digital standard code and equipment design features
15 p2702 A69-31086

AN/ASN-24/V/ general purpose digital computer deployed in large worldwide jet transport fleet
17 p2933 A69-34061

Aircraft solid state electric system logic level tested functionally by built-in test equipment /BITE/ operated on ground during preflight tests
17 p2977 A69-34110

Aircraft onboard weighing system, eliminating o ring seal friction to permit accurate measurement of oleo strut pressure [SAWE PAPER 748]
18 p3137 A69-34883

Aircraft on board weight and balance system, discussing operations and economics programs [SAWE PAPER 805]
18 p3091 A69-34901

Manual procedures for midcourse and terminal guidance, discussing onboard optical measurements and calculations
19 p3368 A69-35792

Star/horizon measurements for onboard spacecraft navigation without cloud cover obscuration, discussing sightings, data processing and evaluation
19 p3369 A69-35800

Onboard radar for light interceptor aircraft /Aida II/, discussing navigation, low altitude penetration and air to air missile interception
19 p3278 A69-36701

Secondary radar IFF/SIF /Identification Friend or Foe-Selective Identification Feature/ system, describing ground and onboard radar and data processing equipment
19 p3278 A69-36702

Computer based onboard satellite PCM telemetry, showing improved adaptability, size and cost reduction
20 p3500 A69-37382

Wire type memory model for satellite onboard computers, discussing nondestructive readout, power requirements, marginal temperatures, material and volume
20 p3503 A69-37403

Planetary atmosphere structure and mean molecular weight determination from onboard measurements tested at high altitude in earth atmosphere, based on NASA Program [AIAA PAPER 68-1054]
21 p3715 A69-39023

Spacecraft trajectory control algorithm for hyper-sonic reentry, describing onboard equipment role and simulation results
21 p3767 A69-39649

Thermal design of missile mounted S band telemetry transmitter package based on temperature control system, using heat-of-fusion characteristics of wax material
22 p3909 A69-39945

Computer controlled TV cloud recognition equipment on meteorological satellites, discussing multistep process of automatic perspective distortion corrections by onboard computer
22 p3977 A69-40004

Programmatic constraints on onboard processing of data collected by payload sensors [AIAA PAPER 69-942]
22 p3904 A69-40325

Three channel inertial ship or aircraft navigator for determining gravity vector, using earth gravity field model
23 p4162 A69-41320

Accelerated motion influence on onboard vertical gyro with design based on free astatic gyro with electromagnetic compensation
23 p4163 A69-41553

Centrifuge on board orbiting spacecraft as research tool for biological and physical experiments relevant to prolonged missions and spacecraft design
23 p4108 A69-41833

Navigation systems analysis for space missions planning, discussing onboard equipment and lunar landing accuracies [AAS PAPER 69-406]
24 p4347 A69-42833

Mars atmosphere study by Mariner 6 and 7 spacecraft, discussing instrumentation on board [AAS PAPER 69-091]
24 p4393 A69-42881

Satellite attitude estimation from onboard telescope celestial sightings using iterative least squares method, considering measurement error noise and axes wobble
24 p4348 A69-43244

ONBOARD NAVIGATION
U NAVIGATION

ONE DIMENSIONAL FLOW

Longitudinal short wave stability in conducting quasi-one dimensional gas flow, considering regions of high thermal emission
02 p0233 A69-12487

Similarity motion of fluid particles in one dimensional gas flow, establishing limits of slip factor value change
03 p0419 A69-13920

Second order difference scheme for calculation of plane or rotational compressible flow, investigating stationary flow as asymptotic limit of unsteady flow [ONERA-TP-652]
03 p0419 A69-14111

MHD shock wave decay in one dimensional unsteady flow of ideal inviscid perfectly conducting compressible fluid subjected to transverse magnetic field
05 p0806 A69-16736

One dimensional unsteady flows of combustible gas mixture with finite chemical reaction rates, considering piston motion, igniting shock wave propagation and point explosion
06 p0909 A69-17325

Electrodynamic gas flow in one dimensional approximation for transition through speed of sound, discussing flow parameters profile and dynamic efficiency
06 p0964 A69-17326

Parasitic eigenvalue in integration of equations governing one dimensional flow of chemically reactive gas
07 p1118 A69-18317

Two fluid approximation of one dimensional steady state flow of inviscid plasma with thermal gradients, considering ionization and recombination processes
07 p1189 A69-18691

Optimum profile of supersonic nozzle with nonequilibrium flow
07 p1119 A69-18737

Theory of unsteady one dimensional motion of ideal compressible fluid, discussing equation of state
07 p1119 A69-18750

One dimensional flow of conducting inviscid compressible fluid in channel in presence of transverse fields, discussing steady velocity flows
07 p1191 A69-19014

Frozen shock in steady one dimensional compression flow of relaxing gases weaker than equilibrium shock
08 p1304 A69-20785

Flow analysis in magnetic annular shock tube in magnetic field varying with time
08 p1366 A69-20787

Generalized Riemann function obtained as solution of transformed Boltzmann-Vlasov equation, discussing one dimensional and multidimensional cases
10 p1724 A69-22908

Optimum operation modes of MHD converter
10 p1636 A69-23095

General solutions of MHD equations for linear nonsteady and plane steady motions of ideally conducting gas
10 p1727 A69-23096

One dimensional analysis of stationary argon flow in linear Hall generator from continuity, momentum and energy equations, discussing electron heating and nonequilibrium ionization
10 p1736 A69-23465

Optimal control of one dimensional fluid flows with characteristic velocity passing through zero, showing Lagrange multipliers continuous and bounded in optimal solution
11 p1934 A69-25728

One dimensional stationary flow of medium consisting of charged and neutral components within electrohydrodynamic limits in AC and DC electric fields
12 p2135 A69-26398

Internal flows of compressible fluids with heat transfer in accelerating nozzles and constant area ducts, simplifying equations by assuming one dimensional flow
12 p2012 A69-26790

Influence coefficients for compressible flow processes involving area, friction and total temperature changes
12 p2063 A69-26799

Boundary value problem for one dimensional unsteady equations for inviscid conducting gas during transition processes in MHD duct
13 p2309 A69-28027

Conducting liquid boundary layer flow and heat flux on electrodes of MHD generator, including one dimensional flow outside boundary layer
13 p2309 A69-28028

Kolmogorov-Prandtl turbulence energy hypothesis extended from turbulent region of one dimensional flow to laminar sublayer, obtaining numerical solutions for Couette flow
13 p2250 A69-28339

Turbulent burning velocity definition for one dimensional turbulent flow and average flame orientation perpendicular to flow direction, discussing transient flames in turbulent environment
13 p2379 A69-28452

Flow stability of one dimensional Cartesian and cylindrical incompressible inviscid flows with no body forces and interfaces
14 p2429 A69-29013

One dimensional unsteady monatomic Maxwellian gas flow at small Knudsen numbers using Hilbert method, noting validity for shear flows
14 p2432 A69-29611

MHD quantities in linear wave and small intensity shock wave dissipation and structure determinable by right and left eigenvectors of matrix MHD flow equation
14 p2500 A69-29902

Asymptotic behavior of one dimensional laminar flow of incompressible viscous fluid in infinite cylindrical tube, giving equations for boundary conditions and flow rate
16 p2769 A69-31831

Normal stress effects in viscoelastic fluid theories applied to one dimensional Burgers model of weak turbulence predicting drag reduction
17 p2951 A69-33256

Gas pressure differential across multilayer insulation blanket during rapid evacuation predicted, using one dimensional flow theory
[AIAA PAPER 69-608] 17 p3072 A69-33275

Time dependent analysis for quasi one dimensional, vibrational and chemical nonequilibrium nozzle flows approaching steady state solution by finite difference technique
[AIAA PAPER 69-668] 17 p2893 A69-33491

One dimensional viscous magnetofluidynamic flow in annulus formed by concentric cylindrical electrodes,

reducing problem to linear partial differential equation set
[AIAA PAPER 69-725] 17 p3012 A69-33493

Far and near field solutions for one dimensional unsteady flows in general inviscid relaxing gas, obtaining flow field structure by matching techniques
17 p2957 A69-33599

Conducting medium steady one dimensional motions determined by assuming space charge-electric field interaction, considering electrohydrodynamic behavior of medium
18 p3181 A69-35315

Kinetic model and steepest descent method to optimize one dimensional combustor
[AIAA PAPER 68-644] 19 p3448 A69-35943

One dimensional spectra of turbulent wakes behind circular cylinders, discussing isotropy, anisotropy and Reynolds number
21 p3693 A69-38705

Self similar solution to one dimensional isothermal ionized gas outflow from ionization front in half space filled with neutral gas exposed to quanta flux
21 p3771 A69-38997

Relativistic solution by Landau procedure of initial value problem for one dimensional electron plasma wave coexisting with charged immobile background
21 p3778 A69-39579

Quasi-one dimensional analysis for nonequilibrium flow of dissociated diatomic gas through converging-diverging nozzle, discussing critical mass flow rate
22 p3927 A69-40583

One dimensional flow of perfect compressible relativistic fluids, obtaining expression showing wave velocity dependence on relativistic speed of sound
22 p3931 A69-40711

Starting process in nozzle with one dimensional flow treated numerically by finite difference method using pseudoviscosity term
22 p3860 A69-40926

Class of one dimensional nonlinear waves and shock structure reduced to steady flows in radiation gas dynamics
23 p4240 A69-42466

Iterative finite difference method for initial value problems applied to hyperbolic system representing one dimensional time dependent flow of compressible polytropic gas
24 p4340 A69-43226

Symmetry properties of Cameron-Martin-Wiener kernels in isotropic velocity field, applied to one dimensional model of incompressible turbulent flow
24 p4301 A69-43358

Rarefied gas one dimensional transverse motions consistent with Boltzmann kinetic equation, solving integrodifferential equations for shock wave structure
24 p4351 A69-43491

ONISOTROPY

U ANISOTROPY

ONSAGER PHENOMENOLOGICAL COEFFICIENT

Linear irreversible thermodynamics theory as applied with conservation principles and Maxwell relations to charged particle motion in electromagnetic field, noting Onsager coefficients role
17 p3075 A69-34142

ONSAGER RELATIONSHIP

Onsager reciprocity relations applied to thermodynamics of nonlinearity and noise in diodes
04 p0574 A69-14435

Diffusion and thermal diffusion in mixture of Maxwellian gases, analyzing Onsager reciprocity relations
05 p0849 A69-16461

Thermodynamics of sinusoidal steady state energy converters governed by Onsager reciprocity relation, determining maximum conversion efficiency
11 p1826 A69-25396

OOCYTES

U GAMETOCYTES

OPACIFIERS

Thermal analysis of opacified fibrous insulation systems, discussing heat transmission, heat transfer and thermal conductivity relations to compression load and temperature
[AIAA PAPER 69-605] 17 p3072 A69-33282

OPACITY

Angular distribution of reactive elastic scattering analyzed by opacity function/reaction probability/
04 p0554 A69-14859

Stellar atmospheres radiative opacity, computing metal absorption coefficients
07 p1220 A69-19392

Radiative opacity in stellar atmospheres, discussing effect of UV continuum on photospheric radiation field
07 p1221 A69-19393

Algorithm for high speed digital computers to evaluate stellar radiative opacities
07 p1222 A69-19589

Hydrogenic approximation validity in evaluation of atomic energy levels and radiative absorption cross sections for computation of stellar opacity
07 p1223 A69-19626

Stereoradiography using holographic techniques to examine internal structure of opaque objects
08 p1313 A69-20178

Effects of opacity arising from silicon bound-free transition on emergent fluxes and hydrogen line profiles for A and late B stellar atmospheres
09 p1604 A69-22403

Lyman alpha wing opacity effect on temperature scale and helium content in F and G subdwarf atmospheres
09 p1607 A69-22431

Static envelope with no mass outflow for star static core constructed from opacity coefficient dependence on temperature and density
10 p1775 A69-23199

Surface dielectric constant and microwave opacity of Venus atmosphere as function of wavelength determined by radar observations
12 p2153 A69-25805

Line absorption effect on opacity and main sequence model stars noting luminosity, radius and mass of convective core
13 p2340 A69-27578

Limb darkening on earth night side observed by Aerobee rocket, with explanation based on atmospheric opacity in water vapor and carbon dioxide bands
17 p2960 A69-33167

Weak displacements of opaque objects and optical distortion in solid state lasers analyzed by holographic interferometry
19 p3308 A69-35909

Autoionization lines effect on stellar structure by computing contributions to Rosseland mean opacity
20 p3612 A69-38165

Thermal conduction by electrons in stellar matter, presenting opacity tables for H, He, C and red giant cores and solar composition
22 p4014 A69-40147

OPEN CHANNEL FLOW

Two dimensional unsteady wave motion in shallow water using MHD theory
08 p1362 A69-20354

OPENINGS

NT APERTURES

NT IRISES [MECHANICAL APERTURES]

Buckling of elastic cylinders with rectangular cut-outs and reinforcements under axial or lateral loading, using modified Newton method
[AIAA PAPER 69-92] 06 p1027 A69-18060

OPERATING SYSTEMS [COMPUTERS]

Real time operating system /RTOS/ 360 for spacecraft flight control, describing hardware, applications, task management and capacity, etc
21 p3679 A69-39602

OPERATING TEMPERATURE

Microwave radiometer with two reference temperatures, discussing overall stability of design, sensitivity and airborne design for operation in X band
[DVL-895] 02 p0220 A69-12435

Solar cell generator design problems for solar probes, discussing increased operational temperature
02 p0197 A69-12665

Minority carriers lifetime measurement in degenerate GaAs, showing dependence on current density and operating temperature
03 p0483 A69-12917

Avalanche transistor pulse circuits temperature increase due to power dissipation, noting effects of external resistance grounding base and pinch in
11 p1845 A69-24570

Limiting heat power transported by sodium heat pipes dependent on capillary network geometry, inclination angle and operating temperature
14 p2538 A69-29205

Maximum strengthening due to second phase precipitation within operating temperatures maintainable to 20 hr during aging of Nb-Hf-O and Nb-Zr-O alloys
15 p2640 A69-30632

Transistor temperature and power limitations and thermal resistance calculation, discussing heat sink surface optimum design for power losses
16 p2760 A69-32047

Spacecraft electronic components operating junction temperature control, considering role of thermal resistance in controlling radiative and conductive transfer
[AIAA PAPER 69-1015] 22 p3922 A69-40387

OPERATIONAL CALCULUS

Krylov functions determined by distribution theory and operational calculus, discussing deformations and statics of straight beams
15 p2715 A69-31475

Operational calculus for n-variable functions analogous to Mikusinski method for single variable functions, giving applications to linear partial differential equations with constant coefficients
21 p3756 A69-39500

OPERATIONAL HAZARDS

Safety problems of jumbo jet airbus and SST, discussing operational safety procedures and techniques
03 p0365 A69-12882

Aircraft flight safety, discussing structural and aerodynamic concepts, maintenance and operations
03 p0365 A69-12886

Spatial disorientation as factor in accidents in operational command, noting relatively high experience level of involved pilots
07 p1072 A69-19431

Operational reliability of manual and automatic flight control systems and components and current safety standards
08 p1255 A69-20720

Accidental ignition during solid propellant processing in terms of hazard to facilities and personnel, emphasizing mixing operation
16 p2829 A69-31993

Hazard plot analysis of incomplete data involving times to failure for failed units and running times on unfail units
18 p3147 A69-34515

Laser hazard probability assessment in various applications, discussing power characteristics, attenuation by absorption and scattering and radiant energy spatial distribution
24 p4327 A69-42576

OPERATIONAL PROBLEMS

HRV-1 navy research pusher amphibian aircraft, discussing hydrofoils and operational problems
10 p1633 A69-23223

Independent operations optimum performing sequence determined for parallel machines differing in technological characteristics and with assigned time using algorithm
16 p2763 A69-31626

Flight recorder program determining combat operating environments of CH-46D helicopters analyzed and compared with aircraft design criteria
[AHS PAPER 375] 17 p3059 A69-33513

Control knob optimum diameter for minimum operation time, noting frictional resistance
21 p3664 A69-38969

OPERATIONS RESEARCH

NT CRITICAL PATH METHOD
NT DYNAMIC PROGRAMMING
NT GAME THEORY
NT LINEAR PROGRAMMING
NT MINIMAX TECHNIQUE
NT NONLINEAR PROGRAMMING
NT SADDLE POINTS [GAME THEORY]

Operational research in RAF, discussing weapons tactics and research, strike aircraft speed and height effect on target-finding, VTOL and STOL dispersion value, etc
01 p0180 A69-10863

Analytical reliability ratio to operational reliability for airborne equipment taking into account electrical and thermal aspects
01 p0011 A69-11069

Research and development project selection and planning, outlining system to identify capabilities contributing to increasing success probability
03 p0535 A69-13552

Aircraft squadron performance effectiveness model
03 p0367 A69-13911

Graphical evaluation and review technique (GERT) in R and D project planning processes
04 p0689 A69-15100

Management control systems, discussing malfunction, inefficiency and needs of human elements
07 p1244 A69-18963

Transport aircraft fleet management and handling of mechanical and avionic machine defects using operations research
08 p1422 A69-20626

Defense project management and discrepancies between estimates and final costs
08 p1423 A69-20628

Operations research in terms of contractor task formulation, project simulation, material and data collection, etc
08 p1423 A69-20868

Maintenance recording systems for aircraft fleet, discussing operations objectives and research, data collection and implementation using systems engineering
10 p1671 A69-23261

Operational research applications to management problems, discussing specific airlines operations cases
11 p1822 A69-24377

Aircraft design synthesis requirement definition in hardware commitment, discussing error effects of weight, aerodynamics and propulsion
14 p2392 A69-29432

Lidar data obtained at Hamilton AFB, Calif., computer analyzed for lidar operational utility, determining cloud ceiling and visibility for aircraft landing operations
15 p2651 A69-30895

Operations research methods applied to systems effectiveness study, using key decision models with optimized alternatives
18 p3145 A69-34503

OPERATOR PERFORMANCE

Manual control using matched manipulator technique, noting control task complexity decrease and improved performance
02 p0202 A69-11951

Operator handedness effect on control display movement stereotypes
02 p0203 A69-12212

Human operator as optimal controller, proposing quadratic performance index used by operator in judgement of own performance in tracking task
06 p0903 A69-17407

Man in loop computer facility for programmers to check out flight programs in simulated space flight environment
[AIAA PAPER 69-324] 09 p1479 A69-22384

Programmed search and gradient search methods for determination of sampling intervals in synthesis of sampled data models of human operators
10 p1650 A69-23881

Machine vibration effects on human operator performance using locomotor model
14 p2409 A69-29742

Minimum dimensions of circular nondetent knobs mounted on concentric shafts in case of nontolerable frequent inadvertent operation of adjacent coaxial knobs
17 p2916 A69-34005

Optimum knob crowding, measuring reach time, turning time, inadvertent touching and influence of knob spacing, diameter and configuration
17 p2916 A69-34006

Mathematical basis for human operators purposeful behavior in complex systems control situation requiring decision reaching
19 p3260 A69-35895

Alcohol and drug intake effects on drivers control of motor vehicles, describing postrotatory nystagmus test for toxicity measurement
21 p3652 A69-38791

Pilots and automobile drivers functional impairment due to alcohol and drugs
21 p3663 A69-38792

Human radar operator effectiveness at night noting vigilance level lowering, discussing possible logic mechanism perturbation
21 p3666 A69-39268

Sleep habits of radar operators working in alternate crews in radar station on continuous watch
21 p3666 A69-39269

Adaptive model of human operator control strategy in response to sudden changes in plant dynamics and transient disturbances
24 p4276 A69-43325

OPERATORS [MATHEMATICS]

NT BERGMAN OPERATOR

Approximate solution convergence for linear operator equation in Hilbert space by least squares method
01 p0105 A69-10728

Representation for real functions of quantum mechanical momentum operator obtained by functional integration in phase space
01 p0106 A69-10930

Integral operators on space of Borel measurable functions bounded considering weight function, giving condition for infinite complex matrices, mapping analytic sequence spaces
01 p0107 A69-11244

Higher order differential operators description and derivation of analytical mechanics for holonomic and nonholonomic systems and impact phenomena
02 p0281 A69-12199

Lie groups for equations of motion in quantum mechanics or field theory determined by operator analysis
02 p0282 A69-12840

Second order elliptical operator for m-dimensional Euclidian space with open region bounded by closed surface
03 p0456 A69-13604

Operator methods in engineering sciences, discussing integral transformations, Riesz method application to Cauchy problem, etc
03 p0457 A69-13744

Variational theorems on eigenvalues of Laplace finite difference operator with first order boundary conditions
03 p0457 A69-14230

Generalized Riemann-Liouville fractional integrodifferential operator and application to representation of analytic and harmonic functions inside circle
04 p0622 A69-14512

Stability of nonlinear time varying feedback systems, using passive operator technique
04 p0583 A69-15110

Book on linear boundary value problems of mathematical physics based on Green function covering Hilbert spaces, integral equations and spectral theory of differential operators
04 p0625 A69-15232

Theorems concerning interspherical fractionally linear transformations of operators in Hilbert spaces formulated and proved, analyzing unit sphere during fractional linear transformation
05 p0787 A69-16423

Boundary value problems for unstable quasi-linear elliptic differential operator class, proving theorems on properties of quasi-linear elliptic-parabolic equations in bounded space
05 p0787 A69-16424

Riemann problem in regions, showing integral operators become bounded if closed rectifiable Jordan curve without cusps becomes curve of bounded rotation
06 p0947 A69-16893

Lehmann-Maehly procedure for lower and upper bounds to eigenvalues of Hermitian operators in Hilbert space
06 p1020 A69-17131

Solvability of third boundary value problem for Laplace operator in three dimensional domains bounded by irregular surfaces
07 p1173 A69-18497

Maximum index of exponential growth of solution of linear Hamiltonian equation with periodic operator coefficient encountered in dynamic stability of elastic systems
07 p1231 A69-18501

Fourier transform algorithm introduction leading to image coding technique with image transformed by Hadamard matrix operator
07 p1078 A69-18859

Galerkin method of moments applied to stochastic bounded linear operator equation, discussing statistically homogeneous operator case and electric field in dielectric
07 p1174 A69-19472

Delta functions use in extending domain of Laplacian operator in quantum mechanics
07 p1174 A69-19495

Book on integral operators in theory of linear partial differential equations covering analytic functions, harmonic functions, differential equations, etc
08 p1343 A69-20725

Plasma kinetic equation obtained by method similar to Chapman-Enskog method
08 p1369 A69-20816

Elliptic complexes over compact manifolds without boundary, discussing general theory of elliptic operators in vector bundles
09 p1532 A69-21733

Theorem for necessary and sufficient condition for continuity of Chebyshev operator
10 p1718 A69-22875

One parameter operator imbedding to modify Newton method for solution of nonlinear equations
10 p1719 A69-23519

Nonlinear A/x operators in reflexive Banach space Y characterized by weak closure of values, defining solvability conditions for equations having such operator
10 p1720 A69-23563

Integral equation and related optimal regularization problems, finding operator in class of operators defined on set of functions
10 p1721 A69-23882

Vibration problem of supported beam elastically restrained against rotation at both ends solved by Hermitian and linear differential operators
11 p1976 A69-24794

Stability of systems with sector nonlinearities determined by converting feedback equation into positive operators equation and by introducing appropriate multiplier
11 p1860 A69-25450

Canonical representation of multivariable control system in state space using matrix of differential operators acting on vectors of input-output quantities
12 p2051 A69-26094

General theorems derived for Noether operator applied to integral equation with automorphic kernel
12 p2122 A69-26574

Volterra operator algebra for boundary value problems involving linear viscoelasticity with continuous relaxation time and delay time spectra
12 p2182 A69-26677

Pseudodifferential operators theory application to uniqueness of solutions of Cauchy problem
12 p2124 A69-26930

Closed linear operators in topological vector space generalized for Banach space case
13 p2288 A69-27734

Book on control theory covering automatic and remote position control, diagrams, transfer functions, operators, Laplace transform use with differential equations
13 p2238 A69-28345

Stability of quasi-solutions for equations with closed and with continuous operators
13 p2289 A69-28483

Quasi-L-analytic functions for ordinary linear operator L
13 p2290 A69-28484

Quasi-integral analytic continuation operator applicability to potential field approximated by certain truncated series expansion
14 p2470 A69-29032

Searchless gradient self adaptive system for adjusting servosystem parameters to reference model characteristics, using auxiliary operator method
14 p2426 A69-29146

Coupled equations for heavy particle motion expressed by introducing generalized matrix operator for effective momentum in atomic collision problems
14 p2489 A69-29997

Elastic collision operator for relativistic Lorentz gas converted to differential form using Fokker-Planck limit for anisotropy segments
16 p2817 A69-31668

Soviet monograph on projective-iterative methods of solving operator equations in generalized metric and structurally normalized spaces
16 p2805 A69-32366

Generalized finite difference approximations of linear partial differential operators in space based on functional approximations
16 p2756 A69-32552

Algebra of quasi-homogeneous pseudodifferential operators applied to lateral boundary values of solutions of parabolic differential equations, discussing function spaces
17 p2994 A69-32842

Friedrich qualitative analysis of ordinary differential operators modified to obtain quantitative information regarding eigenvalues distribution
17 p2995 A69-33404

Spectrum of ordinary second order differential operators, correlating spectral properties with analytic function-theoretic properties of differential equation solutions
17 p2996 A69-33793

Single parameter family of two layer difference schemes with decomposing operators for general linear second order parabolic equations with mixed derivatives and variable coefficients
18 p3164 A69-34702

Convergence of methods of tangential parabolas and hyperbolas used in nonlinear equation solution with nondifferentiable operators
18 p3164 A69-34707

Algebraic formulation of electromagnetic diffraction, discussing propagation of positive and negative time frequency components by dual operators
18 p3172 A69-35010

Engineering equations for elastic thin plate oscillations of materials with properties described by linear integral Volterra-Boltzmann operators
19 p3437 A69-35989

Finite difference analogs with increasing error terms applied to simple differential Laplace operator for accuracy determination
19 p3365 A69-36510

Ordinary differential equations in linear topological space extended from Fattorini investigation, emphasizing use of linear operator
19 p3360 A69-36599

Radiation field several wavelengths from dipole above plane earth, simplifying rigorous integral expression for Hertz vector by method of operators
21 p3770 A69-38748

Matrix identity associated with linear digital filtering and recursive estimating determined using matrix projection operators and properties
22 p3975 A69-41014

Green matrix for operator M governing steady state wave propagation in inhomogeneous anisotropic media obtained as solution of integral equations system
23 p4180 A69-41368

Differential operators representing potential energy of thin shell, discussing self conjugacy of boundary value problems
23 p4229 A69-41999

OPERATORS [PERSONNEL]

NT AIRCRAFT PILOTS
NT PILOTS [PERSONNEL]
NT TEST PILOTS

Control and sampling in sterile rooms, noting worker introduction of contaminants
05 p0714 A69-15953

Human operator as optimal controller, proposing quadratic performance index used by operator in judgement of own performance in tracking task
06 p0903 A69-17407

Programmed search and gradient search methods for determination of sampling intervals in synthesis of sampled data models of human operators
10 p1650 A69-23881

Personality factors and job performance ratings relationship in radar controllers, computing Pearson correlation matrix based on age, education, motivational distortion, etc
21 p3665 A69-39169

OPHTHALMOLOGY

NT EYE EXAMINATIONS

Ophthalmic 2 percent pilocarpine effect on normal ocular dynamics of various age groups, including visual acuity, accommodation and refraction
01 p0022 A69-11347

OPTICAL ABSORPTION

U ELECTROMAGNETIC ABSORPTION
U LIGHT TRANSMISSION

OPTICAL AMPLIFIERS

U LIGHT AMPLIFIERS

OPTICAL COMMUNICATION

Induced discharge laser wave propagation in medium with active and absorbing admixtures, determining stationary wave shape and velocity range
02 p0206 A69-11609

Atmospheric limitations for laser communications, discussing scattering and absorption effects
03 p0389 A69-13193

Optical receivers for deep space optical communications link assuming PCM scheme
03 p0389 A69-13194

Broadband signal and noise performance of direct detection optical receiver consisting of solid state photodiode and baseband amplifier
04 p0556 A69-14283

Quasi-optical transmission line composed of nonideal correctors /lenses or mirrors/
05 p0717 A69-15637

Wideband multichannel optical signals nonlinear distortions during transmission by electrooptical modulators using Pockels effect
05 p0718 A69-15655

Optical heterodyne communication experiments in TV signal transmission
05 p0720 A69-16319

[IEEE PAPER J-5]
Quasi-optical transmission lines having composite correction devices with/without phasing devices
05 p0723 A69-16784

Signal conversion by multiple modulation in optical communication system, discussing electrooptic modulators and modulation spectrum
07 p1075 A69-18472

Diffractional crosstalk in optical beam waveguide during simultaneous multibeam transmission arising from beam coupling by aperture diffraction
07 p1100 A69-18648

SNR enhancement in optical receiver by amplification before detection of carrier of modulated optical signal, using quantum amplifier
07 p1154 A69-19079

Optical heterodyne detection of randomly distorted signal beam, noting time invariant scheme yielding largest average SNR in atmospheric turbulence
07 p1087 A69-19642

Book on laser communication system design covering modulation and detection methods
08 p1277 A69-20884

Optical communications applications with emphasis on large capacity transmission
09 p1456 A69-22131

Carbon dioxide laser beam deflection and thermal defocusing due to wind in absorbing medium
10 p1701 A69-22949

IR detection at sum or difference frequency by employing optically nonlinear crystal and laser in visible and photomultiplier
10 p1704 A69-23656

Light flux intensity fluctuation dispersion and averaging effect for passage through circular receiving aperture
10 p1658 A69-23950

Mean losses in quasi-optical communication lines due to random irregularities in performance of waveguide phase correctors connected in series, noting random phase aberrations effect
10 p1658 A69-23954

Induced discharge laser wave propagation in medium with active and absorbing admixtures, determining stationary shape and velocity range
11 p1895 A69-24716

Atmospheric interference effects on optical PCM signal, analyzing absorption, beam bending, scintillation and correlation with visibility and weather
11 p1888 A69-25308

Electro-optical automatic gain control system to reduce atmospheric turbulence produced fluctuations in received optical signal strength
14 p2459 A69-29491

Ideal quantum receiver to detect coherent narrow band optical signal in presence of thermal background radiation, noting error probability
14 p2414 A69-29502

Remote polarized light source photometric observation on background of polarized light scattered horizontally, considering atmosphere optical state effect on laser communications
15 p2649 A69-30655

Optical communications experiments for quantitative data at 6328 A on system fading due to scintillation and atmospheric turbulence effects on coherent propagation at 10.6 micron
16 p2748 A69-31564

Quasi-optical transmission line composed of nonideal correctors /lenses or mirrors/
16 p2754 A69-32495

Wideband multichannel optical signals nonlinear distortions during transmission by electro-optical modulators using Pockels effect
16 p2754 A69-32512

Optical heterodyne communication system with single mode and frequency carbon dioxide laser, noting coherent photon noise limit
17 p2919 A69-33086

Multibeam transmission in optical beam waveguides by simulation, discussing intensity profiles phase fronts and cross scattering
17 p2974 A69-33400

Electromagnetic field formulation of eigenvalue problem for optical coaxial dielectric waveguide, using computer root searching method
17 p2930 A69-33892

IR nonimage-forming instruments, stressing applications to communications, intrusion detection, ranging, etc
19 p3310 A69-36062

Laser and quasi-laser pulse modulation technique for global satellites telemetry system
19 p3272 A69-36257

M-ary detection for optical communication investigated for maximum likelihood detection of one of M Poisson processes in background noise
19 p3276 A69-36486

Fourier transform techniques applications in optics, converting optical signal amplitude and phase information into electrical signal information
19 p3374 A69-36737

He-Ne laser communication feasibility experiments, discussing modulation, detection, operating parameters, etc
19 p3279 A69-36756

Demultiplexing of high speed multichannel optical pulse code transmission systems, based on coincidence detection using locally generated reference pulses
19 p3279 A69-36764

Optical information rates for photoconductor detection systems based on coherent field model, considering binary channels with or without Gaussian noise
20 p3485 A69-36923

Atmospheric natural turbulence effect of degradation of laser signal phase and amplitude characteristics, noting refractive index inhomogeneities effect on optical tracking system
[AIAA PAPER 69-871] 21 p3675 A69-39397

Solid state traveling wave optical quantum amplifier for conversion of modulated signal carrier frequency, applying to frequency conversion in laser communication links
21 p3739 A69-39540

Monograph on laser communication system in IR for industrial environments
22 p3900 A69-40617

Intersatellite microwave laser communication system for ATS-F and ATS-G, discussing experiment, functional design and parameters
23 p4120 A69-41758

Optical communication through random atmospheric turbulence via heterodyne and video detection, estimating performance from optical wave propagation analysis
23 p4125 A69-42186

Log amplitude mean value for Gaussian or laser-like optical beam propagating horizontally in turbulent atmosphere
24 p4282 A69-42970

HgCdTe as IR satellite detector for terrestrial, atmospheric and ocean mapping, IR astronomy and optical communication
24 p4362 A69-43666

OPTICAL CORRECTION PROCEDURE

Hologram chromatic aberration compensation by two lens system
01 p0080 A69-10430

Helium-neon laser for optical correction and guide beam techniques
07 p1146 A69-18484

Stars astronomical positions elimination from photographic plates because of errors, discussing elimination criteria and picture taking method
10 p1784 A69-24034

Photoelectric observation of passage of stars through meridian, detailing error sources and corrective technique
14 p2521 A69-29507

Image enhancement by coherent optical system without spatial filter, noting improved defocused transparencies
14 p2450 A69-29641

Remote sensing cross-beam cross correlation methods of determining spatially resolved average thermodynamic properties
[AIAA PAPER 67-149] 16 p2789 A69-31868

Optical computerized design procedure for Ritchey-Chretien corrector, combining ray deviation error function and third order aberration design techniques
17 p2972 A69-33087

Schmidt camera image quality examined with spot diagrams, emphasizing methods of color confusion reduction over wide wavelength range
20 p3546 A69-38272

Terrain slope estimation of position errors of differential corrections in orthophoto production
22 p3951 A69-41245

Optical interpolation for GZ-1 orthoprojector in storage mode, noting electronic contour plotter
22 p3951 A69-41247

Automatic contour plotting for orthoprojector based on adjacent profiles and linear interpolation
22 p3951 A69-41248

OPTICAL COUPLING

Optimum coupling for intracavity second harmonic generation in multilevel lasers
01 p0089 A69-10181

GaAs injection laser transmission losses and threshold current density under influence of external optical coupling with spherical mirror
02 p0260 A69-12687

Simultaneous phase locking of longitudinal and transverse laser modes in He-Ne laser
03 p0441 A69-14188

Optical performance of coupled Fabry-Perot resonators with additional mirrors, determining frequency separation parameters due to third mirror
04 p0612 A69-15372

Quasi-optical oversize waveguide directional coupler with two prisms interface matched by Brewster angle effect
14 p2424 A69-29764

Efficient extinction in optically coupled GaAs injection lasers achieved by selecting quenching radiation frequency close to operating frequency
15 p2633 A69-30059

Optical performance of coupled Fabry-Perot resonators with additional mirrors, determining frequency separation parameters due to third mirror
16 p2797 A69-32119

Optical parametric oscillator output/signal/ frequency locked to absorbing atomic transition, discussing effective linewidth
18 p3133 A69-34263

He-Ne laser subnanosecond intracavity coupler consisting of coaxial krytron pulse generator and electrooptic modulator
19 p3339 A69-36823

Transmission properties and directional coupler determined for optical circuit dielectric rectangular waveguide with surrounding dielectrics of smaller refractivity
24 p4287 A69-43328

Diffraction coupling of power from carbon dioxide laser, computing angular distribution of output light
24 p4329 A69-43753

OPTICAL DENSITY

Earth atmosphere transmission coefficients determination by relation between transparency and daytime sky brightness, noting limits of applicability
01 p0074 A69-11185

Atmospheric optical properties stability determination for various optical densities, assuming horizontally homogeneous medium with properties constant during observation
01 p0074 A69-11186

Atmosphere spectral transparency and stability spectrophotometric studies based on measuring solar aureole brightness
01 p0074 A69-11188

Atmospheric IR spectral transparency measurement, describing optical system, recording devices and data processing
05 p0759 A69-16639

Continuous emission spectrum and continuous plasma absorption spectral coefficients for optically dense quasi-steady state electrical discharge plasma in sulfur capillary
06 p0964 A69-17251

Atmospheric IR spectral transparency measurement, describing optical system, recording devices and data processing
14 p2433 A69-28795

Close confinement GaAs p-n junction lasers with reduced optical loss at room temperature
14 p2457 A69-28893

Atmospheric optical density vertical distribution curves in near UV from spectrophotometer data of Echo type satellites entry into earth shadow
16 p2787 A69-32638

OPTICAL EMISSION
U LIGHT EMISSION

OPTICAL EMISSION SPECTROSCOPY

Line shape for dynamic Stark effect during optical resonance field irradiation calculated as function of relaxation constants and beam intensity
08 p1325 A69-20282

Optical spectrum of galaxy NGC 3031 nucleus, considering emission and absorption lines and continuum
17 p3034 A69-33396

YZ Canis Minoris red dwarf star flare event observation record, noting optical spectrum energy output and slow decay
17 p3043 A69-34165

Cadmium sulfide-selenide single crystals reflection coefficient polarimetric measurement, observing reflection peaks relationship to absorption spectral temperature dependence
19 p3391 A69-36607

N II 4176 A emission line occurrence in connection with type B auroras, studying secondary electrons energy spectra
24 p4309 A69-43012

Optical solar flares, discussing flare classification, proton flares, development, limb observation, spectra, line broadening, electron density, etc
24 p4370 A69-43605

Gas lens distortion of Gaussian light beam in sequence of lenses with same aberration, using shuttle pulse technique
01 p0120 A69-10849

Reflection measurements in IR, investigating effect of angle of incidence and collimated beam on reflection spectra
01 p0120 A69-10891

Reflecting telescope objective for far UV and X ray regions, discussing microfinishing and optical and mechanical tolerances
01 p0121 A69-10896

Holographic laser type memory with bulk storage capacity and short readout time
03 p0428 A69-13116

Optical correlator for fast acquisition of pseudorandom ranging codes, giving code delay estimation to synchronize local code generator of delay-lock loop
03 p0389 A69-13186

Single two dimensional coherent matched filter optical processor for simultaneous synthetic radar antenna beam sharpening and pulse compression
04 p0562 A69-15475

Line profile and optical interferometry in astronomy and geophysics
05 p0760 A69-15590

Plastic virtual infinity lens system for large aperture cathode ray tube direct view simulator displays
05 p0760 A69-15592

Electronically controlled spark gap system for HF optical frame separation based on Cranz-Schardin principle
05 p0763 A69-15985

Imagery degradation by moisture condensation on thermal IR scanners optics during aircraft descent from higher to lower altitude
08 p1311 A69-19821

Electronic optical system to process time-varying signals as optical spectrum analyzer for measuring power spectral density of input time function
08 p1317 A69-21086

Near field repeatable stimulator of infrared earth horizon sensors in variable environments and test levels, noting orbital conditions
[AIAA PAPER 69-322] 09 p1478 A69-22376

Optical motor system to efficiently convert laser energy into mechanical rotational energy, giving equations for controlling motor speed
09 p1442 A69-22457

Microwave antennas optical simulation, discussing given phase amplitude distribution problems
09 p1469 A69-22625

Computer generated kinoform optical element operating on phase of incident waves and forming wave front reconstruction single image
10 p1697 A69-23867

Intracavity acoustooptic devices based on isotropic and anisotropic acoustic Bragg diffraction, discussing efficiency, bandwidth and acoustic column width
10 p1697 A69-23871

Holographic techniques application to optical systems for high resolution images of distant objects by overcoming atmospheric turbulence and light diffraction limitations

11 p1883 A69-26488

Large capacity holographic memory design based on page organization concept, considering lens parameters and hologram size

11 p1886 A69-25041

Distance vs time and velocity vs time measurements for high speed model missiles by means of laser interferometry and optical Doppler shift method

11 p1886 A69-25042

Vignetting effect on impulse response of general coherent optical Fourier processor, noting time varying character and input position sensitivity

12 p2036 A69-25912

Precision optical systems tests, using two beam interferometer and CW gas laser to examine reflected or transmitted wavefront contours

12 p2092 A69-26421

Optical absorption cell with variable path length and temperature for measuring absorption coefficients of gases at low and high temperatures

12 p2093 A69-26482

Instrument for simultaneous observation of astronomical plate pairs for detection of stars with UV color excess

16 p2791 A69-32226

Lunar based optical workshop and repair facility, using ion beam technique to polish and repair optical element surfaces

18 p3113 A69-34243

Apollo optics system ground and flight performance tests results, suggesting possible design changes for sunlit space environments

19 p3307 A69-35796

Lasers and maser devices in radio quantum electronics, discussing optical parametric and microwave devices including transistors, diodes, magnetrons, etc

19 p3284 A69-36433

Optical devices for nondestructive testing of large piston engined equipment

20 p3547 A69-36921

Radar data optical spatial-domain processor providing azimuth processing in range channels without range compression capability, reviewing coherent optical channels properties

20 p3489 A69-37636

Variable optical system with remote and continuous adjustment of beam for solar simulation, permitting maximum test facility utilization [AIAA PAPER 69-997]

22 p3920 A69-40375

Space simulator vacuum facility for optical satellite tests, construction, operation and maintenance, emphasizing noncontaminating environment and pumping systems [AIAA PAPER 69-1026]

22 p3924 A69-40396

Optical engineering and quality control of photogrammetric instruments for aerial color photography, discussing lenses, filters, projectors, plotters, electro-optical rectifier, etc

22 p3949 A69-40996

Liquid filled adjustable optical analog of human eye for aligning, calibrating and systems testing of automatic IR optometers

22 p3888 A69-41231

Incoherent object threshold light detection by quantum limited optical system in presence of radiant thermal energy

23 p4191 A69-42147

Linear electrical analogs for two dimensional optical data processing systems, discussing diffraction field model, quadratic phase filters, thin lenses, photographic film applications, etc

24 p4286 A69-42619

Quadratically nonlinear filtering systems analysis and synthesis by linear methods, discussing application to partially coherent transilluminated optical systems

24 p4350 A69-42971

Adhesive bonding of optical components, discussing material types, test methods, problem of operation at cryogenic temperature, etc

24 p4326 A69-43465

OPTICAL FILTERS

NT INFRARED FILTERS

NT ULTRAVIOLET FILTERS

Axisymmetric optical filter synthesis based on holographic technique for making Gabor zone plates, using scalar diffraction theory

02 p0249 A69-11927

Optical narrow bandpass filter designed for precision solar corona observations, utilizing interferential polarization and thermo-optical compensation

03 p0506 A69-13085

Light pulse narrowing in laser in linear mode operation with inertialess bleachable filter

03 p0440 A69-13716

Saturable dye filters used with ruby lasers, discussing relaxation time, residual absorption source and transient spectral hole burning

07 p1155 A69-19089

Filtering system for xenon arc solar simulator to provide operation at air-mass-two /average sea level/ sun-light

09 p1476 A69-21648

Rocket-borne photoelectric photometers for UV observations of Saturn, using interference filters

09 p1602 A69-22216

Neodymium doped YAG laser efficiency dependence on pump power level and spectral filtering of pump light

10 p1705 A69-23814

Electron beam addressed electrooptic light valve used as spatial filter, discussing electronic control and optical processing in real time

10 p1697 A69-23870

Traveling wave passive Q switched laser with bleachable absorber filter, analyzing unsteady processes without expanding field along natural resonator modes

10 p1705 A69-23949

Q switched carbon dioxide laser power increased by placing bleachable /boron tetrachloride/ filter in resonator

11 p1894 A69-24454

Tilting filter photometer for faint light source spectrophotometry, discussing digital approach used with photomultipliers

11 p1884 A69-24834

Optical correlator for radar signal processing based on filtering first order diffracted light and integration on photomultiplier

12 p2028 A69-25911

Flow field over plain or complex bodies with pressure density changes, using high speed schlieren apparatus with color strip filter

12 p2088 A69-26183

Low pass quasi-optical waveguide filters, using metal strips in dielectric material to obtain broad stopband and low dissipation loss

13 p2229 A69-27675

Optical narrow bandpass filter designed for precision solar corona observations utilizing interferential polarization and thermo-optical compensation

14 p2515 A69-28767

Color IR film improvement for high altitude remote sensor, using auxiliary minus-visual filters

15 p2609 A69-30457

Restoration of photographic images by optical spatial filtering with least mean square error filter in presence of random additive noise

15 p2611 A69-31033

Aberrations of Fabry-Perot interferometers with small nonuniformities in plate spacing used as spectral and optical filters

17 p2972 A69-33081

Electronically tunable lithium niobate optical filter utilizing collinear acousto-optic diffraction in anisotropic medium

17 p2943 A69-34157

Liquid filter cells design with emphasis on filters usable for inorganic and organic liquids

21 p3770 A69-38679

Thermostatic electronic control device of birefringent filter in Wrocław Observatory coronagraph during prominence observations

22 p3943 A69-40000

OPTICAL GENERATORS

U LASERS

OPTICAL HETERODYNYING

Optical heterodyne communication experiments in TV signal transmission [IEEE PAPER J-5]

05 p0720 A69-16319

Optical heterodyning with single mode carbon dioxide laser and triglycine sulfate pyroelectric detector, noting detector sensitivity threshold

07 p1156 A69-19332

Statistical properties of intensity fluctuations of light fields consisting of incoherent Gaussian component heterodyned with single frequency coherent beam

07 p1182 A69-19416

Optical heterodyne detection of randomly distorted signal beam, noting time invariant scheme yielding largest average SNR in atmospheric turbulence

07 p1087 A69-19642

Gas laser emission natural frequency fluctuations spectral density measured by auxiliary heterodyne laser

08 p1326 A69-20540

Dispersion corrected three wavelength laser heterodyne system for plasma electron density and neutral density measurements

09 p1544 A69-21331

Radar signal cross correlation function calculation with reference function, applying acousto-optical modulator

10 p1694 A69-23539

Optical modulation through Doppler frequency shift obtained by rotating radial diffraction grating [AOLR-69-1]

11 p1889 A69-25394

Remote optical heterodyne measurement of Doppler shift as method for determining vector wind velocity, noting influence of air pollution

14 p2448 A69-29523

Laser Doppler heterodyning for monitoring motion noting solid surfaces vibration, liquid and solid surfaces linear velocity and turbulence in liquids and gases

15 p2614 A69-31276

Optical heterodyne communication system with single mode and frequency carbon dioxide laser, noting coherent photon noise limit

17 p2919 A69-33086

Coherent radiation detection using laser optical sine waves, considering detection by heterodyning, laser preamplifier and parametric amplification

19 p3335 A69-36070

He-Ne laser heterodyne system for measuring dispersion at 6328 and 6401 Å due to Ne metastable atoms in gas discharge

23 p4172 A69-41397

Optical communication through random atmospheric turbulence via heterodyne and video detection, estimating performance from optical wave propagation analysis

23 p4125 A69-42186

Hologram transmission by heterodyne scanning reference beam technique

24 p4283 A69-43333

OPTICAL ILLUSION

Depth distortions in binocular visual fields from misleading size cues

21 p3653 A69-38900

Zoellner illusion in human visual system measured as function of background pattern density consisting of intersect angles and background line spacing

22 p3879 A69-40841

Optical identifications for 17 Ohio survey sources with peaked or flat spectra

01 p0153 A69-10854

Optical identification of X ray source Cen XR-2 as variable star WX Cen, discussing colors and similarity to Sco X-1

01 p0145 A69-10857

Optical measurements through retrorocket plumes of landing spacecraft, investigating reduced landing site visibility and modulation transfer function

02 p0248 A69-11765

Refractive index structure constant for different atmospheric turbulence conditions, discussing possibility of improved capabilities for imaging systems

02 p0275 A69-11930

Oscilloscope display of sample of subnanosecond light pulse, using optical analog of electronic sampling oscilloscope

02 p0259 A69-12656

Scattering data for optical diagnostic measurements on two component suspensions or gases, using random distributions of spheres

04 p0555 A69-14282

Optical signal frequency method for measuring velocity of fluid flow

04 p0598 A69-14995

Shipboard standard visibility measurements by means of AEG-FFM scattered light recorder aboard Meteor in Atlantic Ocean during 1965

04 p0628 A69-15158

Optical method of sounding cosmic matter penetrating into upper atmosphere by analyzing twilight phenomena

04 p0594 A69-15246

Poincare sphere representation of polarized light used to predict rotation effect on optical observations in photoelastic shell analysis

04 p0683 A69-15495

Venus diameter determination from optical measurements, noting cloud layer height and height of suspended particles in upper atmosphere

05 p0818 A69-15621

Electro-optical tracking devices for displacement and/or dislocation measurement without physical contact

05 p0763 A69-15986

Atmospheric vertical density and pressure profiles determined from satellite measurements of light beam phase shift and refraction angle

05 p0760 A69-16694

Microwave antennas simulation by optical systems based on Huygens-Kirchhoff approximation, noting application to antenna analysis, synthesis and radiation patterns

05 p0736 A69-16780

Optical simulation of microwave antennas with variable profile reflectors, investigating radiation patterns by photometric scanning of photographs obtained with He-Ne laser

05 p0736 A69-16781

Optical mean energy distribution of quasars, discussing red shift effects, significance of physical origin of optical continuum radiation and K-term magnitude determination

06 p0999 A69-16975

Metastable level population measurement in laser crystal based on luminescence changes under influence of stimulated emission

06 p0934 A69-17457

Hot gas flows turbulence linear component intensity and frequency spectrum using optical measurement of pulse velocities

06 p0926 A69-17540

Atmospheric effects on laser beam attenuation, noting application to optical visibility measurement by ruby laser

08 p1327 A69-21089

Laser control of French rocket head guidance system, discussing gyroscopic master, stellar or solar detectors, etc

09 p1518 A69-22162

Unicellular microorganisms size and concentration estimates based on light scattering measurements of suspensions in spectrophotometer cuvette compartment

11 p1829 A69-25643

Optical diagnostics methods for fast processes in rarefied plasma, using Michelson interferometers with ruby and Nd lasers as light sources

12 p2089 A69-26186

Stellar diameter interferometric measurements, discussing double slit arrangement and illumination in focal plane

13 p2334 A69-27305

Optical measurement method for burning surface temperature of condensed systems, realizing radiation from surface of combustion by light guide of monocryalline aluminum oxide

13 p2379 A69-28453

Focused beam wave applied to atmospheric turbulence probing for spectral density of index of refraction, structure constant and wind velocity

14 p2414 A69-29512

Log amplitude variance calculation methods compared in statistics of optical scintillation by application to measurements with laser

14 p2486 A69-29642

Optical and radio estimations of galactic masses, analyzing radius of rotation curve inflection point

15 p2687 A69-30547

Zodiacal light brightness and polarization measurements from space probes approximated by Mie scattering of interplanetary dust particles

16 p2857 A69-32092

IR and optical measurement of Crab pulsar NP 0532, analyzing energy density per pulse and smoothness of visual data

18 p3191 A69-34318

Shock wave profiles in molecular N-H gas mixtures in shock tube measured by optical electron beam method, noting disagreement with Navier-Stokes calculations

18 p3134 A69-34458

Shock heated argon thermal conductivity studied by optical interferograms, deriving equation for measured mean value

18 p3228 A69-34459

Optical distance measurement using laser and atmospheric dispersion method through average refractive index determination over path

18 p3152 A69-35198

Particle size, velocity and position in moving streams measured by tilted film plane optical system with pulsed light source

19 p3306 A69-35733

Quantitative density data from schlieren measurements by photomultiplier technique for axisymmetric flow outside diffraction bands

19 p3306 A69-35741

Manual procedures for midcourse and terminal guidance, discussing onboard optical measurements and calculations

19 p3368 A69-35792

Optical flashes from PSR 0833-45 searched using 74 inch Radcliffe telescope with pulse counting photometers

20 p3604 A69-37575

Backscattering intensity measurements by optical elements at 180 degrees to beam propagation direction, using CW He-Ne laser as radiation source

20 p3554 A69-37609

Metastable level population measurement in laser crystal based on luminescence changes under influence of stimulated emission

20 p3555 A69-37940

Nonlinear optics, properties, light waves interaction, forced scattering and application in laser technology

20 p3555 A69-38014

Optical method for upper atmosphere cosmic dust detection, emphasizing twilight luminance origin from light scattering

21 p3702 A69-38349

TV-optical observations of asteroid Icarus, discussing installation, photographs and position

21 p3719 A69-38402

Optical data supporting satellite observations of soft electron precipitation on poleward side of normal auroral zone

21 p3709 A69-38501

Ariel 3 satellite spin axis direction determination by optical means from analyzing sunlight glints reflected from surfaces

21 p3820 A69-39261

Biomedical electrical signals analysis by optical data processing, discussing conversion, SNR and filtering techniques

21 p3666 A69-39440

Eye optical system spherical aberration measured by knife-edge method derived from Foucault test, investigating retinal image quality

22 p3882 A69-40873

Contact stability of hollow cylinder compressed between parallel planes measured optically, compared to approximation of elasticity theory

23 p4162 A69-41416

Optical activity measurement for exobiology applications, considering polarimetry, gas-liquid chromatography, mass spectrometry and radioactivity detection

23 p4213 A69-41622

Spiral and irregular galaxies integral properties and relations, discussing optical and 21-cm observations, hydrogen masses, statistical corrections, hydrogen line optical depths, etc

23 p4220 A69-42383

Holo-diagram device for making and evaluating holograms for small deformations measurement in large machine tool parts

24 p4317 A69-43760

Holographic measurement of sinusoidally vibrating Al sheet, verifying results with Twyman-Green interferometer

01 p0082 A69-10853

Laser application to machine tool accuracy and alignment [ASTME PAPER MR68-407]

02 p0252 A69-11797

Optical ozone radiosonde for vertical distribution analysis, using weak absorption of Chappuis bands

02 p0251 A69-12761

Fluid flow velocity measurements by optical device having trigonal rectangular glass prisms and microscope objective

03 p0427 A69-12969

Alignment of rocket-borne instrument with sun, discussing mechanical system design, servocontrol and silicon photodiode sensors

03 p0427 A69-12980

Laminar and turbulent flow measurement in variety of tube diameters, using ring laser without insertion of mechanical probe

04 p0596 A69-14281

Vibrational characteristics of sonar transducer analyzed by optical holographic interferometry

04 p0598 A69-14871

Laser Doppler meter model interpreting output frequency in terms of particle crossing set of fringes

06 p0932 A69-16927

Glass fiber optical angular displacement noncontacting nonloading transducer suitable for measuring torsional vibrations

06 p0923 A69-16929

Optical sighting method for determining orientation of rocket on launch pad by laser collimator, noting lining up of Cassiopeia system

06 p0930 A69-17104

Laser measurement techniques for plasma diagnostics, spectroscopy, angular rotation rate, distance, velocity and alignment of tools and assemblies [ASME PAPER 68-DE-21]

06 p0933 A69-17167

Narrow and wide angle actinometric instruments on-board Cosmos 122, 144 and 156, describing optical and data acquisition systems

06 p0929 A69-17977

Optical device for measurement of temperature changes with height in upper atmosphere by rockets or satellites

07 p1132 A69-18676

Motion measurement using Doppler shift of scattered laser light, noting high resolution

09 p1492 A69-21398

Optical frequency standards, discussing lasers VHF stability, RF and optical ranges, long and short term effects, etc

10 p1702 A69-23299

Bright fundamental stars right ascensions observed in Chile, discussing instruments, declination range, systematic errors, etc

10 p1777 A69-23388

Relative proper motions of stars measured by microscope projection technique

10 p1778 A69-23570

Single and clad glass fibers radii and refractive indices measurements on basis of laser light scattering

11 p1918 A69-25044

Optical investigation of defects in crystal lattices on stress induced birefringence basis, describing stress visualization results for Si and glass

11 p1887 A69-25199

Optical sensing devices for angle measurement between celestial body and satellite axes

12 p2078 A69-25871

Monograph on schlieren-optical technique for plasma beam temperature measurements using photoelectric scanning device

12 p2134 A69-26120

Coherent optical flow detection and surface microstrain measurement techniques including holographic interferometry, optical correlation and diffraction

12 p2180 A69-26305

Laser Doppler particle sensor to measure velocities in rocket exhausts, using He-Ne laser light source and Fabry-Perot interferometer frequency filter [AIAA PAPER 68-723]

12 p2094 A69-26783

Optophotoclectric pickup design for angular displacement measurements, considering application of moire pattern produced by radial diffraction gratings

14 p2447 A69-29327

Directional properties of electro-optical goniometric system based on known design parameters

14 p2420 A69-29332

Optical carrier single channel telemetry system providing complete electrical isolation between shock tube data acquisition and data recording instrumentation 14 p2449 A69-29561

Plasma diagnostics facilities design, circuit diagrams and operation based on Q switched ruby laser and optical recording system 14 p2461 A69-29782

Inlet shape and Reynolds number effects on entrance flow development, using laser flowmeter based on Doppler effect to obtain laminar velocity profiles 15 p2589 A69-30001

Interferometer for measuring electric fields spatial correlation function at camera aperture, describing laser light coherence measurements after propagation through turbulent atmosphere 15 p2653 A69-31164

Interferometric displacement transducer for measuring linear displacements up to one and one-half inches 15 p2614 A69-31280

Balloon for in situ measurements of atmospheric optical parameters using two axis sun pointer, spectropolarimeter and airborne telemetry 15 p2615 A69-31288

Optical measuring methods of cross sections and mechanical properties of heat resistant fiber reinforced materials 16 p2803 A69-31804

Optical probe for determining ozone vertical distribution at high altitudes, discussing optical method requirements and ozonesonde construction 16 p2792 A69-32637

Computer graphics technique for reducing photographic data from optical device to replace time consuming visual methods 18 p3134 A69-34373

Electromagnetic field signatures in optical IR spectrum of satellite-borne sensors, analyzing spectral, spatial and temporal distributions, polarization and phase 19 p3309 A69-36060

Optical system for cosine-corrected radiation point to areal source measurement, discussing adaptation to spectral instruments, photocells and photoelements 20 p3538 A69-37429

Remote sensing by electromagnetic waves in microwave region, describing differences between microwave and optical sensing 20 p3493 A69-37741

Ring laser bias in angular rotation measurement using optical phase shifters 21 p3735 A69-38651

Telecentric lens principle for accurate optical strain measurements, using moire grids 21 p3844 A69-39322

Optical instruments as visual aids in scientific research including electron optical image converters detecting emissions invisible to human eye 22 p3943 A69-39974

Ring lasers basic operating principles and primary applications, discussing Fresnel drag, magneto-optical effect, etc 22 p3961 A69-40240

Device for studying stereoscopic field of vision applied to determining field of vision standards for healthy individuals 22 p3886 A69-41113

Microcrack detection by holographic interferometry, describing experimental apparatus and test procedure and results 24 p4317 A69-43763

OPTICAL METHODS

U OPTICS

OPTICAL MICROSCOPES

IR polarizing microscope with IR corrected objectives and eyepieces providing higher contrast, sharper focusing and less light scattering 12 p2093 A69-26595

Extraterrestrial optical microscopy, discussing experiment, telemetry, data interpretation and instrument characteristics concerning biological, cytochemical and petrographic microscopes 23 p4164 A69-41621

OPTICAL MODULATION

U LIGHT MODULATION

OPTICAL PATHS

Photographic image degradation resulting from wave front distortion due to atmospheric refractive density gradients over long oblique optical path 01 p0107 A69-10223

Optical path variations and angle of emergence calculation in dynamic ionosphere 01 p0068 A69-11111

Polarization-albedo relationship for selected lunar maria, highlands and mountains in five passbands suggest optical path length function of effective refractive index and particle size 05 p0829 A69-16663

Jovian limb H alpha line due to auroral emission obtained from high dispersion spectra with long light path through upper atmosphere 07 p1214 A69-18614

Strong light flashes detected from fast pulsar NP 0532 in Crab Nebula, discussing time-averaged optical flux 08 p1394 A69-20622

Light waves transmission and beam guidance, analyzing solid lens type guide and automatic light path stabilizer 09 p1518 A69-22130

Laser frequency drift effect on operation of three mirror interferometer, noting wave reflection by two compounded mirrors 11 p1895 A69-24720

Fluctuations in angle of arrival of laser and thermal radiation beams over near ground path 11 p1840 A69-25570

Distortionless propagation of light through optical two level atoms medium, considering relation to Poynting theorem, hyperbolic secant solution and pendulum analogy 12 p2130 A69-26313

Optical absorption cell with variable path length and temperature for measuring absorption coefficients of gases at low and high temperatures 12 p2093 A69-26482

Contrast interference patterns obtained in Michelson interferometer at various path differences, using He-Ne laser as light source 12 p2108 A69-26593

Optically swept glass slab laser design, discussing pulse length and peak power 14 p2457 A69-28930

Line of sight atmospheric path measurements for atmospheric inhomogeneities, using phase quadrature, microwave and near IR techniques 14 p2415 A69-29516

Scintillation magnitude related to range and turbulence strength in near earth optical propagation, using pulsed and helium-neon laser 15 p2570 A69-31030

Quantitative IR spectral emissivity measurements of NO between 300-800 K made in absorption, correlating observed absorbance with optical path length and gas pressure 17 p3009 A69-34156

Monochromatic undulating light vertical refraction path curvature radii calculation based on refractive index 18 p3174 A69-35201

Weak displacements of opaque objects and optical distortion in solid state lasers analyzed by holographic interferometry 19 p3308 A69-35909

Atmospheric slant path molecular absorption and emission from band model methods, discussing computer program prediction capabilities 19 p3375 A69-36052

Trajectory of light ray propagating through atmosphere based on known refractive index defined by function of special Cartesian coordinates 21 p3675 A69-39245

OPTICAL POLARIZATION

Polarization of laser radiation scattered forward and back in artificial fog and smoke 03 p0393 A69-13275

Mode suppression by mixed polarization in Michelson interferometer type of optical resonator 05 p0776 A69-16330

Output polarization rotation sensitivity to axial magnetic field varied by variable angle quartz flat inside He-Ne laser resonator 07 p1198 A69-18646

Transparent dielectrics destruction by laser radiation noting stress development in medium 08 p1324 A69-19947

Light polarization from stimulated Brillouin effect in compressed gaseous nitrogen, presenting depolarization variations as function of gas density and laser power 09 p1516 A69-21691

Daytime clear sky light polarization in UV and visual spectral regions calculated with considerations for aerosol components polarization effect 09 p1491 A69-22708

Quasars optical polarization data, showing variable polarization for 3C 273 10 p1790 A69-24139

Solvent effect in catalytic hydrogenation reaction of Schiff bases of alpha-keto acids with optically active alpha-alkylbenzylamine 12 p2026 A69-25779

Optically active alanine synthesis from oxaloacetic acid by hydrogenolytic asymmetric transamination, noting role of decarboxylation 12 p2026 A69-25780

Temperature effects on polarization degree, threshold current and delay of radiation from GaAs laser diodes with diffused Zn 13 p2227 A69-27328

Polarization of laser radiation scattered forward and back in artificial fog and smoke 14 p2410 A69-28783

Polarization dependent gain saturation and non-linearity induced anisotropy in He-Ne laser amplifier 14 p2457 A69-28931

Polarization and angular distribution of 6328 A He-Ne laser light scattered by latex-sphere hydrosols, comparing coherent and incoherent scattering patterns 15 p2595 A69-30223

Time behavior of output intensity and polarization of single cavity mode internal mirror Zeeman laser in axial magnetic field 16 p2798 A69-32607

Plane wave scattering by multimode corrugated structure with H mode incidence, revealing theoretically scattering resonance as P type Wood anomalies 17 p2925 A69-33844

Polarization, frequency and energy characteristics of lasers with resonators containing polarization transforming elements 17 p2983 A69-33967

Crab Nebula pulsar NP 0532 linear and circular optical polarization measurements 21 p3798 A69-38542

Quantitative analysis of light intensity dependent changes in optical rotation angle of isotropic media caused by laser beam 22 p3959 A69-40017

Optical frequencies and polarizations of IR active phonons of tysonite lanthanide fluorides based on Kramers-Kronig reflectance spectra analysis 22 p3993 A69-40729

Optical activity measurement for exobiology applications, considering polarimetry, gas-liquid chromatography, mass spectrometry and radioactivity detection 23 p4213 A69-41622

Optical rectification in crystals by excitation of nonlinear/time constant and space variable/polarization 23 p4174 A69-41874

Index of refraction turbulent fluctuations effect on beam traversing optically active medium, discussing far field diffraction pattern and incoherent scattering [AIAA PAPER 68-683] 24 p4304 A69-43578

- Aperture effects in nonlinear optical processes associated with second harmonic and parametric generation of light
03 p0439 A69-13056
- Mechanical and optical viscoelastic characterization of Hysol 4290 epoxy polymer as function of time and temperature, using creep test data
03 p0524 A69-13064
- Electrical, optical, magnetic and structural properties of titanium oxide, stressing transition difference with vanadium oxide
03 p0490 A69-13923
- Optical absorption of thin film cesium between 2300 and 11000 Å
03 p0491 A69-14060
- Optical absorption of vacuum deposited thin rubidium films, noting similarity to sodium and potassium
03 p0491 A69-14114
- Optical materials behavior after irradiation by high energy electrons, gamma rays or protons
03 p0493 A69-14190
- Vapor grown GaP electrical and optical properties, considering undoped and Se or S doped samples on GaAs and GaP substrates
04 p0640 A69-14438
- Dark equatorial belt of Jupiter atmosphere in 1962 and 1963, noting photometric contrasts, molecular absorption and possible structure
04 p0658 A69-14961
- Optical variability of quasar 3C 273, suggesting radiation emission from single bodies rather than from large complex of independent sources
04 p0662 A69-15235
- Te and Zn doped p-type GaAs single crystals optical homogeneity, using interferometry
04 p0644 A69-15266
- Glass lasers, discussing neodymium properties in glass, flexibility of glass in size, shape and optical excellence, temperature coefficient of index of refraction, etc
05 p0772 A69-16227
- Method of finding new nonlinear optical materials using anharmonic oscillator model
[IEEE PAPER F-5] 05 p0808 A69-16312
- Brewster angle window degradation of high power ionized argon gas lasers
[IEEE PAPER L-4] 05 p0775 A69-16322
- Nonlinear optical coefficients in group IV and III-V semiconductors, calculating contribution from conduction and core electrons
[IEEE PAPER V-7] 05 p0776 A69-16329
- BiTeBr semiconductor band structure determined from electrical and optical properties
05 p0810 A69-16609
- Metal heating by laser, noting heating rates exponential increase with time due to optical characteristics changes
06 p0932 A69-16915
- Regularization methods in inverse problems of atmospheric optics, analyzing atmospheric thermal sounding and interpretation of radiation measurements
06 p0919 A69-17616
- Fiber optics evolution, discussing industrial and medical applications
06 p0958 A69-17675
- Fiber optics technology, discussing fabrication and applications involving light carrying /incoherent/ and image carrying /coherent/ fibers
06 p0958 A69-17676
- High transmittance long fiber optics, presenting data on special transmission as function of temperature
06 p0958 A69-17677
- Optical commutation to permit multifield monitoring and recording with one sensor by employing high resolution imaging fiber optics elements feeding common focusing lens
06 p0926 A69-17678
- Symmetrical formulation of quantum theory of three wave optical parametric interactions in crystals
06 p0958 A69-17710
- Laser light scattering with orientation saturation of microsystems by electric field, noting application to optical anisotropy of macromolecules and colloidal particles
07 p1149 A69-18900
- Hot gases optical properties based on real spectra, discussing radiative processes and cross sections calculation methods
07 p1185 A69-19166
- Optical properties of hot air used to solve radiative transfer problems, including emissivities and absorption coefficients calculations
07 p1185 A69-19167
- Saturn rings optical properties and thickness from edgewise photometric observations, noting luminance relationship to direct brightness
07 p1219 A69-19335
- Ce activated garnet crystals optical properties, noting IR and near UV absorption spectra and room and low temperature fluorescence
07 p1201 A69-19647
- Bright galaxies observed at 408 MHz with fan beam of east-west arm of cross-type radio telescope for correlations between radio and optical properties
08 p1386 A69-20087
- Thin films of niobium oxide vapor-deposited on silicon and quartz substrates, discussing optical and dielectric measurements, dispersion and absorption coefficient
[ECS PAPER 17] 08 p1372 A69-20365
- Quasars optical and electrical properties, distance, nature and role in cosmology
08 p1390 A69-20377
- Optical systems with quasi-monochromatic partially coherent illumination, discussing energy distribution computation program
08 p1353 A69-21096
- Glass science and technology noting optical, electrical and mechanical properties, forming techniques, structure, ionic properties, high pressure effects and glass ceramics
08 p1341 A69-21126
- Alkali halide crystals destruction by laser radiation for estimating optical strength, discussing impact ionization hypothesis
08 p1328 A69-21188
- Structural and optical properties of vacuum deposited GaP films at below 240-850 C
09 p1554 A69-21332
- Nonlinear optical properties of barium sodium niobate in ferroelectric tetragonal phase above room temperature, noting spontaneous parametric emission
09 p1515 A69-21354
- Optical transfer function in single scattering approximation for light scattering media consisting of large particles
09 p1536 A69-21865
- Nonlinear optics, discussing materials, polarization, harmonic generation, light mixing, parametric amplification and oscillation, stimulated scattering, absorption, reflection, refractivity and self focusing
09 p1518 A69-22124
- Three color observations of 16 magnetic stars and photometric properties of 23 stars, discussing periodicities in variations
09 p1599 A69-22196
- Pulsar NP 0532 optical pulsations period, discussing time rates of change, pulse shape, amplitude, photons, etc
10 p1774 A69-23182
- Optical features of Sco-X-1, Tau-X-1 and Cyg-X-2 X ray sources, discussing optically thin hot plasma model for X ray emitter
10 p1682 A69-23327
- Soviet book on highly doped semiconductor covering energy spectrum analysis, kinetic effects, optical properties, fabrication and applications
10 p1746 A69-23522
- Diffusion pump oil reflectance and absorption coefficients measured in three thicknesses using light source, monochromator and detector
10 p1725 A69-23647
- IR detection at sum or difference frequency by employing optically nonlinear crystal and laser in visible and photomultiplier
10 p1704 A69-23656
- Optical observations of proton flare, discussing flash phase and sunspot umbrae
10 p1765 A69-23749
- Diamond-like glassy semiconductor compound of cadmium germanium arsenide, determining optical lattice vibrations from IR reflection spectra
10 p1747 A69-23963
- Ruby laser crystals optical inhomogeneity and residual mechanical stresses effects on laser beam angle of divergence
11 p1936 A69-24698
- Gas laser materials, fabrication and performance, analyzing gas cleanup, cathode degradation, bore erosion and optical surface contamination effects
11 p1896 A69-24743
- He-Ne laser output phase fluctuations between adjacent modes during unlocked and self locked condition, noting cavity optical length short term fluctuations influence
11 p1898 A69-25048
- Atmospheric optics by spacecraft and high altitude probes concerning ozone and aerosol distributions, scattering indicatrix polarization and dust cloud inhomogeneities
12 p2055 A69-25815
- Mars higher atmospheric transparency and changes in surface colors
12 p2154 A69-25823
- Airborne Q switched ruby laser for studying upper atmosphere meteoric formations optical characteristics and kinetics against background of underlying surface
12 p2125 A69-25955
- Kerr constant verification device to study electrooptic liquids properties
12 p2084 A69-26148
- Optical constants of bulk diamonds compared with interstellar extinction, calculating extinction curves for diamond particles from Mie theory
12 p2157 A69-26230
- Ruby crystal optical homogeneity and relation to main laser emission characteristics, discussing optical and structural surface properties
[IEEE PAPER U-7] 12 p2106 A69-26322
- Optical tests of Hale telescope mirror and support system at Palomar, noting various maladjustments and malfunctions
12 p2057 A69-26411
- Optical and spectral properties of dense plasma expanding after exploding electric wire in vacuum using high speed photography
12 p2137 A69-26533
- Spectral transmission curves in near UV for optical glasses
12 p2130 A69-26599
- Quasars optical properties, hypotheses on nature, energy distribution, red shift, stellar magnitude and distance estimation on basis of absorption
12 p2167 A69-27042
- Venus atmosphere optical properties on basis of Venera 4 data, proposing models for measured rotational temperature and subcloud atmosphere radiative equilibrium
13 p2345 A69-27691
- Optical constants of soot applied to heat flux calculations, discussing soot particles concentration determination in hydrocarbon combustion products
[ASME PAPER 68-HT-13] 13 p2374 A69-27777
- Segmented active mirror optics design concept for lightweight optically stable primary reflector used in large orbiting astronomical telescopes
13 p2261 A69-27950
- Outgassed condensation effects in vacuum on magnesium difluoride overcoated UV irradiated Al mirrors,

including temperature effects, Lyman alpha reflectance and IR analysis of deposits

13 p2299 A69-28015

Monograph on optical properties and band structure of semiconductors covering absorption and reflectivity measurement, electronic states transition, deformation, etc

13 p2323 A69-28200

X ray pulsations in Crab Nebula at frequency closely matching radio and optical pulsations, noting energy distribution

13 p2354 A69-28465

Photometric discovery of new variable stars resulting from quasars observation, noting optical variability noncorrelation with observed properties

13 p2354 A69-28468

Ruby laser beam effects on CdS crystals optical properties, measuring absorption spectrum and light dispersion in crystal

14 p2457 A69-28999

Composite ruby laser optical inhomogeneity effect on spectral, temporal and angular emission characteristics

14 p2458 A69-29163

Optical rectification effect in lithium metaniobate crystals under neodymium laser radiation, comparing results with data for potassium dihydrophosphate crystals

14 p2458 A69-29168

Reversibility principle in transilluminated three dimensional photoelastic medium

14 p2535 A69-29359

Soviet collection of articles on atmospheric optics

15 p2646 A69-30159

Plasma three electrode source ion-optical characteristics, noting beam angular divergence dependence on spacing between discharge cavity and intermediate electrode

15 p2658 A69-30240

Reflected and absorbed solar radiation by planetary atmosphere and surface determined as function of atmosphere and surface optical properties

15 p2689 A69-30564

Plasma modes, critical fluctuations and optical properties electric field dependence in two valley model of Gunn instability semiconductors

15 p2581 A69-31240

Spectrophotometry of elliptic galaxy NGC 1052 nucleus from 3400 to 6300 Å for relating radio properties and optical characteristics

16 p2853 A69-31610

Martian bright surface areas identified as homogeneous powder having opaque grains, discussing hydrated iron oxides contributions to observed optical properties

16 p2855 A69-31660

Accurate optical position of quasars determined by plate overlap for radio interferometer calibration

16 p2859 A69-32229

Objective lens of AVR-2 refractor at Poltava Observatory measured for spherical aberration, astigmatism, field curvature, coma and distortion

17 p2970 A69-32883

Monograph on GaAs injection laser electrical and optical properties during crystallization out of solution covering principle, p-n junction fabrication, I-V characteristics, doping effect, etc

17 p2982 A69-33571

Optical constants of Ta-W and Nb-Mo measured in IR and visible ranges as function of incandescent temperatures

17 p2990 A69-33574

Laser emission divergence reduced by compensating optical inhomogeneity of active elements with prismatic reflector in resonator

17 p2983 A69-33970

Optical characteristics at 2-25 micron spectral interval for various metal blacks vaporized in vacuum on KBr, Ni foils and nitrocellulose substrates

17 p3075 A69-33976

Anamorphic holography, discussing optical and nonoptical wavelength processes and generation and reconstruction of holograms for radar applications

17 p2976 A69-34062

Dark equatorial belt of Jupiter atmosphere in 1962 and 1963, noting photometric contrasts, molecular absorption and possible structure

18 p3197 A69-34724

Optical constants changes in germanium determined by modulation method of measuring light reflected at different angles

18 p3173 A69-35014

Alkali halide crystals destruction by laser radiation for estimating optical strength, discussing impact ionization hypothesis

18 p3152 A69-35157

Hologram imaging characteristics expression, deriving relations characterizing localization and dimensions of images

19 p3308 A69-35868

Fourth rank tensors analysis describing nonlinear optical effects for 32 classes of crystalline substances

19 p3334 A69-35882

Optical imaging with partially coherent nonthermal light, discussing reconstruction of object from image and similarity between object and image, including detection

19 p3372 A69-35908

Band structure and optical constants of InSb, InAs and GaSb, calculating linear momentum matrix elements and state density with spin-orbit effects included

19 p3385 A69-36515

Electrons and optical phonons interaction effects on optical and photoconducting properties of semiconductors, discussing phonon cyclotron resonance and oscillatory and magneto-oscillatory photoconductivity

19 p3385 A69-36517

Optical mixing and harmonic generation in semiconductors, discussing magnetoconductivity tensors and magneto-optical phenomena due to free carriers

19 p3385 A69-36519

InSb-InAs, InSb-GaSb, InP-GaAs and InP-GaP quasi-binary systems solid solutions optical and electrical properties, determining energy gap change as function of composition

19 p3390 A69-36554

Electronic properties changes in amorphous CdGeAs caused by long range order loss studied by measuring optical and transport properties

19 p3390 A69-36557

Optical and electrical properties of thin amorphous films of glass-forming oxide, using X ray diffraction and electron microscopy for structural features

19 p3391 A69-36561

N-type GaAs optical properties after proton irradiation, noting transmission spectra dependence on initial electron concentration and irradiation dose

20 p3582 A69-36969

Rheology application to description, explanation and measurement of materials properties during deformation

20 p3561 A69-37599

Radiative transport equation solution in two flow approximation for plane layer, considering absorption and dispersion characteristics dependence on radiation density

20 p3553 A69-37608

Optical properties and thickness of Saturn rings from observations during ring plane crossing of earth or sun, determining Tethys diameter and albedo

20 p3605 A69-37821

Nonlinear optics, properties, light waves interaction, forced scattering and application in laser technology

20 p3555 A69-38014

Optical parameters of Martian surface and temperature, discussing brightness distribution along diameter in red spectral region, based on photoelectric cross sections

20 p3608 A69-38050

Optical pulsations in aurora, studying relations to pulsations in geomagnetism, telluric currents, X rays from aurora and variations in primary particles flux

21 p3708 A69-38492

Composite laminated glass structures employed to improve safety characteristics of glass or to achieve special optical properties

21 p3752 A69-38934

Optical properties of Gabor holograms with pure reference beam, discussing image reconstruction using He-Ne laser

21 p3726 A69-39624

Solar flare optical, neutron and gamma emission, discussing ionization losses and nuclear interaction of accelerated particles in flares

22 p4003 A69-40296

Lateral waves used to explain diffraction effects by light incident upon interface at critical angle of total reflection, discussing quasi-optical properties

23 p4191 A69-42148

Acoustics and optics in terms of acoustic holography, seismic signal optical processing, acoustic and electromagnetic waveguides, etc

23 p4191 A69-42179

Ellipsometric liquid immersion method for optical parameters determination of system with nonabsorbing surface film on absorbing substrate

24 p4316 A69-43321

Electrical and optical properties correlation of air in fog, discussing droplets distribution with regard to dimensions

24 p4347 A69-43506

Optical properties of neodymium-doped YAG and glass laser materials including fluorescence lifetime and conversion efficiency, absorption spectra, sensitization effects, etc

24 p4329 A69-43751

OPTICAL PUMPING

Laser CRT with beam pumped aluminized CdS crystals, discussing single spot low duty operation

01 p0039 A69-10175

Frequency and time dependent gains of dye solution lasers for pumping by lasers and flashlamps

02 p0257 A69-12616

Chain and branched halogen-hydrogen reactions kinetic analysis for developing chemical laser with radiation energy weakly dependent on pumping energy

02 p0259 A69-12645

Pumping beam width influence on optical range resonator excited coupled oscillations, deriving approximate equations

03 p0437 A69-13043

Parametric light generation in resonator with nonlinear medium, discussing continuous pumping with laser modes matched with pumping frequency

03 p0437 A69-13044

Neodymium glass properties degradation during laser operation due to short wave pumping radiation and stimulated emission

03 p0442 A69-14219

Threshold conditions for laser pumping with emission of perfect black body

03 p0442 A69-14220

Optical pumping distortion compensation in glass laser rod by changing coolant temperature, obtaining mode locked laser pulses

04 p0609 A69-14286

Gases optical pumping by self radiation laser action, discussing high intensity oscillatory transitional wide bands of molecular gases

04 p0610 A69-14382

258 GHz reflection amplifier with saturated gas resonance, analyzing amplification variation with gas pressure, pumping power, frequency, Q values and cavity tuning

04 p0557 A69-14754

Pumping light filtration conditions effect on transition frequency of rubidium atoms

04 p0611 A69-14779

Homopolar generator as energy store for large laser pumping

04 p0612 A69-15151

Optical generation in organic luminophor solutions in 400-650 nm range

04 p0612 A69-15374

Gas lasers involving gas-discharge collisions, selective pumping or chemical reactions to produce necessary inversion, giving theoretical analysis of excitation mechanisms

05 p0772 A69-16226

Conversion of emission from pulse tube using neodymium laser with luminophor solution filled active element, discussing pumping nonlinear absorption kinetics

05 p0777 A69-16373

Gas laser operation at high pressures, examining threshold pumping and power output dependence on pressure to optimize parameters

06 p0934 A69-17680

CW laser mode steady excitation and narrow bandwidth obtainable by highly stable pumping and stable temperature of active element

06 p0934 A69-17681

Mode locked Nd glass laser to pump organic dye lasers, obtaining continuously tunable picosecond pulses

06 p0935 A69-17759

Time dependent emission spectra from flashlamp pumped organic dye lasers recorded with image converter, comparing dyes characteristics

06 p0936 A69-17901

Optical pumping of solid state lasers, reviewing processes involved and properties of lasers

06 p0937 A69-18007

Q switching of continuously pumped Nd/YAG laser using variable spacing Fabry-Perot interferometer as variable output coupler

06 p0938 A69-18229

Microwave and optical generation and amplification - Conference, Hamburg, September 1968

07 p1090 A69-18420

Rate equation analysis for internally optically pumped millimeter wave maser operating in laser crystal

07 p1146 A69-18480

Giant pulse generation by switched laser rapid pumping of neodymium doped glass laser

07 p1146 A69-18486

Standing waves effect on spectral and power characteristics of laser with plane mirrors, determining dependence on pumping power

07 p1148 A69-18800

Optical pumping at high temperatures using spin exchange signals for RF spectroscopy

07 p1148 A69-18893

Pumping power effect on He-Ne laser amplification factor dependence on temperature and discharge currents

07 p1149 A69-18935

Solar end and lateral pumping apparatus for neodymium doped YAG crystal lasers, noting applicability to space communication

07 p1150 A69-18953

Giant pulse production of Nd-glass laser with aid of coherent pumping by second harmonic of Q switched laser, noting pulse duration

07 p1156 A69-19333

Orientation of diamagnetic ground state Pb 207 atoms with nonzero orbital angular momentum by means of optical pumping and determination of nuclear moment

07 p1156 A69-19399

Coherent radiation brightness increased from liquid N Raman laser, using off-axial pumping

09 p1520 A69-22533

Rubidium vapor laser pumping induced frequency shifts eliminated by detuning resonator without decreasing output power

09 p1520 A69-22636

Liquid laser gain measurement via luminescence intensity, noting optical pumping thermal effect

09 p1520 A69-22683

Q switching combined with pulsed pumping of carbon dioxide laser for observing optimal Q switching instant, noting pulse energy increase

10 p1703 A69-23619

Neodymium doped YAG laser efficiency dependence on pump power level and spectral filtering of pump light

10 p1705 A69-23814

Capture of parametrically coupled waves by pulses and beams of pumping radiation in case of different group velocities directions

10 p1705 A69-23956

Elliptic cylindrical chambers optimum design for optical pumping of solid state lasers, discussing transfer efficiency and approximation by circular cylindrical chambers

10 p1706 A69-24010

Transverse mode dependence of spiking behavior for ruby laser pumped by pulsed argon ion laser

12 p2104 A69-25928

Pulsed laser emission from carbon dioxide collisionally pumped by vibrationally excited DF produced by reacting fluorine oxide with deuterium

12 p2104 A69-25986

Temperature regime of pulsed laser with pump laser located in cylindrical rod cavity, discussing adiabatic and nonadiabatic pumping

12 p2104 A69-26025

Atomic clock with sequential optical pumping using resonance frequency of hyperfine transition of ground state Rb 87

12 p2090 A69-26291

Continuous polarized electron beam produced from spin conversion in ionizing reactions involving optically pumped metastable atoms in He discharge

12 p2130 A69-26312

Off axial mode selection in circular cross section solid state lasers due to nonuniformity of excitation by focusing of pump power

12 p2106 A69-26320

Population densities, pumping rates, lifetimes, etc., of singly ionized krypton ion laser

12 p2109 A69-26638

Optical detection signals optimization in optical pumping, discussing light beam propagation direction, spectral composition and polarization characteristics

12 p2111 A69-27180

YAG-Nd laser continuous operation using incoherent injection luminescent pumping by gallium arsenide phosphide light emitting diodes at liquid nitrogen temperature

13 p2270 A69-27192

Ruby and neodymium glass traveling wave laser free generation spectra kinetics, noting mode transitions as function of pumping levels

13 p2271 A69-27655

Semiconductor luminescent devices and laser pumping by solar radiation modulated to interact resonantly with solid state plasma oscillations and electric field in crystal

13 p2272 A69-27969

Gases optical pumping by self radiation laser action, discussing high intensity oscillatory transitional wide bands of molecular gases

14 p2456 A69-28755

Ruby laser filled with single emission mode of oscillation using uniform pumping

14 p2458 A69-29164

CdS crystals emission spectrum during two photon excitation by ruby laser, noting dependence on pump power

14 p2458 A69-29167

Continuous IR parametric signal amplification in saturable absorber caused by carbon dioxide laser pumping

14 p2459 A69-29601

Q switched ruby laser giant pulses during pumping by another Q switched laser exhibit simple shape and low duration

15 p2634 A69-30727

Maser emission in interstellar OH ground state produced by IR pumping, noting population inversion mechanism

15 p2691 A69-30762

Pumping energy absorbed by active element of neodymium glass during laser emission related to activator concentration

15 p2635 A69-31104

Monomode giant pulse generation from neodymium glass laser by coherent pumping

16 p2797 A69-32018

Optical generation in organic luminophor solutions in 400-650 nm range

16 p2797 A69-32121

Kr and Ar flash lamps pumping efficiencies compared for Nd-doped YAG and glass lasers

17 p2980 A69-32958

Carbon dioxide flowing gas laser pumped by thermally excited nitrogen, discussing power gain and absence of chemical and charged particle effects

18 p3151 A69-34264

Population inversion in carbon dioxide laser related to pumping frequency, discussing molecular dissociation effect in gas mixture

18 p3151 A69-34620

Stimulated emission characteristics of CdS-CdSe mixed crystals subjected to two photon excitation, studying pulse energy at 77 K as function of pumping power

19 p3332 A69-35867

Single and two mode laser emission dependence on pumping power distribution between four level active centers of different types

19 p3333 A69-35878

Rb 87 vapor laser pumping, output, spectral line width and emission frequency approximated in three level system

19 p3335 A69-36342

Rb 87 vapor laser output power and spectral line width dependence on optical pumping intensity and atom density in resonator

19 p3336 A69-36343

Light induced shift of Rb 87 vapor laser emission frequency during modulated optical pumping, discussing elimination by filter temperature and tuning

19 p3336 A69-36344

Frequency shift dependence in transition of Rb 87 atoms on pulsed pumping intensity, discussing continuous and pulsed indication and peak determination

19 p3336 A69-36345

Pulse ruby lasers with mercury lamps for pumping noting improved efficiency, power and temperature regime due to reduced IR radiation

19 p3336 A69-36347

Optical pumping in pure Si at 77 K, noting dichroism conditions for dipolar electric transitions in cubic crystal

19 p3389 A69-36548

Spectrum of axial modes of laser with inhomogeneous longitudinal pumping, dividing parameter space into steady emission regions

19 p3339 A69-36880

Threshold power, gain, output power and radiation energy during optical pumping of Q switched molecular laser by black body radiation

20 p3554 A69-37722

Optical pumping and selective population applications, considering double magneto-optic resonance and inelastic interatomic collisions

21 p3735 A69-38454

Standing waves effect on spectral and power characteristics of laser with plane mirrors, determining dependence on pumping power

21 p3736 A69-38945

Emission from polymethine dye solution during optical pumping with pulses from Q switched Nd glass laser, discussing emission spectral, temporal and energy characteristics

21 p3739 A69-39542

Mode locking of organic dye laser by pumping laser with mode locked pulse train from Nd-glass laser, obtaining spectral bandwidth

21 p3740 A69-39545

Pumping and excitation spectra of solid solutions of cryptocyanine in glycerine irradiated by ruby laser, discussing population inversion and scattering and vibrational transitions

21 p3740 A69-39546

Absorption spectra from excited metastable states in tunable dye laser pumped atomic Ca, using fast flashlamp continuum

21 p3775 A69-39740

Flashlamp-pumped dye laser for resonance scattering studies of upper atmospheric composition, describing laser construction and tuning

22 p3962 A69-40440

Electron beam pumped dislocation free GaAs lasers filamentary and nonuniform emission characteristics from X ray topographs before and after bombardment

22 p3963 A69-40565

Pumping model for analyzing stimulated and enhanced potassium multiphoton emission primed by ruby laser-stimulated Raman electronic radiation

23 p4171 A69-41391

Monte Carlo method for energy transfer efficiency of ruby laser pumping cavities by helical flash lamps, noting dependence on ruby parameters

23 p4173 A69-41630

Low energy ultrafast flashlamp systems as optical pumps for lasers using fast decaying fluorescent materials/organic dyes/

23 p4174 A69-42187

Electron spin memory in optical pumping cycle of potassium halides F centers, measuring relaxed excited state g factors and spin resonance line widths

23 p4198 A69-42419

Optimum design of spherical and ellipsoidal pumping chambers for solid state lasers determined from numerical calculation of radiation transfer efficiency

24 p4327 A69-42986

Amplified radiation of laser used for coherent optical pumping in two level low pressure gas laser

24 p4327 A69-43067

OPTICAL PYROMETERS

Thermistors for total optical radiation pyrometer and for temperature control system based on radiation pyrometer, noting thermistor response and control circuit

04 p0601 A69-15119

OPTICAL RADAR

Optical radar for studying atmospheric water vapor, density, temperature and aerosols

01 p0090 A69-10540

Single transverse electromagnetic mode power output for laser radar transmitter, using near hemispherical mirror resonator

04 p0609 A69-14287

Stratospheric aerosol investigation by IR and lidar, applying Mie theory to model aerosol size distribution

04 p0592 A69-14654

Laser scatter measurements in mesosphere and above for optical radar system parameters

05 p0758 A69-16414

Atmospheric droplets diameter, number density and scattering cross sections determined from laser radar return equation and Mie theory

06 p0888 A69-17483

Continuous wave and pulsed IR signals amplification on carbon dioxide laser amplifiers, discussing design, construction and performance of transmitter

07 p1152 A69-19064

Atmospheric sodium measured at night by tuned laser radar, giving average column number density

09 p1484 A69-21464

Pulsed laser radar and applications to upper atmosphere observation equipment and distance measuring devices

09 p1456 A69-22132

Laser radar atmospheric applications, noting particulate matter mapping, backscatter density profiles and use of lidar

09 p1521 A69-22795

Laser radar eye hazard for fixed and variable transmitter intensities, considering eye damage magnitude and successful detection magnitude of transmitter intensity

11 p1830 A69-24845

Optical radar studies of lower atmosphere, giving Mie theory calculations of clear atmosphere volume backscattering cross sections for four laser wavelengths

12 p2033 A69-27001

Satellite positions measurements by radar compared with radar and photographic methods, considering measurement errors

12 p2110 A69-27149

Optical wavelength backscattering functions for nebulae in Pleiades cluster, noting color differences and surface brightness

13 p2340 A69-27577

Trapped aerosols below temperature inversions causing lidar echoes in troposphere layers, discussing simultaneous balloon refractometer, thermometer and ground based lidar soundings

13 p2254 A69-28475

Q switched ruby laser designed for lidar probing of cosmic bodies and earth atmosphere

14 p2460 A69-29660

Aerosol content of mesosphere with noctilucent clouds measured with optical radar in Norway

14 p2444 A69-29877

Lidar data obtained at Hamilton AFB, Calif., computer analyzed for lidar operational utility, determining cloud ceiling and visibility for aircraft landing operations

15 p2651 A69-30895

Photography of laser echoes on satellites, tabulating results

15 p2570 A69-31311

Laser measurements for DIADEME satellites tracking to reconstruct actual trajectory in semidynamic geodesy

15 p2600 A69-31365

Fluorescence noise in Q switched ruby laser atmospheric backscattering experiments, noting relation to optical radar spurious and enhanced returns

16 p2777 A69-32183

GaAs laser diode radar system for incremental range profiles

17 p2980 A69-32921

Electrooptical distance measurement based on laser pulse traveling time and phase measurements to determine satellite range

18 p3103 A69-35199

A scope laser radar system using Q switched solid state laser pulses, discussing configuration and performance

20 p3487 A69-37283

A scope laser radar to measure atmospheric particles spatial distribution through echo pattern and beam attenuation

20 p3487 A69-37284

Alford and Gold light modulation effect expanded to include one frequency spectrum with Doppler shift, discussing applications to optical radar for range and velocity measurements

21 p3672 A69-38409

GaAs laser tracking system for space guidance, describing equipment and operations

[AIAA PAPER 69-870] 21 p3763 A69-39396

Lidar technology application to atmospheric and meteorological problems in clouds and cloud structures, air motion and inhomogeneity in clear air

22 p3977 A69-40535

OPTICAL RANGE FINDERS

Optical ranging technique for studying lunar physical libration by measuring distance between earth observatory and two fixed points on lunar surface

01 p0158 A69-11311

Handheld optical range finder for manned spacecraft orbital rendezvous, discussing target shapes and range errors

02 p0250 A69-12366

Pseudorandom radar ranger /DIOMEDE/ using optical correlator and phase loop

03 p0393 A69-13254

Lunar laser ranging for testing Einstein and Brans-Dicke gravitational theories, discussing pulse transit time and dominant nonNewtonian correction

05 p0825 A69-16362

Optimum emission wavelengths in atmospheric refractive index determination in optical range finder/refractometer system, noting laser applicability

13 p2260 A69-27826

Optical signal conversion efficiency and threshold relationships in pulsed rangefinding systems, considering effects of noise obeying Poisson distribution

14 p2412 A69-29324

NASA laser systems for satellite tracking, determining ranging accuracy by comparing laser and computed reference orbital data

15 p2571 A69-31312

Lasers for satellite range measurements, discussing power output, mount, accuracy and data

15 p2571 A69-31337

GaAs laser diode radar system for incremental range profiles

17 p2980 A69-32921

IR nonimage-forming instruments, stressing applications to communications, intrusion detection, rangefinding, etc

19 p3310 A69-36062

Laser range measurement from earth to lunar retroreflector to study earth tipping and gravitational constant secular decrease

22 p3960 A69-40190

Ground to satellite laser ranging experiments for daylight satellite range measurements

23 p4174 A69-42193

OPTICAL REFLECTION

Reflecting telescope objective for far UV and X ray regions, discussing microfinishing and optical and mechanical tolerances

01 p0121 A69-10896

Electroreflectance spectra of Ge-Si alloys, noting concentration dependence and band structure of Si and Ge

02 p0295 A69-11784

Electron plasmas near plane metallic surfaces, determining transmittance and reflectance of incident light waves and surface waves dispersion characteristics

02 p0286 A69-11788

Lunar surface composition, hardness, porosity, microstructure and transparency based on polarization of reflected light

04 p0658 A69-14958

Phase grating formation in giant pulse laser Q switching liquid by reflecting light beam from Lippman plate at Bragg angle

05 p0771 A69-15811

Nonuniform distribution and concentration of doping materials in semiconductors determined by measuring optical reflection coefficient

05 p0764 A69-16664

Equal inclination interference fringes effects on laser beam reflection from plane parallel glass plates, evaluating angular distance between adjacent fringes

11 p1896 A69-24840

Laser pulse deflection by acoustooptical system consisting of ultrasonic cell and oscillator

11 p1840 A69-25423

Fiber optics application to fiberscopes and fused fiber optic plates, noting surface coating for light scattering prevention

12 p2084 A69-26150

Light diffusive reflection from rough surface measured as function of angle of incidence in presence of specular component by goniospectrophotometer

14 p2485 A69-29171

Visual orientation near moon and at surface, considering terrestrial and lunar objects reflectivity and light reflection at various angles of incidence

14 p2525 A69-29750

Short laser pulses reflection from artificial fog and smoke, showing dependence on reflecting medium attenuation coefficient

15 p2562 A69-30077

Lunar surface composition, hardness, porosity, microstructure and transparency based on polarization of He-Ne laser

18 p3196 A69-34721

Stimulated reflection experiment for correlation between coherent photon beams from independent lasers

18 p3153 A69-35292

Time dependent collimated light diffuse reflection and transmission by finite inhomogeneous atmosphere, using principle of invariance

18 p3132 A69-35345

Reflection and transmission measurements on as grown surfaces of tetracyanoquinodimethan, obtaining optical constants by Kramer-Kronig method

18 p3183 A69-35477

Lateral waves used to explain diffraction effects by light incident upon interface at critical angle of total reflection, discussing quasi-optical properties

23 p4191 A69-42148

Photomultiplier tubes performance enhancement by light incidence on photocathode at oblique angles explained by reflection

23 p4191 A69-42194

OPTICAL RESONANCE

Tunable optical parametric oscillator using argon laser CW output as pump and lithium niobate as nonlinear crystal

02 p0260 A69-12701

Second optical harmonic generation in uniaxial negative potassium dihydrogen phosphate, noting influence of generating process on angular structure and output power

03 p0439 A69-13057

Resonant interaction of radiation from liquid nitrogen cooled ruby laser with ruby crystal in temperature range 4.2-100 K

04 p0611 A69-14439

Laser with combined active medium resulting from investigation of autoresonant energy transfer in composite crystals with optical centers

04 p0611 A69-14546

Optimal modulation shape for light emission flux as function of photoresistance detector and resonance amplifier pulse characteristics

04 p0560 A69-15376

Line shape for dynamic Stark effect during optical resonance field irradiation calculated as function of relaxation constants and beam intensity

08 p1325 A69-20282

Population densities of UV bound resonance lines of neutral helium for 41-level model atom, discussing optical thickness and electron temperature and density

08 p1390 A69-20392

Singly resonant optical parametric oscillator, noting single mode and multimode oscillation for various pump powers, pump wave depletion and mode competition

11 p1897 A69-25038

Resonance line radiation transfer in finite homogeneous cylinders of various shapes and optical thicknesses using Monte Carlo method

12 p2191 A69-26970

Optimal modulation shape for light emission flux as function of photoresistance detector and resonance amplifier pulse characteristics

16 p2752 A69-32123

OPTICAL RESONATORS

U LASERS

OPTICAL SATELLITE TRACKING PROGRAM

International cooperation results in field of optical tracking of satellites for solving problems of atmospheric physics, geophysics and geodesy

06 p1042 A69-17050

OPTICAL SCANNERS

Rapid scan spectroscopy, reviewing dispersion optical and interferometric systems and electronic image converters

01 p0082 A69-10836

Rapid scanning Fabry-Perot spectrometers, considering time resolution, wavelength resolution, wavelength interval size, aperture diameter and limitations of mechanical components

01 p0082 A69-10837

Rapid scan spectrometer design and calibration, noting application to diagnostics of high density transient Xe and H plasmas

01 p0082 A69-10838

Hologram heterodyne scanner for production from scanning coherent light beam of electrical signal corresponding to scanned hologram, noting camera tube application

03 p0431 A69-13827

Interferometric laser beam scanner using hollow cathode mercury ion laser output

04 p0609 A69-14288

Scanned laser beam display techniques based on cathode ray tube technology, noting flying spot scanner and beam deflection

04 p0600 A69-15028

Fast digitalized scan laser using Nd-YAG as active medium and containing crossed array of lithium niobate electro-optic switches for mode selection

[IEEE PAPER R-2] 05 p0775 A69-16326

Density measurements of particle tracks in nuclear emulsions utilizing digitized video scan, discussing operation and instrumentation

[IEEE PAPER 2A-7] 07 p1133 A69-19185

Photogrammetric color negative prints, slides, etc, improved by scanning beam modulation

09 p1494 A69-21634

Systematic errors caused by planet asphericity in measurements of orientation and motion parameters of orbiting object compensated by scanning navigation system

10 p1693 A69-23320

Tilting filter photometer for faint light source spectrophotometry, discussing digital approach used with photomultipliers
11 p1884 A69-24834

Holographic scanning technique for laser beam deflection, noting two and three dimensional raster scanning
11 p1885 A69-24847

Continuously operating mirror scanning system for high speed photographic cameras, emphasizing maximum scanning speeds and framing rates
12 p2085 A69-26154

Electro-optical scanning device and electro-optical matrix for mechanization of difference measurements in automatic photointerpretation of surveillance maps
12 p2090 A69-26302

Single mirror scanning geometry and kinematics, analyzing spatial motion of objects plane mirror image
12 p2091 A69-26367

Single mirror image scanning mechanism vector analysis and formulas for vector rotation
12 p2091 A69-26368

Optical/mechanical IR line scanner imagery role in remote sensing
12 p2096 A69-26979

Acoustic hologram recorded by laser flying spot scanner
13 p2265 A69-28662

Aerial multiband remote sensors for wildland resources, considering multilens photographic systems, optical mechanical scanners and radar devices
15 p2609 A69-30458

Thermal IR imaging devices for shape recognition and target position, emphasizing optical mechanical image or object plane scanners using point detectors
19 p3310 A69-36064

Optical instruments optimal design for given requirements, discussing tradeoff studies of airborne reconnaissance scanner, spaceborne rendezvous sensor and track-while-scan radiometers
19 p3310 A69-36065

Multispectral scanner with multichannel spectrometer for earth observations, describing video image generation from detector elements output signals
19 p3310 A69-36066

Multispectral imaging system to increase contrast using optical mechanical scanner, multielement dispersing spectrometer and electronic signal processing equipment
20 p3540 A69-37737

Automatic analysis and classification of images stored on 35-mm film using CRT flying spot scanner with computer control and memory
24 p4286 A69-42744

OPTICAL SPECTRUM
U LIGHT [VISIBLE RADIATION]
U SPECTRA

OPTICAL THICKNESS
Exploding wires as light source for quantitative spectroscopy, noting optically thin plasma clouds with radial symmetry
01 p0117 A69-10658

Nonequilibrium nitrogen plasma spectral line intensities calculated assuming optically thin plasma
01 p0124 A69-10960

Radiant heat transfer in optically thick gray gas situated between parallel black diffusively emitting walls, using matched asymptotic expansion method
01 p0178 A69-11411

Weighting functions for finite optically thick atmospheres, discussing emission line formation
02 p0328 A69-12755

IR radiation heat transfer in polyatomic gases in limit of large path lengths
05 p0844 A69-15579

Pressure stratification and transparency/geometrical depth expansion/ in Fricke-Elsasser and Zwaan sunspot models
06 p0999 A69-16976

Electron temperatures and optical depths for planetary nebulae outer regions derived using radio spectra and Balmer line isophotes
06 p1009 A69-17962

Saturn rings optical properties and thickness from edgewise photometric observations, noting luminance relationship to direct brightness
07 p1219 A69-19335

Radiative transfer by doubling very thin layers in problem of diffuse reflection from plane-parallel atmosphere eliminates numerically solving transfer equation
08 p1420 A69-20064

Quantitative spectroscopy methods for determining data on chemical constitution of plasmas, treating optically thin LTE plasmas
08 p1363 A69-20465

Spectroscopic diagnostics for determining temperatures, electron densities and line shapes in optically thick plasmas
08 p1363 A69-20466

Optical depth determination in absorption lines of interstellar neutral hydrogen clouds by spectral observation of variable intensity radio sources
08 p1398 A69-20774

Galactic clusters absorption, discussing optical thickness in blue and red light
09 p1587 A69-21356

Optically thick planetary atmospheres in radiative-convective equilibrium investigated by models with adiabatic temperature gradient in troposphere, discussing gray stratospheric solution
09 p1600 A69-22200

Error analysis of Hubble galaxies count to resolve contradiction of values for average optical half thickness tau of galactic absorbing layer
10 p1779 A69-23609

Optical depth at under 110 A due to continuous absorption by N, O and Ne ions estimated in high excitation planetary nebulae
10 p1790 A69-24140

Optical characteristics of Martian atmosphere from photometric data for continent-mare contrasts, discussing transmittance and optical thickness
11 p1959 A69-24727

Radiation diffusion in medium of finite optical thickness, computation of source function and tabulation of matrices
12 p2131 A69-26661

Photometric and colorimetric characteristics of hot gas optically thin in continuous spectrum with optical thickness of several units in Balmer series lines
12 p2159 A69-26667

Resonance line radiation transfer in finite homogeneous cylinders of various shapes and optical thicknesses using Monte Carlo method
12 p2191 A69-26970

Optical depths of convection related to metal deficiency for main sequence and giant stars
14 p2527 A69-29946

Noctilucent clouds thickness determinable from angular dimensions of visible edge
15 p2598 A69-31254

Approximate expression for temperature dependent radiative heat flux in optically thin gas, considering reentry body hypersonic flight
16 p2877 A69-31892

Heat transfer in evacuated multilayer insulation by radiation and conduction, considering optically thin media separating reflective layers
17 p3073 A69-33300

Optically thin gas surrounding X ray source, plotting electron temperature and ionization equilibrium of hydrogen, He, carbon, nitrogen, oxygen and neon
18 p3186 A69-34295

X ray absorption in surrounding gas sphere as function of continuous absorption, electron scattering and diffuse ionizing radiation, using radiative transfer theory
18 p3186 A69-34296

Galactic clusters absorption, discussing optical thickness in blue and red light
18 p3197 A69-34746

Molecular concentration-optical depth curves for combinations of two photospheric and two facular models, noting lines contrast dependence on dissociation energy
18 p3204 A69-35391

Boundary conditions for differential approximation to radiative transfer, noting optically thick slip conditions
20 p3633 A69-37524

Sunspot umbra observed on 21 September 1966, computing transparency in model equaling photosphere transparency at same optical depth
20 p3605 A69-37825

Excitation temperatures and OH microwave line optical depths measured for dust clouds, discussing optical absorption lines and LF radio absorption
20 p3611 A69-38147

Effective thinness approximation for spectral line formation from photon degradation processes and random walk of scattered photons, discussing optical thickness
20 p3612 A69-38159

Light field long term behavior in dispersive medium with finite optical thickness by asymptotic solution of unsteady transport equation
22 p3983 A69-41267

Radiant energy transfer in absorbing and emitting media, noting approximate equations reduced to correct optically thin and thick limits for multidimensional problems
[ASME PAPER 69-HT-E] 24 p4410 A69-43524

OPTICAL TRACKING
Optical spacecraft tracking organization in U.S.S.R., describing network of visual observation and photographic stations for satellite and space probe tracking
01 p0032 A69-10952

Electro-optical tracking devices for displacement and/or dislocation measurement without physical contact
05 p0763 A69-15986

Automatic laser tracker system for close-up photographic coverage of rocket test
[SMPTE PREPRINT 101-91] 07 p1116 A69-18949

Low latitude easterly wind measurements by optical tracking of chemicals from sounding rockets and gun probes during darkness
09 p1487 A69-21621

Small eye movements measurement and retinal image stabilization based on tracking edge of blood vessel in optic disk
09 p1446 A69-21908

Electro-optical tracking device with pyramidal reflector for field of view dissection, determining dead zones and trajectories for pointing error correction
10 p1698 A69-24219

Radio sources optical positions for independent calibration sources
11 p1958 A69-24465

Optical satellite tracking system using multicoincidence method of photon signal counting by Q switched laser
11 p1841 A69-25579

Computer program solving for station coordinates and dynamical parameters at Smithsonian Astrophysical Observatory from optical data, laser range and range rate
12 p2068 A69-26428

Soviet and foreign visual, photographic and photometric ground observations of satellites, emphasizing synchronous optical observations role in geodesy and geophysics
13 p2219 A69-27357

Pulsed laser satellite tracking system, noting tracking mount adjustment
13 p2222 A69-28192

Secor 6 satellite /1966-51A/ orbital parameters determined from optical and radar observations noting use for upper atmosphere density and rotational speed studies
14 p2522 A69-29631

Scintillation of ground based spherical wave laser source viewed from space analyzed from Geos 2 satellite laser tracking, noting stellar scintillation correspondence
15 p2570 A69-31309

Optical observations of Geos 1 over North America in short arc reduction to improve tracking stations survey coordinates, discussing dependence on earth gravity and mass
15 p2599 A69-31342

Space direction by compensation method of cosmic triangulation network, using laser and optical observations of artificial satellites
15 p2699 A69-31377

Position sensitive sensors design of optical tracking systems with emphasis on amplitude, phase, frequency and pulse-time sensors
16 p2790 A69-32111

Satellites meridian and extrameridian observations by transit instrument, examining errors in ephemerides of bulletins
16 p2858 A69-32211

GaAs laser tracking system for space guidance, describing equipment and operations
[AIAA PAPER 69-870] 21 p3763 A69-39396

Atmospheric natural turbulence effect of degradation of laser signal phase and amplitude characteristics, noting refractive index inhomogeneities effect on optical tracking system
[AIAA PAPER 69-871] 21 p3675 A69-39397

After image measuring method of eccentric fixation during autokinetic light tracking
22 p3878 A69-40837

Horizontal tracking eye movements response to unpredictable constant velocity target motions with or

without saccadic position corrections recorded by contact lens optical lever

22 p3881 A69-40856

Antitank missile guidance system with tracker using two optical paths and pyrotechnic flare noting transmission ratios, visibility coefficients and improvement factors

23 p4164 A69-41625

OPTICAL TRANSITION

Ar atom transition probabilities in 5000-6000 angstrom range, noting effect of nonuniform source temperature

01 p0125 A69-10963

Gallium arsenide injection lasers properties, analyzing band structure, optical transitions, recombination lifetimes, conduction band states, optical gain, etc

05 p0772 A69-16228

Laser stimulated gamma-optical transitions illustrated by gamma-optical absorption detection in dysprosium ethyl sulfate

08 p1328 A69-21185

Correlation effects in water and heavy water laser transitions based on cascade effects, discussing lines in resonator arms

09 p1515 A69-21349

Coulomb interaction during optical transitions between Landau subbands of Ge semiconductor valence and conduction bands in magnetic field, observing diamagnetic excitons

11 p1936 A69-24640

P-type GaAs-Ge lasing on band to band or conduction band to acceptor impurity transitions or on both transitions simultaneously

13 p2270 A69-27193

Anomalous interaction of argon and krypton ion laser lines, considering connecting radiative transitions and cross modulation

13 p2270 A69-27204

Gas lasers output power calculation based on operating transition with mixed contour due to natural and Doppler broadenings

15 p2633 A69-30079

Electron excitation and phase shift method for radiative lifetimes of Ar II UV transitions

15 p2656 A69-31034

GaAs semiconductor laser emission band homogeneity and continuous energy spectrum levels contribution to induced optical transitions

17 p2984 A69-34161

Laser stimulated gamma-optical transitions illustrated by gamma-optical absorption detection in dysprosium ethyl sulfate

18 p3152 A69-35154

Gain modification from spectral splitting of optical transition by constant light wave on higher frequency coupled transition

22 p3965 A69-41125

OPTICS

Geometric optics inverse scattering method for smooth conducting convex bodies of revolution, demonstrating bounds on size and shape

02 p0280 A69-11929

Nonlinear optics - Conference, Novosibirsk, U.S.S.R., June 1966

03 p0435 A69-13034

Geometric optics for media with spatial dispersion, describing procedures for equation solution

03 p0467 A69-13718

Damping factor automatic determination by use of second derivatives of residuals for damped least squares method of optical design

04 p0630 A69-14295

Geometrical optics approximation of Maxwell equations for electrodynamics of inhomogeneous anisotropic media

07 p1076 A69-18519

Geometrical optics method for differential equations of fourth order in applications to LF plasma oscillations

07 p1190 A69-18697

Optical processing of planetary radar data for range Doppler image generation

08 p1270 A69-19816

Plasma microwave diagnostics by multifrequency probes in geometric optics approximation, assuming inhomogeneous and semiinfinite plasmas with sharp boundaries and nonunity permittivities

11 p1926 A69-24602

Single and double mirror systems geometrical optical image aberrations noting focal number, angle of field, secondary magnification and mutual position tolerances

11 p1918 A69-24836

Optical methods in three dimensional gas flow research, noting role in density field determination and conjunctive use with gas dynamics equations

12 p2011 A69-26191

Active optics system for obtaining perfect mirror figure in orbiting astronomical telescope, using laser and white light sources, interferometers and data converter

12 p2092 A69-26423

Soviet collection of papers on nonlinear optics, discussing lasers, electromagnetic interactions, Q switching, dynamics, etc

12 p2109 A69-26905

Spiral trajectory winding rate of asymmetrical light beams in nonlinear media analyzed in geometric optics approximation, noting diffraction influence

13 p2298 A69-27662

Segmented active mirror optics design concept for lightweight optically stable primary reflector used in large orbiting astronomical telescopes

13 p2261 A69-27950

Master equation in quantum optics phase-space formulation based on Schroedinger equation of motion, noting application to Volterra integral equation and Born approximation

15 p2633 A69-30307

Electromagnetic wave propagation in anisotropic inhomogeneous media by geometric optics approximation, obtaining equations for beam trajectories in spherically symmetrical medium

15 p2569 A69-30949

N wave propagation across nonuniform medium described by cloud or front layer, using geometrical optics

16 p2812 A69-31924

Nonmetallic materials thickness measurements at SHF, describing factors affecting geometrical-optics method

18 p3138 A69-35116

Remote sensors geometrical optics, considering power flow direction, specular reflection, imaging and dihedral in case of specular reflectors, reflection and diffraction

20 p3577 A69-37744

Numerical evaluation of geometrical optics radar cross sections of general doubly curved convex conducting body using surface fitting method

20 p3494 A69-37848

Optical and mechanical systems of Wroclaw Observatory Lyot type coronagraph for prominence observations in H alpha line

22 p3943 A69-39999

Acoustics and optics in terms of acoustic holography, seismic signal optical processing, acoustic and electromagnetic waveguides, etc

23 p4191 A69-42179

Transmission properties and directional coupler determined for optical circuit dielectric rectangular waveguide with surrounding dielectrics of smaller refractivity

24 p4287 A69-43328

Optical design of double monochromator for use in EUV, describing astigmatism and transmission properties

24 p4351 A69-43758

OPTIMAL CONTROL

NT TIME OPTIMAL CONTROL

Optimal control problems with discontinuities, noting jump discontinuities in state variable derivative arising in bang-bang control problems

01 p0049 A69-10003

Optimal control of discrete and continuous stochastic linear dynamical systems, discussing algorithms for instantaneous weighted minimum mean square error performance

01 p0051 A69-10439

Multilevel optimization techniques for dynamic systems control evaluated, developing second level Newton-Raphson controller

01 p0051 A69-10440

Sensitivity reduction in specific optimal control by use of dynamical controller

01 p0051 A69-10441

Optimal control system sensitivity definitions, analysis methods and design techniques, discussing equations of motion of dynamical system satisfying vector differential equation

01 p0051 A69-10553

Optimal AM radio reception in presence of fluctuating noise and one AM interference signal with random initial phase of carrier oscillation

01 p0031 A69-10782

Book on variational methods in optimum control theory covering necessary and sufficient conditions for extremum and functional constraints

01 p0053 A69-11107

Kalman optimal filter for linear distributed parameter systems with Gaussian disturbances and measurement noise

01 p0034 A69-11143

Optimum control with respect to minimum fuel and power consumption involving constraints based on Kuhn-Tucker conditions and saddle point theorem

02 p0223 A69-11564

Optimum linear filters for signal detection against background noise using Hodges-Lehmann method

02 p0223 A69-11565

Bayesian method for optimizing controlled plant characteristics using self adaptive model

02 p0223 A69-11566

Two parameter dynamic system of fourth order optimization based on gradient method modified for discrete optimization

02 p0224 A69-11594

Numerical method of solving optimum control problems through reduction to solution of simple minimization problems by constructing suitable sequence of auxiliary functionals

02 p0271 A69-11649

Optimal adaptive control of discrete linear systems with unknown gain, considering Gaussian distribution functions and random disturbances

02 p0224 A69-11662

Optimal control problems for Markov chains solved by iterative method, using nonlinear finite difference equations to approximate degenerate elliptic functions

02 p0224 A69-11963

Computational algorithm for determining piecewise-constant feedback gains for linear system optimal control

02 p0224 A69-11964

Performance cost functions for reaction jet controlled system during on-off limit cycle for stable and unstable plant

02 p0278 A69-11965

Algorithm minimaxing performance index and sensitivity of controller design with and without saddle point

02 p0224 A69-11966

Singular perturbation method for reducing order of mathematical models in optimal sensitivity control problems

02 p0224 A69-11967

Optimal control problem for linear regulators with constant external disturbance

02 p0225 A69-11970

Dynamic programming to demonstrate sufficient conditions of optimality in maximum principle when regular control synthesis is realized

02 p0225 A69-11975

Manual optimal guidance schemes for space vehicles to minimize computational and display requirements for pilot task loading

02 p0279 A69-12365

Optimal control of open loop aperiodically modulated discrete time systems, discussing solution of associated two point boundary problem

02 p0226 A69-12372

Optimum control of fourth order digital control system

03 p0408 A69-12916

Nonlinear programming of optimization of parameters and control functions of dynamic systems

03 p0408 A69-12974

Optimal adaptive systems synthesis by statistical theory

03 p0409 A69-12977

Incorrect variational and linear programming problems in optimal control theory, emphasizing regularization technique by Tikhonov

03 p0409 A69-13067

Synthesis of statistically optimal self adaptive system for dynamic characteristics stabilization of automatic control system main loop

03 p0410 A69-13256

Reciprocal variational formulation for optimal control, estimating difference between suboptimal system response and optimum

03 p0457 A69-13766

Synthesis of optimal second order systems with linear control

03 p0410 A69-13864

Multilevel optimal control and decomposition of trajectories by studying static and dynamic systems

04 p0581 A69-14570

Optimal control theory applied to systems described by partial differential/integral equations
04 p0581 A69-14571

Optimal stochastic control of small dynamic systems described by random differential equations, noting selective bibliography on several subjects
04 p0582 A69-14697

Optimization of control functions and parameters of dynamic systems with variable structure and discontinuous phase coordinates
04 p0582 A69-14795

Optimum stabilization of uniformly rotating axisymmetric satellite, using Liapunov theorem on asymptotic stability
04 p0666 A69-14921

Optimal linear controller synthesis with minimized trajectory sensitivity achieved by using quadratic cost function
04 p0582 A69-14941

Convergence of optimal control for denumerable system of differential equations treated by functional-space decomposition
04 p0583 A69-15095

Quadratic control problem with energy constraint, discussing approximate solutions for application to optimal control
04 p0583 A69-15111

Steady state response of inertialess discrete multivariable extremal system with noise, noting stepwise search systems
04 p0583 A69-15139

Performance index sensitivity of nominally optimal controls noting initial and final target manifolds relationship to trajectory sensitivity
05 p0737 A69-15866

Dynamic programming and indeterminate Lagrange multipliers to formulate optimal control for discrete systems
05 p0737 A69-15886

Optimal flight stabilization of VTOL aircraft in hovering mode based on linear rotation dampers system
05 p0702 A69-16024

Linear optimal control problems with quadratic performance indices, developing system equivalence for matrix Riccati equation
[ASME PAPER 68-WA/AUT-17]
05 p0738 A69-16175

Analytical measure of quality of controllability for linear dynamic system and computational procedure for maximizing adjustable structural parameters
[ASME PAPER 68-WA/AUT-4]
05 p0738 A69-16182

Pontryagin maximum principle used to solve optimal control problems on analog computer
05 p0739 A69-16473

Ruby laser characteristics at 78 K, discussing emission threshold, optimum feedback, modes, etc
05 p0777 A69-16546

Optimal control of system governed by linear parabolic equation with white noise inputs, using mathematical model to generate distributed system analog
05 p0740 A69-16599

Markov extremum drift dual compensation in optimal systems with learning experiments
05 p0741 A69-16671

On-line optimization of stochastic control systems based on learning controller model, discussing computer simulation results
06 p0900 A69-17354

M measurement optimal feedback control algorithm for stochastic discrete time systems, considering nonlinear plant, constrained controls, nonquadratic cost and simulations
06 p0902 A69-17402

Approximate optimal control of nonlinear dynamical system with state dependent variables, using stochastic linearization of system
06 p0902 A69-17404

Human operator as optimal controller, proposing quadratic performance index used by operator in judgement of own performance in tracking task
06 p0903 A69-17407

Optimum control problems solved numerically on computer, noting multivalence of extremal solutions and application to orbital transfer in central gravitational field
06 p0903 A69-17539

Space vehicle trajectory optimization using computerized step by step steepest descent to minimum cost, considering cost gradient vs control
06 p1006 A69-17570

Optimization procedure developed and applied to minimum fuel midcourse guidance of spacecraft, discussing optimal closed loop control of linear stochastic systems
06 p0955 A69-17576

Minimum fuel control of spacecraft orbital elements for transfers between elliptical orbits by low variable thrust propulsion, noting interplanetary trajectory optimization
06 p0955 A69-17579

Controllability of deep space electromagnetic wave propagation in nonvacuum by calculating optimum values of control parametric functions
06 p0888 A69-17622

Gradient method solution for class of optimal control problems, minimizing root mean square value of finite state components of object in motion
06 p0904 A69-17886

Existence and uniqueness theorem for functional equation of optimal control problems, noting stability of solution
06 p0949 A69-17889

Maximum likelihood smoother using measurements containing correlated noise for application to continuous linear dynamic systems such as inertial navigation
06 p0956 A69-17938

Limited memory optimal filter theory, output and standard filter divergence due to errors
06 p0905 A69-17946

Suboptimal guidance corrections for continuous thrust vehicle disturbances during minimum fuel rendezvous in Martian orbit, discussing physical and modified cost functional
[AIAA PAPER 69-76]
06 p0956 A69-18081

Discrete time, single input, stepping extremum control system with input disturbance and output measurement noise, discussing computer simulation and dimensional analysis
07 p1114 A69-18287

Optimum attitude program for multistage satellite launch vehicle with impact restrictions
07 p1229 A69-18492

Local cross sections method for optimal control, considering control plant with variable control range and constraints on phase coordinates
07 p1115 A69-19003

Optimum and suboptimum detection of K binary symbols corrupted by white Gaussian noise, discussing searching procedure and average error probability
07 p1081 A69-19097

Book on optimal control covering servomechanism, linear system statistical design and state representation, calculus of variations, maximum principle, dynamic programming, etc
07 p1115 A69-19143

Optimizer for shaping control signal of hunting type system with plant in form of nonlinear inertialess element, examining inadequacy for system operation
07 p1115 A69-19757

Nonlinear controller design by dynamic programming method, discussing block diagram
08 p1296 A69-20236

Compromise control in system with two hierarchy levels interrelated via lower level subsystems optimality criteria found by solving global criterion problem
08 p1297 A69-20415

Dynamic programming for nonlinear suboptimal control system with minimum Q factor, developing nonlinear functional with controller motion restraint
08 p1297 A69-20416

Tuning design optimization of single circuit LF automatic control systems, using transfer functions and phase amplitude graphs
08 p1297 A69-20418

Response optimization of feedback control systems with reference to single settlement time-constant ideal determined for error evaluation
08 p1298 A69-20855

Command inputs handling by linear optimal control theory, investigating Riccati matrix differential equation convection
08 p1298 A69-20856

Optimal control approximate synthesis partial differential equation solution in form of interpolation polynomial for functions of many variables
08 p1299 A69-21068

Optimal control synthesis for linear plant operating in noise environment, applying dual control theory
08 p1299 A69-21070

Optimal control problem involving approximation by monotone functions
09 p1531 A69-21412

Convergence extensions in quasi-linearization for optimal control, showing results for brachistochrone and reentry trajectory problems
09 p1590 A69-21414

Differential dynamic programming algorithms of second and first order for optimal control, considering nonlinear unconstrained and constrained problems
09 p1531 A69-21415

Particular solutions in nonlinear two point boundary value problems, showing convergence for uncontrolled and controlled systems
09 p1531 A69-21416

Pulsed solutions with fixed, floating and distributed pulses for optimal control of systems with differential equations unbounded and discontinuous on right side
09 p1471 A69-21435

Book on optimal control of systems governed by partial differential equations, noting systems of automation, existence theorems and numerical analysis
09 p1471 A69-21580

Optimal controls for linear systems with matrix elements and vector components discrete functions of time
09 p1473 A69-21787

Optimal linear quick response problem solving by fast convergence iterative procedure
09 p1473 A69-21791

Discrete predicting filter optimal synthesis in terms of rms error by solving normal Gaussian equations
09 p1473 A69-21858

Soviet book on methods of optimal statistical solutions and problems of optimal control covering basic equations of random processes, stochastic differential equations, etc
09 p1473 A69-21932

Optimum timing extraction /bit synchronization/ in pulse code transmission, analyzing probabilistic structure by statistical parameter estimation and deriving system
09 p1455 A69-22115

Conjugate gradient and Davidon-Fletcher-Powell methods applied to nonlinear optimization problems
09 p1474 A69-22442

Optimal stochastic control, discussing dynamic mathematical models described by differential equations
09 p1475 A69-22567

Optimal control of discrete processes with bounded phase coordinates, proving optimality conditions
09 p1475 A69-22668

Control system controllability under discontinuous control constraints, presenting optimal response rate linear system synthesis with continuous restriction on control function
09 p1475 A69-22670

Statistical theory and dynamic programming to synthesize optimal pulsed control systems having restrictions on control device storage capacity
09 p1476 A69-22673

Dynamic programming method to achieve optimal control of discrete systems with lagging control variables, considering structural properties
09 p1476 A69-22674

Maximum principle in integral form for optimal control problems with delay differential system equations, using vector matrix notation
10 p1718 A69-23038

Optimal AM radio reception in presence of fluctuating noise and one AM interference signal with random initial phase of carrier oscillation
10 p1653 A69-23111

Optimum control involving plants with intermediate position between lumped and distributed parameters
10 p1666 A69-23363

General extremality for optimal controls with restricted phase coordinates and with unorthodox criterion function, discussing hypotheses for deriving necessary conditions
10 p1721 A69-23864

Dynamic programming to demonstrate sufficient conditions of optimality in maximum principle when regular control synthesis is realized
10 p1666 A69-23884

Optimal control of time invariant uncontrollable linear systems, noting asymptotic stability
10 p1666 A69-23887

Fuel optimal control for second order system determined by game theory approach
10 p1667 A69-24040

Differential game for determining singular fuel optimal control of plant with uncertainty in dynamic equation
10 p1667 A69-24041

Optimal controls for differential system nonlinear in state function and linear in control function
10 p1667 A69-24057

Differential games solution value function constructible from solutions to associated one player optimal control problems
10 p1667 A69-24059

Optimization of autonomous system parameters, exemplifying by disturbed motion of gyroscope system
11 p1858 A69-24557

Pontryagin principle application to incorporation of singular sections into optimal trajectories of controlled systems, considering conjugation of singular and nonsingular extremals
11 p1960 A69-24764

Successive approximation techniques for problems in optimum control theory, considering maximum principle and Banach space
11 p1908 A69-24771

Matrix Riccati equation duality and bounds, discussing duality in context of optimal control
11 p1909 A69-24885

Analytical method for optimum switching function of relay servosystem subjected to stationary Gaussian random noise, considering perturbation and dynamic programming
11 p1859 A69-25025

Computational method for quasi-optimal control with parameter sensitivity function, noting application to dynamical system model
11 p1859 A69-25165

Kozhevnikov optimality principle for optimum averaging of discontinuous stochastic control systems extended to include intensities of discontinuities
11 p1966 A69-25329

Optimum controller design for dynamic stability of ideal incompressible fluid in cavity of body constrained to horizontal rectilinear translational motions
11 p1966 A69-25330

Optimization of control systems with allowance for failures of elements in parallel operation, noting application to vehicle with clustered propulsion system
11 p1966 A69-25331

Dynamic programming determining optimal feedback control policies for optimal trajectories based on invariant imbedding
11 p1910 A69-25410

Feedback control law preserving optimality for systems with unknown parameters, discussing optimally adaptive performance index
11 p1860 A69-25441

Stochastic optimal control of continuous time systems with unknown gain, discussing filtering-control interaction and computer experiments
11 p1860 A69-25442

Open loop suboptimal control for linear time dependent tradeoff between energy expenditure and probability of target set entry
11 p1860 A69-25443

Nonlinear bang-bang optimal control problems solution based on differential dynamic programming, noting use of Pontryagin adjoint variables
11 p1860 A69-25444

Optimal control theory for systems modeled by ordinary differential equations, considering delay in control action
11 p1860 A69-25447

Optimal multivariable linear control system design, based on Pontryagin principle using Laplace transform method, providing good approximation to finite interval controllers
11 p1861 A69-25663

Analytical synthesis of dynamic plant model to insure desired output in response to cyclic action
11 p1861 A69-25714

Optimal control of one dimensional fluid flows with characteristic velocity passing through zero, showing Lagrange multipliers continuous and bounded in optimal solution
11 p1934 A69-25728

Observation process optimization in system described by linear differential equations of motion reducible to optimal control problem
12 p2027 A69-25882

Human operators instrument-monitoring behavior noting optimal control, information processing, physical limitations, etc
12 p2022 A69-25929

Automatic control system design for optimality in sense of nonstatistical quality criterion for disturbances of given class, considering additive noise
12 p2045 A69-25964

Terminal optimal control problem for linear system having control criterion not dependent on all phase coordinates
12 p2045 A69-25965

Optimal communication by signal feedback link between transmitter and receiver based on optimum control and dynamic programming
12 p2046 A69-26060

Optimal control of multivariable complex systems through multilevel/hierarchical/ structure, discussing coordination problems
12 p2049 A69-26082

Optimal control trajectories computation for bilinear regulator problems including neutron kinetics of nuclear reactor
12 p2049 A69-26083

Controllability of linear multivariable time invariant optimal systems with additive parameters using Kalman controllability definition, noting role of Pontryagin principle
12 p2050 A69-26086

Optimization problem with bounded state variable, noting conditions on trajectories and relations for costate vector at connecting or branching point
12 p2050 A69-26087

Control signal interconnection of subsystems at different levels of hierarchical structure systems
12 p2050 A69-26089

Discrete linear optimal control system with quadratic performance index synthesized by dynamic programming method, obtaining matrix equations
12 p2050 A69-26091

Optimum recording conditions for analog recorders with continuous recording in rectangular coordinate system
12 p2091 A69-26332

Stability of single output sinusoidal perturbation extremal control system with output lag, discussing stability boundary
12 p2052 A69-26384

Near optimum regulator design technique for high order linear systems, using singular perturbation method to reduce system order
12 p2052 A69-26503

Space vehicle angular velocities reduced to zero through linear and nonlinear optimal feedback control systems
12 p2054 A69-26516

Suboptimal control with high performance index as alternative in restricted class of optimal control problems
12 p2054 A69-26518

Nonsingular matrices inversion method by group partitioning applied to noise covariance matrix used in optimal prediction and control
12 p2123 A69-26754

Computerized design of optimal direct lift controller for aircraft and aerodynamic surfaces, using Kalman linear state regulator theory
12 p2014 A69-26765

Book on optimal control covering types of systems, practical optima, signal properties, Bellman dynamic programming and Pontryagin maximum principle
12 p2054 A69-26919

Singularities of optimal filtration for random signals given by differential equations with variable coefficients and white noise
13 p2218 A69-27251

Optimal direction finding systems based on bearing angle representation in multidimensional Markov process, considering white and interference noise
13 p2219 A69-27254

Optimal controller design and transfer functions in linear stabilization systems subjected to unknown disturbances determined by variational calculus
13 p2259 A69-27425

Optimal parameters of hydraulic sensor of angular accelerations for given dynamic and geometrical requirements
13 p2259 A69-27432

Differential approach game for unfavorable pursued motion, examining optimum control laws
13 p2288 A69-27525

Optimal control algorithm for spacecraft descent in atmosphere based on nominal trajectory and acceleration measurements
13 p2355 A69-27683

Optimum thrust control of satellite along given trajectory to rendezvous at zero velocity with orbited satellite
13 p2356 A69-27684

Optimal motion control of spacecraft refueling during flight by liquefying atmospheric gas along prescribed trajectory under constant thrust
13 p2356 A69-27686

Optimal control for minimum trajectory sensitivity of booster using algorithm and Riccati equation
13 p2261 A69-27943

Optimal control for minimization of heating and acceleration forces to reduce kinetic energy of reentry vehicle in space missions
13 p2352 A69-27960

Book on calculus of variations and optimal control theory, discussing functional analysis for use in space science
13 p2289 A69-28054

Optimal stochastic controller synthesis theory applied to stabilizing and controlling orientation of rotating bodies in central gravitational fields
13 p2300 A69-28326

Incorrect variational and linear programming problems in optimal control theory, emphasizing regularization technique by Tikhonov
14 p2424 A69-28749

Control systems synthesis for nonlinear plants with known Liapunov functions and constraints, considering stability
14 p2424 A69-28819

Optimization criterion for synthesizing discrete nonlinear control system subjected to random controlling and perturbing effects
14 p2425 A69-28825

Optimal control of variational problem for Markov chain, discussing convexity and concavity of loss function
14 p2470 A69-28903

Weighting factors relation in optimal systems integral squared error /ISE/ cost functional, characteristic coefficients and time response performance measures
14 p2534 A69-29317

Optimal control conditions for systems described by differential equations with deviating neutral type argument formulated in maximum principle form
14 p2426 A69-29419

Statistical synthesis of optimal control for quasi-harmonic systems by extending asymptotic method to include unremovable measurement error in output value
14 p2426 A69-29420

Optimal control problems solved by dynamic programming algorithm based on successive approximations of elementary control operation in space of states
14 p2426 A69-29472

Trajectory sensitivity analysis of open and closed loop optimal control systems, demonstrating previous analysis inaccuracy
14 p2427 A69-29539

Hybrid computer system for real time optimum feedback controller using iterative algorithms with rapid convergence, discussing simulation and performance
15 p2582 A69-30071

Optimal filtering of linear distributed parameter systems corrupted by boundary and/or volume stochastic disturbances
15 p2565 A69-30183

Optimal active shock isolation by nonlinear elements for system subjected to shock type loadings, discussing impulse shapes
15 p2713 A69-31019

Optimization of control system described by linear parabolic integrodifferential equation, using dynamic programming approach
15 p2645 A69-31024

Electronic hardware optimum quality assurance selected by dynamic programming in terms of failure mechanism detection efficiency per source allocation
15 p2722 A69-31127

Asymptotic solutions of optimum control for systems with constraints as linear differential equations and quadratic type functional
15 p2583 A69-31234

Optimizing control system design using fluidic digital circuitry and FM type transducers
15 p2583 A69-31296

Singular and sliding modes /unique extremals/ in calculus of variations for optimal control problems with nonlinear equations and linear control
16 p2764 A69-31629

Book on correlation theory of statistically optimal systems covering linear continuous, discrete, nearly optimal, nonlinear, decision element and adaptive systems
16 p2764 A69-32114

Liapunov functions applications in motion stability theory problems, considering dynamic systems, periodic orbits, optimum damping and control
16 p2804 A69-32248

Optimal control approximate synthesis partial differential equation solution in form of interpolation polynomial for functions of many variables
16 p2765 A69-32483

Optimal control synthesis for linear plant operating in noise environment, applying dual control theory
16 p2765 A69-32485

Nonzero-sum differential games characteristics, generalizing optimal control concepts, discussing Nash equilibrium and noninferior set solutions
17 p2943 A69-32834

Astronomical satellite direct digital attitude control using digital computer between sensor and actuator to achieve optimal filtering and stabilization
17 p3049 A69-33244

Adaptive random search algorithm utilizing boundary cost-function hypersurfaces measurement to implement Pontryagin maximum principle, discussing hybrid computer use, iterative solution and convergence properties
17 p2933 A69-33745

Wave soldering reliability and cost saving potential in miniature circuits manufacture for aerospace applications, noting process control and machine design relationship
18 p3146 A69-34512

Book on elements of optimal control covering methods for deterministic problems including calculus of variations, Pontryagin principle, dynamic programming, feedback control, etc
18 p3109 A69-34532

Optimum automatic system for controlling helicopter formation flight, stressing transient response Q factor and transmission ratios
18 p3090 A69-34656

Filtering and optimal control problems for discrete stochastic dynamical systems, describing various feedback controls and midcourse guidance optimization
18 p3109 A69-34660

Suboptimal closed loop control of nonlinear systems subject to quadratic performance indices by invariant imbedding concepts and maximum principle
18 p3111 A69-34678

Optimal control theory applications for controllers not characterized by bang bang time responses using Pontryagin maximum principle
18 p3090 A69-34681

Algorithm for minimizing expected value of quadratic performance index in closed loop optimal control of linear time varying systems
18 p3111 A69-34688

Regularization method for maximum height ascent of rocket uniformly approximating control function by gradient projection method
18 p3164 A69-34706

Optimal nutation damping of spin stabilized bodies, using Pontryagin maximum principle to optimize time, consumption and linear time-consumption combination
18 p3208 A69-34774

Learning control systems research and applications noting trainable controllers, reinforcement control, Bayesian estimation and stochastic approximation
18 p3112 A69-35093

Optimal asymptotic stabilization of gyrostat relative equilibrium, determining norm constraints for application to global gyrostat attitude control
18 p3210 A69-35145

Minimum-fuel controls in multidimensional optimum transfer problems
19 p3400 A69-35677

Linear optimal control problem for system with variable terminals, proving maximum principle and transversality conditions under minimum constraints
19 p3285 A69-35859

Search for maximum along admissible directions in optimal control systems
19 p3286 A69-35988

Existence theorem for limits of minimizing sequences in optimal control problems, applying results to systems governed by partial differential equations
19 p3287 A69-36724

Optimal linear recursive estimators for uncertain observation, considering false alarm probability
20 p3485 A69-36922

Approximation error involved in difference optimal control problem substitution for differential optimal control problem based on functional minimization
20 p3509 A69-36989

Trajectory sensitive vector introduction into closed loop linear optimal control, considering linear or nonlinear formulations
20 p3509 A69-37141

Optimal low thrust coplanar rendezvous control for thrusting vehicle and passive vehicle in elliptical orbit using linearized equations of motion and polar coordinates
20 p3617 A69-37192

Optimal controls for systems governed by elliptic or parabolic nonlinear equations or inequalities for differential operator, boundary conditions or unilateral constraints
20 p3568 A69-37324

Discrete problems of optimal control solved by general minimum principle, proposing several algorithms for optimality problems
20 p3509 A69-38295

Variational or optimal control for delayed systems, involving integrated maximum principle for problems with nonlinear functional differential systems
21 p3754 A69-38429

Discrete extremum problems solution convergence to optimal control continuous problem as functional optimal value and optimal control
21 p3684 A69-38430

Continuous optimal control problems, proving direct solutions existence for case of differential equations system linearity in control and state variables
21 p3684 A69-38431

Existence and uniqueness of optimal feedback control proved for autonomous nonlinear differential equations, allowing any finite number of variables
21 p3685 A69-38433

Optimal control of dynamic system motion described by linear differential equation, selecting vector function ensuring predetermined trajectory
21 p3685 A69-38452

Large parameter variations effect on linear feedback control systems performance, optimal or suboptimal
21 p3685 A69-38726

Optimal boundary layer control ensuring minimum heat transfer to porous plate from incompressible flow of hot gas of cooling system
21 p3849 A69-38846

Optimal transfer between coplanar elliptical orbits of spacecraft with combined small and large thrust propulsion system
21 p3803 A69-38848

Optimal control of vibrations of liquid in cylindrical container with vertical generatrix and flat bottom, using dynamic programming
21 p3694 A69-38849

Optimal control of flight vehicle consisting of long thin elastic body under torsional deformations, solving by method of successive approximations
21 p3760 A69-38852

Control system generating compensating reactions for correcting trajectory deviations due to uncontrollable random factors, discussing linear automatic control system optimization
21 p3770 A69-38853

Optimal control of liquid vibrations in rectangular container moving in horizontal direction, deriving algebraic equations system for optimal functional
21 p3694 A69-38854

Admissible controls set for discontinuous stochastic automatic control systems, deriving mean optimal averaging of controls
21 p3770 A69-38855

Optimal control of rotational and transversal motions of elastic flight vehicles, considering torsional and flexural deformations
21 p3760 A69-38890

Optimal control of ideal noncompressible fluid vibrations partially filling rectangular container moving in horizontal direction
21 p3695 A69-38892

Optimal generalized random controls using stochastic integral equation in deterministic problem
21 p3756 A69-39266

Optimal control stationkeeping for maintaining space probe stability around collinear points in three body problem
[AIAA PAPER 69-906] 21 p3807 A69-39338

Computerized optimization of flexible booster autopilot design, considering criteria for stability margins, closed loop roots and structural load relief
[AIAA PAPER 69-875] 21 p3823 A69-39401

Neighboring optimum feedback guidance to motivate min-distance lookup parameter determined by minimizing metric function of perturbed state and reference trajectory
[AIAA PAPER 69-888] 21 p3765 A69-39414

Optimum filter design for noisy analog feedback system with forward and feedback disturbances, using mean square error criterion between signal and data
21 p3687 A69-39449

Soviet monograph on mathematical methods of optimal control, discussing models and synthesis of optimal quick response systems by Pontryagin principle
21 p3757 A69-39524

Optimal pursuit control at constant moving velocity and limited angular velocities, using Pontryagin principle
21 p3825 A69-39629

Suboptimal attitude control system for Nimbus satellite using motor-driven inertia wheels as control torque source for three dimensional control
21 p3826 A69-39642

Space vehicles optimal pulsed control systems statistical synthesis, considering structural constraints on operation, memory capacity and algorithm coefficients
21 p3767 A69-39651

Optimal control system for earth satellite orbital transfer, using wandering ellipse technique to develop trajectory correction algorithm
21 p3767 A69-39652

Variational problem involving winged flight vehicles ascending and descending flight optimal program determination, considering necessary extremal conditions
21 p3767 A69-39823

Flight vehicle motion in high density medium reacting with static, vortex and dynamic forces analyzed for optimal regime via Lagrange-Euler equation
21 p3768 A69-39824

Point mapping in optimal control, describing maximum principle, dynamic programming and substitution of variables
21 p3688 A69-39860

Weighting function of statistically optimal automatic dynamic system generating stochastic loads, using Fredholm equations
21 p3688 A69-39861

Optimal control synthesis by determining conditions for absolute minimum in quick response having no regular constraints on phase coordinates
21 p3689 A69-39863

Existence theorem for linear stochastic systems optimal control described by differential equation with random coefficients, providing rms stabilization
22 p3917 A69-40116

Nonlinear adaptive reaction jet attitude control for long life space vehicles, providing optimal performance over bias acceleration disturbances
[AIAA PAPER 69-945] 22 p4036 A69-40328

Minimization of unconstrained function of several variables by gradient dependent techniques, discussing applications to boundary value problems in optimal control
[AIAA PAPER 69-951] 22 p3975 A69-40333

Linear flight control system synthesis by using optimal control theory associated with quadratic performance index
22 p3864 A69-40588

Biological systems optimal control theory, considering various control structures and energetic and informational bases of optimization
22 p3893 A69-40786

Newton-Raphson function space algorithm for optimizing control systems with discontinuities and terminal constraints, discussing spacecraft examples
22 p3918 A69-41009

Existence theorem for Markov chain finite state stochastic games applied to saddle point and optimal strategy or epsilon-optimal strategy pairs
22 p3975 A69-41010

Optimum linear adaptive design of dominant-type systems with large parameter variations assuring system response within prescribed bounds by reducing internal noise sensitivity
22 p3918 A69-41011

Suboptimal linear regulators design method yielding feedback controller for multivariable linear systems subject to parameter variations
22 p3918 A69-41012

Parameter optimization technique for aircraft control equipment design
22 p3919 A69-41051

Minimum impulse transfer of vehicle between non-coplanar Kepler orbits, applying optimal control principles to formulation
23 p4214 A69-41878

Rendezvous, intercept and injection optimal control laws derived from inhomogeneous linear differential equations with quadratic performance index
23 p4224 A69-41921

Optimal generalized controls for systems under random forces described by hyperbolic partial differential equation system
23 p4144 A69-41957

Optimal thrust control for plane curvilinear motion of variable mass point in gravitational field
23 p4192 A69-42340

Man-machine /semiautomatic/ control for optimal decision making, discussing automatic control disadvantages and limitations, multilevel system hierarchical structures, three level models, etc
23 p4112 A69-42443

Controlled plant in n dimensional Euclidean space, analyzing optimal trajectory using integral equations
23 p4183 A69-42472

Adaptive control systems analysis and application, noting off-line and on-line optimization, dynamic programming, linear systems, etc
24 p4289 A69-42946

Optimum control synthesis for nonlinear plant subject to white noise perturbation, using integral estimates of phase coordinate functions
24 p4289 A69-42949

Weight limitations effect on optimum motion parameters of variable mass body in gravitational field applied to spacecraft optimum propulsion system controls and trajectory determination
24 p4383 A69-42956

Nonblocking switching networks operating in ordinary and in simultaneous switching regime, including control algorithms for optimal space communication
24 p4289 A69-43138

Bellman equation analyzed for higher derivatives, suggesting bounded partial derivatives of optimal feedback control function
24 p4341 A69-43234

Separation theorem for arbitrary nonlinear measurements to find optimal stochastic control without dynamic programming
24 p4291 A69-43269

Slack variable to transform optimal control problem with scalar inequality constraint on state variables into unconstrained problem of higher dimension
24 p4291 A69-43270

Optimal deterministic estimation and feedback control for linear nonstationary process and measurement systems defined by Riccati equations, including Kalman-Bucy filter
24 p4291 A69-43276

Quadratic optimization applied to helicopter flight control design, assuming constant feedback gains and command step input with zero steady state error
24 p4253 A69-43279

Quasi-optimum control law for aircraft landing control system design based on Friedland technique, evaluating effectiveness by computer simulation
24 p4253 A69-43280

Singular optimal control problems theoretical and computational aspects
24 p4292 A69-43282

Stochastic fuel regulator problem investigated by optimal and self organizing techniques, emphasizing realizability of resulting controllers
24 p4292 A69-43284

Quasi-optimum proportional navigation for interceptor missiles, discussing feedback guidance law and attack geometry
24 p4348 A69-43292

Optimal deterministic inputs derived for estimating dynamic control system parameters from white observation noise
24 p4293 A69-43294

Optimal gain theory for input vector and application to regulator problem describing aircraft dynamics
24 p4293 A69-43305

Optimal control for systems with discontinuities and terminal constraints using Newton-Raphson algorithm /successive sweep method/
24 p4294 A69-43306

Optimal allocation of pulses for array radar tracking large number of targets simultaneously, using discrete time maximum algorithm
24 p4283 A69-43311

Quasi-optimum control law for minimum-time bounded acceleration rendezvous in central force field using Friedland technique, with application to lunar flight
24 p4349 A69-43313

Optimal control with computer prediction for inertial linear plants relay system containing time lag
24 p4295 A69-43706

Optimal control parameters for gyroscopic devices with constrained phase coordinates obtained on analog computer by introducing equivalent phase coordinates system
24 p4317 A69-43708

Nonlinear programming for optimal circuits design, discussing search method of ACOP /Automatic Circuit Optimization Program/
01 p0035 A69-10067

Optimal stabilization of free gyrostats using duration of transient processes and functionals of fuel and power requirements as criteria
01 p0079 A69-10261

Basic equations for optimum inhomogeneity in pressure vessels of maximum rigidity derived, using thick walled spherical shell
01 p0167 A69-10326

Spherical shell pressure vessels investigated for optimum inhomogeneity and rigidity using Lagrange polynomials
01 p0167 A69-10327

Optimal rank algorithm construction for signal detection in noise investigated for use in information transmission systems
01 p0027 A69-10374

Antenna performance optimization, considering gain dependence on diameter, feed, tolerances, noise temperature, etc
[UN PAPER 68-95813] 01 p0043 A69-10517

Optimal predictor design by comparison of statistical input models, measuring signal filter performance by root-mean-squared errors
01 p0043 A69-10558

Digital simulation models for continuous systems determined by direct search minimization
01 p0036 A69-10706

Optimal structural design since 1962
01 p0170 A69-10814

Optimal transport aircraft, considering VTOL/STOL aircraft, construction requirements and flying distances
01 p0012 A69-11293

Interactions between outer and inner jets behind maximum cross section of jet engine nozzle
[ONERA-TP-600] 02 p0187 A69-11620

Proportional navigation guidance systems for interceptor missiles optimized by adding biased term to guidance equation
02 p0278 A69-11973

Sonic nozzle optimal profile determination with and without cylindrical throats, noting sonic line curvature importance on discharge coefficient
02 p0188 A69-12037

Optimal thin walled cross section of hollow beam for pure bending, taking into account stability requirements
02 p0340 A69-12054

Variation method for optimal solution of antenna synthesis problem for given radiation pattern
02 p0217 A69-12260

Optimal detection of random signals on background of noise of unknown intensity and persistent false alarm probability
02 p0208 A69-12264

Optimum critical impulse for snap-through of nonlinear dissipative dynamical system of one degree of freedom
[AIAA PAPER 68-143] 02 p0346 A69-12508

Mathematical programming in optimized truss design noting reduction of components under buckling
02 p0347 A69-12536

Finned tube radiators optimum design for waste heat removal from space power plants
02 p0354 A69-12664

Optimum overrelaxation factor in diagnostic and forecast calculations
03 p0458 A69-13033

Frequency locked loop /FLL/ to optimize loop filter and quantization of amplitude channel
03 p0390 A69-13202

Digital computer systems design optimization based on operational experience in development of Saturn S-IC stage Automatic Test and Checkout System
03 p0400 A69-13233

Optimal design of vibration tests based on decision theory
[SAE PAPER 680753] 03 p0525 A69-13436

Optimum structural design based on linear, nonlinear and dynamic programming
[SAE PAPER 680752] 03 p0525 A69-13437

Hypersonic lifting body optimization under single and combined constraints of volumetric efficiency, heating and skin friction, using numerical search routine
[AIAA PAPER 68-1157] 03 p0362 A69-13557

Dynamic optimization problem with several decision and state variables, examining methods of solution
03 p0456 A69-13737

Optimal body shape determination by mathematical-mechanical relations derivation, discussing variational problems and variational principles applicability
03 p0526 A69-13739

Optimum proportions of gas mixture components in He-Ne laser related to field distribution in cavity
03 p0441 A69-13847

Book on nonlinear programming, discussing transformation of constrained minimization problem into sequence of unconstrained minimizations of appropriate auxiliary functions
04 p0563 A69-14421

Maximum inversion density and output power of Ne-He laser, given optimal discharge in hollow cathode
04 p0610 A69-14422

Digital computers in space flight simulation and vehicle performance optimization, examining mission analysis
04 p0652 A69-14519

Electrochemical shaping of turbine blades under symmetric cycle conditions, showing role of experimental functions for optimum regime
04 p0605 A69-14560

Optimal detection of deterministic signals with random initial phase on background of unknown intensity noise under condition of constant false alarm probability
04 p0557 A69-14788

Variational method applied to maximization of electronic efficiency of O-type TWT
04 p0577 A69-14791

Optimized formula for MacAdam color differences with modification in weighting of chromaticity and lightness, discussing Fortran IV computer programs development
04 p0564 A69-14883

Functional optimization techniques for serial hybrid computer solution of partial differential equations, emphasizing algorithms handled on digital computer
04 p0566 A69-15344

Design parameters optimization techniques for V/STOL aircraft, noting necessary cooperation between engineering and computing facilities
05 p0701 A69-15570

Minimum sensitivity deadbeat sampled data control system design by frequency domain technique, using two controllers
[ASME PAPER 68-WA/AUT-15] 05 p0738 A69-16177

Optimization of bounded feedback gains with respect to arbitrary integral performance criterion, using nonlinear programming
[ASME PAPER 68-WA/AUT-8] 05 p0738 A69-16180

Continuous parameter identification methods for parameter optimization in automatic control system analysis and synthesis, using modified steepest descent optimization
05 p0725 A69-16474

Spherical gyroscope servosystem probabilistic synthesis ensuring minimum dispersion of random drift
05 p0764 A69-16669

Satellite communication channel number and distribution optimization, obtaining malfunction probability for telephone service communication system
[UN PAPER 68-95772] 06 p0886 A69-17030

Design algorithm for adaptive control of systems using nonlinear integral equations with bounded input functions, formulating optimization as conditional minimization problem
06 p0900 A69-17351

Double stochastic approximation algorithm for minimizing mean square error in finite expansion of unknown probability distribution functions
06 p0947 A69-17361

Optimal estimation of sampled stochastic process with finite state unknown parameters
06 p0901 A69-17362

Digital computer optimization of representation of sampled data signals on orthogonal basis, using iterative method
06 p0901 A69-17363

Nonlinear constrained optimization by nonrandom complex method demonstrated by minimum weight structural analysis of elastic ring and plate
06 p1022 A69-17366

Nonlinear programming computational algorithm for recursive optimal estimates of constrained states of linear system
06 p0902 A69-17403

Slope optimization of antenna array difference radiation patterns coinciding with antenna directive gains
06 p0895 A69-17461

OPTIMIZATION

NT FLIGHT OPTIMIZATION
NT OPTIMAL CONTROL
NT TIME OPTIMAL CONTROL
NT TRAJECTORY OPTIMIZATION

Ellipsoids of revolution in viscous flow at very low Reynolds number, determining optimum shapes and minimum resistance values

06 p0911 A69-17780

Optimum efficiency of paraboloidal reflector antennas, analyzing Potter method and use of hybrid modes

06 p0899 A69-17825

Optimal flow conditions in linear conduction type MHD generators for obtaining maximum power per unit channel length or volume

06 p0871 A69-17916

Channel parameters, magnetic field level, electrical potential and channel output pressure for optimal integral characteristic of MHD system selected by variational method

06 p0969 A69-17917

Optimization of control independent cost functions in multidimensional system with linear controllers

06 p0905 A69-17945

Linear closed loop control system poorly damped response to deterministic inputs improved by stability constraint for minimization of mean squared error

06 p0905 A69-17950

Hypersonic body shaping for minimum drag and improved performance from view of flight regimes, discussing implications of pressure laws

[AIAA PAPER 69-181]

06 p0863 A69-18052

Substructure optimization in structural synthesis, minimizing number of cells for configuration parameter

[AIAA PAPER 69-121]

06 p1027 A69-18069

Differential equations for minimum variance linear filter separating signals from additive correlated noise, using discrete time optimum formulas

[AIAA PAPER 69-73]

06 p0905 A69-18121

Constant thickness fin with arbitrarily distributed heat sources optimized using approximate physical model and closed form solution of field equation

[SAE PAPER 690198]

07 p1239 A69-18302

Optimum fixed geometry ramjet in Mach range of 3 to 7 with successively subsonic and supersonic combustion

[ONERA-TP-656E]

07 p1203 A69-18415

Desired laser characteristics for space communications compared to existing lasers

07 p1146 A69-18483

Optimum physiological parameters selection criteria for medical control of crew during space flights

07 p1071 A69-18978

Current load distribution for optimizing MHD generator efficiency determined by variational method, noting dependence on relative length

07 p1058 A69-19012

Radar signal parameters measurements consisting of SNR estimation and optimum energy supply determination from SNR estimation

07 p1085 A69-19153

Optimum geometrical design of multipad externally pressurized journal bearings

07 p1141 A69-19439

Discrete signal detection providing optimum SNR for frequency and time domain differences between signal and noise

07 p1088 A69-19676

High speed stable system by combining hunting type control system without closed cycles designed for plant optimization with recycling type controller

07 p1116 A69-19759

Secondary acquisition systems analysis by semi-Markov process model, defining minimum average acquisition time

08 p1270 A69-19852

MOS transistor logic circuit performance optimization through component geometry and feed voltage

08 p1280 A69-19977

Total error of minimization of differentiable functionals based on gradient projection procedures

08 p1342 A69-20319

Structural parameters influence on fiberglass reinforced plastics strength studied for optimal structure selection

08 p1335 A69-20332

Optimal electroluminescent efficiencies for vapor grown gallium arsenide phosphide diodes, analyzing current spreading, absorption, impurity and composition effects

[ECS PAPER 103]

08 p1284 A69-20366

Optimal length conditions of liquid rocket combustion chambers, considering propellants, injection conditions, etc, noting graphs and differential equations solutions

08 p1376 A69-20606

Minimum weight plastic design of circular and annular sandwich plates with piecewise constant cross section, discussing cost reduction

08 p1417 A69-20823

Electronically phased array antenna system design optimization and testing for application to spin stabilized satellites

08 p1289 A69-20969

Optimum integration of aircraft equipment, subsystems and computer mechanizations for low cost navigation system consistent with mission requirements

08 p1348 A69-21065

Optimum aerodynamic shapes theory, considering linearized and nonlinearized supersonic flow, Newton-Busemann hypersonic flow, free molecular flow, mathematical models and variational problems

08 p1253 A69-21127

Chebyshev error norms of polynomial approximations for ideal filter minimized by emphasizing role of transfer function even and odd parts

08 p1299 A69-21168

Optimum gathering of information for linear automatic control system with distributed parameters in presence of random input disturbance

09 p1471 A69-21437

Efficiency of weather forecasts taking into account quality criteria and integrating index number, discussing optimization principle for new parameter

09 p1534 A69-21510

Optimal moments for trajectory parameters measurements determined by linear analysis to minimize error for initial conditions

09 p1495 A69-21758

Probability approach to control system optimization problem for plant with incomplete information

09 p1473 A69-21856

Electric propulsion design, considering effects of weight, impedance matching, beam voltage regulation and operating point variations in formulating system mass and reliability

[AIAA PAPER 69-254]

09 p1569 A69-21879

Communication satellite power utilization optimized by matching final amplifiers to solar cell array

[AIAA PAPER 68-437]

09 p1442 A69-21990

Optimal receiving circuit determined for elliptically polarized signals in randomly polarized noise by deriving integral equation

09 p1456 A69-22285

Weak signal optimization of multilevel quantization and corresponding detection performance, discussing asymptotic limits

09 p1456 A69-22293

Explosive forming, discussing optimum parameters for model and prototype parts and subscale forming criteria for aluminum ellipsoidal domes

09 p1512 A69-22371

Error bounds for estimation error covariance matrix of fixed point smoothing and fixed interval smoothing algorithms for optimum linear estimation

09 p1533 A69-22436

Dynamic programming computational approach to optimization with state variable discontinuities, treating problems as multistage optimization with continuous subarc stages

09 p1474 A69-22440

Optimum selection of modulation indices for multitone phase modulation by graphical method, noting tolerance insensitivity

09 p1457 A69-22463

Noniterative wideband amplifiers having single pole transfer functions overall gain bandwidth product optimization, deriving rigorous conditions for maximum

09 p1469 A69-22606

Autodyne frequency converters minimum noise and conversion factor calculation and optimal mode determination

09 p1469 A69-22631

Optimum number of terms in approximation of realizations of random process by polynomials

09 p1475 A69-22667

Space flight fuel consumption optimization as function of acceleration of nozzle control

10 p1666 A69-22919

Optimal rendezvous for two propelled spacecraft obtained by Pontryagin principle assuming small distance between vehicles compared to distances from center of gravity

10 p1791 A69-22923

Integral equation and related optimal regularization problems, finding operator in class of operators defined on set of functions

10 p1721 A69-23882

Multiparameter optimum damping for harmonically excited linear stable strictly dissipative n degrees of freedom system, locating multivariable saddle points

[ASME PAPER 69-VIBR-42]

10 p1807 A69-24180

Displacement and acceleration criterion for synthesizing optimum linear vibration isolator systems subject to random input

[ASME PAPER 69-VIBR-44]

10 p1807 A69-24182

Optimum and suboptimum shock and vibration isolators, discussing three criteria and tradeoff between relative motion and accelerative force

[ASME PAPER 69-VIBR-45]

10 p1808 A69-24183

Optimal processing parameters for producing ingots and semifinished products from corrosion resistant Ti alloys with added Mo

11 p1902 A69-24273

Conjugated gradient components of optimization criterion in automatic control determined by applying sensitivity method to computation

11 p1857 A69-24367

Optimizing two stage procedure for detecting fluctuating incoherent signal, estimating detection attempts reliability

11 p1833 A69-24444

Propulsion optimization for various vehicles, considering power plant weight, specific fuel consumption, power and thrust ratios, etc

11 p1941 A69-24462

Optimum cooling of homogeneous isotropic cylindrical body with constraints on magnitude of thermoelastic stresses

11 p1976 A69-24772

Adaptive optimal estimation of sampled stochastic process with finite state unknown parameters, using separation technique

11 p1858 A69-24935

Optimal multidimensional sequential filtration of signal on background of time correlated noise

11 p1859 A69-24967

Approximate method for calculating linear multipole antennas parameters in terms of power requirement, considering equidistant/nonequidistant element antennas

11 p1849 A69-24969

Gas dynamics for supersonic nonequilibrium flows, discussing method for determination of nozzle contours for maximum thrust

11 p1820 A69-25475

Complex structure least weight optimization for specific frequency by computerized modification of existing member cross sectional properties

11 p1989 A69-25494

Structural optimization of designs with requirements including restrictions on structure dynamic response and characteristics

11 p1989 A69-25495

Optimal design of structures with constraints on strength and natural frequency, developing steepest descent boundary value method

11 p1989 A69-25496

Iterative algorithm to determine transition probability final distribution in Markov extremal systems

11 p1861 A69-25712

Optimal scale factor selection to ensure minimum error variance in signal detection against random noise background for input limited range of measuring instrument

12 p2079 A69-25966

Group theory application to multidimensional symmetrical linear dynamic control systems optimization, considering natural vibrations of three material points

12 p2129 A69-26071

Optimization problem with bounded state variable, noting conditions on trajectories and relations for co-state vector at connecting or branching point

12 p2050 A69-26087

Thermoelectric power generators energy output efficiency, discussing thermal and electric contact resistances influence for optimizing parameters

12 p2016 A69-26364

Computer analysis on ideal step recovery diode frequency multipliers for optimum efficiencies

12 p2039 A69-26378

Linear programming algorithms for optimal structural weight design

12 p2181 A69-26566

Conjugate gradient methods for optimization problems with terminal constraints, noting minimum time paths for V/STOL aircraft climb phase

12 p2013 A69-26763

Minimum volume face sheet design of circular cylindrical sandwich shell obeying Mises yield criterion for loads transverse to lateral surface and axisymmetric
12 p2189 A69-27117

Optical detection signals optimization in optical pumping, discussing light beam propagation direction, spectral composition and polarization characteristics
12 p2111 A69-27180

Optimal design of rectangular frames for stability
13 p2358 A69-27209

Design optimization for gas lubricated spiral grooved spool bearing based on narrow groove theory, analyzing static and dynamic characteristics for motion in axial direction
[ASME PAPER 68-LUBS-12]
13 p2266 A69-27276

Optimal mean radius and half height of channel of liquid metal coaxial linear induction MHD generator with unilateral and bilateral excitation
13 p2207 A69-27507

Soviet monograph on design and theory of linear induction pumps for liquid metals covering electromagnetic phenomena, optimized dimensions, etc
13 p2209 A69-27926

Linear automatic control optimization by modified Newton method for determining real function zero value of real argument
13 p2239 A69-28436

Minimum theorems for plastic strain rates and plastic strains governed by holonomic elastoplastic theory utilizing quadratic functions
13 p2370 A69-28629

Computerized calculation of likelihood coefficients for identifying steady random processes against background noise, minimizing mean risk of erroneous solution
14 p2410 A69-28818

Automatic search-free optimization by sensitivity functions, deriving algorithms by Q factor and discrepancy extrapolation
14 p2425 A69-28823

Parameters optimization in electronic equipment design, considering parameters and efficiency criteria as additive elements functions of dimensional chain
14 p2418 A69-28835

Deterministic economic mathematical models for optimum airline networks, considering transportation cost
14 p2540 A69-29141

He-Ne laser traveling wave output power, obtaining end mirror reflection coefficient optimal value
14 p2458 A69-29165

Thermionic electrogenerating element /EGE/ design optimization, considering one dimensional linear geometry with thin walled cylindrical sheath cathode
14 p2400 A69-29224

Optimum nonlinear digital filter synthesis for smoothing, predicting and differentiating measured quantity having uniform probability distribution over finite number of discrete values
14 p2426 A69-29421

Complex electronic systems optimum redundant element content determination for ensuring adequate supply
14 p2426 A69-29422

Optimized receivers synthesized for narrow band radio signal filtration, comparing noise rejection properties of various pulse modulation types during speech transmission
14 p2413 A69-29464

Chopper modulated IR detection system error analysis through minimizing mean square error of approximating output function
14 p2450 A69-29639

Plane linear induction pump design optimization without short circuiting bus bars, allowing for MHD effects induced by traveling magnetic field
14 p2405 A69-29913

Algorithms for optimal detection of signals on background of normal noise with time varying intensity
15 p2563 A69-30133

Cantilever beam profile optimization methods using iterative analog computation to achieve minimum deflection, showing application of Pontryagin maximum principle
15 p2709 A69-30671

Optimization techniques for stellar kinetic theory problems, discussing kinematics distribution function, cosmic gas dynamics, interstellar matter, etc
15 p2695 A69-31004

Rapid convergence algorithms as second variation methods for dynamic optimization problems
15 p2645 A69-31235

Rendezvous maneuver with minimum fuel in circular orbit solved without restrictive conditions for accelerations due to approach thrust
16 p2852 A69-31558

Mathematical optimization to achieve near equal-ripple response in passband for coaxial low pass filters having unequal line lengths
16 p2757 A69-31583

Independent operations optimum performing sequence determined for parallel machines differing in technological characteristics and with assigned time using algorithm
16 p2763 A69-31626

Minimization algorithm for complex and switching functions using unique identifiers on Karnaugh map
16 p2764 A69-31710

Three antenna interferometer angle measurement accuracy dependent on antenna spacing, deriving optimal spacing value
16 p2758 A69-31730

Transistor temperature and power limitations and thermal resistance calculation, discussing heat sink surface optimum design for power losses
16 p2760 A69-32047

Numerical procedure to optimize complex structures by determining relative proportions of selected elements attaining flutter speed with minimum total mass
16 p2874 A69-32163

Parameter selection for optimum characteristics of machine part shock absorbers subject to orthogonal impact pulses
16 p2794 A69-32297

Optimum nonequilibrium nozzle performance for hydrogen-fluorine propellant system, considering contour, engine/nozzle weights and recombination kinetics
[AIAA PAPER 69-472]
16 p2733 A69-32652

Flywheels desaturated by magnetic action for optimizing stabilization system of satellite in circular orbit
[ONERA-TP-732]
17 p3049 A69-33241

Carrying cables shape optimization for suspended structures under load, using minimum weight criterion
18 p3212 A69-34354

Optimum pressure distribution and airfoil profiles for maximum lift without separation in incompressible flow determined by second order theory
[AIAA PAPER 69-739]
18 p3083 A69-34401

Failure rate data role in reliability analysis and design optimization
18 p3147 A69-34516

Optimal overlapping theory to select nonthrottled low thrust spacecraft engines power, noting spacecraft mass invariability
18 p3184 A69-34583

Sandwich beams optimal design determined for case of constraint on elastic deflection and for load factor at plastic collapse
18 p3218 A69-34623

Cost and weight optimization for solid rocket motors using various steel casings
[SAWE PAPER 777]
18 p3208 A69-34871

Aerospace structures optimization, discussing weight considerations and finite element techniques
[SAWE PAPER 814]
18 p3221 A69-34896

Optimum efficiency of turbines with small volumetric flow rate, determining height of air-gas flow, partial admittance and flow angle in clearance
18 p3184 A69-34983

Preamphasis analysis for FM system optimization to maintain constant output signal to noise ratio throughout baseband
18 p3103 A69-35088

Parameter optimization of launch vehicle attitude control system of fixed structure for various computation techniques
18 p3210 A69-35092

Optimal structure model of fiberglass reinforced materials with polymer matrix, obtaining strength utilization coefficient dependence on length/diameter ratio
18 p3162 A69-35356

Two stage vehicle gross weight minimization determined by slide rule computation using formula based on specific impulse differences between stages
19 p3429 A69-35918

Rapid Targeting Procedures computer program for optimized orbital payload and associated launch vehicle targeting data with one submittal and minimum user intervention
[AAS PAPER 68-148]
19 p3402 A69-35951

Optimized contracting for systems engineering management, discussing industry views, scope, application, depth, procurement and performance measurement
19 p3454 A69-36005

Critical signal assignments optimization in electrical/electronic connectors, considering bent pins, signal cross talk, adjacency requirements and corona
19 p3284 A69-36030

Structural design optimization based on reliability analysis stressing proof-load test and weight savings consideration under cost constraint
19 p3437 A69-36033

Solid state S band to VHF converter design to obtain optimum system noise for radio telemetry, discussing cost effectiveness and system performance
19 p3270 A69-36238

Optimal ratio predetection combiner used with diversity signals and various modulations, showing significant improvement in telemetry systems performance
19 p3270 A69-36241

Huffman minimum redundancy coding extension to run-length information based on Poisson distribution, including optimization and data compression applications
19 p3272 A69-36262

Optimum receiver design for binary coded data detection in two channel space communication system, discussing phase error distribution and optimum decision function
19 p3275 A69-36286

Stochastic models for calculating optimal elastoplastic one dimensional systems
19 p3438 A69-36313

Representation theory of signal detection in non-Gaussian noise environments applied for improved near optimum system performance
[IEEE PAPER 69-TP-10-COM]
19 p3277 A69-36488

Optimum aerological network design, discussing atmospheric model, numerical analysis, data acquisition, weather forecasts, rms measurement error, etc
19 p3364 A69-36505

Electric models optimization for heat exchange systems based on mathematical similarity between equations describing temperature and electrical potential fields
19 p3256 A69-36717

He-Ne laser temperature condition optimization based on calculation and experiment
20 p3553 A69-37356

Discrete signal detection providing optimum SNR for frequency and time domain differences between signal and noise
20 p3488 A69-37458

Optimal plastic design of circular sandwich ring assuming symmetric loading, minimum plastic resistance and cost justification of stronger cross section
20 p3625 A69-37590

Slope optimization of antenna array difference radiation patterns coinciding with antenna directive gains
20 p3508 A69-37944

Optimum physiological parameters selection criteria for medical control of crew during space flights
20 p3483 A69-38226

Psychology and physiology of vision in relation to large screen display design, discussing effects of symbol size and spacing, color usage, etc
21 p3662 A69-38330

Optimization for processes expressed in differential equations, stressing use of calculus of variations and limitation
21 p3795 A69-38400

Mathematical models and solution techniques for calculating optimal elastoplastic structures by computer, discussing methods for displacements preceding plastic failure
21 p3831 A69-38414

All-plastic light passenger aircraft with inflated tube construction for shell, discussing design and performance
21 p3728 A69-38461

Earth resources technology satellite /ERTS/ choice regarding local time of ascending node based on cloud cover and IR measurement considerations
21 p3798 A69-38628

Optimum and suboptimum synchronizers for extracting bit synchronization from binary data, showing performance dependence on pertinent system parameters
21 p3673 A69-38923

Unknown parameter experimental estimation based on signal direct observations with solution by stochastic approximations method
21 p3756 A69-39265

Nonlinear filter for optimal estimation of mean, covariance and third central moments of system, noting simulation tests stability for orbital navigation
[AIAA PAPER 69-852]
21 p3686 A69-39380

Analytical and graphical methods for characteristics of optima produced by quadratic performance index for VTOL prefilter model reference attitude control system
[AIAA PAPER 69-884] 21 p3764 A69-39411

Filtering optimization prior to limiting digital signals in strong noise, detailing bandwidth choice of single pole low pass filter
21 p3676 A69-39450

Discrete filters for optimal processing of down-linked satellite data, considering inverse filter development by Kalman filtering techniques
21 p3677 A69-39462

Iterative method for reducing filters required for optimal Kalman filter design maintaining parameter estimation accuracy
21 p3687 A69-39463

Direction finding characteristics of nonlinear antenna, including current determination and optimal angle for sidelobe level
21 p3684 A69-39619

Book on optimal aerodynamic shapes by means of variational method, covering conventional and triangular thick wing lift systems in supersonic flow
21 p3644 A69-39667

Thermistor radiation detectors bias condition defined from equations and optimized in terms of responsivity, time constant and noise
21 p3727 A69-39782

Euler equation in variational problems for optimized process described by ordinary differential equations, deriving final extremal relationship
21 p3829 A69-39825

Satellite attitude stabilization systems transient response optimization using combined feedback
21 p3830 A69-39833

Laboratory prototype of RF ion engines for space test, discussing components optimization
22 p3998 A69-39904

Minimization of motion deviation from prescribed motion analyzed as differential game of converging motions using equations of motion
22 p3980 A69-40105

Mathematical model of optimal partially closed life support system consisting of man, recycling unit, storage unit and waste disposal outlet
22 p3892 A69-40272

Minimum bias criteria for selecting data fitting curves, allowing for unknown true equation in improving data predictability
[AIAA PAPER 69-950] 22 p3975 A69-40332

Minimization of unconstrained function of several variables by gradient dependent techniques, discussing applications to boundary value problems in optimal control
[AIAA PAPER 69-951] 22 p3975 A69-40333

Computerized solid rocket motor nozzle design with computer program providing weight, envelope and performance values for vehicle optimization studies
[AIAA PAPER 69-975] 22 p3999 A69-40355

Computerized crewstation geometry evaluation and design optimization using 23-pin-joint man-model
[AIAA PAPER 69-977] 22 p3892 A69-40357

Computer optimization of spacecraft optical coatings for temperature control, using finite element analysis and matrix inversion
[AIAA PAPER 69-979] 22 p4050 A69-40359

Payload optimization factors for orbital storage of liquid hydrogen, considering payload cost of agitation, tank pressure, pressurant weight, etc
[AIAA PAPER 69-1007] 22 p4021 A69-40381

Systems approach to avionics optimization, discussing instruments, devices, display and automation techniques
[RAES PAPER 6] 22 p3946 A69-40487

Axial mode frequencies, loss coefficients and optimal parameters of three and four mirror resonators of gas lasers, including designs with maximum selectivity
22 p3964 A69-40796

Antenna array synthesis optimization for limited deviations of source distribution function from prescribed function
22 p3916 A69-40952

Minimax sensitivity criteria used to synthesize filters for estimating state of first order plant subject to dynamic and/or statistical parameters uncertainties
22 p3918 A69-41016

Algorithm for optimal solution to secondary optimization problem in nonserial dynamic programming
22 p3976 A69-41037

Germanium microwave backward diodes optimum design and performance prediction through computer calculation for important parameters
22 p3916 A69-41224

Fittings stress distribution determined for optimization of material utilization
23 p4169 A69-41418

Minimum weight and optimal cross sections design for statically determinate and indeterminate shell and H beams, using variational method
23 p4225 A69-41424

Monotonic minimization algorithm for nonsmooth extremal problems of mathematical programming, game theory, approximations and optimal control in arbitrary Banach space
23 p4181 A69-41524

Resistance thermometer for measuring rapidly varying gas temperatures, optimizing length to eliminate heat transfer to mounting
23 p4163 A69-41557

Bayesian estimate of individual truck maintenance costs based on optimum replacement maintenance age
23 p4241 A69-41577

Feasibility studies to optimized design for 440 ft steerable filled-aperture radio and radar telescope, discussing parabolic configuration, radome selection, etc
23 p4148 A69-42123

Battery subsystems optimization for earth satellite lifetimes greater than 5 years, analyzing flexibility, weight and reliability
23 p4068 A69-42243

Spacecraft solar cell near-maximum power operation by tracking optimum value with array temperature sensor
23 p4075 A69-42303

Optimum integration of aircraft equipment, subsystems and computer mechanizations for low cost navigation system consistent with mission requirements
23 p4186 A69-42538

Quantization optimization of continuous signals with known probability distribution, using quantizers with limited output values
24 p4288 A69-42671

Public policy for urban transportation system, using calculus of variations to determine optimal introduction curve
[AAS PAPER 69-292] 24 p4417 A69-42809

Algorithm minimizing personnel number and training costs to meet uncertain skill requirements, applying to army aviation contingency force training composition
[AAS PAPER 69-116] 24 p4271 A69-42818

Differential games derived for conjugate-point necessary conditions and definitions for minimum and maximum problems
24 p4340 A69-42959

Materials research structural design cycle, discussing simultaneous optimization, constituent materials, fabrication process, load environment and mission constraints
24 p4399 A69-42991

Optimum thickness of dynamically stable composite superconducting tapes determined for substrate thickness as function of current density
24 p4361 A69-43121

SNR improvement by antenna array optimization
24 p4287 A69-43140

Optimal rule for decision to stop or continue observation of random variables after observing sequence of variables with continuous distribution function
24 p4341 A69-43235

Optimal hinged two body satellite configurations in circular and elliptical orbits, discussing need for adaptive attitude control for transient and steady state operation
24 p4393 A69-43247

Optimization problems solution applied to separable but bounded state variable problem, providing control over commercial errors
24 p4292 A69-43286

Optimization of Faraday MHD generators with nonequilibrium ionization and plasma turbulence, assuming electrons at Saha equilibrium at elevated temperatures
24 p4256 A69-43682

Optimal scheme of combining motion estimators set derived for computational simplicity and asymptotic efficiency
24 p4342 A69-43704

OPTIMUM CONTROL

U OPTIMAL CONTROL

OPTIMUM THRUST PROGRAMMING

U THRUST PROGRAMMING

OPTOMETRY

Horizontal tracking eye movements response to unpredictable constant velocity target motions with or

without saccadic position corrections recorded by contact lens optical lever

22 p3881 A69-40856

Viscoelastic properties of lenses extracted from cats and dogs analyzed as function of displacement using computer simulation

22 p3883 A69-40875

Liquid filled adjustable optical analog of human eye for aligning, calibrating and systems testing of automatic IR optometers

22 p3888 A69-41231

OR-GATES

U GATES [CIRCUITS]

ORBIS CAL SATELLITE

ORBIS-CAL designed to achieve three axis orientation to local vertical and velocity vector in eccentric orbit by gravity gradient stabilization

07 p1226 A69-18323

ORBIT CALCULATION

Satellite trajectories calculated in form of parameters derived from processing measured functions, considering optimum mathematical description selection

01 p0151 A69-10570

Theory of generalized multistep methods, using off-grid point extended to special second order differential equation, applied to unperturbed orbit trajectory

01 p0153 A69-10808

Autonomous solution to orbital navigation problem yielding direct measure of orbital parameters

01 p0114 A69-11005

Smoothing and prediction of satellite orbit elements by stochastic approximation method, solving nonlinear equations system

01 p0158 A69-11319

Comet Schwassmann-Wachmann I orbit computation, using perturbations of all planets from Venus to Neptune

01 p0158 A69-11328

Jupiter outer satellites orbits determination with computer program based on modified Cowell/Moulton methods for adjusting initial conditions

01 p0158 A69-11330

Grobner formulas for numerical analysis of differential equations, discussing applications to orbit computations in celestial mechanics

02 p0322 A69-12250

Monograph on orbit computation of doubly photographed meteors employing method of least squares, giving computer programs and tables of data printout

02 p0324 A69-12495

Short period terms elimination for problem of motion of satellite with strong inclination and eccentricity, using von Zeipel method

03 p0514 A69-13783

Spacecraft trajectories computation from initial conditions by techniques involving construction of N body reference orbit

03 p0518 A69-14248

Preliminary orbit determination, based on data collected during single pass by sensor, permitting preliminary orbital elements and data variance estimation

03 p0518 A69-14249

Kepler third law application to radar determinations of astronomical unit of length in general relativity

04 p0657 A69-14698

Artificial lunar satellite orbital motion calculated by numerical integration, including solar and lunar electromagnetic radiation pressure effects

04 p0662 A69-15251

Asymptotic solutions of restricted three body problem for one parameter periodic orbits in earth-moon synodic system, determining motion near moon

04 p0663 A69-15382

Lunar Orbiter mission objectives and orbit design

[AIAA PAPER 68-47] 04 p0664 A69-15503

Velocity increments for orbital transfer in satellite rendezvous in central Newtonian gravitational field by two impulse ballistic transfer method

05 p0789 A69-16046

Approximate solution for determining satellite motion around axisymmetric planet

06 p1905 A69-17563

Stable stationary positions for spacecraft determined by formulating variational equations for perturbing effects of earth triaxiality

06 p1006 A69-17565

Mars imaging mission and astrodynamic interaction, discussing arrival geometry and orbit size effects

[AIAA PAPER 69-127] 06 p1011 A69-18169

Transfer orbits calculation between low and high satellite orbits, determining trajectories by method with minimum use of linearization

07 p1211 A69-18503

Manual onboard computation procedures and devices for determination of maneuvers for orbital navigation and guidance
08 p1348 A69-21184

Circular satellite orbit calculation from incomplete observations of one orbital pass
09 p1589 A69-21373

Orbits with small eccentricities and inclinations in generalized problem of two fixed centers, showing osculating elements relationship to intermediate orbit elements
10 p1779 A69-23613

Secular perturbations of remote satellites within lunar gravitation field, comparing observations and analytical data
10 p1779 A69-23614

Optimal interorbital transfers between closely spaced nearly circular noncoplanar orbits, taking into account active section length for low power thrusts
10 p1783 A69-23712

Optimal transfer between coplanar orbits in Newtonian force field without intersecting circle boundaries
10 p1790 A69-24191

Equation derivation to determine optimal parameters of spacecraft orbital elements, considering constraints imposed on measured quantities
10 p1791 A69-24192

Orbital parameters changes computation in table form for binary systems with more massive component mass decrease
11 p1962 A69-25120

Least squares iterative program, deriving orbits for O binaries HD 93403 and HD 135240
11 p1963 A69-25257

Improved spheroidal method for calculation of almost polar orbit of artificial satellites, bypassing right ascension
12 p2152 A69-25799

Adaptive filtering to prevent divergence observed in application of Kalman filter to orbit determination
12 p2045 A69-26059

Satellite celestial equator intersection time calculation from visual satellite observation near equator including satellite draconic period determination, particularly for high altitude
12 p2069 A69-26438

Cosmos 17 and 44 draconic periods of rotation, discussing period variations determination from visual observations
12 p2173 A69-26439

Soviet satellites rotation periods from processing of photometric observations
12 p2069 A69-26440

Anomalous satellite periods of rotation from successive observations at same topocentric parallel
12 p2158 A69-26441

Orbit determination from satellite using linear combinations of time of flight measurements and based on expansion of satellite law of motion
12 p2159 A69-26778

Gauss method for Kepler equation ephemeris computation in nearly parabolic orbits, using expansions suitable for high speed computers
12 p2171 A69-27154

Computer method for solution of Banachiewicz graph analytic equivalent for parabolic orbits determination, noting geocentric distances variation
13 p2336 A69-27448

Resonant long-period orbits around Lagrange equilateral points for critical mass ratio of main bodies
13 p2346 A69-27706

Photoelectric yellow and blue observations of variable V502 Ophiuchi, noting influence of partial eclipses on orbital determination reliability
13 p2348 A69-27809

Periodic Trojan orbits for resonance 1/12 in restricted three body problem, noting bridge of stable and unstable orbit lanes
13 p2350 A69-27824

Provisional elliptic orbit computed for asteroid Floirac using Gauss-Encke and least squares method, tabulating residuals and ephemeris
14 p2521 A69-29585

Secor 6 satellite /1966-51A/ orbital parameters determined from optical and radar observations noting use for upper atmosphere density and rotational speed studies
14 p2522 A69-29631

Plane planetary orbits construction extended to nearly circular and quasi-plane orbits by generalizing perturbations method to problems in space
15 p2690 A69-30622

Satellite trajectories calculated in form of parameters derived from processing measured functions, considering optimum mathematical description selection
15 p2691 A69-30740

Antenna, frequency converter and automatic spectrum recorder system for closest approach times prediction and satellite identification, discussing errors
15 p2569 A69-30800

Rapid orbit prediction method for planning satellite observation programs, considering oblateness and radiation pressure effects
15 p2697 A69-31310

Generalized Fourier analysis for satellite motion deviations from arbitrarily chosen reference orbit generated analytically or numerically, determining equations for potential coefficients
15 p2697 A69-31323

Satellite trajectory determination and expected errors for OGO 4 and Geos 1 orbits, noting geopotential, aerodynamic drag and integration contributions
15 p2698 A69-31331

Average angular velocity of upper atmosphere from changes in orbital inclinations of satellites, discussing wind speeds
15 p2600 A69-31352

Satellites trajectories under influence of earth oblateness and low radial thrust acceleration by nonlinear mechanics asymptotic method, discussing osculating orbits
16 p2856 A69-32009

Tabulation of basic solar system data and formulas concerning trajectory length, escape velocity, orbits, etc
16 p2856 A69-32074

Atmospheric density at 130-160 km measured from satellite 1968-59B orbit, noting agreement with CIRA 1965
16 p2776 A69-32095

Liapunov functions applications in motion stability theory problems, considering dynamic systems, periodic orbits, optimum damping and control
16 p2804 A69-32248

Mass of Jupiter system from motion of Doris, using variational equations for initial rectangular coordinates and velocities with respect to mass of Jupiter
16 p2863 A69-32403

Equatorial moderately elliptical satellite orbit perturbations calculated in local invariants, assuming state vector dependence of acceleration
17 p3039 A69-33796

Orbit determination for short and long period comets using equations of motion including terms for radial components of nongravitational force
18 p3195 A69-34432

Cowell equations modified for exact integration of pure Keplerian orbits, considering secular effects
18 p3165 A69-34842

Geocentric orbital elements determination of lunar particles expelled into space by meteorite impact, using spheres of influence method
18 p3202 A69-35330

Orbit computation by means of predictor-corrector algorithms based on nonpolynomial functions, including numerical results for two body elliptic motion
19 p3397 A69-35611

Modified Newton-Raphson methods for preliminary orbit determination, showing fast convergence and short computation times
19 p3397 A69-35613

Orbits computation by Picard successive approximations method, discussing iterative numerical perturbation techniques
19 p3398 A69-35615

Peano-Baker method for integration of variational equations to produce partial derivatives used in satellite trajectory estimation
19 p3398 A69-35616

Optimal fuel transfers between coplanar and non-coplanar coaxial elliptical orbits determined by Pontryagin maximum principle, using digital program for Hamiltonian equations solutions
19 p3399 A69-35670

Earth orbit estimation by manual stadiometer, space sextant and small data processor, discussing orbital parameter errors due to instrument and environment uncertainties
19 p3369 A69-35793

Orbit parameters identification method based on given tracking data span applied to lunar orbiter tracking using Fourier analysis
19 p3401 A69-35916

Continuously powered deep space vehicle orbit determination, discussing state estimation accuracy and use of continuous data filtering
19 p3402 A69-35939

[AAS PAPER 68-144]

Impulsive orbit transfer optimization using accelerated gradient program based on Newtonian algorithm for digital computer method
19 p3402 A69-35956

Geometric determination of visual binary orbits, noting inadequacy of graphical method based on apparent orbit ellipse properties
19 p3403 A69-35968

Comet observations and orbit determinations, noting eccentricity of comet Thomas
19 p3403 A69-35970

Meteorite orbits analysis with emphasis on recovered meteorites, noting fireballs and hyperbolic orbits
19 p3414 A69-36115

Meteorite orbits and radiants calculated, noting asteroidal belt origin
19 p3414 A69-36116

Modified Monte Carlo model applied to computerized meteorite orbit evolution, simulating secular perturbations by imposing sinusoidal variation on orbital elements
19 p3414 A69-36117

Chondritic meteorites initial orbits evolution to earth impact calculated by Monte Carlo method, considering relationships to meteorite sources
19 p3415 A69-36118

Photographic networks for meteors orbits and trajectories and meteorites impact points during nighttime, discussing fireball occurrence
19 p3415 A69-36120

Periodic orbits in nonlinear dynamical system constructed with iterative method based on modification of generalized Newton-Raphson technique
20 p3595 A69-37171

Jupiter tenth satellite reobserved, discussing calculations and computer techniques for determining orbit
20 p3595 A69-37194

Orbital rendezvous calculation in terms of adjoint variables vector associated with vehicle velocity vector
20 p3595 A69-37202

Stationkeeping motion effect on synchronous satellite orbit determination accuracy analyzed by two dimensional model, finding position uncertainty
20 p3595 A69-37218

Minor planets osculating elements computer calculated and tabulated
20 p3596 A69-37309

Definitive orbit of comet 1943 I determined from photographic and visual observations
20 p3596 A69-37310

Initial and future orbits of comet 1959 IV Alcock determined considering Venus, Jupiter, Saturn, Uranus and Neptune perturbations, noting elliptical to hyperbolic orbit transition
20 p3597 A69-37319

Visual binary star ADS 12447 orbit elements calculated using Zwiers method
20 p3598 A69-37466

Hansen method applied to Jupiter tenth satellite orbit correction and perturbations, describing computer program and formulas used
20 p3602 A69-37529

Velocity increments for orbital transfer in satellite rendezvous in central Newtonian gravitational field by two impulse ballistic transfer method
20 p3574 A69-37955

Satellite orbit determination method allowing geogravitational field determination and correction of station coordinates
21 p3793 A69-38337

Satellite tracking and orbit determination accuracy for system of two synchronous geostationary satellites
21 p3674 A69-39019

Two dimensional gravity assisted trajectories for solar probe missions in ecliptic plane, discussing Venus and Jupiter assist missions
21 p3804 A69-39022

Periodic orbits for interplanetary flight, using patched conic analysis for determining inclined elliptic free fall trajectory shuttling between earth and Venus
21 p3804 A69-39203

Near equatorial near synchronous satellite orbits determined by supplementing spherical harmonics representation of earth gravitational field with polynomial force model representation
21 p3806 A69-39234

Mathematical model for determining thrust interplanetary spacecraft orbit, considering time history of position, velocity and thrust acceleration
21 p3806 A69-39335

Encke type analytical-numerical integration for solving differential equations of modified set of Lagrange planetary equations, obtaining satellite ephemeris for orbit prediction
21 p3807 A69-39340

[AIAA PAPER 69-908]

Satellite orbit determination errors attributed to Gaussian noise effect on tracking measurements, assuming known Gaussian probability error distribution [AIAA PAPER 69-911] 21 p3807 A69-39343

Parking orbit optimal orientation for minimal impulsive maneuvers total velocity increment in three dimensional capture-escape mission [AIAA PAPER 69-918] 21 p3808 A69-39347

Satellite orbits calculation in nonrotating atmospheres, considering atmospheric drag and zonal harmonics coupled effects [AIAA PAPER 69-925] 21 p3808 A69-39352

Computer program for eccentric geocentric satellite orbits evolution, discussing atmospheric drag, earth oblateness and solilunar effects [AIAA PAPER 69-928] 21 p3808 A69-39357

Interplanetary periodic orbits and flyby dates for multiple Earth-Venus swingby missions, describing various iterative solutions for trajectory [AIAA PAPER 69-931] 21 p3809 A69-39359

Impulsive velocity correction determination method for precise stationkeeping of stationary satellite, discussing perturbations [AIAA PAPER 68-456] 21 p3817 A69-39757

Dynamical analysis of Bernard star motion, yielding companions in co-revolving, approximately coplanar, circular orbits 22 p4013 A69-40119

Eta Cassiopeiae orbit analysis with emphasis on multiple exposure photographic observations, noting companion mass 22 p4013 A69-40120

Real time orbit determination system at NASA manned space center for Apollo missions [AIAA PAPER 69-938] 22 p4020 A69-40321

Algorithms for close earth satellite orbit calculation developed by numerical integration methods, discussing solution efficiency [AIAA PAPER 69-948] 22 p4021 A69-40331

Neglected gravity coefficients influence on computed satellite orbits and geodetic parameters 22 p4023 A69-40556

Periodic orbits obtained for special restricted three body problem in resonance using numerical integration 22 p4031 A69-40909

Light pressure induced secular effect contributing to planetary satellites and lunar orbits evolution calculated by numerical integration 22 p4033 A69-41084

Errors in determining controlled satellite rotation periods, proposing scheme for corrected trajectory calculation of small eccentricity orbits 22 p4033 A69-41086

Satellite motion initial phase vector estimation for calculating satellite motion from selection of complete or increasing volume of measurements 22 p4033 A69-41088

Spectral and orbital evidence of connection among fireballs with orbit inclination, comets and carbonaceous meteorites 23 p4208 A69-41285

Spatial region accessible to earth launched probes determined for mission planning for exploration of aperiodic comets, discussing orbit parameters 23 p4212 A69-41536

Adaptive filtering to prevent divergence observed in application of Kalman filter to orbit determination 23 p4146 A69-42446

Optimal hinged two body satellite configurations in circular and elliptical orbits, discussing need for adaptive attitude control for transient and steady state operation 24 p4393 A69-43247

Planetary gravitational fields and artificial satellite orbits determined by using earth based range rate measurements 24 p4388 A69-43650

ORBIT DECAY

Cosmos 253 rocket reentry and fragmentation over England 05 p0830 A69-16656

Orbital parameters changes computation in table form for binary systems with more massive component mass decrease 11 p1962 A69-25120

Atmospheric density measurements by triaxial accelerometer system, ionization gauges and orbital decay of OV1-15 satellite 15 p2602 A69-31384

Air density height distribution determined from satellite orbit decay analysis, noting semiannual density variations 22 p3935 A69-39971

Lifetime of artificial satellites by approximate integration method with application to Explorer 1, comparing analytical prediction 22 p4036 A69-39973

Nonlinear longitudinal dynamics of lifting orbital vehicle in near circular orbit, considering translational motion components effecting orbital decay or dilatation [AAS PAPER 69-244] 24 p4392 A69-42857

ORBIT EQUATIONS

U ORBITAL MECHANICS

ORBIT PERTURBATION

NT SATELLITE PERTURBATION

Secular perturbations produced by comet belt beyond Neptune on orbits of periodic comets of large aphelion 01 p0158 A69-11327

Comet Schwassmann-Wachmann I orbit computation, using perturbations of all planets from Venus to Neptune 01 p0158 A69-11328

Jupiter outer satellites orbits determination with computer program based on modified Cowell/Moulton methods for adjusting initial conditions 01 p0158 A69-11330

Pluto mass from observations of perturbation on motion of Neptune 02 p0315 A69-11808

Stability of elliptical Venus orbits with solar gravitational perturbations, using equation accuracy and influence on mission planning 02 p0331 A69-12819

Geopotential resonant orbital perturbations of existing satellites, noting high inclination role 03 p0521 A69-13777

Project Icarus for reduction of threat of asteroid collision with earth by deflection or disintegration, noting guidance, control and communications for rocket 04 p0652 A69-14564

Orbit corrections for lost minor planets 457, 1038, 1161, 1297, determining new ephemerides for oppositions 05 p0829 A69-16704

Stable stationary positions for spacecraft determined by formulating variational equations for perturbing effects of earth triaxiality 06 p1006 A69-17565

Suboptimal guidance corrections for continuous thrust vehicle disturbances during minimum fuel rendezvous in Martian orbit, discussing physical and modified cost functional [AIAA PAPER 69-76] 06 p0956 A69-18081

Stellar galactic orbit perturbation by irregularities in distribution of gas cloud for motion inclined to galactic plane 07 p1223 A69-19634

Air density at 470 km from orbit of satellite 1966-118 A, confirming large semiannual variation 09 p1488 A69-21659

Upper atmosphere rotation perturbation effect on satellite orbit when scale height varies with height, showing inclination reduction 09 p1594 A69-21660

Motion of satellite of very oblate planet, investigating axisymmetric potential 10 p1774 A69-22969

Earth gravitational field effect on satellite orbits, noting elliptical motion in central force field, energy criteria and rotational ratios 10 p1776 A69-23295

Perturbing body influence on motion near triangular Lagrangian solutions of restricted elliptical three body problem applied to earth-moon system under solar perturbations 10 p1779 A69-23612

Deimos and Phobos mutual secular perturbations from calculated masses and orbital elements, using canonical systems of equations 10 p1780 A69-23615

Circumpolar satellite orbits under lunar and solar perturbations based on two fixed centers problem, considering large amplitude disturbances 10 p1780 A69-23616

Intermediate orbits to construct motion theory of natural satellites of all planets 11 p1952 A69-24253

Natural terrestrial satellites existence suggested by telescopic and photographic observations and artificial satellites orbital perturbations 13 p2344 A69-27642

Solar and lunar effects on motions of polar orbiting satellites, discussing variable intermediate orbits 14 p2521 A69-29460

Zonal harmonics of Legendre polynomial series of Jupiter attractive force function effects on motion of fifth satellite 14 p2521 A69-29463

First order secular and aperiodic perturbations in Keplerian orbital elements of synchronous satellite due to earth gravitational field eccentricity 14 p2521 A69-29466

Earth reflected radiation pressure and perturbing effect on satellites 15 p2599 A69-31324

Geopotential represented in ellipsoidal harmonics, discussing Lamé functions generation and rectangular-ellipsoidal coordinates relation and orbital elements perturbations 15 p2599 A69-31333

Earth figure parameters from satellite orbit dynamics, including potential on geoidal surface and scale factor for lengths 15 p2602 A69-31387

Satellite orbit evolution data applied to refinement of geophysical parameters, including upper atmosphere parameters and zonal harmonic coefficients in gravitational potential expansion 15 p2604 A69-31417

Satellite orbital resonances due to geopotential analyzed by asymptotic expansion for nearly circular or equatorial orbits 16 p2863 A69-32401

Relativistic effect in pericenter motion of comets and natural satellites from major semiaxes and eccentricities of natural bodies 17 p3044 A69-34174

Perturbations of planet motion in planetary coordinates, noting unperturbed motion 18 p3199 A69-34912

Polar flattening influence of Jupiter on artificial satellite motion around Callisto noting orbital perturbations 18 p3199 A69-34913

Satellite motion perturbations in vicinity of critical inclination, using Encke method of numerical integration 19 p3397 A69-35607

Orbits computation by Picard successive approximations method, discussing iterative numerical perturbation techniques 19 p3398 A69-35615

Stability of motions about triangular libration points in elliptic restricted three body problem [AAS PAPER 68-090] 20 p3595 A69-37175

Minor planets osculating elements computer calculated and tabulated 20 p3596 A69-37309

Comet Arend-Roland 1957 III orbit elements computer calculated and tabulated from worldwide observations, taking into account orbital perturbations caused by major planets 20 p3596 A69-37311

Initial and future orbits of comet 1959 IV Alcock determined considering Venus, Jupiter, Saturn, Uranus and Neptune perturbations, noting elliptical to hyperbolic orbit transition 20 p3597 A69-37319

Optimal transfers in central gravitational field, using formulas for perturbations of osculating Keplerian orbital elements, applied to singular reticent solutions [ONERA-TP-729] 20 p3604 A69-37752

Satellite position perturbation due to earth oblateness using Hansen method [AIAA PAPER 69-909] 21 p3807 A69-39341

Practical stability of highly eccentric orbits quasi-normal to ecliptic, discussing parameters influence on orbital lifetime with reference to approximate stability criteria [AIAA PAPER 69-926] 21 p3808 A69-39355

Perturbative effects of Jupiter moons on spacecraft flyby and postencounter heliocentric trajectories, noting precision targeting [AIAA PAPER 69-932] 21 p3809 A69-39361

Impulsive velocity correction determination method for precise stationkeeping of stationary satellite, discussing perturbations [AIAA PAPER 68-456] 21 p3817 A69-39757

Jupiter mass determined from observations of four minor planets perturbations 22 p4013 A69-40121

Galilean satellites perturbing effect on motion of fifth Jupiter satellite 23 p4214 A69-41730

ORBITAL ASSEMBLY

Expandable D 21 airlock scheduled for testing on NASA Orbital Workshop Flight based on elastic

materials technique, noting more complex chemically rigidized concept
[IAF PAPER SD-49] 02 p0334 A69-11949

Multiple impulse orbital departure window for manned interplanetary spacecraft, discussing launch delay, space assembly, refueling and checkout, etc
[AIAA PAPER 69-126] 06 p1010 A69-18065

Soviet space stations design based on orbital docking techniques for unrestricted mass size and number of modules, describing wheel shaped station
19 p3431 A69-36465

ORBITAL ELEMENTS

Equations of motion of satellite in rotating coordinate system, noting effects of precession and nutation on transformation of orbital elements
01 p0150 A69-10445

Smoothing and prediction of satellite orbit elements by stochastic approximation method, solving nonlinear equations system
01 p0158 A69-11319

Preliminary orbit determination, based on data collected during single pass by sensor, permitting preliminary orbital elements and data variance estimation
03 p0518 A69-14249

Diffuse meteor stream separation from sporadic background, using orbital elements of individual meteors
04 p0659 A69-15034

Comet Arend-Roland orbit, deducing interstellar origin from nongravitational orbital energy increase
04 p0660 A69-15036

Nongravitational impulses on short period comets
04 p0660 A69-15037

Braking and acceleration speeds and maximum magnitude during transfer from circular orbit having earth center as focus to elliptical orbit within circular orbit
06 p1007 A69-17578

Minimum fuel control of spacecraft orbital elements for transfers between elliptical orbits by low variable thrust propulsion, noting interplanetary trajectory optimization
06 p0955 A69-17579

Commensurability among pairs of mean motions of natural satellites of major planets and hypothesis of tidal evolution of satellite systems
07 p1223 A69-19638

Commensurability among pairs of mean motions of satellites of major planets and power law relation for orbital periods of satellites
07 p1224 A69-19639

Orbital elements of visual double star and O-C residuals, noting dynamical parallax and ephemerides
08 p1393 A69-20568

Nonisotropic mass ejection from components of close binary system effects on orbital elements for small initial eccentricity case
08 p1395 A69-20634

Canonical equations of planet satellite intermediate orbits using harmonics of gravitational potential
09 p1589 A69-21374

Dimensions of 19 variable eclipsing binaries from published photometric and spectral orbital elements
09 p1590 A69-21378

Catalog of orbital elements for periodic comets during perihelion passage
10 p1777 A69-23396

Orbits with small eccentricities and inclinations in generalized problem of two fixed centers, showing osculating elements relationship to intermediate orbit elements
10 p1779 A69-23613

Deimos and Phobos mutual secular perturbations from calculated masses and orbital elements, using canonical systems of equations
10 p1780 A69-23615

Equation derivation to determine optimal parameters of spacecraft orbital elements, considering constraints imposed on measured quantities
10 p1791 A69-24192

Processing of data obtained in continuous tracking of space objects using computer algorithms
10 p1791 A69-24193

Elliptic integrals to determine orbital elements time dependence in three body problem, estimating satellite lifetime
10 p1791 A69-24196

Dynamical effects of mass exchange in close binary systems ejection modes from point of view of orbital elements evolution
11 p1962 A69-25113

Triple system p Velorum, discussing coude spectra and published visual orbital elements
11 p1963 A69-25263

Micrometric and photometric measurements of coude spectra of magnetic variable HD 125248, showing spectroscopic binary nature and computing orbital elements
11 p1963 A69-25264

Computer method for solution of Banachiewicz graph analytic equivalent for parabolic orbits determination, noting geocentric distances variation
13 p2336 A69-27448

Algorithm for solving autonomous artificial satellite orbital elements by using successive approximations
13 p2296 A69-27687

Photoelectric yellow and blue observations of variable TZ bootis light variation and orbital elements, noting maxima and secondary minimum causes
13 p2348 A69-27808

Lacerta OB 1 B spectroscopic binaries periods and orbital elements, noting limits for secular variation
14 p2519 A69-29137

Secor 6 satellite /1966-51A/ orbital parameters determined from optical and radar observations noting use for upper atmosphere density and rotational speed studies
14 p2522 A69-29631

Nongravitational force dynamic effect and model for rotating cometary nucleus, including changes in orbital elements
14 p2524 A69-29713

Cometary tails maximum lengths compared with orbit parameters and absolute magnitudes, proposing classification scheme
15 p2689 A69-30566

Mimas-Tethys commensurability of motions and inclinations, calculating libration amplitude variation by numerical integration
16 p2861 A69-32241

Meteoritic matter distribution by calculating orbital elements of 12,500 meteors from radar data, using diversity reception for radio waves scattered at meteor trails
17 p3041 A69-33894

Distributions of close planet-comet encounters for various orbital elements, calculating trajectory by conic matching
18 p3195 A69-34433

Canonical equations of planet satellite intermediate orbits using harmonics of gravitational potential
18 p3198 A69-34762

Dimensions of 19 variable eclipsing binaries from published photometric and spectral orbital elements
18 p3198 A69-34766

Geocentric orbital elements determination of lunar particles expelled into space by meteorite impact, using spheres of influence method
18 p3202 A69-35330

Orbit parameters identification method based on given tracking data span applied to lunar orbiter tracking using Fourier analysis
19 p3401 A69-35916

Geometric determination of visual binary orbits, noting inadequacy of graphical method based on apparent orbit ellipse properties
19 p3403 A69-35968

Ar 39 content in chondrites interpreted for meteorite size, exposure age and orbital elements
19 p3411 A69-36101

Interplanetary dust sources investigation based on physical and orbital parameters, noting derivation from asteroids and meteorites
19 p3415 A69-36119

Network for fireball trajectories rapid analysis to recover meteorites and obtain orbital elements data, noting role of planetariums
19 p3295 A69-36121

Balloon satellite orbital time and eccentricity correlated, investigating earth shadow and solar radiation effects
19 p3427 A69-36628

Minor planets osculating elements computer calculated and tabulated
20 p3596 A69-37309

Comet Arend-Roland 1957 III orbit elements computer calculated and tabulated from worldwide observations, taking into account orbital perturbations caused by major planets
20 p3596 A69-37311

Visual binary star ADS 12447 orbit elements calculated using Zwiers method
20 p3598 A69-37466

Orbital elements of visual binaries Don 91 and ADS 9756 derived graphically, tabulating observations with ephemerides
20 p3600 A69-37480

Optimal transfers in central gravitational field, using formulas for perturbations of osculating Keplerian orbital elements, applied to singular reticent solutions
[ONERA-TP-729] 20 p3604 A69-37752

Spectroscopic orbital elements of eclipsing binary IZ Per determined from 22 spectra using Wilsing and Russell method
21 p3795 A69-38469

Orbital parameters of short-lived low altitude earth satellites assuming no atmospheric drag, no orbital precession and flat earth condition
21 p3798 A69-38626

Earth resources technology satellite /ERTS/ choice regarding local time of ascending node based on cloud cover and IR measurement considerations
21 p3798 A69-38628

Recurrence formulas for calculating Fourier expansions in elliptic motion in terms of eccentric and mean anomaly
[AIAA PAPER 69-910] 21 p3807 A69-39342

Satellite motion orbital elements dependence on large short impulse arbitrarily directed in space, analyzing optimal orbits transfer and thrust control
21 p3818 A69-39821

Satellite motion initial phase vector estimation for calculating satellite motion from selection of complete or increasing volume of measurements
22 p4033 A69-41088

Cometary and asteroidal orbital differences and similarities, emphasizing limiting cases to study orbital evolution of meteors
23 p4208 A69-41284

ORBITAL LAUNCHING

Multiple impulse orbital departure window for manned interplanetary spacecraft, discussing launch delay, space assembly, refueling and checkout, etc
[AIAA PAPER 69-126] 06 p1010 A69-18065

Nuclear solid core rocket engine performance for interplanetary orbital launch of spacecraft by multiorbit injection
[AIAA PAPER 69-535] 16 p2810 A69-32660

ELDO/PAS rocket motor for satellite launching from elliptic orbit apogee to synchronous orbit powered by ammonium perchlorate with organic binder and Al
17 p3022 A69-33604

ORBITAL MECHANICS

NT KEPLER LAWS

Bifurcation of closed orbits from equilibrium points of autonomous differential system
02 p0281 A69-12133

Monograph on orbit computation of doubly photographed meteors employing method of least squares, giving computer programs and tables of data printout
02 p0324 A69-12495

Saturn ring gravitational field perturbations of space vehicle orbit on flyby mission solved by particle motion perturbation theory
03 p0508 A69-13260

Hansen planetary theory basic function, discussing perturbations expansion into trigonometric series
03 p0514 A69-13781

Interplanetary orbits for probe launched from earth to reencounter earth, noting relationship to three body problem
03 p0514 A69-13782

Spacecraft orbital maneuvers by means of low thrust, discussing optimization and several orbital transfer examples
03 p0522 A69-14086

Equilibrium orientations of orbiting gyrostats, giving spectrum of solutions for bodies of varied shape and internal rotor angular momentum
03 p0522 A69-14246

Spacecraft trajectories computation from initial conditions by techniques involving construction of N body reference orbit
03 p0518 A69-14248

Preliminary orbit determination, based on data collected during single pass by sensor, permitting preliminary orbital elements and data variance estimation
03 p0518 A69-14249

Lambert problem of fitting conic to two position vectors with specified time interval solved numerically by Newton-Raphson iteration
03 p0518 A69-14250

Manifold of periodic orbits, developing methods to analyze and classify families of periodic orbits in conservative dynamical system with two degrees of freedom
04 p0653 A69-14611

Space flight launches, interplanetary transfer orbits, flyby orbits and capture orbits for solar probe with 0.3 AU perihelion and Jupiter satellite probe
04 p0657 A69-14826

Idealized point mass motion in axisymmetric gravitational field, discussing orbital stability about oblate planet

04 p0658 A69-14887

Hill surfaces in triangular restricted four body problem, deriving equation of surface of zero relative velocity

04 p0660 A69-15038

Optimum spacing of communication satellites on inclined circular synchronous orbits, applying figure 8 packing schemes

04 p0562 A69-15458

Orbital trajectories about Mars or Venus, considering reentry to earth, planet perturbation effect, total mission time and orbital distance from planet

05 p0823 A69-16042

Capture and control in conservative dynamical systems, analyzing orbital mechanics of derelict and pursuit spaceships

05 p0826 A69-16462

Orbit corrections for lost minor planets 457, 1038, 1161, 1297, determining new ephemerides for oppositions

05 p0829 A69-16704

Sun-orbit plane relationship effects on mission planning [AIAA PAPER 69-129]

06 p1011 A69-18093

Transfer orbits calculation between low and high satellite orbits, determining trajectories by method with minimum use of linearization

07 p1211 A69-18503

Analytic autonomous Hamiltonian differential equations with two degrees of freedom admitting unstable equilibrium point

07 p1215 A69-18732

Resonant long period orbits around Lagrange equilateral points, discussing formal expansions method for three body problem

07 p1225 A69-19719

Stellar orbits in galactic plane represented as generalized Keplerian motion

08 p1381 A69-19792

Numerical analysis of periodic solutions of restricted three body problem in sun-Jupiter system, noting genealogy of periodic orbits

08 p1382 A69-19874

Perturbation method in rectangular coordinates based on motions of Galilean satellites of Jupiter applied to nearly circular orbits of quasi-resonant systems

08 p1390 A69-20275

Five families of simple periodic symmetrical orbits in Hill limiting case of restricted three body problem, studying asymptotic forms

08 p1393 A69-20572

Nonisotropic mass ejection from components of close binary system effects on orbital elements for small initial eccentricity case

08 p1395 A69-20634

Canonical equations of planet satellite intermediate orbits using harmonics of gravitational potential

09 p1389 A69-21374

Periodic motion of satellite with magnetic damper along circular orbit, assuming small value of damping coefficient

09 p1609 A69-21761

Resonance relations of rotational and orbital frequencies of solar system planets and satellites estimated for statistical significance

10 p1771 A69-22852

Motion of satellite of very oblate planet, investigating axisymmetric potential

10 p1774 A69-22969

Orbits of asteroids surrounding commensurabilities with Jupiter, discussing theory for origin of Kirkwood gaps

10 p1778 A69-23604

Motion problem of heavy solid body about fixed point

11 p1918 A69-24785

Spacecraft orbit control laws determined by studying influence of controlling acceleration in plane perpendicular to absolute velocity vector

11 p1965 A69-25743

Ideal resonance problem with single critical term for case of libration solved by modified Poincare method, considering 24-hr satellite

12 p2152 A69-25800

Draconic period changes of satellite 1965-11-D /Cosmos 54 rocket/ during visual observations with Interobs

12 p2174 A69-26444

Draconic periods changes of satellites 1963 53A and 1964 76A, based on observations

12 p2174 A69-26446

Gauss method for Kepler equation ephemeris computation in nearly parabolic orbits, using expansions suitable for high speed computers

12 p2171 A69-27154

Photoelectric observations of blue light minima of U Geminorum variable Ex Hydrae indicating no change in orbital period

13 p2338 A69-27558

Optimum orbital transfer of material point subjected to reactive force with minimum mass loss, discussing Kepler motion kinematics

13 p2346 A69-27698

Restricted three body problem of conservative Hamiltonian systems with two degrees of freedom and mass ratio parameter, considering phase space around L sub 4

13 p2346 A69-27711

Comet Arend-Roland type-1 tail characteristics in cluding accelerating disturbance, outward-moving waves, tail inclination, etc

13 p2349 A69-27816

Orbital elements evolution of binary or planetary system with decreasing mass by nonlinear nonautonomous differential equations

14 p2519 A69-29138

Solar and lunar effects on motions of polar orbiting satellites, discussing variable intermediate orbits

14 p2521 A69-29460

Eclipsing close binary stars orbital planes spatial position determined from stellar emission polarization

15 p2688 A69-30560

Plane planetary orbits construction extended to nearly circular and quasi-plane orbits by generalizing perturbations method to problems in space

15 p2690 A69-30622

Photographically observed meteor orbits 1937-1963, noting overestimation of hyperbolic orbits due to observation errors

15 p2697 A69-31253

Stability of steady circular motions in systems with hidden variables analyzed by using Lejeune-Dirichlet theorem

16 p2804 A69-31621

Conditional trajectory stability associated with first integral compared with orbital stability on base of topological method

16 p2853 A69-31622

Periodic solutions of variational equations near equilateral equilibria, obtaining one parameter expansion of family of long period orbits

16 p2854 A69-31654

Hill method for satellite motion with reference to rectangular rotating axes system with origin at moon center of gravity, obtaining intermediate orbits

16 p2855 A69-31656

Cassini laws applied to moon and Mercury, determining relations between moment differences for spin vector, orbital angular-momentum vector and precessional velocity

16 p2861 A69-32239

Gravitational and magnetic torque effect on rotational motion of triaxial rigid body in regressing orbit about oblate primary mass

16 p2861 A69-32240

Hansen method of partial anomalies for cometary orbits applied to comet Encke perturbed by earth and compared with perturbations by numerical integration

16 p2863 A69-32400

Long range perturbations of satellites and asteroids with arbitrary inclination and eccentricity, illustrating motion around moon, oblate and spherical planets using energy integral

17 p3031 A69-33098

Canonical equations of planet satellite intermediate orbits using harmonics of gravitational potential

18 p3198 A69-34762

Satellite motion perturbations in vicinity of critical inclination, using Encke method of numerical integration

19 p3397 A69-35607

Optimal transfers between Keplerian orbits for time free case, considering hyperbolas, ellipses external to and intersecting attracting planet

19 p3399 A69-35669

Optimal impulse rendezvous of long duration between quasi-circular, coplanar or noncoplanar close orbits

19 p3400 A69-35674

Short term motion of lunar satellite, discussing third body disturbing functions and perturbation solution of nonsingular orbit elements

19 p3402 A69-35934

Orbital trajectories about Mars or Venus, considering reentry to earth, planet perturbation effect, total mission time and orbital distance from planet

20 p3606 A69-37951

Periodic orbits of Poincare and Schwarzschild types in motion of artificial satellite in disturbed gravitational field of axisymmetric oblate spheroid

21 p3795 A69-38441

Spectroscopic orbital elements of eclipsing binary IZ Per determined from 22 spectra using Wilsing and Russell method

21 p3795 A69-38469

Orbital parameters of short-lived low altitude earth satellites assuming no atmospheric drag, no orbital precession and flat earth condition

21 p3798 A69-38626

Spacecraft and boosters for earth resources surveys, discussing design, payloads, orbits, etc

21 p3799 A69-38629

Exploration capabilities provided by Jupiter gravity assisted trajectories compared to direct ballistic flight trajectories [AAS PAPER 68-116]

21 p3805 A69-39224

Encke type analytical-numerical integration for solving differential equations of modified set of Lagrange planetary equations, obtaining satellite ephemeris for orbit prediction [AIAA PAPER 69-908]

21 p3807 A69-39340

Orbital mechanics of near earth satellite arrangements /clusters/ for satellite service vehicle /SSV/ accessibility from orbital space stations [AIAA PAPER 69-929]

21 p3809 A69-39358

Kinematic and dynamic relations analyzed by vector method for motion time and orbital flight control of point

21 p3818 A69-39820

Spherical motion of solid body about fixed point with nonholonomic coupling, deriving equations for centrifugal moments of inertia effects on motion

21 p3773 A69-39840

Satellites resonant perturbations analysis, deriving mean mean motion formulas

22 p4035 A69-39968

Symmetric periodic orbits families of restricted three body problem, using two body problem

22 p4031 A69-40908

Minimum impulse time free transfer between neighboring noncoplanar almost circular orbits with line of nodes along common latus rectum [AIAA PAPER 68-94]

23 p4215 A69-41879

Sun-orbit plane relationship effects on mission planning [AIAA PAPER 69-164]

24 p4386 A69-43261

ORBITAL MOTION

U ORBITS

ORBITAL RENDEZVOUS

Handheld optical range finder for manned spacecraft orbital rendezvous, discussing target shapes and range errors

02 p0250 A69-12366

Rendezvous maneuvers for vehicle and elliptically orbiting targets, formulating relative motion of two bodies

04 p0658 A69-14828

Minimum fuel rendezvous maneuver for two space vehicles in circular orbit, considering propelled tracking equipment nonlinear equations of motion

05 p0823 A69-16036

Velocity increments for orbital transfer in satellite rendezvous in central Newtonian gravitational field by two impulse ballistic transfer method

05 p0789 A69-16046

Nonlinear equations of motion for rendezvous in circular orbits, pursuer using minimum fuel and pursued having no propulsion

06 p1014 A69-17571

Rendezvous maneuvers for fixed elliptical target orbit, discussing numerical solution of problem and suitability of various points of target ellipse for rendezvous

09 p1538 A69-21649

Optimal rendezvous between satellite and spacecraft, determining power and time optimal coplanar rendezvous in circular orbit

09 p1538 A69-21759

Optimum thrust control of satellite along given trajectory to rendezvous at zero velocity with orbited satellite

13 p2356 A69-27684

Optimal rendezvous maneuver of pursuing vehicle with minimum fuel expenditure in approach stage on elliptic and hyperbolic orbits

15 p2701 A69-31548

Rendezvous maneuver with minimum fuel in circular orbit solved without restrictive conditions for accelerations due to approach thrust
16 p2852 A69-31558

Minimum fuel multiple impulse orbital rendezvous for fixed transfer time near circular orbits
16 p2857 A69-32161

Optimal impulse rendezvous of long duration between quasi-circular, coplanar or noncoplanar close orbits
19 p3400 A69-35674

Trajectory optimization of space vehicle with continuous thrust based on regularized equations, comparing perturbation method for earth-Jupiter rendezvous transfer
[AAS PAPER 68-099] 20 p3595 A69-37173

Orbital rendezvous calculation in terms of adjoint variables vector associated with vehicle velocity vector
20 p3595 A69-37202

Velocity increments for orbital transfer in satellite rendezvous in central Newtonian gravitational field by two impulse ballistic transfer method
20 p3574 A69-37955

Rendezvous control law for spacecraft moving in central gravitational field along trajectory representing target vehicle Keplerian orbit
22 p4036 A69-40115

Optimal minimum fuel rendezvous maneuver variational problem, generalizing circular orbit results to conical orbits
22 p4028 A69-40754

ORBITAL SIMULATORS

U SPACE SIMULATORS

ORBITAL SPACE STATIONS

Future space programs as governed by cost limitations, suggesting development of economical launch vehicle for shuttling between earth and orbital space stations
02 p0326 A69-12680

Soviet space program /1969/ objectives, Soyuz vehicle and future missions
06 p1002 A69-17265

Orbital station projects, concepts and future uses
06 p1013 A69-17266

Commercial orbital space stations economics and potential markets, considering fisheries, ocean transportation, air traffic control, resources surveys, pollution reduction, etc
06 p1007 A69-17599

Engineering designs and hardware required for low risk flight of long duration manned space stations
06 p1007 A69-17601

Manned orbital space stations design, purposes and applications, balancing costs against benefits
06 p1019 A69-18237

Apollo telescope mount /ATM/ for solar experiments conducted from manned earth orbiting laboratory
10 p1791 A69-22871

Manned space stations for future space exploration, discussing earth-like environment, artificial gravity, human factors and time dependence
11 p1965 A69-25644

Orbital astronomy support facility research requirements analysis, discussing objectives and measurement needs, instrumentation, spacecraft and facilities, etc
18 p3206 A69-34369

Attitude control system for Apollo Telescope Mount, discussing selection features based on manned orbital space platform requirements
18 p3168 A69-34683

Space manufacturing operations program, discussing zero gravity effect during earth orbit flight, Apollo Applications Program Orbital Workshop Flight 2, etc
18 p3208 A69-35067

Materials and products fluid state processing in space, discussing g, zero-g and induced forces effect on fluid matter and process, cost and operational effectiveness
19 p3324 A69-35588

Navigation, guidance and control developments for manned space missions, discussing earth orbital exploration bases
19 p3369 A69-35801

Earth-orbiting manned space station as single facility base for power, volume, logistics, experimental equipment and data communications
19 p3431 A69-36464

Soviet space stations design based on orbital docking techniques for unrestricted mass size and number of modules, describing wheel shaped station
19 p3431 A69-36465

Radiation exposure during orbital flight assessed for adverse effect on space stations and laboratories personnel, discussing shielding and dose rate tables
20 p3481 A69-37339

Motion and stability of rotating connected two body space station satellite system, developing Lagrangian equations of motion and optimizing damping system parameters
[AIAA PAPER 69-919] 21 p3820 A69-39349

Orbital mechanics of near earth satellite arrangements /clusters/ for satellite service vehicle /SSV/ accessibility from orbital space stations
[AIAA PAPER 69-929] 21 p3809 A69-39358

Mass expulsion and momentum systems for orbiting space station attitude control optimized, considering reaction jet and control moment gyro systems
[AIAA PAPER 69-846] 21 p3822 A69-39376

Manned transport into orbit and manned orbital operations systems, considering systems selection factors and mission and cost influences
21 p3857 A69-39696

Apollo 11 mission and future space exploration prospects including moon base, manned space station, reusable shuttle vehicles, etc
23 p4211 A69-41477

Solar cell power systems for manned space stations, summarizing studies of battery power system designs
23 p4068 A69-42242

Nuclear reactor/thermoelectric power system design for manned orbiting space station, discussing station integration and operation
23 p4187 A69-42256

Pu-238 isotope organic Rankine cycle system analyzed for one year manned space station, using modified H-521 Space Power computer program
23 p4188 A69-42264

Radioisotope thermal energy /RITE/ source for integrated life support systems for two man 180 day space station mission, determining optimum material selection and design details
23 p4189 A69-42268

NASA programs for space stations and base development, discussing housing and equipment capacity, manned and unmanned stations and shuttlecraft for interstation travel
23 p4224 A69-42456

Space experimental design based on manned vs unmanned spacecraft value for multipurpose low cost flexible space station in low earth orbit
23 p4223 A69-42457

Soviet space flights preliminary to formation of scientific space station
24 p4391 A69-42798

Apollo Applications Program /AAP/ spacecraft, describing contributions to space station engineering
[AAS PAPER 69-491] 24 p4392 A69-42838

ORBITAL TRANSFER

U TRANSFER ORBITS

ORBITAL VELOCITY

Icarus observation by Trepied-Metcalf method, tables show Icarus retreat and advance and velocities of eight asteroids neighboring earth
05 p0819 A69-15698

Linear multichannel spatial motion control systems for vehicles orbiting in earth atmosphere at supersonic velocities
21 p3766 A69-39645

ORBITAL WORKSHOPS

Materials processing in space, suggesting electronic single crystals preparation, materials melting and utilization of low g earth orbit environment
19 p3324 A69-35589

ORBITALS

U ELECTRON ORBITALS

U MOLECULAR ORBITALS

ORBITER PROJECT

NT LUNAR ORBITER

Crater Copernicus photograph, discussing misinterpretation of Orbiter 2 lunar surface photograph on basis of effective temperature contours analysis
01 p0154 A69-10898

NASA Lunar Orbiter Program of lunar photography from orbiting spacecraft
21 p3794 A69-38377

ORBITING ASTRONOMICAL OBSERVATORY

U OAO

ORBITING GEOPHYSICAL OBSERVATORY

U OGO

ORBITING SATELLITES

U ARTIFICIAL SATELLITES

ORBITING SOLAR OBSERVATORY

U OSO

ORBITS

NT CIRCULAR ORBITS

NT EARTH ORBITS

NT ECCENTRIC ORBITS

NT ELLIPTICAL ORBITS

NT EQUATORIAL ORBITS

NT INTERPLANETARY TRANSFER ORBITS

NT LUNAR ORBITS

NT PARKING ORBITS

NT PERIHELIONS

NT PLANETARY ORBITS

NT POLAR ORBITS

NT SATELLITE ORBITS

NT SOLAR ORBITS

NT SPACECRAFT ORBITS

NT STATIONARY ORBITS

NT TRANSFER ORBITS

NT TROJAN ORBITS

NT TWENTY-FOUR HOUR ORBITS

Parallax and orbital motion of spectroscopic binary Tau Persei determined from Sproul refractor photographs
13 p2349 A69-27812

Photographic recording of parallax, proper motion, acceleration and orbital motion of Barnards star, noting mass ratios to jupiter
13 p2349 A69-27813

ORDER-DISORDER TRANSFORMATIONS

Order-disorder in alloys with several phase transition temperatures, discussing crystal lattices, interstitial alloys, atomic and magnetic ordering
11 p1936 A69-24702

Pressure effects on hcp crystalline lattice alloys order-disorder transformations
11 p1937 A69-24704

Young modulus temperature dependence and order-disorder transformations in ternary nickel alloys
11 p1904 A69-24705

X ray detectable preferred disorder in solids by shock loading studied in Ainsworth meteorite and in hexagonal alpha silicon dioxide
15 p2671 A69-31538

Orthopyroxenes cooling history, studying order-disorder transitions between ferrous iron and magnesium
20 p3523 A69-37518

Order-disorder transitions in solid hydrogen, discussing model to explain molecular rotation angular momentum operator fluctuations
24 p4350 A69-43119

ORDINATES

U COORDINATES

ORDNANCE

Nonlinear equations of motion approximate solution, determining ordnance weapons aerodynamic stability coefficients from angular motion as functions of angle of attack
[AIAA PAPER 69-135] 06 p0863 A69-18120

ORES

U MINERALS

ORGAN WEIGHT

Body weight and organ sizes in hibernating cold and warmth adapted golden hamsters, discussing lungs, heart, kidney, pancreas and liver weight increases
23 p4084 A69-41462

ORGANIC ALUMINUM COMPOUNDS

Lewis acidity of alanes, discussing interactions of trimethylalane with amines, ethers and phosphines
07 p1074 A69-18630

ORGANIC CHEMISTRY

Heuristic Dendral program to mechanize inductive inference in organic chemistry to determine isomers in chemical compounds
07 p1075 A69-19484

C-nitroso compounds chemistry covering various nitrosation reactions connected with reduction and deoxygenation
20 p3484 A69-37486

Organic geochemical investigations of lunar rock samples based on analysis methods for carbonaceous meteorites and early Precambrian sedimentary rocks
20 p3476 A69-37616

ORGANIC COMPOUNDS

NT ACETIC ACID

NT ADENINES

NT ADENOSINE TRIPHOSPHATE [ATP]

NT ALANINE

NT AMINO ACIDS

NT CHOLINE

NT COENZYMES

NT CYSTEINE

NT FATS

NT FATTY ACIDS

NT FLUOROCARBONS

NT FLUOROHYDROCARBONS

NT GLUTAMIC ACID
 NT GLYCINE
 NT LEUCINE
 NT LYSINE
 NT METHIONINE
 NT NUCLEOTIDES
 NT OXIDASE
 NT PEPTIDES
 NT PYRIDINE NUCLEOTIDES
 NT TRYPTOPHAN
 NT URIDYLIC ACID

Electric field control of growth rates of insulating organic crystals from vapor phase

01 p1035 A69-10140

Compatibility of inorganic azides with organic explosives from elevated temperature interactions using trinitrobenzene as model

02 p0304 A69-12499

Burning ability and inflammability of mixtures of powdered Mg, Al, Mg alloys or Al alloys and C-H-O organic compounds

02 p0355 A69-12669

Far IR and Raman spectra of ethylene carbonate, gamma butyrolactone and cyclopentanone, noting consistency with hindered pseudorotation

02 p0206 A69-12723

Sulfur-organic compounds association with aromatic hydrocarbons, noting oxidation inhibiting effect on petroleum oil

03 p0494 A69-13800

Photocurrent carriers recombination in organic semiconductor rhodamine B films analyzed as function of illumination

03 p0489 A69-13890

Organic plasticizers molecular vaporization process kinetics, using isothermal and nonisothermal kinetic methods

04 p0620 A69-14956

Temperature dependence of laser induced damage in plastic Q switch made of polyethylmethacrylate and vanadyl phthalocyanine for ruby laser

06 p0936 A69-17777

Organic compounds /metabolites/ extracting technique from nutrient media of *Chlorella* cultures indicate unsaturated amine and phenol composition

08 p1262 A69-19833

Inhomogeneous laser beams self focusing effects in organic liquids recorded on bases of induced stimulated scattering

08 p1326 A69-20538

Photochemical production of reduced organic compounds of C and N in primitive earth atmosphere

09 p1444 A69-21465

Polymerization of monomers considered for direct synthesis of iminobenzylidene

10 p1651 A69-23308

Abiogenic synthesis of prebiological membranes under assumed primitive earth conditions by UV radiation of alkanes on phosphate and Mg ions aqueous solutions

11 p1828 A69-25462

Photocurrent carriers recombination in organic semiconductor rhodamine B films analyzed as function of illumination

11 p1939 A69-25691

Description and automated research of correlation /DARC/ for establishing quantitative relationships between topology and properties of chemical substance

12 p2026 A69-26361

Organic analysis of Pueblito de Allende meteorite using thin layer chromatography or combined gas chromatography and mass spectrometry

13 p2337 A69-27520

Organic semiconductors physical properties and intermolecular charge transfer between donor and acceptor

13 p2317 A69-27799

Organosilicon-containing derivatives of 2-aminoethanethiols and 2-aminoethanethiosulphuric acids as radiation protective agents

13 p2210 A69-28486

Heterocyclic-aromatic organic polymer adhesives used for high temperature structural purposes, discussing processing, testing, formulating and impact on basic research

14 p2469 A69-29346

Life origin and organic-inorganic systems, emphasizing protein colloids-mineral salts interactions at protocell stage

14 p2408 A69-29632

Diperchlorates different in organic part of structure and explosive transformation heats, showing strong dependence of combustion velocity on pressure

15 p2716 A69-30108

Mass spectroscopic structural analysis of organic compounds, discussing computer application to data recording, processing and evaluation

18 p3099 A69-34553

Regenerative life support system development, considering synthesized organic compounds and microorganisms as foods for long duration space missions

20 p3477 A69-37623

Acid fraction extraction of Green River shale identified by gas chromatography-mass spectrometry-computer system, noting trimethyl pentadecanoic acid

21 p3669 A69-38983

Volatile oxygen organic compounds subjected to RF electrodeless discharge, explaining product distribution in terms of reaction sequences

21 p3670 A69-39737

Norwegian lichen species chemical investigation for aromatic compounds, hydroxy fatty acids, amino acids, soluble and bound sugars

23 p4080 A69-41428

High temperature pyrolysis of simple organic molecules in shock tube, considering diatomic C formation and decay rate

23 p4113 A69-41693

DENDRAL program used to construct all possible acyclic structural isomers of C, H, N and O

23 p4114 A69-42214

ORGANIC COOLANTS

Organic quenchant additive for distortion free heat treatment of dip-brazed aluminum parts

09 p1504 A69-22065

ORGANIC FLUORINE COMPOUNDS

U FLUORINE ORGANIC COMPOUNDS

ORGANIC LASERS

Organic dye lasers energy characteristics excited by monochromatic radiation, investigating radiation absorption during transitions from lower to higher electron-vibrational levels

01 p0090 A69-10381

Frequency and time dependent gains of dye solution lasers for pumping by lasers and flashlamps

02 p0257 A69-12616

Organic dye laser frequency variation with temperature, noting absorption and fluorescence spectra

02 p0258 A69-12617

Dye solution laser wavelength shift and simultaneous oscillations at different wavelength ranges for pumping by another dye laser

02 p0258 A69-12620

Frequency mixing of organic dye solution laser radiation with ruby laser radiation, showing broader UV spectrum

04 p0610 A69-14424

Optical generation in organic luminophor solutions in 400-650 nm range

04 p0612 A69-15374

Critical population inversion for xanthene dye solution laser, analyzing optical loss due to triplet state concentration

05 p0773 A69-16307

Laser based on xanthene series dyes and excited by neodymium laser second harmonic radiation, noting radiation spectra

06 p0932 A69-16914

Lasing threshold and spectral characteristics of organic dye solutions, using excitation of second harmonic of monopulse ruby laser

06 p0933 A69-17255

Light generation by lasing organic dye liquid solution with negative absorption on activator molecules and induced combination scattering for solvent molecules

06 p0933 A69-17256

Mode locked Nd glass laser to pump organic dye laser, obtaining continuously tunable picosecond pulses

06 p0935 A69-17759

Time dependent emission spectra from flashlamp pumped organic dye lasers recorded with image converter, comparing dye characteristics

06 p0936 A69-17901

Organic lasers, discussing coherent laser light emission induced from organic dye molecules

07 p1149 A69-18908

Organic dye lasers characteristics, describing broad continua production for nanosecond absorption spectroscopy

07 p1150 A69-19047

Triplet-triplet transitions for Q switching, examining organics for passive Q switches

09 p1520 A69-22682

Pulsed tunable lasers, emphasizing dye lasers for visible and near visible light in specialized spectroscopy

11 p1893 A69-24343

Dye lasers CW operation feasibility, showing sufficient quenching of rhodamine 6G triplet state by oxygen dissolved in methanol

11 p1893 A69-24344

Liquid lasers properties and composition including organic complex compounds, organic dyes, rare earth elements in polyphosphoric acid, etc

11 p1893 A69-24353

Organic cyanine dye solution laser pumped by Q switched ruby and another dye laser, discussing spectral distribution and modes

11 p1900 A69-25580

Organic dye lasers energy characteristics excited by monochromatic radiation, investigating radiation absorption during transitions from lower to higher electron-vibrational levels

12 p2109 A69-26676

Neodymium laser emission of organic molecules in UV region noting molecular absorptivity and fluorescence

13 p2271 A69-27657

Optical generation in organic luminophor solutions in 400-650 nm range

16 p2797 A69-32121

Frequency and time dependent gain characteristics of dye lasers, using computer program for rate equations for populations

17 p2980 A69-33025

Lasers based on organic dye solutions, discussing operation, structural formulas, absorption and luminescence spectra

20 p3555 A69-38011

Mode locking of organic dye laser by pumping laser with mode locked pulse train from Nd-glass laser, obtaining spectral bandwidth

21 p3740 A69-39545

Flashlamp-pumped dye laser for resonance scattering studies of upper atmospheric composition, describing laser construction and tuning

22 p3962 A69-40440

Flashlamp-excited organic dye lasers capable of tunable emission throughout most of visible spectrum

22 p3966 A69-41219

Low energy ultrafast flashlamp systems as optical pumps for lasers using fast decaying fluorescent materials /organic dyes/

23 p4174 A69-42187

ORGANIC LIQUIDS

Electro-optical measurements to determine intermolecular interaction temperatures in organic liquids compressed by shock waves

02 p0230 A69-11979

Q switched ruby laser nonlinear absorption in optically transparent organic liquids attributed to two quantum process with large cross section

03 p0439 A69-13055

Power generation in combat environment by tested self contained organic Rankine silent engine, discussing working fluid properties

07 p1058 A69-18309

Emission from solutions of organic luminophores excited by harmonics of Q switched neodymium laser

12 p2104 A69-26030

Kerr constant verification device to study electrooptic liquids properties

12 p2084 A69-26148

Gas chromatography based on sampling gas-vapor phase at liquid surface for determining volatile oxygen containing compounds in biological media

13 p2216 A69-28627

Electro-optical measurements to determine intermolecular interaction temperatures in organic liquids compressed by shock waves

15 p2561 A69-30264

Dielectric breakdown thresholds and cavitation in organic liquids observed during Q switched and pulsed ruby radiation

17 p2979 A69-32826

Liquid filter cells design with emphasis on filters usable for inorganic and organic liquids

21 p3770 A69-38679

Rankine cycle power systems with reciprocating engines using organic working fluids, discussing engine development, system characteristics, etc

23 p4067 A69-42237

Stress corrosion cracks propagation from fatigue precrack in Al alloy exposed to organic liquid environments

23 p4178 A69-42452

ORGANIC MATERIALS

Organic matter signals in carbonaceous meteorites, discussing possible relation to extraterrestrial life and origin

11 p1953 A69-24342

Oriented composites obtained from organic system under various directional solidification conditions
13 p2287 A69-28680

Sterile soil from Antarctica found to contain organic carbon, noting significance for biological exploration of Mars
16 p2746 A69-31552

Solid lubricants on molybdenum disulfide base at various temperatures and low pressures, noting film mass losses and possible use with organic materials under high vacuum
16 p2793 A69-31561

Gas chromatographic and mass spectrometric analyses of alicyclic hydrocarbons from Carboniferous organic materials, noting alkane distribution and evolutionary histories
17 p2917 A69-34184

Gas chromatograph-mass spectrometer combination for in situ analysis of lunar organic matter, describing instrument design and operation
18 p3113 A69-34238

Organic geochemical investigations of lunar rock samples based on analysis methods for carbonaceous meteorites and early Precambrian sedimentary rocks
20 p3476 A69-37616

Biocrystallography of organic form and structure emphasizing liquid crystals, polymers, epitaxy, inclusion compounds, electrical properties, prelife compounds, etc
21 p3656 A69-38922

Meteoritic organic matter origin, discussing time-of-flight mass spectrometer combined with gas chromatographic capillary column
22 p4012 A69-40085

Flame resistant organic fiber in cross linked polymer structure, discussing properties and aerospace applications
24 p4337 A69-43424

ORGANIC NITRATES

U CELLULOSE NITRATE
U NITROGLYCERIN
U PETN

ORGANIC PHOSPHORUS COMPOUNDS

NT URIDYLIC ACID

Structural phospholipoprotein isolated from hydrogenomonas facilis and Neurospora crassa
22 p3871 A69-40049

ORGANIC SILICON COMPOUNDS

Polymers and organic optical cements transparent in 1 to 13 micron IR region, noting organosilicon resin
08 p1336 A69-20387

Synthesis of N-/trimethylsilylalkyl/ diamines and N-/trimethylsilylalkyl/-N-/2-mercaptoethyl/ diamines, determining structure by IR spectra
15 p2561 A69-30414

Carbon fiber reinforced plastics properties improvement by applying organosilanes, discussing silanol bond formation
16 p2803 A69-31806

Gravimetric and IR absorption spectra analysis for determining heat resistance and chemical changes in organosilicon resins during heating
17 p2992 A69-33744

Glass fiber laminates based on epoxy organosilicon resins, discussing various hardeners effects on strength, etc
19 p3358 A69-35903

Silico-organic liquid water repellant coatings for increasing binder adhesion to glass fiber in glass fiber reinforced plastic materials of aircraft components
21 p3752 A69-38876

Soviet book on silicoorganic protective coatings preparation, physical, chemical and operational characteristics, with emphasis on silicates and metals
24 p4336 A69-43232

ORGANISMS

Changes in organism during sudden decompression, analyzing pressure equalization, dissolved gases transformation and body fluids vaporization
01 p0020 A69-10753

Acceleration, hypoxia and stress effects on humans and animals, noting latent functional disorders of organisms requiring special techniques for detection
02 p0197 A69-11488

Objective evaluation of metabolic reactivity of organism based on biophysical model compared with experimental individual
06 p0874 A69-17595

Electrokinetic converter of biochemical parameters for diagnosis and control of organism behavior, noting biomechanical utility
14 p2409 A69-29471

Gravity independence of life processes in terrestrial organisms concluded from zero gravity experiments with algae, hatched larvae, etc
18 p3095 A69-34692

Organism growth physiology based on decisive enzyme reactions, considering synthesis of biological proteins from DNA and molecular life processes
21 p3652 A69-38787

Biological clocks, discussing circadian rhythms of organisms using animal experiments and physical oscillator model
21 p3653 A69-38895

Microwave absorption by biological materials, noting energy distribution between reflected, transmitted and absorbed radiation as function of medium physical properties
24 p4270 A69-42574

ORGANIZATIONS

NT BUREAUS [ORGANIZATIONS]

Organizational behavior of scientists noting working environments, effectiveness of work sections, research management and organizational development
08 p1423 A69-21124

Organization and manpower utilization in R and D, determining criteria for organizational form selection
08 p1423 A69-21155

Research and development organizations under pressure of corporate assessment and systems management approach, suggesting core-technology structure and training
12 p2192 A69-26732

Aircraft accident investigation procedures in Canada for routine/major accidents and public inquiries, outlining organization
13 p2201 A69-27540

1967 Space Treaty legal aspects of consultation, suggesting international permanent body setup for resolving technical and political matters
20 p3636 A69-37111

Book on law making in International Civil Aviation Organization covering membership problems, air navigation and transport safety, settling of disputes, etc
23 p4240 A69-41297

Communication in large organizations, describing internal communication model
24 p4419 A69-42930

ORGANIZING

Engineer performance related to organizational factors, discussing colleague contact, work diversity, number of subordinates and involvement in work
15 p2721 A69-31069

Organizational identification of scientists as professional employees, exploring degree of loyalty and perceived self prestige
21 p3855 A69-38765

Safety engineering programs for aircraft design, discussing organizational relations, failure and operational safety analyses
22 p3867 A69-41132

ORGANOMETALLIC COMPOUNDS

NT CHLOROPHYLLS

NT HEMOGLOBIN

NT ORGANIC ALUMINUM COMPOUNDS

NT OXYHEMOGLOBIN

Optical absorption coefficients for triphenylmethylarsonium tetracyanoquinodimethane complex single crystal, evaluating reflectance
01 p0140 A69-10934

Chemical nitrogen fixation methods for life support systems, discussing organometallic chlorides and bromides
03 p0382 A69-14198

Absorption and emission spectra of ruthenium 2 complexes dissolved in rigid glasses, discussing crystal field theory and luminescence
07 p1200 A69-19219

Synthesis and nucleophilic reactions of stable alpha-bromoorganolithium reagent
07 p1074 A69-19479

Liquid lasers properties and composition including organic complex compounds, organic dyes, rare earth elements in polyphosphoric acid, etc
11 p1893 A69-24353

Analytical, IR absorption and polarographic analysis of cyclic niobium /V/ and tantalum /V/ esters
11 p1832 A69-24575

Additions of dialkyl and diaryldithiophosphates of Ba, Ca, Zn, Pb and Ni as antioxidants and corrosion inhibitors for hydrocarbons
12 p2027 A69-27091

Catalytic activity enhancement of complex Co/III/ compounds on standing explained by hydrated Co/II/ ions appearance
17 p2988 A69-33433

ORGANS

NT BLADDER

NT ESOPHAGUS

NT KIDNEYS

NT LIVER

NT LUNGS

NT PITUITARY GLAND

NT STOMACH

Histological investigation of internal organs of mice exposed to atmosphere with high oxygen content
05 p0709 A69-16513

Histological investigation of internal organs of mice exposed to atmosphere with high oxygen content
18 p3096 A69-34732

Histological changes in internal organs of rats after exposure to 400 r fast neutron dose, showing destructive processes followed by compensation reactions of cellular proliferation
21 p3659 A69-39062

ORGUEIL METEORITE

Magnetite content of type I carbonaceous meteorite from quantitative X ray diffractometry of Orgueil meteorite
02 p0328 A69-12729

Sporopollenin content of Orgueil and Murray meteorites as evidence for extraterrestrial life
21 p3662 A69-39617

ORIENTATION

Oriented composites obtained from organic system under various directional solidification conditions
13 p2287 A69-28680

Orientation distribution of lineal and areal elements in space, expanding density function definition of two dimensional lineal array
14 p2470 A69-29363

Fracture kinetics of biaxial oriented polymethyl methacrylate, discussing crack development and propagation as compared to unoriented polymer
18 p3162 A69-35354

Surface grains orientation effect on fatigue behavior in polycrystalline Al, noting strain hardening role in failure
20 p3561 A69-37597

Auroral arcs orientation curves for IQSY evaluated from all sky camera data, comparing results with IGY curves
24 p4308 A69-43009

ORIFICE FLOW

Gas jet interaction with supersonic flow during injection from orifice of flat body, investigating Mach number, orifice diameter and jet effects on flow pattern near injection
01 p0005 A69-10357

Discharge coefficient nondependence on Reynolds number demonstrated by measurement at orifices with sharp edges
01 p0006 A69-10362

Downstream pressure asymmetry effect on efflux angle and contraction coefficient of incompressible jet from two dimensional orifice
02 p0231 A69-12075

Flow rate effect on flow pattern of gas escaping through lateral hole of arbitrary depth
04 p0586 A69-14274

Large signal vortex amplifier analysis using load lines to evaluate series orifice and vortex flow control valve characteristics
10 p1639 A69-23558

Venturi meter design, discussing effects of turbulent velocity fluctuations, hole size and internal geometry on differential pressure measurement
11 p1880 A69-24468

Mass flow rates for nearly free molecular flow through two dimensional slit for several tank pressure ratios
11 p1874 A69-25357

Load capacity, stiffness and flow requirement of capillary and orifice compensated oil lubricated externally pressurized rectangular thrust bearings
12 p2102 A69-26239

Molecular flow network theory extended to pulsed operation with gases mixtures having various molecular weights
13 p2247 A69-28085

Exhaust plume rarefaction from sonic orifice, considering continuum to transitional behavior for perfect gas
[AIAA PAPER 69-657] 17 p2892 A69-33465

Servovalve orifice characteristics described by discharge, flow or loss coefficients for laminar and turbulent flow, noting use of Mises model
19 p3256 A69-36712

ORIFICES

- Orifice compensated hydrostatic face seal under pressure and thermal loading for aircraft gas turbine [ASME PAPER 68-WA/LUB-6]
05 p0768 A69-16131
- Controllable sonic flow orifice, discussing mass flow rate, area and upstream stagnation pressure
10 p1693 A69-23343

ORION CONSTELLATION

- Far UV spectra of O and B stars in Orion photographed from Aerobee rocket, describing wavelength measurements and line identifications
02 p0327 A69-12712
- Orion nebula flare type variable stars amplitudes, light curve sections and stability
06 p1002 A69-17264
- Three color photoelectric observations of stars near Orion Nebula, discussing gravitational contraction stars and color magnitude diagram
08 p1384 A69-20055
- Paschen line intensity measured as function of position across Orion Nebula
08 p1384 A69-20058
- Electron temperature of Orion Nebula at 6750 K from intensities of hydrogen n alpha lines, discussing Stark broadening
08 p1398 A69-20776
- Chemical composition of diffuse Orion Nebula and stars compared for lighter elements, considering solar system formation from interstellar medium
08 p1402 A69-20908
- Abundance analysis of B3 V star in Orion association, noting titanium and strontium overabundance and oxygen underabundance
08 p1407 A69-21133
- Molecular hydrogen in Orion dark cloud from observed faint emission
09 p1599 A69-22191
- Double structure in IR near Trapezium region of M42 in Orion Nebula center
10 p1786 A69-24105
- IR spectral distribution from region between stars of Trapezium in Orion Nebula
10 p1786 A69-24106
- Atomic H Lyman-alpha interstellar absorption line in theta Orionis spectrum, showing equivalent width relations to H column density and spin temperature
15 p2695 A69-30890
- Radio map of Orion A region, resolving M 42 and M 43 nebulae at 1.94 cm wavelength, noting optical photographs comparison
17 p3035 A69-33609
- Bok globules in Orion nebula, deriving temperature and density data
22 p4022 A69-40465
- High radial velocity matter of bright region near Trapezium in Orion Nebula, determining electron density lower limit and mean velocity
22 p4029 A69-40769
- Rocket measurement of far UV spectral intensity of theta Orionis for far UV interstellar extinction law in Orion nebula region
22 p4030 A69-40770
- Orion nebula isophotal contours optical observation for three continuum colors /blue, yellow and IR/ and H alpha
22 p4031 A69-40942
- Beta Orionis spectral line profiles data used to study atmospheric structure
24 p4391 A69-43804

ORIONID METEOROIDS

- Ionospheric ion composition at 130-155 km during meteor shower Orionides activity from geophysical rocket-borne RF mass spectrometer data
15 p2603 A69-31406

ORNITHOPTER AIRCRAFT
U RESEARCH AIRCRAFT

OROGRAPHY

- Three term formula for describing vertical wind velocity distribution in upper boundary layer of atmosphere, taking into account friction and orography effects
02 p0240 A69-11708
- Earth orography influence on climatological distribution of wind and geopotential fields, stressing central asiatic mountains role in atmospheric circulation
14 p2478 A69-29835
- Alpine effects on wind field at synoptic scale using potential-vorticity equation, discussing deflection angle dependence on potential temperature distribution
15 p2650 A69-31445

- Jet stream blocking process simulation using geostrophic system of equations, considering effects of orography and contrast heating due to land-sea distribution
16 p2809 A69-32602
- Lee waves and orographic wind phenomena in Rocky Mountains near Boulder, noting stratospheric standing gravity waves and turbulence sampled by HI-CAT U-2
17 p2999 A69-33738
- Friction and orography effects on vertical currents in planetary boundary layer and numerical forecasting of baric field
21 p3758 A69-38837
- Precambrian crustal geotectonic evidence of earth radius expansion based on dated orogenic fold belts distribution
22 p3936 A69-40182
- Orographic inhomogeneities of underlying surfaces for radiating atmospheric waves formation, deriving formulas for plane stable atmosphere
23 p4185 A69-42492

ORRERIES

U ASTRONOMICAL MODELS

ORTHICONS

U IMAGE ORTHICONS

ORTHO HYDROGEN

NT TRITIUM

- Proton spin-lattice relaxation time in dilute liquid and gas solutions of orthohydrogen in parahydrogen, noting dependence on temperature, density and composition
06 p0961 A69-17141
- RF spectra for hyperfine structure of orthohydrogen molecular ion, calculating doubling constant for vibrational effects
15 p2693 A69-30784

ORTHOGONAL FUNCTIONS

- Iterative method of determining orthogonalized bases for representation of sampled data signals
03 p0391 A69-13231
- Irregular Sturm-Liouville first and higher order perturbation problem in boundary layer theory providing analytical approximations to complete orthogonal set of characteristic functions
04 p0590 A69-15001
- Digital computer optimization of representation of sampled data signals on orthogonal basis, using iterative method
06 p0901 A69-17363
- Wave reflections due to rotationally symmetrical jump in circular waveguide cross section, using orthogonal expansion to solve resulting boundary value problem
11 p1855 A69-25622
- Square matrices decomposition into orthogonal and triangular matrices products for computer storage applications
13 p2290 A69-28485
- Orthogonal polynomials for solving plane elasticity theory boundary value problems without constructing mapping functions, noting applications
17 p3067 A69-34144
- Polynomial bases for orthogonal group irreducible representations, rederiving Wigner coefficients
18 p3164 A69-34807
- Data compression using orthogonal functions, design curves for given functions, signal characteristics and error avoidance
18 p3103 A69-35060
- Orthogonal functions for determining atmospheric vertical temperature profile from satellite measurement of earth outgoing radiation in carbon dioxide absorption band
19 p3303 A69-36409
- Orthogonal polynomials in three dimensional contact problems without friction, discussing construction of kernels over finite and semiinfinite intervals
22 p4041 A69-40113
- Iterative and vectoral methods for correcting computed direction cosine matrix errors
23 p4134 A69-42543

ORTHOGONAL MULTIPLEXING THEORY

- Scattering matrix for pattern forming circuit for multiple beam antenna arrays with interacting elements, noting orthogonal pattern optimization
09 p1469 A69-22627

ORTHOGONALITY

- Open and closed path orthogonal analysis for structural network
03 p0526 A69-13735

Orthogonality of natural oscillation modes of shells of arbitrary geometry, using equations of motion from Vlasov engineering moment theory
05 p0840 A69-16200

Mean number of polarization coefficient modulus zero crossings for field reduced at reception point to uncorrelated orthogonally polarized components
05 p0720 A69-16445

L-step orthogonalization of Bose-Chaudhuri-Hocquenghem codes
06 p0903 A69-17532

Generalized orthogonality principles and expansion schemes for forced response of partial differential equations, noting applicability to rodlike structures
09 p1533 A69-21975

Extremal controlled plants identification by Chebyshev orthogonal polynomials, comparing results with regression analysis
11 p1861 A69-25713

Mean number of polarization coefficient modulus zero crossings for field reduced at reception point to uncorrelated orthogonally polarized components
16 p2753 A69-32478

Asynchronous gyrostat postimpact drift direction found orthogonal with respect to initial impulse by averaging method
19 p3311 A69-36192

N symmetric matrices orthogonal integrity basis, considering product traces, polynomial invariants, tensor groups, etc
20 p3624 A69-37587

Terrain slope estimation of position errors of differential corrections in orthophoto production
22 p3951 A69-41245

Optical interpolation for GZ-1 orthoprojector in storage mode, noting electronic contour plotter
22 p3951 A69-41247

Automatic contour plotting for orthoprojector based on adjacent profiles and linear interpolation
22 p3951 A69-41248

ORTHOGRAHY

U HANDWRITING

ORTHONORMAL FUNCTIONS

- Matrix elements calculation for one dimensional quantum-mechanical problems using transformation theory
04 p0632 A69-14866
- Orthonormal aspect on vibration modes for nonuniform beams, evaluating normalization for end conditions by using Rayleigh technique
14 p2534 A69-29319
- Optimum order for column orthonormalization of sparse matrices, applying results to Gram-Schmidt and Householder methods
15 p2644 A69-30425
- Orthonormalization methods applied to heat conduction, convection and radiation problems, noting digital computer programs modifications
18 p3229 A69-34662

ORTHOSTATIC TOLERANCE

- Cardiovascular changes in male students during tilt and negative pressure tests with bed rest studied from heart rate, blood pressure and leg volume measurements
01 p0021 A69-11334
- Cardiac function changes during orthostatic tests and problems in predicting reactions of cosmonauts in flight
03 p0381 A69-14229
- Orthostatic intolerance, with assessment of circulatory problem of weightlessness in prolonged space flight
06 p0873 A69-17016
- Clinical spectrum of postural hypotension, treating vasodepressor syncope, orthostatic arterial anemia and idiopathic orthostatic hypotension
06 p0873 A69-17017
- Tilt-table and acceleration tolerance of athletes and inactive students, comparing cardiovascular responses, heart rate and blackout level [DVL-834]
09 p1444 A69-21304
- Dogs orthostatic tolerance and resistance to transverse acceleration after 14-day hypodynamia, studying tachycardia and arterial pressure
10 p1645 A69-23499
- Long term hypokinesia effect on cardiovascular system of athletes indicating human orthostatic resistance increase due to physical exercises
10 p1646 A69-23581
- Bed rest effect on orthostatic tolerance of patients with acute myocardial infarction and without heart failure
10 p1648 A69-24189

Artificial heat acclimatization effect on orthostatic tolerance in man exposed to stresses of heat, exercise and dehydration

16 p2746 A69-32810

Bedrest as analog of weightlessness, evaluating role of extravascular dehydration in postrecumbency orthostatism

17 p2909 A69-33179

Increased tolerance of orthostatic stress in heart failure patients

19 p3258 A69-36374

Diurnal rhythms of heart rate and blood pressure reactions to posture changes on tilt table, finding orthostatic lability maxima

23 p4094 A69-42072

ORTHOTROPIC CYLINDERS

Orthotropic stiffened multilayer circular cylindrical shells buckling under axial compression, lateral pressure, etc

02 p0346 A69-12510

Free vibration of thin laminated orthotropic cylindrical shells

06 p1020 A69-17145

Cylindrically orthotropic hollow cylinder elastic properties determination using experimental test for production of stress and strain states and end effects

07 p1232 A69-18718

Transient thermal stress distribution in infinite orthotropic elastic cylinder of rectangular cross section in presence of heat sources

08 p1415 A69-20664

Torsional vibrations of composite elastic orthotropic cylinders, including cylindrical shells and isotropic composite cylinder

10 p1800 A69-23243

Steady state problems of elastic orthotropic cylinder solutions applicable to boundary value problems of laminar orthotropic elliptical cylinders

13 p2369 A69-28528

Boundary conditions of orthotropic shell stability under external pressure and axial tension, analyzing critical pressure by strain energy method

18 p3222 A69-34977

Buckling strength prediction for circular cylindrical shells reinforced by circumferential and longitudinal stiffeners, solving torsional buckling of orthotropic shells under internal pressure

22 p4042 A69-40171

Nonlinear stability for closed thin walled orthotropic cylindrical shell subjected to uniform external pressure, using Bubnov-Galerkin method for approximate solution

22 p4042 A69-40454

ORTHOTROPIC PLATES

Orthotropic plates bending and thermal stress, analyzing basic equations

01 p0168 A69-10416

Deflection of orthotropic sandwich plates with unequal facing thickness with edges subjected to uniform and concentrated loading

01 p0172 A69-11270

Supersonic flutter of circular cylindrical heterogeneous orthotropic thin panels of finite length, obtaining nonlinear flutter equation

08 p1413 A69-20404

Natural vibration frequency of circular orthotropic plate with variable rigidity

09 p1618 A69-22238

Unsteady temperature field and thermal stresses for anisotropic and orthotropic plates heated by heat sources and having Newton law heat transfer

12 p2177 A69-25992

Lateral bending and two dimensional thermal stress in rectangular orthotropic plates, considering alternating direction implicit method

12 p2188 A69-27100

Sine series solution for flexural vibration of rectangular isotropic plates applied to free vibration of orthotropic plates

13 p2363 A69-28128

Bending theory of orthotropic plates with variable elastic modulus under transverse loads, utilizing stress-strain relations and Kirchhoff-Love hypothesis

15 p2708 A69-30661

Finite element analysis of flat rectangular orthotropic multilayer stiffened panels, proposing six degrees of freedom model

15 p2708 A69-30668

ORTHOTROPIC SHELLS

NT CYLINDRICAL SHELLS

Buckling equations for orthotropic cylindrical shells with eccentric spiral stiffeners derived through variation method of total potential

04 p0676 A69-14710

Exact geometrical equations and internal equilibrium for elastoplastic deflections of orthotropic shells of revolution using thin shell theory

05 p0831 A69-15680

Critical axisymmetric loads for instability in orthotropic multilayer conical shells obeying Hooke law under axial compression or external pressure

05 p0840 A69-16198

Finite elastic-plastic deflections of orthotropic shells of revolution, deriving exact geometrical relations and equilibrium equations

05 p0842 A69-16642

Stress concentration at circular hole in orthotropic cylindrical shell, using coordinates system and Bubnov-Galerkin method

06 p1021 A69-17180

Oscillations of cylindrical orthotropic three layer shell having ideal fluid flow at variable rate, establishing parametric resonance and determining limits of shell motion instability regions

06 p1022 A69-17186

Multilayer orthotropic cylindrical shells stability under distributed external load and off-center compression, analyzing subcritical deformation on critical load

09 p1613 A69-21685

Free vibration frequencies and mode shapes for thin orthotropic oblate spheroidal shells, noting isotropic oblate spheroidal shell and isotropic spherical shell

09 p1613 A69-21719

Axisymmetric free edge buckling of semiinfinite heterogeneous orthotropic cylindrical shells in axial compression, noting stability condition

10 p1802 A69-23889

Free vibrations in axisymmetrically loaded orthotropic circular conical shells with longitudinal and circumferential stiffening based on linearized theory, considering shear deformation and inertia

11 p1969 A69-24327

Axisymmetric deformation of thin orthotropic laminar spherical shells under internal loads calculated on computer using Legendre polynomials

12 p2181 A69-26611

Orthotropic cylindrical shell stability under uniform axial compression and internal pressure, taking into account subcritical state duration

14 p2532 A69-28981

Heterogeneous orthotropic circular cylindrical shell stability during axial critical compression

14 p2533 A69-29024

Laminar thin orthotropic cylindrical shells natural and forced oscillations and dynamic deflection coefficient

15 p2715 A69-31202

Eigenvalues of truncated orthotropic shells of revolution with degenerate poles and various rigidities and geometries

16 p2873 A69-32133

Long term stability of orthotropic cylindrical shells under transverse shear stresses, calculating critical stress using Kirchhoff-Love model

18 p3225 A69-35357

Elastic oscillations of inhomogeneous orthotropic ring under time-variable axisymmetric load analyzed by Fourier method

19 p3434 A69-35828

Nonlinear theory based on Euler-Bernoulli hypothesis for axisymmetric deformations of heterogeneous orthotropic shells of revolution under rotationally symmetric mechanical and thermal loads

20 p3625 A69-37592

Load carrying capacity of orthotropic circular cylindrical shell under uniformly distributed normal load, considering edge support conditions

20 p3629 A69-38075

Nonlinear problems involving large deflections of isotropic and orthotropic shallow shells of rectangular planform, deriving partial differential equations for solution

21 p3838 A69-39185

Momentless orthotropic spherical shell of variable thickness stress analyzed, assuming large deformations under uniform axisymmetric load distribution

22 p4039 A69-39916

Prebuckling deformation influence on compressive buckling load for orthotropic cylindrical shells with elasticity principal axes in axial and circumferential directions

22 p4047 A69-41182

Deformation of orthotropic layered elastic shells based on linear elasticity theory, assuming surface and stress constraints

23 p4226 A69-41535

Stability of orthotropic cylindrical shells reinforced at edges by elastic ribs, analyzing axisymmetric buckling, natural oscillations and rigidity characteristics

23 p4229 A69-41992

Algorithm for stress analysis of structurally orthotropic conical and cylindrical shells, resolving first order differential equations

23 p4229 A69-42000

Orthotropic stiffness layer models for buckling of eccentrically stiffened shells of revolution with two unbonded orthotropic layers uncracked and circumferentially cracked

24 p4405 A69-43657

ORTHOTROPISM

Off-axis test for hard orthotropic composite materials, discussing fixture design to reduce shear coupling effect

01 p0103 A69-11273

Incremental complementary energy method of stress analysis of orthotropic nonlinear materials having different behavior in tension and compression

06 p1028 A69-18159

Elastic potential for obtaining localized strain theory, describing deformation characteristics of compressible and incompressible orthotropic materials with physical nonlinearity

08 p1412 A69-20328

Orthotropic aircraft materials plasticity theory, deriving stress-strain relationships in three mutually perpendicular symmetry planes for use in engineering calculations

24 p4400 A69-43083

OSCILLATING CYLINDERS

Self gravitating pulsating cylindrical and ring shaped cosmic masses from group theory standpoint compared with oscillating stars

01 p0148 A69-10124

Linearized unsteady nonequilibrium flows produced by unsteady motion of thin foil or circular cylindrical shell in compressible gas

07 p1119 A69-18738

Liquid filled cylindrical container motion with longitudinal forces applied to base, obtaining stability conditions for natural oscillations

08 p1419 A69-21181

Torsional oscillation of cylindrical shell of non-homogeneous material under periodic shearing force

13 p2361 A69-27462

Vortex wakes behind circular cylinder subject to transverse sinusoidal oscillations in uniform water flow at specific Reynolds numbers, photographing varied frequency flow patterns

18 p3086 A69-35169

Viscous incompressible fluid flow around semi-infinite oscillating plate and skin friction on infinite cylinders oscillating parallel to length

19 p3237 A69-35620

Asymmetrical oscillations of cylindrical shell with elastic bottom containing liquid, discussing liquid level influence on natural oscillation frequencies

21 p3834 A69-38718

OSCILLATING FLOW

Relationship between cooled surface temperature and pressure self oscillation frequency during heat transfer to turbulent fluid flow, showing temperature variations

01 p0173 A69-10094

Quasi-biennial oscillation in tropical stratosphere as result of long period gravity waves interaction with zonal wind

03 p0461 A69-13342

Stokes and Rayleigh layer formation during solid body rotation of semiinfinite fluid and infinite disk

03 p0417 A69-13797

Thermal and ablative lag induced by periodic heat input to oscillating flat plate in high velocity flow, showing crossover from dynamically stabilizing to destabilizing condition as oscillation frequency increases

[AIAA PAPER 67-336] 04 p0685 A69-14720

Flow pattern induced by oscillatory point source in rotating inviscid liquid

04 p0591 A69-15279

Oscillations of cylindrical orthotropic three layer shell having ideal fluid flow at variable rate, establishing parametric resonance and determining limits of shell motion instability regions

06 p1022 A69-17186

Relaxation equations for oscillatory degrees of freedom of molecular supersonic binary gas flow in Laval nozzle, obtaining population inversion

07 p1118 A69-18540

Natural frequency of fluid oscillations in complex pipelines

07 p1119 A69-18745

Natural modes and eigenfunctions of low amplitude oscillation determined by Ritz averaging method for ideal fluid with equilibrium surface in weak force field
07 p1119 A69-18746

Liquid flow field about oscillating flat plate, comparing visualization results with numerical solution of Navier-Stokes equations
[AIAA PAPER 69-226] 07 p1121 A69-19565

MHD oscillatory flow along infinite plane porous wall with variable suction velocity, obtaining expressions for velocity and magnetic fields in boundary layer
09 p1547 A69-21607

Decrease existence at t approaching infinity solution of Sobolev linear partial differential equations describing rotating fluid small oscillations
09 p1481 A69-21899

Natural convective oscillatory three dimensional flow in cylindrical annuli, describing inception, amplitude, period and wavelength
09 p1481 A69-21902

Local heat transfer coefficients in oscillating turbulent boundary layer over flat plate
[ASME PAPER 69-GT-34] 09 p1623 A69-22490

Incompressible fluid unsteady motion between journal and bearing solved in form of Reynolds number power series from stream functions
09 p1514 A69-22712

Sonic transmission of diatomic nitrogen during nozzle flow, presenting density dependence of natural oscillation energies and temperature
10 p1632 A69-22912

Small scale oscillations stability in quasi one dimensional conducting gas flow with longitudinal superimposed magnetic field, noting radiation role in transverse oscillations development
11 p1928 A69-25222

Natural frequencies and forms of small vibrations of ideal liquid in spherical container with weak force field, considering surface tension forces
11 p1875 A69-25484

Electrohydrodynamic instability of incompressible conducting cylindrical viscous jet in external magnetic field, noting viscosity role in oscillation modes and growth rate
12 p2136 A69-26403

Oscillation in resonance tubes excited by subsonic jet, analyzing pressure and frequency for small Mach numbers by using wave diagram
13 p2370 A69-28630

Unsteady jet viscous fluid flow under pulse variations based on Prandtl equations, showing turbulent motion analogy
14 p2432 A69-29608

Drag and friction coefficients for laminar pulsating incompressible fluid flow in circular tubes obtained from Navier-Stokes equation
15 p2592 A69-30988

Stagnation region dimensionless pressure effect on flow pattern, boundary conditions and oscillation mechanism in compressible flow through nozzle in circular duct
15 p2549 A69-31220

Aerodynamic forces acting on harmonically oscillating thin profile in stalled plane parallel flow of ideal incompressible fluid
16 p2732 A69-32142

Amplified boundary layer oscillations and transition at swept flat nosed wing attachment line with/without boundary layer suction analyzed by wind tunnel tests
17 p2890 A69-33251

Time dependent analysis for quasi one dimensional, vibrational and chemical nonequilibrium nozzle flows approaching steady state solution by finite difference technique
[AIAA PAPER 69-668] 17 p2893 A69-33491

Electrohydrodynamic supersonic flow over wavy wall by oscillating piston model, calculating streamlines and density distributions
19 p3297 A69-35838

Rocket engines propellant feed systems dynamics analyzed by model using linear methods with distributed-parameter pipe representation
[ASME PAPER 69-FE-6] 20 p3586 A69-37987

Momentum and energy equations for fluctuating flow of viscous incompressible conducting fluid past flat plate with time dependent suction under transverse magnetic field
21 p3691 A69-38445

Relaxation equations for oscillatory degrees of freedom of molecular supersonic binary gas flow in Laval nozzle, obtaining population inversion
21 p3693 A69-38692

Taylor instability nonlinear oscillations, obtaining uniform solutions for wavenumbers near and larger than cut-off
21 p3693 A69-38703

Secondary losses in flat large scale turbine lattice attributed to LF pulsating flow separation on back of blade
21 p3645 A69-39717

Oscillations of highly viscous incompressible fluid in partially filled cavity of body moving about fixed point, solving Navier-Stokes equations by asymptotic method
22 p3929 A69-40111

Stroboscope method for measuring pulsating flow transient velocity based on hot-wire chronometric recording of small ion clouds emitted during pulsation
22 p3951 A69-41257

Turbomachinery periodic structures design to improve tolerance to inflow distortion and resonant oscillatory flows, considering large amplitude pressure waves propagation
[SAE PAPER 690388] 23 p4201 A69-41666

Decrease existence at approaching infinity solution of Sobolev linear partial differential equations describing rotating fluid small oscillations
23 p4152 A69-41975

Linear small perturbation approximation for supersonic nonequilibrium flows past oscillating airfoil in two dimensional wind tunnel, noting Laplace transform solution
23 p4061 A69-42349

Limit-cycle oscillations of unstable plane Poiseuille flow analyzed by nonlinear Navier-Stokes equations
24 p4298 A69-42600

Perturbation equations for oscillating wedges and caret wings with attached bow shock in hypersonic and supersonic flows
24 p4249 A69-43659

OSCILLATION DAMPERS

Active control system augmentation of inherent aerodynamic damping assuring acceptable limits on oscillatory rotational motion during hypersonic Martian atmospheric entry
02 p0333 A69-11742

Computer solution of forced torsional oscillation equations for periodic coupled machine system with viscous dampers
02 p0338 A69-11893

Acoustic absorbers for combustion stabilization, discussing analytical model based on temporal damping coefficient for oscillation modes and allowance for nonuniform distribution
03 p0532 A69-13133

Spherical and single axis passive oscillation energy dampers for gravity gradient oriented satellites, utilizing earth gravity field or solar pressure
07 p1229 A69-18347

Dielectric surface loading on GaAs for suppressing traveling high field domain mode oscillations
08 p1371 A69-19911

Time response of second order nonlinear overdamped systems calculated by Krylov-Bogoliubov method of variation of parameters
08 p1297 A69-20356

Planar motion of satellite containing damping mechanism, considering small dampers case
10 p1791 A69-22935

Steady state motion of multiple unit impact damper attached to sinusoidally excited primary system, determining asymptotically stable regions
15 p2714 A69-31144

Stationary liquid under pressure effect on energy dissipation of rectilinear pipelines under pure bending
17 p2904 A69-33930

Optimal nutation damping of spin stabilized bodies, using Pontryagin maximum principle to optimize time, consumption and linear time-consumption combination
18 p3208 A69-34774

Passive damper system for reducing precession in free symmetrical rotating space vehicle, noting linear torsional spring influence on precession decay
19 p3429 A69-35913

Vibration absorber incorporating polymer spring/damping elements for attachment to complex main system, noting butyl rubber as effective and convenient damper material
20 p3620 A69-36996

Motion and stability characteristics of dual spin satellite system with pendulous type nutation dampers, noting mass unbalance effect
[AIAA PAPER 69-857] 21 p3823 A69-39385

Artificial damping of longitudinal winged reentry vehicle motions in earth atmosphere, discussing vibration damper dynamic characteristics
21 p3829 A69-39828

Time varying resistance wire to arrest oscillations in pulsed capacitor discharge circuit, deriving over, under and critical damping conditions
22 p3917 A69-41228

NT TRANSIENT OSCILLATIONS

NT TRANSVERSE OSCILLATION

NT UNDAMPED OSCILLATIONS

NT WING OSCILLATIONS

Matrix technique for transformation of equation of motion into first order equation in analyzing perturbation forces producing mechanical oscillations
01 p0170 A69-10827

Summed and differential types of higher order oscillations in vibratory systems with multiple degrees of freedom under parametric excitation
02 p0346 A69-12422

Magnetic field effect on amplitude, frequency and form of LF oscillations in Gunn diodes
02 p0222 A69-12684

Laser longitudinal oscillation modes beat frequencies measurement by grouping photoelectron velocities by HF field containing photomultiplier cathode
03 p0440 A69-13265

Comparison and oscillation theory of linear differential equations, discussing zeros of solutions and Sturm type theorems
04 p0622 A69-14598

Pulsations of relativistic and nonrelativistic narrow /paraxial/ electron beams with spatial axis curved according to various laws, deriving approximate descriptive equations
04 p0632 A69-14981

Microwave oscillation and amplification in long bulk GaAs with barium titanate sheets on surface due to differential negative resistance across terminals
07 p1197 A69-18452

Natural amplitude and phase fluctuations of originally monochromatic oscillations at output of regenerative frequency divider with thermal and shot noise
07 p1099 A69-18526

Relaxation oscillations in Si p-i-n junction diode reverse-biased into avalanche calculated by computer program
07 p1101 A69-18651

Circuit producing electrical and optical oscillations simultaneously constructed by combining semiconductor laser diode with photodiode
07 p1148 A69-18688

Viscous gravitating sphere oscillations and velocity field, noting oscillations of Maxwell sphere
07 p1123 A69-18806

Quiescent solar prominences horizontal oscillations, explaining periods, damping times and prominence shape changes by model of freely oscillating prominence in corona
07 p1205 A69-19245

Rotating stellar models oscillation and stability approximated by virial equations
07 p1220 A69-19389

Periodic solutions of autonomous system oscillations with many degrees of freedom based on Poincare method applied to Liapunov systems
07 p1183 A69-19680

Laser oscillations, discussing oscillation frequency, oscillation time, noise and spectrum width, pumping and lasing materials, line broadening and giant pulse generation
09 p1517 A69-22119

Linear elliptic partial differential equations, deriving sufficient conditions on coefficients for equations to be oscillatory in certain unbounded domains
09 p1533 A69-22771

Third order nonlinear ordinary differential equation solutions oscillatory and nonoscillatory behavior for conditions on variable coefficients
09 p1533 A69-22772

Isothermal theory of cool flames, discussing oscillations-fuel consumption relations, kinetics, etc
11 p1970 A69-24476

Oscillatory properties of solutions to second order nonlinear differential equations with delayed arguments
11 p1908 A69-24767

Unforced periodically varying systems, developing approximate solutions with Floquet theory
11 p1909 A69-25289

Quasi-stochastic nonlinear one dimensional oscillations in periodically disturbed field applied to celestial mechanics of planetoids
12 p2130 A69-26373

Bias circuit LF oscillations in short Gunn devices, analyzing sinusoidal and relaxation oscillations and stable bias in terms of terminal I-V characteristics
12 p2041 A69-26628

High efficiency LF oscillations in avalanche diodes, noting evidence for parametric generation and condition for high efficiency
13 p2227 A69-27239

Gyroscope motion with unbalanced rotor in run-down mode, integrating equations for small oscillations
13 p2259 A69-27429

Current oscillations in n-type gallium arsenide related to electroacoustic domains motions, noting oscillation period dependence on voltage
13 p2318 A69-27892

Longitudinal magnetoresistance oscillations in n-type GaSb single crystals associated with electron concentrations minima
13 p2319 A69-27900

Noncollinear single cavity optical parametric oscillation with specified energy conversion using ruby laser-pumped lithium niobate, discussing tuning
14 p2460 A69-29605

Nonoscillatory solution to nonlinear differential equation, presenting theorem describing sufficient condition for nonoscillation
14 p2471 A69-29950

Magneto-optical oscillation of absorption coefficient in semiconductors during direct electron transitions
16 p2824 A69-31574

Electromagnetic fields in closed one dimensional resonators with oscillating boundary, analyzing amplitude buildup
16 p2751 A69-32030

Dynamic systems with impact interactions and nonlinear oscillation theory
16 p2875 A69-32295

Equatorial and polar semidiurnal oscillations in earth atmospheric tides related to inertial oscillations originating in autobarotropic field
17 p2996 A69-32862

Nondivergent oscillations in solar atmosphere forming normal modes or free oscillations, assuming free surface of chromosphere coronal interface and large density in convective zone
17 p3029 A69-33048

Radial oscillation periods of Hamada-Salpeter white dwarf models graphically compared with models by Harrison-Wheeler Wakano equation of state
17 p3037 A69-33642

Nonlinear differential equations describing one degree of freedom systems oscillations, allowing for dry friction and internal friction in elastic element
17 p3007 A69-33913

Oscillations of nonlinear dissipative mechanical system with two degrees of freedom, possessing structural damping at joints between moving masses and base
17 p3064 A69-33915

Cylindrical aluminum shell dynamic stability, analyzing steady state parametric oscillations, mode shape, frequency, amplitude and damping
17 p3065 A69-33929

Thin disk galactic models small oscillations, discussing frequency spectra and types of continua
18 p3196 A69-34551

Nonlinear axisymmetric oscillations and motion stability of cylindrical wound elastic glassfiber shell under time dependent uniform internal pressure
18 p3222 A69-34975

Electroabsorption oscillations in CdTe films compared with results of interband transitions theory
19 p3386 A69-36523

He-Ne laser discharges noise and oscillations classified, investigating interaction between intrinsic oscillations
19 p3338 A69-36605

High resistivity gallium arsenide single crystal LF current oscillations at low temperature, investigating electron heating effect and mechanisms
19 p3391 A69-36609

Bubble oscillations in water filled pressure chamber with alternating pressure generated by piston, measuring temporal development
19 p3302 A69-36871

Impact mechanism in hip safety belt protection in vehicles, deriving motion for natural oscillations of upper part of human body model
20 p3482 A69-37595

Self excited oscillations in systems with one linearity symmetrical with origin determined by harmonic balance method
21 p3685 A69-38463

Gaseous rotating stars radial oscillations by perturbation method, considering angular velocity effects
21 p3795 A69-38470

Plane double front detonation wave attenuation by pursuing rarefaction waves, analyzing oscillations, onset mechanism and stability during transition to Chapman-Jouguet mode
22 p3929 A69-40112

NT VACUUM TUBE OSCILLATORS

Bounds from asymptotic behavior of solutions of nonlinear integrodifferential equation arising from nonlinear oscillators in acoustics
01 p0103 A69-10001

Injection locked oscillator FM receiver consisting of linear mixer and negative resistance oscillator in phase locked configuration, solving receiver output differential equation
01 p0042 A69-10247

Voltage controlled oscillator with fixed frequency crystal oscillator, noting double mixing scheme and rejection of all discrete sidebands
01 p0042 A69-10418

Millimeter wave oscillator AFC system utilizing inherent stability of molecular rotational transition applied to reflex klystron stabilization
01 p0044 A69-10628

Narrow band normal steady state random processes applied to signal dispersion by extended oscillating body, obtaining statistical characteristics
02 p0206 A69-11602

Gunn domains reduction in sheet type GaAs oscillators by spreading of field lines out of active region
02 p0215 A69-11933

GaAs Gunn diode oscillators operating at Q band frequencies
02 p0297 A69-11944

End to end cavity oscillators, folded line type cavity oscillators and reentrant cavity oscillators for use with disk seal tubes, pencil tubes and metal-ceramic tubes
02 p0216 A69-12029

Submillimeter wave oscillator /orotron/ involving open resonator with mirror having reflection grating period less than wavelength
02 p0250 A69-12248

Cavity stabilization of microwave oscillator for noise reduction
02 p0220 A69-12451

Low noise high power transistor oscillator using directional coupler, noting isolated port for injection phase locking
02 p0220 A69-12452

Microwave oscillator AM and FM noise measurement using Schottky barrier diode detector, discriminator, storage oscilloscope and wave analyzer
02 p0220 A69-12453

Amplitude noise spectra of X band microwave oscillators with Si avalanche diodes, noting various contributions and dependence on circuit and operating parameters
02 p0221 A69-12456

Time dependent functions integration by glow discharge tube and oscillator, discussing device for voltage measurement and applications in meteorology and geophysics
02 p0251 A69-12773

Epitaxial GaAs transferred electron oscillators pulsed operation at bias voltage ten times threshold voltage, noting power output and efficiency
03 p0402 A69-12854

Pulsed subharmonic oscillation in nonlinear regenerative selective circuits with reference to graph-analytical method for explaining behavior
03 p0385 A69-12918

Gunn effect in bulk GaAs, noting microwave oscillator applications
03 p0484 A69-13292

Superconductor tunnel junction with noise, calculating frequency pulling, radiation linewidth and voltage power spectrum in AC Josephson effect
03 p0486 A69-13387

Complex Doppler effect for oscillating source moving in dispersive medium, analyzing time behavior of radiation field
03 p0396 A69-13630

Low and high power pi-mode Ladderton oscillator design operation and performance characteristics
03 p0405 A69-13726

Single punch through silicon avalanche diode structure and two distinct modes of oscillation making possible pulsed generation of microwaves
04 p0573 A69-14334

Bistable zones in series oscillator circuit consisting of inductor and nonlinear p-n junction capacitance subjected to DC and AC voltage sources
04 p0575 A69-14463

Harmonic balance method to investigate phase locked oscillator stationary modes
04 p0559 A69-15138

Transistorized LF generator, discussing tradeoff due to frequency range, harmonic distortion and output stability
04 p0579 A69-15225

Solid state precision frequency standard for L multiplex carrier equipment, using four precision quartz crystal oscillators
04 p0561 A69-15451

Phase modulator with phase locked loop oscillator as phase shifter, discussing unit cascading effect
05 p0729 A69-15965

Fluidic systems with long lines simulated by transmission lines of OR/NOR oscillator
[ASME PAPER 68-WA/AUT-12]
05 p0706 A69-16178

Frequency and polarization selection of neodymium glass laser oscillators by directing secondary radiation into laser cavity and duplicating spectral properties
[IEEE PAPER P-3]
05 p0775 A69-16324

Tube and transistor type quartz crystal FM oscillators circuitry and operating characteristics, discussing generation of three frequencies
05 p0732 A69-16532

Large signal model for analysis of RF output and efficiency of IMPATT diode oscillator, noting frequency tuning
05 p0733 A69-16555

Si IMPATT diode oscillator and amplifier for CW operation at 50 GHz noting fabrication, performance and phase locking properties
05 p0733 A69-16560

X-band swept frequency oscillator using Gunn diode and ferrite phase shifter
05 p0734 A69-16573

Microwave generator of FM oscillations using two reflex klystrons and modified by wideband regenerative amplifier to minimize intrinsic AM
05 p0736 A69-16791

Neutron and X ray radiation effects upon gallium arsenide devices including Gunn oscillators, transistors, Schottky barrier diodes and optoelectronic pulse amplifiers
06 p0978 A69-16890

Q factors dependence of IMPATT diode oscillator FM noise, noting excess noise temperature correlation with diode current
06 p0899 A69-17826

Laser amplifiers and oscillators, discussing conversion of active atom excitation energy into light energy
06 p0937 A69-18006

Oscillators and amplifiers based on intervalley electron transfer in bulk GaAs
07 p1096 A69-18442

Current and voltage waveforms of transit time, resonant domain and LSA modes of operation of transferred-electron oscillators
07 p1097 A69-18443

High peak power Gunn effect oscillators for low gigahertz frequencies in transit and nontransit time limited modes
07 p1097 A69-18447

Avalanche diode oscillators efficiency of continuous wave operation in transit time mode and high current multiresonant modes
07 p1098 A69-18456

Large signal avalanche diode oscillators parameter effect on operating characteristics at any transit angle
07 p1098 A69-18458

Swept-frequency complex return-gain response of injection locked oscillator over locking bandwidth, detecting and correcting phase errors between injection-locked diode oscillators
07 p1100 A69-18645

IMPATT diode microwave oscillator, discussing large signal characterization and model for efficiency dependence on load conductance and admittance plane characteristics
07 p1101 A69-18650

Injection locking method for reducing FM noise in Gunn effect oscillators
07 p1102 A69-18862

Frequency-stable tunnel diode oscillator loaded with transmission line
07 p1104 A69-18890

Frequency modulation of CW mm-wave IMPATT diode oscillator with wide band tunability and related harmonic generation effects
07 p1106 A69-19146

Validity of formula for oscillation frequency of nearly sinusoidal tunnel diode oscillator extended to operation in nonsinusoidal regime
08 p1279 A69-19924

Propagation induced phase fluctuations reduction in widely separated oscillators, presenting microwave and optical methods
08 p1273 A69-20022

Sine wave oscillator circuits and performance prediction for NERO thrust measurement test stand
08 p1300 A69-20155

Synthesis method for UHF transistor oscillators tunable in wideband using Y-matrices
08 p1285 A69-20380

Local oscillator for space telecommunications F9 repeater, operating principles, design calculations and test results
08 p1286 A69-20596

Large signal analysis of IMPATT oscillators with carrier velocity saturation, discussing two frequency mode of operation
09 p1463 A69-21846

Functional equations of physical systems in strong coupling solved by quantum theory model of anharmonic oscillator, discussing relativistic invariant field theories
09 p1541 A69-22393

Thermal effects on modulation sensitivity and inherent AM percentage as functions of modulation frequency in IMPATT oscillators
09 p1468 A69-22588

Pulsed J band Gunn effect oscillators performance, noting hybrid domain mode due to high bias fields
09 p1468 A69-22594

Intrinsic amplitude and frequency fluctuations in transistor autooscillator, examining natural additive noise influence
09 p1469 A69-22632

Wideband 4 GHz Esaki diode injection locked oscillator, noting locking figure of merit and locking bandwidth
09 p1470 A69-22785

Small signal and saturation characteristics for X band cyclotron resonance oscillator, discussing device design and configuration
09 p1470 A69-22786

Optimum performance from planar metal ceramic triode oscillators by pulse modulation method selection, considering plate, cathode and grid modulation
09 p1470 A69-22793

Time optimal controlled linear systems with optimally chosen parameters, considering arbitrary second order oscillator controllability
10 p1666 A69-22922

Miniature telemetry systems for gun launched projectile instrumentation and ejection payloads, noting voltage controlled oscillators, commutators and VHF FM transmitters
10 p1654 A69-23280

Quenched one dimensional bulk GaAs oscillators with linearly increasing and decreasing concave and convex doping gradients, showing profiles
10 p1663 A69-23667

Coherent detection spectroscopy with laser oscillator, emphasizing high resolution and applications in astronomical spectroscopy and IR
10 p1696 A69-23684

Microwave avalanche diode oscillators performance estimates, discussing operation modes and transit time
10 p1665 A69-23873

Frequency retuning characteristics of oscillator employing avalanche transit-time diode with complementary varactor subject to current or voltage variation
11 p1844 A69-24449

Injection locked oscillator FM demodulator, analyzing signal distortion, intermodulation noise, differential gain and differential phase
11 p1845 A69-24565

Narrow band normal steady state random processes applied to signal dispersion by extended oscillating body, obtaining statistical characteristics
11 p1835 A69-24709

Quantum oscillators interaction with two level molecules system in circular laser
11 p1899 A69-25325

Frequency noises suppression in Gunn diode oscillators by frequency stabilization, using high Q external cavity
11 p1853 A69-25608

Resonant load impedance effects on Gunn diode oscillators output fluctuations, noting maximum power conditions
11 p1853 A69-25609

Varactor diodes for microwave frequency tuning of resonators used for oscillators of avalanche transit time and Gunn diodes, discussing Q factors
11 p1854 A69-25610

Transient behavior of transistor UHF oscillator, discussing network analysis for oscillation amplitude calculation by nonlinear transistor equivalent circuit diagram
11 p1854 A69-25613

Step-up mixer converting modulated IF signal to HF level by HF high power oscillator signal, discussing efficiency
11 p1854 A69-25615

AM-FM calibration modulator for microwave oscillator noise measurement
11 p1856 A69-25631

Voltage and current waveforms of resonant domain and limited space charge accumulation modes in transferred electron oscillators, noting drift current
12 p2036 A69-25908

Multivibrator circuit for generation of oscillations with frequency stability against transistor ambient temperature changes
12 p2036 A69-25919

Current to frequency converter for astronomical photometry, discussing oscillator drift, linearity characteristics and feedback pulse counting
12 p2040 A69-26479

Standing wave theory for steady state performance of Raman laser oscillator extended for time variation of exciting laser pulse
12 p2108 A69-26634

Electrodeless plasmatron coupled with oscillator operating at 5-30 kHz, discussing parameters effect on operation mode and performance
12 p2140 A69-27123

CdS acoustoelectric oscillator steady state oscillation frequency dependence on voltage and conductivity compared with linear acoustoelectric amplification theory
13 p2227 A69-27244

Nonmagnetic quadrupole ionization gauge, discussing systems design and electron oscillations
13 p2262 A69-28020

Output power and loss analysis of 2 n injection locked oscillators combined through magic tee hybrids
13 p2232 A69-28061

Bistable zones in series oscillator circuit consisting of inductor and nonlinear p-n junction capacitance subjected to DC and AC voltage sources
14 p2418 A69-28834

Quartz oscillator with electronic temperature compensation, noting reduced size, weight and power consumption
14 p2420 A69-29398

Noise reduction techniques using injection phase locking and high-Q cavities for HF oscillator high order multiplier and avalanche diode oscillator microwave sources
14 p2420 A69-29458

Avalanche diode oscillators stacked in series for combined power output
14 p2421 A69-29543

Injection phase-locking characteristics of LSA /limited space charge accumulation/ mode transferred-electron diode oscillators, employing negative conductance and equivalent circuit
14 p2421 A69-29544

Orotron electron beam excited oscillator-generator of millimeter and submillimeter wave bands with wide frequency tuning range
14 p2421 A69-29546

Reference oscillator frequency instability effect on radio signals phase shift in ionosphere measurements, evaluating errors
14 p2444 A69-29873

Gunn effect GaAs oscillators with p-n junctions, studying electrical characteristics, threshold voltages and currents during breakdown and p-n junctions injection
15 p2666 A69-30065

Push-pull circuit configurations for GaAs transferred electron oscillators, discussing CW X band and pulsed L band devices operation
15 p2574 A69-30168

Frequency effects on Gunn oscillator modulation sensitivity, discussing microwave-frequency deviation and diode impedance
15 p2577 A69-30614

Quartz oscillator amplitude and frequency fluctuations due to elements tolerance fluctuations, examining oscillator parameters contributions to spectral line width
15 p2579 A69-30944

Semiconductor technology including radar, Gunn and limited space charge accumulation oscillators, phase locked antennas, data processing and solid state computerization
15 p2581 A69-31521

X band avalanche diode oscillator operated as super-regenerative amplifier, noting frequency response characteristics ascribed to diode susceptance modulation
16 p2757 A69-31585

FM/FM telemetry system for high altitude rocket research, using independent subcarrier oscillator for each measurement transmitted with individual frequency modulation
16 p2750 A69-31853

Autooscillatory process in n-circuit tunnel diode LC oscillators acted upon by external sinusoidal voltages
16 p2764 A69-32256

Transistorized L band oscillator tuned by Ga-doped YIG, discussing ferrimagnetic material properties and device equivalent circuit
16 p2761 A69-32450

Quantum electronics, Volume 2, Maser amplifiers and oscillators
17 p2982 A69-33687

Gunn effect theory and applications, discussing field domains in semiconductors, excited oscillations measurement, oscillators design, computer elements, etc
18 p3183 A69-35160

Parametric and forced oscillations analogy for analyzing dynamic behavior of oscillatory systems with time dependent parameters
18 p3175 A69-35322

Induced-emission oscillator navigation sensor with performance limitations, noting ring laser and nuclear maser gyro and laser accelerometer
19 p3369 A69-35795

Oscillator without reactive components for integrated circuit biotelemetry, noting transmission in AM broadcast band
19 p3261 A69-36244

Nonlinear free motion of conservative oscillator with one degree of freedom calculated by collocation method
19 p3438 A69-36308

Free oscillation period of nonlinear oscillators with one degree of freedom, discussing approximation method
19 p3373 A69-36310

Steady resonance operation modes of nonlinear oscillatory and rotational systems described by differential equations with deviating argument, using averaging procedure
19 p3374 A69-36469

Tunnel diode oscillators theory applications, investigating self resonance phenomena relating to static characteristic variations under self oscillating conditions
19 p3285 A69-36738

Voltage variation frequency analysis for narrow-band sweep oscillators circuit design
20 p3486 A69-37010

Integrating filter analysis for effect of phase detector sawtooth characteristics on locking range of phase locked oscillator
20 p3486 A69-37011

Fluidic feedback oscillator performance from fluid density effects analysis including supply jet, feedback line dynamics and load and control port impedances [ASME PAPER 69-FLCS-39]
20 p3465 A69-37984

Gunn device performance for various oscillator types, discussing cavity oscillator characteristics variation
21 p3681 A69-38394

- Gunn oscillators protection from catastrophic breakdown phenomena, using carrier velocity saturation in n-type Ge 21 p3682 A69-38777
- Periodic motions of mechanical oscillators with velocity discontinuities analyzed by differential equations 21 p3771 A69-39009
- Balloon-borne transmitter consisting of oscillator, driver and final output and connectable automatic frequency control circuit 21 p3682 A69-39251
- Laser modulation theoretical analysis based on high speed laser oscillators, discussing high energy physics research applications 22 p3959 A69-39975
- King furnace absorption source used with spectrometer in relative oscillator strength measurement, with experiments on lines of Fe I 22 p4022 A69-40466
- Oscillators frequency instability theories emphasizing difference between concepts of frequency instability and spectral purity 22 p3900 A69-40930

OSCILLOGRAMS

U OSCILLOGRAPH

OSCILLOGRAPH

- Stimulated emission properties of active fibers obtained from photomultipliers transmitting pulses to oscillograph 05 p0761 A69-15657
- Statistical processing of oscillograms of instantaneous values of wire tension during winding, determining stress characteristics 06 p0927 A69-17691
- Device to simultaneously observe integral and differential field effect curves on oscillograph screen as function of continuously varying field 10 p1698 A69-24210
- HF measurements by phase and amplification control of signal in impulse oscillography, noting accuracy in nanosecond range and signal distortion 11 p1880 A69-24541
- Stimulated emission properties of active fibers obtained from photomultipliers transmitting pulses to oscillograph 16 p2792 A69-32514

OSCILLOSCOPES

- Oscilloscope display of sample of subnanosecond light pulse, using optical analog of electronic sampling oscilloscope 02 p0259 A69-12656

OSO

NT OSO-3

NT OSO-C

- OSO-4 solar UV spectrum measurements, correlating chromospheric line intensity and photospheric magnetic field strengths 02 p0313 A69-11485 [AAS PAPER 68-219]

- Space lubrication system for Orbiting Solar Observatory program, discussing theoretical high vacuum principles and flight performance and environmental test data 02 p0252 A69-11766

- OSO-B2 satellite zodiacal light observations at constant 90 degree elongation, measuring polarized component as function of time 02 p0245 A69-12718

- Proportional counter array for detection of soft X ray photons from OSO-4 observations, discussing solar event energy spectra 12 p2151 A69-26936

- OSO spacecraft thermal design modified to operate University of Minnesota zodiacal light monitor experiment [AAS PAPER 69-173] 24 p4393 A69-42873

OSO-3

- Solar X-ray events observed by scintillation counter telescope on OSO 3 satellite, discussing X ray spectra during burst initial and decay phases 20 p3593 A69-38166

OSO-C

- Solar extreme UV, soft and hard solar X rays, cosmic X rays and gamma rays, cosmic ray particles and near earth visible radiation observed by OSO-3 09 p1578 A69-22167

- Solar far UV emissions observed from OSO-C by grazing incidence grating spectrometer, noting temporal variations and atmospheric absorption characteristics 09 p1578 A69-22168

- Solar X ray and extreme UV spectra during flares, attributing intense emissions to optical transitions 09 p1578 A69-22169

- Solar and cosmic X rays observed by OSO-C, stressing galaxy M 87 upper limits and Lupus XR-1 power law spectral form 09 p1578 A69-22171

- Impulsive solar microwave bursts observed by parabolic reflector, obtaining bursts spectra and total flux density 09 p1579 A69-22178

OTOLITH ORGANS

- Otolith and cupular apparatus interaction in human vestibular analyzer during gravitational changes 07 p1062 A69-18589

- Otolith apparatus response threshold under weightlessness conditions simulated by aircraft flight, measuring galvanic current threshold for banking 08 p1263 A69-19934

- Simulated weightlessness used in determining ontogenesis of otolith organ in tadpoles and eggs as function of acceleration forces [DVL-855] 10 p1647 A69-24021

- Otolith apparatus functioning under weightlessness and accelerations in test stand experiments, discussing measuring techniques and nystagmic reaction durations 20 p3471 A69-37253

- Vestibular analyzer function relation to arterial pressure during otolith stimulation experiments on subjects susceptible and nonsusceptible to motion sickness 20 p3472 A69-37264

OTOLOGY

- Extraterrestrial vestibular research, discussing human otolithic apparatus regulation subjected to change from geocentric to heliocentric orientation [UN PAPER 68-95389] 01 p0014 A69-10508

- Structural differences effect of gyral and sulcal areas of acoustic projection cortex on primary induced acoustic responses 23 p4079 A69-41380

OUTER RADIATION BELT

- Solar proton event generating sudden commencement magnetic storm, discussing effects on outer belt electrons as observed by Explorer 26 and time delay 01 p0146 A69-11124

- High latitude outer zone electrons boundary region during geomagnetically quiet periods 03 p0502 A69-14004

- Drift periodic echoes in outer zone electron flux due to magnetospheric disturbance 05 p0815 A69-16259

- Radial diffusion of high energy electrons in outer radiation belts, determining statistically delay time between electron intensity variations 06 p0919 A69-17720

- Cyclotron instability of outer radiation belt protons, taking into account data on spatial distribution and ion composition of exospheric plasma 06 p0919 A69-17721

- Cut-off boundary latitude and electron flux changes in midnight sector of outer radiation belt during magnetic bay periods from Injun 4 satellite data 07 p1204 A69-18836

- Bimodal diffusion mechanism for acceleration of trapped electrons and protons in earth radiation belts, noting particle intensity profiles and energy spectra 09 p1576 A69-21708

- Outer radiation zone electron intensities during magnetic storms for morphology of zone electron acceleration mechanisms 11 p1950 A69-25147

- Charged particle population dynamics in outer radiation zone of magnetosphere, discussing ring current particles, protons, electrons, alpha particles and electric field 12 p2150 A69-26743

- Particle fluxes in outer radiation belt and unstable radiation zone of outer geomagnetic field, discussing electron diffusion into magnetosphere and magnetic disturbances 12 p2150 A69-26744

- High latitude capture region boundary for electrons in upper radiation belt determined relative to current electrojets in ionosphere from satellite observations 13 p2327 A69-27700

- Diffusion of equatorial particles in outer radiation zone caused by expansions and contractions of permanently compressed magnetosphere, obtaining electric fields 14 p2510 A69-28937

- Sporadic electron flux contribution to high latitude geomagnetic disturbances at outer radiation belt boundary estimated from Elektron 1 and 2 observations 14 p2438 A69-29079

- Dawn-dusk electric field in outer radiation zone associated with magnetospheric plasma convection, comparing electron densities for magnetically quiet periods 18 p3128 A69-34942

- High latitude limit of closed geomagnetic field lines indicated by high latitude electron boundary in outer radiation zone during Alouette satellite energy particle experiment 20 p3531 A69-37875

- Electron intensities and substorm drift effects in outer radiation belt using two satellite technique 24 p4309 A69-43172

- Electron intensities and substorm drift effects in outer radiation belt using two satellite technique 24 p4309 A69-43172

OUTGASSING

- Heat treatments in inert gas atmosphere improve elastic foam polyurethane by reducing capability of toxic outgassing 10 p1716 A69-23503

- Outgassed condensation effects in vacuum on magnesium difluoride overcoated UV irradiated Al mirrors, including temperature effects, Lyman alpha reflectance and IR analysis of deposits 13 p2299 A69-28015

- Outgassing rates of multifoil insulation materials for sealed vacuum systems measured over temperature range as function of pumping time 13 p2299 A69-28016

- Outgassing behavior of polymers in spacecraft by thermal-vacuum weight-loss and contamination tests 13 p2286 A69-28089

- Leak rate measurement accuracy of rate-of-rise technique for nitrogen, methane and He between millionth and thousandth torr 16 p2791 A69-32326

- Thermal rare gas release from mineral separates of Mocs meteorite, using method giving activation energies as function of temperature 19 p3419 A69-36141

- Rare gas distribution in earth atmosphere explained as outgassing from primordial solid particles, discussing stony meteorites composition 20 p3600 A69-37489

- Outgassing rates of stainless steel and Al with different surface treatments, including glass bead shot blasting, electropolishing, baking and vacuum cleaning 22 p3958 A69-41215

- High temperature vacuum treatment of thick stainless steel sheets reducing hydrogen content and outgassing 22 p3958 A69-41217

OUTLETS

U VENTS

OUTPUT

U LASER OUTPUTS

U MASER OUTPUTS

OV-10 AIRCRAFT

- Landing and takeoff demonstration tests of OV-10A aircraft through rough terrain, noting pilots excessive physiological stresses
[AIAA PAPER 69-316] 09 p1434 A69-22391
- Glass reinforced plastic molding compounds for OV-10A airplane structural components, noting cost savings
[SAE PAPER 690342] 11 p1890 A69-24497

OVERCAST

U CLOUD COVER

OVERESTIMATION

U ERRORS

U ESTIMATING

OVEREXPOSURE

U RADIATION DOSAGE

OVERPRESSURE

- Sonic boom minimum achievable shock front pressure rise and overpressure level prediction for given aircraft and flight conditions
08 p1253 A69-19903

- Sonic boom signatures produced by diverse SST configurations during cruise, indicating aircraft length as overpressure limit factor
24 p4253 A69-43661

- Sonic boom lower bounds determination in midfield based on modification of Jones results by minimizing overpressure or shock strength of boom wave positive component
24 p4254 A69-43662

OVERTONES

U HARMONICS

OVERTHROTTLE

- Failure mechanism in high-voltage semiconductor diodes explained by effect of reverse voltage pulses, considering design reliability
08 p1294 A69-21116

- Overload protection guidelines for power subsystems, discussing source and protective device characteristics emphasizing spacecraft requirements
17 p2904 A69-34088

OXIDASE

- Lactate dehydrogenase and monoamine oxidase distribution in medulla oblongata and cerebellum of squirrel monkey
12 p2018 A69-25778

OXIDATION

NT ELECTROCHEMICAL OXIDATION

NT PHOTOOXIDATION

- Titanium alloy VTZ-1 recrystallization and oxidation processes studied by heating within 700-1200 C temperature range
01 p0094 A69-10214

- Sikhote-Alin iron meteorite high temperature oxidation and ablation and simulation with Fe-Ni alloy, noting phase compositions and structure
01 p0025 A69-11373

- Olefins combustion studies, considering influence on hexane combustion at different oxidation stages leading to ignition
02 p0352 A69-12309

- Radiation resistance of MOS transistors noting relationship with thermal stability, gate oxidation and metals used
02 p0221 A69-12468

- Steel corrosion by iodine noting effects of water and oxygen
03 p0444 A69-13310

- Impurities effect on defects in oxygen deficient niobium, tantalum and zirconium oxide scales at high oxygen pressures, noting relationship to metal oxidation
03 p0444 A69-13312

- Deposit formation in empty wing tanks due to auto-oxidative degradation of hydrocarbon fuel, noting results of environment simulation tests
[SAE PAPER 680733] 03 p0366 A69-13439

- Wet oxidation process for management of organic waste products in closed ecologies of long term manned space missions
[SAE PAPER 680714] 03 p0380 A69-13443

- French collection of papers on oxidation and combustion covering reaction characteristics, thermodynamics, chain reactions, flammable gas mixtures, etc
06 p1030 A69-17412

- Phenomenological characteristics of oxidation reactions and combustion, noting nature and physical state of mixtures, localization of reaction and chain mechanisms
06 p1031 A69-17413

- Slow oxidation and self ignition in gaseous phase, discussing cold flames and interpretation of experimental data
06 p1031 A69-17416

- French collection of articles on oxidation and combustion, Volume 2
06 p1032 A69-17419

- Liquid phase radical oxidation with intermediate and end products in same phase, discussing products, hydroperoxidation and liquid systems explosiveness
06 p1032 A69-17425

- Shock tube study of ammonia oxidation at high temperature, detecting molecular species in reaction zone by IR emission
06 p0885 A69-17936

- Chemiluminescence in high temperature oxidation of methane studied in shock tube
06 p0885 A69-17937

- Plastic deformation of internally oxidized dispersion strengthened silver magnesium alloys, noting hardening effect dependence on oxidation temperature
07 p1159 A69-18627

- Tensile and creep behavior of nickel at 600 C after oxidation at 1200 C, correlating results with structural differences caused by oxidation
08 p1333 A69-20556

- Oxidation influence on molybdenum disilicide coatings emissivity, determining degree of blackness over thermal stability range
09 p1522 A69-21588

- Electron injection into ZnO from aqueous solutions of stable substances, correlating injection with oxidation potential of substance
10 p1651 A69-22940

- Oxidation effects on creep and fatigue properties of metals noting time and temperature roles
10 p1708 A69-22998

- Mineralizing metabolic wastes by catalytic oxidation of pyrolysis products, noting nutritive value of ash solutions for *Chlorella* cultivation
10 p1649 A69-23579

- Cool flames nonisothermal two-stage ignition of neopentane-oxygen mixtures, discussing chain propagation due to isomerization
11 p1940 A69-24477

- Annealing effects on titanium oxidation kinetics, indicating no relation between oxide formation and diffusion anisotropy of oxygen
12 p2112 A69-26039

- Furnace for automatic high temperature cycling in controlled oxidizing environment
12 p2093 A69-26483

- Book on oxidation and shielding of beryllium in gas media for nuclear and aircraft technology
13 p2280 A69-27927

- Nb-Ta alloys oxidation kinetics at high temperature and structure and composition of oxide films and scale layers, discussing anomaly in oxidation rate temperature dependence
14 p2464 A69-29650

- Corrosive wear due to atmospheric O in sliding metal systems, noting oxidation rate relation to wear rate and activation energy
[ASLE PAPER 68-LC-11] 15 p2622 A69-30605

- Normal, isoprenoid, dicarboxylic, keto and various aromatic acids isolated from controlled stepwise degradation of Green River kerogen by successive chromic acid oxidations
15 p2606 A69-31533

- Flexure of Ta and Nb thin rectangular specimens during high temperature oxidation, showing stress generation due to O dissolution into metal surface
[ECS PAPER 87] 15 p2641 A69-31541

- Electrochemical couples of zinc-metallic oxides or O used in battery with water electrolyte
16 p2740 A69-32421

- Flow rate effect of oxygen-argon mixture on Zr oxidation studied to determine exclusion as factor in Zr weight increase
18 p3154 A69-34272

- Low molecular weight fluorocarbons pyrolysis and oxidation in single pulse shock tubes, using vapor phase chromatography and mass spectral analyses
18 p3099 A69-34467

- Oxygen concentration effects on oxidation of synthetic paraffinic and type II ester lubricants determined from ball bearing tests at 400 and 450 degrees F
18 p3149 A69-35177

- Kinetics of titanium oxidation in transitional range at high temperatures, showing agreement with oxidation model
18 p3157 A69-35252

- Oxygen influence on low pressure ethylene decomposition on high temperature tungsten and Re ribbons surface
19 p3266 A69-36732

- Oxygen environment influence on Inconel X-750 surface deformation and cracking during fatigue related to chemisorption and oxidation
20 p3558 A69-36966

- Protective coatings for high melting point metals, discussing prevention of low temperature coating breakdown due to oxidation
20 p3561 A69-37375

- Molybdenum disilicide oxidation kinetics at various temperatures by thermal conductivity method, determining oxidation rates and activation energy
20 p3567 A69-37780

- Heat resistance and strength properties of porous Ni-base cermet materials with mica additions under high temperature oxidation
21 p3751 A69-38615

- Chromatographic analysis of products formed during induction period of 2-methylbutane gaseous oxidation in flow system at low temperatures and long residence times
21 p3669 A69-38798

- Gas phase arrest peak analogy with liquid phase oxygen cut-off during final stages of hydrocarbons gaseous oxidation reactions, noting active centers
21 p3669 A69-38805

- Oxygen pressure effect on oxide layer composition on W surface by secondary ion-ion emission
21 p3746 A69-39071

- Water purification through biological oxidation of organic wastes using controlled photosynthesis, discussing algae production and harvesting
21 p3668 A69-39711

- Preferential welding oxidation emphasized as element transfer mechanism in weld metal composition control
22 p3955 A69-40460

- Rodent swimming and treadmill training effect on capacity of mitochondrial fraction from hind limb muscles to oxidize pyruvate triples
23 p4095 A69-42084

- Nb single crystals oxidation in dry oxygen at high pressure and temperature indicating suboxide platelets existence as function of temperature
23 p4177 A69-42357

- Gamma radiation effect on AgCl-Cu redox state in AgCl activated, heat treated Na-Al-B-Si glass, using EPR method
23 p4180 A69-42471

- Oil high temperature and oxidation conditions in aircraft piston engines, including physicochemical changes
24 p4321 A69-43141

- Ellipsometer measurements for oxidation rates of binary Ti-Al alloys in vacuum and in pure and premixed gases, using in situ test cell
24 p4316 A69-43322

OXIDATION RESISTANCE

- Chemical vapor deposition of iridium coatings on graphites for high temperature oxidation protection, discussing parameters for iridium compounds and optimum depositing conditions
01 p0097 A69-10643

- Zr-Be-Nb system oxidation resistance decrease at 650 degrees C ascribed to Be and Nb additions
02 p0262 A69-11844

- Oxidation resistance of Zr-Nb-Mo alloys at high temperature in air or water
02 p0264 A69-11857

- Sulfur-organic compounds association with aromatic hydrocarbons, noting oxidation inhibiting effect on petroleum oil
03 p0494 A69-13800

- Be, Ce, V and Ti additions effect on oxidizability of cast, forged and cold worked Nb-Cr-Mo alloys
04 p0618 A69-15081

- Columbium alloys properties, discussing creep strength, oxidation resistance, costs, production, etc
07 p1164 A69-18791

- Oxidation kinetics of niobium titanium alloy in air and oxygen at 1000 C, analyzing nitrogen and pressure effects
08 p1331 A69-20193

- Oxidation kinetics of niobium titanium alloy in air and oxygen between 650 and 1000 C, analyzing activation energies and nitrogen effects
08 p1331 A69-20194

- Cobalt chromium high temperature oxidation and scale formation
[ECS PAPER 413] 08 p1332 A69-20363

Cobalt chromium alloys high temperature oxidation kinetics, discussing thermographic study of oxidation rate and oxygen pressure role [ECS PAPER 413] 08 p1332 A69-20364

Refractory metal oxidation protection by inorganic compounds at high temperatures, discussing protective mechanisms 09 p1526 A69-22322

Ductile metal clads and coatings of silicides, aluminides and noble metals to protect Cr alloys against nitrogen embrittlement and air oxidation 12 p2114 A69-26495

Chemical composition of cermet material for radial sealing of high temperature gas turbines, ensuring structural stability and oxidation resistance 13 p2275 A69-27344

Room temperature WC-Co compacts oxidation resistance in air noting increase with preliminary sintering temperature 13 p2275 A69-27345

Tungsten disilicide coated Ta-W alloy oxidation mechanisms, comparing coatings protective properties at high temperatures 13 p2280 A69-28137

Electrodeposits on molybdenum alloys in high temperature oxidizing environments, noting performance of Cr-Ni-Cr composite coating 14 p2466 A69-29934

Nb corner of Nb-Mo-Cr alloy phase diagram and oxidizability in air at high temperature 18 p3157 A69-35248

Thermoplastic polyarylsulfone thermal and electrical properties at over 500 F, noting resistance to thermal oxidative attack 19 p3355 A69-35527

Thermogravimetric study of oxidation protection of refractory metals by fused LiF coating, noting oxidation retardation of Ta, Nb and W 19 p3341 A69-35573

Boron nitride and boron nitride composite under high temperatures in air and vacuum for various time periods, discussing thermal shock and oxidation resistance 19 p3359 A69-36208

Commercial Co base superalloys oxidation and hot corrosion resistance under controlled environments, examining role of various alloying elements [ASM PAPER D8-21.5] 20 p3564 A69-38134

Oxidation resistant coating methods and systems for Cb base materials protection for aerospace vehicles and aircraft propulsion systems structures 21 p3730 A69-38672

Oxidation resistant silicide coatings for tantalum and tungsten alloys at elevated temperatures 21 p3730 A69-38673

Silicide and B-modified coatings on Mo, noting improved high temperature oxidation resistance under thermocycling 22 p3957 A69-40972

Protective coatings on Ni base superalloys for gas turbine engine blade and vane components for hot corrosion and oxidation resistance [SAE PAPER 690480] 24 p4335 A69-43515

NT LIQUID OXIDIZERS
NT LIQUID OXYGEN
NT ROCKET OXIDIZERS

Remotely operated open-cup impact tester for studying impact initiation of reaction of various liquid fluorinating agents with metals and plastics 06 p0907 A69-17876

Oxidizer particle size and binder type effects on nonoxidative combustion instability of solid propellants [AIAA PAPER 69-175] 06 p0983 A69-18152

Ignition delay of paraphenylenediamine associated with nitric acid, showing relation between grain diameter and hypergolic ignition mechanism, noting oxidizer concentration effects 15 p2561 A69-30185

Combustion of pulse heated single Al and Be particles in various oxidizers [WSCI PAPER 69-2] 16 p2830 A69-32343

Thermal decomposition behavior of perchlorate oxidizers studied by flash mass thermal analysis for determining propellant combustion kinetics [WSCI PAPER 69-19] 16 p2832 A69-32357

Ammonium perchlorate grinding and blending facility, discussing process flow, machinery, etc [AIAA PAPER 69-516] 16 p2767 A69-32664

Loaded bipropellant liquid propulsion system sterilization studies on structural and nonmetallic materials suitability for use in oxidizer [AIAA PAPER 68-631] 21 p3785 A69-39025

OXIMETRY

Statistical relations between minute blood circulation volume, O capacity and consumption rate in tissues of men and dogs 19 p3260 A69-35896

Oxygen steady state transfer across thin layers of centrifuged erythrocytes at 37 degrees C before and after hemoglobin saturation with CO 23 p4093 A69-42064

OXYFLUORIDES

Analog simulation of chemically reacting system applied to thermal decomposition of oxygen difluoride [WSCI PAPER 68-49] 07 p1073 A69-18318

OXYGEN

NT HIGH PRESSURE OXYGEN
NT LIQUID OXYGEN
NT OZONE

Fine structure of vibrational spectra of molecular H and O, water and deuterium oxide, using molecular photoelectron spectrometer 01 p0023 A69-10141

Sulfur trioxide production in photolysis of sulfur dioxide at 1849 angstroms, noting oxygen addition effect on quantum yield 01 p0024 A69-10619

Radio telescope measurements of total vertical atmospheric absorption to determine effective mean free path of oxygen and water vapor for absorption 02 p0206 A69-11450

Oxygen addition to fuel stream effect on formation of soot and polycyclic aromatic hydrocarbons in ethane-air and ethylene-air diffusion flames 02 p0205 A69-12318

Explosion limits in hydrogen-oxygen reaction measured in diffusion regime, giving rate constant of branching step 02 p0353 A69-12319

Dissociative velocity rates of oxygen and ozone in ionosphere obtained by exponential approximation for molecular concentration distribution 02 p0246 A69-12769

Electron transition probability of oxygen molecule determined using weak bands telluric lines photoelectric recordings 03 p0420 A69-13276

Oxygen surface densities measured by method based on characteristic X ray production by 100 keV protons 04 p0631 A69-14446

Solid solutions of O in Ti and Zr, noting superstructure formation and physical properties 04 p0618 A69-15078

Mathematical analysis of oxygen diffusion to coal grains during coal dust combustion, evaluating kinetic constants by burning time 04 p0687 A69-15167

Oxygen ions motion in oxygen, measuring drift velocities in glow discharge 05 p0795 A69-15662

Similarity between characteristics of T layers in oxygen discharge positive column and Gunn instabilities in GaAs, noting role of negative O ions 05 p0800 A69-15739

Corona and breakdown voltage in helium-oxygen atmospheres, analyzing conditions for manned space flight vehicles 05 p0730 A69-16241

Continuous and pulsed lasing characteristics during discharge in pure oxygen noting ozone formation and removal at tube walls 06 p0932 A69-16923

Mass spectrometric measurements to determine energy distributions of ions produced in dissociative photoionization of O molecules 06 p0960 A69-17110

Experimental and numerical nonequilibrium shock layer around cones in hypersonic pure oxygen flows with simultaneous rotational, vibrational and dissociation relaxation [AIAA PAPER 69-136] 06 p0864 A69-18141

Oxygen diffusion parameters in beta-titanium measured by successive layer removal, noting lattice constant dependence on temperature 07 p1163 A69-18783

Chemisorbed oxygen effect on electrical conductivity of zinc doped polycrystalline tin oxides 07 p1201 A69-19478

Detonation wave propagation in H-O mixtures in supersonic flow, noting detonation front structure and velocity 08 p1420 A69-19882

Rhenium effect on lattice solid solubility of oxygen in tungsten, calculating rhenium-oxygen cluster minimum binding free energy 08 p1329 A69-20007

Ionization and attachment coefficients in oxygen at low pressures, noting Paschen curves near minimum sparking potential and secondary ionization coefficient 08 p1354 A69-20099

Oxygen index test for precise flammability ratings of plastics on numerical basis, eliminating drawbacks of ignition, end point and nonequilibrium conditions operation 08 p1335 A69-20114

Platinum electrode study of electrochemical oxygen reduction in nonaqueous media, including kinetic effects of different water concentration levels [ECS PAPER 7] 08 p1268 A69-20361

Fuel cell oxygen ionization on nickel, silver and nickel-silver disk electrodes 08 p1260 A69-21045

Li atoms and O interactions with electron radiation produced defects in Si studied by IR spectroscopy 09 p1554 A69-21337

Electron detachment cross sections for negative atomic and molecular O ions with incident energies between 3 and 100 eV 09 p1542 A69-21625

Vibrational relaxation times in pure O and in O with methane impurity determined with acoustic absorption measurements 09 p1542 A69-21721

Atmospheric molecular oxygen temperatures from photoelectric recordings of absorption bands, analyzing relaxation process and photoeffects in oxygen molecules 09 p1490 A69-21863

O, Ne, Si and Fe ionization equilibria in low density plasma, including dielectronic recombination and autoionization processes in calculations 09 p1543 A69-22404

Vertical atmospheric absorption of radio waves by water vapor and oxygen molecules near rotational resonance based on radio emission measurements 10 p1658 A69-23944

Optical depth at under 110 Å due to continuous absorption by N, O and Ne ions estimated in high excitation planetary nebulae 10 p1790 A69-24140

Resonances in cross sections for electron impact excitation of forbidden lines in oxygen molecular ion at near threshold energies for astrophysical applications 11 p1921 A69-24417

Relation between electric field strength and mean energy for electron swarms in oxygen determined, using Boltzmann transport equation 11 p1921 A69-24419

Effective cross sections of UV radiation absorption by molecular oxygen in Schumann-Runge bands at high temperatures 11 p1921 A69-24617

Molecular O and total number densities between 70 and 120 km determined with rocket measurements of atmospheric absorption of solar UV and X rays 12 p2065 A69-26106

Oxygen content effect on tension-compression fatigue of alpha Ti alloys, discussing internal damage associated with twin formation 12 p2116 A69-27134

Oxygen and NO ions yields produced by dissociative attachment of electrons to nitrogen dioxide as function of electron energy, considering electron affinities lower limits 13 p2301 A69-27363

Manganese catalyst photoreactivation in photosynthetic oxygen evolution in Mn deficient alga *Anacystis nidulans* cells 13 p2210 A69-28257

Fluorescence stimulated by high energy electron and ion beams, determining vibrational temperature and concentration of molecular oxygen in high enthalpy wind tunnel flows 13 p2302 A69-28265

Thermal ignition of methane-oxygen mixture, observing flame propagation 13 p2380 A69-28459

Electron transition probability of oxygen molecule determined using weak bands telluric lines photoelectric recordings 14 p2487 A69-28784

Nighttime molecular O densities between 100- 130 km determined from Schumann-Runge absorption data for successive far UV spectra of hot star 14 p2435 A69-28959

Spectral analysis of O and Ti based on O extraction, using Ni tank in A atmosphere with DC arc 14 p2446 A69-29158

Tungsten work function increase by oxygen in diode thermionic emission, investigating crystals and vapor deposited layers 14 p2507 A69-29273

Oxygen content and grain structure influence on TSS Ti alloy mechanical properties, notch and crack growth sensitivity at low temperature 15 p2637 A69-30266

Maximum strengthening due to second phase precipitation within operating temperatures maintainable to 20 hr during aging of Nb-Hf-O and Nb-Zr-O alloys 15 p2640 A69-30632

Pressure and wavelength dependence of molecular O absorption coefficient near 1215 Å, utilizing UV emission from crossed beam atomic collision 15 p2656 A69-31031

Oxygen physiological and biochemical effects on *Pseudomonas saccharophila*, discussing sucrose uptake, lipid synthesis and polysaccharide formation 15 p2556 A69-31045

Solid fuel ignition with gaseous oxygen in presence of copper chromate and other catalysts 16 p2829 A69-31913

Lifetime of ground state oxygen molecular ions in sunlight from photodetachment rate by free electron production measurement from ions in buffer gas 16 p2848 A69-31973

Electron cooling rates due to vibrational excitation of molecular oxygen calculated as function of electron temperature in E region 16 p2774 A69-31982

Fuel cell oxygen electrode problems, noting oxygen ionization reaction and disk electrodes role 16 p2739 A69-32416

Ozone concentration photochemistry between 30-35 km, determining parameters in Hampson theory /hydrogen-oxygen atmosphere/ 16 p2787 A69-32636

Nitrous oxide-CO bimolecular reaction and O-CO recombination in single pulse shock tube 16 p2748 A69-32793

Oxygen adsorption on Mo single crystals /100/ surface as function of temperature using low energy electron diffraction 16 p2748 A69-32795

Fatigue crack growth rates in stainless steel at elevated temperature measured as function of oxygen pressure in resonant fatigue machine 17 p2987 A69-33074

Emission intensity ratio change as function of polar auroral height compared to variation in atmospheric concentration ratio of oxygen to nitrogen 17 p2963 A69-33956

Mean lives of 1s super 2 2p super 2 super 1D level in F VI and O V measured by beam foil technique 17 p3009 A69-34188

Gladstone-Dale constants for dissociating high temperature oxygen determined for molecule and atom from density changes across shock 18 p3176 A69-34452

Recombination coefficients of oxygen and nitrogen ions with electrons related to electron temperature, using microwave afterglow/mass spectrometer 18 p3176 A69-34789

Low energy electron diffraction oxygen adsorption kinetics on planes of tungsten at coverages below monolayer and work function measurements 18 p3183 A69-35106

Oxygen concentration effects on oxidation of synthetic paraffinic and type II ester lubricants determined from ball bearing tests at 400 and 450 degrees F 18 p3149 A69-35177

OGO 5 ion spectrometer for measuring oxygen, He and hydrogen ion concentration, noting functions as energetic particle analyzer and proton energy distribution measurement capability 19 p3314 A69-36679

Mesosphere and lower thermosphere molecular O density from solar radiation atmospheric absorption, using satellite measurements 20 p3523 A69-37413

C and O atoms chemisorption on Mo surface demonstrated by surface striation 20 p3562 A69-37782

Neutron activation analysis for oxygen determination in Be by gamma emission intensity from nitrogen 16, noting bound oxygen 20 p3544 A69-37811

Molecular oxygen rate of dissociation resulting from absorption in Schumann-Runge bands, calculating effects on chemistry of lower thermosphere and upper mesosphere 20 p3534 A69-38089

Carbon monoxide displacement rate of oxygen from combination with oxyhemoglobin solutions from human adult and fetal, horse, goat, dog, cat and rabbit 21 p3650 A69-38384

Emissivity of nitrogen, oxygen and air plasmas in vacuum UV region of spectrum by photographic measurement, using He recombination radiation as brightness standard 21 p3774 A69-38944

Attachment coefficients for negative oxygen ion formation in low energy electron swarms over various voltage/pressure ratios 21 p3774 A69-39238

Molecular O distribution in thermosphere from Ariel 3 observations of solar radiation attenuation, showing large and systematic variation with longitude 21 p3717 A69-39263

P-V-T surface of fluids in critical region by dielectric measurements, presenting saturation densities of oxygen [NAS-NRC PAPER H-5] 22 p4050 A69-40623

Vapor pressure equation for oxygen and nitrogen derived by adding nonanalytic term, correlating equation with observed data [NAS-NRC PAPER H-1] 22 p4051 A69-40628

Clark oxygen electrode calibration by preparation of oxygen standard aqueous solutions, noting repair by ammonium hydroxide treatment 23 p4101 A69-41451

Creep strength as function of oxygen pressure for Ni at 510 and 600 C, dropping creep rupture life to plateau of nearly constant life 23 p4176 A69-41504

O-hemoglobin dissociation curve shape effect on O affinity of hemoglobin 23 p4095 A69-42086

Niobium solution hardening by nitrogen and oxygen, noting grain size effects in electron beam refining 23 p4178 A69-42362

Ge films formation by evaporation technique, discussing background O pressure effect 24 p4361 A69-43345

OXYGEN ANALYZERS

Lightweight sensor for telemetering oxygen partial pressure in respiration air 15 p2559 A69-31231

Vacuum distillation determination of O in Li, evaluating accuracy through O additions and recoveries, method blank and residue identification 22 p3897 A69-40932

OXYGEN ATOMS

Reversed thermal conditions in mesopause, examining atomic oxygen IR radiation effect 01 p0062 A69-10129

Enhanced 6300 angstrom emission from F region auroral latitudes in terms of reaction between oxygen ions and atoms 01 p0062 A69-10137

Oxygen electron cooling effect on ionospheric electron temperatures, noting discrepancy removal throughout day at all altitudes 02 p0245 A69-12739

Photometric measurement of atomic oxygen green line emissions and high energy electron flux using twilight sounding rocket 02 p0309 A69-12743

Near mesopause atmospheric layer energy balance, noting atomic oxygen diffusion role in redistributing absorbed solar energy among atmospheric layers 03 p0422 A69-13408

Solar emission line absorption by oxygen and nitrogen atomic lines, discussing effect on upper atmosphere composition measurements 03 p0425 A69-14019

Analysis of equivalent widths as function of disk position for six photospheric neutral atomic oxygen Fraunhofer multiplets, noting O abundance 03 p0515 A69-14034

Second virial coefficient of atomic nitrogen and oxygen, discussing thermodynamic properties of dissociating mixtures 03 p0473 A69-14158

Enhanced light emission rate in adiabatically expanded NO-O reaction ascribed to molecular clusters 04 p0555 A69-14864

Autoionizing states effects on absorption cross sections for ejection of outer subshell electron from atomic oxygen 04 p0633 A69-15127

Gas laser operating on pure O-He-Ne-Ar mixture at liquid N temperatures, noting atomic O transitions, pulsed operation and energy level populations 06 p0933 A69-17259

Diffusion coefficient of interstitial oxygen atoms in tantalum by elastic energy dissipation measurements as temperature function, discussing relaxation effect 07 p1168 A69-19452

Surface recombination efficiencies on metals measured as function of exposure time in steady Oseen flows, providing step-function increase in oxygen atom concentration 10 p1726 A69-23526

Thermosphere radiative cooling by atomic O 62 micron line, noting cooling and heating rates 12 p2064 A69-26009

Winter polar mesosphere atomic-oxygen distribution by analyzing data concerning intensity and energy of corpuscular fluxes in auroras

12 p2070 A69-26690

Beam-foil technique for measuring radiative lifetimes of excited electronic states in ionic species of O, including transition probabilities

13 p2301 A69-27452

Lower ionospheric homonuclear O combinations nonequilibrium processes by simplified balance equations, determining height distributions and ozone concentration

13 p2255 A69-28542

UV OGO observations of atomic hydrogen and oxygen in airglow, comparing results to exospheric models of hydrogen geocorona

15 p2603 A69-31400

Zenith and azimuthal photometric observations of red line atomic O airglow predawn enhancement over UK

16 p2775 A69-32086

Atomic oxygen density role in ionospheric E and F region magnetic stability, noting heat loss effect of atomic excitation

16 p2780 A69-32314

Transition probability for 5577 Å auroral green line determined from measuring number density of O atoms in oxygen-helium discharge and emitted line intensity

16 p2781 A69-32319

Laser action and spontaneous emission at atomic oxygen transition, discussing pulsed emission mode in argon-oxygen laser

17 p2982 A69-33633

Radiative recombination of atomic oxygen ions in nighttime F region UV radiation detected by polar-orbiting OGO 4 satellite

18 p3129 A69-34957

Quiet aurora atomic O red and green lines intensity ratio measured from rocket

18 p3201 A69-35192

Reactive scattering from solid surfaces, discussing atom beam reaction of O with heated Ge and Si single crystals

19 p3377 A69-36178

Rocket probe devices based on thermometrical body principle for measuring upper atmosphere water vapor and atomic oxygen

20 p3543 A69-37798

Doppler broadened atomic O emission line measurement providing indication of exospheric temperature storm-time variations

20 p3546 A69-38099

Rocket photometer observations of midnight atomic oxygen glow at 6300 Å during ascending and descending flights

21 p3703 A69-38360

Diatom-monomatomic oxygen collision cross section determined from rotational line width in diatomic oxygen Schumann-Runge emission spectra

22 p3983 A69-40099

Far IR nightglow emission from atomic oxygen observed by rocket-borne liquid He-cooled telescope

22 p3940 A69-40521

Atomic spectrophotometry to monitor O atom formation rate behind shock waves in oxygen-argon mixtures, noting dissociation over 2850-5550 K temperature range

23 p4194 A69-42209

Many body perturbation theory with time dependent perturbations applied to frequency dependent polarizability of atomic oxygen

24 p4354 A69-43816

OXYGEN BREATHING

High oxygen concentration influence on animal organisms noting respiration, pulmonary gas exchange, hypoxia, brain phosphorylation, immunological indices and morphological structure of rats and mice

05 p0709 A69-16512

Electron microscopic changes in lungs of rats after repeated exposure to pure oxygen

05 p0709 A69-16514

High oxygen concentration influence at normal pressure on evoked potential of cortical optic zone and subcortical zones

05 p0709 A69-16515

Respiratory difficulties from breathing through mask compared with changes in respiration resulting from obstruction caused by physical respiratory disorder

17 p2916 A69-33774

High oxygen concentration influence on animal organisms noting respiration, pulmonary gas exchange, hypoxia, brain phosphorylation, immunological indices and morphological structure of rats and mice

18 p3095 A69-34731

Electron microscopic changes in lungs of rats after repeated exposure to pure oxygen

18 p3096 A69-34733

High oxygen concentration influence at normal pressure on evoked potential of cortical optic zone and subcortical zones

18 p3096 A69-34734

Hyperoxia and pulmonary surfactant washout in pulmonary compliance measurements of rats subjected to 100 percent diatomic oxygen before asphyxial death

21 p3659 A69-39066

Normobaric oxygen toxicity pathology in baboons and Macaca, irus and squirrel monkeys during 14 day exposure

21 p3660 A69-39179

Pituitary-adrenocortical axis of rats in oxygen atmosphere at low pressure, finding depressed norepinephrine excretion

23 p4087 A69-41790

OXYGEN COMPOUNDS

Volatile oxygen organic compounds subjected to RF electrodeless discharge, explaining product distribution in terms of reaction sequences

21 p3670 A69-39737

OXYGEN CONSUMPTION

Basal metabolism in humans restricted to prolonged bed rest, noting decreased oxygen consumption rates

02 p0197 A69-11497

Xenon, krypton, nitrogen and nitrous oxide effect on respiration rate of rat liver slices at various oxygen partial pressures

03 p0375 A69-14069

Hemoglobin diffusion influence on oxygen uptake and release by red cells solved by calculus of finite differences

05 p0707 A69-15677

Oxygen intake and body temperature of basal and sleeping Andean natives at high altitude

06 p0874 A69-17835

Hyperoxia exposure and hemolysis in tocopherol deficient mice

06 p0874 A69-17837

Transient changes in oxygen consumption, carbon dioxide elimination and respiratory quotients during and after induced hypoxia to rabbits

06 p0876 A69-18026

Petroleum sulfides advantageous effect on oxygen consumption during combustion

07 p1202 A69-19456

Prolonged exposure of rats to oxygen concentrations studied for effects on organisms

08 p1262 A69-19831

Oxygen depletion effect in chemical reactions between pyrolysis gases and air stream on surface recession of charring ablators

09 p1622 A69-21982

Space flight hypokinesia simulation experiments to study oxygen balance in man

10 p1646 A69-23507

Euglena gracilis grown heterotrophically, investigating respiratory physiology as function of glucose, acetate or ethanol growth supporting carbon source

10 p1647 A69-24186

Altitude climates effects on human performance, discussing oxygen consumption at moderate altitudes during vigorous physical activity

11 p1827 A69-24924

High vacuum effects on oxidative processes in bacteria and physiological activities of enzymes

15 p2557 A69-31354

Oxygen consumption and rectal temperature in male mice confined in nitrogen and helium diluted hyperoxic atmosphere at specific temperature and humidity ranges

17 p2906 A69-32932

Lurain simulator for metabolic studies, using BPMU for assessing O consumption of test subjects at rest and various speeds of ambulation

17 p2914 A69-33187

Respiratory gas exchange in exercise during He-O breathing, analyzing effects on O consumption, carbon dioxide production and minute ventilation of human subjects

17 p2910 A69-33751

B Coli commune cultivated on various substrates, studying oxygen consumption under aerobic/ anaerobic conditions

18 p3097 A69-35302

Statistical relations between minute blood circulation volume, O capacity and consumption rate in tissues of men and dogs

19 p3260 A69-35896

Noble gases effect at low pressures on O consumption by mammalian tissue, noting Xe, Kr, N and nitrous oxides effect on rat liver

19 p3258 A69-36454

Oxygen replacement rate by CO from combination with oxyhemoglobin in cells at various temperatures

21 p3650 A69-38385

O conductance nonlinear equation solution applied to O uptake at sea level and at altitude, noting blood transport problems

21 p3654 A69-38906

Noise influence on heart rate and oxygen consumption of young male subjects under simultaneous physical stress

21 p3654 A69-38908

Caucasian and Bantu males oxygen consumption at different work rates, gross body weight accounted for 70 percent of differences between individuals

21 p3655 A69-38911

Atelectatic and direct toxic effects of oxygen on human subjects

22 p3873 A69-40208

Human metabolic response to hypothermia measured over wide range of work intensities and durations

22 p3891 A69-40215

Energy cost of piloting helicopters and fixed wing aircraft calculated from expired minute volume and air oxygen content measured during basal state and flight

22 p3891 A69-40218

Real time metabolic rate analysis of suited astronaut using heart rate and O methods during thermal vacuum and extravehicular mobility tests

22 p3893 A69-40371

Effects of oxygen saturation variations of blood on rates of weight gain in isolated perfused canine lung, noting pulmonary edemogenesis

22 p3887 A69-41189

Oxygen consumption, ventilation and cardiac frequency relationship to body weight during submaximal exercise in normal human beings

23 p4099 A69-42169

Contraction frequency increment effects on myocardial oxygen consumption in dogs determined for various heart rate levels, using isovolumic left ventricular preparation

24 p4258 A69-42634

OXYGEN DEFICIENCY

U HYPOXIA

OXYGEN FLUORIDES

Specific impulse deliverable performance of space storable propellant combination fluorine-oxygen/methane and oxygen difluoride/diborane

16 p2845 A69-32762

OXYGEN ISOTOPES

Formation cross sections of Li, Be and B isotopes produced from oxygen 16 spallation via high energy protons related to astrophysics and cosmic ray physics

14 p2512 A69-28968

Oxygen isotope separation magnitude in zirconia electrolytic cells found proportional to mobility difference of isotopes

15 p2552 A69-30701

Normal frequencies, force constants and moment of inertia of carbon dioxide isotopic molecules from spectroscopic data, calculating atmospheric transmission of carbon dioxide laser radiation

21 p3742 A69-39780

OXYGEN MASKS

Respiratory disturbances relationship to experience and attitudes toward gas anesthesia and response to different types of face mask

03 p0378 A69-12884

Protective filter for inspiration valve of oxygen masks in high performance aircraft, reducing respiratory volume exchange with given pressure amplitude

17 p2916 A69-33773

Respiratory difficulties from breathing through mask compared with changes in respiration resulting from obstruction caused by physical respiratory disorder

17 p2916 A69-33774

OXYGEN METABOLISM

Metabolic relationship between hypoxia and hypoglycemia in Wistar rats, noting oxygen consumption, energy expenditure under insulin and hydrogen partial pressure decrease effect

09 p1445 A69-22727

Blood oxygen metabolism, analyzing content and volume circulation in dogs under oxygen partial pressure decrease in inhaled air

12 p2019 A69-26346

Lurain simulator for metabolic studies, using BPMU for assessing O consumption of test subjects at rest and various speeds of ambulation

17 p2914 A69-33187

Pt electrode as detector of red blood cell oxygenation, attempting Fe value dependence on flow velocity determination

20 p3480 A69-38283

O uptake of middle aged men, comparing short and long term endurance running effects

21 p3654 A69-38904

Reticulocyte count comparison on trained and sedentary college male subjects before and after strenuous exercise, noting role in oxygen uptake

21 p3654 A69-38907

Blood oxygen content measured by oxygen tension after release by carbon monoxide without lysing cells

22 p3873 A69-40203

Oxygen uptake and circulatory response in human male subjects during maximal treadmill and bicycle exercise

22 p3874 A69-40226

Arterial and deep venous blood from human forearm analyzed following rest and rhythmic exercise on ergometer in hyperbaric oxygen chamber

22 p3878 A69-40834

Physical exercise effect on adolescent males, comparing oxygen uptake, heart volume and height in training and nontraining groups

23 p4077 A69-41312

Steady state and time dependent concentration gradients in and around cells due to oxygen diffusion and depletion in radiobiology

23 p4090 A69-41966

Model for human hemoglobin dissociation into subunits taking into account molecular explanation of oxygen dissociation curves

23 p4097 A69-42096

Hemoglobin O reaction model explaining molecular weight and oxygen dissociation curve dependence on hemoglobin concentration

23 p4097 A69-42097

Sinus outflow relationship to oxygen content in anterior cardiac vein blood and right ventricle systolic pressure

23 p4098 A69-42105

Oxygen exchange in Scenedesmus and Chlorella as function of carbon dioxide, compensation point, Hill activity and photorespiration, using mass spectrometry

23 p4099 A69-42528

OXYGEN PRODUCTION

Interactions between intermediate fluorescence quenching trapping center and associated electron acceptor of oxygen evolving photosynthetic spinach chloroplast photosystem

01 p0024 A69-10928

Biological problems in prolonged space voyages including oxygen replacement, water supply and food regeneration

01 p0020 A69-11075

Regenerative life support systems, discussing water reclamation, carbon dioxide removal, onboard oxygen generation and radio isotope thermal energy sources

19 p3262 A69-36318

OXYGEN RECOMBINATION

Wake temperature turbulent fluctuation decay rates deduced from atomic oxygen recombination chemiluminescence

02 p0190 A69-12525

Recombination constants of dissociated oxygen and nitrogen flow in supersonic nozzle at high temperatures using modified Bray method

06 p1030 A69-17349

Recombination mechanism between CO and O produced by photodissociation of carbon dioxide in upper atmosphere of Venus and Mars

07 p1214 A69-18615

Desorption kinetics of atomic and oxide phases, analyzing composition of surface film formed from W and Mo single crystals interaction with oxygen

12 p2026 A69-26115

OXYGEN SPECTRA

Low latitude m arcs in 6300 angstrom emission during intense geomagnetic storm related to auroral red oxygen emission peak

01 p0062 A69-10136

Enhanced 6300 angstrom emission from F region auroral latitudes in terms of reaction between oxygen ions and atoms

01 p0062 A69-10137

Tropical 6300 angstrom red oxygen nightglow enhancements related to variations in height of nighttime F 2 layer, noting implications for layer structure and physics

01 p0068 A69-11113

Absorption coefficients of molecular oxygen at Lyman alpha line and vicinity measured by vacuum spectroscopy

01 p0076 A69-11230

Upper atmosphere oxygen emission and heating during geomagnetic disturbances

02 p0235 A69-11421

Intensity ratio of first negative nitrogen band and oxygen line varies in auroral displays

02 p0235 A69-11425

Photometric measurement of atomic oxygen green line emissions and high energy electron flux using twilight sounding rocket

02 p0309 A69-12743

Oscillator strength determination for Schumann-Runge band system in molecular oxygen

02 p0284 A69-12832

Molecular O 0.7620 micron absorption band in pure O and air, noting rotational lines mean half width and lower atmosphere transmission function

03 p0458 A69-13272

Transition probability measurement of 5577 A auroral green line of oxygen used to investigate quadrupole nature of transition

03 p0424 A69-13936

Analysis of equivalent widths as function of disk position for six photospheric neutral atomic oxygen Fraunhofer multiplets, noting O abundance

03 p0515 A69-14034

Temperature dependence of O VIII Lyman alpha/Lyman beta radiation ratio in solar corona, noting coronal temperature

03 p0516 A69-14042

Latitude dependence of 6300 A/O I twilight airglow enhancement attributable to conjugate photoelectrons

05 p0756 A69-16280

Ratio of volume emission rate of 5577 A photons to volume emission rate of one band of positive nitrogen molecule first negative system in aurora

05 p0756 A69-16360

Oxygen absorption coefficients for atomic silicon in spectral range of Schumann-Runge bands

06 p0960 A69-17090

Microwave radiometer for measuring mesosphere and stratosphere temperature as function of altitude using atmospheric oxygen line

06 p0924 A69-17247

Oxygen line absorption at elevated temperatures in Schumann-Runge system, estimating line widths

06 p0962 A69-17803

IR zero one band of molecular O observed in day airglow with ground based scanning grating spectrometer

08 p1306 A69-20096

Ratio of volume emission rates of 5577 A and band of positive N molecular ion first negative system for use in auroral observations

09 p1491 A69-22607

Relative band intensities of atmospheric and IR atmospheric systems of molecular oxygen compared with Franck-Condon factor calculations

10 p1681 A69-23163

M 31 galaxy ionized gas region high resolution spectroscopy, emphasizing radial velocities in O II lines at various distances from nucleus

12 p2163 A69-27020

Molecular O 0.7620 micron absorption band in pure O and air, noting rotational lines mean half width and lower atmosphere transmission function

14 p2487 A69-28780

Sodium atoms and NO molecules role in atomic O 6300 and 5577 A emissions in comet Mrkos 1957d due to charge exchanges and dissociative recombination

14 p2523 A69-29707

Absorption coefficient in three microwave lines of O with different rotational quantum numbers calculated, examining Zeeman effect in geomagnetic field

15 p2597 A69-30941

Zenith and azimuthal photometric observations of red line atomic O airglow predawn enhancement over UK

16 p2775 A69-32086

Diurnal variations of IR atmospheric oxygen bands in airglow observed with filter photometer on balloon flights

16 p2776 A69-32091

Thermosphere neutral wind speed measured from observing Doppler shift in O I 6300 night airglow line with Fabry-perot interferometer

16 p2776 A69-32093

Portable photometer with red-sensitive photocathode and high SNR for O I 6300 airglow experiments

16 p2777 A69-32107

Vertical wind effects in atmosphere on 5577 A radiation, showing dependence on atomic oxygen density

16 p2778 A69-32185

Green line suppression in type B aurorae based on negative ion-electron chemistry below O transition region

16 p2778 A69-32191

He I/1.083 mu/ and O I/5577 A/ absolute brightness measured in sunlit aurora for various shadow heights of solar radiation, considering primary electron precipitation

16 p2780 A69-32311

Transition probability for 5577 A auroral green line determined from measuring number density of O atoms in oxygen-helium discharge and emitted line intensity

16 p2781 A69-32319

Solar corpuscular and UV radiation variation relationship to midlatitude airglow intensity in O I line

16 p2850 A69-32322

Relationship between sporadic E and 5577 A nightglow emission attributable to ionization redistribution in E region due to dynamic processes

16 p2788 A69-32782

Spectroheliograms interpretation obtained in line cores of neutral oxygen IR multiplets

18 p3204 A69-35388

Forbidden lines emitted by gaseous nebulae, emphasizing relative intensities of O II and O III lines

19 p3422 A69-36220

Absorption spectrum of diatomic oxygen excited by AC silent discharge photographed with vacuum spectrograph, associating lines with Schumann-Runge band

20 p3581 A69-38276

N I nebular doublet and auroral and nebular lines of O I obtained with multifilter scanning photometer in France, Norway and at magnetic equator

21 p3712 A69-38519

Airglow and vertical eddy transport photochemical models, analyzing O green line and OH emission distribution

21 p3713 A69-38523

Intensity changes of O I nightglow emission at 100 km by transport associated with tides, gravity waves and turbulent mixing

21 p3713 A69-38526

Instrumental profile determination for high resolution stellar spectrograph, using profiles of telluric oxygen bands obtained from emission line observations

21 p3721 A69-38696

First order profile of Utrecht Solar Atlas from second order profile and oxygen band refining procedure, deducing instrumental profile for first order spectra

21 p3722 A69-38699

Forbidden absorption bands of diatomic O in Ar continuum region, determining rotational constants of upper electronic states

22 p3896 A69-40479

Dayglow O I lambda 1304 and 1356 A radiations photoelectron excitation rates theoretical calculation and experimental data on altitude dependence characteristics

22 p3939 A69-40517

Forbidden O I 5577 A dayglow emission equatorial measurements with rocket photometer, discussing altitude profiles and excitation mechanism

24 p4314 A69-43005

Auroral short period pulsations in 6300 A O I, discussing percentage modulation, quenching rate, etc

24 p4309 A69-43171

Herzberg bands synthetic spectra matched to various spectrograms to determine vibrational populations of molecular O state in nightglow

24 p4310 A69-43186

OXYGEN SUPPLY EQUIPMENT

Emergency oxygen supply systems for aircraft, discussing simplicity, standardization, safety, reliability and maintenance

[AIAA PAPER 67-965] 01 p0013 A69-11025

Water electrolysis, discussing oxygen generators for spacecraft prototype cells and testing

03 p0379 A69-12987

Soviet papers on apparatus and machines of oxygen and cryogenic installations covering film boiling, gas vessel, thermal design, etc

04 p0686 A69-15160

Oxygen supply inert diluent impurities effect on hydrogen-oxygen fuel cell performance

04 p0551 A69-15310

Oxygen reclamation from carbon dioxide using solid oxide electrolyte, noting water vapor catalytic effect

07 p1071 A69-19423

Hypoxia warning system based on dry electrolyte oxygen sensor with millisecond response time

07 p1071 A69-19430

OXYGEN TENSION

Oxygenator for weightlessness operation, generating oxygen electrolytically and passing oxygen through membrane for animal experiments
17 p2903 A69-33039

Lithium peroxide utilization feasibility for oxygen supply and carbon dioxide control in extravehicular portable life support systems
[AIAA PAPER 69-620]
17 p2914 A69-33303

Oxygen supply and carbon dioxide absorption in long term life support systems, noting energy balances comparison of ecological systems
20 p3477 A69-37625

OXYGEN TENSION NT HYPOXEMIA

High oxygen concentration breathing effect on foveal thresholds, using sea level tests on trained observers
02 p0203 A69-12216

High oxygen tension effect on transport and incorporation of exogenous leucine and protein synthesis in *Pseudomonas saccharophila* cells
03 p0369 A69-13433

Hypoxia warning system based on dry electrolyte oxygen sensor with millisecond response time
07 p1071 A69-19430

Polyimide glass fabric laminates with nonflammable characteristics for high O concentration spacecraft environments applications
09 p1531 A69-22366

Oxygen saturation in outflowing and inflowing renal blood in dogs under normal and hypoxic conditions, assessing cannula technique
14 p2406 A69-28916

Pulmonary oxygen toxicity, analyzing reticulum and elastic tissue damage and hyaline membranes by histochemical techniques
14 p2407 A69-29298

Transfer function in pulmonary ventilation and O tension in arterial blood analyzed by automatic control
19 p3260 A69-35897

Colpoda maupasis resistance to Martian atmospheric pressure and oxygen partial pressure noting adaptation, reproduction and existence
20 p3478 A69-37627

Lobeline effect on oxygen pressure in gigantocellular nucleus of medulla oblongata and respiration rates of dogs recorded automatically
22 p3888 A69-41273

Oxygen supersaturation in unstirred blood under temperature effects, noting tension loss during stirring
23 p4077 A69-41296

Rebreathing method for determining mixed venous oxygen pressure and cardiac output during rest and exercise in trained athletes
23 p4078 A69-41316

Critical oxygen pressure dependence on buffer in diluted heart muscle sarcosome suspensions and effect of hemoglobin or myoglobin
23 p4080 A69-41427

Arterial oxygen partial pressures and heart beat rates measured in humans during acute hypoxia after altitude and ergometer training, noting sensorimotor performance
23 p4086 A69-41788

Increased oxygen tension adaptation and effects on adrenocortical and sympatho-adreno-medullary activity in rats, indicating toxic conversion of epinephrine to indoles
23 p4087 A69-41791

Coronary circulation response to hyperoxia after vagotomy and combined alpha and beta adrenergic receptors blockade in anesthetized intact dog
23 p4096 A69-42088

Digital simulation of oxygen pressure fields and supply conditions in biological tissues
23 p4097 A69-42098

Oxygen effect on X ray induced somatic crossing over frequency in *Drosophila melanogaster*, noting bristle spots number modification on abdominal tergites
23 p4099 A69-42118

OXYGEN TOXICITY U HYPEROXIA

OXYGEN 18

Oxygen 18 adsorption on silicon activation analysis measurements used to obtain kinetic curve for chemisorption from monolayers
18 p3183 A69-35107

Isotopic exchange reaction rate between O 18 and CO in shock tube coupled to time of flight spectrometer, noting rate increase with time
24 p4353 A69-43807

OXYGENATION

Diffusion coefficients for oxygen transport in whole blood, discussing effects of intact red cell concentration
02 p0200 A69-12479

Oxygen effects in Type 316 stainless steel, Nb-Zr alloy liquid potassium system, discussing thermal convection and forced circulation loops and corrosion rates
12 p2112 A69-25943

Gangrene and caisson disease due to diving accidents, discussing emergency treatment with hyperbaric oxygen
17 p2911 A69-33775

Barotrauma during hyperbaric oxygenation at flight descent or reentry into caisson, including ear trauma symptoms and use of paracetamol
17 p2911 A69-33776

Tissue pressurized oxygenation during radiation therapy emphasized for overcoming tumor radioresistance attributed to oxygen deficiency
23 p4091 A69-41967

Oxygen and carbon dioxide transfer in membrane oxygenators, considering liquid dispersion and membrane diffusion limitations
24 p4279 A69-43799

OXYHEMOGLOBIN

Hemoglobin diffusion influence on oxygen uptake and release by red cells solved by calculus of finite differences
05 p0707 A69-15677

Carbon monoxide displacement rate of oxygen from combination with oxyhemoglobin solutions from human adult and fetal, horse, goat, dog, cat and rabbit
21 p3650 A69-38384

Oxygen replacement rate by CO from combination with oxyhemoglobin in cells at various temperatures
21 p3650 A69-38385

OZONE

Photochemistry in dry atmosphere, discussing ozone density vertical distribution in upper atmosphere and influence of O and ozone reactions with H compounds
02 p0245 A69-12694

Optical ozone radiosonde for vertical distribution analysis, using weak absorption of Chappuis bands
02 p0251 A69-12761

Dissociative velocity rates of oxygen and ozone in ionosphere obtained by exponential approximation for molecular concentration distribution
02 p0246 A69-12769

Atmospheric ozone photochemistry, studying time dependence on hydrogen compounds, equilibrium concentration effects on reaction rates, latitude and season
06 p0916 A69-17004

Stratospheric temperature, wind and ozone concentration measurement during solar eclipse by sounding rocket system
06 p0916 A69-17008

Vertical ozone distribution in upper atmosphere from satellite measurements of UV solar radiation scattering by solving integral Laplace equation
06 p0996 A69-17733

Time dependent model of photochemical, advective and turbulent effects on meridional ozone distribution
07 p1122 A69-18253

Nightglow intensities correlated with atmospheric ozone concentration and stratospheric temperatures
07 p1123 A69-18675

Radiative transfer equation for pure molecular scattering inverted for estimating vertical ozone distribution
07 p1126 A69-19042

Ozone distribution in Venus atmosphere measured by Soviet space probe Venera 4
08 p1382 A69-19887

Seasonal maximum ozone concentration variations, discussing vertical ozone distribution
08 p1307 A69-20260

Horizontal ozone distribution at high cyclones and anticyclones in middle stratosphere
08 p1308 A69-20261

Ozone and carbon dioxide stratospheric and tropospheric horizontal distribution from weather data collected on polar flight
09 p1484 A69-21403

Solid state ozone generator for preparing ozone in known concentrations to 1000 ppm in air for laboratory studies
10 p1693 A69-23346

Atmospheric extinction function in Chile by using photoelectric spectrum scans, observing neutral component, Rayleigh scattering and ozone absorption variations
10 p1777 A69-23386

Atmospheric optics by spacecraft and high altitude probes concerning ozone and aerosol distributions, scattering indicatrix polarization and dust cloud inhomogeneities
12 p2055 A69-25815

Diffusion of ozone distribution tracers in stratosphere, based on photochemistry in oxygen- only and oxygen-hydrogen atmospheres
13 p2294 A69-28492

Ozone concentration changes in polar regions and tropical zone due to meridional atmospheric circulation
14 p2442 A69-29830

Ozone concentrations harmful to humans in atmosphere based on U.S. and Western European observations, emphasizing lower stratosphere
15 p2596 A69-30642

Vertical ozone profiles computed from known total ozone data based on profiles taken by Umkehr method
15 p2597 A69-30896

Ozone soundings data obtained over Australia and Colorado to obtain vertical picture of synoptic climatology of ozone at midlatitudes
15 p2649 A69-30898

Rocket observations of ozone concentration above 50 km by absorption spectroscopy, noting altitude dependence
15 p2603 A69-31397

Atmospheric ozone production by silent discharges near ground level during first stage of storm cell development
16 p2785 A69-32623

Atmospheric ozone distribution in meridional plane including time effects of photochemistry, advection and turbulence assuming zonal symmetry
16 p2785 A69-32624

Vertical ozone distribution from emission and absorption in 9.6 mu band determined during IGY in Switzerland
16 p2785 A69-32625

Ozone absorption coefficients in vicinity of Hartley band maximum verified by photographic spectrophotometry
16 p2785 A69-32626

Ozone vertical distribution variations over India observed by Brewer electrochemical ozonesonde, noting effects of dry and monsoon seasons
16 p2786 A69-32627

Horizontal and vertical ozone distributions synoptic study, comparing soundings made on both sides of Atlantic
16 p2786 A69-32628

Weather forecasting correlation between atmospheric ozone vertical profiles and post sounding ground meteorological situation, describing computer data processing
16 p2786 A69-32629

Simultaneous Umkehr observations of vertical ozone distribution in upper stratosphere using two Dobson photometers, discussing deviations due to calibration sensitivity
16 p2786 A69-32631

Statistical analysis of Brewer-Mast electrochemical soundings of vertical ozone distribution for developing computer programs of climatological behavior
16 p2786 A69-32632

Ozone and temperature profiles influence on atmospheric radiation intensities measurement by satellite in five spectral regions, noting pressure broadening effect
16 p2786 A69-32633

Ozone probe network data by Brewer-Mast electrochemical instruments, discussing vertical ozone distribution near Zurich
16 p2787 A69-32635

Ozone concentration photochemistry between 30-35 km, determining parameters in Hampson theory/hydrogen-oxygen atmosphere/
16 p2787 A69-32636

Optical probe for determining ozone vertical distribution at high altitudes, discussing optical method requirements and ozonesonde construction
16 p2792 A69-32637

Statistical characteristics of ozone measurements with Dobson spectrophotometers and filter ozonometers, determining requirements for maximum effectiveness of ozone network
16 p2787 A69-32639

Ozone soundings in upper stratosphere, discussing vertical temperature profiles relationship to vertical ozone profiles
16 p2787 A69-32640

Variations in difference between integrated ozone amount by soundings and total ozone by Dobson spectrophotometers
16 p2792 A69-32642

Atmospheric ozone distribution as function of photochemical reactions, advection and vertical motions

16 p2787 A69-32643

Ozone vertical distribution in upper stratosphere determined from OGO 4 observations, describing calibration of satellite data and onboard instrumentation

16 p2788 A69-32645

Ozone concentration worldwide anomaly above 40 km in annual variations, noting dissimilarity in seasonal maximum and minimum with lower level

17 p2960 A69-33166

Ozone vertical distribution predicted statistically, using total ozone amounts and backscattered UV spectral measurements

18 p3132 A69-35426

Numerical integrations for modified model incorporating ozone production equation and heating from ozone radiation absorption and long wave cooling for upper atmospheric circulation

19 p3363 A69-36502

Atmospheric ozone detection by three-color photometer measurements of solar UV radiation attenuation in Hartley continuum

20 p3543 A69-37802

Carbon trioxide formation during ozone photolysis in liquid carbon dioxide and sulfur hexafluoride, noting ozone disappearance quantum yield independence of oxygen/ozone ratio

23 p4112 A69-41338

Model for ozone formation, distribution and decomposition at 15-45 km assuming zonal symmetry, including time effects of photochemistry, advection and turbulence

24 p4309 A69-43147

OZONOMETRY

Ozonsonde based on modified Brewer electrochemical sonde

01 p0079 A69-10218

Air movements in lower stratosphere analyzed on basis of ozone measurements, showing correlation with north-south gradient of total ozone amount

02 p0246 A69-12762

Frequent periodic variations existence in daytime ozone content associated with solar activity

12 p2070 A69-26693

Atmospheric ozone vertical distribution and total amount determined by radiative transfer and perturbation theory, presenting error analysis

13 p2255 A69-28493

Cauchy system for reflection and transmission functions of finite isotropically scattering atmospheres with specular reflectors, noting use for ozone and cloud heights measurements

15 p2597 A69-31152

Vertical ozone distribution from emission and absorption in 9.6 mu band determined during IGY in Switzerland

16 p2785 A69-32625

Vertical ozone distribution determination discrepancies between Brewer-Mast electrochemical sonde and Umkehr methods, discussing influence of seasonal and diurnal variations

16 p2786 A69-32630

Ozone probe network data by Brewer-Mast electrochemical instruments, discussing vertical ozone distribution near Zurich

16 p2787 A69-32635

Statistical characteristics of ozone measurements with Dobson spectrophotometers and filter ozonometers, determining requirements for maximum effectiveness of ozone network

16 p2787 A69-32639

Amplifier working in conjunction with solid state phase sensitive detector replacing existing commutator in Dobson ozone spectrophotometer

16 p2792 A69-32641

Variations in difference between integrated ozone amount by soundings and total ozone by Dobson spectrophotometers

16 p2792 A69-32642

FORTTRAN computer program for quality control and calculation of total ozone measurements and lamp tests for Dobson ozone spectrophotometer

16 p2787 A69-32644

Ozone concentration worldwide anomaly above 40 km in annual variations, noting dissimilarity in seasonal maximum and minimum with lower level

17 p2960 A69-33166

Ozone measurement from satellite by direct beam and scattered light methods employing UV sunlight attenuation

21 p3721 A69-38625

OZONOSPHERE

Effective temperature values of ozone used to determine onset time and disturbance height in ionosphere

02 p0238 A69-11670

Seasonal mean vertical ozone distributions obtained with electrochemical ozone sondes over southeastern Australia

02 p0276 A69-12696

Solar flares effect on ozonosphere, calculating time necessary for solar radiation to increase ozone concentration by 50 percent

03 p0424 A69-13542

Atmospheric haze effect on Umkehr measurements, considering computation from direct sounding of vertical ozone distribution and from model atmospheres

08 p1308 A69-20316

Calculated UV spectra of solar radiation reflected from atmosphere compared with satellites photometric measurements, attributing radiation intensity distribution asymmetries to seasonal dependence of ozone content

12 p2064 A69-25952

Atmospheric ozone vertical distribution and total amount determined by radiative transfer and perturbation theory, presenting error analysis

13 p2255 A69-28493

Effective temperature values of ozone used to determine onset time and disturbance height in ionosphere

13 p2257 A69-28701

Ozonosphere inhomogeneities from UV spectra of reflected solar radiation, studying latitude dependence of seasonal behavior at different heights

15 p2597 A69-30654

P

P-I-N DIODES

U DIODES

P-I-N JUNCTIONS

P-i-n structure isolation method for fabricating monolithic integrated circuits

02 p0222 A69-12471

Fe doped Ga-as p-i-n structure electrical conductivity, Hall effect, thermally induced currents, space charge bounded currents and current instability

04 p0643 A69-15263

Negative resistance in GaP electroluminescent diodes with p-i-n structure at low temperatures, noting oxygen role

13 p2226 A69-27194

Operation mode of modulator with p-i-n diode, determining modulus and phase of reflection factor

13 p2235 A69-28518

Current-voltage characteristics for double injection processes in nonideal contact p-i-n semiconductors operating in ohmic relaxation mode

13 p2323 A69-28524

Capture centers effect on current-voltage characteristic of p-i-n diodes during injection, noting negative resistance appearance

13 p2236 A69-28525

Near constant phase variable attenuator for RF signal containing Doppler information, centering design around p-i-n diode as control element

21 p3681 A69-38410

P-N JUNCTIONS

Avalanche multiplication in abrupt silicon p-n junctions analyzed using ionization coefficient measurements for holes and electrons

01 p0135 A69-10038

Gate current measurement of p-n junction during ultralow current operation of junction field effect transistor /JFET/

01 p0038 A69-10122

Silicon p-n junction avalanche current temperature dependence calculation by considering space charge current and multiplication factor as function of temperature

01 p0136 A69-10245

GaP p-n structures creation for diode sources of green and red radiation, comparing diffusion and epitaxial methods

01 p0137 A69-10259

Optically bistable operation of continuous wave GaAs p-n junction laser at 20 K

01 p0090 A69-10565

Silicon doped p-n GaAs single crystals and epitaxial layers energy spectrum, studying shift in position of emission band maximum

01 p0139 A69-10833

P-N JUNCTIONS

Indium phosphide p-n junction current-voltage characteristics various temperatures, considering degree of doping effect

01 p0139 A69-10885

Electrical properties of p-n junctions of diffused Cd or Zn in indium phosphide

02 p0294 A69-11628

Surface charge distribution in silicon p-n junctions noting luminescence of microplasmas and inhomogeneous properties

02 p0294 A69-11629

Linearized time dependent equation for photovoltage distribution in nonuniformly illuminated p-n junction

03 p0486 A69-13636

Temperature and current distribution in avalanching silicon p-n junctions

03 p0487 A69-13637

P-n junction under arbitrary transient conditions, solving one dimensional, two carrier transport equations by numerical iterative method

03 p0487 A69-13639

Carrier generation-recombination in space charge region of asymmetrical p-n junction, noting experimental results for InSb diodes

03 p0487 A69-13641

Uniaxial pressure applied to p-n junction of GaAs injection laser, discussing effects on threshold current and wavelength

03 p0441 A69-13848

Gradual capture in p-n junctions and p-n-p transistors at AC voltage, noting diffusion capacitance and resistance

03 p0491 A69-14051

Tunnel breakdown in p-n junctions used to generate microwave oscillations, discussing Si and Ge properties

03 p0492 A69-14163

Conductivity in p-n junctions during avalanche breakdown at HF calculated, noting agreement with experiments

03 p0492 A69-14164

Radiative recombination in p-n junctions in InP at various temperatures

03 p0492 A69-14166

Hydrostatic pressure effect on recombination emission in indium phosphide p-n junctions

04 p0639 A69-14428

Bistable zones in series oscillator circuit consisting of inductor and nonlinear p-n junction capacitance subjected to DC and AC voltage sources

04 p0575 A69-14463

Equivalent circuit of varactor with open p-n junction used as frequency multiplier

04 p0575 A69-14465

Charge multiplication in crystals, analyzing ionization rate, avalanche breakdown in p-n junctions, pair production and impact of impurities

04 p0641 A69-14503

P-n junction breakdown, discussing local regions of overheating and increased current density, differential resistance frequency dependence and breakdown region temperature

04 p0577 A69-14782

Cathode ray curve tracer to record capacitance-voltage characteristics of p-n junctions

04 p0602 A69-15406

Diffusion capacitance of p-n junctions, short base semiconductor diodes and p-n-p transistor, discussing systematic error in quasi-steady state calculation

04 p0580 A69-15489

High efficiency microwave oscillations in Si p-n and p-n-p positive avalanche diodes under pulsed conditions

04 p0580 A69-15491

Approximate equations in matrix form for analyzing complex semiconductor structures with p-n junctions

05 p0806 A69-15658

Probability distribution of field strength fluctuations in p-n junctions taking into account impurities distribution

05 p0807 A69-16000

Diffusion anomaly of native acceptor defect in zinc selenide telluride p-n junctions, discussing applications in triple diffusion technique of preparing p-n junction diodes

05 p0808 A69-16286

P-n planar avalanche photodiode without guard ring noting electrical properties, uniform multiplication and fabrication

05 p0733 A69-16559

Maximum transmission coefficient of distributed p-n junction signal detector compared with concentrated detector coefficient using ordinary and tunnel diodes

05 p0736 A69-16787

P-n junctions and device structures formed by ion implantation, using Hall effect and channeling techniques to evaluate implanted layer nature
06 p0974 A69-16862

Recovery rate at room temperature in Li-doped p-n Si diodes and solar cells after 1 Mev electron irradiation, noting capacitance changes
06 p0974 A69-16867

Red light emitting p-n junctions in GaP fabricated by epitaxial growth
06 p0979 A69-16999

Electric field growth directional effect on avalanche breakdown conditions in p-n junctions
06 p0981 A69-17828

Voltage dependence of depletion layer width, maximum electric field and capacitance of Gaussian diffused plane, cylindrical and spherical p-n junctions
07 p1196 A69-18242

Computer model for n-p-n transistor in integrated circuit using substrate p-n junction isolation
07 p1114 A69-18246

P-n channel MOS triode fabricated by doped-stepped-oxide method, obtaining p-channel enhancement
07 p1100 A69-18622

Forward transient response characteristics of high resistivity, long base, low lifetime p-n silicon diodes doped with Au, noting voltage oscillations
07 p1101 A69-18652

Nonlinear coupling between background illumination and illumination signal producing lateral electrical fields in p-n junction, noting effect on sensitivity of position sensor
07 p1101 A69-18654

Diffusion current detection method applied to reverse biased volt-ampere characteristics of Ge diodes, noting surface leakage role
07 p1105 A69-19007

Digital method for quantitative study of carrier circulation phenomena in semiconductors, noting Algol program and continuously polarized p-n junction
08 p1280 A69-19973

Epitaxially grown guard rings for GaAs p-n junction and Schottky barrier avalanche diodes
08 p1284 A69-20368

Photocells with p-n heterojunctions from sintered CdS, describing spectral sensitivity and temperature dependence of no-load photo EMF
08 p1374 A69-21084

Thermal EMF in epitaxial films, analyzing potential distribution in p-n junction with temperature gradients and film thickness effects
09 p1555 A69-21473

Emission intensity and beam divergence of p-n junction GaAs laser with nonlinear passive element in resonator
09 p1515 A69-21474

Semiconductor lasers, discussing materials, oscillation wavelengths, excitation methods, operating principles, fabrication, GaAs p-n junction laser and applications
09 p1518 A69-22122

GaP p-n structures creation for diode sources of green and red radiation, comparing diffusion and epitaxial methods
09 p1559 A69-22652

Recombination parameters and depth of levels of p-n junctions in semiconductor photocells determined from position of maximum spectral sensitivity
09 p1560 A69-22718

Breakdown voltage and avalanche drift instability factors in planar passivated p-n junctions as function of oxide thickness and mobile charge
10 p1743 A69-23174

Current voltage characteristics of p-n junctions in cadmium telluride, discussing spectral sensitivity bands
10 p1744 A69-23212

Drawn n-p and p-n junctions obtained in Te and Zn doped GaSb single crystals prepared in pure Hc atmosphere by Czochralski method
10 p1745 A69-23329

Positive and negative sloped current-voltage characteristics of silicon tunnel diodes with p-n junctions
10 p1746 A69-23574

Silicon doped p-n GaAs single crystals and epitaxial layers energy spectrum, studying shift in position of emission band maximum
11 p1936 A69-24700

Silicon n-p solar cell behavior during electron radiation, describing radiation resistant solar cell
11 p1825 A69-24871

Equations for pn junction behavior valid at impurity concentrations beyond nondegenerate range, noting contact potential and carrier density
11 p1938 A69-25306

LF noise mechanism for forward biased semiconductor p-n junction, noting charge carrier capture in electron traps of carrier depleted region
11 p1857 A69-25705

Solar cells physical properties and functions, considering band structure of semiconductors, p-n junction diodes and photovoltaic effect, efficiency calculations and radiation damage
12 p2015 A69-25864

Indium phosphide p-n junction current-voltage characteristics at various temperatures, considering degree of doping effect
12 p2144 A69-26649

Tunnel diode nonlinear p-n junction capacitance influence on characteristics of diode microwave self excited oscillator
12 p2043 A69-26889

Depth and planarity of zinc diffused junctions in GaP using temperature, phosphorus overpressure and time as independent variables
13 p2322 A69-28136

Laser diodes p-n junctions obtained by Zn diffusion into Ga arsenide, stressing junction flatness problem and arsenic vapor pressure effect
13 p2323 A69-28640

Ga phosphide p-n junctions formation from GaP: Ga solution, discussing electrical and luminescence properties
13 p2323 A69-28642

Bistable zones in series oscillator circuit consisting of inductor and nonlinear p-n junction capacitance subjected to DC and AC voltage sources
14 p2418 A69-28834

Small signal transient characteristics of semiconductor diodes analyzed by charge method, studying processes during p-n junction diode switching at low currents
14 p2419 A69-28918

SiC and GaP diodes used as low power light sources, studying electroluminescence in p-n region under pulsed excitation
14 p2419 A69-29325

Strain sensor using p-n heterojunction diode fabricated by vacuum evaporation onto flexible substrate
14 p2422 A69-29555

Solar conversion efficiencies of p-n and n-p diodes calculated for specified semiconductor heterojunctions using Anderson diffusion model
15 p2552 A69-30034

Gunn effect GaAs oscillators with p-n junctions, studying electrical characteristics, threshold voltages and currents during breakdown and p-n junctions injection
15 p2666 A69-30065

Spectral distribution of photosensitivity for p-n junctions in silicon doped GaAs, showing agreement with state density model and absorption data
15 p2666 A69-30067

Thermal EMF in epitaxial films, analyzing potential distribution in p-n junction with temperature gradients and film thickness effects
15 p2669 A69-30718

Emission intensity and beam divergence of p-n junction GaAs laser with nonlinear passive element in resonator
15 p2633 A69-30719

Mesa-structure varactors /p-n junction generating harmonics by nonlinear capacity variation/ reliability, determining selection criterion and optimal test duration period
15 p2627 A69-30839

Carrier lifetime in p-nu-n diodes, discussing error of forward pulsed diode method by Wilson and alternative model
16 p2757 A69-31615

Soviet book on avalanche transit time diodes and applications in microwave technology, describing p-n junction model, negative resistance, dynamic characteristics, synchronized oscillators, etc
16 p2761 A69-32109

Approximate equations in matrix form for analyzing complex semiconductor structures with p-n junctions
16 p2827 A69-32515

Plane anisotropic dielectric p-n junction layer waveguide properties, deriving characteristic equations for refraction indices
17 p2983 A69-33971

Radiation damage and recovery of lithium-diffused silicon p-n solar cells, measuring photovoltaic parameters as function of gamma radiation fluence
19 p3251 A69-35694

GaSb p-n injection laser output at 4.2 K in strong transverse magnetic field, deducing effective mass and g-factor from stimulated emission peak shift
19 p3387 A69-36530

Voltage and temperature dependence of zero-bias anomaly in GaAs p-n junction at 0.40-60 K, investigating voltage dependence of differential resistance
19 p3388 A69-36542

Book on physics of microwave semiconductor diodes covering p-n junction theory and device characteristics and applications
21 p3682 A69-38990

Tunnel p-n junctions preparation by diffusing Zn into degenerate Te doped n-type GaSb between 580-600 C, measuring volt-ampere and capacitance characteristics
21 p3780 A69-39043

Radiative recombination in GaAs p-n structures having region with concentrations of Ge atoms
21 p3780 A69-39044

Electric field regions of p-n junctions using electron beam deflection measurement, noting application to Si specimens
22 p3994 A69-40752

P-N-P JUNCTIONS

P-n-p junctions photoconductivity decay observation, determining signal bulk minority carrier lifetime in thin n regions
01 p0136 A69-10242

Gradual capture in p-n junctions and p-n-p transistors at AC voltage, noting diffusion capacitance and resistance
03 p0491 A69-14051

DC beta falloff in transistors at large collector currents measured, discussing relation to emitter crowding
04 p0574 A69-14347

Current and voltage dependence of negative differential resistance segment of current-voltage characteristic on nature of m-p contact in germanium p-n-p-m structures
04 p0642 A69-14793

Double diffused planar Ge n-p-n and p-n-p transistors with high switching speed, noting fabrication and performance
05 p0809 A69-16557

P-n-p planar epitaxial germanium microwave transistor used as amplifier in 1-4 GHz range and as high speed switch, summarizing design, fabrication and characterization
12 p2037 A69-25940

Bipolar HF p-type Si transistors preparation by B and P ion beams and planar technology masking technique obtaining p-n-p structure
22 p3916 A69-40960

P-N-P JUNCTIONS

High power pulse generators with four layer p-n-p-n structure, discussing design, principles and applications of semiconductor elements as modulators and switches
03 p0402 A69-12978

Diffusion and minority carriers drift effect on current-voltage characteristics of p-n-p-n structure in high density current
10 p1742 A69-22997

Current-voltage characteristics of p-n-p-n diodes, discussing collector voltage effect on current carrier concentration distribution in diode base
13 p2236 A69-28531

Four terminal silicon planar p-n-p-n model operating as semiconductor small signal linear tetrode amplifier, discussing properties and mathematical models
18 p3109 A69-35293

P-TYPE SEMICONDUCTORS

Intrinsic absorption temperature dependence in doped p-InSb, discussing forbidden transitions
01 p0136 A69-10255

N- and p-type InSb and GaSb single crystals microhardness, noting decrease after doping is limited to thin surface layer
01 p0139 A69-10832

Photoluminescence measurements of p-type thermal conversion in GaAs grown from silica boats, noting compensation by copper and shallow acceptors
04 p0639 A69-14434

Fermi level in n- and p-type Ge after irradiation by 50 Mev electrons determined by temperature dependence of carrier concentration
04 p0640 A69-14444

Distribution of current carrier concentration and mobility in p-type silicon doped with phosphorus ions
04 p0643 A69-15254

P-type GaSb crystals with various impurity concentrations noting conductivity, transverse magnetoresistance, Hall effect and acceptor band width and conductivity
04 p0643 A69-15259

Te and Zn doped p-type GaAs single crystals optical homogeneity, using interferometry
04 p0644 A69-15266

Low temperature spectral distribution of impurity induced photoconductivity in p-type InSb crystals prepared by zone refining

04 p0644 A69-15270

Semiconductor memory units, considering bipolar, p channel MOS and complimentary MOS chip technologies

04 p0569 A69-15362

Diffused Si and GaAs diodes electroluminescence and current-voltage characteristics

06 p0893 A69-16898

Injection characteristics of n-aluminum gallium arsenides-p-GaAs heterojunctions from recombination radiation spectra

06 p0979 A69-16993

Interface states effects on characteristics of p-channel MOS transistors

06 p0979 A69-17117

Differential thermal EMF at room temperature in p-InSb as function of concentration for different electron and hole scattering mechanisms

06 p0981 A69-17881

P-n channel MOS triode fabricated by doped-stepped-oxide method, obtaining p-channel enhancement

07 p1100 A69-18622

Hole concentration at deep energy levels in p-type indium antimonide single crystals containing structural defects

07 p1199 A69-18687

Strong p-type conductivity of silicon doped with beryllium by thermal diffusion, giving electrical and optical measurements

09 p1556 A69-21652

Current controlled negative differential resistivity observed during current-voltage measurements made with p-type Te at 77 K

09 p1557 A69-21747

Intrinsic absorption temperature dependence in doped p-InSb, discussing forbidden transitions

09 p1559 A69-22648

Voltage dependence of red and green electroluminescence in GaP diodes prepared by growing n-type liquid epitaxial layer on p-type solution grown substrate

10 p1663 A69-23664

N and p type InSb and GaSb single crystals microhardness, noting decrease after doping is limited to thin surface layer

11 p1936 A69-24699

Forward and reverse current-voltage characteristics and reverse biased capacitance for nZnSe-pGe emitter base diodes of heterojunction transistors

11 p1851 A69-25114

P-type GaAs-Ge lasing on band to band or conduction band to acceptor impurity transitions or on both transitions simultaneously

13 p2270 A69-27193

Frenkel defects in light irradiated p-type InSb single crystals at subthreshold radiation energies

13 p2318 A69-27885

Electroluminescence of p-GaAs diodes analyzed over temperature range of linear dependence of lasing on injection current

13 p2230 A69-27887

Differential thermal EMF at room temperature in p-InSb as function of concentration for different electron and hole scattering mechanisms

14 p2503 A69-28790

Semiconductor materials and fabrication methods for surface barrier junction n-type and p-type silicon counters used in hydrogen ion flux recording

14 p2452 A69-29810

Absorption band edge position in p type indium antimonide thin films after heating, showing forbidden bandwidth function relationship to film thickness

15 p2666 A69-30044

Majority carrier lifetime temperature dependence obtained from photoconductivity measurements of p-type GaAs crystals doped with Ge

15 p2666 A69-30056

Slow neutrons irradiation compensated high resistivity p-InSb current instability

15 p2666 A69-30058

Cyclotron resonance of minority carriers measured in p-type InSb, giving temperature dependences of absorption derivative and field ratio to line half width

15 p2667 A69-30068

P-type zinc-tin-antimonide crystals electric conductivity, Hall coefficient and thermal EMF found similar to p-type diamond-like semiconductors properties

15 p2667 A69-30197

Thermoelectric parameters of polycrystalline p-type bismuth antimony telluride and bismuth antimony tellurium selenide solid solutions

15 p2668 A69-30629

Negative resistance section of current-voltage curve for long diodes of p-type indium antimonide, noting magnetic field effects on electrical breakdown

15 p2581 A69-31149

Charge transport in n and p type samples of beta phase semiconducting iron disilicide, noting effect of room temperature doping

19 p3390 A69-36556

Fe-doped p-type gallium arsenide single crystal radiative recombination emission during current carriers transition from deep acceptor level into valence band

19 p3392 A69-36611

Frenkel defects in light irradiated p-type InSb single crystals at subthreshold radiation energies

21 p3782 A69-39144

Electroluminescence of p-GaAs diodes, analyzing temperature range of linear dependence of lasing on injection current

21 p3682 A69-39145

Nonlinear voltage dependence on current in p-type indium selenide single crystals, detecting negative resistance under pulsed electric field

22 p3992 A69-40602

Bipolar HF p-type Si transistors preparation by B and P ion beams and planar technology masking technique, obtaining p-n-p structure

22 p3916 A69-40960

Negative surface potential effect on noise and photoconductivity in Ge doped p-type InSb single crystals at low temperature in vacuum

24 p4362 A69-43738

Electroluminescence in doped p-type GaAs single crystal diodes ascribed to double injection of nonequilibrium current carriers

24 p4288 A69-43739

P-1127 AIRCRAFT

Low range airspeed system (LORAS) on X-22A and P 1127 VTOL aircraft for accurate airspeed information

05 p0767 A69-16774

PACIFIC ISLANDS

U JAPAN

PACIFIC OCEAN

Telemetry capability of Air Force Western Test Range noting acquisition, tracking, data processing and display and data reduction

05 p0743 A69-16304

Pacific atmospheric circulation and Pacific equatorial sea temperature winter anomalies, noting Hadley circulations, northeast westerlies, trade winds and Walker circulation

11 p1911 A69-24322

Cloud pattern characteristics in intertropical convergence zone above Indian and Pacific oceans from meteorological satellite photographs and cloud formation maps

14 p2473 A69-29728

Survey of six year period of satellite observed tropical Pacific cloud mapping

17 p2996 A69-33001

PACKAGES

U APOLLO LUNAR SURFACE EXPERIMENTS

PACKAGE

U INSTRUMENT PACKAGES

PACKAGING

NT ELECTRONIC PACKAGING

Astronaut feeding in space and NASA criteria for space foods, eliminating foods in metal tubes and directing development efforts to dehydrated foods

15 p2560 A69-31459

PACKING DENSITY

Random arrays representing random filament packing of actual composite materials, discussing effects on transverse stiffness

20 p3626 A69-37758

PACKINGS [SEALS]

Elastomer hardness criteria ensuring maximum life and performance of rotary shaft seals

16 p2794 A69-32432

PAD

Test pad isolation characteristics mathematical model to predict pad dynamic behavior

[AIAA PAPER 69-860] 21 p3690 A69-39388

PADE APPROXIMATION

Pade method applied in aerodynamics for determining detached shock wave shapes and shock waves attached at vertex of cone

19 p3241 A69-36778

PAIN SENSITIVITY

Skin temperature and cutaneous pain during warm water immersion, refuting subcutaneous thermal gradient hypothesis for stimulation of heat pain

08 p1267 A69-20683

Limits of human tolerance to localized skin exposure to IR irradiation of various intensities from pain threshold observations, noting skin temperature role

10 p1647 A69-23589

Decreasing barometric pressure effects on abdominal gas volume in military men under simulated flight conditions, noting abdominal fullness and pain

23 p4076 A69-41291

PAINTS

Color and appearance properties of paint films and relations to amounts and properties of colorants, noting translucent plastics and metallized paint films

04 p0620 A69-14886

Stress corrosion preventative metal-pigmented paints for titanium alloys, discussing chemicals added to increase cathodic potential

14 p2469 A69-29936

Painted helicopter rotor blades ruled out as cause of flicker induced vertigo, reporting pilots psychophysiological responses to formation flying

17 p2913 A69-33175

Heat sensitive paints thermophysical characteristics determined by nonstationary heat conditions method

18 p3161 A69-34697

Computer optimization of spacecraft optical coatings for temperature control, using finite element analysis and matrix inversion

22 p4050 A69-40359

PAIR PRODUCTION

Charge multiplication in crystals, analyzing ionization rate, avalanche breakdown in p-n junctions, pair production and impact of impurities

04 p0641 A69-14503

Three energy dependent quantities examined for gases, describing relation between ionization yields, cross section and loss functions

05 p0795 A69-15660

Light absorption in semiconductors with electron hole pair formation noting conduction and valence band

06 p0978 A69-16901

Energy spectra of muons determined from knock-on electrons projected angles of emission in C, Al and Cu

06 p0991 A69-17305

Quantum theory of electron gas with anomalous magnetic moments in intense magnetic fields, noting pair creation from thermodynamic energy in system

08 p1353 A69-19782

Diffusion of ion-electron pairs produced by photoionization upstream of strong shock waves to shock tube walls based on particle flux and Poisson equations

11 p1866 A69-25275

Spatial dispersion of HF dielectric constant in semiconductor based on electron-hole pair production

12 p2145 A69-26723

Inverse problem method for reconstructing electrons differential spectral cross sections and photon pair formation in electron photon cascade

13 p2303 A69-28415

Muon energy losses due to pair formation taking into account nucleus screening by electrons

13 p2304 A69-28423

Lower auroral ionosphere rocket measurements of electrons, positive ions and energy particles, deriving height variation of ion pair production and ion-ion recombination

16 p2778 A69-32187

Spatial dispersion of HF dielectric constant in semiconductor based on electron-hole pair production

21 p3781 A69-39136

Electron-positron pair formation in electromagnetic field created by coherent laser light focused into vacuum with ideal lens

22 p3965 A69-41116

Complex phenomena in theoretical astronomy including neutrino pair emission in stellar interiors, molecular H in interstellar gas, neutron stars, etc

23 p4217 A69-42316

PAKISTAN

Pakistan space research covering meteorological rocket program, Na/K vapor experiment, satellite tracking, etc

15 p2724 A69-31455

PALEOMAGNETISM

Magnetic paleointensity studies in basalts from Flagstaff, Arizona, noting oxidation effect on magnetic strength after heating

02 p0244 A69-12018

Geomagnetic field strength in early Precambrian, discussing thermoremanent normal remnant and saturation inverse remnant magnetization studies of Botswana Modipe gabbro

08 p1309 A69-20580

Remanent magnetization properties in alkalic igneous complexes at Magnet Cove and Potash Suphur Spring, Ark., calculating paleomagnetic pole during Cretaceous

14 p2445 A69-29884

Magnetic analysis by successive double heat treatment of miocene lava cooled during geomagnetic polarity reversal for determining field intensity

16 p2788 A69-32646

Ancient and present earth radii ratios determined by triangulation using paleomagnetic sites situated on different paleomeridians

22 p3937 A69-40183

PALEONTOLOGY

Synodic month length variations since late Cambrian, noting paleontological evidence in mollusks and stromatolites and associated geological changes

02 p0241 A69-11807

Molecular mechanisms leading to mineralization of organic tissues, noting role of protein and glycoprotein matrices

04 p0555 A69-14888

Gas chromatographic and mass spectrometric analyses of alicyclic hydrocarbons from Carboniferous organic materials, noting alkane distribution and evolutionary histories

17 p2917 A69-34184

Paleozoic plant fossils carbohydrate content

21 p3669 A69-39333

Prokaryotic and eukaryotic nanofossils localized in prePaleozoic microflora, noting radiometric age and association with stromatolites

22 p3935 A69-40052

Paleontological evidence to verify varying G constant hypothesis for expanding earth theory, discussing uncertainties of geological dating

22 p4017 A69-40177

PALLADIUM

Pd-D resistivity variation with D concentration at room and liquid He temperatures, discussing structural resistivity

10 p1745 A69-23357

Book on palladium alloys covering metallography of pure metal and alloys production, physical, mechanical and chemical properties and applications

10 p1712 A69-23632

Thermal diffusivity and conductivity of rolled plane parallel spectrally pure palladium preheated in vacuum and high temperatures

15 p2636 A69-30045

Hydrogen permeability in Pd alpha phase measured, coupling with grain size measurements for grain boundary to bulk diffusivity ratio

23 p4175 A69-41502

PALLADIUM ALLOYS

Room temperature lattice spacings of PdIn, PtIn and PtSn alloys including magnetic susceptibility

05 p0779 A69-15832

Book on palladium alloys covering metallography of pure metal and alloys production, physical, mechanical and chemical properties and applications

10 p1712 A69-23632

Salt bath brazing for honeycomb structures, describing brazing techniques for thoriated dispersed Ni and NiCr, Rene 41 and Ti honeycomb panels

19 p3320 A69-35557

PAM [MODULATED]

U PULSE AMPLITUDE MODULATION

PANEL FLUTTER

Panel flutter in supersonic flow, using finite element approach in matrix displacement methods to derive aerodynamic influence coefficient matrices

04 p0676 A69-14707

Supersonic flutter of circular cylindrical heterogeneous orthotropic thin panels of finite length, obtaining nonlinear flutter equation

08 p1413 A69-20404

Supersonic flutter solutions using finite elements, analyzing rectangular plate bending elements, square simply supported and clamped panels, low aspect ratio configurations, etc

11 p1991 A69-25516

Flutter design charts for isotropic panels stressed to verge of buckling for typical values of structural damping

11 p1992 A69-25524

Perturbation method for nonlinear panel flutter at high Mach numbers, using von Karman large deflection plate theory and quasi-steady aerodynamic theory

13 p2364 A69-28204

Nonlinear Galerkin analysis of curved plate flutter, using shallow shell/von Karman equations and quasi-steady aerodynamic theory

13 p2364 A69-28207

Membrane flutter and panel stability in supersonic flow, considering infinite aspect ratio equation solution through Galerkin method

13 p2365 A69-28236

Panel flutter under loads along profile, evaluating constraints dynamic characteristics by Hamilton principle

15 p2712 A69-31001

Aeroelastic nonlinear panel stability in supersonic gas stream, defining hazardous conditions of critical flutter boundary

15 p2716 A69-31549

Supersonic flutter in square panels and cylindrical shells, measuring critical dynamic pressure

17 p3051 A69-32923

Structural damping effects on semiinfinite panel boundary aeroelastic limit by Galerkin variational method

19 p3437 A69-36148

Panel flutter testing in supersonic blowdown wind tunnels, analyzing model and test chamber layout

21 p3847 A69-39859

Supersonic panel flutter boundary of buckled and unbuckled clamped rectangular plates, discussing in-plane stress effects

22 p3930 A69-40584

Natural frequency of thin plate subject to cylindrical bending, analyzing panel flutter by three mode approximation for large buckling deflection

22 p4045 A69-40821

Buckled rectangular plates with constrained edges, analyzing natural frequencies as basis for supersonic panel flutter analysis

22 p4046 A69-41049

Shearing force and shear buckling deformation influence on supersonic panel flutter boundary of simply supported rectangular plates, basing analysis on deflection approximation

24 p4400 A69-43055

Initial deflection and internal pressure effects on supersonic panel flutter boundary of simply supported rectangular plates under diverse middle-surface stress conditions

24 p4400 A69-43056

Aeroelastic stability of thin plates exposed to supersonic flow using singular perturbation methods, obtaining flutter boundary and membrane solution

24 p4403 A69-43573

PANELS

NT CURVED PANELS

NT RECTANGULAR PANELS

Sandwich panel construction, examining design with respect to panel size, thickness and weight limit

03 p0524 A69-13124

Long term weather and radar transmission effects on three ply fabric cloth fire-retardant polyester resin radome panel

08 p1414 A69-20485

Elastic anisotropic panels mechanics analyzed using differential equations stressing transverse displacements, anisotropic thermal expansion, shape imperfections and slip deformations

15 p2711 A69-30904

Variational principles and differential equations of thin elastic panels mechanics for aerospace structures

15 p2712 A69-30974

Wide panel Ti structural extrusions with integral stiffeners, discussing material, sizes, properties and tolerances

19 p3319 A69-35552

Stiffened integrally formed panel stability evaluation based on compression structural efficiency and manufacturing costs

[AIAA PAPER 69-760] 19 p3434 A69-35660

Multilayer sandwich panels containing unequal facings with distinct orthotropic cores, calculating dynamic load and stability of triangular panels

21 p3832 A69-38418

Mathematical method of processing test data air-frame panels subjected to repeated static loads to obtain lifetime equations and statistical characteristics

24 p4400 A69-43086

PANORAMIC SCANNING

Aerial panoramic camera with instantaneous exposure using combined Bouwers concentric lens system and between lens shutter

09 p1499 A69-22246

KB-18A rotary prism moving film panoramic aerial strike camera

15 p2614 A69-31281

PANTAR CHONDRITES

Carbon content and isotopic composition in light and dark portions of gas-rich chondrites Breitscheid and Pantar

19 p3408 A69-36081

PAPER CHROMATOGRAPHY

Pyrimidine and purine bases analysis by time of flight mass spectrometry and paper chromatography

11 p1832 A69-24738

PARA HYDROGEN

Gaseous and liquid H refractive index variations with pressure and density below room temperature, noting Lorentz-Lorenz function variations

02 p0281 A69-12180

Proton spin-lattice relaxation time in dilute liquid and gas solutions of orthohydrogen in parahydrogen, noting dependence on temperature, density and composition

06 p0961 A69-17141

Ultrasonic velocity dispersion in para hydrogen and mixtures with He, Ne and Ar at 300 K, obtaining rotational relaxation times

16 p2815 A69-32791

Solid para hydrogen coated graphite particles expulsion into interstellar medium from star formation regions, considering mantles stability and particles extinction efficiency, albedo and phase function

20 p3601 A69-37492

PARABOLAS

Parabolic interpolation method for values of function given for certain values of argument and of first derivative, including numerical examples

12 p2121 A69-26434

PARABOLIC ANTENNAS

On-axis gain of parabolic reflector antennas with rough reflecting surfaces as function of surface deviation, correlation distance, area and wavelength

01 p0041 A69-10246

Spacecraft pencil beam parabolic antenna design and installation, discussing directivity factor variation with diameter and orientation accuracy effects

01 p0030 A69-10581

Constant beamwidth antenna consisting of parabolic reflector and ridge loaded horn, noting conical scan tracking antenna application

02 p0218 A69-12325

Gain factor of offset-fed paraboloidal reflector as function of angular aperture and offset angle, noting phase error effects

02 p0218 A69-12329

Testing program using electrical measurements for determining adequacy of erectable parabolic reflector for space missions

02 p0223 A69-12812

Geodesic lens radar antennas, discussing air filled devices operated in TEM mode, inclusive Luneberg lenses, double layer pillboxes and parabolic lenses

03 p0402 A69-13184

Millimeter wave lunar radar system component specifications and design with paraboloidal antenna, emphasizing reflectivity of moon

03 p0397 A69-13725

Simultaneous recording of radio emission from five sections of solar active region, using parabolic antenna and single amplification/reception channel

04 p0651 A69-14377

Feed support blockage loss in parabolic antennas evaluated by shadowgraph photography

04 p0576 A69-14771

Large paraboloid radar antennas structural setting for minimizing effects on performance due to deformation of surface by gravitational forces

06 p1023 A69-17372

Optimum efficiency of paraboloidal reflector antennas, analyzing Potter method and use of hybrid modes

06 p0899 A69-17825

Parabolic antenna beam scanning by defocusing, calculating relationship between reflector and beam tilt angles

07 p1089 A69-18248

Adaptive primary feed system for wide angle beam scanning from parabolic reflector antenna, using Fourier transformation to obtain uniform power distribution

08 p1279 A69-19908

Pointing calibration of Haystack parabolic antenna by using radiometric measurements of cosmic ray sources

08 p1281 A69-20032

Synchronous servomotor for parabolic antenna of surveillance radar, discussing motor size and optimum gear ratio determination

08 p1274 A69-20108

Galactic neutral hydrogen structure in region of Cygnus observed with parabolic antenna and frequency-switched radiometer

08 p1388 A69-20243

Earth station antennas for communication satellite service, discussing design, fabrication, main lobe gain, side and back lobe suppression and noise performance

09 p1461 A69-21281

- Construction of large parabolic antennas for radio astronomy and satellite communication, noting dimensional accuracy, directional precision and dynamical behavior
09 p1476 A69-21650
- Ground station receiving antenna design and size for indirect distribution of TV programs by geostatic satellites
10 p1654 A69-23389
- Vertical parabolic antenna array and receiving system for S band transhorizon signal phase and amplitude measurement
11 p1851 A69-24987
- Multidimensional mode shapes and frequencies of 100 ft space erectable parabolic antenna
11 p1994 A69-25532
- Coaxial radiator as feed for low noise paraboloid antennas, presenting pattern synthesis
11 p1856 A69-25635
- Thunderstorm thermal noise emission determined by radiometer and steerable parabolic antenna in preparing water content contours along radio rays
12 p2127 A69-27002
- Horn exciter with fundamental and second mode in feeding waveguide of shallow paraboloid antennas
12 p2044 A69-27093
- Periodic stellar radiation at 3.5 mm from pulsar CP1919 measured by paraboloid antenna and radiometer
14 p2529 A69-29978
- Spacecraft pencil beam parabolic antenna design and installation, discussing directivity factor variation with diameter and orientation accuracy effects
15 p2568 A69-30751
- Radio antenna consisting of truncated confocal paraboloids, discussing pencil beam pattern, antenna parameters and experimental results
17 p2939 A69-33904
- Monopulse parabolic antenna radiator design for decimeter and meter wavelengths, discussing characteristic properties at optimal dimensions
17 p2939 A69-33905
- Hyperbolic EM microwave field used for contactless measurements of parabolic antenna surfaces
19 p3281 A69-35766
- Paraboloidal reflector antennas rms phase error minimization, describing axis location and determination of focus and focal length of best fit paraboloid
19 p3283 A69-35933
- Parabolic antenna properties generated by dual band circularly polarized focused two channel monopulse feed system, discussing tracking data from helicopter, Apollo 8 and Cassiopeia A
23 p4120 A69-41752
- Feasibility studies to optimized design for 440 ft steerable filled-aperture radio and radar telescope, discussing parabolic configuration, radome selection, etc
23 p4148 A69-42123
- Multisupport suspension arrangements for reducing reflector surface weight-loading distortion in steerable parabolic radio telescope antennas
23 p4149 A69-42128
- Large reflector paraboloid antenna performance under environmental loads
23 p4231 A69-42132
- Large paraboloidal reflector antenna computerized structural design, detailing framing, steering control, support structure, etc
23 p4231 A69-42135
- RMS surface error compensation in radome-housed Cassegrain parabolic antenna including weight analysis
23 p4150 A69-42137
- Focus broadening by astigmatism of large microwave parabolic antennas, discussing large span surface deformations caused by astigmatic aberration
23 p4140 A69-42188
- Zero g deployment dynamics of erectable truss parabolic antennas, obtaining latchup loads as function of reflector mechanical energy
24 p4398 A69-42827
- PARABOLIC BODIES**
- Boundary layer approximation for steady laminar flow of viscous incompressible fluid past paraboloid of revolution, obtaining vorticity distribution
07 p1120 A69-18812
- Static axisymmetric deformation of elastic paraboloid of revolution, using integration of equilibrium equation in Lamé displacement
09 p1613 A69-21631
- Finite element displacement method extension to include geometric nonlinearity applied to arbitrary plate element, shallow cylindrical shell and shallow hyperbolic paraboloid
13 p2361 A69-27441
- Integral representation of p-analytic functions of complex variable, applying axisymmetric boundary value problems of elasticity theory for cylindrical surfaces and paraboloid of revolution
15 p2714 A69-31191
- Parabolic and cardioid plates bending under uniform load by using point matching technique
16 p2874 A69-32166
- Laminar boundary layers on slender paraboloids, analyzing skin friction formula and extension for transverse curvature ranges
23 p4152 A69-41904
- PARABOLIC DIFFERENTIAL EQUATIONS**
- Nonlinear negative definite feedback control systems governed by parabolic partial differential equation, deriving asymptotic stability
01 p0050 A69-10239
- Alternating direction implicit /ADI/ methods for solving parabolic heat conduction equation with variable coefficients in two and three space dimensions
01 p0106 A69-10987
- First boundary value problem for linear second order parabolic equation with unbounded lowest order discontinuous coefficients and free terms, discussing solvability
02 p0272 A69-12222
- Nonlinear integrodifferential equations of parabolic type with delayed argument, discussing boundary value problems with caloric and hereditary operators
02 p0273 A69-12249
- Quasi-linear parabolic partial differential equations, discussing solutions, regularity, differential geometric aspects and Dirichlet problem
02 p0273 A69-12779
- Cauchy problem and mixed boundary value problem for parabolic system solved with thermal potential theory
03 p0455 A69-13259
- Necessary conditions for stability of trivial solutions of parabolic systems of partial differential equations
03 p0456 A69-13405
- Difference approximation with second order accuracy of numerical solution for parabolic type equations
04 p0622 A69-14618
- Existence theorem for periodic solutions of parabolic boundary value problem for infinite space time cylinder
04 p0624 A69-15004
- Finite difference approximation for numerical solution of periodic parabolic problem subject to nonlinear boundary condition
04 p0625 A69-15131
- Method of lines for parabolic differential equations, transforming boundary value problems into initial value problem for system of ordinary differential equations
04 p0625 A69-15132
- Boundary value problems for unstable quasi-linear elliptic differential operator class, proving theorems on properties of quasi-linear elliptic-parabolic equations in bounded space
05 p0787 A69-16424
- Optimal control of system governed by linear parabolic equation with white noise inputs, using mathematical model to generate distributed system analog
05 p0740 A69-16599
- Methods to obtain uniqueness for partial differential /elliptic/ equations boundary problem extended to parabolic conditions, analyzing necessary conditions for existence
07 p1173 A69-18728
- Stability and perturbation theory of abstract Cauchy problem with difference scheme, showing application to parabolic differential equations
08 p1343 A69-20537
- Stabilization rate of boundary value problem for parabolic equation in n dimensional space
09 p1532 A69-21627
- Homogeneous parabolic differential equation for heat transfer of two finite bodies in thermal contact solved by power series
09 p1532 A69-21628
- Boundary value problems solutions for quasi-linear elliptic and parabolic equations of arbitrary order applied to nonlinear differential equations
10 p1717 A69-22809
- Boundary value problem for elliptic-parabolic partial differential equations in theory of random processes, obtaining analytical solution in terms of hypergeometric functions
10 p1719 A69-23516
- Uniqueness and nonuniqueness of solutions of initial value problems for second order semilinear parabolic equations
10 p1722 A69-24069
- Evolutionary hypoelliptic equations with real variable coefficients, analyzing positive solutions and application to parabolic equations
11 p1908 A69-24534
- Periodic solution to boundary value problem for quasi-linear parabolic equation with nonlinear boundary conditions obtainable by Rothe method
12 p2121 A69-26282
- Partial differential equation with stochastic characteristics reducible to parabolic equation by introducing additional variables
12 p2121 A69-26366
- Nonnegative solutions of second order linear divergence structure parabolic differential equations, discussing Cauchy problem solution, Green function, etc
13 p2290 A69-28539
- Optimization of control system described by linear parabolic integrodifferential equation, using dynamic programming approach
15 p2645 A69-31024
- Algebra of quasi-homogeneous pseudodifferential operators applied to lateral boundary values of solutions of parabolic differential equations, discussing function spaces
17 p2994 A69-32842
- Single parameter family of two layer difference schemes with decomposing operators for general linear second order parabolic equations with mixed derivatives and variable coefficients
18 p3164 A69-34702
- Parabolic differential equations solved by variational methods, constructing numerical representations for solutions of initial boundary value problems
18 p3164 A69-34841
- Difference method for parabolic differential equations solution for Rayleigh boundary layer in dissociating gas, using integral estimates to determine stability
18 p3124 A69-35295
- Asymptotic behavior of solution to parabolic equation for t approaching infinity, proposing asymptotic formula to Cauchy problem for heat conduction
18 p3231 A69-35310
- Generalized Cauchy problem solution stabilization for ultraparabolic equation by integral representation of solution in positive initial functionals
18 p3165 A69-35312
- Method of straight lines applied to two phase Stefan type problem for quasi-linear parabolic equation, obtaining existence and uniqueness of solutions
20 p3567 A69-36992
- Partial difference methods from parabolic, elliptic and hyperbolic equations solved by splittings of locally one dimensional nature
21 p3754 A69-38745
- Evolutionary hypoelliptic equations with real variable coefficients, analyzing positive solutions and application to parabolic equations
21 p3756 A69-39151
- Upper and lower bounds for growth or decay rate of solutions of parabolic differential equations for indefinitely increasing time
21 p3757 A69-39565
- Variational principles equivalent to mixed problems for parabolic equations with initial boundary conditions, noting heat conduction theory
22 p3974 A69-40231
- Positive solutions of parabolic and hyperbolic partial differential equations arising as viscoelastic media equations of motion, noting maximum principle utilization
22 p3976 A69-41035
- Parabolic equation and equation systems with relaxed assumptions involving coefficients of first derivatives and unknown function, demonstrating Pogorzelski fundamental solutions validity
23 p4180 A69-41408
- Successive approximations method applied to boundary problem for quasi-linear parabolic equation in n dimensional Euclidean space
23 p4181 A69-41411
- First boundary value problem for linear second order parabolic equation with unbounded lowest order discontinuous coefficients and free terms, discussing solvability
23 p4182 A69-41973
- PARABOLIC FLIGHT**
- Sensory and physiological reactions experienced by cosmonauts during parabolic training flights, tabulating arterial pressure, heart beat and respiration rate
07 p1061 A69-18580
- Integration time reduction for equations of motion of vehicle center of mass during parabolic reentry, using Runge principle
09 p1532 A69-21763

Orientation reflexes of animals in weightlessness, analyzing turnover, vestibular and cervix reactions using motion pictures 20 p3470 A69-37248

Weightlessness tests during parabolic flight to supplement vestibular tests in astronaut selection 20 p3481 A69-37276

Motion sickness susceptibility during parabolic flight, comparing weightlessness and hypergravity effects on normal and labyrinthine-defective subjects 21 p3660 A69-39176

PARABOLIC REFLECTORS NT PARABOLOID MIRRORS

On-axis gain of parabolic reflector antennas with rough reflecting surfaces as function of surface deviation, correlation distance, area and wavelength 01 p0041 A69-10246

Gain factor of offset-fed paraboloidal reflector as function of angular aperture and offset angle, noting phase error effects 02 p0218 A69-12329

Thermomechanical analysis of large flexible paraboloid antenna indicates RF losses due to thermal distortions significant for X band and higher transmissions [AIAA PAPER 68-333] 02 p0345 A69-12372

Testing program using electrical measurements for determining adequacy of erectable parabolic reflector for space missions 02 p0223 A69-12812

Interferometer at lambda 21 cm using fully steerable paraboloids for processing output signal with on-line digital computer 03 p0411 A69-13468

22-m parabolic reflector radio telescope with 9525 mm focal length at Crimean Astrophysical Observatory, noting high performance in mm wavelength range 04 p0584 A69-14376

Mathematical models relating gain, cost, diameter, frequency and rms surface tolerance of ground antennas for exposed and radome enclosed parabolic reflectors 04 p0561 A69-15449

High temperature directional reflectance measurements of ablative materials as function of sample temperature using paraboloid reflectometer [AIAA PAPER 68-25] 04 p0604 A69-15512

Optimum efficiency of paraboloidal reflector antennas, analyzing Potter method and use of hybrid modes 06 p0899 A69-17825

Pressure formed parabolic reflectors for millimeter waves, discussing electrical measurements at 30 GHz 08 p1282 A69-20039

Earth station antennas for communication satellite service, discussing design, fabrication, main lobe gain, side and back lobe suppression and noise performance 09 p1461 A69-21281

Impulsive solar microwave bursts observed by parabolic reflector, obtaining bursts spectra and total flux density 09 p1579 A69-22178

Dual reflector antenna design methods for obtaining necessary phase and amplitude illumination across secondary aperture in low noise applications 11 p1852 A69-25316

Number 2 ground communications antenna system on Goonhilly Downs for British Post Office earth station 12 p2044 A69-26923

Doubly curved reflectors for rotating search radar directional antenna, noting assembly of elliptical strips constituting segments of parabolic dishes and sidelobe suppression 16 p2763 A69-32790

Horn antenna with parabolic reflector for 30 cm wavelength, calculating field distribution, main and sidelobe radiation patterns and aperture efficiency 17 p2937 A69-33147

Paraboloidal reflector antennas rms phase error minimization, describing axis location and determination of focus and focal length of best fit paraboloid 19 p3283 A69-35933

Space erectable microwave truss antenna automatically deploying rigid parabolic reflector 22 p3913 A69-40696

Computerized evaluation of elastic deformations of 100 m parabolic reflector designs for Max Planck Institute radio telescope, outlining supports and dish structure 23 p4148 A69-42122

Multisupport suspension arrangements for reducing reflector surface weight-loading distortion in steerable parabolic radio telescope antennas 23 p4149 A69-42128

Parkes paraboloid radio telescope structural performance, using rapid survey instrument to measure surface deformations for optimum focusing determination 23 p4231 A69-42130

Large reflector paraboloid antenna performance under environmental loads 23 p4231 A69-42132

Canadian radio observatory 150 ft telescope antenna, discussing dish structural feature for resisting gravity, wind and thermal stresses 23 p4149 A69-42134

PARABOLIC VELOCITY U ESCAPE VELOCITY

PARABOLOID MIRRORS

Far and near fringe radiation of asymmetrical mirror and horn antennas by method of boundary waves 02 p0214 A69-11601

Radiant flux reflected by mirror and incident on receiver for paraboloidal solar devices, obtaining heat loads and radiant energy formulas 09 p1436 A69-21803

Circular central shading effect on energy distribution parameters of paraboloidal mirrors, noting reflected radiant flux power limitation 09 p1436 A69-21804

Far and near fringe radiation of asymmetrical mirror and horn antennas by method of boundary waves 11 p1846 A69-24708

Mirror correctors used with paraboloidal spaceborne telescopes in far UV, yielding enlarged photographic field 13 p2261 A69-27949

Thermionic converter matched with solar cells analyzed for parabolic mirrors, assuming heat conduction power supply to cathode and uniform temperature distribution 13 p2209 A69-27970

Electric field distribution in focal region of finite offset paraboloid reflector illuminated by linearly polarized plane wave 13 p2234 A69-28427

Rotation of antenna pattern of radio telescope parabolic mirror subjected to thermoelastic deformations due to asymmetric solar heating 20 p3497 A69-38307

PARABOLOIDS U PARABOLIC BODIES

PARACHUTE DESCENT

Mathematical formula for estimating cost and efficiency of parachuting supplies, noting shock load reduction 07 p1053 A69-19140

Coordination technique for pressure, density and temperature measurements by probes during parachute reentry into planetary atmospheres, taking into account reentry dynamics 09 p1609 A69-21775

Shock force calculation for parachute of arbitrary canopy design, illustrating simplification permitting differential equation solution in closed form 15 p2551 A69-31172

Atmospheric wind shear velocity snapping effect on yarn suspending instrument package from balloon gondola during parachute recovery 17 p2975 A69-33613

Canopy filling time for parachutes under infinite mass conditions, using continuum equation and parachute inflation concept [AIAA PAPER 68-12] 17 p2902 A69-34032

NASA planetary entry parachute program for rocket launched and balloon deployment tests [AIAA PAPER 68-934] 19 p3247 A69-35952

Distance of spacecraft descending on parachute through planetary atmosphere measured from center of planetary mass using onboard instrument data 19 p3432 A69-36633

Initial phase of parachute inflation in incompressible flow [AIAA PAPER 68-927] 20 p3461 A69-37165

Buoyant Venus Station balloon for deployment and inflation during parachute descent into Venus atmosphere tested with scale model balloons in wind tunnels [AIAA PAPER 69-1017] 22 p3922 A69-40389

PARACHUTE FABRICS

Mission sequential environment effects on Dacron parachute material mechanical properties [AIAA PAPER 69-1018] 22 p3923 A69-40390

PARACHUTES

NT DRAG CHUTES

NT RECOVERY PARACHUTES

NT RIBBON PARACHUTES

Photographic measurement of parachute exit velocity during ejection from chute, describing electronic recording and unit operation with block diagram 08 p1317 A69-20875

Parachute deployment load control by use of line ties from rocket sled tests 11 p1823 A69-25386

Hypersonic parachute structural design using nylon ribbon, glass fiber heat shield and ablative coating construction [AIAA PAPER 68-963] 21 p3647 A69-39230

Automatic, semiautomatic and manually operated parachute release systems used in Switzerland 24 p4252 A69-42911

PARACHUTING U PARACHUTE DESCENT

PARADOXES

Paradoxes associated with elastic-plastic limit load analysis of material satisfying Drucker stability postulates 02 p0337 A69-11562

Unlimited extrapolation into infinity to determine ranges of applicability of theories in relativistic cosmology noting paradoxes 14 p2516 A69-28867

Negative time interval implications for meta particle at superluminal velocity with respect to two reference frames, noting causality paradoxes 20 p3598 A69-37412

Paradox of incoming photons detection at two antennas without interference pattern disturbance explained by classical and quantum physics 20 p3538 A69-37415

PARAFFINS

Mathematical model for melting of finite paraffin slab based on method on numerical computer solution of heat conduction equations for thermal control devices 12 p2190 A69-26785

Steel ball bearing high temperature fatigue life tested with synthetic paraffinic oil, fluorocarbon and polyphenyl ether [ASME PAPER 69-LUBS-18] 18 p3140 A69-34378

Oxygen concentration effects on oxidation of synthetic paraffinic and type II ester lubricants determined from ball bearing tests at 400 and 450 degrees F 18 p3149 A69-35177

PARAGLIDERS

NT FLEXIBLE WINGS

NT PARAWINGS

Equations of motion of point restricted tethered parafoil for investigating longitudinal and lateral dynamic stability 01 p0009 A69-10415

Paraglider as recoverable sounding rocket dropped from helicopter, describing system design and flight tests [UN PAPER 68-95445] 01 p0161 A69-10465

PARALLAX

Solar gravitational field influence on annual trigonometric parallaxes within relativistic theory framework 03 p0506 A69-13091

Photographic plates based parallax determinations of nearby stars weights, relative and absolute values, probable error and observation interval 04 p0663 A69-15381

Parallax and mass ratio of visual type K6 dwarf binary system, ADS 1865, BD plus 30339 13 p2349 A69-27811

Parallax and orbital motion of spectroscopic binary Tau Persei determined from Sproul refractor photographs 13 p2349 A69-27812

Photographic recording of parallax, proper motion, acceleration and orbital motion of Barnards star, noting mass ratios to jupiter 13 p2349 A69-27813

Relative parallax, fractional mass and luminosity of visual binary 1785 determined from photographs taken with Sproul refractor 13 p2349 A69-27814

Visual binary star parallax, motions and mass ratio determined using photographic data 13 p2349 A69-27815

Solar gravitational field influence on annual trigonometric parallaxes within relativistic theory framework 14 p2516 A69-28773

Holographic photogrammetry compared with conventional holography in monocular and binocular 14 p2516 A69-28773

parallax reconstruction and stationary stability of objects
22 p3944 A69-40044

PARALLEL PLATES

Symmetrically truncated right angle E-plane corner, placing electric and magnetic walls in symmetry plane, solving resulting boundary value problems
01 p0044 A69-10624

Accommodation coefficient effect on linearized heat transfer in rarefied gas between parallel plates and concentric cylinders
01 p0177 A69-11405

Heat transfer of steady laminar flow of incompressible, viscous and electrically conducting fluid between parallel porous plates
02 p0289 A69-12235

Reflected and transmitted radiation fields for dielectric loaded infinite phased array of parallel plate waveguides as function of scan angle
02 p0218 A69-12326

Admittance of parallel plate waveguide aperture with infinite flange illuminating metal sheet, using wedge diffraction theory and integral transform method
02 p0218 A69-12328

Stationary, moving and pulsating electrohydrodynamic flow between parallel dielectric plates and Couette flow, noting reaction concentration near wall
03 p0419 A69-13919

Dispersion of solute in electrically conducting fluid flowing between two parallel plates in magnetic field
04 p0638 A69-15194

Flow of two conducting immiscible liquids between parallel porous moving plates under transverse magnetic field
05 p0743 A69-15600

Real liquid turbulent flow of two parallel eddy streams between two parallel walls with given periodic roughness
05 p0747 A69-16034

Mathematical problem of MHD thermal entrance regions for parallel plate channel solved by Galerkin method [ASME PAPER 68-WA-HT-10]
05 p0803 A69-16118

Radiative heat transfer between parallel plates separated by nongray gas with picket fence absorption coefficient using integral equations
06 p1033 A69-17554

Laminar heat transfer in electrically conducting fluids flowing in parallel plate channels [JPL-TR-32-1335]
06 p1033 A69-17555

Bounds on mass and momentum transport by turbulent flow between parallel plates derived for Couette and Poiseuille flows
08 p1305 A69-20840

Rarefied gases back diffusion between parallel plates used for studying diffusion in capillaries, deriving volume flow equation valid for any density
10 p1677 A69-22903

Hydromagnetic laminar natural convection flow and heat transfer of nonNewtonian fluid between parallel electrically conducting walls
10 p1728 A69-23237

Heat transfer in MHD parallel plate channel flow in entrance regions analyzed by Galerkin method, noting Hall current effect
11 p1923 A69-24290

Equal inclination interference fringes effects on laser beam reflection from plane parallel glass plates, evaluating angular distance between adjacent fringes
11 p1896 A69-24840

Gas jets collision flowing from parallel wall channels, applying solution to calculating geometrical characteristics of fluid jet amplifiers
12 p2016 A69-25879

Inertia effect on incompressible fluid film pressure between two oscillating parallel plates, considering Reynolds number
12 p2102 A69-26241

Hydromagnetic fluid flow between flat plates oscillating with phase difference, same frequency and different amplitudes
12 p2135 A69-26273

Pressure distribution in viscous flow between parallel disks with sinusoidal oscillation, noting effects of oscillation amplitude and vibrating disk velocity [ASME PAPER 68-LUBS-1]
13 p2244 A69-27278

Cellular convection suppression by parallel vertical thermally conducting walls inserted into bottom-heated fluid, analyzing effect on critical Rayleigh number
13 p2374 A69-27782

Turbulent flow in circular tube and parallel plate channel, considering molecular viscosity and duct shear stress variation
13 p2248 A69-28131

Radiative heat transfer calculations between parallel surfaces, applying approximations based on total emissivities to known spectral emissivities
14 p2539 A69-29223

Knudsen arcs kinetic theory with cesium/inert gas mixtures in narrow gap between parallel plate electrodes, discussing fast particle beams and electron scattering
14 p2491 A69-29245

Steady incompressible MHD laminar flow between parallel porous disks solved for large Reynolds and Hartmann numbers
15 p2662 A69-30968

Linear array composed of dual mode elements radiating into parallel plate region, obtaining scan angle compensation of element impedance
17 p2929 A69-33875

Reflection coefficient of symmetric parallel plate waveguide operating in TEM mode illuminating lossless dielectric layer, using wedge diffraction and geometrical optics methods
18 p3108 A69-34802

Rarefied gas flow between parallel plates using linearized Boltzmann transport equation, deriving integral equation for mass flow velocity
19 p3296 A69-35621

Pressure gradient produced steady plane flow of Maxwellian gas between infinite parallel planes, describing linearized Boltzmann equation solution
19 p3379 A69-36604

TEM mode reflection coefficient for symmetric parallel plate waveguide composed of adjacent conducting wedges composition and radiating into perfectly reflecting sheet
20 p3507 A69-37839

Heat transfer in radial flow between two parallel plates, calculating Nusselt number for laminar and turbulent flows
20 p3633 A69-38176

Temperature distributions and heat transfer in thermal entrance region for Hartmann liquid flows under constant pressure gradient between parallel electrically conducting walls at rest
21 p3847 A69-38442

Effective thermal conductivity parallel to laminations and total conductance for combined parallel and normal heat flow in multilayer insulation [AIAA PAPER 68-765]
21 p3853 A69-39763

Omnidirectional microwave parallel plate waveguide fed antenna design for flush mounted broadband spacecraft, noting equatorial and polar patterns
22 p3913 A69-40697

Capacitance sensor of vertical with flexible mobile electrode, describing diagram and operation
23 p4163 A69-41550

Surface integration technique used in conjunction with wedge diffraction theory to analyze TEM radiation patterns of parallel plate waveguides
23 p4136 A69-41581

Monte Carlo method applied to heat transfer in rarefied gas flow between parallel plates involving temperature jump in Knudsen layer
24 p4246 A69-43490

Lateral heat conduction and radiation along two parallel long plates separated by nonabsorbing dielectric with refractive index of unity
24 p4415 A69-43594

Gas velocity and pressure influence on electrical breakdown potential of Ar, N and He between parallel flat plate and concentric electrodes
24 p4359 A69-43693

PARALLELEPIPEDS

Unsteady three dimensional heating of finite solid rectangular parallelepiped, deducing expressions for rectangle and slab
15 p2717 A69-30790

Potential functions applications to three dimensional static elasticity problems of parallelepipeds, using general stress solution
15 p2715 A69-31216

Large elastic deformations of isotropic materials by deflection of composite parallelepiped composed of elastic incompressible materials, applying Rivlin solutions
22 p4048 A69-41277

PARALLELOGRAMS

Free vibration frequencies of simply supported parallelogrammic plates, noting skew angle splitting of degenerate frequencies and frequency crossing of modes
11 p1987 A69-25379

PARAMAGNETIC AMPLIFIERS

U MASERS

PARAMAGNETIC RESONANCE

NT ELECTRON PARAMAGNETIC RESONANCE

Acoustic paramagnetic resonance in arsenic doped germanium, measuring spin-lattice relaxation
02 p0296 A69-11835

Paramagnetic resonance of Er ion in calcium tungstate single crystal, determining spin-Hamiltonian parameters
04 p0643 A69-15141

Amplitude modulation of radiation pulses of two level paramagnetic maser as affected by inhomogeneous broadening and spinning of resonance line
07 p1158 A69-19751

Ultrasonic paramagnetic resonance investigations of Pr ions ground state energy levels in calcium fluoride
24 p4360 A69-42790

PARAMAGNETISM

Quantum paramagnetic amplifier using natural andalusite single crystal and operating with four level pumping
04 p0577 A69-14781

Radio spectrometer with paramagnetic quantum amplifier for astronomical spectral measurements in 8 mm range
04 p0597 A69-14851

Motion equations for conducting paramagnetic fluid in magnetic field derived, including MHD equations and equation determining magnetic moment variation rates
11 p1932 A69-25465

Coupled magnetoacoustic waves in conducting paramagnetic fluid in resonance region due to mechanical and magnetic motions, considering dissipation
14 p2492 A69-29609

Radio spectrometer with paramagnetic quantum amplifier for astronomical spectral measurements in 8 mm range
15 p2607 A69-30243

PARAMECIA

UV and visible light interaction effect on biological activity of Paramecia unicellular infusoria, noting cell division rates and cell deaths
01 p0017 A69-11085

PARAMETERIZATION

Monte Carlo simulation procedure synthesizing probability distributions of reliability parameters with individually exponential components
01 p0036 A69-10707

Simultaneous estimation of parameters in multiple equation regression model arising from radioactive tracer experiments using compartmental models
01 p0106 A69-10926

Nonlinear viscoelastic bodies arising in 3d rheological models with hidden parameters behaving according to law compatible with objectivity and 2nd thermodynamics principles
01 p0171 A69-11131

Equations, tables and charts for shock drag parameter in determination of shock wave drag of body in supersonic free stream of ideal gas
02 p0188 A69-11862

Parametric analysis of life support systems developing scaling laws adapted to computer solutions, discussing manned orbital missions [SAE PAPER 680746]
03 p0379 A69-13438

Electron beam welding procedure planning and production shop control parameters
04 p0605 A69-14529

Optimization of control functions and parameters of dynamic systems with variable structure and discontinuous phase coordinates
04 p0582 A69-14795

Continuous parameter identification methods for parameter optimization in automatic control system analysis and synthesis, using modified steepest descent optimization
05 p0725 A69-16474

Linear distributed parameter system identification by stochastic approximation, obtaining constant parameters sequentially
06 p0900 A69-17358

Type 2 radio burst dynamic spectra determination for finding shock wave and magnetic field parameters above active corona region
11 p1945 A69-24243

Book on nonlinear systems analysis and design covering parameter mapping, symmetrical, transient and forced oscillations and stability analysis
12 p2129 A69-26121

Parametric variations method for solving nonlinear algebraic and transcendental equations, determining number of solutions in complex space

12 p2123 A69-26608

Loitsianski method of parametric approximation extended to include flat plate with constant surface suction and flow past cylindrical cylinder

13 p2249 A69-28247

Rotary oscillatory solution of parameterized system with stable unexcited motion using successive approximations

14 p2482 A69-28812

Parameters distinguishing analytic queueing models of time sharing algorithms, emphasizing techniques used for analyzing round-robin and multiple level queueing models

19 p3279 A69-35600

Parametric differentiation applied to radiation gas dynamics equations solution, considering energy transfer by thermal radiation in high speed reentry [AIAA PAPER 68-668]

23 p4059 A69-41892

Multidimensional approximation algorithm for parameter optimization of nonlinear stochastic systems, detailing application to space vehicle attitude controller

24 p4291 A69-43275

PARAMETERS

U INDEPENDENT VARIABLES

PARAMETRIC AMPLIFIERS

Hybrid integrated parametric amplifier design considerations for fabrication in microstrip transmission line

01 p0040 A69-10193

Broadband parametric amplifier used as front amplifier in satellite communication systems ground station receiver, noting cryogenic operation capability

01 p0041 A69-10243

Forward current shot noise in parametric amplifiers using GaAs varactors, noting additional noise due to stored minority carriers current

01 p0048 A69-11137

Parametric vibrations of self excited elastic and aeroelastic systems with traveling waves, determining stable vibration boundaries

02 p0337 A69-11561

Summed and differential types of higher order oscillations in vibratory systems with multiple degrees of freedom under parametric excitation

02 p0346 A69-12422

Liquid helium cooled broadband parametric amplifier, discussing circuits and noise performance

02 p0221 A69-12458

Tunable optical parametric oscillator using argon laser CW output as pump and lithium niobate as nonlinear crystal

02 p0260 A69-12701

Low noise broadband parametric amplifier for communication satellite ground stations

03 p0406 A69-13733

Phase input power characteristics of TWT, TDA and parametric amplifiers, noting crosstalk calculations and AM-PM conversion coefficients

04 p0573 A69-14336

Noise reduction in parametric electron beam amplifier by cooling two frequency resonator noise to liquid nitrogen temperature

05 p0728 A69-15654

Traveling wave maser and cooled parametric amplifier for ultralow noise preamplification in satellite communication earth terminal installations

05 p0728 A69-15670

Nonlinear optics, discussing frequency mixing, induced changes in dielectric constant and parametric amplification in microwave region of spectrum

05 p0772 A69-16229

Microwave absorption and series resistance of silicon mesa parametric amplifier diodes, discussing p-n junction and dielectric loss mechanism

05 p0732 A69-16347

Oscillations of cylindrical orthotropic three layer shell having ideal fluid flow at variable rate, establishing parametric resonance and determining limits of shell motion instability regions

06 p1022 A69-17186

Transmission coefficient of double frequency regenerative parametric amplifier described by scattering matrices

06 p0895 A69-17456

Frequency and power stable backward wave oscillators as energy pumps for molecular and wideband parametric amplifiers used in satellite receivers

07 p1095 A69-18430

Nonlinear interaction between cyclotron harmonic waves, demonstrating synchronism conditions for

traveling wave parametric amplification and passive mode conversion

07 p1189 A69-18439

Helium cooled low noise high gain parametric preamplifier for satellite communication by stagger tuning stages

07 p1098 A69-18460

Helium closed cycle cooled very low noise high gain parametric amplifier for investigating interstellar atomic hydrogen radiation

07 p1098 A69-18461

Helium cooled low noise high gain wideband parametric amplifier for spacecraft communication

07 p1099 A69-18462

Wideband uncooled two stage reflecting parametric amplifiers with low noise temperature, noting application to space stations for telecommunications by satellites

07 p1099 A69-18463

Photoparametric up-converter with optimum SNR, noting suitability of direct detection of amplitude modulated optical signals

07 p1104 A69-18888

Lithium niobate based parametric image converter for IR to visible operation, discussing design factors performance calculations

07 p1150 A69-19048

Parametric light interactions application to optics stressing nonlinear spectrograph and cavity and traveling wave oscillator [IEEE PAPER B-3]

07 p1152 A69-19066

Incoherent scatter power measurements, comparing square law signal detection, phase coherent receiver and parametric amplifier methods

07 p1085 A69-19222

Degenerate parametric amplifier using self pumping action of oscillating domain capacitance in Gunn effect

07 p1107 A69-19450

Low noise wideband amplifier system for commercial satellite communication ground terminal receiver, noting cryogenically cooled parametric amplifier

09 p1458 A69-22470

Gain stabilization of parametric amplifier, using pumped conduction current of varactor diode

09 p1467 A69-22585

Parametric amplification in beam plasma system, analyzing amplification of electron current component dependent on second order terms of velocity and charge density

10 p1740 A69-23791

Coupling constants of fast space charge waves in three frequency parametric TWT amplifier and of stress waves in slow wave structure, using graphical methods

11 p1844 A69-24446

Parametric amplifying systems with lumped reactive nonlinear elements, emphasizing UHF systems

11 p1844 A69-24448

Single circuit parametric oscillator excitation by small external narrow band signal, using method of slowly varying amplitudes

11 p1845 A69-24453

Maximum voltage and power gain of modulator-demodulator type nonresonant parametric amplifiers

11 p1849 A69-24956

Parametric amplifier gain, deriving expressions for diode pumping power and nonlinear circuit element resistance

11 p1849 A69-24957

Singly resonant optical parametric oscillator, noting single mode and multimode oscillation for various pump powers, pump wave depletion and mode competition

11 p1897 A69-25038

Bandwidth potential increase of parametric amplifier obtained by adding active filter elements to signal circuit, noting satellite communication band

12 p2039 A69-26380

Negative resistance parametric amplifier used as tracking filter, noting resonant frequency dependence on pumping frequency and input and idler circuits

13 p2225 A69-27183

High efficiency LF oscillations in avalanche diodes, noting evidence for parametric generation and condition for high efficiency

13 p2227 A69-27239

Integrated S-band parametric amplifier design, combining low noise performance at room temperature with broadband flat gain and linear phase response

13 p2230 A69-27678

Two idler parametric amplifiers bandwidth properties investigated using equivalent circuit, noting role of idler circuit design

13 p2233 A69-28066

Differential equations of single loop parametric amplifier response, analyzing forced oscillations

13 p2234 A69-28329

Reactive parameter scatter effect on amplitude frequency characteristics of regenerative reflection amplifiers based on equivalent circuit

13 p2235 A69-28515

Double beam parametric electron amplifier with compensation of difference channel, noting beams noise removal

13 p2237 A69-28578

L-band parametric amplifier operated in liquid N for noise reduction, discussing measurement circuit for gain, bandwidth and noise figure

13 p2237 A69-28644

Noncollinear single cavity optical parametric oscillation with specified energy conversion using ruby laser-pumped lithium niobate, discussing tuning

14 p2460 A69-29605

Parametron preamplifier for X band super-heterodyne ESR spectrometer, noting sensitivity and SNR

14 p2423 A69-29757

Capacitive parametric modulator transient processes and second harmonic effect analysis, obtaining transient response and recovery time

15 p2574 A69-30125

Oscillation breakdown of varactor diodes in parametric amplifiers from studying I-V characteristics, noting resonant circuit retuning effect

15 p2574 A69-30127

Noise sources in S band parametric amplifier with GaAs varactor diode measured at liquid nitrogen temperature, considering noise reduction

15 p2578 A69-30636

Time dependent Green function method for premature saturation due to parametric amplification of nonuniform spin wave modes by one and two magnon processes

15 p2668 A69-30685

RF band multimode parametric pulsed oscillations in distributed system using one dimensional resonators

16 p2758 A69-31796

Parametric amplification of ion-acoustic oscillations in plasma with LF electric field, noting suppression and resonance

16 p2821 A69-31797

Wave propagation at different group velocities along parametric line in traveling wave parametric amplifier

16 p2805 A69-32254

Statistical properties of parametric amplifier and frequency converter by Schroedinger quantum mechanics and P-representation of density matrix

16 p2761 A69-32363

Noise reduction in parametric electron beam amplifier by cooling two frequency resonator noise to liquid nitrogen temperature

16 p2762 A69-32511

Optical parametric oscillator output/signal frequency locked to absorbing atomic transition, discussing effective linewidth

18 p3133 A69-34263

Parametric tunable amplifier as prestage for radar receiver, discussing pump frequency and midband gain stabilization

18 p3104 A69-35457

Parametric amplifier developed for unattended satellite communication ground stations, featuring low noise broadband characteristics

19 p3270 A69-36240

Resonant parametric oscillator stable and random phases, considering smooth frequency tuning and two quantum luminescence laser construction

20 p3554 A69-37723

Negative energy waves presence, showing qualitative difference on theoretically derived parametric amplification in plasmas

20 p3582 A69-38244

Radiometer for 4 cm wavelength range with receiver circuit incorporating tunnel and parametric HF amplifiers, describing design and operation including sub-units

21 p3724 A69-39076

Absolute and convective instability criteria of interacting electromagnetic waves in waveguide systems involving parametric oscillators and amplifiers

21 p3677 A69-39555

Combination resonance and instability regions of second type for parametrically excited oscillations with nonlinear/cubic/damping

23 p4230 A69-42107

Stimulated Brillouin scattering application to measurement of hypersonic velocities and absorption in

gigahertz frequency range, laser frequency shifting and Q switching, etc

23 p4167 A69-42183

PARAMETRIC DIODES

Microwave diodes on GaAs base, determining basic parameters and effects on crystal formation and device construction

05 p0730 A69-16222

Pneumatic diode function generator for simulating nonlinear control systems, discussing operating characteristics and programming methods

11 p1858 A69-24580

Parametric amplifier gain, deriving expressions for diode pumping power and nonlinear circuit element resistance

11 p1849 A69-24957

Barrier capacitance measurement in mm wavelength parametric and multiplication diodes eliminating socket capacitance influence, describing oscilloscope and indicator methods

12 p2043 A69-26885

PARAMETRIC FREQUENCY CONVERTERS

Wideband electronically scanned receiver, using varactor diode upper sideband parametric frequency upconverter for frequency mixing

01 p0048 A69-11036

Parametric frequency divider using reverse biased hyperabrupt junction diodes to provide nonlinear capacitance

02 p0217 A69-12152

Photoparametric up-converter with optimum SNR, noting suitability of direct detection of amplitude modulated optical signals

07 p1104 A69-18888

Multiple access techniques in civil satellite communications systems, noting proposed digital time and frequency division methods

08 p1272 A69-19959

Parametric frequency converter consisting of mixer head in bridge circuit with varactors for 12 GHz TV transmitters

11 p1854 A69-25614

Step-up mixer converting modulated IF signal to HF level by HF high power oscillator signal, discussing efficiency

11 p1854 A69-25615

Upconverter with gain and stabilized frequency, using sideband locking of IMPATT diode oscillator

12 p2036 A69-25909

Up-converter IR detector noise characteristics for pulse and CW signal detection compared with photoconductive detector

12 p2029 A69-26329

Different parametric converters amplitude characteristics analysis for determining necessary pumping power, allowing for saturation

15 p2574 A69-30119

Statistical properties of parametric amplifier and frequency converter by Schrodinger quantum mechanics and P-representation of density matrix

16 p2761 A69-32363

Microelectronic S band upconverter designed and fabricated in microstrip on alumina substrate

16 p2762 A69-32562

Parametric conversion kinetics of monochromatic light waves in nonlinear crystals, using quantized electromagnetic field to study amplification and generation

19 p3332 A69-35870

PARAMETRONS

State variables with delta functions for electrical network with discontinuously variable components, discussing application to parametron

19 p3287 A69-36763

PARASITES

Parasitic calcifications of soft parts in flight personnel studied radiologically, noting filariasis, bilharziasis and worms

09 p1446 A69-22729

Behavioral patterns and physiological parameters of medical leech Hirudo medicinalis determined in natural environment prior to biological experiment in space

24 p4268 A69-43402

Environmental stress effects on medical leech studied to determine tolerance to spacecraft launching, orbiting and reentry

24 p4268 A69-43403

PARASITIC DISEASES

Parasitic calcifications of soft parts in flight personnel studied radiologically, noting filariasis, bilharziasis and worms

09 p1446 A69-22729

PARAWINGS

One and two lobed conical, cylindrical and all-flexible parawing lift, drag and pitching moment and canopy shape

[AIAA PAPER 68-10] 01 p0007 A69-11027

Flexible parawing lifting decelerator research data from wind tunnel and flight tests, noting manned space vehicle recovery and aircraft escape systems

[AIAA PAPER 68-967] 24 p4254 A69-43715

Gliding cargo airdrop system including automatic homing and manual control

[AIAA PAPER 68-958] 24 p4254 A69-43723

PARKING ORBITS

Parking orbit optimal orientation for minimal impulsive maneuvers total velocity increment in three dimensional capture-escape mission

[AIAA PAPER 69-918] 21 p3808 A69-39347

Low thrust guidance for multirevolution trajectory required for earth parking orbit transfer to parabolic orbit insertion, noting advantages over high thrust scheme

[AAS PAPER 69-403] 24 p4379 A69-42832

PARTIAL DIFFERENTIAL EQUATIONS

NT BIHARMONIC EQUATIONS

NT BURGER EQUATION

NT ELLIPTIC DIFFERENTIAL EQUATIONS

NT FOKKER-PLANCK EQUATION

NT GAUSS EQUATION

NT HELMHOLTZ VORTICITY EQUATION

NT LIOUVILLE EQUATIONS

NT PARABOLIC DIFFERENTIAL EQUATIONS

NT VLASOV EQUATIONS

Simultaneous partial integro-differential equations governing natural vibrations of arbitrary cross section cylindrical tubes, suggesting Fourier series solution

01 p0164 A69-10065

Linear partial differential equations for nonlinear intensive heat and mass transfer, discussing analogy between transfer processes and electromagnetic waves distribution

01 p0174 A69-10104

Hollow finite cylinder stress-strain analysis under normal loads on end faces solved by four partial differential equations

01 p0168 A69-10359

Boundary value problems in thin shallow shells of arbitrary planform analyzed by partial differential equations

01 p0171 A69-11071

Partial differential equation for distribution function in transport of charged particles in earth magnetosphere

01 p0147 A69-11320

Group invariant solutions of differential equation systems applied to quasi-linear partial differential equations of motion of air masses

02 p0274 A69-11444

Asymptotic and approximate waves constructed for system of nonlinear partial differential equations for phases corresponding to multiple characteristics

02 p0271 A69-12034

Iterative transfer of boundary values to fictitious contour in numerical solution of partial differential equations

[ONERA-TP-646] 03 p0454 A69-12874

Iterative method to solve large sets of algebraic equations in approximate solution of multidimensional partial differential equations by implicit numerical techniques

03 p0456 A69-13554

Compatibility equations in plane micropolar thermoclasticity theory obtained by associated matrix method

03 p0525 A69-13607

Difference schemes to solve Navier-Stokes equations for viscous incompressible fluid by substituting fourth order partial differential equation

03 p0415 A69-13650

Independent variables reduction in nonlinear partial differential equations, detailing group theory method

03 p0456 A69-13740

Optimal control theory applied to systems described by partial differential/integral equations

04 p0581 A69-14571

Differential-difference equations and nonlinear initial boundary value problems for linear hyperbolic partial differential equations, noting procedure based on method of characteristics

04 p0623 A69-14949

Numerical integration of elliptic mixed boundary value problem in region with curved boundary programmed in FORTRAN for general linear second order partial differential equation

04 p0625 A69-15287

SALEM programming system developed for digital simulation of systems described by partial differential equations

04 p0565 A69-15340

Functional optimization techniques for serial hybrid computer solution of partial differential equations, emphasizing algorithms handled on digital computer

04 p0566 A69-15344

Hybrid assumed mode solution of nonlinear partial differential equations/initial value problems/ in time-like independent variable

04 p0566 A69-15345

Hybrid computer algorithm for numerical integration of partial differential equations, using assumed sum separation of variables

04 p0566 A69-15346

Hybrid computational method for partial differential equations to reduce time of solution and error propagation

04 p0566 A69-15347

Iterative solution of continuous-time-discrete- space /CTDS/ equations as approach to hybrid computation of certain partial differential equations

04 p0567 A69-15348

Partial differential equations solution using analog, digital and hybrid computers, discussing heat transfer in parallel flow exchanger

05 p0723 A69-15705

Finite differences for identifying partial differential equations and associated boundary conditions of distributed parameter system

[ASME PAPER 68-WA/AUT-1]

05 p0738 A69-16185

Analog simulation of water hammer type phenomena governed by linear constant coefficient partial differential equations

05 p0751 A69-16475

Maximum principle application to stochastic systems, developing set of stochastic partial differential equations

05 p0788 A69-16482

Methods to obtain uniqueness for partial differential /elliptic/ equations boundary problem extended to parabolic conditions, analyzing necessary conditions for existence

07 p1173 A69-18728

Complex variable theory usefulness in investigating existence and uniqueness of solutions for boundary values in partial differential equation

07 p1173 A69-18731

Uniqueness conditions of expansions in series of functions stressing Jacobi series applied to singular partial differential equations

07 p1174 A69-18805

Tensor partial differential equations having spherical symmetry, examining covariant differentiation and contraction of tensors

07 p1123 A69-18807

Incorrect problem solving method applied to Cauchy problem solution for nonlinear partial differential equations, considering Ritz method applicability

07 p1174 A69-19005

Laminar conducting wall jet injected in transverse magnetic field, analyzing partial differential equations obtained

07 p1192 A69-19020

Axisymmetric jet impingement against solid plane from tube at finite distance, using nonlinear partial differential equation in finite difference form

[AICHE PAPER 31F] 08 p1302 A69-19847

Stieltjes transform relating initial boundary value problems for partial differential equations of various classifications

08 p1342 A69-20352

Book on integral operators in theory of linear partial differential equations covering analytic functions, harmonic functions, differential equations, etc

08 p1343 A69-20725

Optimal control approximate synthesis partial differential equation solution in form of interpolation polynomial for functions of many variables

08 p1299 A69-21068

Book on optimal control of systems governed by partial differential equations, noting systems of automation, existence theorems and numerical analysis

09 p1471 A69-21580

Decrease existence at t approaching infinity solution of Sobolev linear partial differential equations describing rotating fluid small oscillations

09 p1481 A69-21899

Generalized orthogonality principles and expansion schemes for forced response of partial differential equations, noting applicability to rodlike structures

09 p1533 A69-21975

Kutta-Merson algorithm for converting partial differential equation for two dimensional unsteady state heat conduction to simultaneous ordinary differential equations

09 p1623 A69-22280

Liapunov direct method in stability problems for semilinear and quasi-linear systems of hyperbolic partial differential equations with independent variables

09 p1534 A69-22799

Natural frequencies and associated composite loss factor for laminated plate with alternate elastic and viscoelastic layers, deriving partial differential equations

[ASME PAPER 69-VIBR-68]

10 p1805 A69-24158

Wave propagation in connected space-time for linear second order hyperbolic partial differential equation, describing unitary invariant theory

11 p1908 A69-24356

Nonlinear partial differential equations for solution of steady stratified flows, noting hydrostatic pressure distribution and horizontal and vertical scales

11 p1869 A69-24889

Topologies introduced on state space for differential equations to obtain dynamical systems

11 p1909 A69-25409

Classification of second order quasi-linear partial differential equations with two independent variables in structural dynamics with emphasis on elastic structures

11 p1991 A69-25513

Boundedness criteria for second order hyperbolic equation boundary value problem solution in Banach space

12 p2122 A69-26573

Linear two dimensional partial differential equations solved by Laplace transforms on analog computer

12 p2123 A69-26717

Existence theorems for partial differential equations theory for traction boundary value problem of linearized elastostatics

12 p2188 A69-26928

Nonlinear hyperbolic partial differential equations with dissipation term for periodic solutions

12 p2124 A69-26929

Numerical solution to partial differential equations describing helical discharge in Ar with gas injection, discussing initial temperature distribution and radial distribution effects

12 p2141 A69-27131

Relaxing gas nonequilibrium flow in plane expansion, comparing partial differential equations with method of characteristics

13 p2244 A69-27322

Analytical expressions for nonlinear partial differential equation of heat conduction in solids, giving temperature as function of time and location

13 p2372 A69-27434

Partially characteristic boundary value problem for partial differential equations

13 p2288 A69-27527

Conditions governing application of reduced Nielsen equations to anholonomic systems dynamics, discussing kinetic energy function

13 p2288 A69-27924

Laminar temperature and velocity profiles near plane rectangular surface for free supersonic flow, solving partial differential equations for mass, momentum and energy conservation

13 p2309 A69-28025

Dynamic stability of elastic bodies with motion described by partial differential equation

15 p2652 A69-30860

Laminar boundary layer on rotating blades and yawed infinite wings, solving partial differential equations numerically by implicit finite difference scheme on computer

16 p2732 A69-31885

Interdependent behavior of Fourier solutions to sets of partial differential equations with variable coefficients

16 p2804 A69-32252

Optimal control approximate synthesis partial differential equation solution in form of interpolation polynomial for functions of many variables

16 p2765 A69-32483

Generalized finite difference approximations of linear partial differential operators in space based on functional approximations

16 p2756 A69-32552

Eigenvalue problems in partial differential equations solved by extended Kantorovich method, considering vibration of rectangular membrane and stability of elastic rectangular plate

16 p2876 A69-32783

Necessary and sufficient conditions for existence of smooth solution to quasi-linear partial differential equation

17 p2994 A69-32843

Stochastic differential game theory, discussing nonlinear partial differential equations for solution, dynamic programming validity conditions, finite difference scheme, etc

17 p2994 A69-32844

Book on quasi-reversibility application to partial differential equations covering parabolic, nonparabolic, elliptic equations and boundary conditions control

17 p2994 A69-33205

Ray methods application to partial differential equations for electromagnetic wave propagation in ionosphere, discussing strongly and weakly anisotropic inhomogeneous plasma

17 p2925 A69-33840

Nonlinear partial differential equations solutions in theory of thin elastic spherical shells subjected to temperature fields and external loading

17 p3067 A69-34147

Computer implementation of Bergman solution to initial value problem for partial differential equation of compressible fluid flow

18 p3164 A69-34614

Wave propagation in gas particle flow, obtaining fourth order particle differential equation from perturbation theory

18 p3121 A69-34772

Cauchy problem for homogeneous linear difference scheme with constant complex coefficients, giving stability lemmas

18 p3165 A69-35049

MHD flow, deriving equation system and boundary conditions for gas dynamic process

18 p3181 A69-35054

Peano-Baker method for integration of variational equations to produce partial derivatives used in satellite trajectory estimation

19 p3398 A69-35616

Partial differential equation representing influence of radiative and turbulent transfers of atmospheric heat, based on absorption coefficients for terrestrial radiation

19 p3363 A69-36498

Existence theorem for limits of minimizing sequences in optimal control problems, applying results to systems governed by partial differential equations

19 p3287 A69-36724

Transformation groups used to find similarity solutions for partial differential equations and heat equation

20 p3630 A69-36915

Finite elements general theory applied to wave propagation, gas kinetics, nonlinear partial differential equations, continuum mechanics and fluid dynamics

20 p3567 A69-36948

Computer solutions for nonlinear partial differential equations governing compressible flow patterns with shocks, using Lagrange coordinates

20 p3569 A69-38212

Partial differential equation initial value problems analyzed by ordinary differential equations via functional approximation method

21 p3756 A69-39132

Nonlinear problems involving large deflections of isotropic and orthotropic shallow shells of rectangular planform, deriving partial differential equations for solution

21 p3838 A69-39185

Axisymmetric solutions of magnetohydrostatic equations for large conductivity media satisfying second order partial differential equation containing two arbitrary functions

21 p3778 A69-39498

Operational calculus for n-variable functions analogous to Mikusinski method for single variable functions, giving applications to linear partial differential equations with constant coefficients

21 p3756 A69-39500

Upper and lower bounds for certain classes of partial differential equations associated with variational problems in theory of deterministic control processes

22 p3976 A69-41034

Positive solutions of parabolic and hyperbolic partial differential equations arising as viscoelastic media equations of motion, noting maximum principle utilization

22 p3976 A69-41035

Straight line method for boundary problems solutions with errors for partial differential equations

22 p3976 A69-41110

Boundary problem for differential equation of mixed type reduced to singular boundary problem for hyperbolic partial differential equations

23 p4181 A69-41409

Cauchy problem for partial differential equations linear parabolic system with coefficients depending on unknown functions

23 p4181 A69-41410

Linear partial differential equations derived from thermodynamic identities integrated by method of characteristics for relationships between temperature and pressure incomplete equations of state

23 p4239 A69-41569

Optimal generalized controls for systems under random forces described by hyperbolic partial differential equation system

23 p4144 A69-41957

Decrease existence at approaching infinity solution of Sobolev linear partial differential equations describing rotating fluid small oscillations

23 p4152 A69-41975

Boundary conditions for Tricomi equation in symmetric positive form, showing analytical and finite difference solutions

24 p4339 A69-42792

Wrong boundary conditions influence decay in overdetermined difference approximations to hyperbolic partial differential equation

24 p4340 A69-43227

Transverse shear influence on circular plates small displacement theory determined from coupled linear partial differential equations of plates

24 p4405 A69-43655

PARTIAL PRESSURE

NT HYPOXEMIA

NT OXYGEN TENSION

Oxygen partial pressure, temperature and olivine composition related, determining distribution coefficient of Fe and Mg between olivine and pyroxene

03 p0516 A69-14082

Temperature dependence of partial pressure of saturated As vapor over solid solutions of InAs-GaAs of different composition

04 p0642 A69-14938

Hydrothermal investigation of Ge trace quantity distribution between metal, silicate and sulfide phases at controlled oxygen partial pressure by oxygen buffer techniques

05 p0819 A69-15624

Blood oxygen metabolism, analyzing content and volume circulation in dogs under oxygen partial pressure decrease in inhaled air

12 p2019 A69-26346

High pressure Cs thermionic converter with cold region, measuring Cs partial pressure distribution in Ar filled tube

14 p2397 A69-29176

Lightweight sensor for telemetering oxygen partial pressure in respiration air

15 p2559 A69-31231

PARTICLE ACCELERATION

Solar cosmic radiation, particle acceleration, energetic particles as sample of sun and propagation of particles from sun to earth

03 p0498 A69-12934

Acceleration of charged particles in strong DC magnetic field by electrostatic waves with spatially varying phase velocities integrated numerically on IBM 360/65

03 p0479 A69-14028

Sudden acceleration of electrons in magnetosphere and magnetic tail related to magnetic bays, noting acceleration occurrence first in magnetosphere during polar substorm

04 p0594 A69-15122

Spectrum of accelerated particles on surface of stars revealed by observation of photospheric lithium and beryllium

05 p0817 A69-16711

Injection spectra of protons accelerated on sun to billion-trillion ev, discussing acceleration mechanisms

06 p0996 A69-17741

Electromagnetic ion acceleration in steady electric and magnetic fields chosen to match fields of Alkali Plasma Hall Accelerator /ALPHA/ [AIAA PAPER 69-111]

06 p0985 A69-18175

Ion cyclotron resonance acceleration and higher harmonic acceleration in axially nonuniformly magnetized plasma under influence of RF electric field

08 p1360 A69-20079

Bimodal diffusion mechanism for acceleration of trapped particles in earth magnetosphere, noting particle intensity profiles and energy spectra

08 p1307 A69-20183

Charged liquid droplets generator and acceleration through electric field for thrust vectoring, analyzing beam focusing and deflection [AIAA PAPER 69-283] 09 p1563 A69-21230

Charged particle acceleration in interplanetary medium, discussing protons and plasma oscillations interactions 09 p1575 A69-21541

Bimodal diffusion mechanism for acceleration of trapped electrons and protons in earth radiation belts, noting particle intensity profiles and energy spectra 09 p1576 A69-21708

Reflected particle acceleration at magnetospheric bow shock front attributed to interplanetary electric field 09 p1577 A69-21714

Cosmic charged particle acceleration in electromagnetic field described by vector and scalar potentials, constituting plane electromagnetic wave propagating along z axis 10 p1756 A69-22816

Line spectrum of flare gamma radiation due to atmosphere nuclei excitation by high energy proton acceleration 11 p1945 A69-24241

Low energy cosmic rays and plasma turbulence in heating and ionizing interstellar gas, discussing acceleration and galactic sources 11 p1945 A69-24380

Solar wind particles acceleration and transformation into radiation belt particles 11 p1948 A69-24855

High energy cosmic ray origin and acceleration by LF electromagnetic radiation produced by pulsars, noting maximum energy for protons 11 p1950 A69-24927

Cosmic radiation origin in terms of sudden injection of particles in time, momentum and space, considering statistical fluctuations role in observed spectrum 12 p2148 A69-26206

Potential mechanisms of electron acceleration inside magnetosphere, measuring power spectrum of X rays by electron braking in upper atmosphere 12 p2066 A69-26295

Cometary tail diffusion model based on luminous particle number decrease with time and particle accelerated motion and diffusion in space 14 p2523 A69-29705

Magnetic mirrors, Doppler and relativistic effects, wave attenuation and radiation pressure during gyroresonant particle acceleration in nonuniform magnetostatic and HF fields 14 p2499 A69-29845

Low energy electron and proton precipitation, discussing acceleration mechanisms and periodicity in relation to auroras and airglows 15 p2594 A69-30018

Fermi acceleration of energetic electrons trapped within dipole magnetic field analyzed to obtain quantitative results for wave-particle interaction within complex magnetospheric configuration 15 p2594 A69-30095

Charged particle acceleration in interplanetary medium, discussing protons and plasma oscillations interactions 16 p2851 A69-32536

Trapped protons acceleration through bimodal diffusion in magnetosphere, noting spatial patterns and temporal behavior of proton and electron belts 16 p2851 A69-32618

Development and applications of ion propulsion covering electrostatic acceleration of particles, Cs contact and electron bombardment ion thrusters, space missions, etc 17 p3020 A69-33354

Particle and light motions in Schwarzschild field, discussing acceleration beyond speed of light in reference /S/ frame of time independent coordinate systems 17 p3006 A69-33741

Trapped particle acceleration by random bimodal diffusion in inhomogeneous magnetic field accounting for high energy particles trapped in earth radiation belts 18 p3186 A69-34808

Mean lives of upper decay levels of lithium isotopes accelerated by electromagnetic isotope separator and directed through thin carbon foil 18 p3177 A69-35012

Ultrarelativistic electron acceleration in Crab Nebula maintaining synchrotron spectrum, obtaining power from compressional motion damping, gyrorelaxation effect and pitch angle anisotropy removal 19 p3424 A69-36336

Electrostatically accelerated iron spheres interaction with thin metal and nitrocellulose foils to develop detectors for cosmic dust collection and recording 21 p3719 A69-38344

Rocket measurements of primary auroral particles energy spectra indicating spectral structure acceleration peaks associated with electrostatic fields 21 p3707 A69-38490

Charged particle acceleration in interplanetary plasma from analysis of cosmic ray intensity increases accompanied by SC magnetic storms and Forbush effects 21 p3788 A69-38587

Cosmic rays composition, origin, acceleration and propagation, describing two component models 21 p3789 A69-38814

4 October 1965 type IV solar burst, studying acceleration mechanisms for fast electrons by comparing fine structure at various frequencies 22 p4001 A69-39983

Accelerating electric field model to interpret energy and angular distribution of auroral particles, noting electric potential limitations 22 p3938 A69-40445

Continuous electron acceleration in astrophysics, discussing Crab Nebula X ray flux and galactic and extragalactic radio source power law spectra 24 p4355 A69-42696

High energy nucleons and electrons accelerated in solar flares, considering interplanetary magnetic field effect on radiation properties near earth orbit 24 p4372 A69-43617

Low energy cosmic rays and plasma turbulence in heating and ionizing interstellar gas, discussing acceleration and galactic sources 24 p4375 A69-43770

PARTICLE COLLISIONS

Heat and mass transfer coefficients derived for reacting gas mixtures by applying variational principle 01 p0006 A69-10400

Transition probabilities for collinear collision of particle with harmonic oscillator, noting reasons for discrepancy in Jackson and Mott form 01 p0124 A69-10688

Cosmic rays extensive air showers from interaction of particles with nuclei of elements in atmosphere 01 p0144 A69-10752

Landau damping in plasma, noting competing effects of nonlinearities and collisions on formation of plateau in spatially homogeneous distribution function 01 p0133 A69-11215

Numerical regularization of single binary collision in n body gravitational problem 02 p0322 A69-12268

Collision broadened homogeneous linewidth measurements for 6328 angstrom Ne line in Ne and He-Ne discharges, using nonlinear interaction between two traveling waves 02 p0257 A69-12613

Density gradient driven collisional drift waves, discussing identification, stabilization and enhanced plasma transport 03 p0474 A69-13145

Scattering of energetic charged particles in weakly unstable plasma for integrated spectrum of plasma electric field autocorrelation function 03 p0475 A69-13151

Rotation and orientation of cosmic dust particles due to collisions with interstellar gas particles 03 p0511 A69-13420

Empirical growth curve determined by using equivalent widths of absorption lines of quasar 3C 191, concluding ionization is mainly due to collisional processes 03 p0514 A69-13962

Parametric or impact parameter treatment for describing ion-atom collision at low or high impact velocities, reexamining approximate treatments 05 p0797 A69-16697

Monte Carlo method to calculate distributions describing particle behavior in Knudsen cell, clarifying relationship between gaseous collisions and Knudsen number
06 p0908 A69-17111

Ionizing electron collisions with He, determining energies and angular correlation distributions of scattered and ejected electrons
06 p0962 A69-17191

High energy pure photon showers in cosmic ray emulsions in relation to production of magnetic pole-dipole pairs
06 p0996 A69-17883

Spherical particle motion in vortex gas flow between planes of turbulence chamber perpendicular to axis of flow rotation, noting collisions effect
07 p1181 A69-19000

Loss rate of plasma from stellarator due to binary Coulomb collisions scattering particles in loss region, discussing diffusion coefficients
08 p1364 A69-20520

Vibrational excitation in He, H and N ion- molecule collisions on nitrogen first negative system, studying relative band intensities
08 p1356 A69-20739

Collisional theory of longitudinal wave propagation for two fluid viscous ionized plasmas formulated from coupled Maxwell and Boltzmann equations
08 p1367 A69-20796

Cosmic ray particle behavior in interplanetary medium, solving model equation for cosmic ray diffusion in cloud of outgoing scattering centers
09 p1575 A69-21598

Plasma transport properties derived from Boltzmann equation using Debye shielded Lande potential to represent collisions, noting viscosity and thermal conductivity
09 p1553 A69-22539

Secondary emission in low altitude satellite body dependent on inelastic collisions with primary cosmic ray protons
10 p1757 A69-22821

Local potential method extended to study plasma oscillations inhomogeneous kinetic equations in presence of linear or nonlinear collision operators
11 p1925 A69-24316

Extragalactic gamma ray fluxes predicted, discussing collisions, matter-antimatter annihilation and cosmological implications
11 p1946 A69-24466

Asymptotic solution for Fokker-Planck equation at low collision frequency, studying electron-ion collisions effect on universal instability in inhomogeneous plasma
11 p1930 A69-25358

Electron-ion recombination coefficient for triple collisions in dense low temperature plasma, deriving finite electron Fokker-Planck equation
11 p1933 A69-25541

Heat and mass transfer coefficients derived for reacting gas mixtures by applying variational principle
12 p2062 A69-26668

Energy loss during inelastic collisions between electrons and ionospheric particles, determining ionospheric heating by UV radiation
13 p2252 A69-27614

Finite Larmor radius and collision with neutral atoms simultaneous effects on plasma gravitational instability
13 p2346 A69-27708

Dissipative drift instability due to electron density gradient and dissipative mechanism /neutral-electron and ion-electron collisions/ in plasma in constant magnetic field
13 p2308 A69-27979

Elastic and inelastic elementary particle collisions described by Feinman diagrams, discussing computer results for high energy particle interactions
13 p2303 A69-28369

High energy particle collisions, calculating inelastic interactions between cosmic nuclei
13 p2330 A69-28370

Nuclear emulsion high energy nucleon-nuclei interaction model accounting for two maxima track formation
13 p2303 A69-28371

Multiple particle production and resonance events during high energy particle collisions
13 p2303 A69-28372

Four dimensional momenta transfer during high energy cosmic ray particle collisions, comparing various collision models
13 p2330 A69-28375

Vaporizer temperature and collision efficiency correlation data for magnesium oxide-argon dilute diffusion flames studied for determining inverse temperature dependence
13 p2380 A69-28461

Gas and polydispersed condensate parameters of nonequilibrium two phase flow in Laval nozzle, considering particle collisions and coagulation, energy exchange and momentum exchange
14 p2391 A69-29621

Collisional emission and absorption of longitudinal waves due to particle encounters in numerical experiments on one dimensional one species plasma
15 p2661 A69-30921

Ionosphere D region low field conductivity in presence of high field disturbing signal, assuming inelastic electron-neutral particle collisions
16 p2850 A69-32190

Diatom heavy particle collisions with emphasis on epithermal energy range, discussing elastic scattering and inelastic processes
16 p2815 A69-32259

Cosmic ray particle Pb nucleus interaction energy transfer to electron photon cascade in first inelastic collision, noting dependence on particle energy
17 p3008 A69-33387

Gas laser power dip in presence of elastic collisions, using equilibrium equations for particles velocity distribution function
17 p2983 A69-33972

Lorentz gas approximation to Boltzmann collision operator generalized for heavy molecule nonMaxwellian gas distribution function, obtaining equilibrium distribution applicable to ionized gas
18 p3179 A69-34438

Longitudinal plasma waves collision damping calculations using Rostoker test particle method
18 p3179 A69-34439

Collisional excitation of forbidden lines in planetary nebulae from 5337/5517 intensity ratio measurements, noting density and intensity relationship
19 p3422 A69-36221

Infinitesimal mass trajectories and possible double collision in gravitational field of two finite and unequal masses in plane elliptic restricted three body problem
21 p3795 A69-38443

Impact pressures during two body collisions, correlating pressure with particle speed
21 p3836 A69-38943

Cosmic X ray bremsstrahlung due to collisions of suprathermal protons with ambient electrons, giving clue about diffuse sky background of X rays
22 p4006 A69-40643

Shape resonances in low energy elastic scattering of electrons by C, N and O, discussing ground state configurations and close coupling equations corrections
23 p4193 A69-41452

Chemical reaction kinetics in high temperature gases in terms of collision theory, discussing gaseous statistics and Boltzmann equation
23 p4113 A69-41518

Ionization and light emission cross sections for collisions of protons and hydrogen atoms with atmospheric nitrogen used to analyze auroral events
24 p4368 A69-43177

Thermal nonequilibrium state and effective collision frequency between protons and electrons in solar wind plasma, explaining abnormal dissipation
24 p4368 A69-43187

Distance between measurement equipment and extensive air showers axis varied as function of particles number and number of hit
01 p0144 A69-10749

Frequency occurrence of small particles in meteor showers, discussing fragmentation and cosmic erosion as primary effects in small particle development
01 p0154 A69-10872

Electric discharge in gas flow with magnetic field, showing varying charged particle density as function of argon-cesium pressure
02 p0285 A69-11570

Diffusion effect on particle buildup in deionizing steady plasma flux linked to plasma concentration in presence of electron temperature gradients
02 p0291 A69-12483

Absorption oscillator strengths of S 1 and S 2 lines between 1100 and 2000 A, using arc burning light source
03 p0479 A69-13961

Charged particle density of unsteady plasma from Stark broadening of Balmer H beta line, using time-scanning image converter
03 p0481 A69-14145

Spectroscopic charged particle concentration determination, discussing error and limits of applicability low temperature plasma
05 p0762 A69-15899

Cosmic dust concentration in interplanetary space near earth, noting suitability of satellite observation
06 p0999 A69-16971

Transmittance and absorption cross sections of carbon particles suspended in flowing stream of nitrogen gas
06 p1034 A69-17804

Nonequilibrium low temperature plasma theory for ionization and particle distribution based on discrete and continuous spectra states, discussing electron distribution function
06 p0969 A69-17906

Night sky surface brightness and polarization measurements as basis for zodiacal dust cloud particle density distribution normal to ecliptic plane
07 p1222 A69-19588

Plasma flux measurements by charged particle traps in Venus vicinity by space vehicle Venus 4, discussing low concentration of charged particles
07 p1222 A69-19613

Nonlinear interactions between plasma waves of various intensities, noting changes in particle distribution
08 p1362 A69-20427

Zodiacal dust density in interplanetary space
08 p1407 A69-20938

Charged particles concentration change during vertical propagation of acoustic wave in F layer found transforming electric field into circularly polarized wave
09 p1484 A69-21528

Longitudinal electric field distribution and charged particle density in magnetic mirror under potential difference between magnetic equator and plane
10 p1689 A69-24204

Tunable Fabry-Perot interferometer for photoelectric measurements of absorption and emission line contours and line center particle concentrations
10 p1698 A69-24212

Radial distribution profiles of charge carriers in low temperature gas discharge plasma accounted for in terms of volume recombination
11 p1925 A69-24330

Charged particle concentration near electrodes in high current pulsed discharge with separated flames at atmospheric pressure determined by measuring quadratic Stark effect
11 p1927 A69-25219

Unicellular microorganisms size and concentration estimates based on light scattering measurements of suspensions in spectrophotometer cuvette compartment
11 p1829 A69-25643

Meteoritic dust particles collections prediction in atmosphere for low and high entry fluxes
12 p1558 A69-26342

Electromagnetic waves directional velocity, plasma temperature and particle density determined from analyzing electric field fluctuations amplification near body in plasma
12 p2137 A69-26531

Charged particle population dynamics in outer radiation zone of magnetosphere, discussing ring current particles, protons, electrons, alpha particles and electric field
12 p2150 A69-26743

Charged primary cosmic rays responsible for relative intensities of muon-poor extensive air showers at mountain and sea levels
12 p2152 A69-27099

Electric field determination from charged particle concentration in wake of body moving in rarefied plasma, noting hydrodynamics similarity
14 p2517 A69-29068

Stark effect applicability to charged particle concentration in nonstationary plasma
14 p2497 A69-29790

Relativistic corrections to particle distribution functions for high temperature plasma in thermodynamic equilibrium by integrating Gibbs distribution
14 p2499 A69-29847

Earth radiation belt data, discussing origin, density, distribution, etc, of protons, electrons and alpha particles
15 p2674 A69-30016

Drift wave instability due to particle number density gradient of plasmopause, considering velocity shear modification
15 p2595 A69-30096

Spectroscopic measurements of charged particle concentrations in jet produced by pulsed plasma generator
15 p2663 A69-30991

Time variation of altitude distribution of cosmic dust layer in upper atmosphere by Pandora II collector using inflight shadowing technique
15 p2698 A69-31353

Frequency of multiple muons from extensive air showers as function of zenith angle, noting mean transverse momentum and density spectrum
15 p2678 A69-31484

Possible existence in universe of large number of difficult-to-observe particles with zero rest mass left over from superdense phase
16 p2814 A69-31801

Azimuthal particle distribution expressions for analyzing cosmic ray jets
16 p2849 A69-32045

Solar wind velocity distribution anisotropy at earth explained by low density
16 p2849 A69-32097

Dimensions, concentration and spectrum of large precipitation particles in clouds and cloud water content by measuring reflectivity and absorptivity at different wavelength
16 p2807 A69-32268

Cosmic ray second harmonic daily variations explainable by symmetrical gradient rising away from solar equatorial plane
16 p2850 A69-32304

Charged particles concentration change during vertical propagation of acoustic wave in F layer found transforming electric field into circularly polarized wave
16 p2783 A69-32523

Moon density and nucleation of planets, explaining low density and absence of heavy core by late aggregation from nonmetallic particles
16 p2865 A69-32808

Self ignition of solid/fluid particles suspended in gas flow, discussing heat transfer coefficient, critical temperatures, etc
17 p3070 A69-33142

Luminous particles volumetric concentration calculation based on limiting surface density to determine bulk density in cometary head
17 p3032 A69-33189

Gas particle concentrations on moon due to solar wind, surface emissions and atmospheric contamination by lunar operations and rocket motor products
18 p3189 A69-34236

Self contained hand held battery operated aerosol particle analyzer, measuring aerosol concentration and size distribution for laboratory and space flight applications
18 p3136 A69-34691

Langmuir plate and spherical ion probe experiments aboard Explorer 31, measuring concentrations and temperatures of thermal electrons and ions
20 p3545 A69-37881

Mass spectrometric investigation of thermosphere at high latitudes, measuring number densities for nitrogen, Ar and molecular and atomic oxygen
20 p3533 A69-38086

Neutral particle density ratios in the thermosphere by rocket-borne monopole mass spectrometers
21 p3704 A69-38368

Cosmic ray muons for calibrating dE/dx counter used in particle identification by determining cosmic particles distribution as function of energy losses due to ionization
21 p3724 A69-39075

Normalized phase function and scattering coefficient of aerosols prediction from measurements of particle size distribution, density and refractivity based on Mie solution
21 p3719 A69-39774

PARTICLE DETECTORS

U RADIATION COUNTERS

PARTICLE DIFFUSION

NT ELECTRON DIFFUSION

Free access of low energy galactic particles to solar wind lines of force due to stochastic nature of lines
01 p0147 A69-11238

Solar cosmic rays diffusion relationship to interplanetary magnetic field power spectrum from high energy proton and electron observations
01 p0147 A69-11243

Diffusion of suspended particles in isotropic turbulence field of dispersed medium
02 p0234 A69-12579

Particle size distribution determination by measuring light beam extinction in turbid medium with photometer
03 p0428 A69-13110

Ideal gas spectra and density fluctuations correlations calculated during Markovian and nonMarkovian wandering of particles
03 p0477 A69-13414

Charged particle dynamics in spiral interplanetary magnetic field model, discussing electric drift velocity, point of origin and distribution
03 p0503 A69-14015

Equation describing statistically trapped particle motion under influence of fields varying in time and space
07 p1209 A69-19375

Dislocation climb theory of steady state creep, noting necessity of self diffusion mechanism in any high temperature creep theory
08 p1329 A69-20000

Bimodal diffusion mechanism for acceleration of trapped particles in earth magnetosphere, noting particle intensity profiles and energy spectra
08 p1307 A69-20183

Diffusion model for propagation of solar cosmic rays in interplanetary space, obtaining injection spectra for solar flare protons
08 p1379 A69-20613

Particle-wave interactions in weakly turbulent collisionless plasma, discussing ensemble average distribution function, diffusion, nonlinear Landau damping and nonlinear instabilities
08 p1368 A69-20803

Proton electrolyte application to fuel cells, discussing proton diffusion in solids and materials with vacancies /proton conductors/ in structures
08 p1269 A69-21053

Cosmic ray particle behavior in interplanetary medium, solving model equation for cosmic ray diffusion in cloud of outgoing scattering centers
09 p1575 A69-21598

Geomagnetically trapped particle loss processes and equilibrium distribution resulting from MHD wave field interaction described using sandbox model
11 p1948 A69-24856

Tellurium doping effect on phonon diffusion in GaSb, discussing thermal conductivity at low temperatures
12 p2142 A69-26294

Boundary layer parameters behind shock wave front in ionized gas calculated with allowance for charged particle diffusion
12 p2139 A69-26713

Earth radiation belts formation as function of particle injection into trapped radiation zones or proton and electron leakage
12 p2150 A69-26742

Diffusion of equatorial particles in outer radiation zone caused by expansions and contractions of permanently compressed magnetosphere, obtaining electric fields
14 p2510 A69-28937

Deposition and interdiffusion of W layers on Mo emitter of in-core thermionic reactor, investigating microstructure of transition zone
14 p2462 A69-29210

Particle diffusion and wave spectrum in unstable plasma calculated using Feynman diagrams, considering quasi-linear growth, resonant three wave coupling and nonlinear Landau damping
15 p2660 A69-30915

Low energy solar protons entry into magnetosphere on 26 May 1967 showing diffusion control
16 p2849 A69-31984

Cosmic ray second harmonic daily variations explainable by symmetrical gradient rising away from solar equatorial plane
16 p2850 A69-32304

Fuel cells with solid membranes with ion conductivity, discussing proton electrolyte
16 p2740 A69-32424

Trapped protons acceleration through bimodal diffusion in magnetosphere, noting spatial patterns and temporal behavior of proton and electron belts
16 p2851 A69-32618

Trapped particle acceleration by random bimodal diffusion in inhomogeneous magnetic field accounting for high energy particles trapped in earth radiation belts
18 p3186 A69-34808

Autoradiographic methods for diffusion and phase transformation in Fe-Cr alloys by application of photographic emulsion with tracer element on metal surface
20 p3561 A69-37416

Rocket measurement data of auroral particle precipitation classified in substorm phases of quiet and breakup period, breakup and postbreakup events and morning events
21 p3707 A69-38489

Charged particles beam penetration effects produced in atmosphere, determining particle diffusion and trajectory using Spencer moments and Monte Carlo methods
21 p3709 A69-38502

Field-aligned currents effect on ionosphere and precipitation of auroral primary particles, analyzing with mathematical model of ionospheric density height distribution
21 p3710 A69-38506

Small particle holography technique extended for dynamic properties of particle fields, determining velocity and density field, size distribution, flow structure and diffusion rate
21 p3726 A69-39776

Time dependent diffusion of light particles of Lorentz fluid approximated by Boltzmann equation leading to microscopic telegrapher equation
22 p3984 A69-40530

Outer anisotropic galactic cosmic particle flux distortion in interplanetary space, analyzing scattering in solar wind by isotropic diffusion equations
23 p4205 A69-41837

Neutrino radiation in universe with emphasis on stellar neutrino radiation, analyzing emission during nuclear fusion of C-N, He and Ne-Na cycles
01 p0145 A69-10754

Photon emission in germanium at high injection levels during uniaxial compression
04 p0643 A69-15255

Particle radiations and magnetic fields in metagalaxy, discussing galactic injection spectrum problems
06 p0991 A69-17310

Neutrino emission and carbon burning onset in 1.45 solar mass stellar models with pure He envelope, He burning shell and degenerate C-O core
08 p1384 A69-20059

Charged liquid droplets generator and acceleration through electric field for thrust vectoring, analyzing beam focusing and deflection
[AIAA PAPER 69-283]
09 p1563 A69-21230

Star collapse under energy losses due to neutrino emission, analyzing self similar asymptotic solutions
09 p1587 A69-21359

Neutron proton plasma properties in massive stars and supernovae, discussing neutrino emission
10 p1756 A69-22814

Radiation emission by scalar particle in field of two plane linearly polarized electromagnetic waves propagating toward each other
11 p1900 A69-25568

Poisson formula in double logarithmic approximation for photon emission cross section in analysis of bremsstrahlung involving high energy particles
11 p1922 A69-25758

Neutrino and antineutrino emission by URCA process calculated, assuming nuclear reactions in static and beta processes in kinetic equilibrium
15 p2674 A69-30542

Star collapse under energy losses due to neutrino emission, analyzing self similar asymptotic solutions
18 p3197 A69-34749

Transverse momentum of fireball particles emitted in high energy inelastic collision related to emission angle and energy in accelerators
19 p3396 A69-36644

Solid para hydrogen coated graphite particles expulsion into interstellar medium from star formation regions, considering mantles stability and particles extinction efficiency, albedo and phase function
20 p3601 A69-37492

- Atmospheric emissions - NATO Conference, Norway, July-August 1968

- Low energy cosmic ray intensity increase on July 7, 1966 registered with high latitude neutron monitors
10 p1766 A69-23762
- Low energy particles during solar proton flare and effects on magnetosphere, cosmic ray intensity, ionosphere and geomagnetic activity
10 p1768 A69-23786
- Cosmic ray cut-off energy for synchronous satellites computed by trajectory tracing method using magnetospheric model
11 p1949 A69-24860
- Anisotropic fluxes of energetic particles in and near distant trapping region encountered by Explorer 33 satellite in outer magnetosphere
11 p1950 A69-25146
- Auroras and polar magnetic substorm observations limited comparison due to magnetospheric models inability to interpret daytime precipitation zones and particle energy spectra

12 p2072 A69-26740

Inner radiation zone including data on electrons, protons and heavier particles and results from high altitude nuclear tests

12 p2152 A69-27144

Negative charge production by H atoms collisions with rare gases and hydrogen, noting smooth rise of cross section with energy for rare gases

13 p2302 A69-27459

Laser Doppler method for measuring local particle velocities in two phase flows of liquid-metal MHD generators

13 p2260 A69-27476

Time of flight measurement for velocity of micron sized particles in two phase flow by light transmission method

13 p2263 A69-28243

Wilson chamber and ionization calorimeter determination of cosmic ray particle-carbon nuclei interaction energy characteristics

13 p2330 A69-28379

Nuclear component energy flux absorption in Fe measured with ionization calorimeter

13 p2330 A69-28386

Nuclear active particles energy in extensive air showers measured with ionization calorimeter, noting discrepancy attributed to ionization bursts

13 p2331 A69-28387

Ionization calorimeter energy measurement systematic errors

13 p2331 A69-28394

Primary particle energy and extensive air shower electron density relationship derived from vertical spectral profiles

13 p2331 A69-28396

High energy electron photon cascades event recorded with X ray photography, discussing origin in related atmospheric cosmic ray showers component subgroups

13 p2331 A69-28398

High energy muons energy spectrum in extensive cosmic ray showers from spectrum study of ionization bursts due to penetrating component

13 p2332 A69-28403

High energy ionization bursts in cosmic ray showers electron photon component, obtaining bursts power spectrum and component energy dependence

13 p2332 A69-28404

High energy mu-mesons component of atmospheric cosmic ray showers by particle impact penetration using multiple underground ionization chambers

13 p2332 A69-28409

Cosmic ray showers components relationships, analyzing superhigh energy nuclear cascade development, discussing components distribution function at constant proton energy

13 p2332 A69-28410

Primary particles energy determined by probability distribution functions of cosmic ray showers characteristics, using Monte Carlo computerized calculation

13 p2332 A69-28411

Cosmic ray chain reaction particles energy spectrum determination in heavy media, discussing cascade parameter application in showers development

13 p2303 A69-28412

Cosmic ray showers electron, positron and photon energy distribution functions calculated, considering positron annihilation, Compton effect and relativistic electrons formation

13 p2303 A69-28413

Electron photon cascades energy dependence on primary particle energy determined in lead by various instruments

13 p2304 A69-28418

Cosmic ray muons energy and angular distribution measurements, obtaining curve with respect to projection angles

13 p2332 A69-28420

Form factor of nucleus effect on high energy muons bremsstrahlung cross section

13 p2333 A69-28422

Distribution characteristics of radiation defects in materials irradiated by monoenergetic beams of protons and alpha particles

14 p2503 A69-28787

Spherical plate electrostatic analyzer transmission characteristics, emphasizing angular response to external particle sources as functions of angular coordinates and particle energy

14 p2449 A69-29560

High energy neutron transport calculated using one dimensional discrete ordinates code with anisotropic

scattering, comparing results with nucleon transport code calculations

14 p2481 A69-29592

Soviet book on solar cosmic rays covering origin, propagation, energy spectrum, diffusion dependence on particle energy and distance, solar flares, etc

14 p2514 A69-29816

Low energy positrons in cosmic radiation due to beta decay of carbon, nitrogen and oxygen isotopes, estimating positron fluxes and energy spectra

15 p2676 A69-30887

Ionospheric VLF emission and particle measurements, discussing energy, distribution and flux of protons and electrons

15 p2605 A69-31421

Diatomic heavy particle collisions with emphasis on epithermal energy range, discussing elastic scattering and inelastic processes

16 p2815 A69-32259

Cosmic ray particle Pb nucleus interaction energy transfer to electron photon cascade in first inelastic collision, noting dependence on particle energy

17 p3008 A69-33387

Resonances and doublets observation by neutron radiative capture and transmission of W and Zr isotopes in kev region, noting partial wave strength functions

18 p3175 A69-34314

Solar neutrons upper limits measured for 28 July 1967 importance 1 flares

18 p3187 A69-34959

Densities and angular distributions of fossil tracks in meteorites produced by slowing down heavy primary cosmic ray nuclei

19 p3410 A69-36096

Solar system low energy particle flux at 2-3 AU distance during last 10 million years, discussing cosmic radiation flux

19 p3411 A69-36097

High and medium energy molecular beams - Conference, Cannes, July 1969

19 p3375 A69-36171

Langmuir plate and spherical ion probe experiments aboard Explorer 31, measuring concentrations and temperatures of thermal electrons and ions

20 p3545 A69-37881

High energy cosmic rays primary spectrum determined from observations of secondary components including gamma rays, muons and air showers

21 p3790 A69-38822

Galactic cosmic rays, discussing chemical composition, isotopic separation, proton and alpha particles energy spectra, propagation, interactions, etc

21 p3791 A69-39502

Accelerating electric field model to interpret energy and angular distribution of auroral particles, noting electric potential limitations

22 p3938 A69-40445

Distribution function of output energies of polycrystalline metal surface used as plasma probe, considering homogeneous plasma flow and isotropic particle velocity distribution

23 p4196 A69-41696

Neutrons energy spectrum at sea level calculated and proved consistent with satellite cosmic ray data

23 p4205 A69-41701

Cosmic ray detectors design for medium, low and very low energy events on IMP-1 spacecraft, noting PCM format

23 p4118 A69-41738

Cs ionization by bromine, measuring relative cross section velocity dependence by crossed molecular beam technique

23 p4194 A69-42208

Air showers muon threshold energies deep underground as function of zenith angle, discussing nucleon-air-nucleus collision parameters variation effect

23 p4207 A69-42497

Cosmic ray pions and muons anomalous measurements above 1000 Gev explained by medium-strong contact interaction between protons

24 p4353 A69-43194

Solar high energy gamma ray flux abrupt increase detected by neutral particle plastic scintillators at balloon altitude

24 p4371 A69-43612

PARTICLE FLUX

U FLUX [RATE]

PARTICLE FLUX DENSITY

NT ELECTRON FLUX DENSITY
NT NEUTRON FLUX DENSITY
NT PROTON FLUX DENSITY

Spatial variations in particle intensity near and inside magnetosphere during September 1966 solar cosmic ray events, noting magnetosphere screening effectiveness

02 p0309 A69-12740

Large area proportional counter for cosmic ray design, construction and specifications

03 p0427 A69-12979

Cosmic ray intensity increase of January 28, 1967, noting pressure corrected hourly data and lack of association with visible solar flare

04 p0649 A69-15442

Elementary composition and origin of primary cosmic rays, discussing space techniques for observation of components

05 p0818 A69-16816

Mass influx and penetration rate of meteor streams

06 p1000 A69-17007

Helium component flux in primary cosmic rays determined, using corrected alpha particles number

06 p0988 A69-17275

Splash albedo flux measurement, using Cerenkov counter telescope surrounded by anticoincidence shield

06 p0989 A69-17278

Micron and submicron particle cumulative flux upper limits in satellite micrometeoroid environment of Gemini 12

07 p1215 A69-18845

Helium flux in lower thermosphere, using diffusion theory for multicomponent gas mixture to determine equation for equilibrium distribution

07 p1125 A69-18848

Cosmic ray negatron and positron spectra using balloon-borne magnetic spectrometer, obtaining absolute solar modulation of positron flux

08 p1380 A69-20728

Plasma flow from hot cathode discharge in magnetic field increases ion flux intensity and prevents flow divergence in vacuum

08 p1370 A69-21075

Brans-Dicke gravitation theory effects on solar evolution and neutrino flux, discussing solar luminosity

09 p1605 A69-22415

Low momentum muon directional coupling coefficients based on latitude survey of directional meson intensity

09 p1583 A69-22759

Speed distribution and density of molecular beam from time domain measurements of propagated beam perturbations, discussing gate functions

10 p1652 A69-23340

Time histories of Mev proton and alpha particle intensities during and after July 7, 1966 solar flare, noting abundance ratio and geophysical effects

10 p1768 A69-23768

Anisotropic fluxes of energetic particles in and near distant trapping region encountered by Explorer 33 satellite in outer magnetosphere

11 p1950 A69-25146

Particle fluxes in outer radiation belt and unstable radiation zone of outer geomagnetic field, discussing electron diffusion into magnetosphere and magnetic disturbances

12 p2150 A69-26744

Electron transport phenomenon in high pressure cesium diodes, noting quasi-static assumption of particle distribution functions

14 p2401 A69-29229

Solar corpuscular radiation component from satellite and interplanetary space probe geophysical data, discussing interplanetary magnetic field geometry and corpuscular fluxes

15 p2684 A69-30516

Cumulative flux of interplanetary and cislunar space dust particles by Mariner 4 andOGO 3 spacecraft, noting particle impact rate

15 p2699 A69-31394

Picogram dust particle flux in selenocentric space measurement by Lunar Explorer 35, showing enhancement during meteor showers

15 p2699 A69-31396

Ionospheric VLF emission and particle measurements, discussing energy, distribution and flux of protons and electrons

15 p2605 A69-31425

Cosmic ray shower axis mean distance from apparatus determined by measuring muon to charged particles densities ratio

17 p3024 A69-33580

Cosmic ray heavy nucleus enders flux by nuclear emulsions for balloon flights at various atmospheric depths

17 p3025 A69-34219

Solar system low energy particle flux at 2-3 AU distance during last 10 million years, discussing cosmic radiation flux

19 p3411 A69-36097

Thermal molecular beam sources fabricated from multichannel arrays, describing molecular flux leak rates and angular distributions

19 p3376 A69-36175

Corpuscular radiation distribution function with trapped particles maximum density fixed in equatorial plane and reflection points vicinity of magnetic force line

19 p3396 A69-36630

Rocket and satellite particle collection experiment to confirm reduced micrometeoroid flux near earth, noting inconclusive size frequency distributions of exposed flight samples

21 p3793 A69-38343

Auroral absorption relation to visual aurora and measured particle fluxes

21 p3707 A69-38488

Solar neutrinos emission mechanism for information on central region of sun, discussing detection and flux density

21 p3790 A69-38827

Particles integral and differential fluxes spectral distribution calculation for determining radiation load for synchronous satellite

22 p4035 A69-39909

Outer anisotropic galactic cosmic particle flux distortion in interplanetary space, analyzing scattering in solar wind by isotropic diffusion equations

23 p4205 A69-41837

Cosmic ray flux intensity increases, discussing effects of solar wind, corpuscular flux velocity and interplanetary magnetic field

23 p4205 A69-41838

PARTICLE IN CELL TECHNIQUE

Clouds-in-clouds and clouds-in-cells method /CIC/ for many body nonlinear plasma problems, calculating density and force of particles

12 p2138 A69-26625

PARTICLE INTENSITY

March 1966 Forbush decrease observed in underground meson component at 70 mwc compared with neutron and sea level meson intensity variations

01 p0146 A69-11129

Monte Carlo method used to calculate probability of muon penetration to deep underground levels with sea level energies

13 p2333 A69-28424

Supersonic molecular beam relative intensity represented as function of nozzle to collimator distance and gas admission pressure

20 p3579 A69-37432

PARTICLE INTERACTIONS

NT ELECTRON CAPTURE

NT ION ATOM INTERACTIONS

NT MOLECULAR COLLISIONS

NT MOLECULAR INTERACTIONS

NT NUCLEAR INTERACTIONS

NT SPIN-ORBIT INTERACTIONS

Weakly interacting neutrinos in anisotropic cosmological models with emphasis on equilibrium period, noting energy increment

01 p0123 A69-10348

Magnetic storm principal phase explained by interaction between quasi-trapped particles stream and magnetosphere

01 p0144 A69-10573

Electron impact spectrometer for obtaining molecular energy loss spectra used to investigate scattering cross sections for optically allowed and forbidden transitions

01 p0123 A69-10620

Nonexistence of Biota-Cloud recontamination hazard for planetary lander proved by analysis of interactions between small particles and physical fields around vehicle

02 p1201 A69-11771

Current carrier mobility in GaTe and tin selenide semiconducting stratified lattices, noting interaction of free carriers and polarized nonpolar phonons

02 p0295 A69-11777

Thermodynamic stability of plasma with strong interaction, discussing relationship to simultaneous oscillation forms

02 p0292 A69-12635

Induced combinational scattering /ICS/ on IR active transitions, deriving equations with allowance for population variation

02 p0282 A69-12636

Statistical description of nonelastic processes in nonequilibrium plasma in transverse magnetic field, using kinetic equations for distribution functions

03 p0476 A69-13412

Electromagnetic properties of bounded isotropic plasma in kinetic approximation

03 p0477 A69-13712

S matrix theory without restriction to asymptotic particle momentum measurements, introducing main nondynamical features

03 p0467 A69-13754

Atomic electron spontaneous transition in theory of direct particle interaction, considering electrodynamic field zero-point oscillations role

03 p0468 A69-13773

Grain boundary interaction energy with inclusion of second phase, describing equilibrium and boundary shape

03 p0449 A69-13880

Barometric coefficients of multiplicities calculated using cosmic ray interactions model and neutron monitors response to secondary nucleons

03 p0425 A69-14025

Hydrogen plasma transport properties for semiclassical quantum potential calculated by Chapman-Enskog-Hilbert theory

05 p0799 A69-15735

Dynamic response of solids induced by charged particle interaction noting laser interferometric measurement of surface stresses

05 p0771 A69-15817

Ion-molecule collisions of Ar-Co and N-No pairs, discussing charge exchange reaction rates and spiraling nature

05 p0797 A69-16428

Book on diffuse matter in space covering observations of interstellar gas, grains, particle interaction and star formation

06 p0997 A69-16833

Simultaneous parallel penetrating muons observed in multiple cloud chambers, obtaining information about sea level muons interactions and EAS

06 p0991 A69-17304

Packet of finite amplitude VLF whistler waves, examining cyclotron resonance interaction with high energy electrons and development in magnetosphere

06 p0917 A69-17378

Maximum number of binary collisions for three particles with zero range forces in relativistic rescattering singularities studies

08 p1353 A69-19788

Plasma diagnostics methods for evaluating collision and transport cross sections, discussing resonance fluorescence, steady state discharge and afterglow measurements

08 p1364 A69-20476

Slow distribution function of magnetoactive plasma, deriving kinetic equation in quasi-linear approximation for analyzing particle-HF electromagnetic wave interactions

08 p1365 A69-20550

Einstein space time concepts for unified formalism of matter interactions from elementary particles to astronomical bodies, discussing relativity theory

08 p1352 A69-20730

Partially ionized plasma oscillations in crossed magnetic and electric fields, noting role of LF particle collisions

08 p1370 A69-21079

Finite ion mass effect on stability of space charge neutralized electron beam

09 p1545 A69-21342

Effective cross sections of electron-neutron interaction in photosphere and sunspots, calculating electric conductivity and anisotropy coefficient

09 p1579 A69-22175

Galactic cosmic ray scattering and energy loss through solar wind interaction

09 p1580 A69-22202

Geomagnetically trapped particle loss processes and equilibrium distribution resulting from MHD wave field interaction described using sandbox model

11 p1948 A69-24856

Classical statistical mechanics of systems with identical or limited different particles, discussing particle collisions in dilute gases

11 p1870 A69-25009

Dense gas equilibrium plasma thermodynamic stability in case of high electrostatic interaction energy of charged particles, analyzing phase transition possibility

11 p1928 A69-25234

Inelastic interactions cross sections of slow electrons with adsorbed particles on W surface as function of temperature in surface bond vibrational region

12 p2132 A69-26114

Relativistic hydrodynamic equations for charged particles interacting in external scalar and gravitational fields, considering particle motion and scalar plasma dispersion
12 p2130 A69-26462

Charged state variations during protons and inert gas atoms interactions analyzed by coincidence method
12 p2133 A69-26543

Energy exchange between LF waves and magnetospheric energetic particle population by bounce resonant interaction
12 p2073 A69-26946

Effective tensors of elastic moduli and yielding of composite materials, considering multiparticle interactions and use of equilibrium and incompatibility equations
13 p2360 A69-27382

Oscillating electron ion discharge in magnetic field in system of alternating positive and negative electrodes to obtain fast neutral particle fluxes
13 p2311 A69-28109

Elastic and inelastic elementary particle collisions described by Feynman diagrams, discussing computer results for high energy particle interactions
13 p2303 A69-28369

High energy muons energy spectrum in extensive cosmic ray showers from spectrum study of ionization bursts due to penetrating component
13 p2332 A69-28403

Elastic materials with particle interactions of finite range, establishing continuum field and constitutive equations from particle mechanics
13 p2371 A69-28674

Fermi surface data of alkali metals interpreted in terms of interaction between conduction electrons and ionic lattice for deducing partial wave phase shifts
13 p2304 A69-28681

Electron magnon interaction in ferromagnetic and antiferromagnetic semiconductors, showing conduction band and electron effective mass and magnetic moment dependences on temperature and spin direction
14 p2504 A69-28991

Electrodynamics law between current elements consistent with Newtonian dynamics, noting consequences in discharge and plasma control
14 p2485 A69-29320

Small signal analysis of processes in klystron resonators involving beam-field interaction
15 p2573 A69-30117

Magnetic storm principal phase explained by interaction between quasi-trapped particles stream and magnetosphere
15 p2675 A69-30743

Ion-acoustic oscillations effect on weakly ionized plasma electrical conductivity, using BGK collision integral model
15 p2662 A69-30970

Particle-wave interaction in weak turbulent plasma in presence of uniform magnetic field, applying perturbation theory arbitrary order
16 p2819 A69-31683

Lasing influence on electron energy distribution in gas discharge measured with Langmuir probe, showing electron-electron interaction insufficient to maintain equilibrium
16 p2796 A69-31772

Single particle and collective excitations of plasmas in solids and interactions with acoustic and electromagnetic waves in magnetic field
16 p2821 A69-31820

Warm plasma probe, describing transit electrons interaction with electric field and generation of electroacoustic waves radiation
16 p2824 A69-32611

Ionization, recombination and charge transfer in upper atmosphere during aurora, considering quasi-equilibrium ion-electron concentrations
17 p2961 A69-33417

Coulomb interference corrections in pion-He scattering, discussing three specific formalisms
18 p3176 A69-35008

Comet-solar wind interaction model, determining contact discontinuity size and shape around comet nucleus and ion specular reflection
18 p3188 A69-35190

Cs jet device eliminating wall influence in nonlinear radiation-atom interaction phenomena
19 p3376 A69-36174

Ion production in K/diatom Br system by high energy K beam, obtaining total ionization cross section as function of energy
19 p3378 A69-36187

Hydromagnetic wave-charged particle resonant interaction described by diffusion equation in momen-

tum space, deriving diffusion coefficients and time evolution ultrarelativistic particle energy spectrum
19 p3424 A69-36335

Magnetospheric disturbances effect on radio wave propagation, discussing wave-particle interactions, VLF emissions and electrostatic waves
19 p3303 A69-36429

Electrostatically accelerated ion spheres interaction with thin metal and nitrocellulose foils to develop detectors for cosmic dust collection and recording
21 p3719 A69-38344

Venus magnetosphere induced by piling up magnetic field from solar wind due to ionospheric conductivity and collisions with planetary atmospheric particles
21 p3794 A69-38381

Unified theory of elementary particles assuming quantum mechanics as consequence of changes in time within microcosmos and particle-universe interaction
21 p3816 A69-39622

Scattering of high energy Ar beams by room-temperature Ar, He and H molecules, deriving interaction energies at internuclear distances
22 p3988 A69-41187

Black body radiation at very high temperatures, discussing pion-nucleon interaction in pion gas in thermal equilibrium
23 p4238 A69-41358

Inelastic collision cross sections for low energy interactions among electrons, ions, atoms and molecules determined as function of temperature, using approximate methods
23 p4194 A69-41520

Solar wind sample collection, describing experiment to determine ion flux capture efficiency for various metal foils
23 p4205 A69-41539

Integral transformation applicability to inverse problems concerning interaction potential energy between particle pairs in n-dimensional Euclidean space
23 p4182 A69-41960

Stellar neutrino energy loss due to electron-electron neutrino bremsstrahlung in nondegenerate gas determined from transition probability for charged baryons or leptons interaction
24 p4351 A69-42794

Cosmic ray pions and muons anomalous measurements above 1000 GeV explained by medium-strong contact interaction between protons
24 p4353 A69-43194

Diffuse cosmic X rays from Compton collisions between galactic leakage electrons and extragalactic background photons to verify microwave blackbody radiation properties
24 p4368 A69-43202

Crossed beam apparatus /evatron/ for studying energy spectra of crossed positive ethylene ion beams and neutral ethylene molecule beams
24 p4280 A69-43813

PARTICLE MASS

NT ELECTRON MASS

Finite ion mass effect on stability of space charge neutralized electron beam
09 p1545 A69-21342

Mass displacement in light path due to interaction with gravitational wave accompanying light pulse, discussing general relativity tests for time delay and starlight bending
09 p1540 A69-22081

Particle volume role in normal shockwave structure in gas-particle mixtures, discussing equations of motion formulation
13 p2244 A69-27327

Stable particles heavier than nucleons in extensive cosmic ray showers detected by delayed coincidences relative to shower electron photon component
13 p2331 A69-28402

Number and mass of sodium atoms in comet Ikeya-Seki 1965f head calculated from spectral observations, ascribing D lines to resonance scattering of photospheric radiation
15 p2685 A69-30526

Low velocity heavy mass particle detection in sea level cosmic radiation, assuming deuterons
16 p2846 A69-31600

Possible existence in universe of large number of difficult-to-observe particles with zero rest mass left over from superdense phase
16 p2814 A69-31801

Superluminal group velocities in relation to causality axion, considering sound propagation in ultradense matter and particles of imaginary mass /tachyons/
21 p3769 A69-38543

Meteoroid penetration damage to spacecraft system showing particle mass density distribution as protection criterion
21 p3805 A69-39222

Quark mass and charge interpretation during particle track photographic analysis of air shower cores by delayed expansion Wilson cloud chamber
24 p4383 A69-42944

PARTICLE MOTION

Particle moving in circular orbit perpendicular to axis of cylindrically symmetric magnetic field
01 p0120 A69-10811

Particles behavior after separation from meteor, considering deceleration for separation altitudes and initial velocities
02 p0314 A69-11644

Charged particle motion caused by ELF electromagnetic waves in presence of constant magnetic field, noting earth ionosphere application
02 p0240 A69-11712

Rotational motion of system of particles related to existence of reference frame to eliminate coupling terms between internal and rotational motion
02 p0280 A69-11867

Plasma jet motion in time constant and time variable magnetic field noting particle deflection, polarization loss, capture and cut-off
02 p0292 A69-12551

Solar cosmic radiation, particle acceleration, energetic particles as sample of sun and propagation of particles from sun to earth
03 p0498 A69-12934

S matrix theory without restriction to asymptotic particle momentum measurements, introducing mainly nondynamical features
03 p0467 A69-13754

Similarity motion of fluid particles in one dimensional gas flow, establishing limits of slip factor value change
03 p0419 A69-13920

Charged particle dynamics in spiral interplanetary magnetic field model, discussing electric drift velocity point of origin and distribution
03 p0503 A69-14011

Bound motion for particle in point electric dipole field, noting features of motion common to spherically pendulum motion
03 p0473 A69-14101

Stormer problem of charged particle motion in magnetic dipole field, discussing analytical method for high and low energy particles
03 p0504 A69-14121

Charged particle motion in time dependent external magnetic field
03 p0504 A69-14231

Charged particles motion in spatially modulated magnetic field solved using modification of Krylov-Bogoliubov asymptotic method
04 p0633 A69-14291

Asymptotic method for studying charged particle motion in spatially modulated magnetic field
04 p0634 A69-14292

Capture of electrically charged micrometeorites and corpuscles in magnetic field of gravitating dipole, noting necessary condition on particle motion
04 p0659 A69-14961

Random motion of particle with nonlinear damping obtaining velocity spectrum by solving associated nonstationary Fokker-Planck equation and using equivalent linearization technique
04 p0561 A69-15451

Charged particle motion in constant direction magnetic field varying exponentially with time, discussing electric field effect on particle motion
05 p0801 A69-15741

Solid phase particle motion in plasmatron with colliding jets, measuring W particle heating by optical method
05 p0802 A69-15971

Particles nonlinear motion in plasma in magnetic field with arbitrary electron velocity distribution discussing wave discontinuity patterns
05 p0804 A69-16371

Equation for charged particle motion in electromagnetic wave field propagated along magnetic field applied to nonlinear wave propagation in plasma near cyclotron resonance
06 p0963 A69-16901

Particle velocity measuring technique for two phase turbulent flows, using laser and Fabry-Perot interferometer
06 p0933 A69-17251

Spherical particle motion in vortex gas flow between planes of turbulence chamber perpendicular to axis of flow rotation, noting collisions effect
07 p1181 A69-19000

Instability in pyrolytic silicon dioxide films on Ge substrate under bias at room temperature consisting of positively charged ion motion
07 p1200 A69-19010

Auroral electron penetration into atmosphere analyzed on basis of independent electron particle motion, using auroral electron angular distributions and energy spectra above atmosphere
07 p1128 A69-19368

Particle dynamics measured by ATS satellite synchronous orbit, discussing flux time variations during geomagnetic disturbances
07 p1209 A69-19371

Particle motion, deriving Lagrangian formalism equivalent to Schroedinger equation for random motion theory
07 p1182 A69-19455

Rarefied plasma self similar motion qualitatively analyzed, particularly penetration and expansion, taking into account electric/magnetic field effects
08 p1359 A69-19951

Electromagnetic waves and photons coexistence, discussing wave mechanics and guidance of particles, photon guidance and corpuscular magnitudes, etc
08 p1351 A69-20117

Charged body moving at subsonic velocity normally through stratified elastic half space composed of film on homogeneous half space
08 p1417 A69-20753

Incoherent wave scattering of particle orbits as nonlinear effect of LF instabilities
08 p1367 A69-20801

Captured particles magnetic drift envelopes in magnetosphere calculated by model considering perpendicular geomagnetic dipole to solar wind
09 p1574 A69-21521

Charged particles equations of motion in earth magnetosphere in polar storms, considering auroral zone, diurnal variations and electron and proton velocities
09 p1485 A69-21535

Shock wave structure problems in plasma, including plasma particles random motion in term representing electric field
09 p1551 A69-22032

Differential equation for droplet motion along ballistic trajectory in gas flow, noting applicability to solid bodies via computer programming
09 p1483 A69-22222

Charged particles motion in geomagnetic field from analyzing spatial distribution within framework of two dipole magnetosphere model
10 p1756 A69-22818

Diffusion coefficient and cosmic ray motion in solar system, using satellite data of interplanetary magnetic field
10 p1757 A69-22822

Particulate radioactivity for study of stratospheric motions, demonstrating negligible long time particle settling with comparative measurements of particulate Sr 90 and gaseous C 14
10 p1682 A69-23410

Silicon carbide particle growth and motion in carbon star atmospheres
10 p1781 A69-23678

Electron confinement in magnetic mirror geometry supplemented with RF quasi-potential barriers, considering gas scattering
11 p1924 A69-24306

Dynamics of turbulent motion of incompressible viscous fluid particles, using Lagrangian functions
11 p1867 A69-24536

Adiabatic theory of charged particle motion in electromagnetic field, applying asymptotic methods of nonlinear oscillations theory
11 p1948 A69-24857

Stable particle trapping zone in magnetosphere, discussing results of adiabatic theory application to charged particle motion in earth magnetic field
11 p1948 A69-24858

Charged particle motion in periodic electromagnetic field, constructing dynamic variables describing motion
11 p1927 A69-25100

Transverse pulsating motion of spherical particle in turbulent flow, considering differential equation of motion transformation
11 p1876 A69-25489

Test particle classical dynamics in closed expanding universe, discussing Newtonian inertial mass decrease and canonical methods for determining momentum, velocity and energy
11 p1920 A69-25561

Cosmic radiation origin in terms of sudden injection of particles in time, momentum and space, considering statistical fluctuations role in observed spectrum
12 p2148 A69-26206

Quantitative magnetic field models of magnetosphere for analyzing field configuration variations and adiabatic particle motion
12 p2072 A69-26738

Model for self consistent time independent ring current of charged particle distribution under combined field of earth dipole and particle motion current
12 p2151 A69-26948

Electrohydrodynamic flows at large electric Reynolds numbers, obtaining Bernoulli and Cauchy-Lagrange integrals
13 p2305 A69-27379

Cosmic ray propagation theory for steady streaming along magnetic field and down cosmic ray density gradient, noting MHD wave generation by anisotropy
13 p2326 A69-27569

Vibrating camera for photographic measurement of flow velocities and trajectories of bodies marked by light spots
13 p2261 A69-27913

Angular distribution of nuclear particles dispersed during motion determined from photon energy and inelasticity coefficient
13 p2303 A69-28390

Low energy charged particle motion parallel with magnetic force lines analyzed in magnetosphere model with constant electric field
14 p2512 A69-29040

Geomagnetic cut-off influence on charged particle dynamics in geomagnetic field, applying charged particle motion theories to magnetosphere fields
14 p2513 A69-29099

Relativistic behavior of electromagnetic multipolar nongravitating particle, discussing integrability of field equations
14 p2486 A69-29594

Cometary tail diffusion model based on luminous particle number decrease with time and particle accelerated motion and diffusion in space
14 p2523 A69-29705

Coupled equations for heavy particle motion expressed by introducing generalized matrix operator for effective momentum in atomic collision processes
14 p2489 A69-29997

Plasma jet motion in time constant and time variable magnetic fields noting particle deflection, polarization loss, capture and cut-off
15 p2658 A69-30255

Gasdynamic model of comet nucleus region, discussing molecular collisions, surface brightness distribution and dust particle motion
15 p2684 A69-30520

Charged particle motion in magnetic mirror trap, observing time dependence with respect to orbital magnetic moment conservation
15 p2659 A69-30724

Final states of density, velocity and pressure in gas, comparing states reached after transition through single oblique hydromagnetic shock and two successive shocks
15 p2664 A69-31217

Relativistic generalization for polar Sommerfeld rosette of Fourier series expansions by Lagrange and Bessel for particle motion in Keplerian field
16 p2811 A69-31607

Nonlinear interaction between three monochromatic waves propagating parallel to magnetic field in plasma, considering relativistic drift motions of particles
16 p2816 A69-31640

Charged particle motion in superposed Heliotron and biconical cusp magnetic fields, considering particle confinement
16 p2817 A69-31643

Self consistent ring current of radiation belt under combined influence of earth dipole field and field due to currents of particle motions
16 p2776 A69-32096

Correlation between F region electrons vertical motion velocity variations and E region electrons horizontal motions in equatorial ionosphere
16 p2779 A69-32193

Captured particles magnetic drift envelopes in magnetosphere calculated by model, considering perpendicular geomagnetic dipole to solar wind
16 p2851 A69-32516

Charged particles equations of motion in earth magnetosphere in polar storms, considering auroral zone diurnal variations and electron and proton velocities
16 p2783 A69-32530

Linear irreversible thermodynamics theory as applied with conservation principles and Maxwell relations

to charged particle motion in electromagnetic field, noting Onsager coefficients role
17 p3075 A69-34142

Capture of electrically charged micrometeorites and corpuscles in magnetic field of gravitating dipole, noting necessary condition on particle motion
18 p3197 A69-34725

Solar cosmic ray anisotropies in terms of model with particles propagating along interplanetary magnetic field undergoing pitch-angle scattering
18 p3189 A69-35400

Plane electromagnetic wave scattering by motion of small ellipsoid in vacuum, noting total scattering and radar cross sections dependence on ellipsoid velocity
18 p3105 A69-35485

Active attitude control method with energy increases and decreases induced to modify attitude motions for particles and rigid bodies
19 p3429 A69-35958

Ion and electron fluxes and drag force dependence on electrostatic charge and velocity of interstellar dust particle
19 p3425 A69-36562

Gas dynamics in transition regime between continuum motion at high gas density and free particle motion at low density limit
19 p3300 A69-36658

Newtonian and general relativistic orbits of point mass in inverse square law force field, noting radar determination of spacecraft orbits
[AAS PAPER 68-098] 20 p3595 A69-37176

Negative time interval implications for meta particle at superluminal velocity with respect to two reference frames, noting causality paradoxes
20 p3598 A69-37412

Equilibrium velocity distributions of F region photoelectrons produced by solar ionizing radiation, discussing dayglow as impact result
20 p3591 A69-38061

Hydromagnetic waves equations of motion for non-relativistic case, discussing particle and fluid flow models
20 p3616 A69-38317

Magnetospheric electromagnetic phenomena explained by equations of motion for particle acceleration, forbidden regions and MHD processes
21 p3707 A69-38485

Low energy plasma escape flow from polar region /polar wind/, examining H, He and O ions participation in expansion
21 p3713 A69-38528

Drag effect on plasma motion in high current pulsed plasma accelerators of Marshall type, calculating current variations, voltage, particle velocity, efficiency and impulse
21 p3778 A69-39548

Spherical motion of solid body about fixed point with nonholonomic coupling, deriving equations for centrifugal moments of inertia effects on motion
21 p3773 A69-39840

Auroral UV and 3914 Å radiation during charged particle precipitation measured by satellite
22 p3939 A69-40507

Drift shell splitting in nondipolar distorted magnetosphere tested with data from electron spectrometer on ATS 1 and OGO 3 satellites
22 p4005 A69-40508

Self consistent flow calculation in dense space charge beams, including electrode design for portions isolation
22 p3985 A69-40668

PARTICLE PRODUCTION

Electron-hole collisions effect on drift and electron and hole diffusion in semiconductors at high injection levels
01 p0137 A69-10257

Initial production of metallic gases associated with sporadic E layers by processes other than vaporization or photodissociation, discussing Na atom production mechanisms
01 p0071 A69-11167

High energy strong interaction theory in cosmic ray physics, discussing Regge model, fireball production and quark problem
03 p0469 A69-12940

Solar X ray control of D layer based on Explorer 33 data, computing electron production rates due to typical X ray flux
03 p0500 A69-13224

Electron production and loss rates in F region from measurements of Faraday rotation imposed on VHF telemetry transmissions from geostationary satellite
03 p0503 A69-14016

Reducing decarburization of titanium carbide in argon plasma by carbon containing atmosphere, obtaining stable spheroidal particles
05 p0767 A69-15976

Gamma ray production and high energy electrons in cosmic radiation
05 p0817 A69-16712

Energy spectra of muons determined from knock-on electrons projected angles of emission in C, Al and Cu
06 p0991 A69-17305

Electron formation in lower ionosphere due to cosmic ray-atmosphere interaction, analyzing ionization of subrelativistic and relativistic solar and galactic cosmic rays
06 p0920 A69-17726

Direct muon production, discussing range vs energy relation for favorable experiment and difficulties with observed muon flux isotropy
07 p1209 A69-19406

High energy particles obtained by accelerating plasma with frozen-in magnetic field to relativistic velocities during scattering of fast electron beam
08 p1358 A69-19805

Very high energy gamma rays from pulsars, considering implications of various gamma ray production processes
08 p1377 A69-19897

Boron crystalline modification during transit through induction coupled Ar plasma producing better crystallized spheroids
08 p1372 A69-20687

Solar neutrinos and convective core mixing on short time scale resulting in flux reduction
09 p1574 A69-21453

Compton scattering of microwave radiation on cosmic ray electrons proposed as mechanism generating 100 Mev cosmic gamma rays
09 p1580 A69-22295

Renormalizable weak interaction mechanism for generation of high energy muons from Tev cosmic rays in upper atmosphere
09 p1581 A69-22530

Electron-hole collisions effect on drift and electron and hole diffusion in semiconductors at high injection levels
09 p1559 A69-22650

Electron production rates variations in lower ionosphere cosmic layer related to meteorological, geomagnetic and cosmic conditions
10 p1759 A69-22839

Spatial distribution of residual nuclei produced in thick Fe targets by one and three Gev protons, noting total production and longitudinal variation of production
10 p1760 A69-23411

Graphite particle formation in atmosphere of C type Mira variables, calculating particle size distribution by nucleation and coagulation theory
10 p1782 A69-23681

Neutron production cross sections prediction at proton bombarding energies below 50 Mev and above threshold for multiple nucleon emission
12 p2192 A69-26299

Tritium contamination reduction in small ion accelerators for neutron production, discussing pumping problems and vacuum systems
12 p2059 A69-26499

Multiple particle production and resonance events during high energy particle collisions
13 p2303 A69-28372

Gamma quantum spectrum shape from high altitude X ray film and nuclear emulsion blackening, discussing high energy pion production
13 p2330 A69-28378

Angular distribution of penetrating shower particles produced in nuclear interaction of cosmic rays with C, Sn, Cu and Pb
13 p2330 A69-28381

Pionization cross sections at 100 gev for interactions of cosmic ray neutrons and pions with C and Pb nuclei
13 p2330 A69-28382

Galactic and relativistic and subrelativistic solar cosmic rays effect on electron production rate in ionosphere, detailing low energy SCR-atmosphere interactions
13 p2333 A69-28544

Effective recombination coefficient in lower ionosphere determined from charged particle spectra obtained by rocket sounding in Canada
14 p2511 A69-28960

Formation cross sections of Li, Be and B isotopes produced from oxygen 16 spallation via high energy protons related to astrophysics and cosmic ray physics
14 p2512 A69-28968

Efficiency parameter beta for ion and electron production by meteoritic processes, noting importance to nighttime sporadic E ionization
14 p2520 A69-29372

Earth radiation belt data, discussing origin, density, distribution, etc, of protons, electrons and alpha particles
15 p2674 A69-30016

Low energy positrons in cosmic radiation due to beta decay of carbon, nitrogen and oxygen isotopes, estimating positron fluxes and energy spectra
15 p2676 A69-30887

Near horizontal air showers relationship to direct muon production and heavy triplet particles of unit charge, discussing nuclear interactions and muon bremsstrahlung
15 p2678 A69-31499

Particle production by gravitational fields in universe via quantum field theory, considering cosmological models
17 p3008 A69-33003

Electron production rate in low ionosphere, discussing parameters of ionizing solar cosmic rays and earth environment
17 p3022 A69-33035

Differential cross sections for secondary electron production in atomic ionization by charged particle impact, using classical binary encounter approximation
17 p3009 A69-34189

Hydrogen molecular ion dissociation due to ion-molecule inelastic collisions, comparing measured and calculated velocity distributions of protons produced
19 p3375 A69-35985

Noctilucent cloud particles nucleation and growth, noting time dependence and water vapor mixing ratio
21 p3702 A69-38346

Threshold photoneutron cross section for Mg 26, discussing resonances as primary production mechanism for stellar neutrons
21 p3788 A69-38599

Aluminum oxide droplets condensation from atmosphere of metal vapor and oxygen, studying temperature and time effects on particle nucleation, growth and distribution
21 p3783 A69-38799

Big bang and little bang nucleosynthesis, discussing electron-neutrino or electron-antineutrino excess role in He production
21 p3801 A69-38813

Pion production rate for proton-proton interactions in hydrogen, discussing relevance to hot massive stars, charged pion decay probability and mu-neutrino production
21 p3792 A69-39615

Chemical analysis of lunar surface by devices exploiting alpha particle backscattering and proton production by alphas placed by Surveyor 5, 6 and 7
22 p4012 A69-40088

Radiocarbon natural production by cosmic ray neutrons, utilizing proportional counters filled with N atmospheres
22 p4003 A69-40095

Cosmic gamma rays spectrum from neutral pions production and decay in metagalactic cosmic ray p-p collisions, deriving models based on Einstein general relativity theory
22 p4006 A69-40641

Solar L alpha and X ray emission contribution to lower ionosphere ion production, discussing altitudinal, latitudinal and temporal variations
22 p4008 A69-41096

Magnetospheric electron sudden intensity increases correlated with magnetic substorms occurrence at mid-night meridian from ATS 1 observation
24 p4367 A69-43173

Particle creation and quantized fields in expanding universe using covariant generalization of special relativistic free field equations, studying zero- and arbitrary-spin particles
24 p4352 A69-43193

PARTICLE SIZE DISTRIBUTION

Raindrop size distribution law effect on radio wave attenuation coefficient and differential effective backscattering cross section of rain
02 p0208 A69-12259

Particle size frequency distributions and lunar surface materials, showing impossibility of distinguishing between impact fragmentation of surface and pyroclastic rock deposition
02 p0325 A69-12567

Aerosol size distribution and variation with humidity effects on visual range, comparing computations with transmissometer and scattering recorder measurements
02 p0276 A69-12760

Particle size distribution determination by measuring light beam extinction in turbid medium with photometer
03 p0428 A69-13110

Asymptotic estimate derived for size distribution function of fragments resulting from brittle impact destruction of rigid object applied to meteorites and lunar craters
03 p0512 A69-13691

Mie total and differential backscattering cross sections at laser wavelengths for Junge size distribution aerosol models
04 p0609 A69-14290

Long term strength of Ni-Cr-Al-Ti alloys, studying gamma particles size and distribution effect
04 p0616 A69-14653

Helium-neon gas laser cavity beam for automatic high speed particle sizing
04 p0611 A69-15023

Diamond pyramid hardness dependence on grain size of recrystallized alpha titanium
06 p0943 A69-17235

Integrodifferential equation for plasma oscillations solved for effect of ion Larmor radius size and intrinsic electric field on flute instability of axially symmetric plasma
06 p0966 A69-17520

Tank collection and spectrophotometric tests in determining aluminum oxide particle size produced by small rocket engine
06 p0984 A69-18117

Grain size dependence of yield, flow and fracture stresses of Fe-Co-V alloy for 77-298 K
07 p1166 A69-19264

Polycrystalline beryllium specimens fabricated from powders, discussing initial powder particle size and distribution effects on microyield strength
07 p1168 A69-19598

Radiation scattering changes due to droplet size distribution change during stratus cloud formation calculated, using development model and Mie theory
08 p1346 A69-21093

Spatial size and velocity distributions for liquid or solid aerosols suspended in air flow using Q spoiled ruby laser and holography
09 p1492 A69-21418

Stratospheric dust, discussing terrestrial and meteoritic origins, volatility of particles smaller than few microns, and light scattering and direct sampling measurements
09 p1608 A69-22689

Interstellar grain model consisting of elongated dielectric particles represented by infinite circular cylinders reproducing observed interstellar extinction in IF far UV spectra
10 p1781 A69-23674

Graphite particle formation in atmosphere of C type Mira variables, calculating particle size distribution by nucleation and coagulation theory
10 p1782 A69-23681

Silicon particle sizes in Al-Si system investigated for interactions with dislocations as function of strain and for effect in dispersion hardening
10 p1714 A69-23980

Solar radiation pressure on interplanetary dust particles calculated as function of radius and density, noting asteroidal origin of dielectric and absorbing particles
11 p1956 A69-24397

Cloud and fog droplet spectra due to condensation of water vapor on nuclei solved by partial differential equation
12 p2126 A69-26017

Thermochemically synthesized high melting micropowders grinding by vibrational method and classification for polishing and finishing applications
12 p2113 A69-26256

Stony meteoric particles size and velocity during passage through atmosphere
12 p2157 A69-26341

Gaussian particle size distribution with porosity and surface irregularity corrections used to determine mean particle size of lunar surface material at Surveyor sites
12 p2158 A69-26371

Matrix grain size relation to dispersed particle size distribution and Zener-McLean equation description of microduplex structure in superplastic Ni-Fe-Cr alloy
13 p2278 A69-27411

Hypervelocity projectile size and density effect on ballistic limit of dual sheet spacecraft meteoroid protection structures, considering penetration of low and high density particles
13 p2367 A69-28306

Microstructure of light scattering media consisting of large size spherical particles

14 p2481 A69-28737

Multifoil thermal insulation using oxide particle layer separation, discussing insulation heat transfer characteristics as function of source temperature and oxide particle size

14 p2539 A69-29213

Thoria strengthened Ni-Cr alloys high temperature stability, noting thoria particle size influence

14 p2465 A69-29682

Meteor showers contribution to interplanetary dust flux based on relative number of particles of various size

15 p2697 A69-31308

Solid rocket motor propellant burning rate increased by adding special fine ammonium perchlorate /SFAP/ to optimize particle size distribution [AIAA PAPER 69-519]

16 p2793 A69-31850

Airborne particle size influence on gas turbine parts erosion, with attempts to relate to filtration and engine life

16 p2794 A69-32026

Dimensions, concentration and spectrum of large precipitation particles in clouds and cloud water content by measuring reflectivity and absorptivity at different wavelength

16 p2807 A69-32268

Metal oxide particle growth processes in rocket chambers and nozzles, using generalized kinetic-coagulation equation [AIAA PAPER 69-541]

16 p2844 A69-32724

Azimuth angle distribution of secondary particles forming cosmic ray diffused cone with high energy, showing asymmetry and deducing particle transverse momentum upper limit

17 p3024 A69-33763

Ice clouds near IR spectral reflectivity dependence on particle size, noting application to planetary atmospheres

18 p3126 A69-34283

Carbide phase growth rate in Mo-TZC alloy with particle size distribution maintained over time-temperature spectrum, noting diffusion and interface controlled processes

18 p3155 A69-34632

Self contained hand held battery operated aerosol particle analyzer, measuring aerosol concentration and size distribution for laboratory and space flight applications

18 p3136 A69-34691

Vertical air velocity in rain measured for size distribution of drops, using relation between drop fall rate and diameter

18 p3104 A69-35342

Particle size, velocity and position in moving streams measured by tilted film plane optical system with pulsed light source

19 p3306 A69-35733

Niobium carbide deposition from gaseous halogen compounds on graphite particles in pseudoliquefied state, noting stoichiometric coatings

20 p3566 A69-37369

Arbitrary circle distribution in plane transformed to corresponding distribution of spheres in space for size and shape distribution determination of disperse phase

20 p3627 A69-37764

Cepheus light attenuation curve explained by applying polymodal particle size distribution, obtaining interstellar dust density

20 p3608 A69-38048

Particle albedos and extinction cross sections computed by Mie theory showing dependence on refractivity, considering thermal radiation from cloudy planetary atmospheres

20 p3614 A69-38255

Rocket and satellite particle collection experiment to confirm reduced micrometeoroid flux near earth, noting inconclusive size frequency distributions of exposed flight samples

21 p3793 A69-38343

Noctilucent clouds total or partial extraterrestrial origin, deriving minimum particulate influx from satellite and rocket data

21 p3702 A69-38347

Aluminum oxide droplets condensation from atmosphere of metal vapor and oxygen, studying temperature and time effects on particle nucleation, growth and distribution

21 p3783 A69-38799

Sorting particles by shape using sieving equipment, noting results with crushed gravel

21 p3731 A69-38950

Normalized phase function and scattering coefficient of aerosols prediction from measurements of particle size distribution, density and refractivity based on Mie solution

21 p3719 A69-39774

Small particle holography technique extended for dynamic properties of particle fields, determining velocity and density field, size distribution, flow structure and diffusion rate

21 p3726 A69-39776

Free stream dispersion without permeation using nonporous glass beads and solutes, examining flow rate, particle size distribution, solute diffusivity, etc

22 p3894 A69-39873

Hydrogen permeability in Pd alpha phase measured, coupling with grain size measurements for grain boundary to bulk diffusivity ratio

23 p4175 A69-41502

Millimeter wave pseudorandom coded CW meteorological radar for precipitation drop size spectrum analysis and cloud studies, discussing overall system design

23 p4115 A69-41531

Instrumentation and data interpretation method for particle size determination by low-angle light scattering

24 p4313 A69-42764

Scattered light meter accuracy as function of aerosol particles atmospheric distribution according to size, analyzing measurement errors

24 p4343 A69-42966

Varying ratio between mean free path and spherical particle radius at 0-10 km, discussing free molecular flow effects in cloud physics

24 p4345 A69-43145

Solar radiation pressure on interplanetary dust particles calculated as function of radius and density, noting asteroidal origin of dielectric and absorbing particles

24 p4390 A69-43787

PARTICLE SPIN

NT ELECTRON SPIN

NT NUCLEAR SPIN

Chirp radar signal compression by proton spin echo phenomena, noting compression ratio and SNR

11 p1834 A69-24566

Atomic and molecular spins dynamic orientation in anisotropic radiation field, examining medium properties and astrophysical consequences

13 p2350 A69-27861

Validity of Lorentz invariance, discussing nuclear magnetic resonance test on torque for spin of electrons, muons and neutrons

18 p3176 A69-35007

PARTICLE TELESCOPES

March 1966 Forbush decrease observed in underground meson component at 70 mwe compared with neutron and sea level meson intensity variations

01 p0146 A69-11129

Geiger-Muller counter telescopes in conjunction with core selectors for studying geomagnetic effect of extensive air showers

03 p0430 A69-13303

Variational coefficients for vertical and inclined meson telescopes, deriving primary cosmic rays anisotropy parameters from daily variations

06 p0924 A69-17293

Large area scintillation telescopes with cubic geometry, measuring cosmic rays intensity from vertical and slant directions

06 p0925 A69-17296

Gamma ray telescope development for balloon-borne astronomy in search for discrete gamma sources and supernova explosions [IEEE PAPER 3A-5]

07 p1134 A69-19192

Fluorescer-photomultiplier mobile telescope for measurement of vertical cosmic ray intensity and equator points in atmosphere

09 p1493 A69-21420

High energy protons, helium and gamma rays observed by particle telescope on board OSO-C, obtaining integral rigidity spectra of proton and helium nuclei

09 p1579 A69-22172

Baryon passive nuclear state nonexistence indicated by above and below ground calorimetric telescope method of nuclear cascade observation

13 p2331 A69-28401

Proton and alpha particle fluxes above specified vertical geomagnetic cut-off rigidity measured by balloon-borne Cerenkov scintillation counter telescope

14 p2511 A69-28951

Fluorine nuclei in primary cosmic radiation identified by counter telescope measurements on Pioneer 8 spacecraft

15 p2676 A69-30886

Meteorological corrections of meson megatelescope data based on hourly ground-level pressures and temperatures, considering vector and regression analyses

19 p3308 A69-35991

Absorption mean free path for radiation absorbed by given medium, using zenith angle distribution from particle counter telescope

21 p3723 A69-38841

Diurnal variations in solar cosmic ray muon component near sea level, using scintillation counters assembled in muon telescope array

23 p4207 A69-42498

PARTICLE THEORY

Electromagnetic muon-nucleon interaction explanation for observed horizontal air showers, reexamining shower data in view of triplet particles

15 p2678 A69-31498

Cosmological constant and elementary particle theory

20 p3606 A69-38013

Computer experiment on 9000 particle plasma to test temporal echo theoretical prediction

21 p3777 A69-38713

PARTICLE TRAJECTORIES

NT ELECTRON TRAJECTORIES

Dust particle separation from inlet flow with S-bend duct to minimize engine dust ingestion, determining particle trajectories [AHS PAPER 211]

01 p0006 A69-10409

Uranium content in fragments from iron meteorites determined by fission fragment track recording

01 p0026 A69-11377

Etching techniques for revelation and viewing of fossil charged particle tracks in meteoritic and terrestrial minerals

02 p0245 A69-12569

Heavy ion track thermal spike model to account for LET and temperature effects in radiation biology and chemistry

03 p0371 A69-13479

Plasma diffusion in toroidal stellarator using integrals of drift equations for particle trajectories, determining distribution function

07 p1191 A69-18985

Density measurements of particle tracks in nuclear emulsions utilizing digitized video scan, discussing operation and instrumentation [IEEE PAPER 2A-7]

07 p1133 A69-19185

Trapped particles drift velocity in time dependent meridional magnetic and perpendicular electric field

08 p1368 A69-20809

Proportional counter pulse shapes calculation for point and extended ionization tracks, considering electron drift velocity and positive ion mobility

09 p1493 A69-21419

Quasi-trapped particle currents having discontinuities on daytime and nighttime sides of earth

09 p1577 A69-21767

Trajectories of particles entrained by gas flow in nozzles for study of erosion damage during passage of gas-particle mixture

11 p1818 A69-25355

Relation between planets axial moments and protoplanetary particles orbital eccentricity as explanation of outward winding of planets

12 p2154 A69-25818

Lagrangian solution for air mass element trajectory in free atmosphere using vortex invariant, noting application to atmospheric transport of contamination

16 p2805 A69-31611

Two dimensional analysis of isentropic perfect gas flow fields in axisymmetric nozzles for transonic two phase flow initial values, calculating particle trajectories [AIAA PAPER 69-572]

16 p2731 A69-31847

Numerical analysis of asymptotic solution for earth-moon particle trajectories in idealized restricted three body problem

16 p2857 A69-32155

Shock tube calibration for aerodynamic loading, determining flow parameters by observing particle trajectories with high speed photography of smoke tracers

18 p3085 A69-34469

Particle size, velocity and position in moving streams measured by tilted film plane optical system with pulsed light source

19 p3306 A69-35733

Infinitesimal mass trajectories and possible double collision in gravitational field of two finite and unequal masses in plane elliptic restricted three body problem

21 p3795 A69-38443

Charged particles beam penetration effects produced in atmosphere, determining particle diffusion and trajectory using Spencer moments and Monte Carlo methods

21 p3709 A69-38502

Auroral zone Birkeland currents in magnetosphere, analyzing particle trajectories for plasma sheet energy distribution and Alfvén layer position

21 p3792 A69-39567

Biological effects by cosmic ray heavy ions and solar flares, using direct correlation between damages caused and trajectories

23 p4089 A69-41831

Quark mass and charge interpretation during particle track photographic analysis of air shower cores by delayed expansion Wilson cloud chamber

24 p4383 A69-42945

Particle physics and discovery of K mesons and hyperons emphasizing track recording, cloud and bubble chamber techniques

24 p4352 A69-43039

Oxidizer particle size and binder type effects on nonacoustic combustion instability of solid propellants [AIAA PAPER 69-175] 06 p0983 A69-18152

Luminous particles in space observed by Vostok, Mercury and Voskhod astronauts, discussing distribution, trajectories and terrestrial origin 07 p1222 A69-19617

Lifetime of highly soluble isolated dense spherical solute particle in solvent, taking into account molecular diffusion, kinetic limitations, etc 10 p1651 A69-22939

PARTICULATE FILTERS

U FLUID FILTERS

PARTITIONS [MATHEMATICS]

Partition coefficients between natural melts and plagioclase phenocrysts determined for rare earth elements and barium by mass spectrometry 08 p1310 A69-20944

Relative intensities of lines in vibration and rotation bands of isotopic carbon dioxide in planet Venus, tabulating partition functions 15 p2656 A69-31154

Reduction of partitioned submatrices functions for expediting calculations of hypercirculant and hyperhyper Jacobi analytic functions 18 p3163 A69-34330

Nonparametric partitioning algorithm for pattern classification, discussing pattern recognition, classifiers structure, real data applications, etc 24 p4285 A69-43062

PARTITIONS [STRUCTURES]

Large scale integration and batch-fabricated processing of logic and storage elements for fourth generation computer, discussing partitioning design 04 p0567 A69-15355

PARTS

U COMPONENTS

PASCHEN SERIES

Paschen series line contours for hydrogen in solar spectrum plotted from IR spectrophotometric data 01 p0148 A69-10126

IR and violet sulfur lines for Seyfert galaxies, noting substantial reddening in nuclei 02 p0325 A69-12593

Paschen line intensity measured as function of position across Orion Nebula 08 p1384 A69-20058

HD 217050 spectroscopic study, determining Balmer envelope temperature from comparison of homologous Balmer and Paschen lines intensities 18 p3201 A69-35144

BAC Three-Eleven 220 seat airliner for short and middle distance routes, discussing operating costs, thrust and range 02 p0193 A69-12067

Onboard electric power systems of transport aircraft, analyzing constant frequency systems for supersonic aircraft 02 p0196 A69-12166

Automatic all-weather landing system for scheduled civil passenger aircraft, discussing safety, display devices, Category 2 and 3 conditions 03 p0465 A69-13697

Light passenger aircraft of glass fiber reinforced plastic, using hose construction technique 03 p0454 A69-13822

Public health aspects of galactic radiation exposure at supersonic transport altitudes 03 p0375 A69-14072

Passenger aircraft design to cope with air traffic volume increase in 1970s, discussing economic aspects of high capacity aircraft 04 p0546 A69-14804

Coaxial multipurpose KA-26 helicopter design, discussing cruising speed, passenger capacity, range, flight ceiling, gross weight and piston engines 07 p1053 A69-18969

Acoustical measurements on MD-12 passenger aircraft before and after application of insulation for noise suppression 07 p1057 A69-19704

Lockheed 1011 Tristar with three turbofan engines for large capacity medium range service, noting configuration, aerodynamics, structure and cutaway drawings 08 p1255 A69-21143

Supersonic transport airline operations including safety, noise, traffic control, routing, etc 11 p2004 A69-24373

Multiengine helicopter scheduled passenger service operations in Europe 11 p2004 A69-24378

Onboard gas turbine auxiliary power units for executive jet transport aircraft [SAE PAPER 690332] 11 p1824 A69-24501

Passenger aircraft flight readiness verification, discussing flaw and corrosion detection and rivet joint inspection methods 11 p1822 A69-24526

Short range passenger aircraft, considering payloads, weights and economical classification 13 p2201 A69-27294

TU-134 jet passenger aircraft performance characteristics noting similarity to BAC 111 13 p2202 A69-27931

Aircraft noise control at source through high bypass ratio engine modification, FAA decibel standards and higher capacity aircraft for increased traffic density 14 p2509 A69-29156

Mass supersonic air transport physiological problems, reporting findings of FAUST committee concerning ozone toxicity, pressure drops, sonic booms, time zone physiology, etc 15 p2556 A69-31225

Aircraft role in future transport systems for passengers and goods, emphasizing shorter distances, intercity and interurban communication, etc 16 p2881 A69-31932

Medium range Tu-154 three jet transport aircraft, detailing fuselage, airfoil, tail unit, landing gear, propulsion unit and circuitry 16 p2735 A69-32073

Space requirements of departure lounges in airport buildings for large aircraft loading, discussing entry doors, boarding times, etc 16 p2766 A69-32330

Passenger cabin windows on Convair liner type aircraft, describing construction, installation, strength, etc 17 p3061 A69-33667

Skyvan 3 light passenger/freight carrier design, detailing power plant, installation and power management 17 p2902 A69-34192

Tail tip-evacuation limits, calculating aircraft balance effect of passenger relocations by graphical method [SAWE PAPER 765] 18 p3091 A69-34877

Aircraft interior conversion for passenger or cargo service, discussing convertible aircraft and quick change concepts [AIAA PAPER 69-784] 19 p3244 A69-35642

Passenger transport cruising at low supersonic speeds without sonic boom generation on ground, discussing overpressures, signature characteristics and corridor widths
[AIAA PAPER 69-776] 19 p3244 A69-35647

Jumbo jet audio entertainment and service systems, describing digital pulse multiplexing technique
19 p3285 A69-35806

DC 3 tail wheeled single skin piston aircraft conversion into first class luxury passenger aircraft for short haul service
20 p3460 A69-36918

Jumbo jet passenger loading devices including overwing bridges, transporters and terminal integration
20 p3511 A69-37916

All-plastic light passenger aircraft with inflated tube construction for shell, discussing design and performance
21 p3728 A69-38461

Economic effectiveness determination methods for commercial transport aircraft design analyzed quantitatively, using four engine 100-seat turbo-prop aircraft
21 p3855 A69-38873

Noise and vibration levels measured in An-24 Polish passenger aircraft indicating excess noise in crew compartment
22 p3862 A69-40005

Passenger safety during aircraft accidents in Arctic, discussing survival equipment and methods
23 p4107 A69-41811

Demand curves for VTOL intercity transportation, discussing conventional helicopters, compound helicopters, tilt rotor, tilt wing, stored rotor and fan or jet lift
24 p4254 A69-43721

PASSENGERS

Aviation industry passenger liability, discussing negligence litigation, compensation standards and roles of government, manufacturers and courts
06 p1042 A69-16851

Ground access routes between business districts and airports compared for passenger transport modes
[AIAA PAPER 69-1072] 12 p2059 A69-26773

Airport planning for large aircraft loading of passengers, baggage and cargo containers
17 p2948 A69-34208

Jumbo aircraft production technology causing economic setback, recommending added emphasis on passenger/cargo requirements and operating environments for greater profitability
18 p3232 A69-34542

Mass transit rail service between Manhattan and Kennedy Airport using Long Island Railroad mainline route, discussing baggage handling and time schedules
[AIAA PAPER 69-803] 19 p3453 A69-35596

Cosmic radiation exposure of passengers and crew in supersonic transport at high altitude
22 p4002 A69-40093

Air passenger traffic growth to 1980 in major sectors of air transport industry, emphasizing traffic volumes
22 p4052 A69-40425

Air traffic problems due to tourism, suggesting service modifications to meet future needs
22 p4053 A69-40434

Medical aid, equipment and organization for injured passengers in large aircraft accidents at airports and immediate neighborhood
24 p4270 A69-42602

Unscheduled aircraft landing to deplane passenger for medical reasons, discussing costs, time consumption and avoidance methods
24 p4278 A69-43393

PASSIVATION
U PASSIVITY

PASSIVE SATELLITES
NT BEACON SATELLITES
NT ECHO SATELLITES
NT ECHO 1 SATELLITE
NT EXPLORER 22 SATELLITE

Satellite communications history covering passive and active satellites and Communication Satellite Act impact
07 p1085 A69-19182

PASSIVITY

Austenitic stainless steels nonreproducible passivating tendencies, determining electrochemical and corrosion characteristics, discussing critical anodic current density role
20 p3562 A69-37750

PASTES

Plasticizer mechanical properties and content in paste, considering effects on texture of coagulation structure during die extrusion of compacts
12 p2118 A69-26257

PATCHING
U MAINTENANCE

PATHOGENESIS

Retinal lacerations and detachment in jet pilots, discussing pathogenesis, diagnosis and surgical reattachment methods
05 p0710 A69-16630

PATHOLOGICAL EFFECTS

Electron microscopic changes in lungs of rats after repeated exposure to pure oxygen
05 p0709 A69-16514

Pathological changes in respiratory and cardiovascular systems of white rats due to various levels of hyperoxia
10 p1646 A69-23577

Electron microscopic changes in lungs of rats after repeated exposure to pure oxygen
18 p3096 A69-34733

Flight and piloting influence on morbidity of civil aviation personnel, noting incidence of enteric, hemorrhoidal and respiratory diseases
18 p3098 A69-35303

Platelet role in decompression sickness pathology from experiments upon rats subjected to decompression after injection of antiplatelet serum
21 p3655 A69-38918

Pathological effects of single 120 Mev proton doses on rats blood in rotating cylinder, discussing leukopenia and benign and malignant tumors development
21 p3658 A69-39058

Pathological changes in solar ganglia cells of white rats following X ray exposure, using electron microscope
21 p3659 A69-39064

Normobaric oxygen toxicity pathology in baboons and Macaca, irus and squirrel monkeys during 14 day exposure
21 p3660 A69-39179

EKG, EEG, pneumograms and X ray pictures showed no pathological effect after prolonged confinement in sealed chamber having artificial atmosphere with variable gas composition
22 p3892 A69-40284

Hemodynamic characteristics of decortication in rabbits, noting upsets of compensatory and adaptive capabilities of cardiovascular system
22 p3888 A69-41271

Neodymium laser radiation effect on electrical and histomorphological properties of liver in rats and hamsters
23 p4111 A69-42344

Blood viscosity as possible key factor in physiology and pathology of circulation, suggesting causes of myocardial infarction and coronary occlusion
24 p4261 A69-42725

Biological and physiopathological effects of UHF electromagnetic radiation of radar antennas, reviewing localized effects
24 p4273 A69-42996

PATHOLOGY
NT HUMAN PATHOLOGY

Visceral lesions observed in mice and rats exposed to ultrashort waves indicating no pathological modification of physiology of reproduction
[AGARDOGRAPH-111] 08 p1266 A69-20679

Cold water immersion effects on man from physiological and physiopathological viewpoint, examining clothing effect
08 p1267 A69-20682

PATIENTS

Increased tolerance of orthostatic stress in heart failure patients
19 p3258 A69-36374

Patient transportation and evacuation system at disposal of Paris hospital, using short and long haul aircraft, turbosjets and helicopters
23 p4105 A69-41785

PATTERN DISTRIBUTION
U DISTRIBUTION [PROPERTY]

PATTERN RECOGNITION
NT CHARACTER RECOGNITION

Temporal pattern perception by human subjects required to integrate information presented in two modalities
02 p0200 A69-12724

Limited speech recognition system /LISPER/ simplifies recognition by computer designed as research vehicle and pattern recognition system
04 p0565 A69-15338

Pattern classification algorithms classified according to type of input information required
05 p0725 A69-16571

State variable techniques applied to optimal continuous linear feature extraction for binary Gaussian pattern recognition or detection problem
05 p0740 A69-16577

Stereoscopy effects on pattern recognition in visual noise
06 p0880 A69-17214

Recursive algorithms for pattern classification using misclassified samples
06 p0891 A69-17357

Deterministic pattern classification algorithms, discussing abstraction problem, stochastic algorithms, minimum error scheme and modified least squares scheme
06 p0892 A69-17395

Feature selection in pattern recognition, discussing techniques, crop classification problem and parametric multiclass pattern recognition
06 p0892 A69-17396

Adaptive pattern recognition, discussing classification techniques and merging into other aspects of artificial intelligence research
07 p1088 A69-18381

Pattern recognition method dependent on preselection of good variables, discussing SELFIC and relationship to Karhunen-Loeve expansion and factor analysis
07 p1088 A69-18386

Data handling by groups in perceptron type pattern recognition and decision making problems based on algorithm involving second degree polynomials
08 p1278 A69-20420

Pattern recognition as part of statistical communication theory, using Karhunen-Loeve expansion to minimize root-mean-square errors, showing application to handwritten numerals
09 p1461 A69-22292

Entropy minimization in feature extraction by dimensionality reduction with linear transformation of pattern vectors, noting recognition time and storage space savings
11 p1909 A69-25291

Pattern classification algorithms classified according to type of input information required
11 p1843 A69-25445

Adaptive pattern recognition system simulated and tested with agricultural radar images, describing predictive environmental model mathematically
12 p2097 A69-26990

Self adaptive system for recognition of dynamic shapes, discussing self structuring by learning, incomplete pattern recognition, logic element network, etc
12 p2054 A69-27080

Statistical analysis of radiation temperature structure for automatic recognition of meteorological situations from actinometric satellite observations
13 p2293 A69-27842

Largest scalar product of class and identification codes in diagnostic problems, discussing recognition
14 p2417 A69-29144

Image recognition algorithm for determination of hyperplane separating two finite sets of elements in Euclidean space
14 p2418 A69-29353

Pattern recognition and analysis, discussing definitions, rules of image transformation, pure and deformed patterns, etc
14 p2470 A69-29360

Remote sensor imaging techniques for simultaneous radar, IR and visible electromagnetic spectra of extensive land areas, presenting two clustering algorithms for multiple images
14 p2448 A69-29533

Data handling by groups in perceptron type pattern recognition and decision making problems based on algorithm involving second degree polynomials
14 p2418 A69-29658

Orthogonal signal recognition in set of false signals by resolving devices with limited sensitivity, giving design formulas for error probability
15 p2563 A69-30135

Recognition systems nonlinear discriminant function for separating linear inseparable patterns, describing orthogonal representation, correlation ratio and average variance criteria
15 p2645 A69-30806

Algorithm for calculating recognition error by applying pattern vectors having two multivariate Gaussian distribution to optimum Bayes classifier
15 p2572 A69-31113

Recognition system for discrete decision function generation to select one out of two classes of objects, deriving solutions for selection probability
17 p2932 A69-33119

- Adaptive filter with operational amplifier and digital to analog converters for bandpass characteristics, discussing pattern recognition application
17 p2942 A69-34093
- Digital simulation of biological model for visual images classification derived from human visual system aspects
17 p2911 A69-34094
- Frequency hopping technique applied to multiple access air-to-air/ground communication for tactical fighters, noting additive recognition
17 p2931 A69-34117
- Multilayer retina model with lateral couplings for visual pattern recognition, noting applications to data processing
19 p3260 A69-35898
- Gunn effect applied to digital electronics, discussing diode characteristics, microwave amplifier design, pattern recognition, analog-numerical conversion, etc
19 p3285 A69-36708
- Least square or least mean square approximation methods in abstract pattern recognition, noting unknown probability density function
20 p3504 A69-38285
- Storm location and severity prediction by pattern recognition theory, using quantized radar data, compared with statistical prediction
21 p3678 A69-39458
- Computer controlled TV cloud recognition equipment on meteorological satellites, discussing multistep process of automatic perspective distortion corrections by onboard computer
22 p3977 A69-40004
- Zoellner illusion in human visual system measured as function of background pattern density consisting of intersect angles and background line spacing
22 p3879 A69-40841
- Human visual response to moving spatially periodic patterns, analyzing critical frequencies, dependence on stimulus area and period, phase blindness and pattern reversal
22 p3880 A69-40850
- Spatiotemporal patterns learning among sensory and motor organs with linearly ordered components by nonlinear networks in terms of embedding fields theory
22 p3887 A69-41196
- Point images reference groups identification by human operator with limited visual perception in background noise, comparing results with automatic system using selection algorithms
23 p4109 A69-41955
- Pattern classification and iterative methods of linear/nonlinear dynamic plants identification, introducing phi machine as universal plants model
24 p4284 A69-42672
- Brain and machine model of pattern recognition, pattern synthesis, memory, learning and speech, using concept of similarity, context and signal analysis
24 p4273 A69-42909
- Nonparametric partitioning algorithm for pattern classification, discussing pattern recognition, classifiers structure, real data applications, etc
24 p4285 A69-43062
- Interpolated position and orientation perception by vision and active touch
24 p4275 A69-43116
- Adaptive multicategory pattern classification system, using independent samples to form mean-square approximations to Bayes discriminant functions
24 p4285 A69-43134
- Lambda waves EEG recording for evaluating eye movements during pattern vision
24 p4268 A69-43401
- PATTERSON MAP**
- Crystal and molecular structure of mu-oxo-bis(chlorobis(2,4-pentanedionato)titanium(IV)/chloroform solved by symbolic sign determination method and Patterson map interpretation
01 p0023 A69-10411
- PAVEMENTS**
- Construction practice for hot-mix bituminous pavements covering production, composition, application and quality control
01 p0057 A69-11276
- Airport runway surface construction materials requirements, taking into account factors different from highway pavement
17 p2948 A69-34215
- PAYLOAD MASS RATIO**
- Increased payload in orbit capability for future versions of Black Arrow vehicle, discussing propellant
02 p0335 A69-12681

- Synchronous orbit attainment with continuous electric propulsion, noting payload ratio dependence on various parameters and changing orbit inclination
[AIAA PAPER 69-275] 09 p1586 A69-21265
- Electrostatic thrusters using RF ion sources to optimize payload ratios, terminal velocities, propellants, life span and efficiencies
09 p1568 A69-21489
- Nuclear rockets as Saturn 5 third stages, emphasizing increased payload or velocity utility and resulting engine and stage requirements
[AIAA PAPER 69-555] 16 p2867 A69-31849
- PAYLOADS**
- Scientists involvement in planetary spacecraft missions, considering organization for particular instruments and more complex payloads
[AAS PAPER 68-192] 02 p0311 A69-11473
- Balloon, rocket probe and satellite payloads, noting French contributions and CNES role
02 p0333 A69-11914
- French space center in Guiana, discussing geographic location advantages for payload, rocket launching, space rendezvous, etc
02 p0228 A69-11920
- Mission mode and delivery method influence on payload maximization for Mars capsule system
02 p0335 A69-12822
- Onboard SDP-3 computer data system core for IMP spacecraft, considering payload
03 p0400 A69-13243
- Electric propulsion for payload transfer from low to synchronous orbit of ELDO launch vehicles
03 p0496 A69-13994
- Spacecraft launching facilities and payload capabilities in next decade, discussing orbits, spacecraft size and volume, attitude stabilization and positional accuracy
06 p1012 A69-16857
- Electrical propulsion for space maneuvers, discussing interrelationship of orbital changes, payloads and time
06 p0998 A69-16858
- Separable payload control for three axis orientation of sounding rocket instruments, discussing error sensors and pointing accuracies
06 p1014 A69-17583
- Maximum capacity estimation for one way transportation systems to moon and Mars, analyzing technical and economic aspects
09 p1586 A69-21297
- Manned spacecraft developments, considering Apollo Applications Program, space station establishment, space shuttle operations and payload cost
10 p1791 A69-22866
- Short range passenger aircraft, considering payloads, weights and economical classification
13 p2201 A69-27294
- Saturn 5 translunar payload capability enhancement by fuel biasing, propellant utilization systems, trajectory shaping and programmed mixture ratio scheme
[AIAA PAPER 69-451] 16 p2839 A69-32669
- Passive attitude stabilization of interplanetary probe, using conically shaped sails elastically connected to payload
17 p3047 A69-33225
- ASTRID high altitude sounding rockets orientation system aligning payload cones to target outside earth atmosphere, discussing software simulation with analog and digital computers, etc
17 p3001 A69-33424
- European launcher system based on modular principle for low orbit, geostationary and space probe missions payload requirements
17 p3050 A69-33428
- Heavy lift helicopter design with 30 ton payload, considering fanjet drive hot cycle and shaft drive propulsion systems
[AHS PAPER 330] 17 p2901 A69-33532
- Tail tip-evacuation limits, calculating aircraft balance effect of passenger relocations by graphical method
[SAWE PAPER 765] 18 p3091 A69-34877
- Rapid Targeting Procedures computer program for optimized orbital payload and associated launch vehicle targeting data with one submittal and minimum user intervention
[AAS PAPER 68-148] 19 p3402 A69-35951
- Spacecraft and boosters for earth resources surveys, discussing design, payloads, orbits, etc
21 p3799 A69-38629
- Recovery system for high altitude sounding rocket payloads, noting air inflated flotation device, payload separation and parachute deployment
[AIAA PAPER 68-959] 21 p3820 A69-39227

- Payload optimization factors for orbital storage of liquid hydrogen, considering payload cost of agitation, tank pressure, pressurant weight, etc
[AIAA PAPER 69-1007] 22 p4021 A69-40381
- Balloon flights with space available for secondary experiments, discussing launching agencies and experiment design restrictions
22 p3865 A69-40807
- Modular configuration of recoverable scientific MAP/Modular Auroral Probe/ payloads aboard Nike-Apache rockets, discussing payload design concepts
23 p4223 A69-41763
- PCM [MODULATION]**
- U PULSE CODE MODULATION**
- PCM TELEMETRY**
- Bandwidth limited PCM/PSK/PM telemetry system performance analysis for developing S band telemetry, including coherent and noncoherent detectors
07 p1081 A69-19098
- PCM telemetry system for sounding rocket payloads flown in polar light zone within German-American project AZUR
07 p1081 A69-19099
- PCM bit synchronizer/signal conditioners performance characteristics and specification
07 p1106 A69-19120
- Bit error probability estimation of NRZ PCM synchronizer and detector operating in presence of fluctuating data frequency source
07 p1083 A69-19121
- Spectral null from spectral characteristics and statistical properties of PCM signals used to estimate SNR
07 p1083 A69-19122
- Design of 126 channel PCM telemetry unit for C-5 aircraft flight test, discussing FET analog multiplexing
10 p1693 A69-23275
- ESRO Aurorae satellite telecommunication system, detailing information nature, PCM telemetry and remote control system standard
15 p2702 A69-31084
- Ground data operations system for large astronomical satellite comprising UHF telemetry, PCM telecommand and processing and display equipment
18 p3117 A69-34794
- PCM bit synchronizer signal to noise ratio measurement by input video signal zero crossings counting
19 p3271 A69-36248
- Ground data handling equipment characteristics for PCM telemetry link utilizing convolutional coding
19 p3273 A69-36267
- Addressable remote multiplexed PCM data system used on Titan III launch vehicles
19 p3274 A69-36279
- Stored program data processor used as PCM telemetry data acquisition system for postApollo applications, considering format and bit rate changes
19 p3274 A69-36280
- Computer based onboard satellite PCM telemetry, showing improved adaptability, size and cost reduction
20 p3500 A69-37382
- Machine independent telemetry oriented language /MITOL/ to develop computer programs for real time and postflight telemetry data processing
22 p3905 A69-40340
- PCM telemetry system for transferring information from many remote sources to single local processing point
24 p4281 A69-42620
- PDM [MODULATION]**
- U PULSE DURATION MODULATION**
- PEACETIME**
- Interpretation of term peaceful in Space Treaty and use of outer space including celestial bodies
07 p1244 A69-19234
- PEAKS**
- Rotating mirror Q switched carbon dioxide laser for high peak powers, analyzing pulse structure and duration dependence on collision induced relaxations
19 p3338 A69-36694
- PEARLITE**
- Eutectoid pearlite growth by pure iron-carbon specimen heat treatment
13 p2281 A69-28158
- Lunar volcanism origin of tektite and pearlite, noting no cosmic ray effects
20 p3597 A69-37338
- PEARSON DISTRIBUTIONS**
- Weapon systems integrated testing, determining test quantities as function of subsystems utilizing Neyman-Pearson confidence levels
15 p2619 A69-30400

- Differences in latitude readings obtained with two zenith telescopes, showing Pearson distribution of type VII and influence of observation conditions
17 p2959 A69-32879
- PEDOLOGY**
U SOIL SCIENCE
- PEENING**
U SHOT PEENING
- PELTIER EFFECTS**
Peltier measurements below 4 K capable of measuring low Seebeck coefficient on high resistivity alloys and in presence of magnetic field
14 p2449 A69-29563
Thermal EMF, electrical conductivity and Peltier effect in sintered refractory oxides at high temperature in air and in Ar
17 p3068 A69-32990
- PENALTIES**
Aircraft hijacking prevention through technical and legal means, discussing national and international air piracy laws
13 p2381 A69-27528
FAA jurisdictional procedures for law infringement, discussing civil codes, delegation of enforcement authorities and routine violations including low flying, weather, etc
16 p2882 A69-32335
- PENDULOUS GYROSCOPES**
U GYROSCOPIC PENDULUMS
- PENDULUMS**
NT GYROSCOPIC PENDULUMS
Torsional pendulum for stress and strain relaxation measurements of wire sample
01 p0079 A69-10221
Dynamic stability of double pendulum with vibrating point of suspension, obtaining differential equations of motion by Lagrange equations application in averaging method
11 p1884 A69-24768
Dual pendulum with tilt sensitivity at wide passband frequencies and damping due to horizontal oscillations
14 p2450 A69-29570
Asymptotic solutions to second order differential equations with slowly varying parameters and large resistance applied to mathematical pendulum damped swinging motion
16 p2804 A69-32253
Pendulum motion about stationary axis of solid body containing damper, ascribing instability to center of gravity shift with respect to cavity
18 p3135 A69-34557
Near resonant and nonresonant solutions of nonlinear equation describing rotating pendulum motion under periodic disturbance
21 p3771 A69-39004
Equation of motion for determining nonlinear vibration of rod pendulum in viscous flow of varying velocity
21 p3773 A69-39679
Bethenod pendulum behavior using coupled nonlinear differential equations, discussing synchronization methods
24 p4349 A69-42673
- PENETRANTS**
Two fold congruency method for statistical evaluation of fluorescent flaw detection penetrant sensitivity and reproducibility
10 p1700 A69-23374
Radioactive Kr as gaseous penetrant for nondestructive test inspections, noting high sensitivity
19 p3322 A69-35575
- PENETRATING PARTICLES**
U CORPUSCULAR RADIATION
- PENETRATION**
Force law determining impact processes of pyramidal and conical body penetration into smooth surface of rigid plastic metals
02 p0337 A69-11615
Screening of high density plasma from penetration by neutral gas, discussing prevention of high energy losses by charge exchange collisions
02 p0288 A69-12170
Meteoroid flux measured by Explorer 16 and Lunar Orbiter, analyzing penetration rate, average velocity and consistency with photographic meteors
13 p2349 A69-27820
Penetration mechanics of multisheet structures based on discrete particle modeling of impact debris [AIAA PAPER 69-371]
13 p2367 A69-28303
Thin foil penetration measurements for Fe microparticle impacts on metal and Mylar foils in space
15 p2641 A69-31339
- Interstellar particle penetration into solar system, discussing impact ionization of earth ionosphere by interstellar neutral hydrogen and helium
15 p2699 A69-31390
Liquid sodium penetration into stainless steel grain boundaries, using laser microprobe
18 p3154 A69-35473
Minority carriers penetration depth in solid aluminum gallium arsenide solutions with variable forbidden bandwidth determined from recombination radiation spectra
19 p3391 A69-36606
F layer penetration frequencies predictions compared with Alouette topside data
20 p3530 A69-37871
- PENETRATION BALLISTICS**
U TERMINAL BALLISTICS
- PENETROMETERS**
Lunar surface uppermost layer physical and mechanical properties investigated by soilmeter-penetrometer and radiation densimeter on Luna 13
18 p3113 A69-34239
- PENNING DISCHARGE**
Penning discharge in inhomogeneous magnetic mirror field, observing high burning voltage at low current in rarefied hydrogen plasma
01 p0133 A69-11218
Plasma heating dynamics by straight turbulent discharge current influenced by initial plasma parameters
07 p1195 A69-19592
Kaufman thruster with predominant radial field, noting electron mobility across ion extraction screen and advantages of uniform plasma distribution [AIAA PAPER 69-259]
09 p1569 A69-21877
Nonthermal microwave emission from cold cathode PIG discharge plasma, noting wide spectrum of electron cyclotron frequency harmonics
09 p1549 A69-22018
Plasma flow from Penning discharge with incandescent cathode in vacuum controllable by varying voltage, pressure and magnetic field strength
11 p1933 A69-25543
Current increase and voltage decrease in high voltage low pressure Penning discharge ascribed to hollow cathode effect
11 p1933 A69-25544
Screw instability in glowing discharge plasma column in longitudinal magnetic field generalized to instabilities in low pressure arc, Penning and high current discharges
13 p2315 A69-28526
Theory for current magnetic field characteristics of Penning discharge valid to extinction point
22 p3991 A69-40865
- PENNING EFFECT**
Auxiliary discharge thermionic converter with Penning mixture /Ne-Ar/, discussing pressure and Penning ionization effects, collector current discontinuities, etc
14 p2398 A69-29180
- PENTACHLORIDES**
U CHLORIDES
- PENTAERYTHRITOL TETRANITRATE**
U PETN
- PENTANES**
Isopentane and mesitylene index of refraction variations with pressure, determining average molecular radii and polarizabilities
01 p0123 A69-10685
Temperature and pressure measurements in low temperature combustion of n pentane covering slow reaction and cool flame regions
02 p0353 A69-12321
- PENTODES**
Wideband RF amplifier manufacturing problems, comparing operation of vacuum triodes and pentodes in passband circuits
11 p1849 A69-24958
Push-pull pentode frequency multipliers with sinusoidal undistorted outputs, studying grid bias effects on operating characteristics
22 p3912 A69-40260
- PENUMBRAS**
Wilson effect in sunspots, interpreting penumbra distortion near solar disk limb in terms of radiation transport
03 p0504 A69-12893
High resolution H alpha line photographs of solar chromosphere, showing superpenumbra-like dark fibrils around isolated sunspots
04 p0664 A69-15526
- Magnetically aligned flows between sunspots, considering Evershed effect on umbrae and penumbrae
10 p1772 A69-22907
Solar corona observed by X ray instrumentation of SOLRAD 8 satellite crossing moon penumbra during solar eclipse of 20 May 1966
15 p2698 A69-31363
Penumbra current distribution in plane electromagnetic waves diffraction by conducting cylinder, obtaining transient solution for impulsive excitation, discussing time harmonic problem
18 p3100 A69-34232
Relative penumbral intensity independent of spot position from data by pinhole photometer of large sunspots
20 p3603 A69-37542
Sunspot penumbra model in hydrostatic equilibrium accounting for continuum and Fraunhofer lines observations
22 p4019 A69-40290
Sunspots microstructure, discussing penumbra and umbral properties with respect to magnetic field configuration
24 p4378 A69-42690
- PEPTIDES**
Tryptic digestion of C terminal tritiated peptides analyzed with Scenedesmus ferrodoxin, noting use for protein structural study
10 p1648 A69-24190
Proline residue effects on hydrolysis of peptide bonds by thermolysin
15 p2561 A69-30083
Substrate specificity of cathepsin C derived from rat liver, describing polymeric structure and behavior as acidic protein
20 p3473 A69-37577
Cations of sulphates photosensitizing role in photolysis of amino acids and peptides in various atmospheres
20 p3477 A69-37626
DNA polymerase from Escherichia coli, discussing physical and chemical properties of enzyme and polypeptide chain consistency
22 p3898 A69-41070
Polypeptide synthesis as function of 5S ribosomal RNA dissociated from 50S ribosomal subunits by EDTA treatment
23 p4113 A69-41491
Tryptic pentapeptide Asp-Glu-Leu-Thr-Lys synthesis showing relation to Gm/a/ antigen of human gamma g-globulin
24 p4279 A69-42712
Sequence preparation of protected peptide polymer bond with anion exchange resin using solid phase transesterification
24 p4279 A69-42713
Amino acid sequence of dogfish lactic dehydrogenase, isolating acylated amino-terminal peptide and arginine residues, indicating four polypeptide chain composition
24 p4280 A69-43051

NT AMMONIUM PERCHLORATES
NT HYDROXYLAMMONIUM PERCHLORATES
NT MAGNESIUM PERCHLORATES
NT NITRONIUM PERCHLORATE
NT POTASSIUM PERCHLORATES
Diperchlorates different in organic part of structure and explosive transformation heats, showing strong dependence of combustion velocity on pressure
15 p2716 A69-30108
Thermal decomposition behavior of perchlorate oxidizers studied by flash mass thermal analysis for determining propellant combustion kinetics [WSCI PAPER 69-19]
16 p2832 A69-32357
- PERFECT GAS**
U IDEAL GAS

PERFLUORO COMPOUNDS

Perfluorocyclobutane-oxygen mixture combustion, measuring burning velocities and adiabatic equilibrium flame temperatures

21 p3852 A69-39594

PERFORATED PLATES

Stress analysis of multiply connected bodies under large elastic strains, deriving second order potentials for plate with elliptical holes

02 p0340 A69-12139

Stress concentrations around elliptical perforations in shrunk plates with bonded boundaries based on photoelastic models

02 p0345 A69-12391

Stresses in infinite elastic plate containing rigid rectangular inclusion subject to uniform stress field, using complex variable method and Schwartz-Christoffel conformal mapping

02 p0348 A69-12796

Stresses around two reinforced circular openings in thin elastic plate of isotropic material under biaxial loads

02 p0349 A69-12799

Successive approximations utilizing analytic stress functions used to obtain solution for infinite plate with arbitrary holes under biaxial stresses

[ASME PAPER 68-PVP-1] 03 p0523 A69-12998

Crack propagation near arbitrary curvilinear hole, discussing hole exterior mapping and critical loads for crack initiation

04 p0674 A69-14562

Stress field for skew hole determined from plane stress field for equivalent right hole, considering elastic plate penetrated by oblique circular cylinder

04 p0674 A69-14589

Creep stress concentration at circular hole in thin sheets under loads in own plane, discussing infinite thin plates

[AIAA PAPER 68-175] 04 p0676 A69-14708

Stress concentration around centrally placed circular bolt in axially loaded bar, using theory of infinite systems of linear equations

04 p0681 A69-15195

Stress-strain state for two dimensional physically nonlinear multiply connected elastic regions, noting plate with two identical circular holes

05 p0841 A69-16203

Stress distribution in infinite strip with equally spaced identical semicircular notches on one edge and subject to transverse bending

05 p0842 A69-16643

Stresses in finite width infinite elastic isotropic strip with equally spaced identical semicircular notches under uniform tension or pure bending

05 p0843 A69-16644

Stress-strain state of infinite plate with two holes of different diameter solved, using integral equation derived for two dimensional problem in elasticity theory for anisotropic medium

05 p0843 A69-16680

Deformation and stresses in biaxially loaded stretched thin plate with central small hole during stress redistribution caused by creep

06 p1022 A69-17368

Two dimensional stress distribution changes around rectangular hole with rounded corners for varying internal pressure and temperature

06 p1025 A69-17611

Transmission coefficient of plane electromagnetic wave obliquely incident on perforated metal screen in frequency range near primary resonance of structure

07 p1076 A69-18527

Couple stresses effect on thin plate stress distribution due to pressure of rivet on one side of circular hole

08 p1319 A69-20201

Two dimensional photoelasticity for minimizing stress concentration in perforated rectangular plate subjected to restrained shrinkage, discussing application to solid propellant rocket grains

08 p1412 A69-20255

Foil type strain gage for measurement of tangential strains along circumference of hole in plate under uniaxial and equibiaxial tension

08 p1314 A69-20258

Monograph on plane problem and bending problem for infinite elastic plate with doubly periodic set of circular holes

08 p1416 A69-20709

Stress concentration at circular hole in infinite plate for large strains and nonlinearity, analyzed by integral operator method

09 p1613 A69-21629

Stress-strain state of infinite plate with elliptical eccentric reinforced hole, using quadrature method

09 p1613 A69-21630

Surface heat transfer coefficients under perforated plate of multiple square array round impinging air jets

[ASME PAPER 69-GT-4] 09 p1624 A69-22508

Central circular hole effect on fundamental frequency of rectangular fixed edges plate, discussing hole size, square plates, etc

[ASME PAPER 69-VIBR-62] 10 p1805 A69-24156

Moment stresses effect on stress concentration in plates with common type hole, considering uniaxial and triaxial bending and torsion

11 p1971 A69-24646

Elastic unbounded isotropic plane weakened by doubly periodic system of identical holes, noting solution involving Cauchy type integral

11 p1972 A69-24652

Elastic isotropic half plane weakened by circular hole with concentrated force applied along hole contour, considering stress distribution

11 p1972 A69-24653

Stress concentration in isotropic plates weakened by curvilinear holes subjected to loading at infinity, noting curvature at corner points of holes

11 p1972 A69-24655

Three dimensional bending problem for thick isotropic plate with curvilinear hole and normal and tangential stress applied to edge of hole

11 p1973 A69-24657

Two dimensional contained plastic deformation in asymmetrical elasticity theory based on Cosserat medium, examining boundary value problems, stress concentration and elastic wave propagation at holes

11 p1973 A69-24659

Two dimensional problems solutions by contour smoothing methods, considering stress concentrations in reinforced or perforated thin elastic plates

11 p1973 A69-24661

Stress concentrations in bending of thin perforated plates, considering potential and vortex stresses due to edge effect

11 p1976 A69-24784

Residual thermal stresses and plastic strains at hole edges in perforated plates, considering heating and rapid cooling

11 p1982 A69-24947

Boundary determination for separating elastic and plastic regions of infinite perforated sheet with triangular network of circular holes

11 p1996 A69-25736

Stress concentration near circular hole in plate during bending, showing dependence on material constant

12 p2178 A69-25999

Stress concentration around square hole in celluloid plate subjected to creep under biaxial tension analyzed by photocreep method

12 p2178 A69-26000

Thermal stresses in infinite elastic plates containing insulated circular holes, using two dimensional bipolar coordinates

12 p2180 A69-26267

Stress concentration around rhombic hole in non-linear isotropic plate under pure shear

14 p2533 A69-28987

Stress concentration near circular nonreinforced hole at bending of transversely isotropic rectangular plate analyzed in terms of transverse shear theory

15 p2707 A69-30580

Couple-stresses effect on stress concentration of plate containing infinite row of holes, solving linear elastic problem in isotropic Cosserat continua for plate

15 p2708 A69-30640

Boundary layer solution in three dimensional bending for plate with curvilinear hole to study stress-strain state at hole and over entire plate

15 p2708 A69-30662

Stress concentration on circular holes and notches in anisotropic oriented glass fiber reinforced plastics determined by using photoelastic birefringent coatings

15 p2713 A69-31053

Hydrostatic stability and damping characteristics of perforated plates and screens for passive propellant control schemes from drop tower tests

[AIAA PAPER 69-531] 16 p2833 A69-32691

Stress-strain state analysis for brittle plate with circular holes of equal radius performed in cylindrical system of coordinates

17 p3055 A69-33127

Anisotropic elastic plate deflection weakened by circular hole with thin elastic ring reinforcement, assuming no load on ring and uniform stress-strain state of plate

17 p3055 A69-33128

Von Karman equations in dimensionless and finite difference forms for deflections of elastic circular plate with central hole under load solved by iteration

[ASME PAPER 69-APM-20]

18 p3214 A69-34395
Critical stresses and crack development near holes in compressed elastic plate

18 p3218 A69-34603

Plate bending theory modified for applying successive linear conjugates method to partially clamped isotropic plate and plate with circular hole

21 p3834 A69-38721

Stress-strain state in thin isotropic plate with circular hole under lateral bending and torsional moments

21 p3835 A69-38725

Enlargement of circular hole in disk with kinematic hardening and Tresca yield function compared with isotropic hardening

21 p3840 A69-39297

Deformation of uniformly thick elastic circular plates containing circular holes reinforced by thin rigid elastic rings

21 p3846 A69-39713

Dynamic stability of circular isotropic plate with central hole subjected to torsional moment uniformly distributed over both edges by equilibrium equation

22 p4043 A69-40455

Stress concentrations in circular plate with square hole subject to triaxial tension

23 p4227 A69-41712

Stressed state of thin plate with circular hole under normal and breaking force applied over hole perimeter

23 p4233 A69-42341

Perforated heat exchanger tube plates stiffness determination from hole diameter-to-spacing ratios

24 p4400 A69-43087

Tensile tests on fiber reinforced plates with circular holes, studying fiber orientation effects

24 p4404 A69-43602

PERFORATING

Perforation and penetration mechanisms of Styrofoam slabs, using impact tests with free falling and rifle powered projectiles

01 p0165 A69-10115

PERFORMANCE

Performance characteristics of hard limited and linear repeaters for satellite communications systems

01 p0032 A69-10966

Algorithm minimaxing performance index and sensitivity of controller design with and without saddle point

02 p0224 A69-11966

Thermal stability criteria for thermionic converter performance evaluation, noting electron cooling influence

09 p1441 A69-21838

Microwave avalanche diode oscillators performance estimates, discussing operation modes and transit time

10 p1665 A69-23873

High temperature electrochemical high performance batteries

17 p2904 A69-33663

Large scale axisymmetric inlet systems performance capabilities, reviewing theoretical and experimental programs

[AIAA PAPER 68-580] 17 p3022 A69-34018

Composite and structured material forms combination for obtaining high performance and low cost

18 p3161 A69-34608

Polymers in high performance applications - Conference, London, June 1969

18 p3150 A69-35420

Two level systems with overall performance as explicit function of first level performance, defining equivalence condition to prove coordinability for nonadditive case

24 p4294 A69-43308

PERFORMANCE PREDICTION

Digital loaded-line phase shift networks for microwave thin film applications, emphasizing design equations

01 p0040 A69-10198

Multiple configuration analysis of structures systematically predicting static and dynamic response of structures of single configuration class

01 p0169 A69-10639

Exploding wire detonators noting dependence of threshold burst current on bridgewise length and diameter, explosive surface, density, etc

01 p0119 A69-10672

Fracture toughness concept in predicting failure of materials due to sharp notches or cracks

02 p0336 A69-11431

Theoretical prediction for modified and hybrid plasma resonances discrimination, noting sensor axis angle to geomagnetic field

02 p0241 A69-11731

Propeller static performance calculations for infinite number of blades applied to four blade propeller at different blade angles

02 p0188 A69-11957

Performance cost functions for reaction jet controlled system during on-off limit cycle for stable and unstable plant

02 p0278 A69-11965

Notch stress procedure to predict low cycle fatigue life of specimens with fabrication flaws, discussing crack initiation and propagation lives effects [ASME PAPER 68-PVP-15]

03 p0523 A69-12997

Optimum receiver structure for estimating PSK information signal phase derived together with matched filter detector performance

03 p0403 A69-13203

Performance prediction by testing, considering stress analysis, temperature, multiaxial stresses, combined stress, corrosion, shock, etc

03 p0525 A69-13307

Diode mixer power series coefficients for spurious response prediction in superheterodyne receiver

03 p0399 A69-13905

Aircraft squadron performance effectiveness model

03 p0367 A69-13911

Cardiac function changes during orthostatic tests and problems in predicting reactions of cosmonauts in flight

03 p0381 A69-14229

Predictive model for risk in technological research and development

04 p0689 A69-14980

Jet pump head rise deterioration parameter for prediction of cavitation

05 p0745 A69-15791

Prediction technique for surface effect causing Si bipolar transistors gain degradation under ionizing radiation

06 p0976 A69-16879

Predictive scale of aircraft emergencies, analyzing human error rate under stress

06 p0880 A69-17208

Microwave semiconductor devices, discussing performance trends in detectors, tunnel diodes, mixers, varactors, transistors and Gunn effect devices

07 p1096 A69-18440

Predictor determining future position of TDMA /Time Division Multiple Access/ synchronous satellite communications system satellite from previously received bursts

07 p1076 A69-18553

Nondemographic model predicting market shares of V/STOL aircraft in competition with automobiles and conventional airliners for short haul intercity business travel markets

07 p1244 A69-18967

Seal swell prediction methods extended to include three dimensional solubility parameter concept [ASLE PAPER 68-LC-21]

07 p1171 A69-19306

Radome performance dependence on dielectric permittivity determined by digital program and simple design criterion

07 p1110 A69-19519

Small and full scale model tests for feasibility of retracted rotor aircraft for high speed flight [AIAA PAPER 69-219]

07 p1055 A69-19550

Control systems digital simulation based on coupling of prediction correction procedure with integration and differentiation procedure, discussing simulation errors

08 p1296 A69-20110

Performance boundaries of space propulsion systems containing nuclear electric stages [AIAA PAPER 69-249]

09 p1538 A69-21249

SERT 2 thruster system performance over expected mission parameters, noting operational lifetime excess over mission requirements [AIAA PAPER 69-235]

09 p1566 A69-21255

Power systems for future aircraft emphasizing growth in performance and reduction in weight

09 p1567 A69-21387

Performance prediction for planar and cylindrical electrode geometry fixed spacing thermionic converters

09 p1438 A69-21814

Cooled turbine performance evaluation methods, noting promise of analytical methods [ASME PAPER 69-GT-63]

09 p1572 A69-22517

Digital computer simulation as maintainability design and prediction tools, discussing fault localization in complex electronics systems

10 p1668 A69-22974

Existing predictive methods for determining high temperature low cycle fatigue life reexamination based on experiments on nickel

10 p1796 A69-23068

Celestial X ray source positions from rotating modulation collimator, predicting performance of collimator

10 p1722 A69-23328

Off design performance prediction method for radial inflow turbines compared with experimental results for small turbine and Brayton space power plant

10 p1754 A69-23891

Zinc electrode cycle life improvement by reducing change in electrode shape, noting effectiveness of teflonation

10 p1640 A69-23995

Highly resistant separator performance in Zn-Ag oxide battery, discussing zinc electrode limitations on battery performances

10 p1640 A69-23996

Airflow through open foam cellular structure, discussing mathematic model for predicting pressure buildup and foam response in shock and vibration isolation [ASME PAPER 69-VIBR-46]

10 p1803 A69-24144

Performance correction and nonstandard day performance prediction for analyzing turbocharged reciprocating aircraft engines in light aircraft applications [SAE PAPER 690309]

11 p1942 A69-24514

Aircraft structures fatigue strength determination, discussing test procedures, sample preparation, strength prediction, etc

11 p1970 A69-24525

Rapid low level commutator for temperature measuring circuit with thermocouples, discussing construction and performance

11 p1884 A69-24758

Weld defects effects on static and fatigue properties of weldments prediction, including tests of titanium-aluminum-vanadium joints

11 p1892 A69-24932

Propeller performance prediction for nonnegligible angle of attack, determining tip loss factor with model similar to Prandtl model for axial flight

11 p1819 A69-25375

Feedback control law preserving optimality for systems with unknown parameters, discussing optimally adaptive performance index

11 p1860 A69-25441

Wideband inverter operational amplifier frequency response, open and closed loop transfer functions, beta, settling time and slew rate limits, discussing HF performance prediction

11 p1857 A69-25666

Service life of system predicted by identifying and testing system variables of mission phases, using obtained data in statistical estimation

12 p2101 A69-25970

Nozzle erosion profile, char penetration and temperature response predicted for nozzle material for 260 SL-3 motor [AIAA PAPER 68-504]

12 p2118 A69-26784

Graphite improvement for high temperature applications by computerized properties analysis, failure criterion and improved testing for defective billets

12 p2115 A69-26845

Transistorized amplifiers reliability estimated from step by step failures during operation in intense external environment

12 p2043 A69-26886

Man machine model for prediction of human control behavior, generating model from analysis of helicopter pilot tasks

12 p2025 A69-27082

Computer simulation models for prediction of individual and crew performance in man machine environments

12 p2026 A69-27087

Computer simulation program for design and evaluation of digital Doppler processor, analyzing performance limitation due to quantization and white noise

12 p2035 A69-27096

Liquid metal two phase flow MHD generators efficiency prediction, discussing eddy losses and flow velocity

13 p2205 A69-27485

Liquid metal MHD induction generators design and performance, considering effect of geometry, operating conditions, fluid properties and power level on efficiency

13 p2207 A69-27503

Erosion type plasma accelerator using inductive energy storage compared with capacitive energy storage

13 p2311 A69-28110

Weighting factors relation in optimal systems integral squared error /ISE/ cost functional, characteristic coefficients and time response performance measures

14 p2534 A69-29317

Flight worthiness of mishandled electronic equipment, analyzing fragility and performance of shock exposed components and connections

15 p2576 A69-30362

Engineering models for wearout reliability prediction in dynamical systems subject to random loading, demonstrating practical and statistical methods

15 p2705 A69-30366

Leakage prediction through mechanical seal by theoretical equation developed from basic fluid mechanics [ASLE FICFS PREPRINT 17]

15 p2621 A69-30499

Computer aided design /CAD/ of component selection for circuit optimization applied to circuit performance and sensitivity calculations

15 p2628 A69-30849

Electrochemical test predicting stress corrosion performance of 2219 aluminum alloy in T851 and T87 tempers

16 p2798 A69-31716

ICRPG liquid propellant thrust chamber performance evaluation methodology, reviewing imperfections and limitations [AIAA PAPER 69-468]

16 p2838 A69-32657

Nonequilibrium initial condition combustion effects on propellant performance for hydrazine/ chlorine pentafluoride and hydrogen/fluorine with equilibrium, kinetic and frozen nozzle flow [AIAA PAPER 69-469]

16 p2832 A69-32659

Solid rocket motor performance prediction including motor pressure, thrust and propellant parameters, discussing mathematical modeling of flow fields [AIAA PAPER 69-732]

16 p2840 A69-32674

Agna propulsion system performance model for predicting propellant flow rate, mixture ratio, thrust time and specific impulse [AIAA PAPER 69-453]

16 p2841 A69-32683

Flight performance prediction for throttling bipropellant rocket engine utilizing ablative combustion chamber throat, discussing lunar module descent engine [AIAA PAPER 69-452]

16 p2841 A69-32690

Supersonic compressor blade sections performance prediction near maximum pressure ratio and efficiency by analyzing flow processes [AIAA PAPER 69-522]

16 p2843 A69-32711

Low cycle fatigue behavior prediction for 304 and 306 stainless steels based on temperature and strain rate ratio to tensile ductility

17 p2987 A69-33079

Apollo Lunar Module Environmental Control System /LM/ECS/ steady state performance simulation techniques, discussing vacuum chamber data of LTA-8/LM-3 [AIAA PAPER 69-616]

17 p2903 A69-33307

Mission task performance oriented approach to winged helicopters flying and handling qualities, considering wings and horizontal stabilizers influence [AHS PAPER 360]

17 p2900 A69-33522

Helicopter rotors and static propellers theory based on Prandtl-Betz theorem, calculating ideal performance [AHS PAPER 326]

17 p2894 A69-33533

Vertical takeoff aircraft propeller/rotor design and performance prediction, discussing vortex model, wake contraction, blade element aerodynamic properties, etc [AHS PAPER 325]

17 p2894 A69-33534

Helicopter hovering performance prediction from wake analysis by iteration, discussing wake interference significance and blade number influence [AHS PAPER 321]

17 p2895 A69-33538

Blade length effects on performance of flow straightener vanes influenced by secondary flow, noting high deflection and low aspect ratio

17 p2896 A69-33606

Superconducting antenna factors and matching circuit equivalents developed for predicting efficiency and Q increase on basis of Pb surface resistance

17 p2937 A69-33784

Fluidic attitude control systems performance prediction from conventional control analysis emphasizing steady state positioning accuracy

17 p2904 A69-34069

Soviet book on hydraulic servo drive covering design and performance, static and dynamic characteristics and stability problems

18 p3093 A69-34356

Reliability prediction in electronics, discussing basics, advances, limitations, etc

18 p3146 A69-34514

Reliability prediction limited to approximations related to past experience on similar equipment

18 p3147 A69-34517

Statistical testing techniques using small sample size at low component levels to predict product performance

18 p3117 A69-34528

Plastics behavior under loading and performance prediction, considering engineering design applications

18 p3161 A69-34609

Parameter sensitivity analysis of discrete suboptimal filters from optimal rmse estimate of actual system performance measure

18 p3110 A69-34675

Thermoelectric converter systems optimization by geometry independent functions

18 p3093 A69-34782

Solid propellant rocket motor predictive design by correlating performance and weight statistics via computer program [SAWE PAPER 775]

18 p3184 A69-34873

Nuclear powered surface effects machine performance estimates, calculating reactor power and payload fraction for various clearance heights, gross weights and velocities

18 p3171 A69-35180

Helicopter rotor rotational and vortex noises prediction methods and trends

18 p3088 A69-35224

Dynamic performance accuracy of astatic gyroscope with three degrees of freedom improved by inner gimbal mass increase

19 p3308 A69-35825

Mathematical basis for human operators purposeful behavior in complex systems control situation requiring decision reaching

19 p3260 A69-35895

Operational missile flight program validation plan noting mission analysis, computer programming, program preparation and performance prediction

19 p3279 A69-35955

Surveyor thermal vacuum test data comparison with flight results indicating performance prediction reliability of earth-based tests for vacuum and lunar environments

19 p3430 A69-36016

Man machine modeling technique for establishing personnel performance requirements, discussing field tests

19 p3261 A69-36025

Fracture mechanics applied to cylindrical pressure vessels containing longitudinal defects for fracture behavior prediction from fracture toughness or stress intensity factor

19 p3439 A69-36439

Volume prediction of human body exposed to vacuum based on animal skin elasticity and anatomical features

19 p3258 A69-36456

Acoustic filters performance determination, standing wave tube and anechoic termination methods

20 p3464 A69-37321

Propulsion system performance relationship to manned planetary mission capability, discussing anticipated performance of advanced propulsion concepts

20 p3586 A69-38118

Optimum and suboptimum synchronizers for extracting bit synchronization from binary data, showing performance dependence on pertinent system parameters

21 p3673 A69-38923

Multiple access techniques of SSB-PM and PCM-PM frequency translation for satellite communication system, comparing performance characteristics

21 p3678 A69-39807

Minimum bias criteria for selecting data fitting curves, allowing for unknown true equation in improving data predictability [AIAA PAPER 69-950]

22 p3975 A69-40332

Computerized simulation for performance evaluation of System/4 Pi-EP multiprocessor for use in aerospace vehicle

22 p3907 A69-40353

Hydrostatic bearings analysis for high pressure cryogenic rocket engine turbopumps to predict steady state and time dependent performance, noting turbulence, inertia and compressibility

22 p3955 A69-40408

Germanium microwave backward diodes optimum design and performance prediction through computer calculation for important parameters

22 p3916 A69-41224

Rotor operating limits, loads, performance prediction and airfoil development in rotary wing aerodynamics research

23 p4057 A69-41371

Delay line MTI receivers performance calculation accuracy, discussing error for general and restricted number of pulses from single and double cancellation at IF

23 p4117 A69-41605

Digital computer program for determining flight vehicle telemetry antenna performance from ground test readings

23 p4133 A69-41754

Radio telemetry system for evaluating protective masks dynamic performance by remote simultaneous monitoring of respiration, acceleration and temperature data generated by human subjects

23 p4121 A69-41765

Teleological systems behavior modeling based on input, output, goals, operation duration, etc

23 p4134 A69-42059

Thermoelectric generators using hot junction pressure contacted lead telluride technique, presenting model for long term performance characteristics

23 p4188 A69-42262

Space vehicle flight performance of Ni-Cd batteries noting reliability, consistency and predictability

23 p4072 A69-42285

Radar detection performance evaluation procedures based on integration, collapsing and fluctuation losses estimates for swirling target models and partially correlated targets

23 p4132 A69-42547

Space and missile guidance performance analysis through automatic generation of mission performance sensitivity with respect to error sources from Monte Carlo simulation [AAS PAPER 69-404]

24 p4347 A69-42836

PERFORMANCE TESTS

Performance characteristics of microstrip ferrite devices for hybrid microwave integrated circuit systems, including meander line phasers and YIG elements

01 p0040 A69-10191

T63 regenerative helicopter engine program, noting operational performance and engine-aircraft compatibility [AHS PAPER 212]

01 p0143 A69-10410

Stable fluxgate magnetometer sensor for exploration of space magnetic fields, discussing equipment specifications and performance tests [IEEE PAPER 10.2]

01 p0081 A69-10715

Low polarization error HF loop antenna array direction finder performance tests, comparing measured bearings with polarimeter and conventional crossed loops data

01 p0048 A69-11006

Test method to compare grazing incidence X ray telescope performance in visible light and in X rays

02 p0248 A69-11736

Propeller static performance calculations for infinite number of blades applied to four blade propeller at different blade angles

02 p0188 A69-11957

Operator handedness effect on control display movement stereotypes

02 p0203 A69-12212

Component total task relationships, analyzing simple and sequential practice effects with aid of Melton Complex Coordinator

02 p0203 A69-12214

Strain gage behavior on unstressed aluminum alloy under rapid heating using radiant heating, weld strength and high temperature test equipment

02 p0341 A69-12229

Rhenium-niobium cylindrical thermionic converters with mechanically polished or electroetched emitters, comparing performance

03 p0368 A69-13126

Performance prediction by testing, considering stress analysis, temperature, multiaxial stresses, combined stress, corrosion, shock, etc

03 p0525 A69-13307

Human inspection performance in quality control operations to assess visual inspection tasks accuracy

03 p0433 A69-13386

Weapons propulsion system off-design engine performance, noting installation loss effects [SAE PAPER 680712]

03 p0496 A69-13445

Low and high power pi-mode Laddertron oscillator design operation and performance characteristics

03 p0405 A69-13726

Performance index sensitivity of nominally optimal controls noting initial and final target manifolds relationship to trajectory sensitivity

05 p0737 A69-15866

Telemetered data obtained by lantar I automatic ionospheric laboratory, detailing argon-ion plasma engine performance

05 p0830 A69-16056

Inlet velocity profiles distortion effects on flow regimes and performance in two dimensional diffusers with turbulent boundary layers [ASME PAPER 68-WA/FE-25]

05 p0698 A69-16100

Inlet conditions influence on two annular diffusers performance, using low speed tests [ASME PAPER 68-WA/FE-38]

05 p0698 A69-16110

Gas turbine exhaust silencer performance correlated in laboratory and in service [ASME PAPER 68-WA/GT-9]

05 p0812 A69-16144

Mini trend hookup copper wire insulation performance evaluation

05 p0730 A69-16242

Solid insulator performance in vacuum, analyzing breakdown factors

05 p0731 A69-16243

Gain degradation under applied voltage and injection current during low dose gamma irradiation by Co-60 source for bipolar transistors

06 p0977 A69-16880

Optimized radiative heat transfer systems performance, comparing tubular radiators with various fin geometries and systems with belt radiator

06 p1033 A69-17600

Weightless simulators effectiveness for obtaining space systems maintainability criteria, using nonparametric experimental design for performance data

06 p0882 A69-17648

Army engineering flight testing of OH-6A helicopter, presenting test program and results

06 p0867 A69-17659

SGN-10 inertial navigation system evaluation by Pan American World Airways

06 p0955 A69-17663

General aviation flight testing philosophy and origin

06 p1043 A69-17667

BO-105 helicopter design, testing and characteristics noting four bladed rigid rotor [AHS PAPER 200]

07 p1052 A69-18869

Laboratory measurement data of low light level TV performance converted to anticipated real world performance data

07 p1132 A69-18948

Bandwidth limited PCM/PSK/PM telemetry system performance analysis for developing S band telemetry, including coherent and noncoherent detectors

07 p1081 A69-19098

Nickel-cadmium and Ag-Cd storage batteries performance, discussing methods to lengthen battery life and improvement of characteristics

08 p1261 A69-21051

Optical design of Wolter type I glancing incidence X ray telescope for 6-100 A wavelength region, describing results of laboratory and rocket flight tests of prototype

08 p1318 A69-21087

Electron bombardment effects on performance characteristics of UV gratings

08 p1318 A69-21097

Experimental program for tests to identify primary electric propulsion system integration problems and solutions, emphasizing design and initial testing [AIAA PAPER 69-236]

09 p1560 A69-21213

Life test of high temperature /2400 K/ 10 millipound resistor thrusters, comparing results to theoretical predictions [AIAA PAPER 69-294]

09 p1563 A69-21232

Segmented anode, carbon dioxide-hydrogen performance and hollow cathode erosion tests on low power MPD arc thruster, noting current measurements [AIAA PAPER 69-242]

09 p1563 A69-21236

Research and development program in annular slit colloid thruster technology, proving thruster feasibility by performance tests [AIAA PAPER 69-287]

09 p1566 A69-21257

Reproducibility of thermionic converters performance, comparing volt-ampere characteristics with reservoir and collector temperature

09 p1437 A69-21813

Thermionic converters with chloride and fluoride vapor deposited tungsten emitters, comparing performance characteristics and stability

09 p1438 A69-21819

Turbine stator blade performance determination from total pressure surveys downstream of blade row, noting problems in pressure measurement
[ASME PAPER 69-GT-103]

09 p1432 A69-22521

Radial inflow gas turbine engine performance testing, discussing instrumentation, recording systems and calibration techniques
[ASME PAPER 69-GT-104]

09 p1501 A69-22522

Shock ignition procedure to keep pyrotechnic composition in optimum condition in space environment, describing test layouts and theory

10 p1749 A69-23007

Primary explosives tested for effects of shock, friction, heat and electrical discharges

10 p1750 A69-23010

Learned behavior performance failure in hypothermia as temperature dependent phenomenon using rat, guinea pig, chinchilla, mouse, gerbil and hamster

10 p1643 A69-23124

Simplified model of ignition tests with liquid propellant rocket engines under high vacuum conditions, giving possible parameter for evaluation of simulation of real conditions

10 p1754 A69-24022

Thermionic converter SD-4 design and performance tests covering emitter, collector and Cs reservoir temperatures and power efficiency

11 p1827 A69-25398

Large astronomical mirrors support and testing - Conference, Tucson, December 1966

12 p2055 A69-26406

Optical tests of Hale telescope mirror and support system at Palomar, noting various maladjustments and malfunctions

12 p2057 A69-26411

Isaac Newton telescope, describing support of 98 inch mirror, structure between fabricated cell steel surface and mirror and tests with air bag support

12 p2058 A69-26416

Ablation performances of asbestos phenolic and silica phenolic compared at higher stagnation pressures in wave-superheater hypersonic tunnel

12 p2119 A69-26814

Electrodeless plasmatron coupled with oscillator operating at 5-30 kHz, discussing parameters effect on operation mode and performance

12 p2140 A69-27123

American, French and Soviet medium weight helicopters tested in terms of main rotor blades construction, rotor performances and comparative power plant data

13 p2201 A69-27329

Litton LTN-51E inertial navigation system accuracy and reliability evaluated on basis of transpacific flights [SAE PAPER 680299]

13 p2296 A69-28103

Flame extinguishing potential of various substances for low pressure premixed and diffusion flames

13 p2380 A69-28460

Scientific satellite checkout system tests by manual, automatic and self test control

13 p2243 A69-28480

S-band telemetry capability of Easter Test Range, discussing relationship to Telemetry Rehabilitation Project, major system decisions and performance characteristics

14 p2410 A69-28878

Carrier disappearance method for FM telemetry transmitter characteristics measurements including frequency deviation sensitivity, linearity and frequency response

14 p2411 A69-28881

Thermionic converter performance measured using test vehicles with guard ringed collectors and variable emitter-collector spacing

14 p2398 A69-29177

Cylindrical geometry in-pile and out-of-pile thermionic converters long term life tests, including unfueled and fueled versions

14 p2399 A69-29197

X-22A VSTOL aircraft testing, discussing control sensitivity, dutch roll mode period and performance test planning based on characteristics prediction

14 p2392 A69-29699

Design and test criteria for dynamically loaded structures from various viewpoints, discussing statistical variations, load strength and limitations

15 p2618 A69-30368

Combustion performance evaluation program demonstrating high performance with space storable propellant combination of FLOX, methane and ethane [AIAA PAPER 69-507]

16 p2829 A69-31848

L-500 inlet development program, discussing external forebody design, entry lip and diffuser geometries, configuration and technology developments, experimental techniques and test equipment
[AIAA PAPER 69-448]

16 p2733 A69-32684

Brake system components automatic testing for pneumatic or hydraulic integrity essential to safe system performance

17 p2978 A69-33377

CX-84 two propeller tilt wing deflected slipstream V/STOL Military Evaluation Program related to support of surface forces
[AHS PAPER 351]

17 p2900 A69-33526

Aircraft carrier landing system performance, variations in pilot experience, aircraft types and environment, emphasizing night carrier recovery

17 p2916 A69-34012

Twin spool hydrogen turbopump performance at zero net positive suction pressure /NPSP/ saturated fluid in propellant tank, including steady state and simulated transient engine tests
[AIAA PAPER 69-550]

18 p3140 A69-34414

Calorimetric methods for battery and cells testing, discussing heat generation data correlation

18 p3093 A69-34780

V/STOL model small scale tests compared with full scale tunnel or flight tests, considering normal differences in parameters and rotor instability

18 p3119 A69-35227

Semiconductor optical quantum amplifiers in pulse mode operation, describing arrangement for studying performance including pulse duration and current controls

18 p3153 A69-35258

Integral fuel tank sealant based on various hydrofluorocarbon polymers prepared, tested and compared for physical properties

19 p3356 A69-35533

Epoxy molding compounds performance on DIP integrated circuits, determining comparative moisture protection provided by encapsulants

19 p3280 A69-35546

Exposure tests of corrosion resistant claddings for high strength Al alloys protection, finding higher purity alloy cladding superiority

19 p3322 A69-35571

Signature analysis diagnostic methods for reliability tests involving final product checkout and early fault detection

19 p3322 A69-35574

Optimized flight crew training, evaluating safety, flight simulator efficiency, takeoff/landing practice and line experience based on test results
[AIAA PAPER 69-771]

19 p3245 A69-35653

Li variation effects on solar cell properties indicating cell performance control by amount introduced near p-n junction

19 p3252 A69-35695

Apollo optics system ground and flight performance tests results, suggesting possible design changes for sunlit space environments

19 p3307 A69-35796

Man machine modeling technique for establishing personnel performance requirements, discussing field tests

19 p3261 A69-36025

Optimal ratio predetection combiner used with diversity signals and various modulations, showing significant improvement in telemetry systems performance

19 p3270 A69-36241

Cascade wind tunnels performance experiments, investigating effect of exit side walls lengths

19 p3241 A69-36753

Low noise microwave devices performance and price, discussing transistor and tunnel diode amplifiers, traveling wave tubes and price reductions via manufacturing methods

20 p3504 A69-36913

Aerodynamic performance tests of autorotative unpowered rotor entry vehicle model at various Mach numbers and angles of attack
[AIAA PAPER 68-950]

20 p3458 A69-37155

Technical and metrological characteristics of short base strain gages and bonding to specimen, investigating sensitivity and creep

20 p3544 A69-37817

Telemetered data obtained by Iantar 1 automatic ionospheric laboratory, detailing argon-ion plasma engine performance

20 p3618 A69-37966

Large aperture Al alloy telescope mirrors consisting of Tenzalloy Al coated with Ni alloy, presenting performance data

20 p3546 A69-38193

Guidance and navigation flight tests, demonstrating system performance improvements by onboard inertial system communicating with external navigation aid
[AIAA PAPER 69-842]

21 p3765 A69-39429

High density environment-resistant circular connectors, discussing design, applications, test and performance data compliance with MIL-C-81511 specifications

22 p3910 A69-39947

Space simulation facility assembly and operational testing

22 p3919 A69-39959

Kyoto University hypersonic gun tunnel equipment and performance data, discussing central control system, automatic operating system and double diaphragm device

22 p3927 A69-40587

Ceramic-sealed Ni-Cd secondary batteries space environmental behavior testing to determine heat dissipation during spaceborne operation

22 p3869 A69-40591

Cs contact ion engine with tubular W ionizer tested for performance and reliability in vacuum chamber

22 p4000 A69-40592

Solid rocket motor static firing tests in low pressure environment, presenting data concerning vacuum chamber pressure, diffusers pressure distribution, chamber wall temperature distribution, etc

22 p4000 A69-40593

Balloon flights for testing remote sensor systems prior to space flight, considering return beam vidicon and tracking telescope suitability for experimentation

22 p3865 A69-40806

Piston driven shock tube at Kyoto University with performance tests results, investigating compression processes, shock speed and flow duration time

22 p3928 A69-41046

Flight performance analysis of airline pilot group related to flight recording monitoring system

22 p3868 A69-41145

Pigeon accelerated performance patterns as function of contiguity of brief visual stimuli and food reinforcement, noting pattern absence during stimuli omission

23 p4081 A69-41436

Fixed-tuned telemetry receiver as miss distance indicator /MDI/ to provide information in missile performance program

23 p4138 A69-41781

Performance test of German MPD plasma rocket engine with augmented magnetic field and 5-10 kw output, describing integral measurement procedure and observed phenomena
[DGLR-69-024D]

23 p4202 A69-41927

Heat pipe system performance of GEOS 2 satellite, noting transponders temperature differences

23 p4224 A69-42082

Large reflector paraboloid antenna performance under environmental loads

23 p4231 A69-42132

Pyrotechnical gas generator performance tests during Europa 1 rocket second and third stage separation, including generator design, ground and flight tests

23 p4224 A69-42153

Photomultiplier tubes performance enhancement by light incidence on photocathode at oblique angles explained by reflection

23 p4191 A69-42194

Electromagnetic compatibility /EMC/ filter design and test methods to achieve effectiveness and reliability, emphasizing transfer impedance characteristics

23 p4142 A69-42233

Apollo Telescope Mount /ATM/ solar cell module electrical performance testing using sunlight simulation

23 p4072 A69-42286

High efficiency boost regulator design and tests for planetary spacecraft, considering input and output voltages

23 p4075 A69-42302

Two fluid heat pipe performance, measuring temperatures and condenser end vapor pressures for two thermal power input conditions

23 p4240 A69-42306

High power density spacecraft hydrogen/oxygen fuel cells with open cycle heat and product-water removal subsystems and reactant tankage

23 p4076 A69-42309

Causes of ascent failures in high altitude balloons, discussing test methods and specifications revisions

24 p4251 A69-42714

Performance curves of cylindrical water heat pipe for performance map, observing free hydrogen accumulation
[ASME PAPER 69-HT-15]

24 p4413 A69-43554

PERFUSION

U DIFFUSION

PERIDOTITE

- U ENSTATITE
- U OLIVINE
- U PYROXENES

PERIHELIONS

Technological requirements for solar probe with close perihelion, discussing solar approach and space environment problems

03 p0519 A69-12855

Visual and photographic comet observations, including perihelion passage of P/Perrine-Mrkos in 1968

07 p1216 A69-19205

Recently discovered comets including Comet Thomas, discussing magnitudes and perihelions

12 p2172 A69-27161

Comet Ikeya-Seki phenomena near perihelion interpreted from mean surface and ice nucleus internal layers temperatures

14 p2523 A69-29706

Comet Ikeya-Seki 1965f photometric investigation during perihelion, determining tail type according to Bredikhin classification

14 p2524 A69-29709

Solar probes design for 0.3 to 0.1 AU perihelion distance, considering thermal control, power supply, communications, altitude control and alternative configurations

17 p3050 A69-33797

Jupiter swingby flight mode application to probe missions requiring solar polar regions overflight at close perihelion distances

19 p3401 A69-35915

Daylight observations of Comet Ikeya-Seki 1965-f at perihelion passage, discussing resulting emission line spectra within comet head

23 p4221 A69-42386

Space mission opportunities selection from analysis of short period comet perihelia, discussing flyby and rendezvous mission payloads [AAS PAPER 69-320]

24 p4381 A69-42866

PERIOD EQUATIONS

- U PERIODIC FUNCTIONS

PERIODIC FUNCTIONS

- NT SINE SERIES
- NT TANGENTS
- NT TRIGONOMETRIC FUNCTIONS

Iterative process for determining periodic solutions of nonlinear nonautonomous periodic differential equations without weak nonlinearity hypothesis applied to nonlinear synchronization

02 p0271 A69-11550

Periodic cubic differential equation of motion solved with special reference to location of fixed points and stability of solutions

02 p0280 A69-11816

Inverse Laplace transform determination method for periodic functions applied to rectangular pulse train and rectified sine wave

02 p0271 A69-11983

Necessary and sufficient conditions for solution boundedness for Liénard equation with forcing function

02 p0272 A69-12132

Frequency of periodic solutions of autonomous nonlinear systems determined by method using Duffing approximation

02 p0348 A69-12612

Existence and stability of periodic waves in cold collisionless plasma in magnetic field

03 p0474 A69-13143

Asymptotic behavior of periodic solution of neutral type equation with small delay

03 p0455 A69-13258

Wagon rolling toward piston executing HF oscillations, discussing periodic solutions of equations of motion corresponding to piston phase at collision

04 p0630 A69-14893

Existence theorem for periodic solutions of parabolic boundary value problem for infinite space time cylinder

04 p0624 A69-15004

Periodic solutions for linear and weakly nonlinear heat conduction equations, obtaining omega-periodic solutions for initial boundary value problems

04 p0625 A69-15109

One to one mappings of Fourier series of analytic almost periodic functions and Dirichlet series, discussing satisfaction of functional equation

05 p0786 A69-15882

Explicit solubility of asymptotically periodic linear systems of differential equations

05 p0788 A69-16483

Maximum index of exponential growth of solution of linear Hamiltonian equation with periodic operator

coefficient encountered in dynamic stability of elastic systems

07 p1231 A69-18501

Basic frequencies of uniformly almost periodic solutions of differential equations extended, noting application to orbit closures decomposition of almost periodic continuous flows

07 p1174 A69-18733

Periodic asymptotically stable MHD motions, proving uniqueness and existence theorems

07 p1194 A69-19437

Periodic solutions of autonomous system oscillations with many degrees of freedom based on Poincaré method applied to Liapunov systems

07 p1183 A69-19680

Numerical analysis of periodic solutions of restricted three body problem in sun-Jupiter system, noting genealogy of periodic orbits

08 p1382 A69-19874

Analog study of periodic permanent magnet focusing, considering ray equation, beam radius dependence on distance, amplitude variations, etc

08 p1285 A69-20555

Probable spectrum stability criterion and reducibility derived for linear differential equation having recursion or almost periodic coefficients

10 p1720 A69-23562

Nonsymmetric periodic solutions of second order nonlinear differential equations

10 p1721 A69-23641

Periodic functions approximated by linear methods of Fourier series

11 p1908 A69-24697

Periodic solutions of quasi-linear self contained system with several degrees of freedom in case of commensurate frequencies, showing coordinates functions breakdown

11 p1920 A69-25749

Steady state solution of periodically excited circuit, constructing Green function for use in convolution integral

12 p2036 A69-25918

Resonance circuit application to harmonic analysis of periodic functions on analog computer, considering transient period and sequential order

12 p2123 A69-26718

Nonlinear hyperbolic partial differential equations with dissipation term for periodic solutions

12 p2124 A69-26929

Periodic solutions for small nutation angle of quasi-linear autonomous system of equations of motion of heavy solid body moving around fixed point

14 p2445 A69-28896

Electromagnetic scatter from perturbed continuous medium, expressing problem in terms of periodic functions instead of conventional power series

14 p2414 A69-29513

Asymptotically almost periodic solutions of almost autonomous differential equation

15 p2645 A69-31096

Periodic solutions of variational equations near equilibrium, obtaining one parameter expansion of family of long period orbits

16 p2854 A69-31654

Quasi-periodic solutions for canonical systems of differential equations in plane n-body problem

17 p3035 A69-33620

Wave scattering from nonplanar periodic structures using periodicity method, including Green function and Mellin transform

17 p2929 A69-33880

Celestial mechanics, Part 1, covering almost periodic functions, relation to classical astronomy and modern mathematics, implicit function theorem, three body problem, etc

18 p3199 A69-34928

Periodic solution of boundary value problem involving motion equation of viscous fluid

18 p3123 A69-35053

Asymptotic behavior of solution to parabolic equation for t approaching infinity, proposing asymptotic formula to Cauchy problem for heat conduction

18 p3231 A69-35310

One degree of freedom systems nonlinear oscillations differential equations periodic solutions by successive approximations, obtaining proof for convergence

18 p3174 A69-35311

Monograph on periodic solutions and locking-in regions for differential equations with switching points describing motion of self excited oscillatory physical structures

20 p3577 A69-37923

Dynamic stability of linear systems with periodic coefficients based on iterative formulas, evaluating transition matrix

21 p3685 A69-38779

Periodic solutions of differential equation as example of locking in of frequencies, developing mapping procedure for perturbation methods application

22 p3979 A69-39894

Criterion for class of differential equations ensuring absence of nontrivial periodic solutions

22 p3974 A69-39897

Extension of Liapunov systems to time lag systems with small periodic parameter

22 p3980 A69-40107

Nonlinear system oscillations analysis based on small parameter method and difference equations, including resonant case and stability criterion for periodic solutions

22 p3980 A69-40108

Controllability and linear closed-loop controls in linear periodic systems

22 p3917 A69-40572

PERIODIC ORBITS

- U ORBITS

PERIODIC OSCILLATIONS

- U OSCILLATIONS

PERIODIC PROCESSES

- U CYCLES

PERIODIC VARIATIONS

- NT ANNUAL VARIATIONS
- NT DIURNAL VARIATIONS

Quasi-periodic VLF emissions associated with geomagnetic micropulsation activity in terms of comparable periodicity

01 p0063 A69-10274

26-month periodicity in quiet day range of geomagnetic field horizontal force, noting similar periodicity in sunspot number and 16-month oscillation in both phenomena

01 p0063 A69-10427

13-day cycle variation in cosmic radiation intensity confirmed by Vercelli method, giving values of amplitudes and correlation coefficients among variations

01 p0145 A69-11031

Spectral peaks for torsional oscillations of earth, estimating free periods from observations at six stations around earth

02 p0243 A69-12007

Measurements of pulsars CP 0834, CP 0950, CP 1133 and CP 1919, discussing pulse intensities and shape, submillisecond structure, intensity variations, periods and positions

02 p0328 A69-12726

Radio star scintillation data, establishing periodic variations in rates within 1 to 1.5 years

03 p0505 A69-13081

Time variations of chromospheric network of bright points covering solar disk in spectrograms, noting contrast and interspaces variation with 11-year solar cycle

04 p0651 A69-14372

Pulsating stars, cepheids, RR Lyrae and W Virginis, excitation mechanisms, period-luminosity relation, oscillation modes, location on Hertzsprung-Russell diagram, etc

04 p0653 A69-14625

0.1 Hz intensity variation in bright homogeneous auroras prior to and during breakup observed visually and with image orthicon TV systems

04 p0594 A69-15129

Liquid flow systems dynamic response to periodic disturbances of system structural supports

05 p0747 A69-16073

Increasing periodicities in radio pulses from pulsars

05 p0825 A69-16352

Pulsar pulse period stability, noting slowing down in several sources

05 p0825 A69-16353

Solar radio emissions analysis using radio telescope measurements, observing quasi-periodic LF fluctuations caused by chromospheric processes

06 p1004 A69-17535

Period fluctuations in ionospheric plasma resonance amplitude, proposing hypothesis in terms of quasi-electrostatic surface waves guided by antenna wire

07 p1125 A69-18847

Universal instability theory relevance to pulsating optical auroras and fast quasi-periodic variations of auroral X ray fluxes

07 p1125 A69-18852

Periodic pulling mechanism for explaining transition to turbulence in bounded plasma with weakly unstable drift modes

07 p1194 A69-19400

Frequency distribution curves of spot groups according to area, confirming existence of stable stages in evolution of sunspots

08 p1379 A69-20612

Quasar 3C454.3 optical variations, noting photographic and photometric evidence for period of 340 days

08 p1397 A69-20701

Correlated microwave and energetic X ray emission from solar flare with 16-sec periodic pulsations, discussing energy during modulation peaks

09 p1574 A69-21457

Mean temperature values accuracy determined from fixed period values by frequency graphs, discussing deviations from mean

09 p1534 A69-21511

Diurnal nutation and periodic terms of local coordinates using OPL model of Danjon astrolabe, presenting harmonic and Fourier analysis

09 p1596 A69-22059

Laser oscillations, discussing oscillation frequency, oscillation time, noise and spectrum width, pumping and lasing materials, line broadening and giant pulse generation

09 p1517 A69-22119

Three color observations of 16 magnetic stars and photometric properties of 23 stars, discussing periodicities in variations

09 p1599 A69-22196

Cepheids variations used to measure intergalactic distances, noting method of calibrating absolute Cepheid luminosity

10 p1780 A69-23646

Charged particle motion in periodic electromagnetic field, constructing dynamic variables describing motion

11 p1927 A69-25100

Unforced periodically varying systems, developing approximate solutions with Floquet theory

11 p1909 A69-25289

Period changes by variable stars in M13, showing

Variable 2 period lengthening

12 p2154 A69-25814

Pulsar PSR 0833-45 period decrease and rate of change in period increased between 24 February-3 March 1969, discussing contraction explanation

12 p2154 A69-25878

Solar radio emission bursts periodicity relation to burst intensity

12 p2157 A69-26234

Draconic period changes of satellite 1965-11-D /Cosmos 54 rocket/ during visual observations with Interob

12 p2174 A69-26444

Frequent periodic variations existence in daytime ozone content associated with solar activity

12 p2070 A69-26693

Linear closed loop control systems with periodically varying parameters analyzed by harmonics method using Fourier transforms

12 p2054 A69-26720

UBV observations of stars P and 36 Cygni including short period variations and secular changes in brightness

12 p2172 A69-27159

Periodicity decrease on 24 February to 3 March 1969 in decay of Molonglo pulsar PSR 0833-45

12 p2172 A69-27167

Photoelectric observations of blue light minima of U Geminorum variable Ex Hydrae indicating no change in orbital period

13 p2338 A69-27558

Jupiter decametric radio emission periodicity attributed to undiscovered satellite in unstable orbit, discussing application to satellite discovery

13 p2343 A69-27622

Linear polarization measurements at 6 cm, determining rotation period associated with Jupiter cm radiation

13 p2343 A69-27623

Sufficient conditions for periodic motion existence of autonomous nonlinear feedback systems derived in terms of linear system frequency response

13 p2238 A69-27923

Radio star scintillation data, establishing periodic variations in rates within 1 to 1.5 years

14 p2515 A69-28763

Relay sampled data phase plane trajectories periodic motions increased with increase of system duty factor

14 p2425 A69-28898

Interplanetary sector structure during rising portion of 1966-1967 sunspot cycle, giving recurrence period of interplanetary field

14 p2517 A69-28957

Periodicity of magnetothermal oscillations in pressure annealed pyrolytic graphite compared with hole carriers

14 p2504 A69-29005

Finite difference method for motion stability of periodic bipolar vibrational systems, considering perturbations

14 p2534 A69-29039

Oscillations intervals with diminishing period observed during magnetic storms, noting relationship to midlatitude disturbances in F region

14 p2436 A69-29060

Galactic OH emission sources time variations found in W49 and W75

14 p2517 A69-29085

White dwarfs periods of radial oscillations, considering ion gas contribution to adiabatic coefficient computation

14 p2517 A69-29090

Semimonthly lunar variation in D region absorption, discussing phase reversal of lunar tides between equatorial and high latitudes

14 p2439 A69-29113

Lacerta OB 1 B spectroscopic binaries periods and orbital elements, noting limits for secular variation

14 p2519 A69-29137

Pulsar model used to explain stellar shape oscillations as cause of radio emission intensity periodic variations

14 p2522 A69-29675

Cosmic ray intensity underground measurements, discussing solar modulation processes, sidereal day variations and interplanetary magnetic field influence

15 p2673 A69-30013

Cosmic ray variation theory, presenting data on coupling of solar activity with large scale characteristics of solar wind during 11-year cycle

15 p2673 A69-30015

Low energy electron and proton precipitation, discussing acceleration mechanisms and periodicity in relation to auroras and airglows

15 p2594 A69-30018

Variability of period of RR Lyrae type stars in globular cluster M3, deriving seasonal moments of stellar maxima and light curve elements

15 p2683 A69-30511

Periodic radial heat flux in infinite cylinder with varying heat sources, assuming time variable heat exchange on surface

15 p2717 A69-30575

Zeeman spectroscopy and UVB photometry of 17 Com and kappa Cnc, observing periodic magnetic and light variations

15 p2692 A69-30774

Almost periodical oscillations of nonlinear systems containing quasi-cyclic coordinates

16 p2813 A69-32286

Photoelectric observations of W Ursae systems, including observed and computed times of minimum light and period change

16 p2863 A69-32399

Meteor trails radar observations to measure zonal wind profiles between 80-110 km, noting short period oscillations

16 p2865 A69-32609

Radial oscillation periods of Hamada-Salpeter white dwarf models graphically compared with models by Harrison-Wheeler Wakano equation of state

17 p3037 A69-33642

Physical nature of HZ 22 short period hot subdwarf binary, noting arguments against normal B type binary hypothesis

17 p3044 A69-34181

Variable CoD minus 35 degrees 4257 noting primary period of 502 days superimposed on secondary beat period of 3000 days

18 p3195 A69-34431

Periodic motions in single mass impact vibration system by point transformations method, noting complexity characteristics

18 p3172 A69-34565

Models for pulsars periodicity and period range due to nonradial gravity wave in almost adiabatic matter of degenerate neutron stars

18 p3196 A69-34645

Pulsar PSR 0833-45 period decrease resulting from mass addition leading to radius and inertia moment decreases

18 p3196 A69-34646

Microfluctuations frequency and wavelength of electromagnetic, electric and magnetic field distributions in plasma shock wave front found consistent with ion-acoustic origin hypothesis

18 p3180 A69-35017

Relationship between micropulsation periods and size of magnetosphere expressed in power law form and interpreted with wave propagation

18 p3131 A69-35193

Pulsars theoretical period distributions derived, considering period change of period dependence

18 p3201 A69-35203

Jupiter decametric radio source analysis suggesting two component model of rotation at both constant and variable rotational periods

18 p3202 A69-35212

Meteor burst communication channel parameters for low data rate telemetry, considering signal amplitudes, decay, duty cycle, multipath, phase stability, trail location and variations

19 p3271 A69-36250

Autonomous functional differential equations with finite time interval dependent derivatives, resulting in periodicity theorem applicable to difference equations

19 p3361 A69-36600

Diurnal, seasonal and spatial variations in height and occurrence frequency of low electron density region below 3000 km

20 p3532 A69-37899

Periodicities in solar activity variation from correlation spectral analysis, establishing monotonically decreasing component and secular variations in activity

20 p3607 A69-38045

Twenty year wave in diurnal anisotropy component of galactic cosmic rays arriving at earth from asymptotic direction east of sun interpreted as magnetic reconnection

20 p3592 A69-38098

Near resonant and nonresonant solutions of nonlinear equation describing rotating pendulum motion under periodic disturbance

21 p3771 A69-39004

Periodic motions of mechanical oscillators with velocity discontinuities analyzed by differential equations

21 p3771 A69-39009

Convective cells and periodic variations in vertical gradient of electroatmospheric field

22 p3934 A69-39939

Dynamic systems stability with two degrees of freedom, determining second order time dependent integrals valid near periodic orbit

22 p4013 A69-40123

Periodic orbits obtained for special restricted three body problem in resonance using numerical integration

22 p4031 A69-40909

Lunar semimonthly variations in noon values of D region absorption at Singapore, noting opposite phases of lunar tides in D and F regions

22 p4035 A69-41211

Cosmic ray anisotropy direction during periodic intervals determination, noting application to event of December 1957

23 p4204 A69-41482

Relativistic Doppler shift effect observed from radio signal periodic variation of GEOS-1 satellite

23 p4126 A69-42389

Meter and decimeter wavelength range short period fading under conditions excluding optical sights, correlating specular and diffuse reflection

24 p4281 A69-42612

Jupiter Red Spot semiregular oscillations from photographic measurements, determining mean period and amplitude

24 p4383 A69-43002

PERIODICITY

U PERIODIC VARIATIONS

PERIODICITY [BIOLOGY]

U RHYTHM [BIOLOGY]

PERIPHERAL CIRCULATION

Circadian variations in human temperature regulation, measuring peripheral and rectal temperatures and peripheral heat and arterial blood flows in clothed resting males

22 p3872 A69-40201

Mathematical formulation for relative values of cardiac output and peripheral resistance as two contributing factors to arterial pressure change

23 p4085 A69-41473

Venous tone, peripheral venous pressure, skin and muscle blood flow, alterations of heart rate and respiration in men during leg exercise

23 p4096 A69-42090

Blood flow, volume and venous pressure measurements in right hand at low and high altitudes in residents and newcomers

23 p4098 A69-42106

Cardiopulmonary bypass developed for studies of long term weightlessness on cardiovascular system of mice, white rats and squirrel monkeys
24 p4278 A69-43394

PERIPHERAL JET FLOW

Fixed point support properties of quasi-vertical peripheral jet hovercraft with two pressure stages
06 p0857 A69-16820

Thin wall flow of circular jets in bounded transverse flow, showing hydrodynamical parameter of mixture effect on jets dimensionless path
10 p1679 A69-23567

Nuclear powered surface effects machine performance estimates, calculating reactor power and payload fraction for various clearance heights, gross weights and velocities
18 p3171 A69-35180

PERIPHERAL NERVOUS SYSTEM

Histological and histochemical studies of dephosphorylating enzyme distribution in muscle spindle capsule of guinea pig thigh muscles and cat calf muscles
15 p2554 A69-30406

Cerebral subcortical structures controlling effect on central and peripheral nervous systems, discussing motion coordination, space orientation, search reflexes and physiological sleep
22 p3889 A69-41275

PERIPHERIES

U BOUNDARIES

PERMALLOYS [TRADEMARK]

Isochronic annealing effect on coercive force of Mo Permalloy samples bombarded with neutrons in nuclear reactor
05 p0783 A69-16815

Electrodeposition of Te-containing Permalloy films with uniaxial magnetic anisotropy, noting electrolyte composition and film structure
11 p1935 A69-24332

Neutron irradiation and temperature effects on ferrite and Permalloy memory cores hysteresis loops
12 p2142 A69-26259

Dynamic Kerr observations of high speed flux reversal and relaxation process in permalloy thin films by magnetooptical camera with Q switched ruby laser
19 p3383 A69-36446

Bloch wall motion along hard direction of Permalloy films due to fast rising hard-axis pulses
20 p3584 A69-38191

Transformer for unilateral energy transfer using single domain uniaxial Permalloy film
21 p3684 A69-39454

PERMEABILITY

NT DIELECTRIC PERMEABILITY

Rarefied molecular gas flow past permeable surface, determining reflection law and flow parameters
20 p3459 A69-37438

Pumping pore size and permeability of wicks as part of heat pipes design
23 p4074 A69-42298

Wick capillary pressure, permeability and burnout heat flux measurements to provide data for heat pipe design
[ASME PAPER 69-HT-18] 24 p4412 A69-43548

PERMEATING

Gel permeation chromatography of nominally linear aliphatic polyesters, using tetrahydrofuran solvent at 37 degrees C
21 p3670 A69-39806

PERMUTATIONS

Fast Fourier Transform connection with circulant and permutation matrices for case with discrete time sample number equal to discrete frequency samples
23 p4182 A69-41761

PEROVSKITES

High pressure synthesis of dense ferrimagnetic perovskite allotropic form of yttrium-iron garnet
08 p1372 A69-20372

Spontaneous polarization onset in perovskite ferroelectrics, analyzing influence of Curie point, Jahn-Teller effect and atomic structure
22 p3995 A69-41159

PEROXIDES

NT HYDROGEN PEROXIDE

Perhydroxyl radical electron spin resonance spectrum in solution of hydrogen peroxide and water at 77 K, noting g factor, hyperfine splitting and molecular structure
01 p0024 A69-10683

Photolysis of t-butyl iodide at low temperatures as source of t-butyl peroxy radicals for synthesis of peroxides
07 p1073 A69-18375

Pseudosplitting/peroxide mechanism for O reduction at fuel cell cathodes, analyzing O molecule adsorption, H bonding and electron transfer at surface
16 p2748 A69-32809

PERSEID METEORIDS

Radar and photographic studies of meteors from Leonid and Perseid showers, presenting velocities, luminescence and ionization
10 p1783 A69-23895

Visual and photographic observations of Perseids meteor trails velocity noting discrepancy
13 p2353 A69-28035

Lyrid and Perseid meteor spectra for spectral line identifications in 3100-4000 A UV range, listing lines from six neutral atoms and five ions
15 p2700 A69-31500

PERSONALITY

Personality factors and job performance ratings relationship in radar controllers, computing Pearson correlation matrix based on age, education, motivational distortion, etc
21 p3665 A69-39169

PERSONALITY TESTS

External observer effect on human behavior during sensory deprivation tests conducted in isolation chambers as factor in estimating personality
02 p0200 A69-11516

Psychiatric study of master attack carrier aviators inability to fly, considering adult situational reaction diagnosis
03 p0369 A69-12883

Characteristics of accident experienced pilots based on personality and psychological tests
06 p0876 A69-18033

Military flying career choice as neurotic compensation for personality defects, stressing personality screening during interview
12 p2023 A69-26492

Personality characteristics of jet pilots measured by Edwards Personal Preference Schedule, including percentile norms table
14 p2408 A69-29294

Pilot selection procedure emphasizing integration of all-around personality picture from different approaches
24 p4278 A69-43395

PERSONNEL

NT AIRCRAFT PILOTS
NT ASTRONAUTS
NT COSMONAUTS
NT FLIGHT CREWS
NT FLIGHT SURGEONS
NT FLYING PERSONNEL
NT GROUND CREWS
NT INSTRUCTORS
NT MEDICAL PERSONNEL
NT OPERATORS [PERSONNEL]
NT PHYSICIANS
NT PILOTS [PERSONNEL]
NT PROGRAMMERS
NT QUALIFICATIONS
NT SCIENTISTS
NT SPACECREWS
NT TEST PILOTS

Industrial loyalty and trade secrets, discussing preservation of forms of intellectual property posed by mobile employee and management policies
01 p0180 A69-10991

Organizational identification of scientists as professional employees, exploring degree of loyalty and perceived self prestige
21 p3855 A69-38765

PERSONNEL DEVELOPMENT

Complex piloting simulation including fatigue for optimizing man machine synergy, emphasizing human adaptability and computer precision and speed
12 p2025 A69-27083

Reliability management simulation exercise training technique for government personnel, discussing decision making in development, production, testing and field usage of systems
18 p3117 A69-34487

Civil aviation center for R and D in aviation personnel education and training
[AIAA PAPER 69-785] 19 p3453 A69-35597

Air and space research at Goettingen Aerodynamic Testing Institute
19 p3295 A69-36684

Automated programmed instruction /API/ for training backup interceptor control personnel to conduct air defense operations
[AIAA PAPER 69-956] 22 p3905 A69-40338

PERSONNEL SELECTION

NT PILOT SELECTION

Human factors in aircraft systems, discussing personnel selection throughout design and manufacturing phases
01 p0019 A69-10449

Long range management forecasting by Delphi technique, describing expert panel selection, composite group replies and successive revisions
01 p0180 A69-11250

Essential hypertension in selection and evaluation of airline pilots, discussing use of thiazide therapy
06 p0875 A69-17850

Systolic murmurs and flight personnel evaluation, noting phonocardiographic definition and tracings of specific systolic murmurs
09 p1445 A69-2272

Value engineering application to engineer recruiting phase of industrial relations
13 p2382 A69-28090

Behavioral differences between engineers and scientists with reference to work environment
15 p2721 A69-31073

Vestibular function tested with angular acceleration, applying semicircular canal reflexes for flight crew selection and appraisal
20 p3481 A69-37271

Vestibulometric tests for flight surgeon appraisal of applicants in flying profession, comparing Coriolis forces cumulative load tests with conventional tests
20 p3481 A69-37278

Human factors methods importance in nonmilitary flight simulation training, discussing cost factors and skills evaluation
22 p3894 A69-41138

Retarded voice tests apparatus using graphical recording to determine intensity of deformations by autoaudition, considering application to recruitment investigation
24 p4270 A69-42604

Personnel training and selection systems, applying information processing models to diagnostic testing in job classification for performance improvement
24 p4274 A69-43020

PERSONNEL SUBSYSTEMS

Isolation of scientific and technical personnel and effect on lateral communication and intellectual cross fertilization in research and development program
11 p2004 A69-25303

Algorithm minimizing personnel number and training costs to meet uncertain skill requirements, applying to army aviation contingency force training composition
[AAS PAPER 69-116] 24 p4271 A69-42818

PERSPIRATION

Insensible water loss from human skin as function of ambient vapor concentration using IR gas analysis, applying results to water loss model revision
23 p4077 A69-41293

Human sweat glands reflex responses to diverse skin cooling rates in hot room, discussing bath temperature step decrease effect on lower limb
23 p4082 A69-41446

PERT

Survival of PERT/Cost technique without government impetus noting advantages for planning, monitoring and controlling technical performance objectives
01 p0180 A69-1125

ESRO 1 project management and organization, discussing cost control, time saving, program evaluation and review system /PERT/, etc
13 p2382 A69-27750

PERTURBATION

NT ORBIT PERTURBATION

NT SATELLITE PERTURBATION

Lifting rotor blades flapping response to atmospheric turbulence, discussing time averaging and perturbation schemes
[AIAA PAPER 69-206] 07 p1057 A69-19577

Motion stability over finite interval of time for perturbed mechanical systems
09 p1539 A69-21881

Singular perturbations for Cauchy and boundary value problems, considering differential operators and Hilbert space
10 p1720 A69-23635

Turbulence formation in conducting liquid at increasing Reynolds numbers, discussing cause of spontaneous magnetic field appearance
11 p1955 A69-24392

Sound generation by unsteady rotational flow as singular perturbation problem solved by matched asymptotic expansions, discussing flow and radiation fields
13 p2299 A69-28187

Wall flows and wake laws validity analyzed by wall balance technique, considering boundary layers under perturbation and core flow restrictions
13 p2251 A69-28633

Collisionless stability of relativistic, spherically symmetric star clusters against radial perturbations, considering one dimensional sufficient criteria
15 p2691 A69-30765

Monograph on dynamic behavior of jet engines especially during perturbations based on linear theory
15 p2671 A69-30931

Attenuation of small perturbations in shape of plane shock wave propagating into uniform medium in presence of rigid or interfacial boundaries
15 p2592 A69-31145

Microwave holograms generated by spinning dipole field perturbation technique, showing zone plates and moire fringe resolution
19 p3315 A69-36824

Thermal neutron flux perturbations in cylinders in test reactors, using regression analysis to obtain polynomials for flux perturbation, depression, self shielding factors, etc
20 p3575 A69-38274

Turbulence formation in conducting liquid at increasing Reynolds numbers, discussing cause of spontaneous magnetic field appearance
24 p4390 A69-43782

PERTURBATION THEORY

Optical pulse generator consisting of solid state laser with saturable absorber at cavity end using perturbation theory and Maxwell equations
01 p0089 A69-10179

Exact solution for coupling effects between two waves with complex coupling function, defining region of validity for earlier perturbation theory
01 p0027 A69-10252

Ground state energies of HeH divalent ion, comparing perturbation calculation values with variation-perturbation technique
01 p0123 A69-10547

Cost prediction equations used in perturbed environment of learning curves subjected to design change in industry
01 p0180 A69-10652

Figures of merit for polycrystalline uniaxial antiferromagnetic materials, for nonreciprocal devices at millimeter and submillimeter wavelengths, calculated from perturbation theory
[IEEE PAPER 17.11] 01 p0045 A69-10720

Matrix technique for transformation of equation of motion into first order equation in analyzing perturbation forces producing mechanical oscillations
01 p0170 A69-10827

Perturbations on major axes of slow moving comets in nearly parabolic original orbits by fast moving stars, discussing statistics of stellar encounters
01 p0153 A69-10871

Linearized perturbation treatment developed for photochemical and dynamical effects in gravity wave production of E-region ionospheric irregularities, including ion convergence
01 p0073 A69-11175

Secular perturbations produced by comet belt beyond Neptune on orbits of periodic comets of large aphelion
01 p0158 A69-11327

Singular perturbation method for reducing order of mathematical models in optimal sensitivity control problems
02 p0224 A69-11967

Alfven wave propagation in nonhomogeneous systems for relativistic MHD, discussing magnetic and velocity perturbations
02 p0290 A69-12254

Comparison of trajectories in optimum linear perturbation guidance
02 p0279 A69-12546

Equations of motion for arbitrary first order perturbations around any spherically symmetric metric
02 p0328 A69-12730

Nonlinear weak shock wave diffraction around convex angled corners in polytropic inviscid thermally nonconducting gas
03 p0412 A69-12848

Transport phenomena in crossed electric and strong magnetic fields, developing semiclassical and quantum treatments
03 p0473 A69-12926

Saturn ring gravitational field perturbations of space vehicle orbit on flyby mission solved by particle motion perturbation theory
03 p0508 A69-13260

Second order frequency dependent polarizabilities calculated by double perturbation theory
03 p0472 A69-13314

Double perturbation theory, deriving interchange theorem for polarizabilities at complex valued frequencies and formulation without assumption of existence of unperturbed Hamiltonian
03 p0472 A69-13315

Symmetric baroclinic instability role in Jupiter equatorial acceleration
03 p0508 A69-13347

Hansen planetary theory basic function, discussing perturbations expansion into trigonometric series
03 p0514 A69-13781

Unperturbed tube flow theory extended to flow through short axisymmetric tube
03 p0419 A69-13969

Upper bound for free energy of nonlocal superconductor in magnetic field, using variational method and perturbation theory
03 p0491 A69-13971

Satellite nonlinear spatial oscillations about center of mass during circular orbit, using perturbation theory and analog computer
04 p0665 A69-14270

Matrix perturbation method for hyperstatic structure modification by combining original solution elements with data on modification
04 p0668 A69-14380

Book on qualitative theory of sampled data systems
04 p0630 A69-14563

Two dimensional turbulent jet in uniform parallel stream, developing coordinate type perturbation expansion and applying series truncation method to predict downstream development
04 p0588 A69-14713

Perturbation method determination of gravitational induction for quasi-static axisymmetric systems
04 p0661 A69-15190

Laminar mixing of two semiinfinite parallel streams, deriving equations and boundary conditions by applying perturbation technique
05 p0744 A69-15714

Stationary solutions of Vlasov equation with external electric fields and BGK collision terms, using perturbation theory in moving frame
05 p0801 A69-15745

Asymptotic expansion of solution to linear singular perturbation problem of elliptic type in bounded strictly convex domain
05 p0786 A69-15928

Regularization of perturbed Keplerian motion in three dimensional space by means of Levi-Civita transformation generalized to three dimensions
05 p0827 A69-16602

Atomic Li photoionization cross sections calculated with Brueckner-Goldstone many body perturbation theory
06 p0961 A69-17134

Spectral line shapes broadened by electron impacts, taking into account contribution of radiation produced by perturbing electrons
06 p0961 A69-17136

Linear equations for three dimensional perturbations in boundary layer of viscous incompressible fluid flow on plane surface, discussing Tollmein-Schlichting waves
06 p0909 A69-17329

Spacecraft optimum low thrust trajectory analyzed by Hamilton-Jacobi perturbation theory, obtaining canonic constants of motion
06 p1007 A69-17574

Unperturbed Hamiltonian transformation applied to existing perturbation theories for exchange forces between atoms to obtain correct long range behavior
07 p1184 A69-18288

Linear differential system with boundary conditions, obtaining equivalent Fredholm integral equation and perturbation theorem
07 p1173 A69-18729

Perturbation methods for exchange and Coulomb energy of hydrogen molecule, calculating Hamiltonian by wave function
07 p1186 A69-19446

Numerical method for three dimensional boundary layer equations, applying perturbation technique and independence principle to rotating flat blade
[AIAA PAPER 69-227] 07 p1051 A69-19560

Positive column in longitudinal magnetic field in helium and neon, noting agreement with collision diffusion theory and Kadomtsev perturbation theory
08 p1361 A69-20212

Perturbation method in rectangular coordinates based on motions of Galilean satellites of Jupiter applied to nearly circular orbits of quasi-resonant systems
08 p1390 A69-20275

Stability and perturbation theory of abstract Cauchy problem with difference scheme, showing application to parabolic differential equations
08 p1343 A69-20537

Singular perturbation problem for elliptic linear partial differential equation, studying asymptotic expansion of solution in vicinity of singular points in nonconvex domain
08 p1352 A69-20751

Linear perturbation theory to predict instability threshold conditions caused by electric field in poorly conducting liquid subject to vertical temperature gradient
08 p1352 A69-20790

Perturbation theory for branching analysis of perfect and imperfect discrete conservative structural systems
08 p1417 A69-20822

Doppler effect in ionospheric acoustic perturbations caused by strong ground explosion, noting accord with nonlinear acoustic wave propagation theory
09 p1488 A69-21694

Perturbation theory for analyzing nonlinear boundary value problems
09 p1540 A69-21894

Uniformly rotating star models within first order perturbation theory in convective equilibrium and with radiation pressure, discussing radiative and gas pressure ratio
09 p1606 A69-22422

Analytical method for perturbations by spherical and cylindrical shock waves flowing toward common center
10 p1677 A69-22899

Subsonic channel flow of frictionless barotropic gas through oscillating grid, investigating perturbation velocity field and aerodynamic forces on airfoils
10 p1631 A69-22905

MHD first order partial differential equations used to investigate wave front between perturbed and unperturbed flow regions in magnetosonic propagation through homogeneous medium
10 p1727 A69-23090

Self consistent perturbation procedure for stationary homogeneous turbulence of incompressible fluid
10 p1680 A69-23648

Diakoptics applied in combination with perturbation method to determine natural frequencies of turbine buckets coupled by tie wires and/or cover
[ASME PAPER 69-VIBR-57] 10 p1804 A69-24151

Transport coefficients for almost Lorentzian mixture, computed as perturbation to coefficients for true Lorentzian mixture, compared to Chapman-Enskog method results
11 p1997 A69-24286

Perturbation theory applied to emitting density matrix in nonlinear polarization of resonance media, considering gas laser in coaxial magnetic field
11 p1895 A69-24630

B, L coordinates for mapping geomagnetically trapped particles distribution computed by perturbation method, using perfect dipole as zero order approximation
11 p1949 A69-24861

Perturbations of Volterra integral equation with vectors in n-dimensional real or complex Euclidean space, comparing solution with linear system solution
11 p1909 A69-24886

Boussinesq approximation for compressible fluids, discussing perturbation pressure and velocities and vertical scale motions
12 p2061 A69-26013

Perturbation theory of nonlinear control systems with periodic coefficients and small perturbation terms, exemplifying satellite attitude control
12 p2173 A69-26067

General perturbation theory for branching analysis of discrete structural systems, considering elastic post-buckling
12 p2179 A69-26213

Quasi-stochastic nonlinear one dimensional oscillations in periodically disturbed field applied to celestial mechanics of planetoids
12 p2130 A69-26373

Perturbation analysis in dielectric loaded rectangular waveguides, considering scattered modes and phase progression
12 p2039 A69-26381

London-van der Waals interaction energy of symmetric molecular pair calculated in perturbation theory

second order as infinite series in negative powers of separation
12 p2131 A69-26606

Gravity perturbations in Earth external field, treating anomalous potential using Green integral formula and spherical harmonics
12 p2077 A69-27139

Perturbation theory of antiplane elastoplastic deformations based on plasticity theory, considering circular hole in body under uniform shear
13 p2359 A69-27263

Rayleigh-Taylor instabilities in two fluid hydraulic model, noting perturbation direction and Lorentz forces effects on instabilities growth time
13 p2310 A69-28033

Perturbation method for nonlinear panel flutter at high Mach numbers, using von Karman large deflection plate theory and quasi-steady aerodynamic theory
13 p2364 A69-28204

Atmospheric ozone vertical distribution and total amount determined by radiative transfer and perturbation theory, presenting error analysis
13 p2255 A69-28493

Autonomous and nonautonomous transient processes in conservative and nonconservative nonlinear systems, deriving equations describing perturbations under loads, solving by asymptotic method
13 p2300 A69-28529

Secular instability of steadily rotating stars, analyzing meridional motions in radiation zones by linear perturbation theory
13 p2354 A69-28566

Weakly divergent intense light beam propagation in laminar optically inhomogeneous medium with self focusing possibility analyzed by perturbation theory
13 p2223 A69-28568

Galactic formation in Lemaitre universe from statistically probable density fluctuations, using perturbation theory and Newtonian cosmology
14 p2520 A69-29373

Eigenvalues of finite matrix Hamiltonian, considering convergence radius of perturbation series, limits and renormalization
14 p2470 A69-29451

Phase screen technique for deriving statistical characterizations of perturbations imposed on wave propagating through random medium applied to remote probing
14 p2414 A69-29511

Perturbed molecular distribution in translational and internal degrees of freedom in dilute chemically reacting gases with low ion concentrations
14 p2410 A69-29988

Density perturbation mode in Lifshitz relativistic theory for expanding universe gravitational instability, adopting Lagrangian coordinate condition to eliminate physically meaningless solution
15 p2652 A69-30203

Perturbation analysis for error estimates in algebraic eigenvalues and eigenvectors problems for solving skewed membrane vibrations
15 p2703 A69-30211

Plane planetary orbits construction extended to nearly circular and quasi-plane orbits by generalizing perturbations method to problems in space
15 p2690 A69-30622

Plane incompressible fluid interface stability in presence of transverse electric field, deriving equation of motion for perturbation amplitude
15 p2652 A69-30911

Perturbation formula for frequencies as function of Poisson coefficient, considering vibration modes of elastic body subject to boundary conditions
15 p2713 A69-31097

Asymptotic Liapunov stability of perturbed solutions to weakly coupled multifrequency systems
15 p2654 A69-31258

Vlasov-Poisson equations reformulation by arbitrary transformation to velocity variable, considering time or space secularity of perturbation theory
16 p2817 A69-31642

Particle-wave interaction in weak turbulent plasma in presence of uniform magnetic field, applying perturbation theory arbitrary order
16 p2819 A69-31683

Perturbation theory for nonlinear oscillations in ionized plasma, treating electron-neutral collisions effect by Boltzmann-Vlasov equation relaxation term, noting distribution function
16 p2820 A69-31702

Eigenvalues for class of nonself adjoint differential equations system treated as small perturbation of norm epsilon, assuming perturbation expansion
16 p2812 A69-31811

Perturbation solutions for planar cylindrical and spherical blast waves in air, considering third and fourth order approximations
16 p2770 A69-31900

Hansen method of partial anomalies for cometary orbits applied to comet Encke perturbed by earth and compared with perturbations by numerical integration
16 p2863 A69-32400

Weak nonlinear hydromagnetic waves in cold collisionless plasma, using nonlinear perturbation method
17 p3010 A69-32866

Monograph on interaction between flow and sound fields as singular perturbation problem, using matched asymptotic expansion
17 p2949 A69-32998

Star motion perturbations by invisible body, stressing bright bodies invisible by position near perturbed star
17 p3034 A69-33407

Wave propagation in two dimensional anisotropic media with several perturbation speeds, using Lundquist linear equations ensuring lacunas presence
17 p2925 A69-33841

Perturbation procedures applied to energy computation for ground and first excited state of hydrogen molecule at large separation
17 p3009 A69-34170

Wave propagation in gas particle flow, obtaining fourth order particle differential equation from perturbation theory
18 p3121 A69-34772

Electromagnetic wave scattering and depolarization by horizontally weakly inhomogeneous medium, using small perturbation method
18 p3101 A69-34788

Plane light wave propagation in homogeneous isotropic medium with fluctuating dielectric constant using perturbation theory and integrating energy conservation law
18 p3173 A69-35127

Fluctuations evolution in density perturbations analyzed to obtain free fall and free expansion universe models, showing no difference between expanding and static Newtonian universes
18 p3203 A69-35347

Bogoliubov averaging method of perturbation in wave mechanics for radiation and matter interaction, considering monochromatic and broad spectral incident wave for resonance study
18 p3175 A69-35483

Polynomial approximations in perturbational navigation and guidance schemes including Chebyshev and least square approximations
19 p3368 A69-35664

Perturbation technique application to stability criterion for rectilinear missile flight with arbitrary inclination, noting mass reduction and flow and gravity effect
19 p3429 A69-35779

Single junction vacuum thermocouple measuring thermal beam effect with reference to velocity distribution perturbation in molecular beam scattering
19 p3376 A69-36173

Coordinate perturbation and second order solution for early collapse phases of cylindrical or spherical detonation wave in equimolar acetylene-oxygen mixture
19 p3449 A69-36354

Clamped uniformly loaded rectangular plate large deflection elastic behavior approximate analysis, using perturbation method
20 p3620 A69-36998

Trajectory optimization of space vehicle with continuous thrust based on regularized equations, comparing perturbation method for earth-Jupiter rendezvous transfer
20 p3595 A69-37173

Perturbation matrix derivation in rectangular coordinates using Sitarsky two body variational equation for all motions
20 p3568 A69-37200

Trigonometric polynomials representing perturbation function and derivatives in three body problem
20 p3596 A69-37315

Hill method applied to motion theory for minor planet 11 Parthenope using computerized first order perturbations from principal planets
20 p3596 A69-37316

Singular perturbations and boundary layer theory for approximating solutions to simple ordinary differential equations
20 p3515 A69-37583

Perturbed motion of solid body containing axisymmetric cavities partially filled with ideal incompressible

fluid, solving boundary value problems of fluid oscillations
20 p3518 A69-38296

Gaseous rotating stars radial oscillations by perturbation method, considering angular velocity effects
21 p3795 A69-38470

Perturbation solution in power and asymptotic series for initial collapse phases of impulsively generated converging cylindrical and spherical shock waves in perfect gas
21 p3692 A69-38688

Nonlinear electromagnetic wave propagation by perturbation method previously employed to treat nonlinear boundary value problems involving partial differential equations
21 p3677 A69-39465

Impulsive velocity correction determination method for precise stationkeeping of stationary satellite, discussing perturbations
21 p3817 A69-39757

Periodic solutions of differential equation as example of locking in of frequencies, developing mapping procedure for perturbation methods application
22 p3979 A69-39894

Thermal perturbation propagation in nonlinear medium, considering thermal relaxation effects
22 p4051 A69-40712

Stueckelberg formulation for transition probabilities to interpret perturbation effects in elastic scattering differential cross section measurements
22 p3987 A69-41005

Magnetospheric natural toroidal oscillation periods solved by expression from perturbation method given by Landau and Lifshits where WKB method inapplicable
23 p4157 A69-41863

Linear diffraction equations in electronics in self consistent formulation reduced to complex transcendental equations, using perturbation method
23 p4124 A69-42033

Perturbation velocity potential of unsteady potential flow of barotropic gas past cascade of thin blades oscillating harmonically
24 p4244 A69-42716

Free convection from vertical surface using perturbation method
24 p4407 A69-42916

Mechanical model for dynamic buckling of elastic imperfection-sensitive structures under step loading, using perturbation method
24 p4405 A69-43656

Rotational microwave spectrum of 2-methylfuran, using fourth order perturbation method for internal rotation A-E doublet splittings
24 p4280 A69-43811

Many body perturbation theory with time dependent perturbations applied to frequency dependent polarizability of atomic oxygen
24 p4354 A69-43816

PERVEANCE

Convergent high-perveance electron gun design for use in microwave tubes, reducing anode aperture effect on current density
07 p1101 A69-18658

Space harmonics effect on helical TWT design, discussing operating voltage, beam radius, perveance and maximum allowable gain
07 p1105 A69-18950

PETN

Slowly exploding wires for igniting self sustaining deflagrations in PETN, RDX, HMX and tetryl, comparing circuit parameters for detonation initiation
01 p0141 A69-10678

Capacitance-voltage relationships for PETN initiation by various diameter gold exploding bridgewires, noting optimum capacitance dependence on energy transfer efficiency
01 p0141 A69-10679

PETROGRAPHY

Meteoritic extraterrestrial materials sampling for chemical, petrographic and metallurgical analyses, discussing microstructure and optimum specimen weight for representative analysis
01 p0150 A69-10480

Subsolidus equilibrium study in potassium tantalate K niobate system for dry and hydrothermal runs, using X ray powder diffraction and petrography
08 p1332 A69-20373

Chemical analysis and paragenesis of manganese ilmenite from Sierran adamellite using electron microprobe
19 p3302 A69-35977

Terrestrial planets high temperature evolution from solar system genesis theory, discussing meteorite chemical composition, petrography, mineralogy and age determination
19 p3407 A69-36079

Sharps chondrite chemical, petrographic and mineralogical studies suggesting formation from complex and repetitious high temperature events and agglomeration processes
19 p3408 A69-36086

Carbonaceous meteorites specimen petrographic observations, noting genetic interrelations with urelites regarding S-C and reduced Fe oxidized Fe ratios
19 p3413 A69-36112

Early Precambrian Onverwacht microstructures studied in petrographic thin sections and powdered preparations for possibility of oldest terrestrial fossils
24 p4263 A69-43221

PETROLEUM
U CRUDE OIL

PETROLOGY
NT PETROGRAPHY

Oxygen partial pressure, temperature and olivine composition related, determining distribution coefficient of Fe and Mg between olivine and pyroxene
03 p0516 A69-14082

Indium abundances in chondritic and achondritic meteorites and terrestrial rocks determined by radiochemical neutron activation analysis
08 p1404 A69-20917

C3 and C4 carbonaceous chondrites origin, evolution and classification based on mineralogic and petrologic data
19 p3413 A69-36109

Petrology, mineralogy and phase composition of Siena chondrite, interpreting meteorite as ignimbritic rock or welded tuff
20 p3602 A69-37534

Petrology of Czechoslovak moldavites, tabulating properties, mapping locations and distribution
23 p4210 A69-41350

Thermal conductivities /K/ of rock forming minerals reveals K as linear function of density for constant mean atomic weight
24 p4310 A69-43216

PFM [MODULATION]
U PULSE FREQUENCY MODULATION

PH

Nickel maraging steel polarization behavior in acidic solutions, noting corrosion potential dependence on pH
13 p2282 A69-28188

Fluorescence properties of nucleotides, polynucleotides and phosphorylated derivatives as function of temperature, pH and ionic strength
22 p3898 A69-41078

Hyperventilation induced hemolysis in dogs measured as function of exposure time, body temperature and blood pH
22 p3887 A69-41192

Severe heat stress effects on respiratory frequency, rectal temperature, blood gases and pH of conscious dog
23 p4081 A69-41432

EEG, ocular movements, gastric mobility and pH during human sleep from data transmitted by swallowed radio transmitter
23 p4093 A69-42063

DNA denaturation without variance from pH 7.0 by adding NaOH observed with viscosity measurements, obtaining similar results with hydrochloric acid
24 p4263 A69-43225

PHANTOM AIRCRAFT
U F-4 AIRCRAFT

PHARMACOLOGY

Pharmacological tools in autonomic nervous system research, discussing norepinephrine biosynthesis, storage, release and inactivation in mammals
02 p0200 A69-12722

Pharmacology for long term manned space flights
13 p2211 A69-28613

PHASE COHERENCE

Incoherent scatter power measurements, comparing square law signal detection, phase coherent receiver and parametric amplifier methods
07 p1085 A69-19222

TEM mode networks design for producing phase coherent pulse modulated microwave signals through spectrum S band
13 p2234 A69-28073

Laser pulse development dynamics taking into account phase relations between field and active medium polarization
17 p2983 A69-33695

Block coded telemetry systems design for phase coherent space communication employing double conversion superheterodyne phase locked receivers
19 p3277 A69-36487

Split phase PCM code modulated carrier transmission characteristics determined for amplitude, phase and frequency shift keying, assuming random bit pattern and noncoherent modulation
21 p3676 A69-39451

Holographic technique of coherent light field transformation with desirable phase distribution from laser light beams of arbitrary wavefront characteristics
22 p3950 A69-41115

PHASE CONTRAST

Holography applied to schlieren and phase contrast methods to enable visualization of minute phase change in light scattering object
08 p1313 A69-20176

Optical data processing techniques and phase contrast method variations for statistics of surface roughness
12 p2079 A69-25910

Vibrating surface relative phases visual observation by introducing small rotation between exposures of stroboscopic hologram
20 p3546 A69-38123

PHASE CONTROL
NT COUPLING CIRCUITS

Automatic phase control effective bandwidth determined by asymptotic method, presenting computer calculated dependence on circuit parameters
01 p0030 A69-10590

Phase modulator with phase locked loop oscillator as phase shifter, discussing unit cascading effect
05 p0729 A69-15965

Earth effect on signal correlation in space diversity microwave reception antennas, analyzing vertical separation and out of phase signals
05 p0720 A69-16530

Automatic phase control and transient processes in resonant amplifier in presence of phase discontinuities of input signal
05 p0721 A69-16533

Quasi-optical transmission lines having composite correction devices with/without phasing devices
05 p0723 A69-16784

Final stage of three phase DC/AC converter, noting three phase control circuit for power stages with germanium transistors
08 p1285 A69-20381

Automatic phase control effective bandwidth determined by asymptotic method, presenting computer calculated dependence on circuit parameters
10 p1653 A69-23105

Digital phase shift control of locked oscillator
12 p2052 A69-26382

Microwave bandpass linear phase filters design and synthesis for simultaneous flat amplitude and delay response
16 p2759 A69-31941

Earth effect on signal correlation in space diversity microwave reception antennas, analyzing vertical separation and out of phase signals
16 p2753 A69-32472

Automatic phase control and transient processes in resonant amplifier in presence of phase discontinuities of input signal
16 p2753 A69-32474

Phase and amplitude stability measurements in airborne pulse Doppler radar
20 p3492 A69-37711

Automatic phase control system stability range determination in piecewise linear approximation and in presence of proportional integrating filter
22 p3918 A69-40956

Symmetrically regulated AC/DC converters power characteristics improved by switching in phase rectifiers twice during control cycle
24 p4254 A69-42570

PHASE DEMODULATORS

Digital nth order phase locked loop for FM demodulation
04 p0561 A69-15452

PHASE DETECTORS

Digital phase locked loops synthesis for fading and sequential phase estimation in decoder using digital computation
03 p0388 A69-13178

Optimum receiver structure for estimating PSK information signal phase derived together with matched filter detector performance
03 p0403 A69-13203

PHASE DETECTORS

Simultaneous passage of useful and noise signals through differential frequency discriminator, determining spectrum by phase detection and detuned circuits
04 p0556 A69-14462

Optimum conditions for signal analysis determined for symmetrical binary communications channel with unknown signal phase
04 p0556 A69-14492

Phase method of photoelectric registration of stellar transition moments
04 p0601 A69-15252

Bit error probability estimation of NRZ PCM synchronizer and detector operating in presence of fluctuating data frequency source
07 p1083 A69-19121

Statistical analysis of cascade of bandpass limiter, ideal phase detector and video filter for mathematical modeling of coherent communication systems
07 p1084 A69-19147

Lock range and threshold defined, presenting experimental results for phase lock loop systems having modified nth order antilock phase detector [IEEE PAPER 67-TP-1178-COM]
10 p1663 A69-23531

Computer generated kinoform optical element operating on phase of incident waves and forming wave front reconstruction single image
10 p1697 A69-23867

Ionospheric plasma density vertical profile by measuring reflected radio waves phase frequency characteristics
12 p2070 A69-26685

Phase analysis in multiple-sensor receivers with high signal to noise ratio, considering phase difference between two stochastic input signals
13 p2220 A69-27938

Simultaneous passage of useful and noise signals through differential frequency discriminator, determining spectrum by phase detection and detuned circuits
14 p2410 A69-28833

Pull-in performance of phase locked loops with phase comparator having asymmetric triangular characteristic
14 p2413 A69-29482

Plasma diagnostics FM phase meter circuits tests, considering raster phase indicators, phase detectors and frequency integrators
14 p2497 A69-29797

Design and operation of two frequency phase meter for plasma diagnostics, using frequency modulation of microwave oscillator and waveguide bridge
14 p2451 A69-29798

Phase measurements at IF in microwave plasma diagnostics, examining phase stabilization processes
14 p2452 A69-29805

Signal phase measurement accuracy by discrete phase technique ensured by using wideband signals and automatic control of input SNR
15 p2574 A69-30130

Instrumental accuracy of discrete filter during measurement of initial phase of signal dependent on phase structure
15 p2574 A69-30139

False alarm stabilization circuits efficiencies compared in unsteady Gaussian noise, considering phase autocorrelator performance
15 p2567 A69-30342

Amplifier working in conjunction with solid state phase sensitive detector replacing existing commutator in Dobson ozone spectrophotometer
16 p2792 A69-32641

Vibrating objects phase determined by time average and real time holographic interferometry
17 p2974 A69-33324

Discrete information transmission synchronization in communication systems concerning optimal signal detection, HF, phase and coded synchronization, etc
18 p3104 A69-35264

Integrating filter analysis for effect of phase detector sawtooth characteristics on locking range of phase locked oscillator
20 p3486 A69-37011

Optimum phase reference detector obtained at low SNR with Costas loop for fully modulated PSK signals
20 p3492 A69-37710

Automatic phase control system stability range determination in piecewise linear approximation and in presence of proportional integrating filter
22 p3918 A69-40956

Digital transition tracking symbol synchronizer for low SNR coded telemetry systems, discussing phase locked loop analysis and phase detector simulation by Monte Carlo method
23 p4130 A69-42513

Cascaded limiter and phase detector, analyzing SNR transfer characteristics for specific PM signals
23 p4131 A69-42525

Laser cavity modes phase equality demonstrated by oscilloscope trace in two photon fluorescent method
24 p4327 A69-42981

PHASE DEVIATION

Coherence ratio of ionospherically propagated radio waves measured for phase difference between pairs of antennas
01 p0032 A69-10967

Directional antennas gain loss on ground sections calculated on basis of difference-phase measurements data
02 p0214 A69-11612

Anisotropically conducting spiral cone current phase distribution applied to frequency independent antennas analysis, discussing spiral motion and field azimuthal dependence effects
03 p0408 A69-14133

VLF radio wave phase time or motion variation emanating from ground based source at arbitrary point on earth
07 p1123 A69-18816

VLF diurnal phase change observations, showing deviations from theoretical first mode and second mode dominance
07 p1078 A69-18912

Common mode rejection technique to determine phasing differences in digital systems by measuring pulse delay
09 p1463 A69-21896

Directional antennas gain loss on ground sections calculated on basis of difference-phase measurements data
11 p1847 A69-24719

Phase analysis in multiple-sensor receivers with high signal to noise ratio, considering phase difference between two stochastic input signals
13 p2220 A69-27938

Phase distortion, conversion of delay coefficients into channel noise and determination of waveguide delay coefficients for FM satellite communication systems
[IEEE PAPER 68-TP-382-COM]
13 p2222 A69-28153

Absolute value type of early-late gate bit synchronizer phase noise performance determined by Fokker-Planck method, comparing results with different circuits performance
19 p3270 A69-36246

Diurnal and seasonal phase-difference fluctuation measurement of radio waves propagating along ground layer caused by atmospheric turbulence
20 p3485 A69-36971

Observation time influence on interferometers resolution limits due to radio wave phase fluctuations
21 p3682 A69-39122

Mode locked laser output intensity, studying effect of random phase variations on pulses
21 p3741 A69-39684

Frequency and phase instability characteristics of negative resistance amplifier due to changes in circuit parameters
22 p3916 A69-40962

PHASE DIAGRAMS

Soviet book on semiconductor compounds, production and properties covering crystal structures, phase diagrams, etc
01 p0137 A69-10353

Thermoelectric properties of GeTe-GaTe system, analyzing phase diagrams, solid solution formation, substitutions and zone structure influence
01 p0138 A69-10404

Solar and geophysical activity during February 1965 and March 1966 indicating geomagnetic activity on 27-day recurrence diagram
01 p0068 A69-11118

Phase diagram of BiTe degenerate semiconductor crystals synthesized by heat treatment, discussing crystallization methods and physical properties
02 p0294 A69-11540

Metallographic analysis of Zr corner structure in Zr-Al-Mo system phase diagram, plotting monovariant and nonvariant equilibria reactions
02 p0261 A69-11840

Zr corner of phase diagrams and microstructure, hardness and microhardness of Zr-Al-Nb system alloys
02 p0261 A69-11841

Zirconium corner of Zr-Al-Cr system phase diagram within concentration limits from 1350-700 C, considering corrosion resistance
02 p0262 A69-11842

Metallographic and radiographic analysis of zirconium corner in Zr-Be-Nb system, discussing phase transformation during quenching
02 p0262 A69-11843

Isothermal sections construction of zirconium corner of ternary phase diagram of Zr-Mo-V system from microstructure of cast and quenched alloy specimens
02 p0262 A69-11846

Structure of zirconium corner of Zr-V-Ni system phase diagram, using metallography, hardness and microhardness methods
02 p0262 A69-11847

Isothermal sections construction of Zr-V-Ni system phase diagram from study of alloys at 1000, 700 and 500 C
02 p0263 A69-11848

Omega phase and beta solid solution in Zr-V-Ta alloys quenched from 900 C
02 p0263 A69-11850

Zirconium corner of Zr-Fe-Nb phase diagram, studying alloy tempering at various temperatures
02 p0263 A69-11851

Zirconium corner of Zr-Cu-Mo phase diagram, using microstructure analysis of hardness and microhardness measurements, discussing plasticity variations and corrosion resistance
02 p0263 A69-11852

Zirconium corner in Zr-Nb-Cu phase diagram, plotting isothermal sections for high temperatures
02 p0263 A69-11854

Zirconium corner of Zr-Mo-Ni phase diagram using metallographic analysis, hardness and microhardness methods, constructing isothermal sections for high temperatures
02 p0264 A69-11855

Zirconium corner of Zr-Nb-Mo system phase diagram, using microstructure, microhardness, hardness and radiographic methods
02 p0264 A69-11856

Isothermal sections of Zr corner of Zr-Mo-Ta system phase diagram at high temperatures, noting composition vs hardness and omega phase
02 p0264 A69-11858

Isothermal sections of Zr corner of Zr-Mo-Ti phase diagram at various high temperatures, noting corrosion resistance in air and water
02 p0264 A69-11859

Isothermal sections of Zr-Ni-Nb system phase diagram at high temperatures, determining principal type of projection on concentration triangle
02 p0264 A69-11860

Isothermal sections of Zr corner of Zr-Nb-Cr system phase diagram at high temperatures, noting variation of stability with concentration
02 p0264 A69-11861

Nickel-rich region of Al-Ni-Y ternary system, emphasizing identification of solid phase equilibria through analysis of equilibrated alloy specimens
02 p0265 A69-12004

Phase diagram and heat resistance relation for ternary titanium alloys, considering component interactions and dissolution and dispersion effects
02 p0268 A69-12357

InAs-InP phase diagram taking into account equilibrium pressure of vapor over melts in preparing single crystals by controlled crystallization
03 p0483 A69-13024

Phenomena in III-V compounds and III-V compound-other compound solid solutions, examining equilibrium phase diagrams
04 p0641 A69-14505

Ferrite-austenitic stainless steels with Ti analyzed during aging at 450-600 C for excess phase nature
04 p0615 A69-14641

Röntgenographic and metallographic examinations for interaction between ZrC and Re in wide range of temperatures and concentrations, discussing phase diagram
04 p0617 A69-14900

Quasi-ternary titanium dichromide-V-Mo system composition at high temperatures, physical properties and phase diagrams
04 p0618 A69-15080

Solid phase equilibria in nickel-aluminum-scandium system at 1000 C
05 p0779 A69-15833

Vanadium-carbon and niobium-carbon binary systems revised phase diagrams, noting effect of sublattice order transformations
05 p0779 A69-15988

Equilibrium stability of horizontal layer of fluid in field of modulated temperature gradient having layer thickness greater than penetration depth of heat waves
07 p1241 A69-18696

Ti-Al-V alloys phase diagrams for isothermal cross sections and polythermal cross sections with constant Al/V ratios
07 p1161 A69-18768

Ti rich Ti-Al-Mo-Zr alloys phase diagrams at high temperatures, noting presence of solid solutions
07 p1161 A69-18769

Ti-Zr-Sn alloys phase equilibria and interaction between titanium stannide and solid solution of Ti and Zr
07 p1162 A69-18770

Heat resistance of Ti-Al-Mo-Zr alloys analyzed by bend tests, discussing phase diagrams
07 p1163 A69-18779

Components relationships in binary phase diagrams of III a and VI a transition metals on basis of electronic structure
08 p1331 A69-20191

Subsolidus equilibrium study in potassium tantalate K niobate system for dry and hydrothermal runs, using X ray powder diffraction and petrography
08 p1332 A69-20373

Phase equilibrium and dynamics of gas volume heated by cosmic rays and cooled by radiation
10 p1760 A69-23136

Phase equilibrium in cast Zr-Re-B and W-Re-B systems using microscopic and X ray analysis
10 p1711 A69-23332

Antenna point and astigmatic sources due to phase centers and phase diagrams relations and antenna caustic curves
10 p1664 A69-23798

Chromium-rhenium-boron ternary system using X ray diffraction and microstructure analysis, establishing phase equilibria at high temperatures
10 p1715 A69-24054

Zr-W high temperature phase relationships, noting Zr-zirconium tungstide eutectic temperature, zirconium tungstide peritectic temperature and Zr solubility in W
11 p1903 A69-24578

Vanadium side of V-Ni phase diagram, using X ray analysis, differential dilatometry, thermal analysis and metallographic methods
11 p1903 A69-24579

Nickel base superalloys long time carbide and intermetallic phases stability at high temperatures
13 p2277 A69-27405

W, Mo and heat treatment effects on phase composition and heat resistance of ferrite and austenitic steels
13 p2283 A69-28487

Phase diagram for physicochemical study of CdSb-Ge cross section of Cd-Sb-Ge ternary system, discussing exo-endothermal fusion effects, microstructure, etc
14 p2503 A69-28975

Chromium-cerium phase diagram determined by differential thermal, metallographic and X ray structural analysis
15 p2640 A69-30666

CR-B binary system phase diagram including lattice parameters, temperature of peritectic decomposition and characteristics of alloys
15 p2641 A69-31185

Multicomponent semiconductor compounds of non-stoichiometric composition, studying structure, behavior and correlation between electrical properties and phase diagrams
15 p2670 A69-31243

Phase equilibria in ternary systems Nb-Fe-B and Nb-Co-B, determining structural types and lattice constants by using X ray and microstructural analysis
15 p2641 A69-31246

TiC-Re phase diagram over wide range of temperatures and chemical compositions
15 p2641 A69-31247

Two component heat pipe operating characteristics on basis of thermodynamic phase equilibrium for binary mixtures
17 p3071 A69-33268

Highly concentrated hydrogen peroxide production, handling and storage, discussing crystallization process, equilibrium diagram, decomposition reduction and stabilizers
17 p3017 A69-33353

Binary Nb-Hf system phase diagram below solidus line noting lattice parameters and oxygen and nitrogen effects on phase equilibrium boundaries
18 p3157 A69-35247

Nb corner of Nb-Mo-Cr alloy phase diagram and oxidizability in air at high temperature
18 p3157 A69-35248

Chromium ternary systems phase diagrams and crystallographic structures, using heat treatment and X ray analysis

18 p3158 A69-35262

Fe-Ni-P phase diagram studies applied to schreibersite and rhabdite formation in iron meteorites

19 p3417 A69-36132

La-Rh system study by powder X ray diffraction, metallographic and differential thermal analysis, constructing equilibrium diagram and determining crystal structure data

21 p3744 A69-38739

V systems applications and phase diagrams, discussing binary metallic systems, Kurnakov law, alloy properties dependence on composition, superconductivity, melting point, etc

22 p3968 A69-39887

Fusibility diagrams for Ti-Ta-Cr by determining specimens melting points after homogenization at various temperatures in argon

22 p3969 A69-40075

Book on phase diagrams for ceramists, 1969 supplement

22 p3971 A69-40782

Phase diagram, dielectric and magnetic properties of Bi manganate/Pb titanate solid solutions of perovskite structure, showing dependence on composition and temperature

22 p3996 A69-41163

Cosmic ray diurnal phase and amplitude variations determined using superimposed records of cosmic ray stations inside limited rigidity region

23 p4204 A69-41481

Ternary diffusion at high temperature in Fe-Co-Ni alloy system covering entire ternary phase diagram, including computed interdiffusion coefficients

23 p4176 A69-41505

Radiation characteristics of dipole on wedge edge with sinusoidal current, discussing spatial phase and polarization calculations by computer

23 p4138 A69-41937

Al-Mn-V ternary system equilibrium diagram at various aluminum concentrations determined by magnetic and microhardness measurements, microstructural observations and X ray analysis

24 p4330 A69-42601

PHASE ERROR

Reliability of eliminating multivaluedness in two scale phase measurement method resolved by algorithm formulated on white Gaussian noise interference

02 p0206 A69-11603

Atmospheric noise amplitude distribution relation to rms phase errors in frequency components of VLF timing pulse

03 p0396 A69-13629

Random phase errors in end-fed linear antenna arrays

04 p0578 A69-15211

Difference schemes implementation through fractional time step and phase error methods reduce dispersion

04 p0591 A69-15282

Commutation antenna arrays with arbitrary amplitude distribution, considering phase error effect

05 p0729 A69-16082

Phase error mean square value in phase lock loop determined from linear differential equations to determine output SNR and noise threshold

05 p0720 A69-16342

Linear antenna synthesis for optimal separation of plane waves providing maximum SNR with allowance for statistical phase distribution of field

06 p0895 A69-17460

Statistical theory of traveling wave antennas for random phase-amplitude distribution of current, discussing phase errors

06 p0898 A69-17797

Statistical aspects of uncertainty function of linearly frequency modulated signals for nonstationary random process of phase errors

06 p0889 A69-17798

Swept-frequency complex return-gain response of injection locked oscillator over locking bandwidth, detecting and correcting phase errors between injection-locked diode oscillators

07 p1100 A69-18645

Single channel binary PSK communication systems performance influenced by degree of RF coherence between transmitter and receiver

07 p1082 A69-19109

Phase error and amplitude and phase modulation in aircraft VOR omni receiver in vicinity of reflecting objects, noting asymmetrical filter effect

08 p1271 A69-19863

Rapidly varying phase error effect on system performance in data detection process due to RF carrier tracking loop

09 p1456 A69-22459

Reliability of eliminating multivaluedness in two scale phase measurement method resolved by algorithm formulated on white Gaussian noise interference

11 p1835 A69-24710

Paraboloidal reflector antennas rms phase error minimization, describing axis location and determination of focus and focal length of best fit paraboloid

19 p3283 A69-35933

PCM bit synchronizer models, discussing phase errors gate and differentiating devices

19 p3271 A69-36249

Optimum power allocation for RF carrier phase error and synchronization error in two channel system

19 p3274 A69-36283

Phase error in synthetic aperture radar, discussing tolerance level, sources classification and effect on average response, resolution and ambiguity function

20 p3490 A69-37642

Phase error in monopulse antenna system attributed to far field background noise sources during passive or active objects tracking

20 p3492 A69-37707

Linear antenna synthesis for optimal separation of plane waves providing maximum SNR with allowance for statistical phase distribution of field

20 p3508 A69-37943

PHASE LOCK DEMODULATORS

Digital simulation of demodulator/tracking phase locked loop of navigation/traffic control satellite system in thermal noise diffuse multipath fading environment

03 p0390 A69-13204

Phase lock loops design with nonlinear filtering elements in low signal to noise region, considering signal demodulation, lock range and threshold

06 p0902 A69-17398

Approximate noise analysis of phase locked loop with signal clipping

08 p1270 A69-19857

Phase locked loop demodulator with quadrature channel modified for decision feedback to detect binary phase shift keyed signals

08 p1270 A69-19859

Phase-lock loop demodulator ability to acquire and remain locked on signal under noise and pulse interference

23 p4145 A69-42230

PHASE LOCKED SYSTEMS

Injection locked oscillator FM receiver consisting of linear mixer and negative resistance oscillator in phase locked configuration, solving receiver output differential equation

01 p0042 A69-10247

Voltage tunable magnetron used in conjunction with ferrite circulator as phase locked amplifier

01 p0045 A69-10632

Liquid lasers compound range of organic type, circulating system of inorganic type and power peaks

01 p0092 A69-11194

Injection phase locking for synchronizing oscillators and reducing FM noise

02 p0220 A69-12450

Low noise high power transistor oscillator using directional coupler, noting isolated port for injection phase locking

02 p0220 A69-12452

Nonlinear mode interactions in spatially inhomogeneous laser, analyzing suppression, phase locking and linear coupling among cavity modes

02 p0258 A69-12632

Synchronization in coded communication systems, considering phase lock loop and square wave correlation function

03 p0383 A69-12871

Digital phase locked loops synthesis for fading and sequential phase estimation in decoder using digital computation

03 p0388 A69-13178

Phase locked loop demodulators for binary PSK signals compared with and without decision directed feedback in presence of CW interference

03 p0409 A69-13201

Pseudorandom radar range /DIOMEDE/ using optical correlator and phase loop

03 p0393 A69-13254

Coherent PSK system in multipath environment /Rician fading and additive Gaussian white noise/ with phase locked loop for coherent reference extraction

03 p0393 A69-13255

Simultaneous phase locking of longitudinal and transverse laser modes in He-Ne laser

03 p0441 A69-14188

Nonlinear phase locked automatic frequency control system dynamics, noting asymptotic stability of equilibrium state in whole

04 p0559 A69-15137

Harmonic balance method to investigate phase locked oscillator stationary modes

04 p0559 A69-15138

Phase locked automatic frequency control system with additional frequency control loop and nonlinear filter in phase control loop, analyzing dynamics

04 p0559 A69-15140

Digital nth order phase locked loop for FM demodulation

04 p0561 A69-15452

Phase locked loop discriminator in threshold region, discussing effects of loop parameters, detuning error and modulation

04 p0580 A69-15471

Phase modulator with phase locked loop oscillator as phase shifter, discussing unit cascading effect

05 p0729 A69-15965

Phase error mean square value in phase lock loop determined from linear differential equations to determine output SNR and noise threshold

05 p0720 A69-16342

Phase measurement using phase lock loop, voltage controlled oscillator and synchronous counter

05 p0722 A69-16766

Signal/noise performance of frequency locked loop FM threshold extension demodulator compared to phase locked loop demodulator and conventional FM discriminator

06 p0886 A69-16934

Q switching and mode locking of neodymium selenium oxygen chlorine liquid laser, discussing power output and nature of pulses

06 p0935 A69-17776

Swept-frequency complex return-gain response of injection locked oscillator over locking bandwidth, detecting and correcting phase errors between injection-locked diode oscillators

07 p1100 A69-18645

Phase locking phenomenon of multitransverse longitudinal modes in He-Ne lasers, discussing mechanism of self locking phenomenon [IEEE PAPER Q-1]

07 p1153 A69-19076

Expected number of spikes of phase locked loop demodulators, extending determination method to FM discriminator threshold and maximum likelihood estimator

07 p1082 A69-19107

Approximate noise analysis of phase locked loop with signal clipping

08 p1270 A69-19857

Phase locked loop demodulator with quadrature channel modified for decision feedback to detect binary phase shift keyed signals

08 p1270 A69-19859

Normal multimode laser action with and without phase locking, using exact steady state solution of Fokker-Planck equation

08 p1325 A69-20291

Phase synchronized oscillators in microwave frequency multipliers with improved SNR

09 p1464 A69-22113

Mode locked laser operation, noting output and applications to optical communication, high speed photography, nonlinear optics and frequency standards

09 p1518 A69-22123

Van der Pol nonlinear oscillation theory adapted to microwave reflex klystrons, explaining locked and unlocked monotonic operational modes

09 p1466 A69-22444

Density functions analytic solution for Fokker-Planck equation representing cascaded phase locked loops

09 p1474 A69-22450

Lock range and threshold defined, presenting experimental results for phase lock loop systems having modified nth order tanlock phase detector [IEEE PAPER 67-TP-1178-COM]

10 p1663 A69-23531

Injection locked oscillator FM demodulator, analyzing signal distortion, intermodulation noise, differential gain and differential phase

11 p1845 A69-24565

He-Ne laser output phase fluctuations between adjacent modes during unlocked and self locked condition, noting cavity optical length short term fluctuations influence

11 p1898 A69-25048

Digital simulation of phase locked receiver in diffuse multipath fading environment with band limited thermal noise

11 p1839 A69-25298

Nonlinear crystal generated second harmonic power measured for multimode He-Ne 0.63 micron self locked laser

12 p2106 A69-26321

Microwave frequency synthesizer for digitally tuned UHF and microwave superhetrodyne receivers, considering phase locking voltage-tuned transistor oscillator

12 p2030 A69-26390

Output power and loss analysis of 2 n injection locked oscillators combined through magic tee hybrids

13 p2232 A69-28061

Noise reduction techniques using injection phase locking and high-Q cavities for HF oscillator high order multiplier and avalanche diode oscillator microwave sources

14 p2420 A69-29458

Pull-in performance of phase locked loops with phase comparator having asymmetric triangular characteristic

14 p2413 A69-29482

Semiconductor technology including radar, Gunn and limited space charge accumulation oscillators, phase locked antennas, data processing and solid state computerization

15 p2581 A69-31521

Multiple mode phase locking of He-Ne laser with fixed cavity length and laser tube fixed position in cavity, generating high speed optical pulses

17 p2980 A69-32957

Phase locked loop with flip-flop error detector compared to analog loop, discussing signal to noise ratio

17 p2931 A69-34115

Neodymium laser emission temporal structure in mode self locking regime with Q switching by saturable filter

18 p3152 A69-35016

Phase locked loop design of desensitized monolithic integrated circuits for FM multiplex signal filtering and demodulation, describing external tuning

19 p3273 A69-36274

Coherent phase locked loop receiver as carrier and modulation loops combination with parallel bandpass filter for ranging signal reception and FM demodulation

19 p3274 A69-36277

Block coded telemetry systems design for phase coherent space communication employing double conversion superhetrodyne phase locked receivers

19 p3277 A69-36487

Lock-on band of phase locked AFC system calculated by asymptotic method, considering frequency integrating filters with nonlinear capacitances

19 p3277 A69-36569

AM phase locked states switching behavior of PM He-Ne lasers, considering isotope mixtures effect

20 p3552 A69-36994

Nonlinear differential equations of injection phase locking solved by Riccati equation, discussing initial frequency offset to loop gain ratios

23 p4119 A69-41742

Phase locked UHF telemetry transponder for missile scoring applications, discussing design and performance

23 p4137 A69-41779

Acoustical holograms phase recording, combining external phase locked electronic reference beams

23 p4166 A69-42180

Digital transition tracking symbol synchronizer for low SNR coded telemetry systems, discussing phase locked loop analysis and phase detector simulation by Monte Carlo method

23 p4130 A69-42513

Laser cavity modes phase equality demonstrated by oscilloscope trace in two photon fluorescent method

24 p4327 A69-42981

PHASE MODULATION

Optimal coherent reception of frequency diversity signals in multipath channels investigated for noise immunity

01 p0028 A69-10375

Radio systems for discrete information transmission, emphasizing phase difference modulation, wideband, universal and adaptive systems

01 p0031 A69-10778

OMEGA radio navigation system optimization, emphasizing implementation of phase modulation to ensure lane identification

03 p0463 A69-13212

Sinusoidal phase modulation role in spectral broadening observed in trapped filaments of laser and Raman light

03 p0442 A69-14189

Phase input power characteristics of TWT, TDA and parametric amplifiers, noting crosstalk calculations and AM-PM conversion coefficients

04 p0573 A69-14336

Phase modulator with phase locked loop oscillator as phase shifter, discussing unit cascading effect

05 p0729 A69-15965

External and internal modulation methods in lasers noting phase, amplitude and frequency modulation, birefringence, electrooptics and Stark and Zeeman effects

06 p0937 A69-18010

High data rate coherent telemetry systems synthesis, discussing multiphase modulation and demodulation to achieve bandwidth requirements

07 p1083 A69-19123

Radio signal from magnetron transmitter, noting slow amplitude phase fluctuations distribution according to log-normal law

08 p1275 A69-20424

Ionospheric scattered radio wave field amplitude and phase variations assessed for diffraction at regular phase screen

09 p1453 A69-21526

Phase characteristics and magnetic mirrors effect on charge motion in spatially periodic magnetic field

09 p1551 A69-22036

Optimum selection of modulation indices for multitone phase modulation by graphical method, noting tolerance insensitivity

09 p1457 A69-22463

Gunn effect cavity controlled generator oscillations, noting phase trajectory closing conditions dependence on resonant mode parameters

09 p1468 A69-22596

Sporadic noise, false fronts and other noise effects on phase of output oscillations of resonance apparatus

09 p1460 A69-22641

Transmission system with baseband spectrum divided into subbands, cascade phase modulating carrier in multiplication chain

12 p2030 A69-26385

Mismatch between signal and filter effect on output response of matched filter for pseudorandom phase-manipulated signals in receiver

12 p2031 A69-26487

Oscillation spectrum with harmonic phase or frequency modulation, analyzing structural dependence on initial phase

14 p2412 A69-29427

Subcarrier phase modulated single sideband sinusoidal carrier synthesis, discussing signal power ratios, signal efficiency, design sensitivity, etc

14 p2413 A69-29489

Wideband PM communication system with synchronous reception and automatic control of reception bandwidth, providing improvement in noise stability

15 p2564 A69-30147

Waveform amplitude variation of phase modulation pulses affected by band limitation

15 p2569 A69-30803

360 degree varactor linear phase modulator, analyzing impedance matching, insertion loss, tuning design and serrodyne application

16 p2756 A69-31577

Ionospheric scattered radio wave field amplitude and phase variations assessed for diffraction at regular phase screen

16 p2754 A69-32521

Phase modulation in pseudo-noise ionospheric communication system for reducing F region CW signal fading

18 p3104 A69-35308

Phase and amplitude stabilization during phase modulated discrete data transmission

19 p3277 A69-36571

Optimal radar phase modulated waveform with optimal ambiguity function synthesized by solving variational equations for orthogonal series coefficients of expanded modulation

20 p3492 A69-37708

Linear filtering effects in channel with binary direct sequence antipodal biphase modulation in presence of white noise and sinusoidal interference, noting variance

23 p4122 A69-41774

Pseudorandom code development and possibilities for radar applications, considering signal processing,

antenna requirements, radar signal phase modulation, etc

24 p4281 A69-42741

Optical correlation for radar signals phase modulated by pseudorandom codes

24 p4282 A69-42742

PHASE SHIFT

Phase and amplitude variation at output of tuned amplifier, noting graphs and formulas

01 p0047 A69-10786

Self adaptive control circuit diagram examination, considering phase shift measurement reliability by eliminating distortion caused by system nonlinearities and noise

01 p0052 A69-10796

Laser beam phase fluctuations for propagation through turbulent atmosphere, noting interferometer for simultaneous measurements for pairs of rays

01 p0091 A69-10845

Holographic phase variation distribution recording by interference between reconstructed wave fronts from separate holograms

01 p0083 A69-10984

Methodological problems in studying ionosphere by phase measurements without taking into account geomagnetic field, noting value of main results

02 p0237 A69-11668

Polarization rotation and phase delay effects as function of frequency for ionospherically propagated HF signals

02 p0208 A69-12331

Equation for beam shift during beam steering of phased array by conjugate element phase shifting

02 p0219 A69-12340

Arbitrary phase shift vibrations of airfoil profiles in incompressible flow reduced to Fredholm equations, allowing for trailing vortices influence

02 p0190 A69-12574

Electrically controlled broadband microwave phase shifter consisting of coaxial line with varactors or ferroelectrics

03 p0408 A69-13987

Plasma density spatial distribution determined from HF electromagnetic wave phase shifts without assuming axisymmetry

03 p0480 A69-14138

Total ionospheric electron content determination from measurement of phase differences of satellite transmission, discussing data processing and differential Doppler effect measurements

04 p0592 A69-14766

Sudden VHF phase anomalies produced by solar flare induced ionospheric disturbances during July 1968

05 p0719 A69-15980

Suppressed rotation reciprocal ferrite phase shifter theory explained in terms of nonreciprocal coupling of cross polarized waveguide modes

06 p0896 A69-17484

Diurnal field strength and phase variations of VLF transmissions over transequatorial path from Australia to Japan

06 p0889 A69-17654

Coherent frequencies method for irregular component of satellite signal phase lead due to ionospheric inhomogeneities between satellite and ground station

06 p0890 A69-17799

Frequency-fluctuation correlation functions of radio wave field behind n random screens with random phase shifts calculated, obtaining statistical characteristics

07 p1076 A69-18525

Natural amplitude and phase fluctuations of originally monochromatic oscillations at output of regenerative frequency divider with thermal and shot noise

07 p1099 A69-18526

Phase shift and losses in wave propagation in dielectric environment, defining power transmission coefficient and insertion phase shift

07 p1087 A69-19518

Radome induced distortions of radioelectric axis analyzed by sectional phase analysis

07 p1110 A69-19521

Stable limiting cycles of laser resulting from mutual synchronization of phase shifted oscillation modes

07 p1158 A69-19752

Observations of Venus at 15.4 GHz establishing upper limit for brightness variation with phase angle

08 p1382 A69-19818

Propagation induced phase fluctuations reduction in widely separated oscillators, presenting microwave and optical methods

08 p1273 A69-20022

Temperature effect on phase stability and electrical length of braided coaxial cables, considering dielectric constant and mechanical length

08 p1283 A69-20225

Phase and amplitude variation at output of tuned amplifier, noting graphs and formulas

10 p1662 A69-23115

Telemetry data channel gain and phase correction with frequency response calibration technique using digital filtering

10 p1654 A69-23291

Qualitative analysis of recording phase only acoustic holograms of object wave instead of both phase and amplitude, considering fringe patterns and conjugate image

10 p1695 A69-23548

Quantum phase noise in He-Ne laser, considering amplitude fluctuation, spontaneous emission and oscillator linewidth

10 p1704 A69-23669

Polarized electromagnetic waves phase shift during total reflection from stratified dielectric region found dependent on transition zone width in addition to permittivity

10 p1657 A69-23862

Phase fluctuations measurements of obliquely incident signal reflected from ionosphere performed over distance of 1300 km, showing amplitude dependence

10 p1657 A69-23913

Mean losses in quasi-optical communication lines due to random irregularities in performance of waveguide phase correctors connected in series, noting random phase aberrations effect

10 p1658 A69-23954

Antenna array statistical synthesis, investigating signal detection capacity for large phase fluctuations

11 p1833 A69-24439

Tracking filter steady state oscillation amplitude and phase distributions determined from Fokker-Planck equation for high and low noise levels

11 p1844 A69-24441

Two oscillator signal combiner based on mutual synchronization, providing output signal free of phase jumps or amplitude fluctuations

11 p1849 A69-24928

He-Ne laser output phase fluctuations between adjacent modes during unlocked and self locked condition, noting cavity optical length short term fluctuations influence

11 p1898 A69-25048

Polarized Hartree-Fock model computing photoionization cross sections for Li isoelectronic sequence, listing phase shifts for partial waves of scattered electrons

11 p1922 A69-25260

Venus brightness temperatures vs phase angle to define spectra of day and night face at short wavelengths, using model atmosphere

12 p2153 A69-25806

Pulsed radio waves for measuring phase height in E region, showing short period fluctuations

12 p2066 A69-26111

Holography with pulsed lasers for high speed recording of amplitude and phase disturbances and rapid transient events, noting reconstruction evaluation problems

12 p2087 A69-26171

Hydromagnetic fluid flow between flat plates oscillating with phase difference, same frequency and different amplitudes

12 p2135 A69-26273

Digital phase-shift control of locked oscillator

12 p2052 A69-26382

Three dimensional log amplitude and phase fluctuation distributions of collimated and focused Gaussian beams propagated through random inhomogeneous medium, evaluating mean-square values

12 p2130 A69-26393

Differential absorption by measurement of phase difference of ionospherically propagated incoherent radio wave signals under quasi-longitudinal conditions

12 p2032 A69-26857

Antenna cross dipole array for vehicle tracking in VHF band, obtaining effect of local rotation by electrical phase shifting

13 p2226 A69-27185

Observability of phase state of nonlinear control system noting Liapunov function

13 p2238 A69-27742

Transmission line all pass equalizers theory and design for operation in TEM, TE or TM modes

13 p2233 A69-28065

Phase and amplitude changes of arbitrary-Q self excited oscillator under external disturbance, using differential equations

13 p2300 A69-28574

Fermi surface data of alkali metals interpreted in terms of interaction between conduction electrons and ionic lattice for deducing partial wave phase shifts

13 p2304 A69-28681

Methodological problems in studying ionosphere by phase measurements without taking into account geomagnetic field, noting value of main results

13 p2257 A69-28699

Electromagnetic wave phase characteristics after free space passage through statistical medium with wave disturbance producing density and ionization fluctuations

14 p2435 A69-29049

Fourier analysis of ionospheric wave reflection pulses for frequency contents and relative phase angles

14 p2440 A69-29351

Spatial distribution of plasma density from phase shift measurement in millimeter waves based on microwave multichannel probes

14 p2497 A69-29792

Plasma electron density measurement from phase shifts of electromagnetic wave groups propagation

14 p2497 A69-29796

Design and operation of two frequency phase meter for plasma diagnostics, using frequency modulation of microwave oscillator and waveguide bridge

14 p2451 A69-29798

Three channel microwave FM phase meter for studying plasma electron concentrations directional distribution without interferences between channels

14 p2497 A69-29799

FM homodyne phase meter with klystron oscillator for measuring plasma electron concentration, giving block diagrams of meter, detector and oscillator

14 p2451 A69-29800

Microwave interferometer with digital-logic elements for phase shift measurements in pulsed plasmas without frequency range limitations

14 p2452 A69-29802

Plasma density and conductivity radio interferometry during ultrarapid disturbances based on electromagnetic wave phase shift dependence on density

14 p2498 A69-29803

Direct phase measuring and measured phase compensating microwave devices designed for plasma diagnostics applications

14 p2452 A69-29804

Phase measurements at IF in microwave plasma diagnostics, examining phase stabilization processes

14 p2452 A69-29805

Reference oscillator frequency instability effect on radio signals phase shift in ionosphere measurements, evaluating errors

14 p2444 A69-29873

Short and ultrashort waves signals amplitude and phase displacement determination device, stressing sensitivity

15 p2570 A69-31088

Sudden phase anomalies on radio paths compared with calculated results for satellite observed solar X ray flux intensities to explain sudden ionospheric disturbances

17 p2959 A69-33006

Amplitude ratio measurement for two AC signals of given relative phase shift and same frequency

17 p2975 A69-33615

Phase fluctuation measurements of laser beam propagating through turbulent atmosphere

17 p2927 A69-33855

Laser beam propagation through turbulent medium, investigating statistical distribution of phase shift fluctuations

17 p2976 A69-33857

Absolute phase heights measurements in ionosphere for geometrical optics conditions, noting accuracy

17 p2927 A69-33859

Multiple interference effect introduced by nonlinear characteristics of photographic material, measuring phase variations by holographic multiple beam interferometry

17 p2977 A69-34159

Microwave propagation inside hollow cylinder using model plasma as dielectric, deriving relationship between phase shift and free electron density

17 p2932 A69-34218

Atom-atom scattering potential from phase shifts, using WKB formula and Jeffreys-Born approximation

19 p3378 A69-36189

Ionospheric data of local and integral electron concentration obtained by measuring phase shift of satellite emitted coherent radio waves

20 p3519 A69-37022

Vibrational displacement phase measurement by Michelson interferometer with laser source

20 p3538 A69-37320

Ground backscatter elevation angle recorded by phase comparison method, postulating ionospheric tilts to interpret data

20 p3535 A69-38188

National Physical Laboratory atomic clock improvements, describing use of cesium 133 as second of time standard and phase shift effects on precision

21 p3720 A69-38548

Ring laser bias in angular rotation measurement using optical phase shifters

21 p3735 A69-38651

Multistable logic circuitry with 10 stability levels based on phased pulse principle, noting efficiency and complexity in man machine interface

21 p3686 A69-39065

Distance measuring method limitations for modulated CW laser determined by laser transmitter receiver in conjunction with retroreflector target fixed position

21 p3739 A69-39457

Pulse width increase in mode locked laser caused by phase deviations, noting optical elements with quadratic dispersion of refractive index

21 p3741 A69-39683

Circadian rhythm phase shifts during ontogenesis produced by hormone concentration changes resulting from light variations

22 p3872 A69-40198

Free stream velocity in high enthalpy arc heated wind tunnel by measuring imposed temperature modulation apparent phase shift, describing circuit diagrams

22 p3926 A69-40444

Electronically controlled microwave phasers and time delay elements design and operation, discussing beam width, steering and effects, directivity and planar arrays

23 p4135 A69-41353

Positive phase shift relation to elastic modulus enhancement of smooth muscles of rabbit, cat and dog bladder, pulmonary artery and large veins

23 p4083 A69-41459

Array aperture amplitude and phase distortions effect on radiation field uniformity

23 p4138 A69-41940

Lunar photometric function near zero phase from Apollo 8 closeup photography, noting higher reflected brightness than at 1.5 degree phase angle

23 p4220 A69-42380

Measurement method for relative phase shift between density and potential oscillations in Cs plasma

24 p4354 A69-42676

Nonhuman primate circadian rhythms as functions of phase shift carried out in advance or delay

24 p4261 A69-42709

Ionized meteor trails reflection zone altitudes determination by interferometric measurements of phase differences

24 p4311 A69-43508

Inviscid hypersonic flow over oscillating slender wedge, defining equivalent phase shift

24 p4248 A69-43582

Thermal turbulence effects on phase fluctuations of laser beams, studying temporal decay of mean square refractive index fluctuation with fringe pattern displacements

24 p4329 A69-43754

PHASE SHIFT CIRCUITS

NT CIRCULATORS [PHASE SHIFT CIRCUITS]

Diode structure optimization for monolithic integrated circuit for Ku-band reflective phase shifter

01 p0040 A69-10195

Digital loaded-line phase shift networks for microwave thin film applications, emphasizing design equations

01 p0040 A69-10198

Semiconductor microwave phase shifters for electronic steering of phased array radar antennas noting cost, reliability and properties of steerable antennas

04 p0572 A69-14319

Reciprocal latching ferrite phase shifters application to lightweight scanned phased arrays, noting quasi-circularly polarized modes with lowest insertion loss

04 p0572 A69-14320

Electronic scanning antenna system consisting of ceramic rod linear array, power distributor, electronic ferrite phase shift feed and driver

04 p0572 A69-14327

- Circuit for accurate division of attenuation and phase shift changes, noting calculation errors
04 p0573 A69-14337
- Phase modulator with phase locked loop oscillator as phase shifter, discussing unit cascading effect
05 p0729 A69-15965
- X-band swept frequency oscillator using Gunn diode and ferrite phase shifter
05 p0734 A69-16573
- High accuracy microwave phase standard for calibration laboratories, discussing broadband differential phase shifter
06 p0896 A69-17487
- Equivalent network representation of feedthrough lens array taking into account mutual coupling between elements to predict performance characteristics
08 p1280 A69-20014
- Variable phase shifters and delay lines, discussing mechanical and electronic adjustments
08 p1290 A69-20978
- Reciprocal and nonreciprocal electronically adjustable ferrite phase shifters and application in scanning leaky wave antennas
08 p1290 A69-20979
- Applied magnetic field effects on longitudinally magnetized reciprocal ferrite phase shifters, showing shift type dependence on guide electrical thickness
13 p2229 A69-27673
- High power ferrite latching switch with forced air cooling, discussing nonreciprocal phase shifter materials and configurations
13 p2229 A69-27674
- Hybrid coupled low power digital microwave phase shifters design, discussing lumped element L-C and variable C shifter theories, power limitations and construction techniques
15 p2580 A69-31076
- Broadband continuously variable phase shifter with microstrip construction, describing phase rotation via stripline connected directional couplers
16 p2763 A69-32582
- Italian cross radio telescope noting added phase shifters to N-S arm, transistorized receiving system and modified data processing
19 p3295 A69-36643
- Semiconductor phase shifting for inertialess antenna scanning at microwave to millimeter wavelengths, describing diode construction with emphasis on solving insertion loss
[ONERA-TP-712] 23 p4143 A69-42519
- PHASE SHIFT KEYING**
- Phase locked loop demodulators for binary PSK signals compared with and without decision directed feedback in presence of CW interference
03 p0409 A69-13201
- Optimum receiver structure for estimating PSK information signal phase derived together with matched filter detector performance
03 p0403 A69-13203
- Coherent PSK system in multipath environment/Rician fading and additive Gaussian white noise/with phase locked loop for coherent reference extraction
03 p0393 A69-13255
- Time division multiple access satellite communication system employing pulse code modulation of voice channels and phase shift keying of RF carrier
07 p1077 A69-18759
- Bandwidth limited PCM/PSK/PM telemetry system performance analysis for developing S band telemetry, including coherent and noncoherent detectors
07 p1081 A69-19098
- Single channel binary PSK communication systems performance influenced by degree of RF coherence between transmitter and receiver
07 p1082 A69-19109
- Secondary maxima observed in pulses with binary phase shift keying for cases of large Doppler shifts
07 p1086 A69-19488
- Phase locked loop demodulator with quadrature channel modified for decision feedback to detect binary phase shift keyed signals
08 p1270 A69-19859
- Constant amplitude in-band additive interference for analysis of PSK signals in Gaussian noise, discussing coherent and differential detection
09 p1455 A69-21848
- Multichannel bit error probability for FSK and DPSK obtained for slow nonselective-fading multipath as function of multipath parameters and diversity order
10 p1656 A69-23533
- Received signal phase angle error probability in coherent PSK system in Gaussian noise and interference
13 p2219 A69-27665
- Compression capabilities of combined frequency and phase shift keying in radar and sonar pulse modulation using binary noise codes
15 p2568 A69-30628
- Double binary PSK system digital computer simulation for satellite communications, investigating filter and limiting effects on performance in error probability terms
20 p3492 A69-37705
- Optimum phase reference detector obtained at low SNR with Costas loop for fully modulated PSK signals
20 p3492 A69-37710
- Split phase PCM code modulated carrier transmission characteristics determined for amplitude, phase and frequency shift keying, assuming random bit pattern and noncoherent modulation
21 p3676 A69-39451
- Partially coherent PSK-modulated binary detection, deriving noisy phase reference by narrow band tracking filter, analyzing bit output error as function of SNR
23 p4122 A69-41772
- Error probability bounds for self synchronized binary PSK communication systems, simulating decision feedback, phase doubling and maximum likelihood systems
23 p4128 A69-42501
- Effective color TV transmission via satellite using PCM/PSK modulation, noting dependence on available equipment, bandwidth, desired error rate and SNR
23 p4130 A69-42520
- PCM satellite communication systems signal power and frequency bandwidth requirements, noting PCM-psk superiority over FDM-FM
24 p4283 A69-43200
- PHASE-SPACE INTEGRAL**
- Phase space concepts for beams, accelerators and confined particles, noting adiabatic invariants, phase space transformations, particle dynamics in accelerators and plasmas
06 p0966 A69-17673
- Master equation in quantum optics phase-space formulation based on Schroedinger equation of motion, noting application to Volterra integral equation and Born approximation
15 p2633 A69-30307
- System kinetics synthesis for nonlinear multiple lumped parameter system having responses in boundary region of phase-time space
16 p2812 A69-32247
- Optimal control parameters for gyroscopic devices with constrained phase coordinates obtained on analog computer by introducing equivalent phase coordinates system
24 p4317 A69-43708
- PHASE TRANSFORMATIONS**
- NT ARC MELTING
NT BOILING
NT EVAPORATION
NT FILM BOILING
NT FLASHING [VAPORIZING]
NT FREEZING
NT FUSION [MELTING]
NT LEIDENFROST PHENOMENON
NT MELTING

NT VACUUM MELTING
NT VAPORIZING
NT ZONE MELTING
- Space charge limited currents in SbSI single crystals with gallium electrodes during phase transition, discussing sticking probability and photoconductivity
01 p0137 A69-10258
- Structural transformations of quenched Fe-Ni-Nb austenitic alloy from X ray diffraction microstructure examination and hardness measurements
01 p0095 A69-10603
- Irradiation influence on chromium transition temperature explained by defect clusters and embrittling impurity redistribution
01 p0095 A69-10604
- Precipitation hardening of gamma phase in austenitic stainless steels studied for phase transformations by dilatometry after aging and quenching
01 p0096 A69-10613
- Ultrahigh pressure physics of materials, discussing apparatus, phase transitions and yield strength ductility relationships
02 p0260 A69-11803
- Martensite transformation by simple shear in equiatomic Ni-Ti alloy, using transmission electron microscopy
02 p0265 A69-12024
- Vanadium dioxide reflection spectra dependence on incident quantum energies during semiconductor/metal phase transition
02 p0298 A69-12100
- Sulfospinel polymorphism at high temperature and pressure and pressure-temperature phase relations
02 p0266 A69-12162
- Kinetic features of martensitic transformation of nickel steels dependent on plastic deformation degree at 525 C
02 p0267 A69-12190
- Heat conduction with change of phase in three dimensional melting and solidification problem under isotherm conditions and balanced energy at interface
02 p0354 A69-12548
- Ferrite and sigma phase formation in austenitic stainless steels with nickel and chromium content
02 p0269 A69-12764
- Metal/alumina interfaces strength, examining correlation with wetting and bonding and martensitic transformations
03 p0447 A69-13612
- Al/Zn/Mg alloys preprecipitation, discussing Guinier-Preston and critical zone sizes and reversible vacancy trap
03 p0447 A69-13613
- Second phase hardened materials recovery creep rate model, showing dependence on stress level
03 p0447 A69-13615
- Thermodynamic analysis of refractory compounds vapor transport conditions, illustrating integral free energy diagrams
03 p0453 A69-13619
- Moving and stationary interphase boundaries segregation during phase transformation, discussing embrittlement
03 p0450 A69-13883
- Aging of iron-nickel-titanium alloys during heating in reverse martensitic alpha to gamma transformation process, investigating phase parameter changes
04 p0613 A69-14558
- Bainite beta to alpha transformation in titanium-oxygen system, using high temperature metallography techniques
04 p0613 A69-14559
- High strength martensitic aging steels alloying effects, phase transformation and aging
04 p0615 A69-14644
- Alpha to gamma transformation kinetics in maraging steel during heating, studying alloying elements redistribution
04 p0616 A69-14648
- Long term strength of Ni-Cr-Al-Ti alloys, studying gamma particles size and distribution effect
04 p0616 A69-14651
- Martensitic transformation in Ti-Al-Mo alloys, noting specific features and effects of Mo content
04 p0617 A69-14940
- Electric field strength and helix pitch in induced cholesteric-nematic phase transitions, noting activation energy for charge carrier production
04 p0555 A69-14964
- Transitions in glasses at low temperatures, noting molecular relaxation dependence on copolymer composition
04 p0621 A69-15308
- Transient temperature distribution for finite slab in phase transformations via single face temperature changes
[ASME PAPER 68-WA/HT-37] 05 p0848 A69-16128
- Hot working temperature effects on Rene 63 mechanical properties and microstructures, using tensile and stress rupture tests, electron microscopy and X ray diffraction analysis
05 p0781 A69-16446
- Polymer glasses low temperature transitions, relating structure and transition temperature
05 p0717 A69-16493
- Metastable phases of binary zirconium-niobium system, defining decomposition of solid solution in cooling
05 p0781 A69-16614
- Lanthanum and hafnium effect on transition and recrystallization temperatures of tungsten and tungsten base alloys
05 p0782 A69-16797
- Sigma formation effects on cast nickel-based superalloys properties, discussing sigma occurrence prevention for longer service life of gas turbines
06 p0942 A69-17223
- Transmission electron microscopy used to study phase transformations in Ti-Mo and Ti-V alloys, determining crystal structures
06 p0943 A69-17230

Model for phase transition mechanism quantum-Coulomb plasmas, finding transition temperature for white dwarfs

06 p0968 A69-17785

Nimonic alloys recovery analyzed by X rays and electrolytic phase separation, showing precipitated gamma phase effect

07 p1159 A69-18533

Thermal and metallographic analyses of Ti-Zr-Al system vertical sections close to Ti-Al edge, considering phase equilibrium

07 p1162 A69-18771

Metastable phases in titanium alloys with beta alloying elements

07 p1162 A69-18773

Phase transformations in titanium alloys under nonequilibrium conditions

07 p1162 A69-18774

Tin and zirconium addition effect on transformations of titanium alloys during heat treatment

07 p1162 A69-18775

Phase and structural transformations in two phase quenched and aged titanium alloys, using electron microscopy and X ray analysis

07 p1162 A69-18776

Weld mechanical properties of Ti-6Al-2Sn-4Zr-2Mo titanium alloy as function of cooling rate changes or transformation rate shifts resulting in wide range of hardnesses

08 p1318 A69-19965

Metallographic and X ray study of cellular decomposition and precipitation in superconducting niobium zirconium alloy, noting heat treatment effect on current carrying properties

08 p1331 A69-20192

Phase identification and microstructural effects of gaseous nitrogen reaction with binary Nb-Ti alloys at 1000 C

08 p1331 A69-20195

Dislocations effect on intermediate body centered tetragonal phase precipitation in Fe-Ni-Cr-Be alloy using transmission electron microscopy

08 p1333 A69-20447

Spinodal decomposition effect on Al-Zn alloy mechanical properties noting strengthening, brittleness and work hardening capacity

09 p1522 A69-21501

Structure of spinodal decomposition in Al-Zn alloys by X ray diffraction noting anisotropy, periodicity and stability

09 p1522 A69-21502

Microstructure for spinodal decomposition in Al-Zn alloys noting Zn precipitation, fracture mechanics, dislocations and transmission electron microscopy results

09 p1522 A69-21503

Phase equilibria in V-Cr-C, Nb-Cr-C and Ta-Cr-C systems determined by microscope and X ray analyses

09 p1523 A69-21872

Space charge limited currents in SbSI single crystals with gallium electrodes during phase transition, discussing sticking probability and photoconductivity

09 p1559 A69-22651

Concentration changes in binary metal-gas solutions during simultaneous degassing kinetics and metal evaporation

09 p1528 A69-22732

Nickel alloy high temperature tests, noting coagulation of precipitated gamma prime phase, vacancies and creep rate increase

09 p1528 A69-22733

Radiometric observations of Venus brightness temperature variation used to determine phase effect at 8.6 mm wavelength

10 p1773 A69-22959

Omega phase transformation in binary and ternary Zr alloys after water quenching from within/alpha plus beta/ phase region

10 p1707 A69-22988

Spontaneous martensite phase transformation in Ti-Cr alloy thin foils formed electrolytically

10 p1708 A69-22994

Austenite to martensite strain induced transformation effect on energy absorption during crack propagation

10 p1709 A69-23074

Soviet book on fluid semiconductor properties at high temperatures during transition from solid to liquid state

10 p1744 A69-23316

Zirconium-rhenium-carbon ternary system, determining resistivity of melted alloys, discussing eutectic quasi-binary compounds

10 p1715 A69-24055

Thermal and microstructural analyses to determine phase interactions nature in Mg alloys of Mg- Nd-Al system

11 p1902 A69-24271

Monograph on effect of nitrogen on precipitation behavior of austenitic chromium-nickel steel covering carbides, intermetallics, phase transportations, corrosion resistance, etc

11 p1902 A69-24369

Monograph on effect of boron, zirconium and titanium on austenite transformation of CrMo steels bainite and martensite covering carbides, nitrides, mechanical properties, etc

11 p1903 A69-24634

Order-disorder in alloys with several phase transition temperatures, discussing crystal lattices, interstitial alloys, atomic and magnetic ordering

11 p1936 A69-24702

Superstructures in multicomponent alloys, transition mode and temperature, ordered state and atomic interactions

11 p1937 A69-24703

Pressure effects on hcp crystalline lattice alloys order-disorder transformations

11 p1937 A69-24704

Ignition of condensed homogeneous combustible materials in presence of phase transition in heated layer, discussing temperature distribution and ignition delay time in ammonium perchlorate

11 p2000 A69-25189

Dense gas equilibrium plasma thermodynamic stability in case of high electrostatic interaction energy of charged particles, analyzing phase transition possibility

11 p1928 A69-25234

Heat treatment effect on Ti-Mn alloy microstructure, discussing fcc martensite transformation into alpha, beta and intermediate phases as function of aging

11 p1906 A69-25578

Plasticity increase of molybdenum alloys during precipitation of second phase at high temperatures due to lattice defects redistribution and plastic deformation

11 p1906 A69-25685

Heat treatment effects on molybdenum-rhenium alloy field emission and surface structure in alpha and sigma phase regions

12 p2113 A69-26041

Lattice defects in annealed and plastically deformed cobalt, showing increase with increasing martensite transformations

12 p2113 A69-26042

Collection of papers on crystal structure imperfections covering dislocation mobility, kinetic recrystallization and volume changes during phase transformation

12 p2142 A69-26452

Volumetric and allotropic changes during heating in electrolytic cobalt multiple phase transformations

12 p2114 A69-26455

High strength steels, discussing ductility, austenite to martensite transformation for increased strain hardening rate and elongation and corrosion resistance

12 p2115 A69-26829

Shock waves in solids, discussing gas gun firing and explosive detonating at specimen, transformations measurement and materials processing applications

13 p2360 A69-27341

Martensite transformation in Ti-Cr binary alloys by thin foil electron microscopy, noting crystallographic theory

13 p2276 A69-27369

Homogenization of martensite formation in nickel 300 grade maraging steel, analyzing anisotropic transformation strains during thermal cycling

13 p2278 A69-27410

Stress and plastic deformation influence on allotropic transformation of cobalt-nickel single crystals studied by X ray diffraction

13 p2279 A69-27761

Precipitation influence on martensite formation kinetics and structure of Fe-Ni-Ti alloys

13 p2279 A69-27765

Ni alloys phase precipitation and Fe substitution effects on heat resistant alloys

13 p2283 A69-28488

Transition zone structure and phase composition in Ti/stainless steel bimetal as function of rolling conditions and heat treatment

13 p2283 A69-28490

Martensite transformation with fcc lattice in Ti alloys containing 5.9 percent Fe analyzed as function of cooling rate using X ray analysis

15 p2636 A69-30105

Vapor-liquid transition in inert gases based on Monte Carlo method, including comparison with van der Waal equation and plasma ionization equilibrium

15 p2655 A69-30981

Double shock method for detecting pressure limits in magnetic phase transition of solids

16 p2825 A69-31696

Slow forming forging and extrusion required for Ti alloys, discussing mechanical properties as function of beta transformation temperature

16 p2793 A69-31786

Time, temperature and transformation curves for Ti alloy by dilatometry, hardness measurements, X rays and micrography, discussing martensite and beta-alpha transformations

16 p2802 A69-32180

Interaction between two phase dynamical and combustion parameters in one dimensional gas-gas-metal combustion system [AIAA PAPER 69-540]

16 p2880 A69-32742

Book on gas dynamics of two phase media for thermal power engineering equipment, discussing phase transformations, condensation in high velocity flows, etc

17 p2948 A69-32951

Titanium alloy martensites crystallography by electron microscope, discussing lattice parameters and spontaneous transformation

18 p3154 A69-34245

Forming and heat treatment process for stainless steel pressure containers using liquid N₂, discussing austenite-martensite transformation role

18 p3161 A69-34605

Omega phase formation in Ti and Zr alloys with transition metals, discussing effects on mechanical and superconducting properties

18 p3155 A69-34634

Cumulative rapid thermal cycling influence on progressive disappearance martensitic transformation in 18 percent nickel maraging steel

18 p3155 A69-34650

Martensite transformation, C content and work hardening relations in stainless steels studied for magnetic detection of embrittlement during deformation

18 p3138 A69-35117

Beryllium diffusion coefficients in Zr and Ti bcc phases, using radioactive beryllium 7 at high temperatures

18 p3157 A69-35251

Phase shape deformation and austenite stabilization in Fe-Ni and Fe-Ni-Ti alloys following secondary alpha phase of reversed martensite-austenite transformation

18 p3159 A69-35448

Isothermal and thermal martensite transformations on polished surfaces of Fe-Ni-Mo alloys

19 p3344 A69-35983

Cr-S and Cr-Fe-S systems phase relations, using silica tube and collapsible tube experiments, correlating formation conditions of meteoritic sulfide assemblages

19 p3359 A69-36123

Vanadium thermistor fabrication influence on resistance jump at phase change temperature of vanadium dioxide, reproducing parameters by heat treating doped vanadium pentoxide

19 p3256 A69-36718

Heat conduction in medium with phase transitions, solving one dimensional nonlinear problem by calculation of isotherms and reduction to Cauchy problem

19 p3453 A69-36838

Phase transformations and strengthening mechanisms in Ti-Al-V alloy

20 p3556 A69-36954

F 2 layer midlatitude positive disturbances observed during IGY on quiet and disturbed days, noting positive to negative transition latitudes

20 p3527 A69-37674

Crystallographic relations between mother gamma phase and bulk martensitic structure of Fe-Ni alloys with less than 20 percent Ni, using radioisotopes

20 p3562 A69-37781

Phase analysis of systems Mn-S, Mn-Se and MnS-MnSe by X ray diffraction techniques, revealing homogeneity ranges

20 p3485 A69-38286

Titanium strengthened high strength hot-rolled steels, discussing cooling rates leading to complete ferrite phase transformation

21 p3743 A69-38652

Abnormal grain growth during secondary recrystallization of hydraulically extruded molybdenum as function of annealing

21 p3745 A69-38953

Phase softening transformations heat resisting alloys during cyclic heating, using X ray and electron microscope analyses

21 p3746 A69-38957

Phase plasticity in Ti-O alloy as function of temperature in alpha Ti and TiO, noting role of increased oxygen diffusion mobility

21 p3746 A69-38959

Soviet book on heat treatment of Ti alloys emphasizing structural and phase composition changes

21 p3749 A69-39526

Low melting point material selected model melt simulating shrinking process in castings of melt with broad liquidus-solidus interval

21 p3733 A69-39720

Enzyme transitions in RNA polymerase state during unprimed synthesis of r/I-C/ copolymer, noting dimer-monomer pattern during lag phase

22 p3895 A69-40050

Heat treated Ti-Al-Fe alloys thermal, microstructural and X ray analyses of phase transformations in Ti-rich corner

22 p3969 A69-40074

Jadeite/ high pressure sodium aluminum pyroxene/ shock-induced phase assemblage from oligoclase, noting relevance to lunar rock samples investigation

22 p3941 A69-40569

Phase equilibrium apparatus for measurement of thermodynamic properties of cryogenic fluid mixtures, including argon-methane data [NAS-NRC PAPER H-3]

22 p3947 A69-40630

Alloy Inconel 625 precipitation behavior and effect on short and long term properties, discussing tetragonal phase segregate and creep strength

22 p3971 A69-40802

Joints structure, phase and chemical composition in kinetics of titanium diffusion brazing with copper

22 p3958 A69-41203

Coherent matrix precipitates observation in Fe-Ni-Cr alloy by transmission electron microscopy, discussing yield strength and elongation dependence on aging conditions

23 p4176 A69-41508

Semiinverse method involving plane wave expansions to solve elliptical crack expansion and self similar phase transformation in anisotropic solid

24 p4397 A69-42749

InTe phase formation in thin film composed of two InTe phases, showing dependence on annealing in high vacuum and substrate temperature

24 p4361 A69-42994

PHASE VELOCITY

Acoustic plasma waves propagation in thin films in case of film quantization, showing phase velocities close to Fermi velocities of electrons

02 p0300 A69-12649

Bandwidth effect on wave recordings cross spectra interpretation from spatially separated sites, deriving relationship between propagation velocity and velocity bandwidth

05 p0756 A69-16272

Axial waves in blood vessels, determining phase velocities and damping, noting anisotropic behavior of artery wall

[SESA PAPER 1350] 07 p1069 A69-19726

Phase velocities and polarizations of linear waves in infinite uniform high beta plasma

08 p1359 A69-19986

OMEGA VLF navigational transmission phase delay variations and field strength measurements on transatlantic propagation path, noting effect of directional change

09 p1538 A69-22595

Transverse waves induced by disk oscillations about state of steady rotation in MHD, revealing circularly polarized waves with different phase velocities

10 p1728 A69-23239

Computer calculated phase velocities for surface wave and waveguide modes given for circular waveguide filled with inhomogeneous electron plasma

11 p1844 A69-24437

Backward plasma waves in region of anomalous dispersion indicated by opposite directions of RF wave phase and group velocities

11 p1927 A69-25116

Unstable weakly ionized HF magnetoplasma fluctuations with no axial drift, noting phase velocity parametric dependence

13 p2312 A69-28197

Wave parameters in coupled parallel surface wave transmission lines and dielectric waveguides, discussing phase velocities and spatial beat period

13 p2223 A69-28570

Surface wave study techniques, discussing digital moving window analysis of group and phase velocity and use of time variable filters

16 p2784 A69-32576

Slow electromagnetic wave propagation in superconducting thin film transmission lines, noting phase velocity dependence on film thickness and spacing

17 p2938 A69-33785

VLF wave propagation phase velocity prediction for airborne Omega computer, using scatter model based on abnormal ionosphere

17 p3002 A69-34077

Anisotropic ionospheric model for VLF TM and TE modes excitation, noting nighttime phase velocity variations

18 p3101 A69-34797

Linearized wave propagation digital simulation models to predict arterial blood flow characteristics and impedance, comparing phase velocity and transmission per wavelength

19 p3264 A69-36868

NonJeans gravitational instability of stars and interstellar gas in Galaxy due to wave interaction with stars having velocity near wave phase velocity

20 p3607 A69-38037

Pi 2 micropulsation waveform variation with time from simultaneous observations at low latitude stations, estimating phase velocity of higher frequency component

23 p4161 A69-42440

PHASED ARRAYS

Phased array radar cost improvement based on solid state devices and microwave integrated circuits application

01 p0048 A69-11039

Electron tubes in phased array radar systems, discussing replacement limits by solid state devices, reliability and cost reduction

01 p0048 A69-11040

Transistors vs electron tubes as microwave power sources in UHF phased array radars, noting transistor cost competitive limit

01 p0048 A69-11041

Phase, frequency and amplitude scanning, noting array design and applications

01 p0049 A69-11348

Phased array radar antennas emphasizing beam steering of transmitting linear array with number of phase shifters

01 p0049 A69-11390

Reflected and transmitted radiation fields for dielectric loaded infinite phased array of parallel plate waveguides as function of scan angle

02 p0218 A69-12326

Equation for beam shift during beam steering of phased array by conjugate element phase shifting

02 p0219 A69-12340

96 element wide band scanning array measurements, considering array simulators usability at frequencies above operating frequencies

02 p0219 A69-12343

Planar phased array of circular waveguides arranged in equilateral triangular grid, solving boundary value problem

03 p0406 A69-13829

Collimation of row and column steered phased arrays

04 p0570 A69-14304

Nonorthogonal beam steering commands for multielement two dimensional phased array antenna

04 p0570 A69-14305

Granularity of beam positions in digital phased arrays based on method of moments and phase distribution

04 p0570 A69-14306

Electronically steered and shaped beams for linear and ring phased array antennas by sampling element signals multiplexed into single channel

04 p0570 A69-14307

Element pattern nulls in phased arrays and relation to guided waves supported by array face

04 p0570 A69-14310

Impedance matching of volumetrically scanned waveguide arrays, stressing element spacing, surface wave impedance, etc

04 p0571 A69-14312

Linearly polarized waveguide phased array design, noting waveguide aperture size effect on admittance and minimization of zero radiation directions

04 p0571 A69-14313

Asymptotic decay of coupling for infinite phased arrays proved valid for infinite parallel linear plate array immersed in magnetized cold plasma

04 p0571 A69-14314

Driving point admittance of radiating aperture in infinite periodic planar phased array, determining coefficients of waveguide modal expansion and Floquet series

04 p0571 A69-14315

Infinite phased dipole array, discussing integral equation, current distributions and active admittances

04 p0571 A69-14316

Bandpass characteristic for wide instantaneous bandwidth microwave components for phased arrays, noting error effect on compressed signal and time delay design

04 p0571 A69-14318

Semiconductor microwave phase shifters for electronic steering of phased array radar antennas noting cost, reliability and properties of steerable antennas

04 p0572 A69-14319

Reciprocal latching ferrite phase shifters application to lightweight scanned phased arrays, noting quasi-circularly polarized modes with lowest insertion loss

04 p0572 A69-14320

Phased array antenna radiator element design, emphasizing configuration selection and reflection loss for beam steering

04 p0572 A69-14321

Impedance matching selection for phased array element, using element impedance data and equivalent circuit

04 p0572 A69-14323

HAPDAR-TACOL phased array radar design, discussing array patterns and multitarget tracking performance

04 p0556 A69-14324

Hybrid mode Ku-band mixer steering electronic scanning phased array design

04 p0572 A69-14325

Cassegrain two reflector antenna modification by discrete phased array, allowing for subunit redesign

04 p0572 A69-14326

Two dimensional electronically scanned k-band phased array antenna design and performance, discussing radiometric system

04 p0572 A69-14328

Radiation properties of spherical phased array of 16 flat spiral antennas and radiation field polarization characteristics

04 p0573 A69-14331

Radiation pattern of linear phased antenna array calculated during commutated scanning

04 p0577 A69-14785

Frequency controlled time delay network for broadband phased array antenna steering

04 p0580 A69-15469

Equivalent network representation of feedthrough lens array taking into account mutual coupling between elements to predict performance characteristics

08 p1280 A69-20014

Phasing of active region of log-periodic array antennas by modulated impedance feeders, discussing monopole and slot arrays

08 p1281 A69-20015

Resonance conditions in dielectric sheathed or plug loaded phase arrays of waveguides

08 p1281 A69-20034

Forced surface wave resonances in dielectric free 45 degree triangular grid circular waveguide phased arrays

08 p1282 A69-20038

Plane H polarized electromagnetic wave diffraction incident on array of rectangular rods described by linear algebraic equations

08 p1275 A69-20433

Electronically phased array antenna system design optimization and testing for application to spin stabilized satellites

08 p1289 A69-20969

Phased array radar system for UHF detection, identification and tracking of orbiting objects and ballistic missiles, noting system design and hardware

12 p2028 A69-25906

Electronically scanned and fixed multiple beam phased arrays for spaceborne microwave radiometric sensors

12 p2044 A69-26977

Helix antennas for phased arrays for spacecraft, discussing performance and development

13 p2228 A69-27632

Admittance of radiating elements in circular array with longitudinal slots on conducting cylinder, taking into account element interactions

13 p2234 A69-28505

Stepped scanned ring monopulse array, discussing pattern analysis, directivity, co-phased and quasi-phased model

14 p2419 A69-28894

Phased array blindness at inoperative scan angles explained in terms of elements excitation and termination caused by leaky wave
17 p2928 A69-33872

Driving point admittance of radiating aperture in infinite periodic phased array, determining Floquet series and coefficients of waveguide modal expansion
17 p2938 A69-33876

Bandwidth limitations for phase steered planar arrays in satellite applications, discussing weight reduction by modulo 2 pi beam steering
17 p2941 A69-34082

Phased arrays applied to inertialess electronic steering of satellite antennas, discussing digitally steered, retrodirective and hybrid matrix arrays
17 p2942 A69-34083

Beam control of optically fed two axis airborne electronically scanned phased arrays by on-array and off-array processing
17 p2942 A69-34085

Gain measurement of two element phased array aperture antenna during ATS-C tracking
19 p3272 A69-36254

Modified residue-calculus technique combined with scattering matrix multiple reflection techniques for boundary value problems in waveguide phased arrays, diffraction gratings, etc
20 p3505 A69-37298

Active admittance, realized gain and linear polarization degradation vs scan angle for infinite periodic phased arrays of circular apertures
20 p3507 A69-37844

Strapped down phased array radar tracker mechanization with digital loop closure electronics for homing missiles, noting cost advantages
[AIAA PAPER 69-873] 21 p3763 A69-39399

MERA /Molecular Electronics for Radar Applications/ modules testing in planar array simulator, measuring far field amplitude patterns in transmitting and receiving modes
22 p3912 A69-40067

Circular and spherical antenna arrays elements random distribution in three dimensional space using Monte Carlo method, considering arbitrary excitation and nonisotropic elements
22 p3914 A69-40704

Spacecraft phase array designed for use on synchronous communication satellite, discussing low structural weight packaging and unfurling problems and helix approach
22 p3915 A69-40705

Redirection of time varying signal between specified points by arbitrarily spaced antenna array elements with condition involving time delays for validity of retrodirection
23 p4136 A69-41580

Quantization sidelobe characteristics of phased array with triangular and rectangular element arrangement
23 p4137 A69-41591

S band phased array receiver developed to track automatically moving telemetry transmitter by electronic beam steering
23 p4120 A69-41751

Statistical analysis of random production errors on phasing section polarization field of antenna with elliptical polarization
23 p4125 A69-42041

Diffraction characteristics of electromagnetic wave by periodic two element arrays, noting amplitude measurement of harmonics in millimeter wavelength range
23 p4139 A69-42044

Microwave integrated circuit applications to reflective and transmissive phased arrays, discussing radar system elements
24 p4286 A69-43109

Microcircuit phased array electronic countermeasures system design and hardware techniques for aerospace applications, analyzing adaptive, retrodirective and combination array systems
24 p4287 A69-43110

PHASED LOCKED SYSTEMS

Injection phase-locking characteristics of LSA /limited space charge accumulation/ mode transferred-electron diode oscillators, employing negative conductance and equivalent circuit
14 p2421 A69-29544

PHENOL FORMALDEHYDE

Ionic and nonionic mineral oxide powder fillers influence on stereopolymers lattices formed from phenolformaldehyde oligomers, discussing mechanical properties
08 p1335 A69-20331

PHENOLIC RESINS

Quantitative determination of phenolic content in composite materials by pyrolysis gas chromatography method
01 p0025 A69-11267

Phenolic and epoxy adhesives for metal-metal and honeycomb bonding, discussing cold cure adhesives for aircraft structures and aircraft floor sandwich design optimization
04 p0606 A69-14845

Silica fabric reinforced phenolic composites mechanical properties at temperatures above cure level
09 p1530 A69-22321

Nozzle ablations based on chemical mechanism, discussing pure or reinforced phenolic resin
11 p1999 A69-24908

Time and temperature dependence of plastic properties of fiber reinforced phenolic heat shield materials
12 p2119 A69-26825

Phenolic resin and silica cloth laminates transparency to IR radiation, noting experimental results
18 p3136 A69-34640

Hexagonal and nonhexagonal cell phenolic honeycomb design as energy dissipating material noting processing, composite constituents, cell configuration and usage environment
19 p3353 A69-35503

Ablation effect on heat transfer coefficient of carbon, silica and ceramic cloths impregnated with phenolic resin subjected to torch testing and motor firing
21 p3753 A69-39800

PHENOLS

Thermodynamic dissociation constants of alkyl phenols in aqueous and methanol media based on UV spectroscopic analysis, noting anticarcinogenic properties
11 p1831 A69-24539

PHENOMENOLOGY

Lasers, reviewing phenomenology, physical and theoretical fundamentals, quantized energy levels, population of energy levels and laser components
06 p0936 A69-18003

Observations in quantum theory, considering object state, apparatus effects, eigenvalues probability distribution, etc
20 p3576 A69-37581

PHENYLS

Neat alpha styryl azide transformation into 2-phenylazirine, 3,6-diphenylpyridazine and 2,5-diphenylpyrrole after one month at room temperature in brown glass bottle
10 p1651 A69-23307

Free lysine and dinitrophenyl /DNP/ derivatives determined quantitatively by ion exchange chromatography
17 p2917 A69-33651

Compensatory hypertrophy effects on adrenal phenylethanolamine n-methyl transferase /PNMT/ activity in rats
23 p4080 A69-41404

PHILOSOPHY

NT PARADOXES

Philosophical problems of Einstein theory of gravitation and relativistic cosmology - Conference, Kiev, June 1966
14 p2482 A69-28856

Einstein general theory of relativity, discussing evolution and disunity among physicists and philosophers on universal relativity of mechanical motion
14 p2483 A69-28857

General relativity theory philosophical substance and meaning, discussing Einstein formulations and bases of classical, relativistic and quantum physics
14 p2483 A69-28859

Categorical structures in theoretical thinking for philosophical fundamental physical laws analysis, including space-time concept changes in classical physics and in theories of relativity
14 p2484 A69-28861

Soviet book on theories of origin, nature and evolution of life from viewpoint of dialectic materialism, covering evolution trends, cell differentiation, etc
19 p3259 A69-36746

PHOBOS

Deimos and Phobos mutual secular perturbations from calculated masses and orbital elements, using canonical systems of equations
10 p1780 A69-23615

PHOEBUS NUCLEAR REACTOR

Liquid hydrogen pumping for Phoebus reactor, discussing feed systems, nozzles, configurations, design, testing, etc
[AIAA PAPER 67-478] 21 p3769 A69-39751

PHONETICS

Speech intelligibility in air at ground level and in helium-oxygen mixture at 18,000 ft
12 p2019 A69-26548

PHONOCARDIOGRAMS

U PHONOCARDIOGRAPHY

PHONOCARDIOGRAPHY

Systolic murmurs and flight personnel evaluation, noting phonocardiographic definition and tracings of specific systolic murmurs
09 p1445 A69-22726

Intravascular pressure and sound measured in anesthetized dogs and humans using fiberoptic pressure catheter
17 p2917 A69-34172

Frequency analysis of second heart sound splitting in patients with coronary artery disease assessed clinically and by phonocardiography
24 p4261 A69-42726

Abnormally slow ultrasound diastolic slope detected by mitral valve motion study in patients with clinically pure mitral insufficiency
24 p4261 A69-42727

PHONON BEAMS

Phonon interactions with recoilless gamma rays, considering usability of Mossbauer effect as probe for VHF acoustic experiments
10 p1724 A69-23088

PHONONS

NT PHONON BEAMS

Multiphonon orbit-lattice relaxation of excited states of rare earth ions in crystals, measuring fluorescence lifetimes, quantum efficiencies and transition rates
01 p0134 A69-10011

Many valley n-type Ge and Si semiconductors dissipative current breakdown effects, noting dependence on symmetry of valleys and phonon scattering pattern
02 p0298 A69-12098

Electroacoustic amplifier based phonon devices, using surface waves on piezoelectric materials to speed radar data real time processing
03 p0394 A69-13353

Thermoelectric and thermomagnetic properties of bismuth at low temperatures, assuming thermal EMF due to phonon capture of carriers
03 p0488 A69-13885

Phonon capture by electrons in semiconductors with high permittivity in external electric field
03 p0489 A69-13891

Phonon states effective density in neodymium trichloride from vibronic spectra accompanying electronic transitions in trivalent Pr and Nd ions
03 p0473 A69-13907

Displacement correlations and frequency spectra for mass disordered lattices, deriving cluster expansion for phonon Green function
03 p0493 A69-14241

Raman spectra of optical phonons in semiconductors, using reflection techniques and Ar laser excitation
06 p0936 A69-17882

Electron and phonon tunneling spectroscopy in metal Ge contacts, noting improved agreement with one electron model
06 p0982 A69-18234

Electron plasma and magnetic field effects on polaritons in semiconducting GaAs studied by Raman scattering of light at small angles
07 p1200 A69-19401

Magnetophonon oscillations of transverse magnetoresistance of n-type epitaxial GaAs in pulsed magnetic field
08 p1373 A69-20760

Localized plasmons and optical phonons occurrence on local plasma levels, noting role of impurity atom in localized exciton-plasma resonance
09 p1548 A69-21674

Thermoelectric and thermomagnetic properties of bismuth at low temperatures, assuming thermal EMF due to phonon capture of carriers
11 p1938 A69-25686

Phonon capture by electrons in semiconductors with high permittivity in external electric field
11 p1939 A69-25692

Tellurium doping effect on phonon diffusion in GaSb, discussing thermal conductivity at low temperatures
12 p2142 A69-26294

Single crystals garnets Raman spectra using laser radiation, separating phonon spectra of host lattices from electronic Raman effect

14 p2507 A69-29334

Magnetoelastic resonant interaction of microwave longitudinal phonons propagating at right angles to magnetic bias applied to YIG rod axis

15 p2565 A69-30184

Hole mobilities in InSb due to phonon and ionized impurities scattering on basis of strain potential constants

16 p2824 A69-31575

Magnetoquantum-electric effect, analyzing center motion of cyclotron orbit during photon and phonon absorption and current quantity

16 p2826 A69-31823

Phonons, electrons and protons in ferro- paraelectric and hydrogen bonded ferroelectrics, examining higher frequency optical and lower frequency dielectric properties

16 p2827 A69-32262

Lattice vibration theory of solid state diffusion for Cu including anharmonic effects formulated using equilibrium statistical mechanics, considering interacting phonon events

17 p3015 A69-32822

Qualitative interpolation formula for phonon frequency spectrum of mass disordered alloys three dimensional systems at high concentrations

20 p3583 A69-37279

Optical frequencies and polarizations of IR active phonons of tysonite lanthanide fluorides based on Kramers-Kronig reflectance spectra analysis

22 p3993 A69-40729

Spin-phonon systems thermal noise, based on combined lattice and spin lattice Hamiltonian densities, applied to acoustic noise field measurements

24 p4350 A69-43061

PHOSPHATES

NT ADENOSINE TRIPHOSPHATE [ATP]
NT AMMONIUM PHOSPHATES
NT NUCLEOTIDES
NT POTASSIUM PHOSPHATES
NT PYRIDINE NUCLEOTIDES
NT URIDYLIC ACID

Phosphate cements for bonding mica ceramic to titanium in jet engine equipment

05 p0786 A69-16799

Uranyl ions interaction with phospholipid and cholesterol monolayers, using surface pressure and potential measurements

11 p1832 A69-25641

Corrosion resistance rate of duralumin sheet in aqueous superphosphate solutions dependence on concentration

12 p2113 A69-26124

Energy exchange of rare earth ions in uranyl phosphate liquids and glasses, studying sensitized luminescence origin

14 p2485 A69-29034

Chlorapatite and whitlockite compositions of phosphate minerals from chondrites determined by electron microprobe

15 p2690 A69-30706

Phosphate mineralogy of meteorites using X ray, electron-microprobe and chemical analyses, noting predominance of whitlockite

19 p3416 A69-36126

Active center chemical bond alteration influences on luminescence characteristics of phosphate glasses, noting quick energy transfer via ions

20 p3552 A69-37017

Magnetic ordering in dysprosium phosphate observed by high resolution spectral line intensity measurements, finding Neel temperature

21 p3773 A69-38331

Properties, relative magnitudes and relationship of pyrophosphate exchange reactions catalyzed by DNA polymerase from *Escherichia coli*

22 p3898 A69-41072

Deoxyribonucleoside triphosphate substrate binding to *Escherichia coli* DNA polymerase, conducting equilibrium dialysis

22 p3898 A69-41074

PHOSPHIDES

NT GALLIUM PHOSPHIDES
NT INDIUM PHOSPHIDES
NT SCHREIBERSITE

Optimal electroluminescent efficiencies for vapor grown gallium arsenide phosphide diodes, analyzing current spreading, absorption, impurity and composition effects

[ECS PAPER 103] 08 p1284 A69-20366

Optical and electrical properties of electroluminescent diffused gallium arsenide phosphide diodes with low donor concentrations, analyzing spectral emission and fabrication effects

16 p2758 A69-31699

Barringerite as Fe-Ni phosphide occurring in meteorite Ollague pallasite, indicating troilite and schreibersite crystallization at high temperatures

18 p3205 A69-35433

PHOSPHINES

Lewis acidity of alanes, discussing interactions of trimethylalane with amines, ethers and phosphines

07 p1074 A69-18630

Ligand field transitions in tertiary phosphine and arsine complexes of ruthenium and osmium

07 p1075 A69-19483

PHOSPHORESCENCE

Fluorescence and phosphorescence from tryptophan powders stimulated at low temperatures with UV, vacuum UV, fast electrons and X rays

03 p0372 A69-13487

Temperature effects on phosphorescence lifetimes and intensities of aromatic hydrocarbons in polymethyl methacrylate, estimating activation energy for thermally activated nonradiative decay mode

10 p1652 A69-23523

PHOSPHORS

Thermographic phosphor technique to provide transient temperature measurements in impulse wind tunnel

01 p0078 A69-10152

Thermographic phosphor coatings to obtain optical quantitative heat transfer distribution on wind tunnel models

12 p2099 A69-27150

Luminophors for carbon dioxide laser radiation visualization noting controlled sensitivity, quick response and resolution

18 p3153 A69-35259

Colors production on electroluminescent display using phosphors impressed-frequency/emission-color relationships together with chromatic biasing

24 p4286 A69-42900

PHOSPHORUS

Depth and planarity of zinc diffused junctions in GaP using temperature, phosphorus overpressure and time as independent variables

13 p2322 A69-28136

B-type stellar spectra, discussing atmospheres and local thermal equilibrium from considerations of He I and P II lines relative strength

15 p2679 A69-30046

Kamacite analysis for P and Ni in chondrites, pallasite and iron meteorites, considering cooling rate and rhadite

19 p3417 A69-36131

PHOSPHORUS COMPOUNDS

NT ADENOSINE TRIPHOSPHATE [ATP]
NT AMMONIUM PHOSPHATES
NT GALLIUM PHOSPHIDES
NT INDIUM PHOSPHIDES
NT NUCLEOTIDES
NT ORGANIC PHOSPHORUS COMPOUNDS
NT PHOSPHATES
NT PHOSPHIDES
NT PHOSPHINES
NT POTASSIUM PHOSPHATES
NT PYRIDINE NUCLEOTIDES
NT SCHREIBERSITE
NT URIDYLIC ACID

Gettering effect in silicon of phosphorsilicate glass surface layer and underlying phosphorus layer on gold and copper

03 p0487 A69-13640

PHOSPHORUS METABOLISM

High energy phosphate splitting for energy requirements not met by oxidation during supramaximal exercise, noting glycogen splitting into lactic acid after phosphate exhaustion

23 p4100 A69-41443

PHOSPHORUS POLYMERS

Thermal and mechanical properties UV of diazadiphosphetides, carbodiimides and phosphorus amide epoxies resins composites for use in environmental extremes

19 p3356 A69-35528

PHOSPHORUS 32

P32 distribution in protein of blood serum, liver and brains of rats bombarded with high energy protons

02 p0198 A69-11507

PHOSPHORYLATION

High oxygen concentration influence on animal organisms noting respiration, pulmonary gas exchange,

hypoxia, brain phosphorylation, immunological indices and morphological structure of rats and mice

05 p0709 A69-16512

High oxygen concentration influence on animal organisms noting respiration, pulmonary gas exchange, hypoxia, brain phosphorylation, immunological indices and morphological structure of rats and mice

18 p3095 A69-34731

Successive X ray doses effect on oxidative phosphorylation of vitamin B 1 in white rats liver tissue ultrastructure during and after irradiation, establishing thiamine biosynthesis suppression

21 p3658 A69-39056

Fluorescence properties of nucleotides, polynucleotides and phosphorylated derivatives as function of temperature, pH and ionic strength

22 p3898 A69-41078

PHOTOABSORPTION

Cultured Chinese hamster cells responses to UV light of different wavelengths indicating photon absorbing molecules inhibition of colony development

07 p1068 A69-19492

PHOTOCATHODES

Plasma flow from Penning discharge with incandescent cathode in vacuum controllable by varying voltage, pressure and magnetic field strength

11 p1933 A69-25543

Stellar photometric data for various photocathode materials used to calculate radiant energy falling on earth

17 p2973 A69-33092

PHOTOCELLS

U PHOTOELECTRIC CELLS

PHOTOCHEMICAL REACTIONS

NT PHOTOCROMISM
NT PHOTODECOMPOSITION
NT PHOTOLYSIS
NT PHOTOSYNTHESIS
NT RADIOLYSIS

Photochemistry and radiation chemistry - Conference, Natick, Massachusetts, April 1968

01 p0024 A69-10617

Long lived low level chemiluminescence due to gaseous reactions at low concentrations induced by mercury lamp irradiation or Tesla coil discharge

01 p0024 A69-10618

Linearized perturbation treatment developed for photochemical and dynamical effects in gravity wave production of E-region ionospheric irregularities, including ion convergence

01 p0073 A69-11175

Photochemistry in dry atmosphere, discussing ozone density vertical distribution in upper atmosphere and influence of O and ozone reactions with H compounds

02 p0245 A69-12694

Atmospheric ozone photochemistry, studying time dependence on hydrogen compounds, equilibrium concentration effects on reaction rates, latitude and season

06 p0916 A69-17004

Photochemical ignition of low pressure fuel-oxidizer mixtures applied to unsensitized stoichiometric mixtures of methane-oxygen and hydrogen-oxygen [WSCI PAPER 68-42]

06 p1034 A69-17791

Time dependent model of photochemical, advective and turbulent effects on meridional ozone distribution

07 p1122 A69-18253

Organic fluorine chemistry, discussing synthesis reactions and reaction of polyfluorocycloalkenes with various nucleophiles

08 p1269 A69-21129

Photochemical production of reduced organic compounds of C and N in primitive earth atmosphere

09 p1444 A69-21465

Photochemical attitude control rocket adaptable to self contained command signal or remote signal transmission, discussing light irradiation of propellant for thrust control

12 p2148 A69-26801

Ionic and biradical mechanisms in thermal and photo cis-trans isomerizations elucidated by planar and twisted configurations of polyenes

13 p2216 A69-27618

Venusian upper atmosphere dissociation and ionization, considering photochemical and dynamic processes and molecular, eddy and ambipolar diffusions

13 p2344 A69-27643

Diffusion of ozone distribution tracers in stratosphere, based on photochemistry in oxygen- only and oxygen-hydrogen atmospheres

13 p2294 A69-28492

Atmospheric ozone distribution in meridional plane including time effects of photochemistry, advection and turbulence assuming zonal symmetry

16 p2785 A69-32624

Ozone concentration photochemistry between 30-35 km, determining parameters in Hampson theory /hydrogen-oxygen atmosphere/ 16 p2787 A69-32636

Atmospheric ozone distribution as function of photochemical reactions, advection and vertical motions 16 p2787 A69-32643

Jupiter photochemistry above 1000 A, noting methane and ammonia photolysis zones, atmospheric pressures and hydrogen recombinations 17 p3032 A69-33165

Transient electrical responses from retinas, discussing visual pigment role in visual excitation, photochemistry, etc 19 p3258 A69-36377

Photographic film properties, discussing base material, emulsion, photochemical process, sensitometry, densitometry, granularity and color film 20 p3541 A69-37746

Airglow and vertical eddy transport photochemical models, analyzing O green line and OH emission distribution 21 p3713 A69-38523

Photodetachment of electrons from nitrogen dioxide ions by light in violet portion of visible spectrum, noting wavelength dependence 22 p3985 A69-40575

Model for ozone formation, distribution and decomposition at 15-45 km assuming zonal symmetry, including time effects of photochemistry, advection and turbulence 24 p4309 A69-43147

PHOTOCHEMISTRY
U PHOTOCHEMICAL REACTIONS

PHOTOCROMISM

Holography principles to design high capacity high speed storage devices, using photochrome recording medium 07 p1133 A69-19158

Photochromic panel for flash blindness protection using epoxy plastic plates containing aromatic hydrocarbon compounds excited to triplet states 21 p3668 A69-39783

Photochromic film behavior under high power argon ion laser excitation studied for display and computer memory applications, using excitation model 23 p4173 A69-41629

PHOTOCONDUCTIVITY

P-n-p junctions photoconductivity decay observation, determining signal bulk minority carrier lifetime in thin n regions 01 p0136 A69-10242

Space charge limited currents in SbSI single crystals with gallium electrodes during phase transition, discussing sticking probability and photoconductivity 01 p0137 A69-10258

Recombination effects in high resistivity Cu doped gallium arsenide single crystals determined by photoconductivity methods 02 p0294 A69-11627

Photocurrent carriers recombination in organic semiconductor rhodamine B films analyzed as function of illumination 03 p0489 A69-13890

Modulated photocurrent in CdS crystal obtained by irradiation with intensity modulated electron beam, noting relaxation time and trap concentration 03 p0490 A69-13946

Quality control of semiconductor materials, analyzing homogeneity by statistical distribution of nonequilibrium carriers based on photoconductivity measurement 04 p0642 A69-14856

Current carrier concentration temperature dependence in Te-doped silicon single crystals by analyzing photoconductivity spectra 04 p0644 A69-15267

Low temperature spectral distribution of impurity induced photoconductivity in p-type InSb crystals prepared by zone refining 04 p0644 A69-15270

Photoconductivity induced by laser pulses in semiconductor with parabolic dispersion law, linear transition and nonequilibrium carrier concentration higher than equilibrium carrier concentration 07 p1148 A69-18690

IR photoconductivity spectra at surface of gold doped silicon, establishing monopolarity 08 p1373 A69-21073

Current oscillations in semiinsulating O and Cr doped GaAs samples at room temperature, noting photoconductivity excitation spectra 09 p1557 A69-21753

Space charge limited currents in SbSI single crystals with gallium electrodes during phase transition, discussing sticking probability and photoconductivity 09 p1559 A69-22651

Photoelectric effects produced by polarized radiation in isotropic optical media, discussing photo EMF and photoconductivity in multivalley semiconductors and plasmas 10 p1701 A69-23138

IR radiation effects in cadmium sulfide crystals with green edge emission at low temperatures, discussing luminescence, photoconductivity and conductivity glow curves 10 p1746 A69-23565

Photoconductivity of semiconductors with multivalley electron energy and isotropic hole spectra, discussing nonlinearity of field dependence 11 p1937 A69-24913

Photocurrent carriers recombination in organic semiconductor rhodamine B films analyzed as function of illumination 11 p1939 A69-25691

CdS single crystals spectral dependence of photocurrent, photoconductivity quantum yield and photoelectromotive force in exciton absorption region 14 p2504 A69-28990

Automatic recording of spectral distribution of high resistance semiconductors photoconductivity using spectrograph monochromator 14 p2447 A69-29409

Majority carrier lifetime temperature dependence obtained from photoconductivity measurements of p-type GaAs crystals doped with Ge 15 p2666 A69-30056

Quality control of semiconductor materials, analyzing homogeneity by statistical distribution of nonequilibrium carriers based on photoconductivity measurement 15 p2667 A69-30248

Imperfection photoconductivity in electron irradiated Li-doped Si annealed at room temperature, noting level rearrangement in O rich material 19 p3382 A69-35696

Photocurrents and recombination luminescence in n-type diamonds subjected to UV, TI 204 and X ray irradiation indicating local electron centers formation 19 p3383 A69-36167

Transient recombination lifetimes in n-type float zone Si from 4.2 K to room temperature, obtaining electrical and photoconductivity values 19 p3383 A69-36447

Electrons and optical phonons interaction effects on optical and photoconducting properties of semiconductors, discussing phonon cyclotron resonance and oscillatory and magneto-oscillatory photoconductivity 19 p3385 A69-36517

Antimony trisulfide single crystals spectral dependence of impurity and stimulated impurity photoconductivities, comparing optical and thermal activation energies 22 p3994 A69-41042

Negative surface potential effect on noise and photoconductivity in Ge doped p-type InSb single crystals at low temperature in vacuum 24 p4362 A69-43738

PHOTOCONDUCTORS

Optimal modulation shape for light emission flux as function of photoresistance detector and resonance amplifier pulse characteristics 04 p0560 A69-15376

Pulse radiation effect on dielectric constant of sintered CdS photoresistors, discussing capacitance dependence on intensity, type and frequency of light 05 p0806 A69-15694

Phototubes, photodiodes, photoconductors, quantum detectors, nonlinear optical detectors and heterodyne receiving systems for photodetection of laser outputs 09 p1518 A69-22126

Photoconductor open circuit voltage determination, calculating responsivity and sensitivity of actual and ideal cases 12 p2093 A69-26481

One inch ceramic vidicon with slow scan photoconductor, electrostatic focusing and magnetic deflection to withstand sterilization and environmental testing for space applications 13 p2234 A69-28262

IR radiation detection by photoconductor in microwave resonator noting electric field influence 13 p2223 A69-28639

Optimal modulation shape for light emission flux as function of photoresistance detector and resonance amplifier pulse characteristics 16 p2752 A69-32123

Collector efficiency limitation of surface barrier-limited photoconductors attributed to photogenerated carrier diffusion into electrode 20 p3583 A69-37732

PHOTOCURRENTS
U ELECTRIC CURRENT
U PHOTOELECTRIC EMISSION

PHOTODECOMPOSITION

Photodegradation of organic polymers by UV radiation exposure, emphasizing polyvinyl chloride photochemistry and radiation stabilization 01 p0102 A69-10861

Photodestruction rate of H molecules by absorption of Lyman or Weber band radiation in interstellar space calculated at various distances from early stars 18 p3204 A69-35351

PHOTODETECTORS
U PHOTOMETERS

PHOTODIODES

Broadband signal and noise performance of direct detection optical receiver consisting of solid state photodiode and baseband amplifier 04 p0556 A69-14283

P-n planar avalanche photodiode without guard ring noting electrical properties, uniform multiplication and fabrication 05 p0733 A69-16559

Photoparametric up-converter with optimum SNR, noting suitability of direct detection of amplitude modulated optical signals 07 p1104 A69-18888

Ag-GaAs Schottky barrier photodiodes, describing fabrication and use as UV radiation detectors 09 p1462 A69-21334

Phototubes, photodiodes, photoconductors, quantum detectors, nonlinear optical detectors and heterodyne receiving systems for photodetection of laser outputs 09 p1518 A69-22126

Avalanche Schottky barrier photodiodes fabricated by plating GaAs with thin Pt layer and forming proton radiation guard ring, discussing gain bandwidth and SNR 13 p2226 A69-27195

GaAs photoelectric devices for radiation detection and light to electric energy conversion, considering photoresistors, photodiodes and solar cells 13 p2203 A69-27465

PHOTODISSOCIATION

Ionization, neutralization and charge exchange processes in ionosphere, detailing dependence of photodissociation and collision detachment of negative ions 01 p0066 A69-10598

Photodissociation and photoionization of diatomic molecules at high temperatures with calculation of absorption cross sections 03 p0473 A69-14147

Mass spectrometric measurements to determine energy distributions of ions produced in dissociative photoionization of O molecules 06 p0960 A69-17110

Carbon molecule photodissociation in cometary atmospheres, discussing intensity level distribution based on model 06 p1004 A69-17534

Recombination mechanism between CO and O produced by photodissociation of carbon dioxide in upper atmosphere of Venus and Mars 07 p1214 A69-18615

Wavelike photodissociation of gas molecules under quasi-monochromatic pulsed radiation, investigating associated supersonic disturbances 08 p1354 A69-19950

Primary processes leading to atomic and molecular hydrogen formation in hydrogen peroxide photolysis at 1236 A, noting OH formation 10 p1652 A69-23527

Interstellar molecular hydrogen and CH photodissociation, discussing molecular formation rates in interstellar medium 10 p1781 A69-23672

Diatomic hydrogen abundance evolution in uniform medium, discussing photodissociation effects and galactic evolution 15 p2680 A69-30205

Photodissociation of diatomic hydrogen by solar radiation for Venus atmosphere investigation, considering H atoms production rate by Stecher-Williams process 20 p3609 A69-38102

Negative ion concentrations in plasma by flash photodissociation, using Q switched laser for irradiation 21 p3778 A69-39574

Positively charged diatomic hydrogen molecules in interstellar extinction and photodissociation cross section in terms of formation mechanisms
24 p4375 A69-42610

PHOTOELASTIC ANALYSIS NT PHOTOGRAMMETRY

Stress concentrations around elliptical perforations in shrunk plates with bonded boundaries based on photoelastic models
02 p0345 A69-12391

Photoelastic analysis of HF stress waves propagating in bars and plates subjected to damped sinusoidal loading
[ASME PAPER 68-WA/APM-27]
04 p0669 A69-14397

Poincare sphere representation of polarized light used to predict rotation effect on optical observations in photoelastic shell analysis
04 p0683 A69-15495

Three dimensional photoelastic analysis based on optical theory of multilayer reflection technique
04 p0683 A69-15496

Piezooptical method applied to anisotropic bodies and reinforced plastics, deriving relation between dielectric tensors and stresses and strains
05 p0837 A69-16038

Photoelastic study of interaction between overlapping parallel cracks in tensile stress field
05 p0842 A69-16435

Strain distribution at crack base measured by Fabry-Perot interferometer and photoelastic coating
06 p1020 A69-17127

Anisotropic glass fiber reinforced epoxy resin composite under biaxial and uniaxial loads, noting isochromatics and isoclinics in photoelastic analysis
07 p1170 A69-18715

Two dimensional photoelasticity for minimizing stress concentration in perforated rectangular plate subjected to restrained shrinkage, discussing application to solid propellant rocket grains
08 p1412 A69-20255

Axisymmetric states of stress determined by photoelasticity, analyzing meridional slice under normal and oblique incidence
08 p1412 A69-20259

Structural reliability tests using photoelasticity and associated techniques, discussing computer methods, materials research, etc
09 p1479 A69-22734

Laser radiation induced stress waves in transparent media using dynamic photoelastic technique
10 p1707 A69-24213

Moire patterns for photoelastic strain analysis noting applications to elasticity, plasticity and creep problems
11 p1982 A69-24944

Stress concentration around square hole in celluloid plate subjected to creep under biaxial tension analyzed by photocreep method
12 p2178 A69-26000

Ultrahigh speed multiple framing photography system using sequentially modulated ruby laser and smear type camera applied to dynamic photoelasticity
12 p2086 A69-26166

Tempered glass plates strength nondestructive testing by scattered light photoelastic method, discussing application to aircraft windshield sandwich structures
[AIAA PAPER 68-323]
12 p2118 A69-26768

Stress distribution in matrix of unidirectionally fiber reinforced composite subject to shrinkage and normal transverse load, using three dimensional photoelastic analysis
12 p2189 A69-27162

Structural stress under acceleration loading simulated by two dimensional photoelastic model noting improvement of fringe patterns quality
14 p2532 A69-28885

Box girders stress distribution analyzed by stress-freezing method compared with photoelastic measurement
15 p2705 A69-30419

Automated shear difference analysis of three dimensional photoelastic model stress distribution by stress-freezing and slicing technique
15 p2609 A69-30680

Stress concentration on circular holes and notches in anisotropic oriented glass fiber reinforced plastics determined by using photoelastic birefringent coatings
15 p2713 A69-31053

Stresses in fixed two dimensional photoelastic models analyzed by hologram interferometry, displaying isochromatic and isopachic interference patterns
15 p2611 A69-31110

Photothermoelastic analysis of thermal stresses in turbine wheels with welded blades, noting stress concentration reduction
15 p2715 A69-31488

Schlieren and photoelastic methods for continuous and pulsed ultrasonic waves propagating in transparent media, discussing nondestructive testing applications
15 p2617 A69-31510

High speed photography using multiply pulsed ruby laser, Pockels cell modulation and smear camera for isochromatic and photoelastic pattern recording
19 p3306 A69-35731

Photoelastic model methods for two and three dimensional investigations of microstresses in composite materials
20 p3565 A69-36940

Cranz-Schardin camera for high speed recording in dynamic photoelastic fringe pattern studies, discussing framing rates, fringe gradients and design
20 p3541 A69-37778

Photoelastic data analysis for stress separations, discussing shear slope and Tesar methods
21 p3843 A69-39316

Poincare sphere properties representing birefringent behavior of materials and qualitative measurement technique for elliptically polarized light
21 p3844 A69-39318

Photoelastic and micromechanic studies of epoxy resins of varying Young moduli by simultaneous stress analysis of FRP and matrix materials
21 p3846 A69-39796

Isoclinic angle errors effects on photoelastic fringe order measurements accuracy
22 p3945 A69-40082

Moire effect applications to stress analysis, enumerating advantages over conventional grid techniques
22 p4042 A69-40315

Babinet compensator with birefringent wedges made of stress frozen photoelastic material rather than quartz
22 p4042 A69-40442

Scattered light methods inaccuracies for nondestructive analysis of generally stressed photoelastic models, noting modified Mini-max method
24 p4396 A69-42737

Isoclinics determination from fringe patterns, obtaining continuous principal stress direction data for photoelastic model in bonded polariscope
24 p4396 A69-42738

Photothermoelastic investigation of thermal stress concentrations around circular cavities and inclusions in two dimensional composite models
24 p4396 A69-42739

PHOTOELASTIC MATERIALS

Buckling deformation and stress fields around central slits in photoelastic models and metal sheets under tensile load
10 p1796 A69-23069

Electric vector transformation for three dimensional photoelastic medium irradiated by light in reverse direction, noting optical systems of birefringent plates and rotators
12 p2180 A69-26339

Photoelastic materials stressed state analysis by inserting analyzer and polarizer into sandwich medium, obtaining polarized light field
18 p3138 A69-35152

Surface stresses in rotating asymmetric profiled disks and axial deflection effects computed theoretically and compared to measurements on photoelastic models
19 p3447 A69-36862

Linear limit uniaxial stresses for stress-strain and stress-birefringence in photoelastic and mechanical model materials
20 p3628 A69-37777

Photoelastic behavior in amorphous solids, proposing microstructural mechanism for deformation birefringence
22 p3972 A69-40081

Epoxy resin materials assessed for model materials for three dimensional photoelasticity
22 p4042 A69-40311

Babinet compensator with birefringent wedges made of stress frozen photoelastic material rather than quartz
22 p4042 A69-40442

Principal stresses determination in optically active photoelastic models from fringe pattern while obtaining sum from Dirichlet problem solution by straight line method
23 p4228 A69-41987

Circular cylindrical photoelastic shells buckling modes under axial compression using high speed isoclinic photography, discussing shallow shell equations applicability to early stages
24 p4404 A69-43652

PHOTOELASTICITY

NT PHOTOVISCOELASTICITY

Three dimensional thermal stress distribution in case bonded solid propellant determined by scattered light

photoelastic technique coupled with transparent rocket motor model
02 p0345 A69-12371

Holographic interferometer for isopachic stress analysis, utilizing photochromic recording for real time interference
04 p0599 A69-15013

Collection of papers on photoelasticity by M. M. Frocht
08 p1410 A69-20116

Graphical methods for photoelastic effect behind system with stresses rotating about direction of light propagation, discussing circle technique
09 p1617 A69-22011

Structures analysis by photoelastic model techniques of stress visualization
10 p1794 A69-22941

Reversibility principle in transilluminated three dimensional photoelastic medium
14 p2535 A69-29359

Photoelasticity testing of stress gradient factor on notched tensile specimens
17 p3052 A69-32982

Rotation effect of secondary principal axes in scattered light photoelasticity by dual observation method, deriving light intensity
21 p3844 A69-39317

Pulse ruby laser-smear camera ultrahigh speed multiple frame recording system, describing applications to transmitted and scattered light photoelasticity
22 p3944 A69-40076

Photographic high speed recording system characteristics effects on dynamic photoelastic fringe patterns fidelity
22 p3945 A69-40077

Scattered light photoelasticity dual observation method, describing automatic data collecting and interpreting system
22 p3945 A69-40079

Epoxy resin materials assessed for model materials for three dimensional photoelasticity
22 p4042 A69-40311

PHOTOELECTRIC CELLS

NT PHOTOVOLTAIC CELLS

Laser longitudinal oscillation modes beat frequencies measurement by grouping photoelectron velocities by HF field containing photomultiplier cathode
03 p0440 A69-13265

Phase method of photoelectric registration of stellar transition moments
04 p0601 A69-15252

CdSe single crystal films vacuum deposition for use of photocells base with p-n heterojunctions
07 p1198 A69-18512

Photocells with p-n heterojunctions from sintered CdS, describing spectral sensitivity and temperature dependence of no-load photo EMF
08 p1374 A69-21084

Recombination parameters and depth of levels of p-n junctions in semiconductor photocells determined from position of maximum spectral sensitivity
09 p1560 A69-22718

Photocell base thickness for optimal power to weight ratio, noting photons spectral distribution and absorption coefficient dependence on frequency
09 p1443 A69-22719

Solar cells operation in space flight, considering Si photoelectric cells characteristics and complete systems construction for spacecraft power supplies
12 p2015 A69-25865

Electromagnetic accelerometer with symmetrically placed photocells detecting small steel ball position
17 p2971 A69-32897

PHOTOELECTRIC EFFECT

NT PHOTOIONIZATION

Photoelectric effect of thin gold films on silver and quartz substrates, analyzing work function dependence on thickness of deposited metal
02 p0300 A69-12630

Photoelectric effect of thin gold film under electric field, noting work function dependence on film thickness exhibits extremum
02 p0300 A69-12631

Photocurrent pinch-off effect in high resistivity thin CdS crystals for evaluating donors, acceptors and surface states
03 p0488 A69-13757

Quadratic and cubic response in photoelectric emission in potassium antimonide under laser irradiation observed with measurement of energy distribution of excited electrons
05 p0771 A69-15813

- Nonlinear coupling between background illumination and illumination signal producing lateral electrical fields in p-n junction, noting effect on sensitivity of position sensor
07 p1101 A69-18654
- Photoelectric effects produced by polarized radiation in isotropic optical media, discussing photo EMF and photoconductivity in multivalley semiconductors and plasmas
10 p1701 A69-23138
- Two photon photoelectron counting statistics and intensity fluctuations of incident radiation compared with single photon detectors and applied to laser outputs
10 p1704 A69-23658
- Variable stars in Large Magellanic Cloud from photoelectric measurements obtained in blue and violet, including periods of Cepheids and some period amplitude differences
14 p2526 A69-29853
- Indium antimonide crystals polarity effect on photoeffect, analyzing quantum yields and energy spectrum
15 p2667 A69-30076
- Alloying pairs of metal pellets to n and p type semiinsulating GaAs, discussing photo effects
17 p3015 A69-32824
- Photoelectric effect without photons, discussing classical field falling on quantized atomic electron
17 p3007 A69-32838
- Optical frequencies mixing based on photoelectric effect in metals and semiconductors, noting internal photoconductivity
19 p3332 A69-35871
- Low energy electron accelerator to produce measurably small fluxes through photoelectric effect from Au cathode UV irradiation to achieve high flux stability
19 p3313 A69-36492
- Friction bearing vibration recording device using light beam and photodiode
20 p3539 A69-37436
- Photoelectric methods for pulsed and CW lasers output power and energy measurements
22 p3961 A69-40239
- Photoelectric spectrometer observations of 1966 total solar eclipse, discussing limb darkening curves for regions of continuum 1.5 A wide around 5728 and 6404 A
22 p4027 A69-40659
- Chemical high pressure laser action produced by stimulated phototransition of electrons at contact moment between pair of reacting nonexcited gas molecules
22 p3965 A69-41117
- PHOTOELECTRIC EMISSION**
GaAs photoemissive yield spectrum analysis, discussing transition energies and energy band structure models
01 p0140 A69-11254
- Photoelectric properties of n-n junction interfaces in gallium phosphide and arsenide semiconductors
02 p0294 A69-11630
- Observation of photocurrents generated in Schottky barrier diodes on barium titanate, suggesting practical utility of photon-to-electron conversion efficiencies
07 p1104 A69-18905
- Photoelectric light diagrams for eclipsing binary star
08 p1392 A69-20565
- Time dependent recoverable isothermal decrease of photocurrent in CdS crystals in vacuum, noting trap mechanism involving electron redistribution
08 p1374 A69-21187
- Dark and photocurrent volt-ampere characteristics induced by capture of carriers injected into illuminated CdS single crystals
09 p1555 A69-21506
- Atmospheric extinction function in Chile by using photoelectric spectrum scans, observing neutral component, Rayleigh scattering and ozone absorption variations
10 p1777 A69-23386
- Early type stars spectrophotometric parameters, discussing hydrogen beta, gamma and delta line widths, magnitude, etc
10 p1777 A69-23387
- Statistical characteristics of photocurrent pulse amplitudes during cathode exposure to gas laser outputs
11 p1834 A69-24611
- CdS single crystals spectral dependence of photocurrent, photoconductivity quantum yield and photoelectromotive force in exciton absorption region
14 p2504 A69-28990
- GaAs photoelectric emission at different activation degrees by adsorbed Cs and BaO layers, noting spectral response characteristics differences and causes
14 p2504 A69-28993
- Indium antimonide crystals polarity effect on photoeffect, analyzing quantum yields and energy spectrum
15 p2667 A69-30076
- IR quenching of photocurrent under field effect in CdS crystal
16 p2827 A69-32044
- Time dependent recoverable isothermal decrease of photocurrent in CdS crystals in vacuum, noting trap mechanism involving electron redistribution
18 p3183 A69-35156
- Multiphoton luminescence and photocurrent excitation by ruby and neodymium laser beams of KCl-Eu single crystals, noting brightness dependence on laser beam power
19 p3335 A69-36165
- Ruby laser-ultrahigh vacuum device for studying electron and ion emissions and light absorption of materials, noting influence of adsorbed gas layers
20 p3553 A69-37406
- Multiquantum photoemissive effect in metals, semiconductors and dielectrics emphasizing laser application for studying electromagnetic field
22 p3964 A69-40690
- Ultrahigh vacuum cleaved GaAs-Cs and GaAs-cesium monoxide photoemission acceptor densities, noting crystal parameters role
23 p4198 A69-41548
- PHOTOELECTRIC GENERATORS**
GaAs photoelectric devices for radiation detection and light to electric energy conversion, considering photoresistors, photodiodes and solar cells
13 p2203 A69-27465
- Faceted reflector for solar power installations with photoelectric converters, discussing reflector construction, efficiency and energy balance
16 p2741 A69-32798
- Solar cell retractable array for spacecraft multikilowatt power generation
19 p3254 A69-35711
- PHOTOELECTRIC MATERIALS**
Light sensitivity dependence of semiconductor-metal systems on layer thickness
14 p2508 A69-29666
- PHOTOELECTRIC PHOTOMETRY**
U ELECTROPHOTOMETERS
PHOTOELECTRICITY
Temperature effects on primary photocurrent of base collector and collector substrate junctions of isolated transistors from microcircuits
06 p0977 A69-16881
- Photoelectronic imaging systems in space exploration emphasizing acquisition time, storage capacity and transmission time
07 p1136 A69-19591
- Photoelectric measurement of chromospheric heights by method requiring neither high telescopic resolution nor best seeing, discussing trials during September 1967
08 p1385 A69-20070
- Multichannel photoelectric spectrometer design for Hale telescope, noting effectiveness in red and IR observations
08 p1318 A69-21131
- Photoelectric, calorimetric and photon-momentum methods for measuring laser output energy and power emphasizing liquid, wire and pyroelectric calorimeters
11 p1899 A69-25196
- Photoelectric polarimeter to record sky light intensity in form of polarized components, detailing construction and operation
12 p2078 A69-25892
- Photoelectronic image devices, discussing detectors, electronography, Lallemand camera, spectracon and electron image multipliers
12 p2082 A69-26136
- Photoelectronic high speed image intensifier framing camera, showing single shot synchronized photography of electric spark in air
12 p2082 A69-26137
- Photoelectric characteristics of thin film CdS-CdTe heterojunction diodes, considering I-V illuminance, spectral characteristics and conduction band continuity
13 p2230 A69-27882
- CdS single crystals spectral dependence of photocurrent, photoconductivity quantum yield and photoelectromotive force in exciton absorption region
14 p2504 A69-28990
- Optophotoelectric pickup design for angular displacement measurements, considering application of moire pattern produced by radial diffraction gratings
14 p2447 A69-29327
- Electrical and photoelectrical properties of semiconductor heterojunctions prepared by Ge epitaxy on gallium arsenide bases, showing dependence on base surface treatment
15 p2667 A69-30078
- PHOTOELECTROMAGNETIC DETECTORS**
U RADIATION MEASURING INSTRUMENTS
U SENSORS
PHOTOELECTRONICS
U ELECTRONICS
U PHOTOELECTRICITY
PHOTOELECTRONS
F 2 layer cut-off frequency predawn increase caused by sunrise, resulting in photoelectrons transfer along force lines at magnetically conjugate point
02 p0238 A69-11681
- Photoelectron energy loss mechanisms in planetary atmospheres, considering possible constituents in Mars and Venus upper atmospheres
02 p0321 A69-12118
- Hall mobility of photoelectrons in cadmium sulfide layers
03 p0491 A69-14055
- Latitude dependence of 6300 A /O I/ twilight airglow enhancement attributable to conjugate photoelectrons
05 p0756 A69-16280
- Auger and photoelectron spectroscopy for chemical analysis, noting effects of sample thickness, sample potential, surface contamination and X ray incident angle
07 p1075 A69-19775
- Zone structure of silicon-silicon dioxide system for silica films obtained by pyrolytic dissociation, discussing kinetics of photoelectrons capture at traps
09 p1555 A69-21478
- Spectral distribution of X ray atmospheric absorption used to determine high energy photoelectrons spectrum
09 p1577 A69-21774
- Satellite measurements of suprathermal electrons at conjugate sunrise, indicating photoelectron escape from production level and movement along geomagnetic lines into conjugate ionosphere
11 p1950 A69-25144
- Optical satellite tracking system using multicoincidence method of photon signal counting by Q switched laser
11 p1841 A69-25579
- Temporal correlations in light field from laser at threshold of oscillation, measuring He-Ne CW gas laser by photoelectron count
13 p2271 A69-27399
- F 2 layer cut-off frequency predawn increase caused by sunrise, resulting in photoelectrons transfer along force lines magnetically conjugate point
13 p2257 A69-28712
- Zone structure of silicon-silicon dioxide system for silica films obtained by pyrolytic dissociation, discussing kinetics of photoelectrons capture at traps
15 p2669 A69-30723
- Quantum mechanics method for obtaining photocount distribution from optical maser photoelectron counting statistics
15 p2635 A69-31238
- Hall mobility of photoelectrons in cadmium sulfide layers
18 p3182 A69-35048
- Equilibrium velocity distributions of F region photoelectrons produced by solar ionizing radiation, discussing dayglow as impact result
20 p3591 A69-38061
- Dayglow O I lambda 1304 and 1356 A radiations photoelectron excitation rates theoretical calculation and experimental data on altitude dependence characteristics
22 p3939 A69-40517
- Conjugate regions 6300 A airglow enhancement during predawn, noting photoelectrons role in heating dark ionosphere region by producing fast electron flux
24 p4308 A69-43011

PHOTOENGRAVING

Electron beam exposure system to photoetch integrated circuit patterns without photomasks, using electronic computer for automatic pattern generation and registration 15 p2579 A69-31039

PHOTO GEOLOGY

Volcanic origin of lunar crater Dawes based on photogeological evidence obtained from Lunar Orbiter 5 photographs 11 p1952 A69-24264

Extraterrestrial imagery, discussing earth based telescopes, IR imagery, moon mapping, lunar and planetary probes, Lunar Orbiter photos interpretation and sensors for detecting life 15 p2690 A69-30711

Photogrammetric instruments applied to determination of spatial position of tectonic surfaces by aerial photography 20 p3539 A69-37511

PHOTOGRAMMETRY

Analytic photogrammetric determination of lunar control coordinates from Ranger photography 01 p0147 A69-10022

Mirror photogrammetry geometric principles, studying photo pairs, mirror reflection and reduction methods 01 p0077 A69-10025

Interpolation of deflections of vertical from horizontal gravity gradients, discussing potential applications to photogrammetry 02 p0243 A69-12012

Error analysis of orientation methods for extraterrestrial stereophotogrammetric mapping [JPL-TR-32-134] 03 p0429 A69-13299

Unified lunar control photogrammetric network produced by mapping satellite in 28 day polar orbit, using recurrent partitioning 05 p0819 A69-15628

Horizontal aerotriangulation by independent models using photogrammetric extension of horizontal control for small scale superwide angle photography, horizon photography and B 8 plotter 06 p0925 A69-17468

Calibration procedures for cameras and photographs in photogrammetry, noting least squares method and tolerance criteria 06 p0925 A69-17469

Wind vector in respect to orientation of large scale cirrus bands based on stereophotogrammetry and radar observations 08 p1346 A69-20442

Photogrammetric color negative prints, slides, etc, improved by scanning beam modulation 09 p1494 A69-21634

Photogrammetry for three dimensional geodesy, discussing satellite triangular methods, refraction anomalies, error corrections, etc 10 p1682 A69-23390

Multispectral photographic determination of reflectance of environmental features from aerial spectral photographs, noting EROS program application 11 p1880 A69-24266

Photogrammetric networks equalization by method of least squares, using external orientation elements of aerial photographs 12 p2079 A69-26032

Monograph on photogrammetry in satellite geodesy including photogrammetric measurement of satellite positions, German observation stations and work done in U.S., U.S.S.R. and France 16 p2790 A69-32202

Photogrammetry - Conference, Washington, D.C., March 1969 18 p3133 A69-34334

NASA photogrammetric lunar activities, discussing imagery and control data by Lunar Orbiter and photogrammetric data reduction for preparing manned lunar landing 18 p3133 A69-34336

Heights of cloud bases and convective cloud tops determined by stereoscopic photogrammetry of Apollo 6 mission 20 p3569 A69-36926

NASA lunar survey and mapping for generating Apollo satellite landing navigation control, using analytic photogrammetry, camera position and altitude data of lunar topography 20 p3536 A69-36931

Photogrammetric instruments applied to determination of spatial position of tectonic surfaces by aerial photography 20 p3539 A69-37511

Photographic interpretation, considering shape, size, tone, shadow, pattern, texture, site, association and resolution 20 p3540 A69-37739

Cameras photogrammetric parameters determined from stellar photographs, considering distortion components, reference points, etc 20 p3545 A69-38054

Aerial surveys flight functions cost plotted against degree of performance, allowing for obtainable accuracies 22 p3863 A69-40041

Holographic photogrammetry compared with conventional holography in monocular and binocular parallax reconstruction and stationary stability of objects 22 p3944 A69-40044

Photogrammetric contours plotting from aerial color films 22 p3944 A69-40045

Superwide angle camera with aerial photogrammetric lens system, discussing light distribution, rotary disk shutter, etc 22 p3944 A69-40047

Photogrammetric camera system developed from NASA requirements to document lunar surface environment during manned space flight exploration 22 p3948 A69-40989

Optical engineering and quality control of photogrammetric instruments for aerial color photography, discussing lenses, filters, projectors, plotters, electro-optical rectifier, etc 22 p3949 A69-40996

Terrain slope estimation of position errors of differential corrections in orthophoto production 22 p3951 A69-41245

Orthophoto maps production, discussing scales, aerial photography, control points, orthoreprojection, cartography and printing 22 p3951 A69-41246

Gridding technique for satellite APT pictures taken with camera axis perpendicular to earth surface 24 p4314 A69-42992

Electronic scanning and correlation techniques for terrain sensing required in automatic stereoperception 24 p4316 A69-43566

PHOTOGRAPHIC INTERPRETATION

U PHOTOINTERPRETATION

PHOTOGRAPHIC DEVELOPERS

Characteristics of astronomical photography, considering cameras, photographs, color films, photoemulsions and processing, etc 11 p1885 A69-24973

Multispectral processing of Apollo 6 earth photograph, evaluating geologic, vegetative and cultural features from red, green and blue portions of visible spectrum 22 p3941 A69-40987

Color chemistry concept producing high quality color negatives and prints in existing black and white processing systems 22 p3948 A69-40990

Photographic properties of Cibachrome silver dye bleach materials for yielding color reflection prints directly from color transparencies, discussing applications to aerial photography 22 p3949 A69-40991

Aerial color film processing systems 22 p3949 A69-40992

PHOTOGRAPHIC EMULSIONS

NT NUCLEAR EMULSIONS

Strain releasing method for reduction of small local movements of recording holographic emulsions resulting in degradation of holographically reconstructed wavefronts 06 p0923 A69-16930

Absolute sensitivity of Soviet UTs-3 photographic emulsion to vacuum UV radiation by method involving absolute calibration of photocathodes 07 p1136 A69-19620

Photographic emulsion layers depth dependence of darkening curve, modulation transfer function and granularity, determining properties by enzymatic and electrolytic treatments 12 p2089 A69-26196

Nonlinear holograms distortions analyzed by five point method utilizing relation between irradiance and amplitude transmittance of photographic emulsion 12 p2090 A69-26255

Nuclear interactions between high energy nuclear active particles and C nuclei, studying electron-photon component energy with nuclear photoemulsions 13 p2331 A69-28388

High resolution silver halide photoemulsions analyzed by holographic resolvometry using Ne-He laser to obtain interference patterns 15 p2606 A69-30052

Autoradiographic methods for diffusion and phase transformation in Fe-Cr alloys by application of photographic emulsion with tracer element on metal surface 20 p3561 A69-37416

Photographic film properties, discussing base material, emulsion, photochemical process, sensitometry, densitometry, granularity and color film 20 p3541 A69-37746

PHOTOGRAPHIC EQUIPMENT

NT BALLISTIC CAMERAS

NT CAMERA SHUTTERS

NT CORONAGRAPHS

NT FRAMING CAMERAS

NT HIGH SPEED CAMERAS

Aerial color photography for terrain analysis noting development of cameras, filters, high speed emulsions and processing equipment 01 p0077 A69-10023

Photographic control system requirements for Project Apollo manned launches, considering extreme heat, vibration and sound pressure environment [SMPTE PAPER 104-20] 04 p0596 A69-14360

Photographic system in Lunar Orbiter spacecraft 05 p0829 A69-15857

Automatic laser tracker system for close-up photographic coverage of rocket test [SMPTE PREPRINT 101-91] 07 p1116 A69-18949

Computer processed pictures including transformation of graphical material, picture generation from data or abstract rules, discussing procedures, instrumentation, color and applications 11 p1842 A69-24588

Characteristics of astronomical photography, considering cameras, photographs, color films, photoemulsions and processing, etc 11 p1885 A69-24973

Flare or stray light measured in long focus photographic objectives by photometric sphere and spherical segments without collimator 12 p2093 A69-26590

High speed curtain type photographic shutters testing by chronograph with phosphorescent and photographic recording, determining movement rate including acceleration and braking 12 p2093 A69-26598

Photographic system for astronaut training in Apollo Mission Simulator, using fixed camera and moving earth model coincident with strip color film past exposure slit 16 p2792 A69-32787

Portable electric lamp for work and photographic purposes in manned spacecraft, describing circuitry, construction and applications [IES PREPRINT 30] 18 p3138 A69-35173

PHOTOGRAPHIC FILM

NT MICROFILMS

Photographic film blackening under high intensity laser radiation indicating two photon mechanism as responsible 01 p0080 A69-10429

Scaled and translated composite curve technique for reducing calibration data for spectrograph film system response characteristics 01 p0082 A69-10839

Holographic film sensitometric properties, plotting density vs log exposure and time vs gamma curve 01 p0082 A69-10851

Hologram film nonlinearity effect in recording diffusely illuminated objects analyzed by means of amplitude transmittance 03 p0431 A69-13958

Holograms volume depth increased by reference beam splitting or by photographing holograms on same plate in sequence 05 p0761 A69-15651

Hologram storing on photochromic film, obtaining equations for optimal exposure time [IEEE PAPER F-1] 07 p1133 A69-19053

Color and black and white negatives effectiveness for photointerpretation, noting color imagery advantages 08 p1311 A69-19820

Holograms on photochromic films by split beam He-Ne laser using special mirror system 11 p1881 A69-24631

Holographic recording materials effect on optical reconstruction wave and hologram properties 11 p1882 A69-24681

Faint stars background exposure density and detection limit determined by astrosensitometer for Kodak Spectroscopic Plates
12 p2153 A69-25811

Hologram recording on photosensitive material based on photoinduced polymerization showing good resolution and diffraction efficiencies
13 p2258 A69-27199

Photographic layers darkening process, using widely spaced or single giant pulses of ruby laser
13 p2260 A69-27612

Image quality of color disks in aerial photographs using panchromatic, color positive, color negative and false color films, measuring reflected sunlight
14 p2450 A69-29600

Holograms volume depth increased by reference beam splitting or by photographing holograms on same plate in sequence
16 p2791 A69-32508

Modulation transfer function based on Fourier techniques, discussing nonlinear film development process
17 p3005 A69-33080

Previous radiation exposure effect on photographic film noting increased sensitivity at UV frequencies
19 p3314 A69-36626

Photographic interpretation, considering shape, size, tone, shadow, pattern, texture, site, association and resolution
20 p3540 A69-37739

Photographic film properties, discussing base material, emulsion, photochemical process, sensitometry, densitometry, granularity and color film
20 p3541 A69-37746

Photogrammetric contours plotting from aerial color films
22 p3944 A69-40045

Aerial color film processing systems
22 p3949 A69-40992

Hologram film nonlinearity effect on reconstructed image, discussing role of illumination type
23 p4165 A69-41636

Automatic analysis and classification of images stored on 35-mm film using CRT flying spot scanner with computer control and memory
24 p4286 A69-42744

PHOTOGRAPHIC MEASUREMENT
NT PHOTOGRAMMETRY

Confined vortex in air tangential and axial velocity distribution based on smoke profile pictures
01 p0060 A69-10413

Meteor photographic observation noting initial mass, motion, position and duration, disintegration in process of flaring, spectra and meteor flare classification scheme
01 p0159 A69-11372

Fluid flow velocity measurements by optical device having trigonal rectangular glass prisms and microscope objective
03 p0427 A69-12969

Photographic control system requirements for Project Apollo manned launches, considering extreme heat, vibration and sound pressure environment [SMPE PAPER 104-20]
04 p0596 A69-14360

Xenon flash lamps with electrolytic capacitors designed for photographic studies of laminar flows of viscous fluids
07 p1116 A69-18259

Absolute sensitivity of Soviet UTs-3 photographic emulsion to vacuum UV radiation by method involving absolute calibration of photocathodes
07 p1136 A69-19620

Picosecond light pulse measurement by two photon excitation of photographic film
08 p1313 A69-20165

Photographic magnitudes in UVB system based on photoelectric sequences for stars in NGC 2483 and NGC 2489 open clusters, obtaining spectral classes from objective prism plates
08 p1388 A69-20239

Photographic magnitudes in UVB system based on photoelectric sequence for stars in NGC 2546, Pi 1, NGC 2579 and Cr 185, obtaining spectral classes
08 p1388 A69-20240

Simultaneous photographic and radar observations of meteors, determining absolute stellar magnitude of meteor as function of parameters
08 p1390 A69-20337

Photographic measurement of parachute exit velocity during ejection from chute, describing electronic recording and unit operation with block diagram
08 p1317 A69-20875

Relative proper motions of stars measured by microscope projection technique
10 p1778 A69-23570

Expansion velocity of discharge plasma in exploding wires measured by X ray flash and streak photography, noting discrepancy
11 p1926 A69-24472

Rotating mirror streak cameras in quantitative measurements of extreme compressions by shock waves, analyzing spatial and temporal resolving power
12 p2084 A69-26151

Vilna meteorite bolide observation with all-sky camera noting seismic and analytic records
13 p2334 A69-27189

Flare star astrometric study to determine possible variable proper motion
13 p2348 A69-27810

Visual binary star parallax, motions and mass ratio determined using photographic data
13 p2349 A69-27815

Vibrating camera for photographic measurement of flow velocities and trajectories of bodies marked by light spots
13 p2261 A69-27913

Mirror correctors used with paraboloidal spaceborne telescopes in far UV, yielding enlarged photographic field
13 p2261 A69-27949

Vectormagnetograph to measure magnetic field vector components, obtaining field direction azimuth by servo circuit
14 p2453 A69-29972

Accurate optical position of quasars determined by plate overlap for radio interferometer calibration
16 p2859 A69-32229

UBV photometry of faint stars, discussing photographic plate effect on accuracy, emulsion standardization and use of electronography
17 p3031 A69-33099

Visual observation of pipe wall regions in turbulent flow by suspending colloidal size particles and photographing with high speed motion picture camera
17 p2956 A69-33598

Shock tube calibration for aerodynamic loading, determining flow parameters by observing particle trajectories with high speed photography of smoke tracers
18 p3085 A69-34469

High speed photography using multiply pulsed ruby laser, Pockels cell modulation and smear camera for isochromatic and photoelastic pattern recording
19 p3306 A69-35731

Ablating sphere viscous wake using image converter camera, computing luminance radial distribution by unit volume
19 p3306 A69-35739

Image converter camera and astronomical telescope arrangement for photographing metal diaphragm openings in shock tube
20 p3538 A69-37227

Auroral spectroscopy for high resolution coverage at maximum wavelength range, discussing plane diffraction grating
21 p3707 A69-38486

Gas dynamic processes during vaporization of solid material under Nd laser emission, using high speed photography
21 p3740 A69-39551

Photographic study of epoxy resin breakdown kinetics under pulsed laser beams, showing crack area as function of time
22 p3973 A69-40743

Orthophotography as technique for eliminating distortions in vertical aerial photographs during conversion into uniform scale reproductions
22 p3949 A69-40998

Spectral emissivity and radiation intensity spectral distribution measurements for heat-resistant materials at high temperature, using photographic method
23 p4238 A69-41330

PHOTOGRAPHIC RECORDING

Meteor photographic observation noting initial mass, motion, position and duration, disintegration in process of flaring, spectra and meteor flare classification scheme
01 p0159 A69-11372

Trailing camera technique to photograph impact and projectile penetration into earth materials from above and behind test vehicle
02 p0227 A69-11760

Hologram film nonlinearity effect in recording diffusely illuminated objects analyzed by means of amplitude transmittance
03 p0431 A69-13958

Fiber optic electrostatically focused image intensifier tube for recording star spectra with reduced exposure time [WERL-68-1C2-TAEC-P1]
04 p0603 A69-15444

Laser photolysis and spectroscopy for photographic recording of absorption spectra of transient intermediates in nanosecond reactions
05 p0772 A69-16025

Weld-nugget formation in resistance spot welding, using high-speed photography on model section of spot weld
05 p0769 A69-16539

Lippman-Bragg holograms production with high reconstruction efficiencies by suitable recording and processing techniques with commercially available photographic plates
06 p0926 A69-17481

Photorecording techniques for command and control systems requirements, discussing association with large screen computer generated CRT projection display equipment
06 p0928 A69-17923

Pulse intensity variations in pulsars observed at 113 MHz with parabolic antenna using photographic recording techniques, noting lack of periodicities
06 p1009 A69-17964

Photographic study of burning metalized composite propellant under acceleration, noting burning rate augmentation by heat transfer from alumina particles retained on propellant surface [AIAA PAPER 69-173]
06 p0983 A69-18151

Hologram storing on photochromic film, obtaining equations for optimal exposure time [IEEE PAPER F-1]
07 p1133 A69-19053

Book on photographic recording of high speed processes noting slit scanning, cinecameras, shutters, mirror rotation drive mechanisms, photographic materials, etc
08 p1317 A69-21033

Holographic displays using ultrasonic vibrations or laser outputs as optical sources, discussing recording materials, responses and computer applications
09 p1492 A69-21394

Photogrammetric color negative prints, slides, etc, improved by scanning beam modulation
09 p1494 A69-21634

Laser spark image in air photographed in scattered laser radiation light, showing singularities and absence of beadlike structure
09 p1519 A69-22531

Shearing interferometry by simultaneous reconstruction of two wavefronts on single photographic plate
10 p1690 A69-22952

Holographic motion picture recorded using CW Q switched laser and conventional camera
10 p1697 A69-24002

Photography role in experimental research with applications to flight analysis and comparison with human visual accuracy
11 p1881 A69-24573

Multicolor hologram recording and reconstruction gas lasers, discussing control of ghosts in three dimensional image
11 p1882 A69-24679

Holographic recording materials effect on optical reconstruction wave and hologram properties
11 p1882 A69-24681

Comet Berbon and minor planet positions photographically recorded /1964-1967/
11 p1962 A69-25121

Liquid crystals for photographically recording microwave holograms, noting impossibility of three dimensional image reconstruction with side-looking radar zone plates
12 p2079 A69-25917

Image intensifier for high speed spectrography of short duration faint radiation source, noting high speed shutter and resolution
12 p2085 A69-26160

Remote control spectrophotochronograph to study radiation of high speed high temperature processes, giving construction data and diagrams
12 p2085 A69-26161

Direct electron beam shadowgraph photographic /betagray/ technique for recording small high speed objects with 3 nanosecond exposure time
12 p2086 A69-26164

Holography with pulsed lasers for high speed recording of amplitude and phase disturbances and rapid transient events, noting reconstruction evaluation problems
12 p2087 A69-26171

Holographic position and velocity measurement techniques for high speed objects from explosions
12 p2087 A69-26174

Photographic emulsion layers depth dependence of darkening curve, modulation transfer function and granularity, determining properties by enzymatic and electrolytic treatments

12 p2089 A69-26196

Streak camera for continuous photographing of dark and bright satellites up to 9 stellar magnitude

12 p2092 A69-26451

High speed curtain type photographic shutters testing by chronograph with phosphorescent and photographic recording, determining movement rate including acceleration and braking

12 p2093 A69-26598

Photography for remote sensing, discussing aerial photography, side-looking radar and photography for recording, storing and retrieving data

12 p2096 A69-26975

Terrain photography applications and analysis including remote sensing of photographic systems and photointerpretation

12 p2098 A69-27006

Hologram recording by offsetting reference beam temporal frequency instead of using reference beam spatial offset

13 p2258 A69-27201

Soviet and foreign visual, photographic and photometric ground observations of satellites, emphasizing synchronous optical observations role in geodesy and geophysics

13 p2219 A69-27357

Photographic recording of parallax, proper motion, acceleration and orbital motion of Barnards star, noting mass ratios to jupiter

13 p2349 A69-27813

Relative parallax, fractional mass and luminosity of visual binary 1785 determined from photographs taken with Sproul refractor

13 p2349 A69-27814

Visual and photographic observations of Perseids meteor trails velocity noting discrepancy

13 p2353 A69-28035

Recording installation of ionospheric reflected radio signal fluctuations and amplitudes of resulting signals simultaneously at three points, discussing antenna commutator circuit

14 p2452 A69-29874

High speed picture thermography in nondestructive testing, describing IR scanning frame rate and thermal image recording

15 p2618 A69-30316

Aerial multiband remote sensors for wildland resources, considering multilens photographic systems, optical mechanical scanners and radar devices

15 p2609 A69-30458

Photodielectric tape camera with optical images stored on tape in form of charge pattern

16 p2792 A69-32558

Meteor station photorecorder of reflected radio signals, discussing design and performance during meteor shower

17 p2976 A69-33898

Photographic networks for meteors orbits and trajectories and meteorites impact points during nighttime, discussing fireball occurrence

19 p3415 A69-36120

Friction bearing vibration recording device using light beam and photodiode

20 p3539 A69-37436

Photographic studies of explosive reactions with description of ultrahigh speed cameras

21 p3719 A69-38446

Satellite phase and aberration corrections in processing photographic observations for geodetic purposes

21 p3720 A69-38606

Solar corona photographic study during 1961 total eclipse using quadruple camera, providing intensities, amount and direction of polarization

22 p4001 A69-40001

Diffuse coronal emission observation during total eclipse of February 1961 near solar prominences and polar ray form investigation in northern part of corona

22 p4002 A69-40002

Pulse ruby laser-smear camera ultrahigh speed multiple frame recording system, describing applications to transmitted and scattered light photoelasticity

22 p3944 A69-40076

Photographic high speed recording system characteristics effects on dynamic photoclastic fringe patterns fidelity

22 p3945 A69-40077

Holographic interferometry for surface strain and vibrations visualization, describing photographic recording techniques

22 p3945 A69-40244

Holography phototechnical and optical variants, discussing combination of conventional photography and wave front reconstruction

24 p4312 A69-42616

Linear motion blur compensation technique in photographic recordings by reconstruction of sharp image from hologram

24 p4314 A69-42972

PHOTOGRAPHIC RECORDING INSTRUMENTS

U OPTICAL MEASURING INSTRUMENTS

U RECORDING INSTRUMENTS

PHOTOGRAPHIC TRACKING

Optical spacecraft tracking organization in U.S.S.R., describing network of visual observation and photographic stations for satellite and space probe tracking

01 p0032 A69-10952

Geocentric orientation of quasi-geocentric coordinate network determined from simultaneous photographic satellite observations, using gravity force values

12 p2158 A69-26429

Earth stations coordinates determination from non-simultaneous photographic satellite observations by orbital method compared with simultaneous photographic observations of Echo 1

12 p2068 A69-26430

Observatory camera for satellite observation, discussing objective focusing and diameter and manual/automatic operation

12 p2092 A69-26450

Streak camera for continuous photographing of dark and bright satellites up to 9 stellar magnitude

12 p2092 A69-26451

Stellar image vibration amplitude dependence on trace direction by comparison with traces of moving satellites

15 p2647 A69-30166

PHOTOGRAPHS

NT CLOUD PHOTOGRAPHS

NT LUNAR PHOTOGRAPHS

NT MICROPHOTOGRAPHS

NT MOTION PICTURES

Calibration procedures for cameras and photographs in photogrammetry, noting least squares method and tolerance criteria

06 p0925 A69-17469

Computer processed pictures including transformation of graphical material, picture generation from data or abstract rules, discussing procedures, instrumentation, color and applications

11 p1842 A69-24588

Motion-distorted photograph deblurring method using extended range holographic Fourier transform division

22 p3944 A69-40020

Photographic image degradation resulting from wave front distortion due to atmospheric refractive density gradients over long oblique optical path

01 p1017 A69-10223

Exploding wire phenomenon during early expansion from time correlated X ray and optical streak photographs in vacuum chamber

01 p0119 A69-10670

High speed photography - Conference, Stockholm, June 1968

12 p2080 A69-26135

Regulated pulse lasers under free oscillation for photographing distant objects by illumination with shortened light pulses

12 p2089 A69-26190

Flash X ray unit with special film transport devices to obtain sequenced dynamic radiographs of ablating models during reentry simulation tests

19 p3291 A69-35720

Ruby laser goniometric and telemetric echoes by photographing Geos satellites

21 p3671 A69-38335

PHOTOINTERPRETATION

Aerial color photography for terrain analysis noting development of cameras, filters, high speed emulsions and processing equipment

01 p0077 A69-10023

Crater Copernicus photograph, discussing misinterpretation of Orbiter 2 lunar surface photograph on basis of effective temperature contours analysis

01 p0154 A69-10898

Lineament trend analysis of Gemini Red Sea synoptic terrain photography, noting computerized rotation from apparent to true angles

02 p0247 A69-12808

Annular and linear Martian surface formations nature and origin from analysis of Mariner 4 photographs

03 p0506 A69-13087

Photometric-polarimetric observations of planetary surfaces, discussing geological environment interpretation and spacecraft reconnaissance system mission planning

03 p0421 A69-13394

Tiros and ESSA weather satellites meteorological contributions, discussing photographic interpretation for weather predictions

04 p0626 A69-14690

Interpretation technique for weather satellite photographs of spatially coherent cloud distributions

04 p0628 A69-15090

Earth space image interpretation in various spectral regions, discussing effectiveness of photography, spectrophotometry, radar and microwave observations

05 p0763 A69-16054

Relative orientation elements of aerial photographs determined by iteration method

05 p0765 A69-16708

Meteorological satellites data for safe navigation of ships, discussing techniques to overcome difficulties in interpreting ice and cloud photographs

[UN PAPER 68-95776] 06 p0916 A69-17028

Atmospheric processes interpretation from cloud cover pictures televised by orbiting satellite, examining indirect weather forecasting

[UN PAPER 68-95713] 06 p0949 A69-17029

Meteorological satellite TV data of earth cloud cover for determining atmosphere pressure field

[UN PAPER 68-95654] 06 p0949 A69-17052

European cyclonic system developmental phases determined from characteristic structural features of satellite cloud pictures

[UN PAPER 68-95711] 06 p0950 A69-17070

Lunar geology information obtained by Ranger space missions

06 p1001 A69-17163

Ranger pictures improvement by computer, eliminating image distortion due to electronic imaging systems

06 p0924 A69-17164

Individual differences and relation to Witkin concept of perceptual style in target identification in aerial photographs

06 p0880 A69-17211

Map information display methods comparison for tactical image interpreters

06 p0924 A69-17212

Interpretation of IR cloud images transmitted by Nimbus 1 and Cosmos 122 satellites, using radiation temperature contrasts

06 p0952 A69-17984

Relative lunar altitudes determination from shadow measures on earth based lunar photographs by direction-cosine method

07 p1225 A69-19770

Comparator measures for relative lunar altitudes on Yerkes lunar photographs, estimating selenographic positions from grids of orthographic atlas of moon

07 p1225 A69-19771

Selenodetic measurements on Yerkes lunar star trailed photographs, considering limb and star trail

07 p1225 A69-19772

Yerkes star trailed lunar photographs with ephemeris values of moon libration for selenodetic coordinates of secondary points, discussing errors and altitudes

07 p1225 A69-19773

Photographic photometry of Saturn rings around times of disappearance /1966/

08 p1381 A69-19791

Color and black and white negatives effectiveness for photointerpretation, noting color imagery advantages 08 p1311 A69-19820

Aerial chronophotography of Southern Hemisphere conducted on around world polar flight analyzed for meteorological and geographical aspects and compared with satellite data 09 p1534 A69-21405

Space photography as sedimentological research tool demonstrated by space photographs application to projected Mars mission 09 p1490 A69-21797

Apollo 7 and weather satellite observation photographs of hurricane Gladys and typhoon Gloria 10 p1722 A69-22944

Large scale color and color IR aerial photography evaluation to determine interpretability for improving range resource inventories 11 p1880 A69-24265

Lunar far side craters vertical profiles plotted from photometric cross sections of Zond 3 photographs 11 p1959 A69-24726

TV IR cloud images interpretation transmitted by Cosmos 122, discussing specific features of cloud covers and underlying surfaces 11 p1912 A69-24826

Computer program for interpreting IR cloud pictures from Cosmos 122 satellite based on potential function method 11 p1884 A69-24833

Photogrammetric networks equalization by method of least squares, using external orientation elements of aerial photographs 12 p2079 A69-26032

Quantitative analysis of differential interferometer photographs using Wollaston prism with beam separation, applying method to sphere in low density hyper-sonic flow 12 p2089 A69-26187

Electro-optical scanning device and electro- optical matrix for mechanization of difference measurements in automatic photointerpretation of surveillance maps 12 p2090 A69-26302

Terrain photography applications and analysis including remote sensing of photographic systems and photointerpretation 12 p2098 A69-27006

Martian canals nature based on high contrast photographs obtained by Mariner 4 space probe 12 p2171 A69-27133

IR TV cloud pictures from meteorological satellites used for sky condition diagnostics and forecasting through automatic interpretation by image brightness quantization 13 p2291 A69-27728

Cartographic interpretation of TV cloud pictures transmitted by Molniya 1 satellite 13 p2292 A69-27730

Annular and linear Martian surface formations nature and origin from analysis of Mariner 4 photographs 14 p2515 A69-28769

Moon pictures from Apollo 8 spacecraft including full moon, crater Tsiolkovsky and unidentified area showing volcanism 14 p2527 A69-29889

Apollo 8 photooptics, considering TV camera and broadcasts, photographic equipment and visual observation 15 p2609 A69-30469

Photographic observations of comet Kiltson 1966b, estimating brightness, absolute magnitude and color index 15 p2685 A69-30529

Extraterrestrial imagery, discussing earth based telescopes, IR imagery, moon mapping, lunar and planetary probes, Lunar Orbiter photos interpretation and sensors for detecting life 15 p2690 A69-30711

Lasers and holography applications in astronomy including high resolution spectrographic diffraction gratings manufacture and astronomical objects photographic pictures evaluation 15 p2610 A69-30880

Nova Vulpeculae 1968 photographic observations analyzed for magnitudes, indicating 16 July 1968 explosion 16 p2855 A69-31659

Lunar rotation parameters determined from photographs and visual observations independent of moon profile 17 p3027 A69-32874

Electronic device utilizing scanning beam to evaluate limb photographs, reducing errors by introducing

second generator with frequency proportional to deflecting potential variation 17 p2970 A69-32884

Day sky brightness at altitude above 100 km obtained during rocket flight compared to night sky viewed from ground 17 p3037 A69-33664

Daily European weather surveys based on pictures transmitted by satellite during fourth quarter 1967 17 p3000 A69-33778

Aerospace images information suppressing and enhancing methods to aid interpreter in making more accurate recognition and measurement of earth resources subjects 18 p3133 A69-34338

Satellite photograph analysis to investigate interaction between subtropical and polar front jet streams 18 p3166 A69-34827

Satellite photography for snow cover mapping and depth estimation 18 p3167 A69-35084

Environmental studies using orbital photography, discussing color, color IR, black and white applications from Gemini and Apollo programs 18 p3132 A69-35275

Butterfly diagram of sunspot distribution, concluding physical processes not yet clarified 19 p3426 A69-36583

Horizontal wind components over U.S.S.R., Western Europe and Northeast Atlantic obtained from satellite photographs of vortex cloud systems 19 p3365 A69-36668

Photographic interpretation, considering shape, size, tone, shadow, pattern, texture, site, association and resolution 20 p3540 A69-37739

Earth space image interpretation in various spectral regions, discussing effectiveness of photography, spectrophotometry, radar and microwave observations 20 p3545 A69-37964

Cartographic tying-in of Zond 3 lunar surface photographs to verify maps of moon far side 20 p3608 A69-38051

Lunar surface erosion processes revealed by Lunar Orbiter photographs of boulder concentrations 21 p3794 A69-38378

Errors in sighting and identifying geodetic contour points on aerial photographs, considering stereocomparators parallaxes effect 21 p3719 A69-38404

Photographic studies of explosive reactions with description of ultrahigh speed cameras 21 p3719 A69-38446

Mars TV pictures from Mariner 7, describing prominent surface features 21 p3806 A69-39330

Comparative photointerpretation from panchromatic, color and Ektachrome IR aerial photography 22 p3944 A69-40039

Hyperlatitude photographs for geological mapping from Gemini spacecraft, noting remote sensing imagery 22 p3935 A69-40040

Surveying earth resources from space, covering orbital height photography in cartographic programs, hydrologic engineering, pollution control and geology 22 p3936 A69-40170

Harmonia and Parthenope /minor planets/ positions, establishing time dependence of relation between image diameter and planet magnitude 22 p4025 A69-40614

Long term computer produced multiple image satellite photomosaics for Southern Hemisphere, analyzing circulation, meridional bands, polar ice, cloud cover variations, etc 22 p3977 A69-40733

Photographic observations of supernovae including magnitudes, comparison star tables and instrument details 22 p4032 A69-40944

Orthophotography as technique for eliminating distortions in vertical aerial photographs during conversion into uniform scale reproductions 22 p3949 A69-40998

Automated air photo identification of crop types, utilizing stereo height as discriminating variable 23 p4155 A69-41721

Multispectral orbital photography used to obtain urban land-use data [AAS PAPER 69-483] 24 p4307 A69-42837

PHOTOIONIZATION

Photoionization curves and threshold energies for fluorocarbon and trifluoromethyl halide molecules and

ions, calculating ionic heats of formation and bond dissociation energies 02 p2025 A69-12464

Photodissociation and photoionization of diatomic molecules at high temperatures with calculation of absorption cross sections 03 p0473 A69-14147

Photoionization of donor impurities during absorption of IR radiation in n-type Te doped GaP at low temperatures 03 p0492 A69-14169

Ionization fronts stability, taking into account ionizing photons absorption effect in H II region and interstellar magnetic field 04 p0650 A69-14363

Mass spectrometric measurements to determine energy distributions of ions produced in dissociative photoionization of O molecules 06 p0960 A69-17110

Atomic Li photoionization cross sections calculated with Brueckner-Goldstone many body perturbation theory 06 p0961 A69-17134

Rational approximation for coefficients used in calculating hydrogenic photoionization Gaunt factors 08 p1354 A69-20153

Luminous discharge at nonabsorbing surface when exposed to single pulse ruby laser beam, suggesting photoionization in surface layer 08 p1327 A69-21021

Oscillator forces and photoionization and photorecombination cross sections of electron transitions in hydrogen atom, considering approximation for total radiation probability 09 p1588 A69-21365

Spectral distribution of X ray atmospheric absorption used to determine high energy photoelectrons spectrum 09 p1577 A69-21774

Simultaneous photoexcitation and photoionization of He near threshold at 186 A, measuring probability 11 p1921 A69-24926

Polarized Hartree-Fock model computing photoionization cross sections for Li isoelectronic sequence, listing phase shifts for partial waves of scattered electrons 11 p1922 A69-25260

Diffusion of ion-electron pairs produced by photoionization upstream of strong shock waves to shock tube walls based on particle flux and Poisson equations 11 p1866 A69-25275

Cross section for ionization of atoms by positive ion bombardment near threshold 11 p1922 A69-25322

Linearized perturbation for photochemical and dynamical effects in internal atmospheric gravity wave production of E region ionospheric irregularities 14 p2440 A69-29128

Photoionizing effect of hydrogen and helium UV glow in nighttime ionosphere compared with ground based IF ionosonde and sounding rocket observations 15 p2605 A69-31436

Unsteady model taking into account photoionization, neutralization and diffusion, describing electron concentration diurnal and seasonal variations in ionosphere F 2 region at midlatitudes 17 p2966 A69-33978

Oscillator forces and photoionization and photorecombination cross sections of electron transitions in hydrogen atom, considering approximation for total radiation probability 18 p3197 A69-34755

Ground and metastable state photoionization cross sections of BaI to explain artificial Ba clouds, using many channel quantum defect method 18 p3177 A69-35238

Precursor electrons due to photoionization ahead of pressure driven shock waves, presenting electron temperature and density theoretical analysis 20 p3511 A69-38238

Photon induced precursor ionization and electron produced wave separation from electrical shock tubes 20 p3511 A69-38240

Laser induced multiphoton ionization and cascade breakdown in high pressure gases, considering roles of refractive index, laser nonideal output and beam self focusing 21 p3738 A69-39445

Photoionization model of Seyfert galaxy extended to calculate temperatures, luminosities and sizes of zones emitting forbidden Fe X /6374 A/ and Fe XIV /5303 A/ 22 p4024 A69-40581

Atoms and ions collision strengths and photoionization cross sections for nitrogen, oxygen and neon fitted to interpolation formulas for temperature and frequency effects

22 p3988 A69-41244

Photoionization rates temperature dependence in upper atmosphere for O atoms and molecules and N molecules from computer calculations, allowing for earth sphericity

23 p4157 A69-41857

PHOTOLUMINESCENCE

NT X RAY FLUORESCENCE

Photoluminescence spectra of n-type GaAs films grown by gas transport reactions and from solution melt, noting recombination emission

03 p0488 A69-13887

Photoluminescence measurement of distribution of majority carrier concentration in GaAs

03 p0489 A69-13893

Epitaxial n-GaAs photoluminescence obtained from p-GaAs, considering emission intensity

03 p0492 A69-14167

Photoluminescence measurements of p-type thermal conversion in GaAs grown from silica boats, noting compensation by copper and shallow acceptors

04 p0639 A69-14434

IR radiation effects in cadmium sulfide crystals with green edge emission at low temperatures, discussing luminescence, photoconductivity and conductivity glow curves

10 p1746 A69-23565

Photoluminescence spectra of n-type GaAs films grown by gas transport reactions and from solution melt, noting recombination emission

11 p1939 A69-25688

Photoluminescence measurement of distribution of majority carrier concentration in GaAs

11 p1939 A69-25694

Heat treatment effects on Te-doped GaAs, using photoluminescence and carrier concentration measurements to study defects formed

16 p2825 A69-31708

UV excitation intensity increased for improving luminescent nondestructive testing, describing UV dosimeter and irradiation standards

18 p3138 A69-35115

F center formation and X ray and photostimulated F-band luminescence in europium ion-activated potassium halides as function of temperature and X ray dosage

19 p3383 A69-36164

Multiphoton luminescence and photocurrent excitation by ruby and neodymium laser beams of KCl-Eu single crystals, noting brightness dependence on laser beam power

19 p3335 A69-36165

Radiative recombination in GaAs, giving edge radiation spectra in p and n type crystals and photoluminescence method for measuring junction carrier concentration distribution

19 p3386 A69-36525

Injection lasers external quantum efficiency, stimulated and spontaneous emission and photoluminescence measurements

19 p3337 A69-36528

PHOTOLYSIS

NT RADIOLYSIS

Sulfur trioxide production in photolysis of sulfur dioxide at 1849 angstroms, noting oxygen addition effect on quantum yield

01 p0024 A69-10619

Photolysis of aliphatic amino acids by UV light in presence of salt ions forming ammonia, glyoxalic acid, acetaldehyde and formaldehyde

01 p0025 A69-11094

Metal oxides catalytic and inhibitory effects on photolysis of alanine by UV light

01 p0025 A69-11095

Photolytic conversion of allene to cyclopropylidene, discussing cyclononadiene in vapor phase and resulting product

02 p0205 A69-12721

Gas phase photolysis of carbon dioxide in far UV, searching for carbon trioxide

03 p0381 A69-13318

Nanosecond range flash photolysis technique and application to absorption spectra of excited singlet states

05 p0760 A69-15608

Laser photolysis and spectroscopy for photographic recording of absorption spectra of transient intermediates in nanosecond reactions

05 p0772 A69-16025

Photolysis of t-butyl iodide at low temperatures as source of t-butyl peroxy radicals for synthesis of peroxides

07 p1073 A69-18375

Collision broadening cross sections of OH UV transition at room temperature, using flash photolysis

09 p1543 A69-22252

Primary processes leading to atomic and molecular hydrogen formation in hydrogen peroxide photolysis at 1236 Å, noting OH formation

10 p1652 A69-23527

Photolytic cleavage of vic-triazole ring when unsubstituted at N, finding phenylacetone nitrile production mechanism

19 p3264 A69-35971

Laser action from atomic bromine produced by flash photolysis of gaseous iodine monobromide, discussing pulsed output, optical gain, chemical reversibility and atomic excitation

19 p3337 A69-36444

Cations of sulphates photosensitizing role in photolysis of amino acids and peptides in various atmospheres

20 p3477 A69-37626

Gases effects on UV irradiated thermal control materials spectral reflectance, discussing tests and photolysis mechanisms

[AIAA PAPER 69-1025] 22 p3923 A69-40395

Carbon trioxide formation during ozone photolysis in liquid carbon dioxide and sulfur hexafluoride, noting ozone disappearance quantum yield independence of oxygen/ozone ratio

23 p4112 A69-41338

PHOTOMAGNETIC EFFECTS

Surface recombination rate effect on lux-ampere characteristic of photomagnetic effect in CdS single crystals of low and high photosensitivity

05 p0809 A69-16377

Semiconductor current carriers surface recombination rates determined from photomagnetic effect

07 p1198 A69-18505

PHOTOMECHANICS

U PHOTOGRAPHY

U PRINTING

PHOTOMETERS

NT ELECTROPHOTOMETERS

NT ULTRAVIOLET SPECTROMETERS

NT ULTRAVIOLET SPECTROPHOTOMETERS

Twilight sky brightness measurements at 5200 angstroms for estimating upper atmospheric dust component, discussing error rates

01 p0075 A69-11191

Particle size distribution determination by measuring light beam extinction in turbid medium with photometer

03 p0428 A69-13110

Standard Leningrad-2 photoexposure meter applied to measurement of power of laser continuously operating in visual spectral range

04 p0602 A69-15405

Nonlinear coupling between background illumination and illumination signal producing lateral electrical fields in p-n junction, noting effect on sensitivity of position sensor

07 p1101 A69-18654

Optical heterodyning with single mode carbon dioxide laser and triglycine sulfate pyroelectric detector, noting detector sensitivity threshold

07 p1156 A69-19332

Celestial navigation system using photodetectors, comparing numbers and brightness of S4, S20 and silicon stars

10 p1775 A69-23190

High speed photodetector frequency characteristics using multimode gas laser and Kerr cell

10 p1707 A69-24211

Microphotometer for stellar magnitudes of galaxies determination from photographs

11 p1879 A69-24256

Tilting filter photometer for faint light source spectrophotometry, discussing digital approach used with photomultipliers

11 p1884 A69-24834

Stellar radial velocities derived from line positions measurements by precision screw microphotometer

12 p2153 A69-25810

Electronic nonimaging polarimeter/photometer for aircraft observations of pure red pine stand, suggesting application to terrestrial, airborne and satellite remote sensing

12 p2096 A69-26983

Sky mapping in IR, using IR photometer on TD1 ESRO satellite

13 p2260 A69-27606

Independently fluctuating Poisson light signals detected by receiver with inertialess photodetector, developing algorithm for estimating amplitude of useful signals

13 p2223 A69-28552

Photodetector requirements for autocollimators with beam splitters, considering spectral characteristics, photoresponse, time constant, positioning, etc

14 p2447 A69-29326

Portable photometer with red-sensitive photocathode and high SNR for O I 6300 airglow experiments

16 p2777 A69-32107

Photometer for simultaneous stellar photometry in UVB bands, purposes and performance characteristics and circuit diagrams

16 p2790 A69-32209

Iris microphotometer with measurement and reference beams traversing plate in neighboring regions designed for stellar images measurement

16 p2790 A69-32225

Optical information rates for photocount detection systems based on coherent field model, considering binary channels with or without Gaussian noise

20 p3485 A69-36923

Atmospheric ozone detection by three-color photometer measurements of solar UV radiation attenuation in Hartley continuum

20 p3543 A69-37802

N I nebular doublet and auroral and nebular lines of O I obtained with multifilter scanning photometer in France, Norway and at magnetic equator

21 p3712 A69-38519

Relative IR spectral reflectivity of selected lunar surface areas measured using double beam photoelectric filter photometer

21 p3815 A69-39588

PHOTOMETRY

NT ASTRONOMICAL PHOTOMETRY

NT ELECTROPHOTOMETRY

NT SPECTROPHOTOMETRY

NT STELLAR SPECTROPHOTOMETRY

NT TELEPHOTOMETRY

NT ULTRAVIOLET PHOTOMETRY

NT VISUAL PHOTOMETRY

Soviet and French coordinated geophysical studies at magnetically conjugate points in northern U.S.S.R. and Indian Ocean

06 p0918 A69-17391

Photometric effects of UVB color indices ineffective in detecting double stars in Galaxy

07 p1216 A69-18854

Quantitative spectroscopy and spectral photometry, discussing developed image properties and connection between exposure and image

08 p1315 A69-20467

Photometric methods for determination of H atom and hydroxyl radical concentrations in hot gases in convergent-divergent nozzles, noting Li/lithium hydroxide absorption

09 p1496 A69-21952

Lunar far side craters profile and structure determined from Zond 3 photographs using photometric method

11 p1959 A69-24725

Lunar far side craters vertical profiles plotted from photometric cross sections of Zond 3 photographs

11 p1959 A69-24726

Visual mapping and photometric scanning of Saturn with rings from earth, noting ring brightness edgewise linear dependence on rings opening

15 p2697 A69-31256

Baker-Nunn photometry from Apollo tracking utilizing photographs for brightness, dynamics and duration of rocket exhausts and venting clouds

15 p2571 A69-31338

Zenith and azimuthal photometric observations of red line atomic O airglow predawn enhancement over UK

16 p2775 A69-32086

Ti determination in presence of Nb or Ta by extraction-photometric method with diantipryl methane and thiocyanate

20 p3544 A69-37812

Martian surface and atmosphere interpretation through polarimetric and photometric simulation

20 p3614 A69-38253

PHOTOMICROGRAPHY

Pedoscope use in soil microbiological studies including ecology, infection susceptibility, etc

01 p0021 A69-11092

Diamond abrasive process for preparation of microminiature devices for metallographic analysis

03 p0402 A69-13007

Impact crater cross section in fused silica, describing photomicrographic technique for distinguishing hyper-velocity from low energy impacts [AIAA PAPER 69-367] 13 p2366 A69-28299

Photomicroscope film plane inclination adjusted to improve circle readings measurement, noting instrument errors role in star declinations errors 17 p2970 A69-32881

Micromatation and micrographics, discussing nonim- pact printing in computer activated output imbalance by high speed microfilm recorder 18 p3234 A69-35059

Fracture surfaces of stress corrosion cracks in Fe-Cr- Ni alloys studied by electron microfractography, noting cleavage fracture 19 p3350 A69-36891

PHOTOMULTIPLIER TUBES

Kerr effect apparatus for measurements of pure liquids and solutions involving comparison of two lu- minous fluxes with aid of photomultiplier 01 p0078 A69-10039

Photomultiplier geometry without use of light pipes for uniform response from large area single and double sheet plastic scintillation detectors 03 p0428 A69-13107

Time dependent photoelectron multiplier with low noise for recording long wave laser light pulses 03 p0440 A69-13264

Photoelectron counting in extreme UV using win- dowless photomultiplier detectors as photon counters 04 p0595 A69-14277

Stimulated emission properties of active fibers ob- tained from photomultipliers transmitting pulses to oscillosgraph 05 p0761 A69-15657

Photomultipliers response to energetic particles in terms of background current using data from OGO ex- periments 06 p0923 A69-16932

Coherent light fluxes detection, noting correlation characteristics of output signals of photomultiplier il- luminated by multimode He-Ne laser 09 p1515 A69-21438

Temperature effect on amplification factor of box type dynode system of photoelectron multipliers made of alloy AMGK, using single electron method 11 p1846 A69-24626

Low energy charged particle detectors reliability, analyzing windowless electron multipliers and effects of secondary emission layers on sensitivity 11 p1848 A69-24868

Continuous-channel electron multipliers degradation in spacecraft environment simulation laboratory equip- ment 14 p2449 A69-29565

Stimulated emission properties of active fibers ob- tained from photomultipliers transmitting pulses to oscillosgraph 16 p2792 A69-32514

Electrooptical /photomultiplier/ detection of satellite beacon flashes, establishing time of flash and measur- ing pulse shape and energy received 17 p2919 A69-33083

Color coded area sensitivity maps of photomultiplier tubes by multicolor display technique, noting focus electrode voltage 19 p3305 A69-35724

Astronomical observatory photomultiplier cell dark current fluctuations, showing statistical resemblance to binomial distribution 20 p3599 A69-37470

Radial velocities recording inaccuracies by solar magnetographs caused by dissimilarity between photomultipliers characteristics, describing photome- ter designs to eliminate errors 20 p3547 A69-38308

Flexible channel multiplier made of electron conduc- tive polymer, noting secondary yield and feedback ef- fect 22 p3917 A69-41234

Detection of metastable He, H, Ne, Ar, Kr, Xe and molecular nitrogen with continuous channel electron multipliers 22 p3917 A69-41235

HF data transmission system unaffected by high energy electromagnetic fields using GaAs IR emitting diode, glass fiber optic light guide and photomultiplier tube 23 p4121 A69-41768

Photomultiplier tubes performance enhancement by light incidence on photocathode at oblique angles ex- plained by reflection 23 p4191 A69-42194

PHOTON ABSORPTION
U ELECTROMAGNETIC ABSORPTION

PHOTON BEAMS
NT LIGHT BEAMS

Photographic film blackening under high intensity laser radiation indicating two photon mechanism as responsible 01 p0080 A69-10429

Inverse Compton effect and universal black body radiation from less energetic radio photons of galactic and metagalactic origin 08 p1381 A69-19786

Laser beams self focussing interpreted as photon contraction due to equivalent gravitational attraction with gravitational constant proportional to nonlinear refractive index 08 p1324 A69-20085

Photoelectric, calorimetric and photon-momentum methods for measuring laser output energy and power emphasizing liquid, wire and pyroelectric calorimeters 11 p1899 A69-25196

Stimulated reflection experiment for correlation between coherent photon beams from independent lasers 18 p3153 A69-35292

PHOTON DENSITY

Intensity interferometry by two photon excitation of fluorescence trace for three mode laser under phase locking, free running and FM-like conditions 10 p1705 A69-23811

Spectrum of clipped noise in optical spectroscopy, considering double clipping at zero photon number 15 p2571 A69-31486

Injection lasers external quantum efficiency, stimu- lated and spontaneous emission and photolu- minescence measurements 19 p3337 A69-36528

Indium arsenide injection laser observed for self modulation at LF modes, discussing nonMarkovian character of photon density relaxation 19 p3338 A69-36537

Quantum theory for single mode laser radiation, con- sidering photon distribution function and mean field damping decrement by phase quantum fluctuations 21 p3737 A69-38996

PHOTON-ELECTRON INTERACTION

Laser transition and photon energy of lightly doped GaAs, showing many body electron-hole- lattice in- teractions 02 p0257 A69-12615

Gallium phosphide luminescence near indirect transition during multiphoton excitation by Q switched ruby and Nd laser beams 03 p0489 A69-13892

Stimulated Compton effect for energy transfer between relativistic electrons and radio photons in quasi-stellar objects 05 p0828 A69-16652

Angular energy distribution in gamma quanta beam during collision between laser photons and relativistic electrons 10 p1701 A69-23132

Gallium phosphide luminescence near indirect transition during multiphoton excitation by Q switched ruby and Nd laser beams 11 p1939 A69-25693

Inverse problem method for reconstructing electrons differential spectral cross sections and photon pair for- mation in electron photon cascade 13 p2303 A69-28415

Energy transfer during fast electrons and photons in- teractions, indicating Compton energy losses related to space X ray and gamma radiation sources 15 p2676 A69-30953

Photon actuated switch consisting of 10 input binary logic gate and solid state relay to reduce aerospace vehicles self generated noise 20 p3505 A69-37289

Carbon dioxide laser amplifier operation, showing photon-induced current changes dependence on ampli- fier gain 23 p4172 A69-41398

PHOTONEUTRONS

Threshold photoneutron cross section for Mg 26, discussing resonances as primary production mechanism for stellar neutrons 21 p3788 A69-38599

PHOTONS
NT LIGHT BEAMS
NT PHOTON BEAMS

Multiphoton ionization cross section of atom via per- turbed Green function, considering light wave elec- tromagnetic field perturbing effects on atomic levels 02 p0283 A69-11539

Time correlation of photons emitted by krypton gas discharge tube and helium-neon multimode laser 02 p0255 A69-11611

Multiphoton ionization of molecular hydrogen and rare gases using Q switched Nd laser apparatus 02 p0283 A69-11701

Pulsar frequency Doppler shift due to general relativistic corrections to optical path of photons in field of sun 02 p0315 A69-11836

Photon emission in germanium at high injection levels during uniaxial compression 04 p0643 A69-15255

Photon number and amplitude fluctuations of laser radiation in case of inhomogeneously broadened atomic line and for steady state condition 05 p0770 A69-15631

Quadratic and cubic response in photoelectric emis- sion in potassium antimonide under laser irradiation observed with measurement of energy distribution of excited electrons 05 p0771 A69-15813

Low energy photon spectrum at balloon altitudes, noting small geomagnetic latitude dependence 06 p0992 A69-17313

High energy pure photon showers in cosmic ray emulsions in relation to production of magnetic pole- antipole pairs 06 p0996 A69-17883

Enhanced two photon emission between 6S and 4S levels of K, discussing stimulated three photon Raman scattering and four photon parametric coupling processes [IEEE PAPER S-8] 07 p1154 A69-19080

Electron plasma and magnetic field effects on polaritons in semiconducting GaAs studied by Raman scattering of light at small angles 07 p1200 A69-19401

Electromagnetic waves and photons coexistence, discussing wave mechanics and guidance of particles, photon guidance and corpuscular magnitudes, etc 08 p1351 A69-20117

Electron emission of probe caused by impinging ions and photons, discussing model for low plasma densities 08 p1361 A69-20232

Photon momentum distribution role and relation to thermal radiation spectrum in fully ionized gases 08 p1357 A69-20747

Angular distribution of photon radiance of spherical satellite irradiated by Lambertian earth, assuming nonemissive satellite 08 p1311 A69-21095

Photon whirls and formation of protogalaxies, discussing density inhomogeneities in hot model of universe in terms of pregalactic structure dynamics 09 p1361 A69-21355

Bose condensation and shock waves in photon spec- trum during scattering for equilibrium state of ionized plasma and radiation 09 p1546 A69-21574

Lunar photon leakage spectrum due to photons from capture and inelastic scattering of neutrons by galactic cosmic rays 09 p1597 A69-22088

Pulsar NP 0532 optical pulsations period, discussing time rates of change, pulse shape, amplitude, photons, etc 10 p1774 A69-23182

Two photon photoelectron counting statistics and in- tensity fluctuations of incident radiation compared with single photon detectors and applied to laser out- puts 10 p1704 A69-23658

Time correlation of photons emitted by krypton gas discharge tube and helium-neon multimode laser 11 p1895 A69-24718

Two photon and resonance parametric lasers non- linear polarization theory, deriving equations for elec- tromagnetic field oscillations 12 p2110 A69-26910

Proportional counter array for detection of soft X ray photons from OSO-4 observations, discussing solar event energy spectra 12 p2151 A69-26936

Photon loss coefficients in electron beam pumped GaAs laser showing dependence on doping type and impurity concentration, noting threshold current den- sity measurement 13 p2271 A69-27467

Carrier dragging in CdS single crystals under Q switched ruby laser light due to photon stream 13 p2271 A69-27661

Photon emission from highly relativistic stars, using computed differential light delays to calculate blurring of spherically symmetrical emission pulses 13 p2350 A69-27825

Tensor analysis of four photon interaction in rarefied plasma in magnetic field, determining cubic current of plasma wave self action

13 p2314 A69-28444

Rocket-borne scintillation spectrometer for cosmic photon radiation

14 p2449 A69-29566

Transition probabilities of spectral lines in helium-like ions estimated from hydrogen magnetic dipole transitions, discussing single photon decay

15 p2695 A69-30892

Two photon interaction between ultrashort light pulse and medium, showing pulse propagation through medium without absorption

15 p2634 A69-30966

Relative motion of 3 K cosmic background radiation with covariant photon equilibrium distribution

15 p2657 A69-31494

Photon bunching effect in spatially coherent noise field enhanced by superposing monochromatic coherent signal and/or shaping incident noise spectra

16 p2749 A69-31694

Photoelectric effect without photons, discussing classical field falling on quantized atomic electron

17 p3007 A69-32838

Photon whirls and formation of protogalaxies, discussing density inhomogeneities in hot model of universe in terms of pregalactic structure dynamics

18 p3197 A69-34745

Two photon excitation of luminescence in complex uranyl compound single crystals using Q switched ruby laser

19 p3334 A69-35982

IR detector limiting noise voltage /photon noise/ due to photon arrival fluctuations at responsive element determined using Planck radiation law

19 p3309 A69-36059

Two photon decay of metastable levels of hydrogenic and He-like ions in solar corona, depopulating via proton collisional excitation to 2p level

19 p3396 A69-36218

Paradox of incoming photons detection at two antennas without interference pattern disturbance explained by classical and quantum physics

20 p3538 A69-37415

Gas molecule collision influence on photon echo intensity produced by two linearly polarized laser pulses incident on sulfur hexafluoride

21 p3774 A69-38589

Renormalization of second order self energy part of photon and lowest order corrections to single photon vertex using Lagrange vector meson density

21 p3775 A69-39468

Spectral distribution of two photon emission from metastable state of singly ionized He by broadband spectroscopic coincidence counting technique

23 p4220 A69-42378

PHOTOOXIDATION

Photolysis of t-butyl iodide at low temperatures as source of t-butyl peroxy radicals for synthesis of peroxides

07 p1073 A69-18375

PHOTOPIEZOELECTRICITY

U PHOTOELECTRICITY

U PIEZOELECTRICITY

PHOTORECEPTORS

Live retinal photoreceptors studied by low angle X ray reflection, proposing electron density model

22 p3871 A69-40057

Cytoplasmic and ciliary connections between inner and outer segments of mammalian visual receptors

22 p3881 A69-40857

PHOTORECONNAISSANCE

Apollo 6 multisensor imagery of Wilcox Playa /prehistoric lake remnant/ in Arizona, using IR scanner, microwave radiometer, vidicon system and cameras

22 p3942 A69-40988

PHOTOREDUCTION

U PHOTOCHEMICAL REACTIONS

U REDUCTION [CHEMISTRY]

PHOTOSENSITIVITY

U PHOTOCONDUCTIVITY

PHOTORESISTORS

U PHOTOCONDUCTORS

PHOTOSENSITIVITY

NT LIGHT ADAPTATION

NT PHOTOTROPISM

Photographic film blackening under high intensity laser radiation indicating two photon mechanism as responsible

01 p0080 A69-10429

Laser holography using colored KBr crystals subjected to hard gamma radiation as photosensitive material

04 p0598 A69-14855

Photoconductor open circuit voltage determination, calculating responsivity and sensitivity of actual and ideal cases

12 p2093 A69-26481

Hologram recording on photosensitive material based on photoinduced polymerization showing good resolution and diffraction efficiencies

13 p2258 A69-27199

Photographic layers darkening process, using widely spaced or single giant pulses of ruby laser

13 p2260 A69-27612

Capture levels at photosensitive CdS crystals surface determined by studying field effect mobility dependence on electric field

13 p2318 A69-27884

Temperature effects on photosensitivity spectra of cadmium telluride thin films

13 p2318 A69-27889

Photodetector requirements for autocolimators with beam splitters, considering spectral characteristics, photoresponse, time constant, positioning, etc

14 p2447 A69-29326

Spectral distribution of photosensitivity for p-n junctions in silicon doped GaAs, showing agreement with state density model and absorption data

15 p2666 A69-30067

Laser holography using colored KBr crystals subjected to hard gamma radiation as photosensitive material

15 p2608 A69-30247

Photoresponse and minority carrier diffusion length long term stability of Li doped solar cells after proton, neutron and electron irradiation

19 p3252 A69-35697

Color coded area sensitivity maps of photomultiplier tubes by multicolor display technique, noting focus electrode voltage

19 p3305 A69-35724

Previous radiation exposure effect on photographic film noting increased sensitivity at UV frequencies

19 p3314 A69-36626

Cations of sulphates photosensitizing role in photolysis of amino acids and peptides in various atmospheres

20 p3477 A69-37626

Oxygen exchange in *Scenedesmus* and *Chlorella* as function of carbon dioxide, compensation point, Hill activity and photorespiration, using mass spectrometry

23 p4099 A69-42528

PHOTOSENSORS

U PHOTOELECTRICITY

U RADIATION MEASURING INSTRUMENTS

U SENSORS

PHOTOSPHERE

Chromospheric and photospheric solar observations made in Belgium in 1967, noting heliographic sunspot latitudes

02 p0313 A69-11533

Turbulent velocity in faculae and photosphere obtained from IR triplet of oxygen analysis

02 p0314 A69-11646

French solar research program, emphasizing photosphere-chromosphere transition zone

02 p0316 A69-11905

Goldberg-Unno method for determining Doppler width, microturbulence velocity and convection errors, considering photosphere as hot ascending and cold descending columns

02 p0328 A69-12752

Photosphere models comparison based on theoretical rotational temperatures of various diatomic molecular free radicals, using faint lines method

03 p0512 A69-13694

Analysis of equivalent widths as function of disk position for six photospheric neutral atomic oxygen Fraunhofer multiplets, noting O abundance

03 p0515 A69-14034

Spectra of hydrides of Mg 25 and Mg 26 in photosphere, searching for weak lines on basis of isotope shifts

03 p0515 A69-14035

Solar Fe abundance from photospheric permitted Fe and forbidden Fe II lines, noting equivalent widths of two Fe II lines

03 p0515 A69-14036

Photospheric brightness differences and structure of large scale intensity fluctuation, discussing association with solar supergranulation and chromospheric network

03 p0515 A69-14037

Time dependent variations in magnetic fields of active sunspot clusters in photosphere observed by magnetograph

04 p0651 A69-14369

Horizontal and vertical downward velocity components in developed solar active regions

04 p0651 A69-14370

Inner corona Fraunhofer lines invisibility at solar eclipses, emphasizing uncertainty of photospheric absorption lines appearance as electron scattering

04 p0654 A69-14628

Photospheric network obtained by spectroheliograms, discussing Fraunhofer lines weakening, nonsunspot magnetic fields and Zeeman sensitivity

04 p0664 A69-15523

Lithium abundance determination difficulties for undisturbed solar photosphere, noting Li I resonance line identification and model choice

05 p0821 A69-15849

Micro and macroturbulent motions velocity in solar photosphere based on Fraunhofer lines analysis

05 p0823 A69-16014

Spectrum of accelerated particles on surface of stars revealed by observation of photospheric lithium and beryllium

05 p0817 A69-16711

Solar supergranules and hydrogen convection zone analysis based on polytropic atmosphere convection physics

07 p1211 A69-18408

Solar photosphere model with two stream columnar representation of granulation for predicting continuous radiation field

07 p1217 A69-19238

Solar spectral line profiles for photosphere disturbed by short period acoustic waves

07 p1217 A69-19239

Radiative opacity in stellar atmospheres, discussing effect of UV continuum on photospheric radiation field

07 p1221 A69-19393

Solar photosphere abundances of various heavy elements from photoelectric spectrometer measurements of equivalent width of known Fraunhofer lines

08 p1390 A69-20393

Wing of solar line H-alpha for levels population of hydrogen atom in solar photosphere, discussing excitation temperature, absorption coefficient and thermodynamic equilibrium

08 p1390 A69-20394

Electron impacts role on dissociation rates of CO molecules in upper layers of solar photosphere

09 p1590 A69-21376

Effective cross sections of electron-neutron interaction in photosphere and sunspots, calculating electric conductivity and anisotropy coefficient

09 p1579 A69-22175

Solar magnetic fields compared in chromospheric and photospheric layers using magnetograph measurements, noting correlation with solar event

10 p1762 A69-23727

Alpha hydrogen plage 20934 /McMath no. 8362/ associated with July 1966 proton flare development and configuration along sunspot group axis

10 p1762 A69-23728

Center to limb variations of sunspot-photosphere brightness ratio, considering umbra darkening and radiative equilibrium

11 p1946 A69-24426

Magnetic fields, green corona emission and filaments relationship at high solar latitudes using synoptic charts

11 p1964 A69-25416

Photospheric magnetic fields, coronal emission and filaments distribution relationship with 1420 MHz radio emission, noting brightness and plasma density increase

11 p1964 A69-25417

Solar activity complex development based on magnetic, photospheric, chromospheric and coronal observations

11 p1964 A69-25418

Solar spectroscopic techniques, discussing instrumentation problems affecting photosphere line spectra, SNR in absorption spectra and near IR spectra

13 p2341 A69-27588

Tentative solar photospheric model meeting Noyes and Withbroe criticism

14 p2518 A69-29131

Ca II forbidden lines in photospheric spectrum identified with weak Fraunhofer line by photoelectric spectrometer scans

14 p2528 A69-29962

Dissociation equilibrium of diatomic molecules in solar atmosphere, comparing concentration above photosphere to MgH

14 p2528 A69-29963

Solar photosphere and sunspot magnetic fields structure and strength dependence on sunspot area
14 p2528 A69-29965

Fe II forbidden lines profiles and equivalent widths prediction for solar photospheric spectrum, deducing photospheric Fe abundance
16 p2854 A69-31652

Trieste astronomical observatory optical and radio solar photosphere observations in 1967, including solar cycle and north-south symmetry
16 p2858 A69-32206

Photospheric granulation near center of quiet sun, analyzing morphological properties from high definition Stratoscope photographs
17 p3029 A69-33045

Active solar centers interactions above photospheric level and through corona linkages, noting MHD shock waves and magnetic field lines
17 p3040 A69-33801

Temperature fluctuations in solar photosphere, noting transition from convective to radiative energy transport
17 p3040 A69-33810

Solar Fe II lines theoretical equivalent widths calculations, estimating influence of photosphere model on iron abundance data
18 p3191 A69-34305

Electron impacts role on dissociation rates of CO molecules in upper layers of solar photosphere
18 p3198 A69-34764

Molecular concentration-optical depth curves for combinations of two photospheric and two facular models, noting lines contrast dependence on dissociation energy
18 p3204 A69-35391

Interplanetary and photospheric magnetic fields polarities observed by Mariner 4 and with solar magnetograph, noting noncorrelated data along latitudinal strip
18 p3205 A69-35399

Criteria to prove incorrectness of two column model for photospheric granulation proposed by Margrave and Swihart /1969/
20 p3603 A69-37541

Photospheric radiation field role in temperature inversion of stellar chromospheres with dominant H ion opacity, postulating mechanical energy dissipation
20 p3613 A69-38173

Magnetic field fluctuations and radial velocity in undisturbed photosphere, discussing magnetic field relation to radial velocity, cross correlation asymmetry, etc
20 p3535 A69-38300

Revised solar iron abundance by photospheric Fe I lines analysis using Garz and Kock f values, noting influence on solar photospheric model
21 p3796 A69-38475

Mean intensity profiles of photospheric H alpha radiation illuminating solar prominences moving at different heights
22 p4011 A69-39995

Horizontally flowing eddies or Rossby waves in solar convection zone and photosphere, giving mathematical models showing hydromagnetic dynamo effects inducing reversing magnetic fields
22 p4019 A69-40294

Solar He abundance determined from solar model photospheres line and continuum radiation
22 p4031 A69-40911

Solar image selection device based on statistical analysis of photospheric contrast, noting use for electronic photography and location impaired observatory
23 p4213 A69-41697

Phenomenological sunspot model describing granules, supergranules, magnetic fields and photospheric convection
24 p4378 A69-42691

Interplanetary and geophysical conditions forecasting based on repetitions of low latitude photospheric background magnetic field patterns during solar activity cycles
24 p4387 A69-43626

PHOTOSTRESSES
Transparent dielectrics destruction by laser radiation noting stress development in medium
08 p1324 A69-19947

PHOTOSYNTHESIS
Interactions between intermediate fluorescence quenching trapping center and associated electron acceptor of oxygen evolving photosynthetic spinach chloroplast photosystem
01 p0024 A69-10928

Biological life support system for regenerating closed atmosphere by photosynthesis, using gas exchange between man and microalgae
01 p0021 A69-11078

Hydrogen adaptation effect on fluorescence of normal and Mn deficient algae, noting system II photosynthesis
04 p0554 A69-15325

Manganese catalyst photoreactivation in photosynthetic oxygen evolution in Mn deficient alga *Anacystis nidulans* cells
13 p2210 A69-28257

Photosynthesis and respiration rate in vegetables in controlled temperature, humidity, illumination levels, carbon dioxide and oxygen contents
17 p2912 A69-32933

Dual beam white or nearly monochromatic light source providing programmed repetitive sample illumination with variable intensity, pulse duration and sequence for photosynthesis research
19 p3312 A69-36378

Water purification through biological oxidation of organic wastes using controlled photosynthesis, discussing algae production and harvesting
21 p3668 A69-39711

Photosynthesis enhancement in seaweed after alternate exposure to gas laser and tungsten lamp white light passed through IR narrow band filter
24 p4270 A69-42580

PHOTOTHERMOTROPISM

U ANISOTROPY
U PHOTOTROPISM
U TEMPERATURE EFFECTS

PHOTOTROPISM
Q switches transparency as function of incident light intensity
04 p0610 A69-14385

Q switches transparency as function of incident light intensity
14 p2456 A69-28758

PHOTOTUBES

NT PHOTOMULTIPLIER TUBES
Phototubes, photodiodes, photoconductors, quantum detectors, nonlinear optical detectors and heterodyne receiving systems for photodetection of laser outputs
09 p1518 A69-22126

Random function output current obtained in phototube and scintillation detector including amplitude distribution, time measurements and pulse shape discrimination
22 p3947 A69-40670

PHOTOVISCOELASTICITY

Photoviscoelastic stress analysis to predict time dependent stress redistributions in polyphase system with viscoelastic binder under external loading conditions
03 p0524 A69-13061

Polymers stress-strain behavior and corresponding birefringence within limited temperature range and strain rates
15 p2642 A69-30678

PHOTOVOLTAGES

Cadmium sulfide films with larger than bandgap photovoltages, analyzing photovoltage decay and temperature and light intensity effects
06 p0980 A69-17772

PHOTOVOLTALIC CELLS

Linearized time dependent equation for photovoltage distribution in nonuniformly illuminated p-n junction
03 p0486 A69-13636

Photovoltaic solar cell power technology application to space use and exploration [ASME PAPER 68-WA/SOL-1]
05 p0705 A69-16158

Red, blue and no bias light effects on spectral response of copper sulfide-cadmium sulfide cell, using model incorporating photoconductive layer
05 p0808 A69-16358

Drift field photovoltaic cell performance with bulk and surface recombinations
06 p0870 A69-17473

Ceramic CdS photovoltaic solar cell properties and model, classifying junctions according to preparation method
14 p2508 A69-29886

Cu-Cd-S photovoltaic cell models correlated, reporting spectral response and electron microprobe test results
19 p3382 A69-35682

Radiation damage and recovery of lithium-diffused silicon p-n solar cells, measuring photovoltaic parameters as function of gamma radiation fluence
19 p3251 A69-35694

Photovoltaic solar cell power technology application to space use and exploration [ASME PAPER 68-WA/SOL-1]
19 p3255 A69-36418

Photovoltaic cells electrical characteristics, discussing Cd sulfide, single crystal Si and dendritic type Si cells for spacecraft power
22 p3868 A69-40130

PHOTOVOLTALIC CONVERSION

Photovoltaic properties of CdS thin film solar cells and silicon cells at Jupiter temperature and solar intensity
03 p0368 A69-13076

Advanced reconnaissance electric planetary spacecraft (AREPS) concept for repeated coverage of Mars or Venus surface, using solar-photovoltaic system [AIAA PAPER 69-253]
09 p1585 A69-21244

Liquid mercury cathode thrusters characteristics satisfying constraints imposed by solar flux variations with distance from sun [AIAA PAPER 69-237]
09 p1565 A69-21246

PHOTOVOLTALIC EFFECT

Surface photovoltaic effect in copper electroplated single crystal CdS solar cells, discussing Fermi level and Hall effect
05 p0704 A69-15958

Solar cells physical properties and functions, considering band structure of semiconductors, p-n junction diodes and photovoltaic effect, efficiency calculations and radiation damage
12 p2015 A69-25864

Photovoltaics - IEEE Conference, Pasadena, November 1968
19 p3249 A69-35678

Gold donor level impurity photovoltaic effect in silicon, noting solar cell efficiency reduction due to minority carrier recombination
19 p3381 A69-35679

Photovoltaic effects in cadmium mercury tellurides, considering band-gap variations, effective masses, mobilities, majority carrier concentration and pair lifetime
19 p3381 A69-35680

Cu-Cd-S photovoltaic cell models correlated, reporting spectral response and electron microprobe test results
19 p3382 A69-35682

Copper sulfide-cadmium sulfide heterojunction model for photovoltaic effect, considering surface layer intrinsic absorption and CdS photoconductivity
19 p3250 A69-35683

Photovoltaic effect at copper sulfide-cadmium sulfide heterojunction, studying depletion layer width, diffusion lengths and spectral response
19 p3382 A69-35684

PHUGOID OSCILLATIONS

U OSCILLATIONS
U PITCH (INCLINATION)

PHYSICAL CHEMISTRY

Soviet collection of articles on physicochemistry of zirconium alloys
02 p0261 A69-11839

Physicochemical synthesis of monosaccharides from human waste products at atmospheric and elevated pressures, considering methane oxidation by nitrogen oxides and ozone
07 p1071 A69-18971

Soviet collection of articles on physicochemical studies of heat resistant alloys
09 p1524 A69-22135

Heat resistant materials based on high melting point metals, summarizing achievements of chemical technology and vacuum metallurgy
09 p1524 A69-22137

Phase diagram for physicochemical study of CdSb-Ge cross section of Cd-Sb-Ge ternary system, discussing exo-endothermal fusion effects, microstructure, etc
14 p2503 A69-28975

Epoxy adhesives physical chemistry, curing processes, formulation, surface application methods, testing and health hazards
14 p2468 A69-29339

Physicochemical synthesis of monosaccharides from human waste products at atmospheric and elevated pressures, considering methane oxidation by nitrogen oxides and ozone
20 p3483 A69-38219

Soviet book on liquid binary systems covering physicochemical analysis and quantitative methods
21 p3670 A69-39529

Molecular radiobiology, discussing physicochemical processes caused by energy absorption in targets, leading to inactivation under various circumambient conditions
23 p4090 A69-41963

PHYSICAL CONSTANTS TESTING REACTOR
U NUCLEAR RESEARCH AND TEST REACTORS

PHYSICAL EXAMINATIONS

- Cardiovascular system medical examinations for selection of aircraft and spacecraft crew members from healthy men with no apparent disorders or complaints
07 p1066 A69-18983
- Cardiovascular system medical examinations for selection of aircraft and spacecraft crew members from healthy men with no apparent disorders or complaints
20 p3480 A69-38231
- NASA Lunar Receiving Laboratory functional areas and physical, chemical, biological and quarantine activities for crew and lunar samples
21 p3690 A69-38896

PHYSICAL EXERCISE

- Cosmonauts cardiac activity and respiration changes during physical exertion in orbital flight on Voskhod spacecraft
03 p0377 A69-14196
- Telemetry aortic blood pressure and heart rate from dogs under various physical activities and emotional stress
07 p1071 A69-19133
- Stability of male cardiovascular, respiratory and motor systems functional conditions after physical activity in pure O₂ medium at high altitude pressure
08 p1262 A69-19931
- Hypokinesia muscular activity deficit in males confined to bed rest compensated for by physical exercise, noting orthostatic resistance, acceleration endurance, immunity, etc
08 p1263 A69-19932
- Long term hypokinesia effect on cardiovascular system of athletes indicating human orthostatic resistance increase due to physical exercises
10 p1646 A69-23581
- Physical exercises to increase cosmonaut space environment tolerance, discussing effects of acceleration, altitude and hypoxia
15 p2560 A69-31460
- Motion coordination capacity of persons subjected to 40 days bed rest studied by dynamographic technique, discussing nature of slackening
17 p2906 A69-32937
- Prolonged hypokinesia effect on human resistance to physical stress, noting prophylactic influence of physical exercises
17 p2907 A69-32939
- Exercise effects on hepatic cholesterol of rats on diets high in saturated or unsaturated fats
21 p3653 A69-38903
- O uptake of middle aged men, comparing short and long term endurance running effects
21 p3654 A69-38904
- Human performance assessed by pulse rate increment at onset of exercise on bicycle ergometer and decrement during recovery after fasting
21 p3655 A69-38910
- Caucasian and Bantu males oxygen consumption at different work rates, gross body weight accounted for 70 percent of differences between individuals
21 p3655 A69-38911
- Physical activity programs in industry for selected employees as routine component of occupational health programs
21 p3663 A69-38919
- Seasonal effects on energy expenditure during rest and exercise at controlled ambient temperatures, noting effects on heart rate
22 p3890 A69-40211
- Oxygen uptake and circulatory response in human male subjects during maximal treadmill and bicycle exercise
22 p3874 A69-40226
- Arterial and deep venous blood from human forearm analyzed following rest and rhythmic exercise on ergometer in hyperbaric oxygen chamber
22 p3878 A69-40834
- Physical exercise effect on adolescent males, comparing oxygen uptake, heart volume and height in training and nontraining groups
23 p4077 A69-41312
- Stratified blood flow distribution in lung lobule from analyzing breath-holding changes on expired Ar and nitrous oxide tension plateaus during rest and exercise
23 p4078 A69-41315
- Rebreathing method for determining mixed venous oxygen pressure and cardiac output during rest and exercise in trained athletes
23 p4078 A69-41316
- Physical training effects under normal atmospheric pressure on high altitude hypoxia and acceleration resistance in rats, including survival times
23 p4079 A69-41383

- High energy phosphate splitting for energy requirements not met by oxidation during supramaximal exercise, noting glycogen splitting into lactic acid after phosphate exhaustion
23 p4100 A69-41443
- Hand and thumb exercise effects on acquisition tracking task performance
23 p4101 A69-41453
- Hypoxia acclimatization studied by subjecting groups to bicycle exercise at simulated high altitude and at ground level
23 p4086 A69-41678
- Exhaustion time extension in rats by altitude acclimation, noting adaptation loss resulting from physical exercise discontinuation
23 p4086 A69-41787
- Exercise prescription for hypokinetic airline pilots to prevent physiological deterioration and maintain performance, discussing predictive tests, tolerance evaluation, training regimens, etc
23 p4106 A69-41800
- Energy cost of muscular exercise in gastrocnemius muscle of dogs anesthetized with morphine, chloralose and urethane
23 p4093 A69-42065
- Rodent swimming and treadmill training effect on capacity of mitochondrial fraction from hind limb muscles to oxidize pyruvate triples
23 p4095 A69-42084
- Venous tone, peripheral venous pressure, skin and muscle blood flow, alterations of heart rate and respiration in men during leg exercise
23 p4096 A69-42090
- Training effect on fast muscle isometric contraction in rats, discussing mechanical characteristics
23 p4097 A69-42095
- Calorimetry-thermometry discrepancy during prolonged exercise in hot dry environment, measuring rectal temperature with increasing exposure time
23 p4098 A69-42104
- Oxygen consumption, ventilation and cardiac frequency relationship to body weight during submaximal exercise in normal human beings
23 p4099 A69-42169
- Central circulatory responses of humans to rapid skin temperature changes during continuous exercises
24 p4258 A69-42633

PHYSICAL FACTORS

- Human tolerance to SST sonic booms through scheduled community exposure, discussing physiological effects and acceptability level
14 p2541 A69-29153

PHYSICAL FITNESS

- Medical fitness regulations for pilots, including federal and internal airline regulations
06 p1041 A69-16844
- Tilt-table and acceleration tolerance of athletes and inactive students, comparing cardiovascular responses, heart rate and blackout level [DVL-834]
09 p1444 A69-21304
- Abnormalities of routine electrocardiograms in medical certification of pilots, indicating errors in screening
19 p3263 A69-36462
- Physical activity programs in industry for selected employees as routine component of occupational health programs
21 p3663 A69-38919
- Healthy, physically untrained students compared with trained athletes for differences in working capacity concerning orthostatic tolerance and blood pressure responses
22 p3889 A69-39940
- Heart rate responses and corresponding tolerance tests in trained athletes and nonathletes during simulated environmental extremes
23 p4102 A69-41683
- Healthy, physically untrained students compared with trained athletes for differences in working capacity concerning orthostatic tolerance and blood pressure responses
23 p4108 A69-41821
- Norms for quantitative vectorcardiography derived from statistical analysis of results from healthy young subjects, emphasizing medical evaluation of flying personnel
24 p4277 A69-43390
- Medical wastage of military and civil aviators in Great Britain /1963-1968/, discussing cardiovascular disease, fatal flying accidents and psychiatric disease
24 p4277 A69-43391

PHYSICAL OPTICS

- Radar cross sections for arbitrary bodies calculated with computerized ray optics method taking into account depolarization
02 p0209 A69-12332
- Conceptual problems of quantum optics, considering quantum mechanical and classical descriptions of effect of field on matter for damped and undamped modes
03 p0467 A69-13474
- Nonlinear optics noting harmonic generation of light, optical modulation, parametric oscillators, stimulated scattering, self focusing of light and resonance phenomena
05 p0770 A69-15704
- Nonlinear optics, noting polarization induced by electromagnetic waves, wave propagation, light wave coupling in dispersive medium and coupled laser modes
05 p0793 A69-15771
- Nonlinear optics, discussing frequency mixing, induced changes in dielectric constant and parametric amplification in microwave region of spectrum
05 p0772 A69-16229
- Ray optics method of far field scattering by discontinuity in parallel plane waveguide applied to strips, apertures, bifurcations, etc
14 p2423 A69-29753
- Fourier transform techniques applications in optics, converting optical signal amplitude and phase information into electrical signal information
19 p3374 A69-36737
- Coherent light focusing by helicoidal guide-extension to particle focusing, discussing analogy between index distribution for classical optics and potential distribution for electronic optics
22 p3981 A69-40475
- Lateral waves used to explain diffraction effects by light incident upon interface at critical angle of total reflection, discussing quasi-optical properties
23 p4191 A69-42148

PHYSICAL PROPERTIES

- Electrical resistivity, composition, and physical properties of titanium carbide, titanium oxide and titanium-oxygen-carbon alloys
03 p0446 A69-13575
- Book on properties of liquid and solid helium 3 and 4 physical characteristics, phase behavior and experimental techniques
04 p0630 A69-14688
- Whisker research history, discussing characteristic morphology, mechanical and physical properties and future applications as reinforcing components in reinforced metals
04 p0616 A69-14843
- Phase equilibria, phase transformation temperatures and relation between resistivity and chemical composition for alloys of Ti-Al-Mo-Zr system
04 p0618 A69-15079
- Low density polyurethane foam with and without honeycomb as ablative material for reentry vehicles, discussing oxidation resistance
04 p0688 A69-15513
- Randomly rough surface physical and geometrical remote determination by polychromatic bistatic radar
05 p0721 A69-16572
- Physical and physicochemical properties of anodic silica obtained by silicon oxidation in organic bath, discussing possible applications
05 p0810 A69-16589
- Physical electronics, discussing gas discharges, semiconductor devices, electron emission, noise in electronic devices and masers and lasers
05 p0735 A69-16666
- Preparation and properties of NbC-WC and TaC-WC carbides, analyzing hardness, resistivity, thermal expansion and dihedral angle
05 p0782 A69-16796
- Unified methods based on dislocation theory for direct solution of problems pertaining to physical properties of metals
06 p0944 A69-17502
- Australasian microtektite physical and chemical properties, comparing refractive indices, specific gravities, composition trends, etc
08 p1305 A69-19815
- Physical properties control in nickel powders obtained by hydrogen reduction of nickel diamine sulphate solutions
08 p1334 A69-21057
- Type two superconductors physical properties, discussing magnetic flux lines interaction with structural defects
09 p1555 A69-21490

Soviet book on fluid semiconductor properties at high temperatures during transition from solid to liquid state

10 p1744 A69-23316

Soviet book on methods of investigating semiconductors as applied to lead chalcogenides PbTe, PbSe and PbS covering physical and physicochemical properties

12 p2145 A69-26851

Physicochemical and operational properties of trimethylol propane esters as lubricating oils under static and dynamic conditions

12 p2103 A69-27090

Physical and physicochemical properties of ferrites - Conference, Minsk, Belorussian SSR, 1967

13 p2319 A69-27991

Homogeneous NbC and TiC specimens physical properties, discussing current carrier density and mobility dependence on composition

14 p2462 A69-28976

Pressure, temperature, vibrations and structural stresses data acquisition system for aeronautical applications

14 p2450 A69-29686

Semiconductor films synthesis and properties, discussing single crystal films, epitaxial nucleation, nuclei surface distribution, layer kinetics, doping and film-substrate interface

15 p2670 A69-31046

Lower oxides of Si, studying chemical composition, formation conditions, stability and chemical and physical properties

15 p2643 A69-31245

Reinforced textolite plastic dimensional and mass changes in water and oil immersion as function of surface, temperature and time

15 p2643 A69-31550

Precipitation processes and effect on properties of Cr-Ni-W-Ti heat resistant austenitic steel, using electron diffraction and transmission electron microscopy

17 p2984 A69-32833

Lunar based physics and chemistry, discussing exploration of and survival in lunar environment

18 p3112 A69-34235

Lunar surface uppermost layer physical and mechanical properties investigated by soilmeter-penetrometer and radiation densimeter on Luna 13

18 p3113 A69-34239

Polymer molecular structure influence on physical and mechanical properties, considering regularity, chain flexibility, crosslinking and intermolecular forces

18 p3099 A69-34606

B-epoxy and B-Al composites compared for strength/weight and modulus/weight ratios, moisture absorption, corrosion resistance, projected costs, etc

19 p3340 A69-35506

Integral fuel tank sealant based on various hydrofluorocarbon polymers prepared, tested and compared for physical properties

19 p3356 A69-35533

Interplanetary dust sources investigation based on physical and orbital parameters, noting derivation from asteroids and meteorites

19 p3415 A69-36119

Physical characteristics of young planetary nebulae and nuclei, discussing classification of objects II 4997, M 3-27 and M 1-2

19 p3423 A69-36226

Physicomechanical properties of tuff rock based on similarity to lunar surface rock, determining natural density, porosity and compression strength

22 p4034 A69-41105

Surface chemistry effect on physical properties of pressure sintered Be metal, suggesting surface alloying approach by powder metallurgical techniques

24 p4332 A69-42963

PHYSICAL SCIENCES

Physical sciences - USAF Conference, Albuquerque, June 1967

07 p1181 A69-18927

Book on special functions and approximations covering differential and integral equations and attendant theories arising in mathematical physics analysis

10 p1717 A69-22801

PHYSICAL WORK

Long term restriction of muscular activity noting effects on dynamics of cardiac contraction

02 p0198 A69-11515

Human endurance during isolation in closed space with prescribed велоergometric exercises, noting impairment of functional capacity

08 p1263 A69-19933

Human locomotion analysis, measuring metabolic expenditure and mechanical energy levels of principal body segments during walking

15 p2558 A69-30587

Bicycle ergometer combined with induction clutch, investigating effect of eccentric dynamic work with arms and legs

21 p3663 A69-38902

Strenuous physical training effects on human tolerance for work in heat, measuring rectal and mean skin temperatures and heart rates

22 p3890 A69-40199

Human metabolic response to hypothermia measured over wide range of work intensities and durations

22 p3891 A69-40215

Exercise-temperature regulation in men under constant submaximal workload at various simulated altitudes, discussing exercise core temperature equilibrium level setting mechanisms

22 p3891 A69-40219

Regression relations for energy expenditure in work predicted from heart rate and pulmonary ventilation in volunteers carrying loads upstairs

22 p3891 A69-40220

Respiratory gas exchange during workloads, comparing values for ventilation, oxygen uptake and carbon dioxide output measured in air and in helium-oxygen mixture

22 p3891 A69-40221

Heart rate measurements in ski jumpers with radio telemetric system revealing tachycardia during climbing and emotional stress

23 p4078 A69-41313

PHYSICIANS

Flight accident rate of U.S. physician pilots noting relation to number of takeoffs and landings

01 p0022 A69-11344

Aerospace medical educational programs for MD, post-MD and practicing physicians at medical faculties in U.S. and at Ohio State University

23 p4106 A69-41799

PHYSICS

Collection of papers on physics, Volume 31, Part 1, covering stellar evolution, electron transport in semiconductors, plasma microstability, etc

01 p0115 A69-10045

Bulgarian physics yearbook of higher technical institutes of learning, Volume 3

05 p0792 A69-15693

Nonlinear physics - Conference, Munich, June-July 1966

05 p0792 A69-15767

Physical electronics, discussing gas discharges, semiconductor devices, electron emission, noise in electronic devices and masers and lasers

05 p0735 A69-16666

Reports on progress in physics, Volume 31, Part 2

08 p1350 A69-19867

Physics, mathematics, mechanics - Conference Moscow, December 1964

13 p2300 A69-28430

Lunar physics and chemistry - IAA Conference, Belgrade, September 1967

18 p3112 A69-34234

Asymptotic solution, existence and uniqueness of integral equations occurring in elasticity theory and mathematical physics

21 p3772 A69-39618

General and applied physics - Conference, Alma-Ata, U.S.S.R., May 1967

21 p3853 A69-39841

Physics applications to earth and planetary interiors - NATO Conference, Newcastle-upon-Tyne, England, March-April 1967

22 p4015 A69-40172

Book on electronics and electron physics covering electron beams, far IR radiation, electron microscopy, scintillation detectors and breakdown in solids

22 p3981 A69-40667

Physics - Conference, Trieste, June 1968, Volume 1, Condensed matter, plasma physics, turbulence, quantum optics, statistical mechanics, astrophysics, quasars, pulsars, gravitation theory and cosmology

23 p4216 A69-42310

PHYSIOCHEMISTRY

Priming explosives analysis suggesting physicochemical methods for high purity products for space applications

10 p1750 A69-23012

Physicochemical methods of corrosion testing - Conference, Frankfurt am Main, April 1968

10 p1712 A69-23818

Lunar laboratory physical and chemical experiments including scattering phenomena, molecular and atomic beams and gas cloud photochemistry

18 p3113 A69-34237

Ammonia resistojet thruster, describing ammonia physicochemical properties and systems characteristics of pulsed mode operation and continuous thrust resistojets

23 p4203 A69-41931

PHYSIOGRAPHY

U GEOMORPHOLOGY

PHYSIOLOGICAL ACCELERATION

Hypokinesia and acceleration effects on human organism immunity and resistance to inflammatory diseases in 62 day test

02 p0198 A69-11513

Injury stress vs acceleration specification as valid criterion for pilots subjected to high acceleration, introducing models and illustrating with ejection example

17 p2913 A69-33008

Acceleration injury noting water immersion effect on cat lung due to intense body vibration, suggesting restraint as practical solution

17 p2913 A69-33009

PHYSIOLOGICAL EFFECTS

NT HEMODYNAMIC RESPONSES

Weak alternating electric field effects on human circadian rhythms

01 p0013 A69-10167

Soviet book on space physiology covering space flight and laboratory data on cerebral cortex function, digestive system, tissue changes, etc

01 p0014 A69-10743

Changes in organism during sudden decompression, analyzing pressure equalization, dissolved gases transformation and body fluids vaporization

01 p0020 A69-10753

Gemini and Mercury space flights medical results, summarizing physiological effects noted on body systems

01 p0017 A69-11074

Human endocrine-metabolic response to sequential decompression exposure during simulated orbital flight or extravehicular activity

01 p0022 A69-11337

Rodents exposure to neon enriched atmosphere for three weeks in sealed recycling system, discussing body weight pregnancies and litter

01 p0019 A69-11342

Physiological, cytochemical and histological effects on muscular activity, nervous system, adrenal and thyroid glands and liver of mice during 30 day hypokinesia

02 p0198 A69-11502

Physiological processes occurring in voluntary movements of animals under space flight weightlessness conditions

02 p0199 A69-11827

Space biomedical research trends, noting gastroenterology and lack of research on disease processes during space travel and overemphasis on space physiology

03 p0369 A69-12859

Physiological effects of space cabin environment variables during long and hazardous space missions with regard to engineering constraints and radiobiology

03 p0380 A69-13504

Manual performance relationship to men exposed to cold, thermal neutral and hot environments, discussing finger dexterity and motor coordination tests

03 p0381 A69-14074

Work and rest scheduling effect on working capacity and physiological state of male subjects in sealed chamber

03 p0381 A69-14201

Isolation effects on higher nervous activity, motor and vegetative reactions, muscular strength and emotional state

03 p0377 A69-14202

Daily sleep and wakefulness periodicity changes effect on heart rate, respiration and body temperature diurnal rhythms in human males under isolation conditions

03 p0377 A69-14203

Circadian rhythm effect between individuals of separate twin pairs, noting application to physiological research in medical genetics and human biometeorology

04 p0553 A69-15152

Histological investigation of internal organs of mice exposed to atmosphere with high oxygen content

05 p0709 A69-16513

Prolonged bed rest effect on brain bioelectrical activity from EEG reactions of subjects to acoustic signals followed by light signals

05 p0710 A69-16520

High temperature effects on physiological functions of man noting cardiovascular system and heart performance, body heat exchange and blood and urine composition

05 p0710 A69-16523

Clinical spectrum of postural hypotension, treating vasodepressor syncope, orthostatic anemia and idiopathic orthostatic hypotension

06 p0873 A69-17017

Physiological aspects of weightlessness

07 p1060 A69-18573

Oculomotor muscular tonus of rabbit during rocket flight acceleration and weightlessness

07 p1062 A69-18590

Drosophila melanogaster flies reproductive behavior and *Tridacna paludosa* chromosome patterns after weightlessness onboard Vostok 3 and 4

07 p1063 A69-18597

Immunological and histochemical methods for studying mice reactivity after long term exposure to hyperoxic atmosphere

07 p1065 A69-18975

Hypokinesia muscular activity deficit in males confined to bed rest compensated for by physical exercise, noting orthostatic resistance, acceleration endurance, immunity, etc

08 p1263 A69-19932

Aircrew members skin temperature changes in response to intense diffusive thermal radiation, noting psychological response to exposure [AGARDOGRAPH-111]

08 p1264 A69-20669

Thermoregulatory reactions of human body to sharp increase of ambient radiant temperature [AGARDOGRAPH-111]

08 p1264 A69-20670

Skin and subcutaneous temperature during exposure to intense thermal radiation, discussing estimation of subcutaneous temperature from skin temperature data [AGARDOGRAPH-111]

08 p1264 A69-20671

Thermal radiation effects on cutaneous vasomotor and sudomotor control of human organism [AGARDOGRAPH-111]

08 p1265 A69-20672

Long time physiological effects of rotating systems, surveying acceleration effects and rotation experiments on humans and rats

08 p1265 A69-21183

Landing and takeoff demonstration tests of OV-10A aircraft through rough terrain, noting pilots excessive physiological stresses [AIAA PAPER 69-316]

09 p1434 A69-22391

Physiological effects of breathing cool dehumidified air in hot humid environment, tabulating tolerance time, heart rate, temperature changes and sweat loss

09 p1446 A69-22543

Increased chronic acceleration physiological effects on chickens, comparing hematological observations with exercise capacity, survival and sexual development

10 p1641 A69-23041

Physiologic and metabolic effects in humans undergoing therapeutic hypothermia

10 p1643 A69-23125

Ocular injuries during bailout from Vampire aircraft, noting hemorrhages

10 p1649 A69-23380

Hypokinesia effects on human neurology on extended space flights simulated by 72-day bed rest

10 p1646 A69-23506

Automatic computer processing of physiological data during space flights, discussing choice of computers and computer programs

10 p1649 A69-23509

Prolonged bed rest effect on human myogenic tonus and proprioceptive reflexes, comparing test subjects with and without physical exercises

10 p1646 A69-23583

Combined effect of prolonged bed rest and acceleration exposure on human blood circulation, noting increased heart rate and arterial blood pressure

10 p1646 A69-23584

Altitude climates effects on human performance, discussing oxygen consumption at moderate altitudes during vigorous physical activity

11 p1827 A69-24924

Transensor implantation, sham implantation, no implantation and lighting effects on rat body composition, noting fat and water content

12 p2020 A69-26557

Book on earth atmosphere and outer space influence on human physiology for life support systems design

12 p2024 A69-27074

Gravity preference tests on rats subjected to simulated Aerobee 150 A rocket launching and flight in ground based spiral centrifuge

13 p2213 A69-28090

Physiopathological reactions of humans exposed to infrasonic vibrations applied via auricular canal, observing cardiac and circulatory hemodynamic troubles

13 p2215 A69-28590

Posture role in physiological effects of acceleration on motor activity, discussing gravitational importance to vital processes

13 p2211 A69-28593

Climatic environments development for physiological studies, considering ambient temperature, radiated heat and air velocity and movement

13 p2215 A69-28594

Physiological effects of intermittent light stimulation during helicopter flight, discussing visual and electric cortical functions at critical frequency threshold of subjective fusion

13 p2211 A69-28595

Lung ventilation mechanics affecting respiration in hyperbaric environment during deep diving, stressing biological necessity of equal pressure respiration

13 p2215 A69-28598

Circadian rhythms characteristics in humans, animals and plants, noting possible effects of rhythm disturbances on astronauts

13 p2211 A69-28614

Hypokinesia effects on transversostriated muscle fibers of mice, noting changes in myofibrillar apparatus, mitochondria and sarcoplasm

13 p2212 A69-28616

Autonomic nervous system role in controlling body functions after rapid decompression, increasing tolerance to pressure gradients by physical training

13 p2212 A69-28622

Noise measurement and scales in studying psychological and nonauditory physiological effects on human functioning

14 p2485 A69-29150

Human tolerance to SST sonic booms through scheduled community exposure, discussing physiological effects and acceptability level

14 p2541 A69-29153

Preferential shifts in consumption of metabolic fuels following exposure to hydrazine or monomethylhydrazine, considering biochemical and physiological responses

14 p2407 A69-29303

Oxygen physiological and biochemical effects on *Pseudomonas saccharophila*, discussing sucrose uptake, lipid synthesis and polysaccharide formation

15 p2556 A69-31045

Mass supersonic air transport physiological problems, reporting findings of FAUSST committee concerning ozone toxicity, pressure drops, sonic booms, time zone physiology, etc

15 p2556 A69-31225

Light effects on circadian rhythms in monkeys, describing changes in deep body temperature and locomotor activity phase relationships

15 p2556 A69-31336

High vacuum effects on oxidative processes in bacteria and physiological activities of enzymes

15 p2557 A69-31354

Alternating electric field effects on circadian rhythms in men, discussing period shortening and internal desynchronization

15 p2557 A69-31461

Long distance air flights through different time zones, discussing circadian physiological cycles, light-dark ratio shifts effects and methods of lessening desynchronization effects

16 p2745 A69-32444

Motion coordination capacity of persons subjected to 40 days bed rest studied by dynamographic technique, discussing nature of slackening

17 p2906 A69-32937

Human motion coordination under acceleration followed by weightlessness during jet flights along Keplerian orbits, discussing initial disturbance and subsequent subsiding

17 p2907 A69-32938

Physiological effects on men of 10 hour exposure to nitrogen-oxygen mixture followed by pure oxygen 4 hour exposure, simulating conditions during EVA

17 p2912 A69-32940

High positive g sub x acceleration effects on red cells destruction rate, measuring endogenous CO production of Gemini astronauts

17 p2908 A69-33176

Pulmonary mechanics during zero gravity maneuvers, noting decrease in flow rate and increase in expiration time without decrease in vital capacity

17 p2909 A69-33181

X irradiation and temperature effects on flour beetle *Tribolium confusum* pupae, noting wing abnormalities and pupal stage duration

17 p2910 A69-33748

Relationship between human response to noise and physical parameter, discussing controlled laboratory investigation to determine duration effect on annoyance

18 p3097 A69-34324

Histological investigation of internal organs of mice exposed to atmosphere with high oxygen content

18 p3096 A69-34732

Prolonged bed rest effect on brain bioelectrical activity from EEG reactions of subjects to acoustic signals followed by light signals

18 p3096 A69-34739

High temperature effects on physiological functions of man noting cardiovascular system and heart performance, body heat exchange and blood and urine composition

18 p3096 A69-34742

Toxic effects of Freon R FE 1301 on animals and human beings at different concentrations, assessing judgement, alertness and neuromuscular skill

18 p3098 A69-35061

Microbiological influence on astronauts efficiency during and after long space flights, stressing simulated microclimates and confinement effects on flora

18 p3097 A69-35304

Mechanical vibration effects on human body in industry and in terrestrial, aerial and nautical vehicles, discussing harmful frequencies and safety measures

19 p3259 A69-35605

Auditory analyzer functional changes due to prolonged slow rotation

20 p3470 A69-37251

Human sleep during prolonged rotation, discussing electroencephalograms, acoustic signal frequency producing waking reaction, cutaneous galvanic reflex and sleepiness of sleep

20 p3472 A69-37261

Vestibular analyzer dynamic characteristics under Coriolis acceleration, measuring heart beat rate, arterial pressure, head bending aftereffects, etc

20 p3472 A69-37262

Immunological and histochemical methods for studying mice reactivity after long term exposure to hyperoxic atmosphere

20 p3479 A69-38223

Psychology and physiology of vision in relation to large screen display design, discussing effects of symbol size and spacing, color usage, etc

21 p3662 A69-38330

Carbon dioxide levels monitoring in spacesuit research including limits of physiological acceptability

21 p3665 A69-39170

Heart electrical activity time sequence estimation based on multiple dipole binary model, deriving algorithm

21 p3668 A69-39865

Circadian rhythm phase shifts during ontogenesis produced by hormone concentration changes resulting from light variations

22 p3872 A69-40198

Maximum voluntary isometric muscle strength relation to endurance time in static work during partial curarization

22 p3890 A69-40213

Whole body LF mechanical vibration effects on anesthetized dogs peripheral circulation and vascular smooth muscle

22 p3875 A69-40228

Arterial and deep venous blood from human forearm analyzed following rest and rhythmic exercise on ergometer in hyperbaric oxygen chamber

22 p3878 A69-40834

Astronaut weight loss during space flight related to mission duration, noting dehydration and catabolism roles

23 p4100 A69-41303

Sotalol and propranolol cardiovascular effects, comparing toxicity and blocking action against circulatory and cardiac effects of catecholamines

23 p4080 A69-41403

Feline lung injury produced by vertical sinusoidal vibrations during upright water immersion attributed to chest wall impact

23 p4082 A69-41447

Flying effects on air hostesses, considering questionnaire data for various psychophysiological factors and flight modes

23 p4086 A69-41688

Pulmonary mechanics during zero gravity maneuvers, noting decrease in flow rate and increase in expiration time without decrease in vital capacity
23 p4089 A69-41825

Change in weight, plasma volume, urine flow and hematocrit in man before and after immersion up to chin in thermally neutral bath
23 p4096 A69-42087

Respiration effects on heart rhythm emphasizing direct mechanical influences
23 p4097 A69-42093

Central nervous, cardiovascular and metabolic data of Macaca nemestrina during simulated Biosatellite flight, testing data acquisitions systems
24 p4260 A69-42703

Physiological circadian rhythms in isolated and nonisolated Macaca Nemestrinas living under varied light intensities, noting telemetered deep body temperature, urine volume and sodium, etc
24 p4261 A69-42707

Noise level effects on pharmacological effectiveness of centrally acting drugs in rats
24 p4262 A69-42947

Continuous noise level effects on stabilized escape conditioning in male albino rats
24 p4262 A69-42948

Biological and physiopathological effects of UHF electromagnetic radiation of radar antennas, reviewing localized effects
24 p4273 A69-42996

Human circulatory reactions to cumulative flight vegetative stimuli evaluated by cumulative stress simulation method
24 p4266 A69-43375

Psychophysiological effects of fatigue and correlation with somatic parameters following circadian rhythm
24 p4268 A69-43407

Altitude decompression sickness in aviation, discussing physiological mechanisms underlying syndrome and treatment of conditions
24 p4269 A69-43412

PHYSIOLOGICAL FACTORS
NT PHYSICAL FACTORS

Neuromuscular actuation system model, noting compatibility with human physiological and anatomical data in tracking tasks
02 p0202 A69-11952

Physiological or survival training emphasizing psychological approach
06 p0879 A69-16965

Physiological functions of aged Japanese pilots, discussing height, weight, Rohrer index, obesity, vision deterioration and hearing disturbances
06 p0876 A69-18028

Optimum physiological parameters selection criteria for medical control of crew during space flights
07 p1071 A69-18978

Cold water immersion effects on man from physiological and physiopathological viewpoint, examining clothing effect
08 p1267 A69-20682

Heat susceptibility and tolerance in astronauts obtained by plot of skin and oral temperatures for subject under thermal stress
10 p1644 A69-23376

Physical factors affecting proximal and distal tubular sodium reabsorption in dogs undergoing water diuresis
13 p2210 A69-28482

Multichannel telemetry system for chronic implantation in animals to monitor physiological parameters
15 p2559 A69-31044

Space medicine to characterize nature and degree of changes in human functional capabilities due to space flight environment prolonged exposure
19 p3456 A69-36460

Soviet collection of papers on vestibular analyzer physiology
20 p3467 A69-37240

Optimum physiological parameters selection criteria for medical control of crew during space flights
20 p3483 A69-38226

EEG alpha activity relationship to laterality of reflective eye movements, indicating physiological correlates of hypotizability
22 p3887 A69-41213

Flight altitude effects on pilot performance with comparison of sensory and mental functions, considering oxygen use and flight safety
23 p4106 A69-41794

Space medicine to characterize nature and degree of changes in human functional capabilities due to space flight environment prolonged exposure
23 p4087 A69-41803

Risk factors in coronary diseases modified to provide base for estimating achievable mortality magnitude reduction
24 p4262 A69-43059

Mathematical input-output model for vestibular system, relating linear and angular motions to non-visual perception of orientation, motion and nystagmus for physiological characteristics
24 p4276 A69-43274

Behavioral patterns and physiological parameters of medical leech Hirudo medicinalis determined in natural environment prior to biological experiment in space
24 p4268 A69-43402

Physiological and psychological variables relationship in candidate pilots, noting age and educational level
24 p4268 A69-43406

PHYSIOLOGICAL RESPONSES

NT HEMODYNAMIC RESPONSES

Monkey psychomotor reactions during ballistic flight, noting alertness reduction during weightlessness
01 p0017 A69-11082

Physiologic and psychomotor changes during various acceleration stresses
01 p0019 A69-11340

Physiological studies of centripetal and Coriolis accelerations effects on vestibular function of humans in rotating chamber
02 p0197 A69-11498

Long term restriction of muscular activity noting effects on dynamics of cardiac contraction
02 p0198 A69-11515

Physiological causes and prevention of motion sickness during space flight, emphasizing conditioned reflex, different analysors interactions and vestibular-vegetative changes during weightlessness
02 p0200 A69-12122

Organic reaction and adaptation of rabbits and dogs to simulated weightlessness and acceleration compared with orbital flight data of human responses
03 p0376 A69-14192

Physiological mechanisms of weightlessness on human organism, discussing adaptation to weightlessness
03 p0377 A69-14197

X ray investigation of repeated simulated exposures to altitude and acceleration on healthy professional flyers
03 p0378 A69-14208

Sonic boom effect on corticosteroid level in human blood, noting no changes
03 p0378 A69-14209

White rat physiological processes while maintained on hypothermic cardiopulmonary bypass with small membrane type heart-lung machines
05 p0708 A69-15971

Biochemical indicators of pilot reactions to flights complicated by unexpected autopilot failures, using postflight chemical analysis of blood and urine
05 p0710 A69-16525

Renal excretion response to blood fluid volume shift resulting from altered orientation within gravity or from absence of gravity
06 p0873 A69-17015

Physiological response of human skeleton to hypogravity and hypodynamics studied by bed rest experiments, suggesting disuse atrophy of bone
06 p0873 A69-17019

Human physiology advances in connection with space exploration, discussing internal medium adaptation to space environment
06 p0873 A69-17061

Sympathoadrenal activity during and after impact stress measured from urinary excretion of catecholamines and 17-hydroxycorticosteroids
06 p0875 A69-17839

Soviet cosmonauts physiological reactions during weightlessness, analyzing EKG, arterial pressure, heart and respiratory rates and motion coordination
07 p1060 A69-18570

Physiological reactions of dogs during acceleration and weightlessness in suborbital flights of ballistic rockets
07 p1061 A69-18577

Phonocardiograms, EKGs, sphymograms, heart and respiration rates, body temperature and motor activity recorded/transmitted by TV during canine confinement in Soviet biological capsules
07 p1061 A69-18578

Statistical study of heart beat, respiration rate and arterial pressure of man during intermittent accelerations and short term weightlessness
07 p1061 A69-18579

Sensory and physiological reactions experienced by cosmonauts during parabolic training flights, tabulating arterial pressure, heart beat and respiration rate
07 p1061 A69-18580

Human and animal cardiovascular system reactions to weightlessness, noting vagus nerve role in adjusting organism
07 p1061 A69-18583

High oxygen concentration effect on conditioned reflex and associated EEG responses to light flash in rabbits occurs in well defined sequences
07 p1065 A69-18976

Human organism reaction to prolonged limitation of muscular activity during weightlessness simulated by bed rest, noting hypokinetic component of weightlessness
08 p1262 A69-19837

Mathematical, physical and physiological modeling for analysis of functional changes during varying gravity conditions
09 p1444 A69-22541

Rapid global transportation effect on circadian rhythmic patterns in human body functions, discussing kidney excretion and pituitary adrenal cortical system
09 p1444 A69-22545

X ray irradiated dogs subjected to heat stresses to determine thermoregulatory ability
09 p1445 A69-22548

Response rates of rats to periodic shocking for food reinforcement with added clock cue stimuli
10 p1644 A69-23304

Heat and humidity endurance limits in man
10 p1645 A69-23494

EEG, heart beat, respiration rates, body temperature, motor activity, physical and mental efficiency of man during anechoic chamber confinement
10 p1646 A69-23510

Hamsters responses to helium-oxygen and nitrogen-oxygen at ambient temperatures, comparing respiration rates, weights and body temperatures
10 p1646 A69-23564

Vegetable diet including 210 g of dry Chlorella biomass decreases effect on calcium and magnesium assimilation to produce insignificant negative balance of K and Mn
10 p1647 A69-23590

Human physiology for exposure to acute hypoxia studied with variation pulsograms and indices of external respiration and pulmonary gas exchange
10 p1647 A69-23592

EEG, EKG, respiratory motions and pulmonary ventilation recordings in study of carbon dioxide additions effect on human tolerance to hypoxic conditions
10 p1650 A69-23898

Blind goldfish behavioral responses to short lowered gravitational force cycles during vertical flight classified as vestibular reflexes resulting from otolith displacement
11 p1828 A69-25464

Biotelemetry of human physiological processes in space for assuring physiopsychological control and immediate intervention for emergencies, discussing application in Mercury and Gemini projects
12 p2023 A69-26491

European pilots accustomed to equatorial climate tested during regular flying missions, discussing heat effects on urinary steroids
12 p2024 A69-26560

Ventral posterolateral potentials in anesthetized immobilized cats in response to electric stimulation of mesenteric nerves and mechanoreceptors, studying thalamus nucleus role
12 p2020 A69-26562

Immobilization effects on alpha rhythm, locomotor coordination and visual alimentary motor reflexes of cats
13 p2212 A69-28617

High altitude acclimatization effects on cardiovascular system, external respiration, blood composition, optical and vestibular analyzers in human subjected to various stresses
13 p2212 A69-28623

Social and visual isolation effect on rat blood pressure, pulse pressure, heart rate, behavior and response to epinephrine
14 p2407 A69-29296

Visual, auditory and reaction-time responses in aging pilots, determining continuing capacity for choice and discrimination with advancing age
14 p2408 A69-29307

Food intake changes of female rats in response to changes in energy balance, discussing steroids as physiological tracer
15 p2555 A69-30693

Circadian rhythm in dermestid beetles *Trogoderma glabrum* Herbst as response to compulsory constant light and temperature conditions
15 p2557 A69-31469

Diurnal periodicity of physiological functions of flight crews flying through several time zones found to correspond to time zone of permanent residence
17 p2906 A69-32935

Acceleration injury noting water immersion effect on cat lung due to intense body vibration, suggesting restraint as practical solution
17 p2913 A69-33009

Leg volume changes in response to lower body negative pressure due to blood redistribution
17 p2908 A69-33171

Compensative adaptational reactions to weightlessness, discussing blood supply to thorax area, external respiration, gas exchange and energy loss during parabolic and orbital flights
17 p2909 A69-33384

Biochemical indicators of pilot reactions to flights complicated by unexpected autopilot failures, using postflight chemical analysis of blood and urine
18 p3096 A69-34744

Book on simulation in biology and medicine covering mathematical models, blood circulation, pulmonary ventilation, etc
19 p3260 A69-35894

Transient electrical responses from retinas, discussing visual pigment role in visual excitation, photochemistry, etc
19 p3258 A69-36377

Electrical response of frog and human visual cortex neurons to thermal vestibular and light flash stimulation
20 p3469 A69-37242

Cats vestibular neurons reactions to labyrinthine mon- and binaural polarization and caloric stimulation
20 p3471 A69-37255

Vestibular functions of humans subjected to Coriolis acceleration via prolonged rotation at different angular velocity rates
20 p3472 A69-37260

Test pilot vestibular training program to achieve higher tolerance of rotation, rocking and balancing and visual stimuli
20 p3472 A69-37266

Physiological and somatic effects on insects of radiation source onboard biosatellite 2, discussing wing abnormalities in flour beetle
20 p3476 A69-37619

High oxygen concentration effect conditioned reflex and associated EEG responses to light flash in rabbits occurring in well defined sequences
20 p3479 A69-38224

Eye elemental response to individual frequency jumps in oscillations of light, noting transient effect polarity
21 p3650 A69-38320

Male patients urine tests during sinusoidal vibration, noting catecholamine excretion as criterion of emotional stress under various environmental conditions
21 p3654 A69-38909

Human performance assessed by pulse rate increment at onset of exercise on bicycle ergometer and decrement during recovery after fasting
21 p3655 A69-38910

Physiological and psychological measurements of high pressure effects on man and animals, discussing decompression sickness, respiratory embarrassment, inert gas narcosis, helium tremble, etc
21 p3655 A69-38912

Nervous system reactions and resistance to ionizing radiation noting role of functional, morphological and physicochemical changes in nerve tissues
21 p3659 A69-39061

Histological changes in internal organs of rats after exposure to 400 r fast neutron dose, showing destructive processes followed by compensation reactions of cellular proliferation
21 p3659 A69-39062

Mandrax and barbiturates effects on aircrew reaction time, response time and tracking ability
21 p3661 A69-39274

Sympathetic nerve liberated noradrenaline increasing melatonin synthesis, using C 14 tracer for monitoring
22 p3871 A69-40051

Functional changes of somatosensory pathway from periphery to cortex during rapid eye movement (REM) and non-REM periods of deep sleep
22 p3872 A69-40161

Meaningful comparisons between single stimulus EEG records and average evoked potential
22 p3890 A69-40163

Strenuous physical training effects on human tolerance for work in heat, measuring rectal and mean skin temperatures and heart rates
22 p3890 A69-40199

Human metabolic response to hypothermia measured over wide range of work intensities and durations
22 p3891 A69-40215

Cerebellar cortex reactions to sciatic nerve stimulation in rats under transverse accelerations in centrifuge
22 p3877 A69-40279

Human heart chronotropic reactions during centrifuge acceleration tests up to tolerance limit, establishing sinus tachycardia in various degrees
22 p3877 A69-40283

Local electroretinogram responses produced in cats by light intensity incremental changes
22 p3878 A69-40835

Nocturnal and diurnal monkeys spectral sensitivity functions determined from simultaneous recordings of light-evoked cortical and retinal responses
22 p3882 A69-40867

Eye movement control mechanisms during binocular fixation used to determine corrective roles of flicks and drifts
22 p3883 A69-40876

Human electroretinogram (ERG) physiological variations as function of stimulation energy and wavelength
22 p3884 A69-40884

Antidiuretic hormone (ADH) and bradykinin effects on human thermal and cholinergic sweating after subdermal injection in forearm, abdomen and leg
23 p4077 A69-41311

Structural differences effect of gyral and sulcal areas of acoustic projection cortex on primary induced acoustic responses
23 p4079 A69-41380

Pigeon accelerated performance patterns as function of contiguity of brief visual stimuli and food reinforcement, noting pattern absence during stimuli omission
23 p4081 A69-41436

Human sweat glands reflex responses to diverse skin cooling rates in hot room, discussing bath temperature step decrease effect on lower limb
23 p4082 A69-41446

Circadian rhythms characteristics of healthy human beings as reference standards for comparing investigation data from different continents
23 p4083 A69-41457

Potent chemical factors released from anterior hypothalamus of rhesus monkeys in response to thermal stress during thermoregulation
23 p4084 A69-41472

Mathematical formulation for relative values of cardiac output and peripheral resistance as two contributing factors to arterial pressure change
23 p4085 A69-41473

Dependence of cochlear microphonics and summating potential on endocochlear potential
23 p4085 A69-41574

Physiological response to steady state hypoxia from exposure to 12 percent oxygen atmosphere, noting minimal heart rate and blood pressure changes
23 p4085 A69-41673

Human physiological responses to angular acceleration during breath holding, Mi, Valsalva and Mueller respiratory maneuvers in hollow spherical simulator
23 p4102 A69-41679

Physiological experiments to investigate aerospace flight stresses effects on oculomotor equilibrium, noting cardiovascular reaction and mechanism for interpretation
23 p4087 A69-41804

Jet pilot blood pressure response during positive acceleration in actual flight measured by telemetry compared with centrifuge test
23 p4089 A69-41822

Diurnal rhythms of heart rate and blood pressure reactions to posture changes on tilt table, finding orthostatic lability maxima
23 p4094 A69-42072

Efferent innervation influence of one ear to another in feline auditory system, based on afferent neurons responses to contralateral and binaural stimulation
23 p4094 A69-42073

Human thermal regulatory mechanism using analog simulation compared with experimental results of resting subjects responses to climatic chamber
23 p4111 A69-42079

Coronary circulation response to hyperoxia after vagotomy and combined alpha and beta adrenergic receptors blockade in anesthetized intact dog
23 p4096 A69-42088

Oxygen effect on X ray induced somatic crossing over frequency in *Drosophila melanogaster*, noting

bristle spots number modification on abdominal tergites
23 p4099 A69-42118

Adrenosympathetic reaction in flight, studying contributions of physical and nervous stresses in physically trained and untrained persons
23 p4099 A69-42363

Occipital eeg activity slowing and physiological changes during prolonged immobilization plus perceptual deprivation of human beings
24 p4256 A69-42554

X band pulsed microwaves effect on skin metabolism including respiratory activity, biochemistry and biosynthesis of intercellular materials, etc
24 p4270 A69-42575

M-1 Valsalva maneuver induced cardiovascular stresses effect on oculobulbar vergence of subjects observing Thorington scale, discussing probable physiological mechanisms
24 p4266 A69-43373

Aircraft passenger cabins pressure safety limits estimating factors, discussing human respiratory gas exchange mechanism, pressure drop and smoking effects, etc
24 p4269 A69-43411

PHYSIOLOGICAL TELEMETRY U BIOTELEMETRY

PHYSIOLOGICAL TESTS

NT BODY SWAY TEST

NT EAR PRESSURE TEST

NT VESTIBULAR TESTS

Physiological measurements onboard Soviet bioprobes and biosatellites including electrocardiography, phonocardiography, sphymography, seismocardiography and pneumography
01 p0015 A69-10947

Temporal pattern perception by human subjects required to integrate information presented in two modalities
02 p0200 A69-12724

Stability and habituation of nonspecific galvanic skin responses during light and sound stimulation periods in medical students
03 p0380 A69-13462

Permissible radiation doses for extended space missions, discussing clinical tests on dogs
05 p0708 A69-16508

Rules for selecting Soviet cosmonauts and physiological studies concerning heart and respiratory reactions to accelerations and weightlessness during preparation
07 p1060 A69-18569

Physiological and medical tests on Soviet cosmonauts onboard Voskhod spacecraft, assessing CNS, cardiovascular and respiratory systems and work-rest schedule
07 p1060 A69-18571

Auditory startle stimuli effect on human performance, noting decrease in mental and sensorimotor activity
07 p1066 A69-19421

Dogs cardiovascular activity mathematical analysis from physiological indices during long space flight
08 p1261 A69-19828

Tilt-table and acceleration tolerance of athletes and inactive students, comparing cardiovascular responses, heart rate and blackout level
09 p1444 A69-21304

Computer program for onboard medical checkups of spacecraft crews during extended space flights, discussing tests and intervals
10 p1649 A69-23505

Human intolerance to bacteria as food, considering response to *Hydrogenomonas eutropha* and *Aerobacter aerogenes*
13 p2213 A69-27265

Physiological and psychologic aging in professional pilots analyzed on basis of cardiovascular, pulmonary, exercise tolerance and sense testing
14 p2408 A69-29309

Permissible radiation doses for extended space missions, discussing clinical tests on dogs
18 p3095 A69-34727

Otolith apparatus functioning under weightlessness and accelerations in test stand experiments, discussing measuring techniques and nystagmic reaction durations
20 p3471 A69-37253

Surrounding noise effects on quick check audiometry test reliability, discussing pathological effects
21 p3725 A69-39286

Cortical responses by transient sensory stimulation of fingers EEG recorded, obtaining isomorphism between psychological and neurophysiological events
22 p3876 A69-40262

Whispered vowels pitch perception test using listen-and-compare method to determine formants for comparison with complex analysis procedure
23 p4190 A69-41575

Exercise prescription for hypokinetic airline pilots to prevent physiological deterioration and maintain performance, discussing predictive tests, tolerance evaluation, training regimens, etc
23 p4106 A69-41800

Physiological experiments to investigate aerospace flight stresses effects on oculomotor equilibrium, noting cardiovascular reaction and mechanism for interpretation
23 p4087 A69-41804

Subjects confined in caves for two to six months to note physiological rhythms time evolution and associated desynchronization and resynchronization
23 p4107 A69-41818

Test animals prolonged deep submersion in water, in mixed oxygen-H atmosphere at elevated pressure, noting EEG and EKG activities
24 p4262 A69-43025

PHYSIOLOGY

NT AUDIOLOGY

NT BODY COMPOSITION [BIOLOGY]

NT ELECTROPHYSIOLOGY

NT MENSTRUATION

NT NEUROPHYSIOLOGY

NT PSYCHOPHYSIOLOGY

NT RESPIRATORY PHYSIOLOGY

Magnetic fields role in neuropsychiatric and physiological experiments, noting effect on phagocyte activity
05 p0715 A69-16627

Physiological approach to tests and evaluation of aviation survival equipment, noting human reactions study under extreme conditions
06 p0877 A69-16953

Collection of papers on hypodynamics and hypogravics, physiology of inactivity and weightlessness
06 p0872 A69-17010

Digital computer program for physiological measurements, outlining interpolation of mathematical functions describing signals time variations
17 p2912 A69-32941

Physiological processes computer simulation with aorta modeling as example, noting difficulties and major problems
18 p3098 A69-34669

Organism growth physiology based on decisive enzyme reactions, considering synthesis of biological proteins from DNA and molecular life processes
21 p3652 A69-38787

Thermal physiology standardized symbols compilation for units of measurement
23 p4078 A69-41317

Space physiology, describing laboratory and onboard experiments
23 p4086 A69-41686

PI-ELECTRONS

Response of pi electrons in large organic molecule to scalar field for coronene, showing oscillator strength enhancement near single particle excitation band
20 p3580 A69-37497

PIASECKI MILITARY AIRCRAFT

U MILITARY AIRCRAFT

PICKLING

U CHEMICAL CLEANING

PICKOFFS

U SENSORS

PICKUPS

U SENSORS

PICTURE TUBES

Monochrome pictorial encoding, discussing pulse code modulation, delta modulation and buffer storage techniques
02 p0213 A69-12154

PICTURES

U PHOTOGRAPHS

PIERCING

Complete solution for punching smooth interface double layer Tresca material in plane deformation, including Coulomb material
09 p1617 A69-22048

PIEZOELECTRIC CRYSTALS

Acoustoelectric domains in CdS, making time evolution visible by means of modified optical strain birefringence and stroboscopic illumination
02 p0258 A69-12618

Parametric light generation employing KDP nonlinear crystals with mechanically tuned frequency
03 p0437 A69-13045

Electroacoustic amplifier based phonon devices, using surface waves on piezoelectric materials to speed radar data real time processing
03 p0394 A69-13353

Transverse electro-optical effect in piezoelectric crystals, using light modulation
04 p0639 A69-14427

Free carrier Faraday effect in piezoelectric semiconductors investigated for microwave frequencies, low temperatures, mixed deformation potential and piezoelectric scattering
04 p0643 A69-15201

Threshold velocities of acoustoelectric current oscillations in elemental piezo- and nonpiezoelectric semiconductors, taking into account amplification and losses of phonons
05 p0807 A69-15956

High power continuous and quasi-continuous wave UV generation by ADP and KDP crystals in argon-ion laser cavity [IEEE PAPER B-1]
05 p0773 A69-16308

Entrainment and acoustothermal effect in piezoelectric semiconductors having electrons with different energy
10 p1746 A69-23573

Acoustic wave amplification and generation in piezoelectric semiconductors and semimetals by supersonic carrier drift currents
11 p1926 A69-24641

Temperature behavior of resonant and antiresonant frequencies as function of electromechanical coupling and overtone order in piezoelectric resonators
14 p2421 A69-29542

Nonlinear analog of conical refraction in biaxial crystals, considering birefringence in piezoelectric uniaxial crystals and laser beam propagation
19 p3330 A69-35604

Piezoelectric characteristics of surface layers of Ba titanate single crystals, using static and dynamic electromechanical methods
22 p3995 A69-41156

Electrode interactions effects in interdigital surface wave transducers on piezoelectric materials, using Fourier analysis
24 p4312 A69-42615

Mechanization of analog electrical-to-fluidic transducer using carrier circuit techniques and piezoelectric bender drive assembly
24 p4315 A69-43026

PIEZOELECTRIC GAGES

FM/AM telemetry circuits with three axis piezoelectric accelerometer for measurements during impact tests of soft landing models
10 p1654 A69-23279

Piezoelectric variometer with reduced indicator time lag for measuring pressure gradients in fluid media
11 p1889 A69-25427

Reciprocity method for absolute calibration of piezoelectric accelerometer mounted on electrodynamic shaker table
15 p2615 A69-31283

PIEZOELECTRIC TRANSDUCERS

Meteorite particles recording by piezoelectric transducers, comparing data collected by Soviet and American scientists
01 p0152 A69-10587

Transverse sensitivity ratio of vibration transducer, discussing measurement by shaker method
04 p0603 A69-15432

Vacuum deposition of thin film microwave acoustic transducers of piezoelectric aluminum nitride
05 p0761 A69-15820

Ultrasonic search units in nondestructive tests, discussing piezoelectric materials and contact and immersion services
07 p1139 A69-18795

Signal conditioning for transducers covering piezoelectric devices, thermocouples, resistance transducers, reluctance and differential transformer sensors
10 p1691 A69-23228

Mechanical damping and electrical matching effects on bandwidth of piezotransducer in ultrasonic flaw detection equipment
10 p1697 A69-24073

Piezoelectric transducer theory, discussing acoustically matched sandwich type damper and calculating frequency characteristics
10 p1697 A69-24074

Meteorite particles recording by piezoelectric transducers, comparing data collected by Soviet and American scientists
15 p2691 A69-30757

Portable piezoelectric acceleration sensor, describing characteristics and principles of operation
17 p2975 A69-33594

Charge amplifier for piezoelectric transducer used in acceleration measurements
20 p3508 A69-37913

Piezoelectric microphone sensor flown on rocket for recording micrometeoritic impacts during noctilucent cloud display, determining cosmic dust particles flux
21 p3793 A69-38348

Piezoelectric transducer transient electrical response due to shock loaded stress using transform calculus
22 p3947 A69-40863

PIEZOELECTRICITY

Integrated circuit piezoelectric systems limitations and advantages
01 p0049 A69-11413

Transverse normal waves excitation in flat plate by applying piezoelectric plate or comb shaped emitter to surface or end face
04 p0678 A69-14901

Controlled transient signal distortion by shock monitoring instrumentation circuits using piezoelectric accelerometers
04 p0603 A69-15430

Resonance effects during piezoelectric interaction between charged drift wave and flexural wave in semiconductors with one sign current carriers
08 p1371 A69-19806

Electrical equivalent circuit for piezoelectric generation and detection of transient and sinusoidal ultrasonic waves by interdigital electrodes
12 p2039 A69-26376

Transverse normal waves excitation in flat plate by applying piezoelectric plate or comb shaped emitter to surface or end face
12 p2182 A69-26654

Acoustic effects in piezoelectric semiconductors due to sound-electrons interaction including sound absorption, sound velocity changes, electroacoustic effect, etc
14 p2503 A69-28786

Scanning Fabry-Perot interferometer with ultralow modulation frequencies, obtaining inverse piezoelectric effect curves of ceramic element
15 p2611 A69-31107

Linear piezoelectric plate vibrations, Elements of linear theory of piezoelectricity and vibrations of piezoelectric plates, covering differential equations, boundary conditions, etc
16 p2826 A69-31720

Piezoelectric shaker consisting of combination of damped resonant cylindrical elements for wide frequency calibration of vibration pickups
17 p2975 A69-33665

Transport mechanism in amorphous Ge films deposited on glass substrates studied by measuring piezoresistance as function of temperature during pure nitrogen immersion
19 p3391 A69-36559

PIEZORESISTIVE TRANSDUCERS

U PIEZOELECTRIC GAGES

PIGEONS

Threshold variations in caloric nystagmus in pigeons subjected to accelerations in head to tail direction in centrifuge at various temperatures
20 p3471 A69-37252

Pigeon accelerated performance patterns as function of contiguity of brief visual stimuli and food reinforcement, noting pattern absence during stimuli omission
23 p4081 A69-41436

Pigeon visual adaptation to flickering light, attributing ERG b-wave postadaptation rebound to retina bipolar cells inhibition
23 p4084 A69-41463

Attention shifts in maintained discrimination, discussing combined responses of varying and constant visual and auditory stimuli in pigeons
24 p4275 A69-43198

PIGGYBACK SYSTEMS

Truss framework for support of eight 100-lb satellites through Titan 3C launch and dispensing of satellites at predetermined times, discussing materials and fabrication
09 p1512 A69-22369

Secondary or abort mission maximized subject to primary mission constraints by variational treatment of optimal branched trajectories [AAS PAPER 68-138]
21 p3819 A69-39210

PIGMENTS

NT CHLOROPHYLLS

NT CYTOCHROMES

Color and appearance properties of paint films and relations to amounts and properties of colorants, noting translucent plastics and metallized paint films
04 p0620 A69-14886

Light transmission through body wall of living colorable desert iguanas measured by spectrophotometry, discussing skin pigment effects 07 p1059 A69-18373

Test program simulating solar wind outside magnetosphere to evaluate high melting point high density ceramic oxides as white thermal control coating pigments [AIAA PAPER 69-641] 17 p2993 A69-33762

Transient electrical responses from retinas, discussing visual pigment role in visual excitation, photochemistry, etc 19 p3258 A69-36377

Meteorites pigments identification as porphyrins for extraterrestrial life evidence, noting sample analyses of Orgueil, Murray, Cold Bokkeveld and Mokoia carbonaceous chondrites 22 p4008 A69-39889

PILOCARPINE

Ophthalmic 2 percent pilocarpine effect on normal ocular dynamics of various age groups, including visual acuity, accommodation and refraction 01 p0022 A69-11347

PILOT ERROR

Ocular motor failures in pilots due to convergent and divergent strabismus, discussing low pressure chamber tests and blood pressure effects on cranial nerve 03 p0370 A69-13470

Predictive scale of aircraft emergencies, analyzing human error rate under stress 06 p0880 A69-17208

Hearing errors in voice communication with radio telephone, noting effects of mean syllable number and consonants per syllable in pilots and controllers 06 p0891 A69-18034

Climatic factors affecting pilot vision and contributing to misjudgement during landing procedures, noting effect of downward slope in runway approach 06 p0884 A69-18036

Spatial disorientation as factor in accidents in operational command, noting relatively high experience level of involved pilots 07 p1072 A69-19431

Piloting errors due to false instrument readings during turbulent atmosphere flight 16 p2734 A69-32007

PILOT PERFORMANCE

Aircraft flight testing for determining airframe, engine and pilot degradation, examining flutter, handling characteristics, water ballast, propulsion, etc 01 p0054 A69-10292

All-weather landing factors for aircraft and pilots, describing instrument landing system, runway and visibility, pilot and crew procedures, etc 01 p0112 A69-10454

Medicinal therapy and flight safety of pilots and astronauts, discussing drug use, self treatment, tolerance and environmental factors 01 p0014 A69-10583

Head-Up Display (HUD) flight information applied to civil aviation, noting operational safety improvement and pilot work load reduction 01 p0020 A69-10635

Piloting aspects of jet V/STOL aircraft for poor weather operations without complicated ground aids, discussing deceleration transition, forward speed and final approach angle 01 p0010 A69-10868

Flight accident rate of U.S. physician pilots noting relation to number of takeoffs and landings 01 p0022 A69-11344

Error reduction in identifying pilot describing function from flight test data by shifting input signal by pilot delay time in simulated computer model 02 p0202 A69-11950

Validation study of pilots visual sampling behavior, using queuing model based on instrument and eye movement data from Link trainer mission flights 02 p0202 A69-11954

Aircraft cockpit displays design for flight control and navigation, discussing integration, pictorial realism, moving part, pursuit tracking, frequency separation and optimum scaling 02 p0203 A69-12213

Dynamic flight simulators fidelity assessment, discussing hybrid method based on pilot psychomotor responses 02 p0203 A69-12215

Psychiatric study of master attack carrier aviators inability to fly, considering adult situational reaction diagnosis 03 p0369 A69-12883

Vertical contact analog display /VCAD/ design, emphasizing need for integrated and supplementary information to pilots in systematic way 03 p0379 A69-13361

Glaucoma in commercial airline pilots noting value and safety of routine tonometry 03 p0376 A69-14078

Circadian rhythms disruption during long distance flights, discussing adverse effects on pilot and passenger performance 03 p0378 A69-14260

Aircraft in-flight collision, discussing difficulties and procedures of medical board of inquiry 05 p0715 A69-16628

Telemetric system for in-flight measurements of jet pilot heart and circulatory system to determine flight stresses leading to pilot failure 05 p0715 A69-16707

Aerodynamic instrumentation to improve helicopter takeoff and landing piloting performance under high gross weight conditions 05 p0767 A69-16776

Standards for EEG in pilot fitness examinations, analyzing effects of total flying hours 06 p0875 A69-18021

Approach light efficiency, discussing Calvert bar system and strobe flash on basis of pilot questionnaire polling 06 p0884 A69-18029

Manual performance of aircraft pilots under sustained acceleration using measurements of handwriting pressure 06 p0884 A69-18030

Characteristics of accident experienced pilots based on personality and psychological tests 06 p0876 A69-18033

Hearing errors in voice communication with radio telephone, noting effects of mean syllable number and consonants per syllable in pilots and controllers 06 p0891 A69-18034

Time perception capacity of astronauts and jet pilots during brief weightlessness, noting emotional state effects 07 p1065 A69-18981

System reliability influence on air accidents resulting from pilot errors, unforeseen obstacles, breakdowns and atmospheric effects 07 p1054 A69-19288

Aerial photography history, photographer qualities, airborne platforms, pilot briefing, air to air sortie, aerobatics, parachutes, etc 08 p1314 A69-20307

Flight deck equipment guidelines in aircraft, discussing pilots natural senses, visual information, displays, logic and memory capable computers and ground controller 08 p1266 A69-20450

Aircraft head-up display systems emphasizing all-weather operations and equipment characteristics 08 p1315 A69-20451

Subjective pilot ratings based on Cooper scale compared with aircraft handling criterion based on Shannon information theory, discussing pilot error and accident probability 08 p1254 A69-20458

Landing and takeoff demonstration tests of OV-10A aircraft through rough terrain, noting pilots excessive physiological stresses [AIAA PAPER 69-316] 09 p1434 A69-22391

Aviation combat performance criterion by analyzing questionnaires sent to combat deployed flight surgeons, noting possible value of peer rating 09 p1447 A69-22549

Jet fighter pilot spatial disorientation during flight and on ground, emphasizing vestibular neuronitis diagnosis 10 p1649 A69-23382

Human pilot adaptation in simulated multiloop VTOL hovering task with series loop closure model 10 p1650 A69-23378

Psychic stress effect on physiological parameters of helicopter pilots during critical flight situations, considering biotelemetric examination of heart and circulatory systems 11 p1829 A69-24347

VTOL aircraft flight control systems, considering computerization and automation approach with human pilot serving as monitor and emergency system 11 p1823 A69-25387

European pilots accustomed to equatorial climate tested during regular flying missions, discussing heat effects on urinary steroids 12 p2024 A69-26560

Complex piloting simulation including fatigue for optimizing man machine synergy, emphasizing human adaptability and computer precision and speed 12 p2025 A69-27083

Aircraft canopy scratches effects on pilot visual discrimination 13 p2214 A69-28533

Personality characteristics of jet pilots measured by Edwards Personal Preference Schedule, including percentile norms table 14 p2408 A69-29294

Medicinal therapy and flight safety of pilots and astronauts, discussing drug use, self treatment, tolerance and environmental factors 15 p2555 A69-30753

Blood pressure telemetry of pilot during flight including determination of psychophysical relations 15 p2559 A69-31229

EEG and pilots flight performance relations, discussing in-flight telemetric measurements from ground station 15 p2560 A69-31233

Painted helicopter rotor blades ruled out as cause of flicker induced vertigo, reporting pilots psychophysiological responses to formation flying 17 p2913 A69-33175

Color signal light gun for aircraft control at airport towers, noting pilot tests for familiarity with signal code 17 p2914 A69-33185

CH-46 helicopter flight simulation program for pilot response to large perturbation maneuvers, using six degrees of freedom mathematical models [AHS PAPER 361] 17 p2946 A69-33521

Analog correction method to suppress pilot maneuver effects during analysis of aircraft accelerations induced by atmospheric turbulence [ICAS PAPER 68-39] 17 p2901 A69-33590

Aircraft carrier landing system performance, variations in pilot experience, aircraft types and environment, emphasizing night carrier recovery 17 p2916 A69-34012

Flying offenses committed by private and professional pilots in Great Britain, discussing role of authorities involved 17 p3077 A69-34202

Accelerate-stop criteria examined from human engineering standpoint, discussing flight simulator study of pilot reaction times for transition to rejected takeoff configuration [AIAA PAPER 69-772] 19 p3244 A69-35650

Sensory physiology of pilot landing guided by runway lighting, stressing visibility influence 19 p3260 A69-35987

Manned aircraft air to air combat capabilities evaluated by simulator using two cockpits, digital computer and collimated displays [AIAA PAPER 68-253] 20 p3510 A69-37159

Time perception capacity of astronauts and jet pilots during brief weightlessness, noting emotional state effects 20 p3480 A69-38229

Pilots and automobile drivers functional impairment due to alcohol and drugs 21 p3663 A69-38792

Mandrax and barbiturates effects on aircrew reaction time, response time and tracking ability 21 p3661 A69-39274

Aircraft flying qualities research program, discussing Navy test pilot evaluations and longitudinal handling characteristics for simulated carrier landing task [AIAA PAPER 69-897] 21 p3648 A69-39421

Second order system handling qualities analysis for pilot rating through human transfer function and closed loop control 21 p3668 A69-39792

Energy cost of piloting helicopters and fixed wing aircraft calculated from expired minute volume and air oxygen content measured during basal state and flight 22 p3891 A69-40218

Flight performance analysis of airline pilot group related to flight recording monitoring system 22 p3868 A69-41145

Initial training and checking of airline pilots in new equipment to ensure competency, reduce nonrevenue flight time and use minimum airspace 22 p3894 A69-41150

Landing performance in T-33A aircraft with loss of binocular vision compared to performance with both eyes 23 p4102 A69-41675

Background flying experience of tactical fighter aircraft pilots accident potential, comparing accident and nonaccident groups 23 p4103 A69-41685

Flight altitude effects on pilot performance with comparison of sensory and mental functions, considering oxygen use and flight safety

23 p4106 A69-41794

Glider pilots fatigue attributed to nutritional habits

23 p4106 A69-41796

Exercise prescription for hypokinetic airline pilots to prevent physiological deterioration and maintain performance, discussing predictive tests, tolerance evaluation, training regimens, etc

23 p4106 A69-41800

Night vision requirements of Vietnam combat pilots investigated for relationship to Skyraider fatal crash during target strafing and H-34 helicopter crash landing

23 p4107 A69-41807

Klaxon hooter sudden sound used as auditory startle stimulus to determine hand sensorimotor activity and standing stability in pilot error causes

23 p4088 A69-41808

Jumbo jet role in air transportation, discussing future traffic growth, pilot problems and aircraft size limitations

23 p4063 A69-41819

Flight indicators monitoring by pilots, describing physiological and psychotechnical criteria for dials and clocks arrangement to improve efficiency

23 p4108 A69-41827

Senior commercial jet pilots ability to visualize flight instruments

23 p4089 A69-41829

Pilots body images determined by inkblot tests, considering effects of aircraft type, pilots experience, etc

23 p4112 A69-42364

Measurement methods for quantitative character of aircraft pilot rating scales for vehicle flying qualities, considering wording ambiguity, dual mission character, etc

24 p4276 A69-43326

Supersonic flying effect on urinary catecholamine excretion rates in pilots, noting emotional state

24 p4265 A69-43370

PILOT SELECTION

Medical fitness regulations for pilots, including federal and internal airline regulations

06 p1041 A69-16844

Rules for selecting Soviet cosmonauts and physiological studies concerning heart and respiratory reactions to accelerations and weightlessness during preparation

07 p1060 A69-18569

Cardiovascular system medical examinations for selection of aircraft and spacecraft crew members from healthy men with no apparent disorders or complaints

07 p1066 A69-18983

Military flying career choice as neurotic compensation for personality defects, stressing personality screening during interview

12 p2023 A69-26492

Witkin Rod and Frame Testing of pilots and engineers showing greater field independence in pilots, discussing applications to pilot instructor selection

12 p2023 A69-26556

Aviation health service for flight safety problems with emphasis on accident prevention, emphasizing physician role in man-machine relationship of personnel surveillance

18 p3098 A69-35305

Coronary angiography for evaluating cardiac problems of aircrew, giving case histories and clinical and laboratory findings

19 p3263 A69-36461

Abnormalities of routine electrocardiograms in medical certification of pilots, indicating errors in screening

19 p3263 A69-36462

Weightlessness tests during parabolic flight to supplement vestibular tests in astronaut selection

20 p3481 A69-37276

Vestibulometric test program for flight surgeon appraisal of flying personnel, emphasizing singling out persons prone to illusory sensations

20 p3473 A69-37277

Cardiovascular system medical examinations for selection of aircraft and spacecraft crew members from healthy men with no apparent disorders or complaints

20 p3480 A69-38231

Pilots and flight crews screening and training by supplemental air carriers

22 p4054 A69-41148

Initial training and checking of airline pilots in new equipment to ensure competency, reduce nonrevenue flight time and use minimum airspace

22 p3894 A69-41150

Thematic apperception test /TAT/ cards for assessing attitudes in naval recruiting, respiratory responses during ejections and aviation psychology

23 p4112 A69-42365

Pilot selection procedure emphasizing integration of all-around personality picture from different approaches

24 p4278 A69-43395

Physiological and psychological variables relationship in candidate pilots, noting age and educational level

24 p4268 A69-43406

PILOT TRAINING

Airline crew training, requalification, recurrent, upgrading and aircraft transition training for crew and pilot

01 p0019 A69-10450

Man machine relationship in V/STOL control display, discussing inflight simulators, emphasizing NASA X-14 and CH-3C programs

01 p0010 A69-10452

Business jet aircraft use for air transport pilot training instead of simulating devices, noting pilot cabins

03 p0366 A69-13643

Airline safety programs focused on developing reliable automatic landing system, realistic pilot training and airborne monitoring/recording system

06 p1041 A69-16840

Physiological or survival training emphasizing psychological approach

06 p0879 A69-16965

Electrohydraulic attitude servomechanism for controlling movements of pilot training cabin, describing hydraulic system and electric control circuit

06 p0906 A69-16966

Aerospace research pilot school /ARPS/ to train experimental test and aerospace research pilots and Manned Orbiting Laboratory /MOL/ astronauts

06 p0882 A69-17670

Optimized flight crew training, evaluating safety, flight simulator efficiency, takeoff/landing practice and line experience based on test results

[AIAA PAPER 69-771] 19 p3245 A69-35653

Annual general aviation aircraft accident rate variation related to annual variations in pilot flight training activity

19 p3262 A69-36448

Test pilot vestibular training program to achieve higher tolerance of rotation, rocking and balancing and visual stimuli

20 p3472 A69-37266

Rotary actuator to create realistic control effects in hydraulic loading system of jet flight-training simulators

20 p3511 A69-38182

Flight training using digital simulators, including maneuver analysis for TWA 707 program

22 p3928 A69-41137

Aircraft pilots medical disabilities as potential flight safety hazard, discussing aerospace medical specialist role and pilot education in symptoms evaluation

22 p3894 A69-41146

Pilots and flight crews screening and training by supplemental air carriers

22 p4054 A69-41148

Initial training and checking of airline pilots in new equipment to ensure competency, reduce nonrevenue flight time and use minimum airspace

22 p3894 A69-41150

Background flying experience of tactical fighter aircraft pilots accident potential, comparing accident and nonaccident groups

23 p4103 A69-41685

Annual general aviation accident rate prediction from annual flight training variations

23 p4062 A69-41793

Flight simulators role in airline pilot training, discussing skilled learning, performance measurements and future developments

23 p4112 A69-42366

PILOTED CENTRIFUGES

U HUMAN CENTRIFUGES

PILOTLESS AIRCRAFT

U DRONE AIRCRAFT

U FIREBEE 2 TARGET DRONE AIRCRAFT

U TARGET DRONE AIRCRAFT

PILOTS [PERSONNEL]

NT AIRCRAFT PILOTS

NT TEST PILOTS

Physiological functions of aged Japanese pilots, discussing height, weight, Rohrer index, obesity, vision deterioration and hearing disturbances

06 p0876 A69-18028

Visual, auditory and reaction-time responses in aging pilots, determining continuing capacity for choice and discrimination with advancing age

14 p2408 A69-29307

Physiologic and psychologic aging in professional pilots analyzed on basis of cardiovascular, pulmonary, exercise tolerance and sense testing

14 p2408 A69-29309

Injury stress vs acceleration specification as valid criterion for pilots subjected to high acceleration, introducing models and illustrating with ejection example

17 p2913 A69-33008

Flight and piloting influence on morbidity of civil aviation personnel, noting incidence of enteric, hemorrhoidal and respiratory diseases

18 p3098 A69-35303

Skiagrams results of retinoscopic measurements of eye peripheral refraction of pilots, attempting correlation between skiagram type and central refraction

24 p4267 A69-43399

PINCH EFFECT

NT PLASMA PINCH

NT THETA PINCH

Magnetic pinch effect in thermal RF induction plasma in argon, developing theory for calculating excess magnetic pressure

09 p1544 A69-21341

Junction lasers current-voltage characteristics, discussing coherence-pinch effect as explanation of threshold behavior

19 p3337 A69-36531

Collisional shocks in inverse pinch MHD shock producing device, discussing position in current sheet and effect on conductivity and diffusion

21 p3776 A69-38709

PINEAL GLAND

Mammalian pineal gland as neuroendocrine transducer, studying melatonin role in ovulation, gonadal growth, etc

20 p3480 A69-38284

C 14-tryptophan incorporation into C 14-protein in cultured rat pineals, noting norepinephrine stimulation

22 p3871 A69-40054

PINHOLES

Multiple pinhole camera for X ray astronomy, suggesting cross correlation image recovery technique based on Fourier convolution theorem

09 p1502 A69-22768

PINS

Rigidity of rotors with pin joints, calculating moments of inertia at connected sections of turbine shaft disks utilizing similarity concept

19 p3324 A69-35832

Critical signal assignments optimization in electrical/electronic connectors, considering bent pins, signal cross talk, adjacency requirements and corona

19 p3284 A69-36030

Titanium stress pin with headed straight-shank pin and collar for reducing fatigue stress around holes

22 p3957 A69-40832

PION BEAMS

Negative pion beams for therapy, radiobiology and dosimetry

03 p0371 A69-13478

Origin of galactic gamma rays, discussing evidence in support of interstellar gas in galactic disk and production of neutral pions and bremsstrahlung

16 p2852 A69-32806

Coulomb interference corrections in pion-He scattering, discussing three specific formalisms

18 p3176 A69-35008

High energy negative kappa meson-nucleon interactions with respect to multiplicity distribution of charged pions in nucleon-antinucleon annihilation, showing binomial distribution

24 p4351 A69-42791

PIONEER PROJECT

Interplanetary Pioneer spacecraft development and systems engineering aspects

06 p1017 A69-17605

Pioneer F/G mission to Jupiter by NASA for exploring interplanetary medium, asteroid belt, planet and environment

[AAS PAPER 69-290] 24 p4381 A69-42863

Monograph on Pioneer spacecraft program, discussing mission objectives, spacecraft design, etc

[AAS PAPER 69-066] 24 p4381 A69-42883

PIONEER SPACE PROBES

Magnetospheric plasma probe results with Pioneer 6 and 7, discussing plasma fluctuations and solar wind interaction with geomagnetic field

07 p1128 A69-19364

Monograph on Pioneer spacecraft program, discussing mission objectives, spacecraft design, etc [AAS PAPER 69-066] 24 p4381 A69-42883

PIONEER 6 SPACE PROBE

Solar wind electron component detection by plasma experiment on Pioneer 6, particularly class 2B flare and quiet period 05 p0816 A69-16275

Plasma and magnetic field measurements of tangential discontinuities in solar wind by Pioneer 6, considering velocity shears and rotation of sun 11 p1946 A69-24430

Pioneer 6 S band telemetry carrier Faraday rotation during corona occultation measured by deep space tracking antenna 15 p2700 A69-31419

Tabulated coherent S-band Doppler data from Pioneer 6 and 7 radio tracking, improving astronomical constants and ephemerides for earth-moon system [AAS PAPER 68-130] 20 p3595 A69-37179

PIONEER 7 SPACE PROBE

Relativistic electron confinement within geomagnetic tail neutral sheet measured by Pioneer 7 deep space probe, confirming kinetic energy observations of IMP 1 satellite 14 p2433 A69-28934

Tabulated coherent S-band Doppler data from Pioneer 6 and 7 radio tracking, improving astronomical constants and ephemerides for earth-moon system [AAS PAPER 68-130] 20 p3595 A69-37179

PIONEER 8 SPACE PROBE

Fluorine nuclei in primary cosmic radiation identified by counter telescope measurements on Pioneer 8 spacecraft 15 p2676 A69-30886

PIONEER 9 SPACE PROBE

Pioneer 9 deep space probe with telemetry link operated in coded mode with sequential decoding, discussing ground and flight test data 23 p4131 A69-42522

PIONS

Pionic 2p-1s X ray transition energy and natural linewidth and muonic 2p-1s X ray transition energy measurements for Na 23 01 p0122 A69-10035

Absorption cross section for 68 Mev positive pion absorption by 1p 3/2 neutron in C12 nucleus followed by single proton emission at 11 degrees 02 p0282 A69-11460

Radioactive decay of neutral pions generated in metagalactic cosmic ray interactions as source of high energy isotropic gamma rays observed by OSO-3 02 p0308 A69-12092

Extensive air showers characteristics based on models of high energy interactions of nucleons and pions with air nuclei 06 p0990 A69-17301

Lithium 6 and 7 fission following pion capture, searching for H 4 and 5 12 p2132 A69-26296

Negative pion from 600 MeV synchrocyclotron stopped in thin Li 6 target in search for excited states of triton 12 p2132 A69-26297

Pionization cross sections at 100 gev for interactions of cosmic ray neutrons and pions with C and Pb nuclei 13 p2330 A69-28382

Pion and nucleon interactions with nuclei, analyzing showers for symmetry and isotropy 13 p2331 A69-28389

Cosmic ray muons angular distribution measuring device for determining pion/kaon ratio 13 p2332 A69-28421

Elastic scattering cross sections of negative pions by deuterons compared with Glauber model calculations 17 p3007 A69-32885

Frequencies of charged secondaries numbers emitted from nucleon-nucleon and pion-nucleon inelastic collisions, observing multiplicity regularity 18 p3177 A69-35009

Pion production rate for proton-proton interactions in hydrogen, discussing relevance to hot massive stars, charged pion decay probability and mu-neutrino production 21 p3792 A69-39615

Cosmic gamma rays spectrum from neutral pions production and decay in metagalactic cosmic ray p-p collisions, deriving models based on Einstein general relativity theory 22 p4006 A69-40641

Black body radiation at very high temperatures, discussing pion-nucleon interaction in pion gas in thermal equilibrium 23 p4238 A69-41358

Negative pions elastic scattering from hydrogen, confirming differential cross section minimum for specific incident momentum-scattering angle region 24 p4352 A69-43049

Cosmic ray pions and muons anomalous measurements above 1000 Gev explained by medium-strong contact interaction between protons 24 p4353 A69-43194

PIPE FLOW

Incompressible fluid steady motion in curved tube investigated by Fourier series, solving coupled nonlinear equations numerically 01 p0058 A69-10142

Energy dissipation at rounded pipe entrance in viscous fluid, showing relation between entrance loss and radius of roundness 01 p0059 A69-10308

Semiempirical theory of turbulent MHD tube flow at small Reynolds numbers taking into account magnetic field presence 01 p0130 A69-10769

Stabilization of plane parallel MHD flow at inlet and outlet of flat rectangular tube with transverse magnetic field 01 p0130 A69-10770

Cryogenic expansion to pressures below triple point and resulting formation of solid-vapor mixtures, discussing flow and heat transfer characteristics in heated tubes 01 p0176 A69-11146

Frictional and heat transfer characteristics of laminar flow in porous tubes, using numerical solutions to flow and energy equations 01 p0177 A69-11408

Expression derived for flow characteristics in smooth pipe for entire Reynolds number range 02 p0230 A69-11870

Pressure pulses propagation in nonsteady fluid flow through expandable tubes, noting computer solution 02 p0232 A69-12477

Time dependent tube wall radial displacement during explosive welding as function of distance from initial explosion 02 p0254 A69-12675

Steady state temperature distribution in heat generating fluid in plug flow in circular tube with arbitrary inlet and wall temperature distribution 03 p0530 A69-12862

Boundary conditions for irrotational hydrodynamic field around sphere moving along axis of cylindrical tube containing incompressible fluid calculated by least squares method 03 p0415 A69-13362

Downstream secondary circulation resulting from sharp bend in fully developed turbulent pipe flow, noting departure from twin circulatory flow 03 p0419 A69-13952

Unperturbed tube flow theory extended to flow through short axisymmetric tube 03 p0419 A69-13969

Relaminarization of turbulent flow, studying velocity profiles at various axial cross sections in porous wall tube with fluid injection 04 p0586 A69-14409

Confined jet mixing region at entrance of tubular reactor, discussing mass and momentum transfer, chemical conversion and effect of Reynolds number [AICHE PAPER 25A] 04 p0586 A69-14508

Reynolds number similarity argument, establishing relation between mean velocity at pipe or channel center and shear stress at wall 04 p0589 A69-14895

Primary flow measuring element based on Chebyshev principle, noting differential pressure output loss and resistance to accumulation of contaminants 04 p0600 A69-15030

Frictional losses in straight tubing and effect of system on ball type valve, using polyurethane foam damped flexible silastic tube 04 p0608 A69-15331

Velocity profiles for laminar flow of homogeneous liquid in pipe inlet at small and moderate Reynolds numbers 05 p0743 A69-15578

Entry region flow and convective heat transfer prediction in cooled vertical pipe open at both ends, considering wall temperature 05 p0845 A69-15717

Simulation of two and three dimensional fluid transients by use of one dimensional equations in lattice-work of piping elements 05 p0747 A69-16071

Suction effect on incompressible flow through step expansion in circular pipe through sudden enlargement, considering inlet flow with thin boundary layer [ASME PAPER 68-FE-11] 05 p0748 A69-16074

Thermal entry problem solution for low Reynolds number turbulent gas flow based on Reynolds number dependent velocity profile [ASME PAPER 68-WA/FE-11] 05 p0748 A69-16090

Velocity profiles and eddy diffusivities for fully developed turbulent low Reynolds number pipe flow [ASME PAPER 68-WA/FE-34] 05 p0749 A69-16107

Heat transfer in turbulent pipe flow of radiating optically thin gas in circular tube [ASME PAPER 68-WA/HT-17] 05 p0847 A69-16121

Forced laminar flow convection in horizontal tube with variable viscosity and free convection effects [ASME PAPER 68-WA/HT-20] 05 p0847 A69-16123

Gas flow rate predictions for long and short tubes and annuli and at densities between laminar-continuum and free molecular regimes [ASME PAPER 68-WA/PID-5] 05 p0750 A69-16166

Quasi-method of characteristics with application to fluid lines with frequency dependent wall shear and heat transfer [ASME PAPER 68-WA/AUT-7] 05 p0750 A69-16181

Heat pipe for thermal control of terrestrial and aerospace energy conversion systems 06 p1030 A69-17189

Laminar constant pressure gradient flow of viscous incompressible conducting fluid through rotating straight circular pipe with perpendicular magnetic field 06 p0967 A69-17718

Thermal nonequilibrium of unsteady adiabatic gas flow in nonheat conducting tube with open ends 06 p0911 A69-17813

Analytical model of spoiler generated sound in jet pipe, presenting data on level, spectrum and directivity of sound 07 p1183 A69-19462

Corrected stability limit for Poiseuille flow in pipes, annuli and channels, discussing flow between cylinders 07 p1121 A69-19475

Heat transfer in horizontal and vertical tubes with viscous gravity flow with boundary conditions 07 p1243 A69-19733

Suction effect on temperature distribution and heat transfer in plane Couette flow and laminar flow in circular pipe 08 p1303 A69-20371

Turbulent heat transfer in conducting fluid flow through circular tube in longitudinal magnetic field and constant wall heat flux, using Lyon relation 09 p1621 A69-21590

Turbulent flow of viscous nonNewtonian fluids in smooth pipes, noting effects of viscous stresses 09 p1481 A69-21929

Expansion tube modification incorporating nozzle plate at secondary diaphragm for reducing flow nonuniformity and contamination [AIAA PAPER 68-371] 09 p1477 A69-21960

Impurity concentrations in expansion tube flow, measuring radiation intensities [AIAA PAPER 68-371] 09 p1477 A69-21961

Incident flow in variable cross section tubes using analytic asymptotic calculation 10 p1677 A69-22897

Response times for entire Knudsen number range in straight round pressure pipes, using digital computer in final integration 10 p1677 A69-22900

Solid cylindrical body entrainment by viscous incompressible fluid flow in tube under constant pressure gradients and absence of gravitational force 10 p1678 A69-23366

Equilibrium dissociating gas laminar flow in circular tube calculated for heat transfer and hydraulic resistance, using boundary layer equations 10 p1679 A69-23426

Velocity profiles of turbulent plasma flow in circular tube during application of longitudinal homogeneous magnetic field 11 p1922 A69-24234

Forced heat convection in steady turbulent air flow in circular cross sectioned tubes, noting laminar sublayer in wall regions 11 p2000 A69-25096

Viscous flow stability in rotating pipe, giving velocity components in cylindrical polar coordinates 11 p1871 A69-25125

Laminar Newtonian flow heat transfer to fluids with variable physical properties in vertical tubes with constant wall heat flux, considering viscosity and density
11 p2000 A69-25164

Friction coefficients for turbulent flow through smooth pipes, considering average and friction velocities relations, fluid velocity measurements and flow Reynolds number
11 p1874 A69-25429

Steady flow field for viscous incompressible fluid in rotating pipe with porous walls determined from Navier-Stokes equations
11 p1875 A69-25481

Forced discontinuous vibrations of liquid in conduit experimentally analyzed, discussing test devices and procedures
11 p1875 A69-25485

Temperature variation effects on heat transfer in laminar tube flow, taking into account constant wall temperature and heat flow density
12 p2189 A69-25762

Navier-Stokes equations of slow viscous fluid laminar flow near pipe inlet and exit with negligible mass forces, discussing velocity and pressure distribution
13 p2244 A69-27258

Resonance tube excitation from energy depletion in central part of subsonic jet supplying tube
13 p2247 A69-27738

Thermal entry problem solution for low Reynolds number turbulent gas flow based on Reynolds number dependent velocity profile
[ASME PAPER 68-WA/FE-11]
14 p2430 A69-29446

Axial and radial turbulence intensities for flow through smooth round tubes, measuring velocity profiles and drag coefficients
15 p2590 A69-30003

Transport properties interrelationship in turbulent pipe flow and free turbulence
15 p2591 A69-30792

Drag and friction coefficients for laminar pulsating incompressible fluid flow in circular tubes obtained from Navier-Stokes equation
15 p2592 A69-30988

Eigenvalue bounds for amplification rates, wave speeds and linear stability conditions for Orr-Sommerfeld equation governing parallel flow in boundary layer and round pipes
16 p2768 A69-31591

Asymptotic behavior of one dimensional laminar flow of incompressible viscous fluid in infinite cylindrical tube, giving equations for boundary conditions and flow rate
16 p2769 A69-31831

Inertia, compressibility and viscous friction effects on dynamic response of long fluid line, constructing models
16 p2771 A69-32066

Swirl decay of turbulent flow in tubes, showing decrease with increasing axial Reynolds number and independence of initial swirl angle
16 p2772 A69-32170

Forced laminar flow convection in horizontal tube with variable viscosity and free convection effects
[ASME PAPER 68-WA/HT-20]
17 p3068 A69-32902

Transverse turbulent pipe flow, obtaining limiting behavior of time averaged velocity gradient at wall
17 p2949 A69-33013

Turbulence measurements and roughness effects on viscous drag reduction with polymer solution in pipe flow, discussing friction factor, wall velocity profile, etc
17 p2951 A69-33252

Concentration, flow rate and tube diameter effects on viscous drag reduction in nonpolar soap solutions, using pressure drop measurements to observe turbulent flow behavior
17 p2951 A69-33253

Transverse magnetic field effect on shear turbulence structure of magneto-fluid-mechanic pipe flow with and without heat transfer
[AIAA PAPER 69-723]
17 p3012 A69-33497

Visual observation of pipe wall regions in turbulent flow by suspending colloidal size particles and photographing with high speed motion picture camera
17 p2956 A69-33598

Displacement of rectangularly mouthed pitot tubes in turbulent tube flow, determining roles of wall and shear effects
17 p2976 A69-34049

Static and impact pressure distributions for Mach number and velocity profiles of supersonic to subsonic flow transition in tube at low Reynolds numbers
[ASME PAPER 69-APM-23]
18 p3120 A69-34397

Rough wall turbulent boundary layer development in pipe flow determined for different roughness geometries in zero and adverse pressure gradients
18 p3125 A69-35387

Energy losses due to drag in unstable laminar fluid flow in tube
20 p3513 A69-36973

Prandtl mixing length theory for flow in pipes and channels described by spatial exponential form, developing velocity profile and friction factor
[ASME PAPER 69-FE-48]
20 p3516 A69-37978

Linear dynamic modeling of barotropic fluid in rigid circular tube, presenting axial velocity profile by confluent hypergeometric function with complex arguments
[ASME PAPER 69-FLCS-18]
20 p3516 A69-37982

Boundary layer velocity distribution in turbulent swirling pipe flow produced by twisted tape inserts
[ASME PAPER 69-FE-14]
20 p3516 A69-37990

Axial velocity and static pressure for incompressible fluid flow through straight smooth porous tube
[ASME PAPER 69-FE-44]
20 p3517 A69-38000

Hydraulic resistance of pipes with flow vorticity produced by helical swirlers
21 p3695 A69-38862

Skin friction and mean velocity profiles measured for fully developed 1000-10,000 Reynolds number flows in pipes and channels
22 p3932 A69-40897

Laminar flow in porous circular pipe with constant suction or injection applied at wall
24 p4298 A69-42618

Wave processes in pipelines during fluid filling, studying effects of flow resistance due to pumps and nozzles
24 p4300 A69-43075

Turbulent boundary layer at inlet section of gas blown tube based on solutions of energy and momentum equations, deriving relations for inlet section length
24 p4300 A69-43079

Dynamic pressure response of viscous compressible fluids in rigid tubes with dead ended volume termination, testing Ibrall theorem as function of Stokes number
24 p4301 A69-43287

Volatile wall vaporization gas flow expansion into vacuum from tube approximating unsteady mass and energy transfer and pressure at blocked end
24 p4408 A69-43489

Laminar flow in horizontal circular tubes with uniform heat flux, analyzing combined free and forced convection effects on secondary flow
24 p4409 A69-43519

Numerical program solving partial differential equations parabolic system for internal turbulent gas flow extended to flows undergoing circular tube laminarization by heating
[ASME PAPER 69-HT-52]
24 p4409 A69-43520

Eddy diffusivity hypothesis modified to fit observed heat transfer from smooth pipe wall to turbulent gas stream at low Reynolds numbers
[ASME PAPER 69-HT-H]
24 p4303 A69-43523

Radiative transport in nongray cylindrical medium using total band absorbance
[ASME PAPER 69-HT-38]
24 p4411 A69-43534

Choking and shock in flashing single component two phase flow in tube, including vibrational effects, predicting minimum stagnation pressure loss
[ASME PAPER 69-HT-61]
24 p4303 A69-43535

Turbulent flow in circular porous tube laminarized by uniform mass injection through tube wall, measuring velocity and turbulence intensity by impact probe
[ASME PAPER 69-HT-57]
24 p4303 A69-43537

Cylindrical bubbles stability in vertical pipes from photographs, describing wake, spacing, pressure pulsations and convection cells effects
[ASME PAPER 69-HT-28]
24 p4411 A69-43540

Film-nucleate boiling transition for liquid nitrogen in vertical forced flow in electrically heated tube, discussing conduction model and agreement with visual experiment
[ASME PAPER 69-HT-26]
24 p4412 A69-43542

Turbulent pipe flow with wall suction, calculating friction factor, pressure gradient, heat and mass transfer coefficients, velocity and temperature profiles
[ASME PAPER 69-HT-4]
24 p4414 A69-43562

PIPE NOZZLES

Fuel concentration effect on turbojet engine reheat jet pipe vibrations via tests
09 p1573 A69-22616

PIPELINES

Ultrasonic sounding for controlling dispersed gas phase in liquid pipelines under laboratory and practical conditions
04 p0596 A69-14489

Pressure losses in pipeline with venturi tube, calculating hydraulic resistance coefficient as function of structural parameters and pipeline length
15 p2612 A69-31180

Pressure drop in control element of gas generator during readjustment of throttle in hydraulic supply line, noting assumptions
19 p3393 A69-35819

Wave processes in pipelines during fluid filling, studying effects of flow resistance due to pumps and nozzles
24 p4300 A69-43075

PIPES [TUBES]

NT HEAT PIPES

Material memory effect in plastically prestrained thin welded brass tubes analyzed on basis of kinematic strain hardening theory
02 p0336 A69-11551

Gas dynamic choking limitation on heat transfer capacity of heat pipe operating at low vapor pressures from comparison of theory and experiment
03 p0531 A69-12989

Boundary conditions for irrotational hydrodynamic field around sphere moving along axis of cylindrical tube containing incompressible fluid calculated by least squares method
03 p0415 A69-13362

Tubular metal parts and assemblies, discussing flaring, forming, beading, tapering and step drawing
03 p0435 A69-13918

Laminar heat transfer in circular pipes in low Peclet number flow case with laminar velocity profile, discussing Hagen-Poiseuille flows
04 p0687 A69-15397

Transmission and reflection coefficients of cylindrical tubes moving in free molecular gas flow determined by Monte Carlo method
06 p0911 A69-17877

Soviet pipe production technology from Ti and Ti alloys, considering properties and methods improvement
07 p1164 A69-18787

Heat convection coefficient for wires enclosed in cylindrical tubes filled with water or ethanol, showing dependence on inclination angle
07 p1242 A69-18926

Hard-drawn steel wire wound pipes and tanks, properties and design calculation, discussing laminates and permissible stress
08 p1414 A69-20487

Histogram approximation of plastic deformation of metals, analyzing tube under internal load and sandwiche layer compression
10 p1793 A69-22850

Hydrostatic tube extrusion, discussing equipment, techniques and commercial applications
[SAE PAPER 690319]
15 p2617 A69-30093

Flexural vibrations of unstiffened doubly symmetric cylindrical tubes, obtaining natural frequencies of simply supported rectangular tube
15 p2703 A69-30210

Fracture safe design practices for pressure vessels and piping, stressing transition temperature and proof testing roles
17 p3060 A69-33562

Testing machine for in vacuo tensile testing of tubular metallic specimens at high temperatures and low pressures
18 p3117 A69-34604

Automatic ultrasonic instrument monitoring on-line welding conditions of RF longitudinally seamwelded tubes
18 p3136 A69-34778

Reinforced plastics static fatigue strength under various loads including thin walled tubes long term tests under constant internal pressure
18 p3162 A69-35353

Diffuser for high performance centrifugal compressors based on discrete pipe drillings
[ASME PAPER 68-GT-38]
19 p3240 A69-36420

Plastic bending of thin walled pipes taking into account cross section flattening
21 p3835 A69-38868

Cutting loads measured as function of cutting rate and cutting tool geometry during boring of Cr-Ni steel pipe blanks
21 p3731 A69-38878

PIRANI GAGES

Plasticity of tubular steel annealed in vacuum furnace and subjected to complex tension and torsion along deformation trajectories containing salient point
21 p3839 A69-39197

Optimal focusing of acoustic system for tube defectoscopy with circular normal waves
24 p4296 A69-42655

Composite and metal tubes compared to determine properties for various loadings
[AIAA PAPER 68-340] 24 p4405 A69-43653

PIRANI GAGES

Vertical atmospheric pressure distribution measured directly with Pirani-Israel gauge in Skylark rocket, transforming dynamic pressure data into static pressures on ground
17 p2971 A69-33037

PISTON ENGINES

NT WANKEL ENGINES

Quantitative amounts of contaminants oil from piston engine and life of oil lubricant in engine
04 p0604 A69-14500

Rotary engines, discussing scissor, eccentric rotor, multiple rotor and revolving block types
07 p1203 A69-18910

Coaxial multipurpose KA-26 helicopter design, discussing cruising speed, passenger capacity, range, flight ceiling, gross weight and piston engines
07 p1053 A69-18969

Performance correction and nonstandard day performance prediction for analyzing turbocharged reciprocating aircraft engines in light aircraft applications
[SAE PAPER 690309] 11 p1942 A69-24514

Soviet book on electric ignition systems for piston and jet engines and design aspects of different types of ignition systems
12 p2146 A69-26756

Glass fiber filled polytetrafluoroethylene materials for piston seals in high pressure oil-free reciprocating air compressors, discussing manufacturing and non-destructive tests
19 p3323 A69-35579

Wankel aircraft engines compared to piston and turbine aircraft engines for performance, maintenance and reliability
19 p3395 A69-36872

Optical devices for nondestructive testing of large piston engine equipment
20 p3547 A69-36921

Oil-free linear motor resonant piston gas compressor, hermetically sealable to handle radioactive and dangerous gases
[ASME PAPER 69-FE-36] 20 p3466 A69-37996

Rankine cycle power systems with reciprocating engines using organic working fluids, discussing engine development, system characteristics, etc
23 p4067 A69-42237

Positive displacement Rankine cycle rotary wet steam engine design compared with piston type, noting simplified evaporator and tests
23 p4069 A69-42252

Oil high temperature and oxidation conditions in aircraft piston engines, including physicochemical changes
24 p4321 A69-43141

PISTON THEORY

Gas velocity variations in ionizing shock wave propagating along magnetic field applied to conducting piston motion
05 p0801 A69-15787

Kinetic theory for weak shock generation by impulsive piston, using Fourier and Laplace transforms to solve BGK equation
08 p1304 A69-20783

Gun tunnel equilibrium piston technique by model analysis of piston weight, tunnel conditions and geometry
11 p1862 A69-25013

Two piston flow stability separated by thin wall in traveling magnetic field, finding piston inertia centers velocity equal to field velocity
14 p2500 A69-29903

Prestressed ceramic driver chamber energy efficiency for arc driven shock tube by pressure measurements with piezoelectric probe
18 p3116 A69-34456

Gas velocity variations in ionizing shock wave propagating along magnetic field applied to conducting piston motion
18 p3181 A69-35038

Fluid-shell interactions, using piston theory and cylindrical-wave approximations
18 p3223 A69-35174

Electrohydrodynamic supersonic flow over wavy wall by oscillating piston model, calculating streamlines and density distributions
19 p3297 A69-35838

Piston motion influence on gaseous motion set up by constant energy explosion, applying to steady high Mach number flow past blunt nosed object
22 p3931 A69-40892

Ionized plasma motion under plane piston action by self similar solution of Navier-Stokes equations
22 p3991 A69-41021

Polytropic gas unsteady motion in dihedral piston wake by solving mixed boundary value and Goursat problems
22 p3861 A69-41025

PISTONS

NT MAGNETIC PISTONS

Dense real gas thermodynamic relations in piston driven shock tube facilities operation
11 p1862 A69-25011

Piston driven facilities for hot high pressure gas production including gas tunnels, heavy piston facilities, piston driven shock tunnels and high speed guns
11 p1862 A69-25012

Isentropic compression tube with piston compressor for producing hypervelocity test flows, noting shock speeds
[AIAA PAPER 69-334] 13 p2249 A69-28270

Gas motion behind cylindrical shock wave created by piston motion in gravitating medium
19 p3298 A69-36386

Piston driven shock tube at Kyoto University with performance tests results, investigating compression processes, shock speed and flow duration time
22 p3928 A69-41046

Noise reduction research for hydraulic machines, examining piston pumps noise generating mechanism
22 p3870 A69-41238

PITCH

Human noise tolerance laboratory and community studies, discussing proposed tone corrections for aircraft noise
15 p2719 A69-30374

Hearing at LF, comparing noise and tone thresholds
21 p3664 A69-38986

Whispered vowels pitch perception test using listen-and-compare method to determine formants for comparison with complex analysis procedure
23 p4190 A69-41575

PITCH [INCLINATION]

Ballistic reentry vehicle roll-pitch coupling, showing influence of nose asymmetries
[AIAA PAPER 69-101] 06 p1018 A69-18156

Galaxies classification using rectified images, noting pitch and inclination angles
08 p1408 A69-21135

Pitch angle distribution function of thermal protons in magnetosphere taking into account earth gravitational field
12 p2067 A69-26354

Pitch angle diffusion of trapped electrons in terrestrial radiation zones, discussing diffusion theory based on Fokker-Planck equation, atmospheric Coulomb scattering mechanism, etc
12 p2150 A69-26746

Pitch determination of micrometer screw by scalar star pairs derived from FK3 and Washington zenith catalog noting temperature and dampness effects
16 p2859 A69-32218

Time optimal pitch motion of satellite in circular orbit based on maximum principle, considering variable and constant controls
18 p3207 A69-34677

Higher harmonic pitch angle inputs to eliminate oscillatory helicopter blade root shear determined through teetering rotor model
18 p3089 A69-35233

Torsionally flexible blade controllable twist rotor with pitch horn and servoflap control, discussing optimum inputs, airloads and angles of attack contours
18 p3089 A69-35234

Flux magnitude and pitch angle distribution relationship for postsubstorm auroral electrons, noting particle precipitation and acceleration models
20 p3592 A69-38083

Drift shell splitting in nondipolar distorted magnetosphere tested with data from electron spectrometer on ATS 1 and OGO 3 satellites
22 p4005 A69-40508

Spacecraft pitch and yaw angles measurement using environmental positive ion probes, discussing Gemini flight tests and attitude control systems
24 p4315 A69-43241

PITCH ATTITUDE CONTROL
U LONGITUDINAL CONTROL

PITCHING MOMENTS

Aerodynamics of bodies of revolution in nonplanar motion using nonlinear functional analysis of momenta for motion about center of gravity
[AIAA PAPER 68-20] 04 p0542 A69-14714

Small angle precessional motion of axisymmetric spin stabilized bodies subject to disturbing moments
10 p1724 A69-22932

Directional gyroscope with interframe correlation, discussing errors during object pitching and banking
14 p2446 A69-28922

Wind tunnel wall interference effects in wind tunnel testing of STOL aircraft by inducing interference velocities
[AIAA PAPER 68-399] 17 p2947 A69-34022

Stationary resonant nonlinear oscillatory and rotary states, stability and pitching motions of controlled satellite in slightly elliptical orbit
20 p3616 A69-37177

Schweikhard method for measuring changes in lift, drag and pitching moment of fixed wing aircraft as a function of distance from ground
20 p3462 A69-37423

Dynamic stall effect on helicopter rotor blades air-loading and blade pitching motion at high advance ratio
20 p3463 A69-37809

Aerodynamic pitch-roll coupling in spinning vehicles, showing unsteady components complicating data reduction
21 p3647 A69-39038

Flight control system providing variable stability in pitch axis of NF-8D Crusader, discussing flight evaluation of power approach short period configurations
[AIAA PAPER 69-896] 21 p3648 A69-39420

Pitching characteristics of three dimensional peripheral jet ground effect machines with compartment partition along pitch axis, considering longitudinal static stability and dynamic pitching motion
22 p3866 A69-40818

Single stage rocket body finite bending stiffness effect on pitching moment using approximate equation, noting applicability to multistage rockets
22 p4037 A69-41048

Dynamic model of ablation pitching moment derivative and time lag effect on spinning reentry vehicle applied to Black Knight flight results
24 p4245 A69-43249

PITOT STATIC TUBES
U SPEED INDICATORS

PITOT TUBES

Flow characteristics about curved lateral jet, discussing effect of pitot tube nozzle shape and turbulence
05 p0746 A69-16017

Boundary shear stress with unknown magnitude and direction measured by yaw probe used as Preston tube
05 p0751 A69-16396

Skin friction measurement with rectangular mouthed Preston tubes of constant thickness ratio, analyzing calibration curves and difference from circular tubes
11 p1880 A69-24376

Supersonic Preston tube correlations for Mach number and Reynolds number effects on hypersonic turbulent skin friction on adiabatic surfaces, simplifying correlation
[AIAA PAPER 69-345] 13 p2249 A69-28280

MHD properties of velocity measurement method using cylindrical glass filament probe and Pitot and Prandtl tubes
14 p2453 A69-29920

Pitot tubes diameter effect on pressure gradients during measurement through shock wave
16 p2771 A69-31927

Preston probe measurement of friction drag on subsonic and supersonic nozzle wall including effects of heat transfer, compressibility and pressure gradient
[AIAA PAPER 69-648] 17 p2893 A69-33496

Displacement of rectangularly mouthed pitot tubes in turbulent tube flow, determining roles of wall and shear effects
17 p2976 A69-34049

Pitot probe measurements of Hg drop growth rates and diameters, allowing for thermal and diffusion effects
24 p4316 A69-43583

PITTING

Orientation dependence of pitting and blistering in proton irradiated Al polycrystalline surfaces
04 p0640 A69-14451

Pitting corrosion resistance improvement in austenitic stainless steels with added molybdenum through electroslag remelting
05 p0781 A69-16499

Sulfite ion influence on pitting corrosion of stainless steels in sodium chloride solution
07 p1167 A69-19343

Thin foil preparation technique for transmission electron microscopy and selected etch pitting technique for CoO single crystals
12 p2112 A69-25944

PITUITARY GLAND

Hypoxia exposure effect on RNA synthesis in rat anterior pituitary cultured in vitro
01 p0015 A69-10923

Phosphodiesterase activity of anterior pituitary, median eminence, heart and cerebral cortex of rat, studying effects of caffeine, theophylline and hydrocortisone
02 p0199 A69-11885

Identity between growth hormone degrading activity of pituitary gland and plasmin
06 p0873 A69-17105

Resting EEG and parieto-occipital response changes evoked by slowly repeated flashes in case of severe hypothyroidism secondary to panhypopituitarism
07 p1064 A69-18634

Adrenal epinephrine and phenylethanolamine n-methyl transferase /PNMT/ activity in rat bearing transplantable pituitary tumor
08 p1263 A69-20374

Constant light/darkness effects on stress response rhythm of hypothalamic-pituitary-adrenocortical system in female rats
15 p2556 A69-31330

Rats adrenal corticosterone concentrations changes in response to ACTH, determining response sensitivity dependence on time after hypophysectomy
22 p3870 A69-39871

Pituitary-adrenocortical axis of rats in oxygen atmosphere at low pressure, finding depressed norepinephrine excretion
23 p4087 A69-41790

PITUITARY HORMONES

Rapid global transportation effect on circadian rhythmic patterns in human body functions, discussing kidney excretion and pituitary adrenal cortical system
09 p1444 A69-22545

PIVOTED WING AIRCRAFT

PIVOTS

Optimum automatic selection of redundancies, discussing weighting and pivot choice and rigid element incorporation
11 p1993 A69-25529

Load carrying capacity and friction calculated for pivoted pad journal bearings for machine design use [ASME PAPER 68-LUBS-27]
13 p2266 A69-27275

PLAGES [FACULAE]

U FACULAE

PLAN POSITION INDICATORS

Ground based control system via cockpit PPI display on transponder equipped aircraft broadcast with digital coding
03 p0464 A69-13244

Alphanumeric characters to identify radar targets on PPI display for air traffic control, considering technique for reducing smear
09 p1495 A69-21675

Meteorological Doppler radar information display for real time identification of hazardous winds and turbulence in storms
18 p3139 A69-35427

Sporadic E layer large scale irregularities direction and velocity determined by inclined backscatter method, using plan position indicator
20 p3528 A69-37682

PLANAR STRUCTURES

Planar arrays of linear antennas above stratified medium, showing antenna impedance and current distribution expressed in terms for free space environment
01 p0042 A69-10343

Planar transistor micromode operation during collector junction avalanche breakdown
01 p0047 A69-10884

Graphical method for determining rise time of planar transistors with constant collector space-charge capacitance
01 p0049 A69-11362

Planar technology application to germanium electronic components and integrated circuits
02 p0214 A69-11597

Planar transistor reliability test results noting failure rate, stability and effect of temperature
03 p0402 A69-13006

Planar phased array of circular waveguides arranged in equilateral triangular grid, solving boundary value problem
03 p0406 A69-13829

Complex power radiated by infinite planar array antenna, noting aperture field distribution influence on formula applicability
04 p0571 A69-14311

Planar linkages kinematic synthesis and design, using Newton-Raphson iteration technique to solve nonlinear equations
04 p0604 A69-14517

Double diffused planar Ge n-p-n and p-n-p transistors with high switching speed, noting fabrication and performance
05 p0809 A69-16557

P-n planar avalanche photodiode without guard ring noting electrical properties, uniform multiplication and fabrication
05 p0733 A69-16559

Steady flow circuit characteristics in square cross section channels of planar geometry fluid control elements in case of laminar flow
07 p1118 A69-18293

Surface recombination rate and retardation field effects on diffusion current in mesa diodes with low level injection
07 p1105 A69-19008

Fixed space planar thermionic diode with collector guard ring for studying various emitter materials, measuring emitter temperatures
09 p1438 A69-21815

Surface ion behavior on planar semiconductor devices determined by measuring effect of time, humidity, temperature, voltage and previous testing history
10 p1743 A69-23173

Breakdown voltage and avalanche drift instability factors in planar passivated p-n junctions as function of oxide thickness and mobile charge
10 p1743 A69-23174

Supersonic gas flow past plane and axisymmetric bodies with broken generatrix, determining tangential discontinuities and shock waves shape and position
11 p1820 A69-25470

Planar transistor micromode operation during collector junction avalanche breakdown
12 p2041 A69-26648

Difference schemes for elasticity theory plane dynamic problem with mixed boundary conditions, establishing scheme absolute stability
14 p2536 A69-29474

Bipolar HF p-type Si transistors preparation by B and P ion beams and planar technology masking technique, obtaining p-n-p structure
22 p3916 A69-40960

Plane-truss joints displacements determined by graph-analytic method, discussing representation of fictitious forces and moments
23 p4225 A69-41420

Diffuse configuration factors between small plane and large sphere by unit sphere method, presenting limiting cases
24 p4351 A69-43683

PLANCKS CONSTANT

Relative element abundances in Cyg, Her and Boo atmospheres, calculating curves of growth by Planck gradient method for stellar spectra
14 p2519 A69-29356

Planck law for black body radiation spectrum theoretically derived on basis of classical Lorentz-invariant electromagnetic radiation at absolute zero temperature without quantum assumption
22 p3982 A69-41001

PLANE WAVES

Plane wave propagation in infinite viscoelastic medium taking into account mutual effects of deformation and temperature fields
01 p0164 A69-10076

Plane wave scattering from modulated corrugated structures, obtaining reflection coefficients for multimode propagation
01 p0033 A69-10973

Diffraction of cylindrical and plane waves in system of two parallel circular cylinders, using equivalent circuit method
02 p0217 A69-12261

Reflection of plane electromagnetic wave from impedance cylinder in vacuum, using ray expansion method
02 p0217 A69-12262

Impedance sheet approximation to plasma slab, considering plane wave propagation, plasma covered slot antenna and transmission loss
02 p0209 A69-12348

Velocity measurement and flow pattern determination of plane shock waves during passage through channel diaphragm
02 p0234 A69-12589

HF approximations, discussing plane wave diffraction by conducting circular cylinder using Watson transform
03 p0384 A69-12903

Electromagnetic wave passage through plane gyrotropic layer of magnetized plasma, analyzing polarization and energy transfer
03 p0397 A69-13709

Legendre transformation application to plane elastoplastic loading waves, examining shock front formation in interaction region
04 p0673 A69-14495

HF plane sound waves in ideal gases with internal dissipation, considering particular applications to dissociating diatomic and vibrational relaxing gases
05 p0792 A69-15723

Submillimeter plane monochromatic wave amplitude and phase fluctuations during propagation in turbulent atmosphere surface layer, considering absorption by water vapor
05 p0722 A69-16778

Diffraction of plane electromagnetic waves obliquely incident on conducting rotated periodically tapered grating structure formed of infinite metal strips
05 p0723 A69-16788

Linear antenna synthesis for optimal separation of plane waves providing maximum SNR with allowance for statistical phase distribution of field
06 p0895 A69-17460

Plane wave scattering by conducting wire impedance loaded at center, discussing loading effect on backscattering cross sections
06 p0888 A69-17512

HF scattering of scalar plane wave by transparent sphere based on Watson transformation
07 p1181 A69-19033

Initial equations for plane wave diffraction at grids of squared beams, calculating transmission and reflection coefficients by reflection method and computer
07 p1084 A69-19149

Plane electromagnetic wave diffraction at oblique screen of circular cross section conducting wires solved, assuming smaller wire radius than grid spacing and wavelength
07 p1084 A69-19150

Real and imaginary parts of homogeneous isotropic electron plasma complex refractive index, noting application to plane electromagnetic wave propagation
07 p1193 A69-19183

Plane radiative shock wave propagation in homogeneous medium noting heating ahead and cooling behind shock front
08 p1302 A69-19798

Radar scattering cross section of finite perfectly conducting wedge for case of illumination by polarized plane wave
08 p1274 A69-20047

Constitutive equations for propagation of plane waves of finite amplitude in nonsimple elastic solids, discussing holohedral isotropic solids and transverse harmonic circularly polarized waves
08 p1411 A69-20141

Spherical wave generalization for plane light wave propagating in turbulent medium, describing circular objective averaging effect on intensity fluctuations
08 p1351 A69-20438

Quasi-linear differential constitutive equation of work hardenable elastoviscoplastic material in case of plane wave propagation in half space
08 p1415 A69-20662

Differential equations for normal propagation of plane electromagnetic waves in isotropic stratified inhomogeneous gyration medium, discussing boundary conditions and reflection properties
08 p1353 A69-21000

Dispersion equation to describe spectrum of LF density perturbations by pumping plane electromagnetic wave in transparent homogeneous plasma or fluid media
09 p1453 A69-21570

Electrothermal instabilities in small magnetic Reynolds number limit and ionization equilibrium at electron temperature using quasi-linear plane wave analysis
10 p1734 A69-23456

Quantitative analysis of plane waves for weak interaction of two dimensional sound and light fields in acoustical imaging by diffracted light
10 p1695 A69-23545

Plane wave solutions for acoustic propagation in polyatomic gas by using Sivovich-Thurber method for polyatomic kinetic models
11 p1920 A69-24287

Two dimensional wavefront shape induced in finitely strained elastic body by impulsive point body force
11 p1969 A69-24338

Electromagnetic plane wave scattering from slender semiinfinite cone, obtaining contribution to tip return arising from direct diffraction
11 p1836 A69-24988

Geometrical diffraction theory for bistatic scattering of plane wave by conducting frustum, calculating scattering matrix
11 p1837 A69-24999

Rapidly convergent series expansions for plane wave transmission coefficients for elliptical and rectangular apertures
11 p1837 A69-25001

Microwave antenna testing on small indoor ranges, discussing reflectors and feeds for generation of approximately uniform plane waves for antenna illumination
11 p1852 A69-25314

Radiation emission by scalar particle in field of two plane linearly polarized electromagnetic waves propagating toward each other
11 p1900 A69-25568

Plane transient electromagnetic wave from cold lossless plasma half space and slab
12 p2033 A69-26865

Nonuniform two dimensional hydromagnetic waves incident on idealized lower ionosphere, discussing validity of various models
12 p2074 A69-26960

Bhatnagar-Gross-Krook model for plane shock structure, considering moment and least squares methods and shock density gradient error analysis
12 p2063 A69-27112

Optimal thickness of inhomogeneous absorption layer subjected to normally incident plane monochromatic wave treated as Mayer-Boltz variational problem
13 p2297 A69-27381

Plane wave solution for wave propagation in inhomogeneous anisotropic time-varying media
13 p2219 A69-27397

Plane TM surface waves supported by plane ungrounded magnetoplasma slab with magnetostatic field parallel to two parallel interfaces and perpendicular to propagation direction
13 p2308 A69-27966

Plane elastoplastic shock waves propagation due to combined shear loadings assuming elastic isotropic work hardening materials
13 p2368 A69-28346

Electric field distribution in focal region of finite off-set paraboloid reflector illuminated by linearly polarized plane wave
13 p2234 A69-28427

Elastic medium properties recovered from reflected or transmitted plane waves at normal incidence, obtaining computational procedures and analytical solution from Schroedinger equation
13 p2300 A69-28664

Monochromatic plane waves propagation in anisotropic homogeneous cold plasmas, treating dispersion surface, reflection, refraction and waveguide applications
14 p2492 A69-29399

Plane wave reflection and transmission by unidirectionally conducting screen, considering oblique incidence and two polarizations
14 p2421 A69-29547

Plane electromagnetic wave refraction and scattering in solar corona during eclipsed observations of cosmic sources, calculating angular distribution of radiation intensity
15 p2688 A69-30555

Rayleigh assumption validity for wave scattering by analytic periodic surface predicated on solutions analytic continuation across boundary, discussing Green function role
15 p2652 A69-30673

Reflection of plane waves at boundary surface of two semiinfinite media in relative motion, calculating power reflection coefficients
15 p2568 A69-30796

Plane electromagnetic wave propagation normal and parallel to magnetic field in plasma analyzed by equivalent circuits and impedances
15 p2659 A69-30799

Attenuation of small perturbations in shape of plane shock wave propagating into uniform medium in presence of rigid or interfacial boundaries
15 p2592 A69-31145

Reflection of plane waves from stress free flat surface of micropolar elastic half space, presenting reflection laws and amplitude ratios
15 p2714 A69-31147

Scattering of time harmonic linearly polarized plane electromagnetic wave by uniformly axially moving cylinder, analyzing first order velocity effects
16 p2748 A69-31579

Inverse scattering technique for electromagnetic bistatic scattering by expressing field produced by incident plane wave as sum of incident field and Fourier transform
16 p2754 A69-32569

Shear layer effect on plane sound waves, discussing reflection and refraction at velocity discontinuity between two regions of fluid
17 p3005 A69-32954

Nonlinear interaction of plane electromagnetic wave with inhomogeneous plasma layer, noting concentration and electric field discontinuity
17 p2922 A69-33693

Plane shock wave interaction with plane rigid net-like wall, obtaining Mach numbers for reflected and penetrating shock waves
17 p2957 A69-33719

Plane wave scattering by multimode corrugated structure with H mode incidence, revealing theoretically scattering resonance as P type Wood anomalies
17 p2925 A69-33844

Physical mechanisms for nonlinearities in electromagnetic wave propagation, analyzing plane wave instability, self focused beams propagation and laser oscillations
17 p2928 A69-33867

Deformation of amplitude and frequency envelopes of plane modulated electromagnetic waves with dispersion in isotropic dielectric with cubic nonlinearity
17 p2928 A69-33869

Diffraction of skew incident plane electromagnetic wave by perfectly conducting right angled wedge embedded in uniaxially anisotropic medium
17 p2930 A69-33889

Angular spectrum representation of diffracted wave fields expressible by plane wave expansions containing only homogeneous waves
17 p3007 A69-34153

Penumbral current distribution in plane electromagnetic waves diffraction by conducting cylinder, obtaining transient solution for impulsive excitation, discussing time harmonic problem
18 p3100 A69-34232 [AFCL-69-0038]

Plane wave propagation due to combined compressive and shear stresses in half space, assuming elastoplastic material
18 p3213 A69-34388 [ASME PAPER 69-APM-12]

Polarization operator and Green function of photon for propagation of plane electromagnetic waves in constant crossed field, noting refractive indices
18 p3103 A69-35128

Plane wave scattering by semiinfinite turbulent dielectric slab, using Born approximation to develop asymptotic series for stochastic components of forward scattered field
18 p3174 A69-35245 [OSA PAPER WH-16]

Plane electromagnetic wave scattering by motion of small ellipsoid in vacuum, noting total scattering and radar cross sections dependence on ellipsoid velocity
18 p3105 A69-35485

Interference filter design for IR devices on Fresnel equation basis, analyzing plane electromagnetic wave propagation through stratified dielectric multilayer
19 p3373 A69-36053

Plane electromagnetic wave diffraction on conducting sphere situated in absorbing nonuniform plasma layer
19 p3275 A69-36340

Lateral and head-on interactions between plane shock wave and supersonic wedge, showing solution dependent on apex angle and incident flow Mach number
19 p3239 A69-36398

Scattered field of linear array of center loaded cylindrical elements illuminated by plane electromagnetic wave
20 p3494 A69-37838

Linear antenna synthesis for optimal separation of plane waves providing maximum SNR with allowance for statistical phase distribution of field
20 p3508 A69-37943

Biquadratic plane wave dispersion relation for gyrotropic waveguides with dielectric and magnetic properties, discussing associated quartic equation for refractivity
21 p3675 A69-39285

Wave trains of incident pulse diffraction in thin composite rod determined by transmission and reflection coefficients of plane waves at plane interfaces
21 p3845 A69-39677

Plane double front detonation wave attenuation by pursuing rarefaction waves, analyzing oscillations, onset mechanism and stability during transition to Chapman-Jouguet mode
22 p3929 A69-40112

Transient flow resulting from plane shock diffraction by analytic blunt body, basing analysis on Taylor series expansions in space and time variables
22 p3860 A69-40895

Plane EM wave transmission and reflection by semiinfinite isotropic plasma moving in arbitrary direction parallel to boundary, using Lorentz transformation
23 p4114 A69-41360

Plane electromagnetic wave scattering on turbulent fluctuations in electron density of finite volume ionized plasma, evaluating Booker-Gordon relation
23 p4116 A69-41587

Transverse spectra and structural functions of fluctuations for plane waves of different frequencies propagating in isotropic turbulent medium
23 p4117 A69-41728

Plane polarized electromagnetic wave diffraction incident on skewed metal ribbons array
23 p4125 A69-42043

Semiinverse method involving plane wave expansions to solve elliptical crack expansion and self similar phase transformation in anisotropic solid
24 p4397 A69-42749

Plane electromagnetic waves coherence properties, considering linear and arbitrary degree of polarization
24 p4350 A69-42982

Hot dense plasma used as driver gas producing plane stable current-free high Mach number shock fronts resembling plane blast waves
24 p4359 A69-43647

PLANET EPHEMERIDES

Icarus asteroid position measurements by astronomical photography, noting comparison for two South African observatories
01 p0150 A69-10373

Orbit corrections for lost minor planets 457, 1038, 1161, 1297, determining new ephemerides for oppositions
05 p0829 A69-16704

Relative positions of Neptune and BD minus 17 degrees 4388 star determined by Yale-Columbia refractor and double star camera, noting ephemerides correction from stellar occultation
17 p3041 A69-33814

Dichotomy of Venus in eastern and western elongations, determining time of occurrence by graphical method
18 p3203 A69-35336

Ephemeris calculations and lunar craters and reference stars coordinates measured from photographic plates, using digital computers
22 p4024 A69-40610

PLANET ORIGINS

U PLANETARY EVOLUTION

PLANETARIUMS

Network for fireball trajectories rapid analysis to recover meteorites and obtain orbital elements data, noting role of planetariums
19 p3295 A69-36121

PLANETARY ATMOSPHERES

NT JUPITER ATMOSPHERE

NT MARS ATMOSPHERE

NT VENUS ATMOSPHERE

Planetary atmosphere composition determination using mass spectrometry for neutral components, ion spectrometry for ionic components and data system optimization
02 p0247 A69-11468 [AAS PAPER 68-183]

Multiple light scattering in planetary atmospheres, discussing diffuse reflection and transmission by atmosphere of particles with anisotropic scattering pattern
02 p0319 A69-12105

Photoelectron energy loss mechanisms in planetary atmospheres, considering possible constituents in Mars and Venus upper atmospheres
02 p0321 A69-12118

Unmanned planetary exploration using Mariner class spacecraft for solar system and life origin
02 p0334 A69-12302

Planetary atmosphere determination error analysis using Kalman filter, noting results of simulated Martian atmosphere entry

02 p0331 A69-12806

Mars and Venus probes antenna problems in environments of near earth space, deep space and nonearth planetary atmospheres

02 p0223 A69-12811

Limiting conditions for gaseous atmospheres surrounding major and minor planets related to suitability for synoptic observation with optical telescopes and spectrometers

03 p0510 A69-13393

Structure and mean molecular weight measurement of unknown atmosphere assessed from high altitude tests in earth atmosphere [AIAA PAPER 68-1054]

03 p0512 A69-13699

Lateral transport of constituents in planetary exospheres, considering planetary rotation

03 p0515 A69-14010

Tetron flight observations of eddy velocities in planetary boundary layer, noting effects of height and seasonal variations

04 p0626 A69-14912

Neptune atmosphere height scale and density from photometric observation of star occultation

04 p0660 A69-15061

Multiple light scattering in spherical planetary atmosphere based on geometrical model, calculating twilight glow brightness

05 p0828 A69-16632

General atmospheric circulation characteristics estimation for earth, Mars, Venus and Mercury based on thermodynamic and hydrodynamic laws

05 p0828 A69-16635

Inverse problems in radiative transfer applied to remote measurements of IR radiation from planetary atmospheres, noting temperature and water vapor inversions

06 p0919 A69-17617

Radio occultation measurements of planetary atmospheres and ionospheres from orbiting pair [AIAA PAPER 69-53]

06 p1011 A69-18104

Radiative transfer problems in inhomogeneous anisotropically scattering plane parallel planetary atmospheres with internal source distributions solved by recursive method

07 p1213 A69-18610

Diurnal thermal wave form driven by harmonically oscillating ground temperature in nongray atmosphere, calculating results for terrestrial and Martian atmospheres

07 p1126 A69-19036

Vector equation of transfer for planetary atmosphere describing light scattering by anisotropic particles and analysis of resonance line scattering

08 p1385 A69-20063

Chemical abundances in planetary atmospheres based on spectroscopic determinations, considering terrestrial and Jovian planets

08 p1406 A69-20934

Unsteady atmospheric motions on planetary scale using Legendre polynomials

08 p1311 A69-21158

Optically thick planetary atmospheres in radiative-convective equilibrium investigated by models with adiabatic temperature gradient in troposphere, discussing gray stratospheric solution

09 p1600 A69-22200

Rotational Raman scattering in planetary atmospheres, analyzing spectra of deep solar Fraunhofer lines

09 p1601 A69-22207

Plane and spherical albedos of planet surrounded by infinite optical thickness atmosphere, with application to Venusian atmosphere

10 p1776 A69-23210

Unsteady baroclinic planetary atmosphere boundary layer turbulent states with various pressure and temperature gradient distributions, using boundary layer model

10 p1722 A69-23973

Methane absorption distribution in 6190 A band over Saturn disk at center and polar latitudes based on spectrograms

11 p1960 A69-24731

Model ion-exosphere for nonrotating planet with static dipole magnetic field generalized by permitting density and temperature variations over baropause

11 p1879 A69-25284

General atmospheric circulation characteristics estimation for earth, Mars, Venus and Mercury based on thermodynamic and hydrodynamic laws

14 p2516 A69-28791

Atmospheric dynamics parameters of Mercury, Venus, Mars and Jupiter, discussing generalized circulation theory

14 p2526 A69-29841

Reflected and absorbed solar radiation by planetary atmosphere and surface determined as function of atmosphere and surface optical properties

15 p2689 A69-30564

Multiple light scattering solutions accuracy by diffraction peak omission from cloud and haze analytic phase functions compared for optically thick and thin planetary atmospheres

17 p3032 A69-33159

Jupiter photochemistry above 1000 A, noting methane and ammonia photolysis zones, atmospheric pressures and hydrogen recombinations

17 p3032 A69-33165

Planetary atmospheres origin, discussing earth formation by planetesimals accumulation and similarity to Mars and Venus, volatiles in outer planets, etc

17 p3033 A69-33369

Suspected phase anomaly and Mercury atmosphere

17 p3034 A69-33414

Neptune radius, density and atmosphere deduced from observations during occultation of BD minus 17 degrees 4388 by Neptune

17 p3041 A69-33816

Ice clouds near IR spectral reflectivity dependence on particle size, noting application to planetary atmospheres

18 p3126 A69-34283

Half space applications regarding equation of transfer for planetary atmosphere

18 p3191 A69-34306

Planetary cosmogony problems involving protoplanetary cloud origin, matter condensation, planets formation and moon origin, noting iron content in chondrites

18 p3205 A69-35437

Diameter density and atmosphere of Neptune revised based on star eclipse, noting altitude and temperature

18 p3205 A69-35438

Approach navigation accuracy for planetary atmosphere braking to orbit about Mars and Venus [AAS PAPER 68-122]

19 p3402 A69-35937

Drop test method to obtain subsonic terminal velocity and base pressure data for planetary entry probe configurations

19 p3238 A69-35959

Radio measurements of nonionized media and planetary atmospheres, discussing uses of millimeter waves, line of sight propagation, scattering, etc

19 p3276 A69-36427

Optimal information selection for determining spacecraft trajectory, considering atmosphere, light speed and series expansion coefficients of planetary gravitational potentials

19 p3427 A69-36627

Radiating gas flows during hypersonic planetary reentry, discussing atmospheric composition, shock layer characteristics, nonequilibrium flows, etc

20 p3513 A69-36982

Particle albedos and extinction cross sections computed by Mie theory showing dependence on refractivity, considering thermal radiation from cloudy planetary atmospheres

20 p3614 A69-38255

Atmospheric structure, greenhouse effect and convective instability in window gray and nongray planetary atmospheres

20 p3615 A69-38257

Temperature structure of nongray planetary atmospheres, discussing scattering and absorption of solar energy by gas molecules, cloud aerosols and ground

20 p3615 A69-38258

Neptune equatorial radius, diameter, flattening and upper atmosphere optical properties determined from photometric curves of star BD-17 occultation

21 p3796 A69-38471

Planetary atmosphere structure and mean molecular weight determination from onboard measurements tested at high altitude in earth atmosphere, based on NASA Program [AIAA PAPER 68-1054]

21 p3715 A69-39023

Unsteady baroclinic planetary atmosphere boundary layer turbulent states with various pressure and temperature gradient distributions, using boundary layer model

21 p3760 A69-39659

RF voltage breakdown facility for studying spacecraft antenna characteristics in space and planetary atmosphere environments [AIAA PAPER 69-1028]

22 p3924 A69-40397

Molecular beams for simulating orbital flight through planetary atmospheres, considering various nozzle beam systems [AIAA PAPER 69-1031]

22 p3926 A69-40437

Neutral exosphere model for nonrotating planet permitting barosphere uniform rotation at certain angular velocity, determining velocity distribution and density

22 p4023 A69-40524

Steady state distribution of visible and IR radiation in planetary atmosphere illuminated from outside, calculating atmospheric temperature profile

22 p4031 A69-40910

Planetary atmosphere effect on Fresnel diffraction of ultrashort radio waves determined from short wave approximation of damping function

22 p3901 A69-40948

Spaceborne planetary UV spectroscopic search for atoms and molecules basic to life, specifically molecular N and water vapor photodissociation products

23 p4113 A69-41616

Solar wind collisionless hydromagnetic flow interaction with planetary atmosphere, using mathematical model to determine bow shock position limits in atmosphere

24 p4368 A69-43178

Magnetic dipole field variations effects on planetary atmosphere erosion by solar wind, discussing Mars and Venus atmospheres above ionosphere

24 p4385 A69-43224

PLANETARY BASES

Manned facilities design, construction and maintenance on extraterrestrial bodies, discussing astrophysical and lunar surface data requirements [AAS PAPER 69-208]

24 p4296 A69-42875

PLANETARY COMPOSITION

Mars surface photometric and spectrophotometric measurements, relating opposition effect details with corresponding laboratory sample measurements

07 p1212 A69-18601

Rare earths relative and absolute terrestrial abundances in shales, basalts, rhyolites and granites

08 p1310 A69-20942

Hypotheses concerning mechanism of lunar maria formation, discussing molten rock layer below lunar crust

10 p1782 A69-23710

Planetary interior convection analysis extended to include variable viscosity, heat source distribution, thermal expansion and diffusivity, etc

13 p2344 A69-27646

Chemical composition of earth, Venus, Mars, Mercury and moon calculated from mathematical models, constructing approximate equations of state at high pressure

14 p2526 A69-29878

Mars internal structure and composition modeling, considering core, mantle and temperature via earth analogy and Mariner 4 data

17 p3037 A69-33652

Mercury internal constitution and chemical composition, discussing models with iron cores and iron admixtures in mantle

20 p3597 A69-37331

Moon composition and similarities to Mars explained by silicates in solar system raw material

20 p3604 A69-37563

Planetary interiors from geophysical viewpoint emphasizing earth data

21 p3811 A69-39508

Fractionation mechanisms in early phases of planetary evolution sought to explain abundance problem in terrestrial planets

22 p4018 A69-40185

Extraterrestrial objects composition in defining cosmic abundance curve, including solar and meteoritic data

22 p4032 A69-40982

Martian surface mineralogical study of present state and past processes from rock analyses by unmanned spacecraft instruments to test planetary models

23 p4212 A69-41619

Model for accumulation of earth and planets from primitive solar nebula, implying inhomogeneous chemical composition of bodies in solar system

24 p4385 A69-43215

PLANETARY ENTRY

U ATMOSPHERIC ENTRY

PLANETARY ENVIRONMENTS

NT JUPITER ATMOSPHERE

NT MARS ATMOSPHERE

NT MARS ENVIRONMENT

NT VENUS ATMOSPHERE

Photometric-polarimetric observations of planetary surfaces, discussing geological environment interpretation

tion and spacecraft reconnaissance system mission planning
03 p0421 A69-13394

Product assurance role in spacecraft sterilization to maintain planetary biological environments integrity in space programs for extraterrestrial life determination
03 p0379 A69-13400

Particle and field environment of earth, discussing solar wind, bow shock, magnetosheath, magnetopause, magnetosphere and particle population
06 p1001 A69-17158

Solar system physical environments surveyed from exobiological viewpoint
17 p2907 A69-32968

Extraterrestrial optical microscopy, discussing experiment, telemetry, data interpretation and instrument characteristics concerning biological, cytochemical and petrographic microscopes
23 p4164 A69-41621

PLANETARY EVOLUTION

Monograph on nature of planets and solar system origin covering meteorite observations and age determination, chondrite composition, metallic elements, etc
01 p0152 A69-10702

Solar system origin and evolution by future space mission experiments, discussing theories and mission objectives
[AAS PAPER 68-191] 01 p0153 A69-10823

Introduction to planetary physics, Terrestrial planets, covering solid interior constituents, solar system dynamics and origin and evolution
01 p0154 A69-10920

Lunar surface early geologic evolution noting bearing on earth geologic history
[AAS PAPER 68-202] 02 p0312 A69-11478

Synodic month length variations since late Cambrian, noting paleontological evidence in mollusks and stromatolites and associated geological changes
02 p0241 A69-11807

NASA Planetary Exploration Program to gather data on origin of solar system and life, discussing planetary evolution and extraterrestrial life
02 p0200 A69-12804

Jupiter radio physics, discussing prebiological phase, low IR and microwave radio temperature and magnetic field
02 p0330 A69-12805

Annular and linear Martian surface formations nature and origin from analysis of Mariner 4 photographs
03 p0506 A69-13087

Secularly stable figures of equilibrium of rotating heterogeneous fluids of planetary size, noting dependence on laws of inertia and gravitation
03 p0513 A69-13780

Cometary origin of meteorites, discussing and rejecting origin from recent asteroidal collisions
05 p0818 A69-15588

Solar system evolution, noting angular momentum in planets and solar system and hypothesis of gravitationally contracting gaseous nebula
05 p0826 A69-16389

Possible evolution of earth continents and ocean basin, considering ultrabasic, basic, and intermediate to acidic lunar highlands chemical composition
06 p1000 A69-17006

Terrestrial and Cytherean atmospheres evolution based on gray atmosphere model, surface energy budget and partition of water and carbon dioxide
07 p1213 A69-18608

Commensurability among pairs of mean motions of natural satellites of major planets and hypothesis of tidal evolution of satellite systems
07 p1223 A69-19638

Martian structure theory, comparing mathematical model based on earth long term evolution and ad hoc models
08 p1387 A69-20092

Meteorites radiogenic and cosmic ray exposure ages, orbits and parent bodies, discussing H and L group chondrites
08 p1405 A69-20928

Boron in tektites determined by calorimetric technique for analysis of boron in silicates, comparing results with values from igneous and sedimentary parents
08 p1407 A69-20936

Radiogenic theory of origin of He in natural gas and absence of Ar from K 40 decay, discussing primordial earth atmosphere composition
08 p1311 A69-20947

Hypotheses concerning mechanism of lunar maria formation, discussing molten rock layer below lunar crust
10 p1782 A69-23710

Initial Sr isotopic composition at time of planetary objects formation in solar system and precision measurements for age determination of basaltic achondrites
11 p1953 A69-24357

Solar system age based on decay rate of natural radioactive elements
11 p1961 A69-24972

Mass distribution for bodies fallen on planets during formation estimated from present inclination of planetary axes of rotation, using limit theorems of probability theory
13 p2345 A69-27652

Lunar surface and earth early satellite system, discussing maria distribution, satellite impacts and close passage collisions
13 p2345 A69-27654

Moon-earth system origin emphasizing mass distribution
13 p2352 A69-27902

Annular and linear Martian surface formations nature and origin from analysis of Mariner 4 photographs
14 p2515 A69-28769

Comet scintillations and tail characteristics studied to obtain information on interplanetary flux field, magnetic fields and planetary structures
14 p2523 A69-29704

Venus atmosphere carbon dioxide content origin from interior degassing during molten phase, using atmospheric model
16 p2857 A69-32098

Moon density and nucleation of planets, explaining low density and absence of heavy core by late aggregation from nonmetallic particles
16 p2865 A69-32808

Planetary systems interrelationship with binaries and rotating stars, emphasizing occurrence frequency study based on stellar angular momentum orientation
17 p3032 A69-33105

Planetary atmospheres origin, discussing earth formation by planetesimals accumulation and similarity to Mars and Venus, volatiles in outer planets, etc
17 p3033 A69-33369

Planetary cosmogony problems involving protoplanetary cloud origin, matter condensation, planets formation and moon origin, noting iron content in chondrites
18 p3205 A69-35437

Meteorites data in planetary cosmogony, discussing iron meteorite ages, Xe retention in chondrites and synchronism of sun and protoplanetary cloud forming
19 p3406 A69-36075

Solar system matter evolutionary beginning traced to chemical elements synthesis by considering radioactive decay irreversible processes
19 p3406 A69-36076

Terrestrial planets high temperature evolution from solar system genesis theory, discussing meteorite chemical composition, petrography, mineralogy and age determination
19 p3407 A69-36079

Isotopic age determinations on iron and stone meteorites, discussing Rb-Sr and K-Ar results, internal isochrones, Kodaikanal data and planetary formation
19 p3413 A69-36108

Hypothetical planet captured by earth, becoming earth satellite/moon, discussing Mercury orbits peculiarities
20 p3603 A69-37562

Primitive earth upper atmosphere thermal models, considering roles of exospheric temperature and free hydrogen availability in methane dominated environment
20 p3608 A69-38056

Probability of biological development leading to human life on another planet
21 p3652 A69-38786

Chemical processes responsible for transformation of vast gas and dust cloud into planetary system
21 p3804 A69-39200

Atmospheric and hydrospheric evolution on primitive earth from geological point of view
21 p3806 A69-39290

Resonant spin and anomalous rotation of Mercury, analyzing influence of tidal degradation and permanent deformation of planet
21 p3814 A69-39568

Earth early thermal history with core formation before emplacement of earliest known rock possessing remanent magnetism
22 p3936 A69-40136

Paleontological evidence to verify varying G constant hypothesis for expanding earth theory, discussing uncertainties of geological dating
22 p4017 A69-40177

Dirac hypothesis on varying G constant considered in formulating earth expansion theory without resorting to Ramsey hypothesis
22 p4018 A69-40178

Paleogeographical evolution in support of earth expansion, discussing polar wandering, global continental drift and final complete disruption
22 p3936 A69-40181

Precambrian crustal geotectonic evidence of earth radius expansion based on dated orogenic fold belts distribution
22 p3936 A69-40182

Fractionation mechanisms in early phases of planetary evolution sought to explain abundance problem in terrestrial planets
22 p4018 A69-40185

Terrestrial type planetary evolution from early history and present internal configuration of earth, discussing gravitational energy associated with earth formation
23 p4212 A69-41613

Martian surface mineralogical study of present state and past processes from rock analyses by unmanned spacecraft instruments to test planetary models
23 p4212 A69-41619

Mariner 6 and 7 TV data, discussing implications for Mars present state, past history and biological status
24 p4384 A69-43195

Model for accumulation of earth and planets from primitive solar nebula, implying inhomogeneous chemical composition of bodies in solar system
24 p4385 A69-43215

PLANETARY EXPLORATION

U SPACE EXPLORATION

PLANETARY GRAVITATION

Limiting conditions for gaseous atmospheres surrounding major and minor planets related to suitability for synoptic observation with optical telescopes and spectrometers
03 p0510 A69-13393

Lagrange multipliers of variational problem of point motion and isochronal derivatives in field of attraction of axisymmetric planet
05 p0823 A69-16015

Biological systems response to inertial environment, escape from earth gravity, planetary gravity and artificial gravity
06 p0872 A69-17011

Jupiter unmanned flyby probes trajectory and mission analysis, considering planetary gravitational field role for trajectory shaping and flight times
06 p1007 A69-17598

Zonal harmonics of Legendre polynomial series of Jupiter attractive force function effects on motion of fifth satellite
14 p2521 A69-29463

Optimal information selection for determining spacecraft trajectory, considering atmosphere, light speed and series expansion coefficients of planetary gravitational potentials
19 p3427 A69-36627

Planetary gravitational fields and artificial satellite orbits determined by using earth based range rate measurements
24 p4388 A69-43650

PLANETARY LANDING

Planetary landing trajectory optimum single pulse correction determined by considering sum of correcting and retro pulses minimum
01 p0151 A69-10568

Multiengine Martian soft lander guidance and control system design with single engine failure accommodation based on six degrees of freedom computer simulation
02 p0277 A69-11740

Mars planetary entry and landing model tests, demonstrating technological feasibility of mission
02 p0333 A69-11746

Nonexistence of Biota-Cloud recontamination hazard for planetary lander proved by analysis of interactions between small particles and physical fields around vehicle
02 p1201 A69-11771

Biological monitoring during assembly of Technological Feasibility Spacecraft/Mars lander/ to evaluate thermal control techniques and microbiological burden prior to sterilization
02 p1201 A69-11774

Longitudinal range dispersion of unmanned Mars landers using VM-8 and VM-9 atmospheric models, discussing Syrtis Major as possible landing site
02 p0324 A69-12390

Mission mode and delivery method influence on payload maximization for Mars capsule system
02 p0335 A69-12822

Aeroshell structural development for Mars flyby and entry landing mission compatible with Atlas/Centaur launch vehicle
[AIAA PAPER 68-1159] 03 p0521 A69-13667

Entry and terminal deceleration systems for unmanned Martian landers, discussing parachute landing and lifting entry vehicles
[AIAA PAPER 68-1147] 03 p0521 A69-13670

Design of interface between Mariner Mars spacecraft and Mars planetary entry/landing capsule
[AIAA PAPER 68-1162] 03 p0521 A69-13671

Dynamic analysis and development of response histories and tradeoff study charts for spherical impact limiters for protecting hard landing planetary payloads
04 p0683 A69-15508

Planetary landing vehicle design optimization, considering effects of trajectory, guidance and environmental parameters under uncertainty
[AIAA PAPER 69-128] 06 p1018 A69-18107

Search theory application to planetary exploration overall strategy for improving landing site decisions
09 p1595 A69-21994

Mars planetary landing program schedule, COSPAR quarantine policy and biological losses from failures to collect data and from contamination
11 p1828 A69-25459

Spacecraft horizontal maneuvers in homogeneous gravitational field to achieve soft landing on planetary surface, including optimal liftoff and orbital transfer
13 p2356 A69-27685

Planetary landing trajectory optimum single pulse correction determined by considering sum of correcting and retro pulses minimum
15 p2691 A69-30738

Sterilized solid propellant motors applicability to planetary landing capsule spin stabilization
[AIAA PAPER 69-823] 16 p2840 A69-32675

Thermal stability elements in solid propellant liner insulation system for heat sterilized solid rocket motors used in unmanned planetary landers
[AIAA PAPER 69-437] 16 p2869 A69-32750

Mars lander thermal control system design parameters including environment, power duty cycle and lander size and weight
[AIAA PAPER 69-610] 17 p3072 A69-33274

Thermal design of landed vehicle on Mars surface, discussing instrument package covering inside surface coating and battery insulation
[AIAA PAPER 69-611] 17 p3049 A69-33295

Planetary lander model thermal design, analysis and testing, emphasizing lightweight multilayer insulation, discussing thermal/vacuum testing
[AIAA PAPER 69-612] 17 p3049 A69-33296

Mars landers impactable power subsystems, considering thermoelectric generators, batteries, conversion equipment, Mars environment, etc
23 p4069 A69-42253

PLANETARY LONGITUDE
U PLANET EPHEMERIDES

PLANETARY MAGNETIC FIELDS

Planetary magnetic field measurements near Venus, Mars, and moon, noting magnetic dipole comparison with earth and solar wind interactions
[AAS PAPER 68-186] 02 p0311 A69-11471

Jupiter radio physics, discussing prebiological phase, low IR and microwave radio temperature and magnetic field
02 p0330 A69-12805

Interplanetary magnetic field intensities, solar and stellar fields measured by Zeeman effect, discussing fields of Jupiter, Mars, Venus and moon
04 p0657 A69-14810

Particle flux and dose rates in Jupiter Van Allen belts based on assumed synchrotron radiation from trapped electrons in dipole magnetic field
[AIAA PAPER 69-18] 06 p0997 A69-18129

Magnetic field generation by dynamo action of liquid planetary cores, discussing evidence against magnetism around Mercury, Venus, Mars and Jupiter
07 p1210 A69-18371

Sun-like alternating field generators, discussing dynamo theory of stellar and planetary magnetic fields based on nonmirror symmetrical turbulent motion in conducting fluid
10 p1782 A69-23703

Model ion-exosphere for nonrotating planet with static dipole magnetic field generalized by permitting density and temperature variations over baropause
11 p1879 A69-25284

Soviet satellite and probe studies of earth, moon, Venus and Mars magnetic fields, noting automatic magnetometer
13 p2336 A69-27352

Time-invariant magnetic fields at planetary surfaces resulting from permanent magnetic bodies or distorting effect of inhomogeneous permeability on main field, computing components
20 p3609 A69-38105

Orbital Experimental Capsule /OEC/ as subsatellite concept for Martian fields and particles measurements, noting Voyager exploring vehicle applications
21 p3805 A69-39215

Dynamo action origin of stellar and planetary magnetic fields, considering turbulent helical motions of H convection zone of sun
22 p4011 A69-39998

PLANETARY MASS

Mass functions of real earth derived from satellite orbital perturbations
[UN PAPER 68-95385] 01 p0064 A69-10460

Pluto mass from observations of perturbation on motion of Neptune
02 p0315 A69-11808

Mass points substitution for mass of earth, giving gravitational effect equal to observed gravity values corrected for centrifugal acceleration
02 p0243 A69-12008

Anomalous gravitational geopotential as function of mass, discussing density anomalies in spherical shells for harmonics as obtained from satellite observations
02 p0244 A69-12178

Pluto mass from Neptune orbital longitude, comparing observations and theory
04 p0663 A69-15385

Venus research, discussing Mariner 5 and Venera 4 data, radar tracking, orbit, diameter, gravity, density distribution, etc
08 p1391 A69-20456

Earth center of mass determination from simultaneous satellite observations by photography or laser radar
12 p2068 A69-26425

Icarus radar and optical observations analyzed to verify general relativity predictions using Schwarzschild metrics and to estimate solar oblateness, Mercury mass, etc
13 p2350 A69-27823

Mercury, Venus, Mars, earth and lunar mass determinations by radio tracking and planetary radar systems
15 p2697 A69-31305

Mass of Jupiter system from motion of Doris, using variational equations for initial rectangular coordinates and velocities with respect to mass of Jupiter
16 p2863 A69-32403

Pluto mass and density accuracy, questioning values derived from Neptune observations
19 p3403 A69-35969

Jupiter mass determined by applying Cowell numerical integration to equations of motion for ninth satellite
21 p3795 A69-38468

Figure and inhomogeneities relationship for moon, Mercury, Venus, Mars and earth, discussing circular basins and mascons
21 p3803 A69-38980

Jupiter mass determined from observations of four minor planets perturbations
22 p4013 A69-40121

PLANETARY MOTION
U SOLAR ORBITS

PLANETARY NEBULAE

Planetary nebulae radio emission, observed with pencil beam of radio telescope, confirming thermal spectrum at radio frequencies
01 p0157 A69-11291

Spectral data for central stars of planetary nebulae from Lick 120-inch telescope, discussing stellar temperature and evolutionary track deduction
02 p0325 A69-12624

Spectrophotometric studies of planetary NGC 6543 gaseous nebula, measuring emission line intensities, electron density and temperature
[ARL-68-0200] 02 p0327 A69-12708

Planetary nebulae as possible low energy galactic X ray source
04 p0661 A69-15144

Electron temperatures and optical depths for planetary nebulae outer regions derived using radio spectra and Balmer line isophotes
06 p1009 A69-17962

Planetary nebulae NGC 7662 and IC 418 forbidden line spectra compared with computer model predictions, noting evidence for dynamical effects and filamentary structure
06 p1009 A69-17963

Planetary nebula IC 4642 spectral line intensities measured by photographic spectrophotometry compared to previous measurements, noting no evidence for changes
08 p1383 A69-19898

HF radio radiation from planetary nebulae
08 p1384 A69-20056

Absolute reddening curves derived for planetary nebulae by comparing radio continuum with hydrogen recombination lines
08 p1384 A69-20057

Southern planetary nebulae observed with Newtonian spectroscopic of Radcliffe Observatory in Pretoria, giving corrected data listing
08 p1392 A69-20561

Atmospheric structure and energy distribution of planetary nebulae central stars
08 p1393 A69-20570

Carbon 12 stars to simulate core evolution of planetary nebulae precursors, discussing nuclear shell burning
08 p1396 A69-20649

Photoelectric observations of nuclei of planetary nebulae He 1-5 and NGC 1514, noting changes in color and brightness characteristics
09 p1590 A69-21379

Absolute spectrophotometry of IR lines in planetary nebulae spectra determined by diffraction spectrograph
09 p1590 A69-21380

Detection of micron Ne emission line from planetary nebula IC 418 using IR spectrometer
09 p1591 A69-21452

Radiation fields of Lyman alpha to Lyman 10 calculated for model planetary nebulas with constant and exponential density distributions in spherical symmetry
09 p1604 A69-22407

Spectral lines relative intensities for bright medium excitation gaseous planetary nebula IC 3568, using photoelectric spectrum scanner and spectrophotometry technique
10 p1787 A69-24117

Optical depth at under 110 A due to continuous absorption by N, O and Ne ions estimated in high excitation planetary nebulae
10 p1790 A69-24140

Astronomical model indicating thin radial filaments in planetary nebula NGC 7293 formed by envelope density fluctuations attributed to ionizing and shock waves
11 p1955 A69-24384

Planetary nebulae radial velocities in large and small Magellanic Clouds compared with young objects rotational pattern and interstellar gas densities and velocities
12 p2155 A69-25891

Thermal and free-free emission from planetary nebulae based on graphite grain model, discussing IR fluxes
12 p2172 A69-27158

Polarization of continuum background of planetary nebulae in window in visible spectrum from scattering of nucleus star radiation by electron gas
13 p2339 A69-27567

Optical wavelength backscattering functions for nebulae in Pleiades cluster, noting color differences and surface brightness
13 p2340 A69-27577

Radio observations of planetary nebulae IC 418 and NGC 7027 at 9.5 mm indicating radio spectra thermal character, discussing electron temperature and density
13 p2343 A69-27625

Radiative and collisional ionization of H and He in planetary nebulae, discussing dielectronic recombination at high electron temperatures
14 p2518 A69-29133

Emission line fluxes of southern planetary nebulae in Magellanic Clouds and Galaxy measured photoelectrically, giving upper limit to H beta emission of Magellanic planetary
14 p2520 A69-29376

Radial velocities of planetary nebulae in Magellanic Clouds and Galaxy, discussing Population I and II kinematics
14 p2520 A69-29377

Planetary nebulae nuclei magnitudes in Magellanic Clouds and Galaxy measured photoelectrically, discussing early evolution
14 p2520 A69-29378

Ionization stratification and chemical abundances in planetary nebula NGC 7662, discussing density fluctuations effect on N II and O II lines
18 p3191 A69-34294

Pure carbon 12 stellar models evolution studied to determine production mechanism of planetary nebulae, discussing shell burning and surface layers unbinding role
18 p3191 A69-34298

Photoelectric observations of nuclei of planetary nebulae He 1-5 and NGC 1514, noting changes in color and brightness characteristics

18 p3198 A69-34767

Absolute spectrophotometry of IR lines in planetary nebulae spectra determined by diffraction spectrograph

18 p3198 A69-34768

Radio emission attributed to galactic nebula NGC 6857, suggesting origin in high density H II regions excited by OB star clusters

18 p3202 A69-35209

Collisional excitation of forbidden lines in planetary nebulae from 5537/5517 intensity ratio measurements, noting density and intensity relationship

19 p3422 A69-36221

Monochromatic energy flux measurement in H and forbidden lines of planetary nebulae indicating ionization level and optical depth

19 p3423 A69-36223

Electron density and electron temperatures determination in planetary nebulae, using maximum number of observed forbidden transitions

19 p3423 A69-36224

Physical characteristics of young planetary nebulae and nuclei, discussing classification of objects II 4997, M 3-27 and M 1-2

19 p3423 A69-36226

Statistical relation between expansion velocities and radii of planetary nebulae due to Lyman- α and diffuse Lyman- α radiation

19 p3426 A69-36575

Planetary nebulae observations, describing radio spectra characteristics, electron temperature measurement, hydrogen line emission, etc

20 p3598 A69-37425

Planetary nebulae imaging stratification effects on structural difference studies by slit and slitless spectrographs and narrow band photography

21 p3817 A69-39785

Photoelectric measurements of emission line intensities for low density planetary nebula with moderate excitation located near north galactic pole, deriving abundances

24 p4376 A69-42662

Tabulation of photographic and photoelectric spectrophotometrically obtained relative spectral line intensities for planetary nebula IC 5217, discussing interstellar absorption

24 p4376 A69-42663

Nebulosity around FG Sagittae for origin and evolution of planetary nebulae, suggesting ejection of nebular shell

24 p4381 A69-42887

Astronomical model indicating thin radial filaments in planetary nebula NGC 7293 formed by envelope density fluctuations attributed to ionizing and shock waves

24 p4390 A69-43774

PLANETARY ORBITS

NT SWINGBY TECHNIQUE

Existence of periodic solutions by Whittaker criterion to equations describing motion of satellite of spheroidal planet in planetocentric coordinate system

02 p0317 A69-11959

Equilibrium orientations of orbiting gyrostats, giving spectrum of solutions for bodies of varied shape and internal rotor angular momentum

03 p0522 A69-14246

Kepler third law application to radar determinations of astronomical unit of length in general relativity

04 p0657 A69-14698

Idealized point mass motion in axisymmetric gravitational field, discussing orbital stability about oblate planet

04 p0658 A69-14887

Soviet book on artificial satellite motion in noncentral gravitational field, discussing celestial axisymmetric planetary orbits, stationary centers, three body problem, etc

04 p0659 A69-15027

Pluto mass from Neptune orbital longitude, comparing observations and theory

04 p0663 A69-15385

Direct light pressure effect on evolution of limited planetocentric orbits of small bodies, noting longitudes of ascending node and pericenter

05 p0823 A69-16043

Approximate solution for determining satellite motion around axisymmetric planet

06 p1005 A69-17563

Radio occultation measurements of planetary atmospheres and ionospheres from orbiting pair

[AIAA PAPER 69-53] 06 p1011 A69-18104

Commensurability among pairs of mean motions of natural satellites of major planets and hypothesis of tidal evolution of satellite systems

07 p1223 A69-19638

Commensurability among pairs of mean motions of satellites of major planets and power law relation for orbital periods of satellites

07 p1224 A69-19639

Numerical analysis of periodic solutions of restricted three body problem in sun-Jupiter system, noting genealogy of periodic orbits

08 p1382 A69-19874

Canonical equations of planet satellite intermediate orbits using harmonics of gravitational potential

09 p1589 A69-21374

Motion of satellite of very oblate planet, investigating axisymmetric potential

10 p1774 A69-22969

Systematic errors caused by planet asphericity in measurements of orientation and motion parameters of orbiting object compensated by scanning navigation system

10 p1693 A69-23320

Orbits of asteroids surrounding commensurabilities with Jupiter, discussing theory for origin of Kirkwood gaps

10 p1778 A69-23604

Relation between planets axial moments and protoplanetary particles orbital eccentricity as explanation of outward winding of planets

12 p2154 A69-25818

Plane planetary orbits construction extended to nearly circular and quasi-plane orbits by generalizing perturbations method to problems in space

15 p2690 A69-30622

Outer planets exploration during 1976-80 period of unique solar system alignment

16 p2854 A69-31630

Simplified method for derivation of universal gravitation law from Kepler law of planetary orbits

16 p2813 A69-32481

Distributions of close planet-comet encounters for various orbital elements, calculating trajectory by conic matching

18 p3195 A69-34433

Canonical equations of planet satellite intermediate orbits using harmonics of gravitational potential

18 p3198 A69-34762

Optimal transfers between Keplerian orbits for time free case, considering hyperbolas, ellipses external to and intersecting attracting planet

19 p3399 A69-35669

Interplanetary swingby trajectory correcting maneuvers for space vehicles return to earth after planet orbiting with emphasis on singular points

19 p3427 A69-36613

Jupiter tenth satellite reobserved, discussing calculations and computer techniques for determining orbit

[AAS PAPER 68-140] 20 p3595 A69-37194

Direct light pressure effect on evolution of limited planetocentric orbits of small bodies, noting longitudes of ascending node and pericenter

20 p3606 A69-37952

Planet Mars opposition to earth, Jupiter and Saturn, including table showing Mars-Jupiter conjunctions

21 p3801 A69-38788

Reconnaissance missions for outer planets exploration, discussing spacecraft design constraints, multiple planet fly-by, planetary orbiter, etc

[AAS PAPER 69-291] 24 p4381 A69-42864

PLANETARY QUARANTINE

Mars planetary landing program schedule, COSPAR quarantine policy and biological losses from failures to collect data and from contamination

11 p1828 A69-25459

Sterilization assembly development laboratory /SADL/ quality assurance program for microbiological monitoring according to NASA planetary quarantine requirements

15 p2559 A69-31123

Microbiology quality assurance program for planetary mission, considering spacecraft sterilization during fabrication, test and launch site activities

15 p2559 A69-31124

Planetary quarantine constraints by NASA insuring low contamination probability from extraterrestrial biological exploration, giving contamination probability equations and sterilization procedures

16 p2746 A69-32435

PLANETARY RADIATION

Two element interferometer observing Saturn, Uranus and Neptune at 3.12 cm, determining equivalent black body disk temperature

01 p0148 A69-10052

Romanova method for solution of scalar equation of radiative transfer in plane parallel atmosphere

02 p0319 A69-12106

Brightness temperature maps for Jovian thermal radiation obtained through 8-14 micron window of atmosphere

02 p0309 A69-12715

Jupiter, Venus and Mars 8.6 mm radio emission, obtaining average disk brightness temperatures

02 p0327 A69-12716

Working breadboard model of planet tracker under various illuminating conditions, discussing hardware and closed loop tracking error analysis accounting for signal to noise effects

03 p0463 A69-13214

Polarized radio emission from Jupiter, giving hypothesis of radiation belts deformation by solar wind

03 p0512 A69-13703

Venus brightness temperature between 0.75 and 1.65 cm from radio emission measurements, taking into account water vapor in Venus atmosphere

04 p0658 A69-14960

Photoelectric photometry of Mercury, Venus, Mars, Jupiter and Saturn /1963-1965/, determining phase curves and monochromatic albedos

04 p0663 A69-15383

Non-Io controlled fifth source of Jupiter decametric radiation from/near visible planetary disk

05 p0813 A69-15604

IR astronomy with ground based instruments noting Mars and Venus spectra, Jovian disk scans, solar radiometry, IR stars, quasars and galaxies

05 p0821 A69-15842

Space radio astronomy techniques for problems in galactic radio emission, solar studies and planetary observations

05 p0821 A69-15844

Jupiter microwave radiation flux density at 81 MHz, noting spectrum of microwave emission

05 p0827 A69-16506

Groups of drifting lanes of emission in fine structure of dynamic spectra of Jupiter decasecond decametric radiation bursts

06 p1008 A69-17958

Microwaves from celestial objects noting radio emission from sun, moon and Jupiter, cosmic fireball and pulsars

08 p1407 A69-21125

Radiometric observations of Venus brightness temperature variation used to determine phase effect at 8.6 mm wavelength

10 p1773 A69-22959

Venus and Jupiter low resolution UV spectra obtained with servocontrolled star tracking telescope in Acrobee rocket, noting Lyman alpha radiation characteristics

[JHU-TR-15] 10 p1788 A69-24121

Brightness temperatures and spectra of Venus, Mars, Jupiter and moon measured from 8 to 14 microns by reflector and prismatic spectrometer

11 p1956 A69-24395

Venus and Jupiter brightness temperature and radio emission at 2.25 and 8 mm wavelengths observed with radio telescope

11 p1956 A69-24396

Atmospheric scintillation effect on planetary brightness distribution over disk from photometric measurements

11 p1960 A69-24729

Venus brightness temperatures vs phase angle to define spectra of day and night face at short wavelengths, using model atmosphere

12 p2153 A69-25806

Flux collectors and field imagers for IR astronomy, discussing design, construction and dimensions

13 p2239 A69-27605

Jupiter decametric radio emission periodicity attributed to undiscovered satellite in unstable orbit, discussing application to satellite discovery

13 p2343 A69-27622

Linear polarization measurements at 6 cm, determining rotation period associated with Jupiter cm radiation

13 p2343 A69-27623

Planet Mars stellar magnitude found dependent on processes occurring in atmosphere and at surface

15 p2689 A69-30565

Balloon-borne UV polarimetry of stars and planets, studying linear polarization between 2000 and 3000 Å

15 p2616 A69-31380

Venus microwave spectrum analyzed by comparing various thermal and nonthermal emission models, discussing surface temperature and atmospheric composition

16 p2853 A69-31597

Visual ashen light observation on Venus possibly attributable to solar particle bombardment from dark side emission detection by spectroscopic and photometric studies

16 p2861 A69-32300

Heliosphere boundary location significance for Jovian magnetosphere configuration, considering inverse correlation between sunspot number and Jovian decametric radio emission

17 p3033 A69-33379

Saturn emission peak and flux density at 408 MHz determined by cross telescope, discussing mechanism for enhanced radiation at long wavelengths

17 p3041 A69-33813

Venus brightness and polarization distributions measurement at centimeter wavelengths using two element interferometer, suggesting Venus atmosphere as main source of radiation

18 p3191 A69-34302

Jovian radio sources intermittency, recording difficulties, longitudinal drift and theories concerning origin

18 p3196 A69-34690

Venus brightness temperature between 0.75 and 1.65 cm from radio emission measurements, taking into account water vapor in Venus atmosphere

18 p3197 A69-34723

Crab Nebula radio brightness at 2.16 and 8.2 mm measured and compared to Jupiter flux density

19 p3428 A69-36875

Mayeda flare observed on Mars on 4 June 1937, suggesting oriented reflection of solar rays from ice crystals cloud or Martian surface feature

20 p5508 A69-38049

Polarization ellipse orientation at source from Faraday fringes on Jupiter decametric radio bursts swept frequency records

20 p3594 A69-38169

Orbital Experimental Capsule /OEC/ as subsatellite concept for Martian fields and particles measurements, noting Voyager exploring vehicle applications

21 p3805 A69-39215

Stellar scintillation spectra theory extended to rectangular apertures, generalizing to planetary scintillation and effects of diffraction, atmospheric dispersion and seeing

21 p3773 A69-39771

Planetary spectroscopy with McDonald 107 inch telescope, discussing role of molecular and atomic absorption lines, line broadening, Doppler shifts and Rayleigh criterion

21 p3727 A69-39786

Lightcurves for 624 Hektor with Radcliffe, Kitt Peak, Catalina and Cerro Tololo reflectors, noting asteroid shape and rotational axis

22 p4013 A69-40124

Jupiter spectrum observations in 2.8-14 micron range, describing absorption strength and brightness temperature, basing analysis on ammonia, methane and hydrogen absorption

22 p4028 A69-40662

Spectral reflectivity curves for Mars light and dark areas and seasonal changes of dark area simulated in laboratory

23 p4209 A69-41319

Brightness temperatures and spectra of Venus, Mars, Jupiter and moon measured from 8 to 14 microns by reflector and prismatic spectrometer

24 p4390 A69-43785

Venus and Jupiter brightness temperature and radio emission at 2.25 and 8 mm wavelengths observed with radio telescope

24 p4390 A69-43786

PLANETARY ROTATION

Atmospheric circulation on rotating and nonrotating planets with shallow atmospheres applied to Mars and Venus atmospheres

02 p0320 A69-12110

Mercury rotation period determination by surface photography, correcting earlier interpretation

03 p0517 A69-14233

Light curves for Vesta compared and rotation derived from aspect change effect on rotational period

04 p0657 A69-14677

Selenographic and celestial selenocentric coordinate systems, noting precession and nutation of lunar rotation axis

04 p0662 A69-15250

Resonance relations of rotational and orbital frequencies of solar system planets and satellites estimated for statistical significance

10 p1771 A69-22852

Model ion-exosphere for nonrotating planet with static dipole magnetic field generalized by permitting density and temperature variations over baropause

11 p1879 A69-25284

Relation between planets axial moments and protoplanetary particles orbital eccentricity as explanation of outward winding of planets

12 p2154 A69-25818

Theory for describing rotating fluid planets external geometry in state of hydrostatic equilibrium, noting role of equipotential surfaces

20 p3594 A69-37077

Earth polar wanderings attributed to rotation axis angular displacements generated by density redistribution on geologic time scale

20 p3535 A69-38192

Resonant spin and anomalous rotation of Mercury, analyzing influence of tidal degradation and permanent deformation of planet

21 p3814 A69-39568

PLANETARY SPACE FLIGHT

U INTERPLANETARY FLIGHT

PLANETARY SPACECRAFT

U INTERPLANETARY SPACECRAFT

PLANETARY SURFACES

NT MARS SURFACE

Orbital spectroscopic and radiometric IR experiments, considering moon and Mars surface [AAS PAPER 68-196]

02 p0312 A69-11474

Mercury radio emission phase dependence, discussing brightness temperature value approximation and surface layer properties

02 p0314 A69-11640

Unmanned planetary exploration using Mariner class spacecraft for solar system and life origin

02 p0334 A69-12302

Hard space suit for use on planetary surfaces and extravehicular activity, discussing design, fabrication and mobility

03 p0379 A69-12993

Photometric-polarimetric observations of planetary surfaces, discussing geological environment interpretation and spacecraft reconnaissance system mission planning

03 p0421 A69-13394

Satellite high resolution radar mapping of planets, discussing synthetic aperture and linear FM transmission radar techniques

03 p0430 A69-13399

Changes in bands of Jupiter /1962-1965/ from astronomical synoptic mapping program, tabulating overall and chromatic intensities and longitudinal velocities

03 p0512 A69-13696

Mercury rotation period determination by surface photography, correcting earlier interpretation

03 p0517 A69-14233

Ground coverage of oblate planets by spin stabilized satellites, determining ground areas visible to satellite by solution of quadratic equations

03 p0522 A69-14244

Optimal circular satellite orbits for planetary surface mapping mission minimizing overlap

03 p0518 A69-14247

Diffusive scattering effects on planetary surface reflection coefficient determined by radar observations

04 p0662 A69-15245

Predictive display technique for remote manual control of roving lunar and planetary surface vehicles

06 p0928 A69-17925

Radiating surface temperature and total atmospheric moisture content determinations based on meteorological earth satellite measurements of outgoing radiation in IR

06 p0952 A69-17988

Mars imaging mission and astrodynamic interaction, discussing arrival geometry and orbit size effects [AIAA PAPER 69-127]

06 p1011 A69-18169

Optical processing of planetary radar data for range Doppler image generation

08 p1270 A69-19816

Mars and Earth atmospheric carbon dioxide simulation and spectroscopic measurement for developing planetary surface pressure estimating procedures from IR transmission measurements

08 p1354 A69-20151

Bioorganic comparative analysis of desert soils, Precambrian shales and meteorites by automated pyrolysis-gas chromatography-mass spectrometry system for future Mars soil analysis [JPL-TR-32-1368]

11 p1832 A69-25640

Mars higher atmospheric transparency and changes in surface colors

12 p2154 A69-25823

Limits for Martian surface materials established by comparing visible and IR spectra with laboratory spectra

12 p2156 A69-26225

Photometric and polarimetric properties of Mars, discussing powder covering, chemical composition and particle size of bright and dark areas and blue haze

12 p2171 A69-27145

Reflected and absorbed solar radiation by planetary atmosphere and surface determined as function of atmosphere and surface optical properties

15 p2689 A69-30564

Flow over uniformly rough surface in planetary boundary layer from mixing length wind spiral model, using surface shear stress and wind direction data

17 p2997 A69-33153

Scale determination in spatial direction networks, using polygonal transverse measured along continental surfaces and Secor method over water surfaces

18 p3131 A69-35196

Depth distribution of primary cosmic radiation fluxes and secondary nuclear-active particles in stone meteorites and surface layer of planets, moon and asteroids

19 p3410 A69-36092

Radar astronomy, discussing planetary surfaces study techniques, target/signal interactions, planet cross sections, delay and Doppler spectra

20 p3491 A69-37650

Time-invariant magnetic fields at planetary surfaces resulting from permanent magnetic bodies or distorting effect of inhomogeneous permeability on main field, computing components

20 p3609 A69-38105

Saturn surface spectrum near ring shadow examined for water vapor content in ring and greenhouse effect on surface

20 p3616 A69-38305

Figure and inhomogeneities relationship for moon, Mercury, Venus, Mars and earth, discussing circular basins and mascons

21 p3803 A69-38980

Surface reflectivity mapping of Venus by radar interferometry at 3.8 cm, noting low reflectivity circular regions

21 p3806 A69-39331

Orbit selection rules for planetary cartographic spacecraft derived from relations connecting camera angle, view field and imaging resolution [AIAA PAPER 69-879]

21 p3763 A69-39405

Radar reflection techniques for planetary surface studies, considering surface properties effects on reflectivity and reflected wave characteristics, instrumentation and data for moon and planets

21 p3811 A69-39509

Martian atmosphere circulation compared to terrestrial, considering absence of oceans, radiative coupling and planetary scale motions

21 p3814 A69-39569

Rocket UV spectra indicating Venus atmosphere weak absorption and low ozone abundance and possible Jupiter surface depressions

22 p4028 A69-40661

Statistical model of cratered planetary surface slopes and elevation applied to radio wave scattering by moon and Venus

23 p4209 A69-41322

Mars landing site topography reconstructed via stereoscopic pictures returned by surface-based imaging systems

23 p4164 A69-41618

Bulk, selective particulate and hard rock samplers for landed extraterrestrial geological and biological instruments performing on-site analysis

23 p4146 A69-41620

Sequential analyses of planetary surface sample for extraterrestrial life detection, discussing chemistry, morphology, growth and metabolism for life attributes

23 p4213 A69-41623

PLANETARY TEMPERATURE

Photovoltaic properties of CdS thin film solar cells and silicon cells at Jupiter temperature and solar intensity

03 p0368 A69-13076

Planet Mercury rotation, showing reminiscence of apparent path of sun to Ptolemaic concept of planetary system

03 p0509 A69-13368

Scaled solar and gray-body temperature distribution models compared to determine stellar atmosphere

04 p0653 A69-14626

Venus brightness temperature between 0.75 and 1.65 cm from radio emission measurements, taking into account water vapor in Venus atmosphere

04 p0658 A69-14960

Atmospheric models for exospheric temperatures of Mars and Venus based on photoionization heating efficiency 12 p2155 A69-26020

Two channel IR radiometer for 1969 Mariner mission measuring equivalent black body surface temperature 17 p2972 A69-33085

Mars surface temperature calculated by applying Humphrey formula for planetary radiation energy, finding mean annual values of temperature for different albedo 17 p3034 A69-33412

Subsurface Martian temperature from sinusoidal temperature variation theory for semiinfinite homogeneous medium, plotting amplitude, mean surface and diurnal soil temperature curves 17 p3034 A69-33413

Mars internal structure and composition modeling, considering core, mantle and temperature via earth analogy and Mariner 4 data 17 p3037 A69-33652

Radio telescope observations at 11.13 cm for polarized E vector intensities of Saturn and disk temperature of Uranus and Neptune 17 p3039 A69-33731

Venus brightness temperature between 0.75 and 1.65 cm from radio emission measurements, taking into account water vapor in Venus atmosphere 18 p3197 A69-34723

Venusian atmospheric features obtained from Venus 5 and 6 and Mariner 5 observations, indicating extremely high temperatures and pressures 19 p3401 A69-35887

Book on thermal processes of earth and moon covering heat generation and transfer, internal temperatures, gravitational energy, etc 19 p3401 A69-35887

Mercury and Venus thermal histories based on analogy to earth models 20 p3597 A69-37333

Optical parameters of Martian surface and temperature, discussing brightness distribution along diameter in red spectral region, based on photoelectric cross sections 20 p3608 A69-38050

Earth early thermal history with core formation before emplacement of earliest known rock possessing remanent magnetism 22 p3936 A69-40136

Solid state chemical heat sources aboard unmanned planetary landing vehicles to maintain batteries and experiments operability during cold planetary nights 23 p4070 A69-42275

Mars thermal energy emission measurement by Mariner 1969 IR radiometer, indicating frozen carbon dioxide cap and minimum temperature 24 p4384 A69-43196

PLANETOCENTRIC COORDINATES

NT GEOCENTRIC COORDINATES

Existence of periodic solutions by Whittaker criterion to equations describing motion of satellite of spheroidal planet in planetocentric coordinate system 02 p0317 A69-11959

Selenographic and celestial selenocentric coordinate systems, noting precession and nutation of lunar rotation axis 04 p0662 A69-15250

Direct light pressure effect on evolution of limited planetocentric orbits of small bodies, noting longitudes of ascending node and pericenter 05 p0823 A69-16043

Direct light pressure effect on evolution of limited planetocentric orbits of small bodies, noting longitudes of ascending node and pericenter 20 p3606 A69-37952

PLANETOLOGY

Space systems use for planetary geology and geophysics - Conference, Boston, May 1967 03 p0509 A69-13390

French atlas of planets covering ancient and modern planetary system and discoveries, physical nature and movement, etc 03 p0513 A69-13778

Communications of lunar and planetary laboratory, Volume 7, covering lunar radiation, lunar craters, Vesta rotation, etc 04 p0655 A69-14668

Magnetic field generation by dynamo action of liquid planetary cores, discussing evidence against magnetism around Mercury, Venus, Mars and Jupiter 07 p1210 A69-18371

Permissible nonthermal convection modes in planetary interiors derived from conservation equations for

self gravitating homogeneous nonrotating compressible fluid spheres 07 p1213 A69-18611

Convection in planetary interiors produced by combined thermal and nonthermal mechanisms, noting self gravitating homogeneous nonrotating compressible fluid spheres 07 p1214 A69-18613

Communications of Lunar and Planetary Laboratory, Volume 7 07 p1225 A69-19769

Martian structure theory, comparing mathematical model based on earth long term evolution and ad hoc models 08 p1387 A69-20092

Earth and planets shallow seas tidal dissipation reflected in Q values, noting larger planet pressure effect 08 p1393 A69-20581

Radar probing of solar system noting contributions to knowledge on planets 09 p1595 A69-21765

Collection of Soviet papers on physics of moon and planets covering results of lunar, Mars and Jupiter photometric studies 11 p1959 A69-24723

Dependence of convection in planetary interiors upon magnitude of Rayleigh number for rigid and free surfaces 12 p2155 A69-26208

Planetary mantles thermal and nonthermal convection model, solving sphere density variations and radial velocity components due to internal time-independent motions 13 p2344 A69-27644

Planetary free vibrations, discussing models for earth, moon, Venus and Mars, rotation and ellipticity effects and measurement on seismometers, gravimeters and magnetometers 17 p3031 A69-33097

Mars 1969 opposition observations, discussing extremes in north and south hemispherical polar cap behavior, frosty deposit colorings and polar vapor/clouds 17 p3043 A69-34141

Book on thermal processes of earth and moon covering heat generation and transfer, internal temperatures, gravitational energy, etc 19 p3401 A69-35887

Boundary conditions for theory of solar system origin, discussing planetary atmospheres, surfaces, magnetic fields, composition and early solar wind 19 p3419 A69-36209

Planetary interiors from geophysical viewpoint emphasizing earth data 21 p3811 A69-39508

Earth temperature distribution using various models, noting excess of total heat production in interior vs heat flow during planet history 21 p3718 A69-39732

Physics applications to earth and planetary interiors - NATO Conference, Newcastle-upon-Tyne, England, March-April 1967 22 p4015 A69-40172

Physical and life supporting properties of hypothetical Martian biosphere, considering organism adaptation theories 22 p3876 A69-40271

Planetary exploration and NASA program objectives [AAS PAPER 69-286] 24 p4379 A69-42810

Solar activity empirical correlation with planetary positions used for long range forecast of solar flare proton events [AAS PAPER 69-069] 24 p4366 A69-42880

PLANETS

NT EARTH [PLANET]
NT JUPITER [PLANET]
NT MARS [PLANET]
NT MERCURY [PLANET]
NT NEPTUNE [PLANET]
NT PLUTO [PLANET]
NT SATURN [PLANET]
NT URANUS [PLANET]
NT VENUS [PLANET]

French atlas of planets covering ancient and modern planetary system and discoveries, physical nature and movement, etc 03 p0513 A69-13778

Capture of comets by large planets 03 p0517 A69-14128

Angular momenta of stars, planets and asteroids, plot log of angular momentum per unit mass against log of mass of astronomical object 09 p1608 A69-22716

Radioactivity levels estimation at surface and in bulk of solar system planets caused by galactic and solar cosmic rays 10 p1756 A69-22813

Total planet interaction energy of comets passing through solar system, showing non-Gaussian shape of distribution 10 p1774 A69-22970

Monograph on world of planets covering solar planetary system, atmospheres, water, seasons, organic life, etc 11 p1958 A69-24666

Quasi-stochastic nonlinear one dimensional oscillations in periodically disturbed field applied to celestial mechanics of planetoids 12 p2130 A69-26373

Mass distribution for bodies fallen on planets during formation estimated from present inclination of planetary axes of rotation, using limit theorems of probability theory 13 p2345 A69-27652

NASA planetary program, discussing Mars, Jupiter, Mercury, Venus and Saturn missions 15 p2723 A69-31318

Tabulated results of photographic plate measurements of minor planets positions at Leiden observatory 1938-1964/ 20 p3605 A69-37789

Probability of biological development leading to human life on another planet 21 p3652 A69-38786

Solar activity empirical correlation with planetary positions used for long range forecast of solar flare proton events [AAS PAPER 69-069] 24 p4366 A69-42880

 NT YEAST

Allelopathy, discussing application to gas liberating activity of edible plants as ingredients of space flight life support systems

02 p0198 A69-11509

Space flight factors, ionizing radiation and combined effects on vitamin C content in onion bulbs

05 p0708 A69-16510

Plants growth from seeds exposed to space environment onboard Cosmos 110 biological satellite compared with control plants

07 p1064 A69-18972

Change in content of dry matter, sugars and ascorbic acid in plants after action of space flight factors on seeds of these plants

10 p1645 A69-23495

Light interaction with stacked leaves and plant canopy, determining reflectance and transmittance

12 p2097 A69-26985

Plant and soil thermal behavior for various conditions of crop species, plant spacing, tillage, irrigation and aerial thermal scanner imagery

12 p2075 A69-26989

Gravity effects on plant growth, discussing horizontal clinostat experiments and auxin transport mechanism

15 p2555 A69-30470

Dynamic differential thermal analysis of dried plant and animal specimens and related substances yielding discrete decomposition peaks of exothermic type

15 p2555 A69-31000

Higher plants utilization as nutrition source in space missions, comparing weight requirements for cultivation equipment and food storage

15 p2560 A69-31408

Carrot plants growing during 374 days in conveyer type aeroponic assembly, noting yield and morphological features

17 p2912 A69-32943

Lignin presence in New Zealand moss gametophytes observed for characteristic color reaction and UV spectra, noting contrast with north temperate species

17 p2912 A69-34176

Space flight factors, ionizing radiation and combined effects on vitamin C content in onion bulbs

18 p3095 A69-34729

Radiation effects on microorganisms and plants during space flight on Biosatellite 2 and Gemini 11 missions

20 p3476 A69-37617

Geotropic response reciprocity in oat seedlings grown in two axis clinostat compared with acceleration constraints of biosatellites, considering imposition of centrifugal force

20 p3477 A69-37620

Plants growth from seeds exposed to space environment onboard Cosmos 110 biological satellite compared with control plants

20 p3479 A69-38220

Paleozoic plant fossils carbohydrate content

21 p3669 A69-39333

Carbohydrate analyses of upper carboniferous plant fossils in England, noting monosaccharides separation

21 p3661 A69-39534

Amino acid components in paleozoic plant fossils and rock samples noting glycine, serine and glutamic acid

21 p3662 A69-39535

Photosynthesis enhancement in seaweed after alternate exposure to gas laser and tungsten lamp white light passed through IR narrow band filter

24 p4270 A69-42580

PLANTS [INDUSTRIES]
 U INDUSTRIAL PLANTS

PLASMA ACCELERATION

Plasma slab acceleration along magnetic dipole guard field null, noting lack of equilibrium and no decrease of plasma losses

03 p0475 A69-13157

Space charge plasma acceleration in axially nonuniform magnetic field

03 p0477 A69-13760

Nonlinear mechanism for solar surge involving rapid acceleration of high electrical conductivity and macroscopic dimension plasma regions

03 p0516 A69-14044

Nonmagnetic plasma deceleration in quasi-stationary magnetic field with coaxial injector and barrier field

03 p0481 A69-14212

Cascade acceleration of plasma by two stage device noting plasma dispersion, plasma losses and highest final plasma velocity

03 p0482 A69-14215

Highly ionized plasma acceleration by intrinsic radiation achieved by deep cooling of free electrons

07 p1195 A69-19595

High energy particles obtained by accelerating plasma with frozen-in magnetic field to relativistic velocities during scattering of fast electron beam

08 p1358 A69-19805

Plasma acceleration by induced Hall currents, discussing Hall-to-current ratio maximum at critical magnetic field

[AIAA PAPER 69-280] 09 p1562 A69-21228

Quasi-steady state plasma acceleration in coaxial electrode geometry during synchronized application of tailored pulses of mass flow and current

[AIAA PAPER 69-267] 09 p1563 A69-21234

MPD plasma acceleration in West Germany, discussing Hall acceleration, electrodeless plasma acceleration by electromagnetic waves and space charge neutralized Hall ion thruster

[AIAA PAPER 69-279] 09 p1564 A69-21238

Plasma acceleration by pulsed electromagnetic traveling wave, discussing stable column formation and acceleration loss processes

09 p1544 A69-21301

Steady state spherically symmetric model for solar plasma acceleration with distance, showing essential role of viscosity

10 p1769 A69-23899

Mass transfer due to plasma recombination, ambipolar diffusion and electrode erosion and resistance forces effects on electrodynamic accelerated plasma

13 p2315 A69-28555

Energy relations and conversion for electrodynamic plasma acceleration with allowance for mass transfer processes resulting from recombination, diffusion and electrode erosion

15 p2664 A69-31176

Fringing effects on electric efficiency variation with slip for cylindrical induction MHD device operable as accelerator, generator or Joule heater

[AIAA PAPER 67-714] 16 p2736 A69-32152

Plasma acceleration away from rotating magnetized astrophysical objects analyzed and applied to pulsar NP 0532 for magnetic moment and mass loss rate calculations

20 p3598 A69-37419

Astrophysical ions acceleration model based on magnetic field annihilation theory

22 p3987 A69-41002

Conical induction plasma accelerator design for studying acceleration process characteristics

24 p4357 A69-43468

PLASMA ACCELERATORS

NT COAXIAL PLASMA ACCELERATORS

Steady one dimensional motion of current sheets in plasma accelerators, noting condition of zero initial conductivity

01 p0133 A69-11220

Cascade acceleration of plasma by two stage device noting plasma dispersion, plasma losses and highest final plasma velocity

03 p0482 A69-14215

Plasma rotation in current layer of pulsed inductive accelerator

[AIAA PAPER 68-86] 04 p0635 A69-14702

Energy transfer from pulse network to mass associated with propagating current sheet in linear pinch discharge, discussing pulsed plasma accelerator efficiency

[AIAA PAPER 69-113] 06 p0971 A69-18123

Current sheet pattern and gas flow stabilization in pulsed plasma accelerators

[AIAA PAPER 69-112] 06 p0971 A69-18140

Electromagnetic ion acceleration in steady electric and magnetic fields chosen to match fields of Alkali Plasma Hall Accelerator /ALPHA/

[AIAA PAPER 69-111] 06 p0985 A69-18175

Particle free path estimates for axisymmetric high specific impulse plasma accelerators, discussing collisionless plasma simulated by computer

[AIAA PAPER 69-278] 09 p1563 A69-21233

Experimental and theoretical investigation of mass injection effect on high current MPD arc

[AIAA PAPER 69-266] 09 p1564 A69-21242

Near cathode magnetic field effect on instability in linear Hall current accelerators, using geometry of field extending from anode to cathode region

[AIAA PAPER 69-381] 09 p1568 A69-21731

Hall type electromagnetic plasma accelerator, with thrust affected only by Lorentz forces in external magnetic field, compared to pure Hall accelerator

11 p1866 A69-25214

Erosion type plasma accelerator using inductive energy storage compared with capacitive energy storage

13 p2311 A69-28110

Tangential drag measurements at electrodes of arc in plasma accelerator, ion current partitioning at cathode and electrode damage

[AIAA PAPER 67-657] 13 p2312 A69-28219

Plasma jets from MPD accelerators, analyzing swirl, entrainment and pressure distribution using gasdynamic probes

13 p2313 A69-28242

Passive electric microwave probe with balancing capacitance for studying waveguide fields at high microwave power levels in radiative plasma accelerators

14 p2498 A69-29807

Hall ion thruster prime propulsion system, considering low and high voltage mode in plasma source I-V characteristics

17 p3019 A69-33338

Self induction of conical electrode type plasma accelerator with and without allowance for magnetic scattering field, investigating acceleration process

19 p3379 A69-35821

Drift effect on plasma motion in high current pulsed plasma accelerators of Marshall type, calculating current variations, voltage, particle velocity, efficiency and impulse

21 p3778 A69-39548

Conical induction plasma accelerator design for studying acceleration process characteristics

24 p4357 A69-43468

PLASMA ARC SPRAYING

U ARC SPRAYING

PLASMA ARC WELDING

High strength steel welding with physical properties equal to parent metal, discussing gas tungsten-arc, electron beam and plasma arc techniques

01 p0088 A69-11399

Plasma arc welding, discussing transferred and non-transferred arc systems application to spraying and welding techniques, including automated microplasma welding

04 p0608 A69-15482

Automatic plasma needle arc fusion welding for computer memory arrays and miniature electronic devices

09 p1511 A69-22355

Covered electrode, submerged arc, electroslag, gas metal arc, gas tungsten arc and plasma arc welding processes application to high strength steels

12 p2100 A69-25828

Plasma electron beam for welding, deriving beam current from secondary emission by ion bombardment, discussing gas pressure, equipment and applications

19 p3320 A69-35555

Microplasma, W inert gas and submerged arc welding processes for fabrication of rocket motor cases and pressure vessels, discussing material requirements and weldability

[SBAC PAPER 7] 20 p3550 A69-37449

Plasma arc systems and applications, noting transferred and nontransferred jets with emphasis on plasma spraying, surfacing, welding and cutting

[SBAC PAPER 18] 20 p3550 A69-37453

Repair welding methods for trailing edge cracks in nickel base superalloy used in turbine vanes, emphasizing plasma arc fusion welding

[ASM PAPER D8-16.3] 20 p3551 A69-38137

PLASMA CLOUDS

Target production device for deuterium plasma clouds in vacuum with Q switched neodymium laser

01 p0090 A69-10222

- Artificial visible plasma clouds in space interacting with electric and magnetic fields around earth
01 p0151 A69-10533
- Exploding wires as light source for quantitative spectroscopy, noting optically thin plasma clouds with radial symmetry
01 p0117 A69-10658
- Temperature and electron density distribution during late phase of wire explosion, analyzing optically thin plasma column by quantitative spectroscopy
02 p0286 A69-11711
- Simulation experiments using artificial plasma for astrophysical rocket exploration, discussing experiments leading to barium-copper oxide mixture choice for plasma cloud
06 p0999 A69-16973
- Arc cloud thermal conductivity effects on discharge temperature and radiation intensity, solving energy balance equation
06 p0964 A69-17254
- Plasma distribution and Alfvén wave velocity field in magnetosphere, discussing distortion of dipole magnetic field, ring current and wave propagation
10 p1742 A69-24205
- Auroral arcs drift as function of polar storm initial phase, noting agreement with satellite data on plasma motion in magnetosphere
12 p2071 A69-26694
- Ion cloud ambipolar diffusion and motion dependence on initial configuration and close magnetic field alignment above 95 km, discussing observations of meteor trains
12 p2074 A69-26961
- Radio wave diffraction by inhomogeneities arising from ionized gas clouds in interstellar medium
19 p3428 A69-36882
- Artificial ion plasma cloud experiment for studying auroral electric fields
21 p3710 A69-38507
- Magnetic field implications in stellar formation mechanism including gravitational collapse, magnetic gas cloud fragmentation and stellar winds magnetic braking
24 p4378 A69-42699
- PLASMA COMPOSITION**
- HF plasma ionic composition dependence on discharge conditions and ions translational energy
01 p0129 A69-10682
- Spherical and cylindrical probes emitting electrons and ions in unbounded plasma, deriving I-V characteristics equations
02 p0247 A69-11569
- Vacuum system for obtaining highly purified plasmas for thermionic investigations noting decontamination cycles and chamber characteristics
03 p0412 A69-13839
- Plasma jet mass structure investigated for decomposition during passage through vacuum by spectrometer and probe techniques
03 p0478 A69-13841
- Argon plasma composition in Saha equilibrium, using FORTRAN 4 program
07 p1193 A69-19168
- Fortran 4 program for computation of equilibrium compositions of gas mixtures at high temperatures
08 p1278 A69-20154
- Ionic species identification in argon-cesium discharges for thermionic converter design
09 p1440 A69-21830
- Electrohydrodynamic equations and transfer coefficients for multicomponent plasma with volumetric charge in electric field, discussing Ohm law and equations for plasma motion
12 p2135 A69-26399
- Soviet monograph on plasma diagnostics by lasers, describing interferometry, optical field visualization, schlieren and shadow photography
12 p2139 A69-27075
- Electron current, space potential and ionic composition obtained by Langmuir type probes on Explorer 31 for disturbance region dependence on ionic composition
14 p2518 A69-29122
- Hall generator electrical characteristics, discussing plasma homogeneity, stability and shock tube priming
15 p2658 A69-30298
- Density ratios of H ions to H atoms in ground state calculated as function of quasi-neutral plasma electron density
16 p2820 A69-31770
- Electromagnetic wave propagation in plasmas and plasma instabilities due to oscillations, deriving equations for frequency distributions in various plasma compositions
16 p2823 A69-32243

- Drift waves parametric excitation in resistive plasma derived from fluid equations, assuming plane geometry with periodic boundary conditions in magnetic field and azimuthal directions
18 p3179 A69-34440
- Steady state spherically symmetrical ejection of multicomponent plasma from sun determined with hydrogen approximation, considering ion composition
20 p3594 A69-37018
- Radioastronomical investigations of inhomogeneous near solar plasma structure
20 p3606 A69-38017
- Mach-Zehnder laser interferometer for measurements of electron density in transient Hg vapor plasma, noting agreement with microwave measurements
22 p3965 A69-40924

PLASMA CONDUCTIVITY

- Dense plasmas produced by explosions of wires and mercury filaments, discussing plasma conductivities
01 p0128 A69-10391
- Steady one dimensional motion of current sheets in plasma accelerators, noting condition of zero initial conductivity
01 p0133 A69-11220
- Born approximation for calculating low temperature plasma transport properties from quantum mechanical scattering cross sections on Debye potential
02 p0291 A69-12486
- Electron conductivity in low mass red giant core
02 p0327 A69-12709
- Electric field, current density and magnetic induction of plasma flow measured, obtaining plasma conductivity and flow velocity for electron temperature and density
03 p0473 A69-12877
- Magnetoconductance of nonequilibrium plasmas in indium antimonides, noting anisotropy effect of electric and magnetic field orientation
03 p0486 A69-13463
- Active and reactive impedance components of plane capacitor immersed in plasma and at LF noting dependence on plasma conductivity
03 p0477 A69-13713
- Xe gas discharge plasma resistivity dependence on current density measured in large turbulent flash lamps
03 p0478 A69-13846
- Electrodeless conductivity probe impedance in anisotropic plasma computed on basis of Maxwell equation
03 p0483 A69-14252
- Argon-K plasma electrical conductivity as function of electric current density at 1400-2400 K
05 p0798 A69-15614
- Electron distribution function effect on microwave emission and HF conductivity of weakly ionized discharge plasma
05 p0799 A69-15734
- Effective collision frequency deduced from ratio of microwave conductivity to electron density in PIG discharge plasma
05 p0804 A69-16442
- Ionized plasma electrical conductivity in magnetic field calculated by supplementing BGK collision terms with Vlasov equation
06 p0965 A69-17482
- Hydromagnetic plasma stability in infinite electrical conductivity approximation applied to smooth closed systems, discussing ballooning instability mode
06 p0965 A69-17519
- Finite conductivity or ohmic resistance effect on stationary axisymmetric self constricting MHD flow
06 p0966 A69-17548
- Potassium seeded argon plasma conductivity in induced electric field at static gas temperature for MHD generator model
06 p0871 A69-17909
- MHD generators with nonequilibrium conductivity, taking into account ionization instability of plasma
06 p0871 A69-17912
- Numerical analysis of stabilization of one component conducting plasma in two dimensional coaxial duct
07 p1190 A69-18757
- Longitudinal and transverse conductivities and anisotropy tangent for noncharged plasma in magnetic field
07 p1193 A69-19025
- Evaluation methods for DC electrical conductivity, heat conductivity and viscosity in plasmas
08 p1364 A69-20477
- Moderately ionized plasma electrical conductivity calculated by generalized Ohm law and measured along with other plasma properties
09 p1543 A69-21264

- Plasma conductivity tensor components in crossed fields calculated by Boltzmann kinetic equation, noting influence of magnetic field presence
09 p1546 A69-21565
- Electrical conductivity of partially ionized plasma, noting nonapplicability of Enskog-Chapman method and use of Lorentzian gas model
09 p1546 A69-21584
- High time resolution electrical conductivity measurement of ionized plasma gas flow, using changes in Q of circuit
09 p1546 A69-21585
- Conductivity probe design for tenuous plasmas and ionized gases, discussing experimental confirmation of theoretical behavior
09 p1496 A69-21936
- Photoelectric effects produced by polarized radiation in isotropic optical media, discussing photo EMF and photoconductivity in multivalley semiconductors and plasmas
10 p1701 A69-23138
- Finite Larmor radius, finite conductivity, rotation and Hall current effects on Jeans criterion for gravitational instability of plasma
10 p1729 A69-23408
- Electrical conductivity, electron energy balance, ionization equilibrium time and channel parameters in pulse discharge nonequilibrium Cs plasma containing inert gas addition
10 p1731 A69-23439
- Ar-K plasma studied as possible MHD generator working fluid by investigating influence of emission and external magnetic field on nonequilibrium electrical conductivity
10 p1732 A69-23441
- Rare gas-alkali plasma electrical conductivity dependence on gas temperature and preionization to determine optimum operating conditions for MHD generator
10 p1733 A69-23451
- MHD flows in MHD generator channel under magnetic field, analyzing steady laminar flow during entry and Hall effect on conductivity temperature dependence
10 p1734 A69-23455
- Turbulent plasma near stability limit in MHD generator with constant load coefficients, noting effect of conductivity and effects of gas temperature
10 p1735 A69-23460
- Conductivity and electron temperature in coaxial MHD generator plasma with magnetic field, studying Joule heating effect on performance
10 p1735 A69-23463
- Nonequilibrium electron heating effect on inert gas plasma conductivity during shock wave movement across magnetic field
10 p1737 A69-23470
- Pressure and temperature effects on electrical conductivity of dense plasma ejected from Laval nozzle
10 p1739 A69-23492
- Properties of superdense NaCl plasmas as model working substance for MHD generator, discussing ion concentration and collisions, charge reversal and conductivities
10 p1739 A69-23493
- Field effect on positive column plasma of glow discharge in air, analyzing near wall potential and conductivity
10 p1741 A69-23946
- Weakly ionized gas in crossed electromagnetic fields, formulating Ohm law from Ginzburg equations
11 p1925 A69-24319
- Electrical conductivity radial distribution in plasma flux from changes in Q factor and circuit inductance in presence and absence of skin effect
11 p1928 A69-25221
- Nonlinear HF conductivity of fully ionized plasma, considering applied electromagnetic field frequency close to electron plasma frequency
11 p1929 A69-25271
- Steady linearized aligned fields flow of collisionless plasma past slender body, noting effect of tensor conductivity
11 p1930 A69-25278
- Faraday type MHD energy converters in nonequilibrium conduction mode, analyzing two dimensional current and potential distributions in plane normal to magnetic field
11 p1826 A69-25397
- Electrostatic drift wave dissipative instability in framework of macroscopic theory, accounting for resistivity and viscosity using WKB method
11 p1934 A69-25655

- Electrical DC conductivity of turbulent plasma decreased in presence of ion waves
13 p2305 A69-27302
- Tensor conductivity measured and analyzed for MHD generator duct with electric and magnetic fields
13 p2309 A69-28026
- Current distribution in MHD duct with permeable electrodes with tensor conductivity, obtaining Riemann-Hilbert heterogeneous boundary value problem solution by finding electric field
13 p2310 A69-28030
- Current carrying cylindrical plasma column oscillations surrounded by electric excitation with multiple feedback radio, discussing stabilization possibility
13 p2311 A69-28106
- Coaxial three coil probe measuring local electrical conductivity and velocity in plasma streams, discussing operations in electrolytes and axisymmetric plasma stream
[AIAA PAPER 69-327] 13 p2313 A69-28264
- Load factor role in nonequilibrium ionization process in Faraday-type generator, determining relationship with conductivity
13 p2314 A69-28361
- Axisymmetric instabilities by Z-pinch and reverse axial current discharges in plasmas of arbitrary conductivity
13 p2315 A69-28449
- Plasma density and conductivity radio interferometry during ultrarapid disturbances based on electromagnetic wave phase shift dependence on density
14 p2498 A69-29803
- Density fluctuations effect on fully ionized plasma electrical conductivity in large or zero frequency external electric fields
14 p2502 A69-29990
- Conductivity tensor of collisional plasma in magnetic field, basing method on iterative procedure
14 p2503 A69-29999
- Electrical conductivity tensor of many component collisional relativistic plasma in magnetic field and near equilibrium, expressing collisional part as momentum integral
14 p2503 A69-30000
- Ion-acoustic oscillations effect on weakly ionized plasma electrical conductivity, using BGK collision integral model
15 p2662 A69-30970
- Air plasma electrical and thermal conductivity coefficients measured in wall stabilized DC arc at atmospheric pressure and high temperatures
15 p2663 A69-30979
- Current distribution and Hall voltage in crossed fields discharge with split electrodes in nonequilibrium Ar and Cs plasmas
15 p2663 A69-30980
- Geomagnetic ring current study, giving exact kinetic description based on Vlasov equation of plasma ring current in dipolar field
15 p2598 A69-31218
- Plasma conductivity measurements using RF induction probe
16 p2820 A69-31707
- Plasma cluster interaction with axially symmetric magnetic field, deriving plasma diamagnetic current, inductance and resistance from measured coil flux dependence on distance
16 p2823 A69-32365
- Raman scattering by coupled plasmon-cyclotron-harmonic modes in semiconducting plasmas in homogeneous static magnetic field
16 p2824 A69-32604
- Conducting fluid and plasma rotation between concentric cylinders due to crossed fields, determining velocity distribution, induced magnetic field and kinetic energy
[AIAA PAPER 69-726] 17 p3011 A69-33472
- Low density plasma electrical conductivity determined by temperature and electron density measurements, using Ohm law
18 p3181 A69-35072
- Scalar conductivity as governing parameter in determining current sheet diffusion and energy dissipation in MHD shock producing devices
21 p3776 A69-38708
- Nonlinear electron conductivity of Lorentz plasma subjected to frequency modulated electric field
21 p3778 A69-39573
- Inhomogeneous magnetically confined plasma stability, examining dissipative effects on spectra of drift oscillations with kinetic theory
01 p0126 A69-10187
- Transverse plasma velocity component effect on boundary layer structure between cold plasma and confined magnetic field
02 p0235 A69-11424
- Magnetic confinement of electric arc in alkali metal vapor containing gas flow, considering degree of ionization
02 p0286 A69-11585
- Statistical analysis of polarization of semiinfinite electron/ion plasma bounded by dielectric or conducting solid wall, deriving steady state and space potential
02 p0286 A69-11706
- General structure of magnetic surfaces of 3-turn helical magnetic field with axial current flow, noting closed magnetic trap production
02 p0288 A69-12168
- Ion cyclotron drift loss cone instability for cases of steep particle density gradients, magnetic field gradients and finite plasma dimensions
02 p0288 A69-12169
- Electromagnetic wave scattering by turbulent plasma pulsations in external magnetic field
02 p0289 A69-12174
- Anisotropic plasma cyclotron instability in magnetic trap with cold ion background and isotropic Maxwellian velocity distribution
02 p0292 A69-12554
- Plasma slab acceleration along magnetic dipole guard field null, noting lack of equilibrium and no decrease of plasma losses
03 p0475 A69-13157
- Critical pressure in mean magnetic well with closed lines, noting longitudinal resistivity annihilation of stabilizing effect of toroidal shear
03 p0476 A69-13382
- Plasma transverse injection into toroidal magnetic field created by linear current leads to plasma confinement along magnetic force lines
03 p0478 A69-13837
- Region of plasma electron capture during cyclotron electron resonance in magnetic trap with mirrors
03 p0478 A69-13849
- Monograph on electron waves and resonances in bounded plasmas covering theoretical and experimental methods, metallic and dielectric resonance probes, etc
04 p0633 A69-14296
- Min B magnetic trap, discussing induction coils, ponderomotive forces and mechanical stresses sustained by coils
04 p0634 A69-14299
- Magnetic field confinement of plasma produced by focusing Q switched laser output on solid deuterium pellet
05 p0798 A69-15585
- Fluctuations in multipole confined plasmas explained by solving general integral equation, yielding hydromagnetic and frequency modes
05 p0804 A69-16385
- Optimum magnetic field axial component and plasma gun discharge voltage for high velocity plasma injection into symmetrical cusp field
05 p0805 A69-16655
- Plasma confined in transverse magnetic field analyzed for drift rates, noting role of injection direction
06 p0963 A69-16907
- Hot plasma research at Polish Institute of Nuclear Research at Swierk
06 p0964 A69-17174
- Mathematical description of electromagnetic field containing plasma, discussing energy transfer modes between plasma and containing field
06 p0965 A69-17517
- Polynomial representations of mirror cusp fields produced by combination of mirror coils and Ioffe/multipole bars
06 p0966 A69-17522
- Plasma flute instability in magnetic trap with wall/plasma interface, using system of sensors and amplifiers
06 p0966 A69-17544
- Phase space concepts for beams, accelerators and confined particles, noting adiabatic invariants, phase space transformations, particle dynamics in accelerators and plasmas
06 p0966 A69-17673
- Theoretical population inversion in decaying nitrogen plasma column free from external fields and confined motionless in circular cylinder
[AIAA PAPER 69-48] 06 p0971 A69-18145
- Hot plasma containment by magnetic field, presenting results from stellarator for toroidal sheared magnetic field properties
07 p1190 A69-18929
- High density plasma dynamic stability in magnetic containment using variational calculations
08 p1359 A69-19984
- Nonlinear interaction of electromagnetic waves in bounded plasma, optimizing second order fields with reference to diagnostic applications
08 p1273 A69-20030
- Plasma lifetime in spherical multipole magnetic field trap compared to cusp trap
08 p1360 A69-20082
- Nuclear fusion reactor development, discussing magnetic field confinement of hot dense plasmas and electric power production economic possibilities
08 p1361 A69-20124
- Toroidal plasma nonequilibrium in multipole confinement devices with conventional magnetically shielded supports
08 p1369 A69-20819
- Magnetohydrostatic cavity formed round magnetic field of line dipole-line current combination by infinitely conducting plasma at uniform pressure
08 p1369 A69-20998
- Wave interaction in magnetically confined plasma taking into account body and surface waves
08 p1370 A69-21014
- Plasma flow motion and polarizing interaction in multipole magnetic field
08 p1370 A69-21015
- Arc jet generation and control noting application to hyperthermal aerospace environment studies, wind tunnels and materials heating and fabrication
08 p1371 A69-21128
- Electrostatic electron bombardment ion thruster with magnetoelectrostatically contained plasma
[AIAA PAPER 69-260] 09 p1567 A69-21262
- Lifetime and radial oscillations of magnetically confined laser produced plasma, solving hydrodynamical equations
09 p1545 A69-21493
- Discharge plasmas produced from solid materials at low pressures and temperatures and compressed against wall by magnetic field
09 p1547 A69-21594
- Warm plasma addition to mirror confined hot plasma stabilizing convective loss cone mode
09 p1551 A69-22040
- HF magnetic field effect on oscillations and instabilities of plasma confined by fixed magnetic field
10 p1739 A69-23623
- Nonlinear confining and deconfining forces of laser light interaction with inhomogeneous plasma, analyzing macroscopic motion based on ponderomotive force description
11 p1923 A69-24297
- Electric field fluctuations in inhomogeneous plasma calculated by test particle method, interpreting results in convective modes terms in plasma control and stability
11 p1924 A69-24301
- Electron confinement in magnetic mirror geometry supplemented with RF quasi-potential barriers, considering gas scattering
11 p1924 A69-24306
- Cesium plasma confinement time improvement in symmetrically heated tungsten end plates of Q machine
11 p1925 A69-24314
- Plasma confinement experiments with Tokamak type magnetic configuration device, giving schematics for thermonuclear reactor
11 p1927 A69-25099
- Spectrum space-time characteristics of electrically produced plasma discharge: magnetically compressed to discharge tube wall, using spectrochromograph and spectrographs
11 p1927 A69-25217
- Particle, momentum and heat balance of static and rotating magnetized plasmas in terms of macroscopic equations
11 p1928 A69-25248
- Neutron emission anisotropies in capacitor discharge produced plasma focus, detailing coaxial plasma gun energy spectrum and flux measurement
11 p1930 A69-25321
- LF electromagnetic waves stability and propagation conditions in plasma confined in central-conductor configuration measured, noting agreement with wave equation solution
11 p1931 A69-25362
- Current carrying inhomogeneous dense plasma instabilities confined in magnetic field, deriving dispersion relations in geometric optics approximation
11 p1932 A69-25537

PLASMA CONTROL

- Microinstabilities of plasma confined by magnetic trap, discussing stabilization, drift waves and anomalous diffusion of plasma by turbulence
01 p0125 A69-10048

Plasma flow from Penning discharge with incandescent cathode in vacuum controllable by varying voltage, pressure and magnetic field strength
11 p1933 A69-25543

Ionization instability in plasma enclosed by two infinitely segmented and ideally emitting electrode walls and two insulator walls
12 p2134 A69-26095

Charged particles influx from cusp shaped regions of stagnant plasma trapped in vicinity of two magnetic cusps on polar magnetopause
12 p2151 A69-26945

Plasma lens device for focusing ion or plasma beams with closed electron drift
13 p2307 A69-27658

Temperature effects on propagation of HF internal and surface waves in bounded plasma, deriving dispersion equations
14 p2410 A69-28733

Potassium plasma drift instability suppression by applied external HF electric field, noting plasma diffusion decrease toward container wall
14 p2489 A69-28740

Electrostatic screening in isothermal symmetrically charged and quasi-neutral plasmas, noting confinement in electrostatic trap
14 p2490 A69-29035

Electrodynamics law between current elements consistent with Newtonian dynamics, noting consequences in discharge and plasma control
14 p2485 A69-29320

Plasma scanner in obtaining current cross sections and current-voltage characteristics of hollow cathode magnetically confined arc plasma in argon
14 p2450 A69-29568

Anisotropic plasma cyclotron instability in magnetic trap with cold ion background and isotropic Maxwellian velocity distribution
15 p2658 A69-30251

Charged particle motion in magnetic mirror trap, observing time dependence with respect to orbital magnetic moment conservation
15 p2659 A69-30724

Wave regeneration by resonant particles interaction in inhomogeneous plasma of electrons confined in quadratic potential solved in WKB approximation
15 p2660 A69-30918

Hot electron plasma formation by injecting megaelectron volt ion beams followed by Lorentz trapping, noting advantages of DC operation
15 p2661 A69-30925

Interchange stability and drift motion of plasma with loss from ends of axisymmetric magnetic bottle, using hydromagnetic equations
15 p2664 A69-31100

Charged particle motion in superposed Heliotron and biconical cusp magnetic fields, considering particle confinement
16 p2817 A69-31643

One dimensional free expansion of collisionless plasma tested as function of thermal equilibrium and confinement, using Vlasov equations and computer
16 p2819 A69-31685

Multipole configuration toroidal plasma confinement device MHD equilibrium and stability from measured data
16 p2823 A69-32563

Electron beam injection into magnetic trap, obtaining plasma by ionization of supersonic argon flow passing through system
22 p3990 A69-40791

Bernstein modes initial value-boundary value problem for half space of plasma bounded by wall and parallel unperturbed magnetic field
23 p4196 A69-41875

Soviet high temperature plasma physics research, discussing magnetic plasma containment by Tokamak traps
23 p4196 A69-42167

Moving plasma partial capture in transverse magnetic field in experimental plasma source, noting influence of repulsion effect of plasma polarization volume charge
24 p4357 A69-43469

Drift characteristics of hydrogen plasma partially captured by transverse magnetic field, finding drift rate dependence on magnetic field level
24 p4357 A69-43470

PLASMA CYLINDERS

Electron plasma wave dispersion along cylindrical plasma column in magnetic field
01 p0126 A69-10277

Density gradient measurement method for plasma column with propagation and electric field perpendicular to external magnetic field
01 p0128 A69-10390

Electromagnetic waves propagation in cylindrical waveguide containing plasma column along axis in absence of constant magnetic field
02 p0285 A69-11463

Current carrying curved plasma column flute instability analysis, noting effect of increasing divergence from axial symmetry on Q values
02 p0289 A69-12175

Dispersion relations of axisymmetric and dipolar surface modes propagation along inhomogeneous plasma columns on dispersion relations
02 p0289 A69-12242

Plasma column density profile measurement by means of two resonant cavity modes for low pressure discharge in small diameter tubes
02 p0290 A69-12403

Electron radial distribution determination in positive Hg plasma column using simultaneous measurements with two different microwave cavities
02 p0290 A69-12404

Magnetic shear effect on stability of electron-neutral collision dominated plasma, noting helical perturbations onset
03 p0473 A69-12925

Helicon waves in nonresistive cylindrical and spherical plasmas
03 p0479 A69-13961

Pressure rise and thermal conductivity in cylindrical hydrogen plasma column in axial magnetic field, assuming local thermal equilibrium
03 p0479 A69-13967

Disintegration spectrum of Langmuir wave excited in plasma column by antenna, discussing conditions of resonance and parametric amplification
03 p0480 A69-14113

Ion and atom temperature distribution for two fluid model of Ar plasma in cylindrically symmetrical wall stabilized electric arc column
03 p0481 A69-14155

Absorption coefficients of plasmas in capillary discharge tubes, discussing measurement using gas laser light source
03 p0442 A69-14218

MHD instability in current discharges in magnetic field stabilized by current frequency modulation higher than perturbation increment of plasma column
04 p0635 A69-14549

Theoretical analysis of fixed stratification, taking into account nonlinear effects and variation in charged particle concentration along plasma column
04 p0636 A69-14783

Similarity law for ionization waves noting relations for frequency, wavelengths, amplification, propagation velocities and phase shifts
05 p0799 A69-15633

Similarity between characteristics of T layers in oxygen discharge positive column and Gunn instabilities in GaAs, noting role of negative O ions
05 p0800 A69-15739

Continuous radiation production in positive plasma column of inert gas considered as manifestation of plasma electrons bremsstrahlung from interaction with gas atoms
05 p0800 A69-15741

Equivalent circuit diagrams for impedance of plasma column in low current low pressure glow discharge
05 p0800 A69-15742

Mass spectrometric technique applied to positive column of hydrogen glow discharge for plasma properties, including relative densities of various hydrogen ions
05 p0802 A69-15913

Trapped mode wave propagation for cold uniform magnetoplasma cylinder in free space, studying dipole modes and one-wave approximation
06 p0967 A69-17756

Dispersion equation for dipolar surface waves in uniform cold lossless infinitely long magnetoplasma column in free space, obtaining numerical and asymptotic solutions
06 p0968 A69-17774

Surface wave propagation on circular plasma column moving in axial direction in free space region
06 p0968 A69-17775

Theoretical population inversion in decaying nitrogen plasma column free from external fields and confined motionless in circular cylinder
06 p0971 A69-18145

Microwave scattering by turbulent plasma column noting effects of plasma density
07 p1194 A69-19411

Cylindrical and spherical waves propagation in weakly inhomogeneous plasma treated by geometrical optics, noting caustic surfaces
07 p1195 A69-19747

Atomic flux from Cs and K ion recombination on hot end plates of Q machine measured, noting contribution to total plasma end loss rate
08 p1358 A69-19810

Positive column in longitudinal magnetic field in helium and neon, noting agreement with collision diffusion theory and Kadomtsev perturbation theory
08 p1361 A69-20212

Resonances in plasma column monitored by frequency and current modulation methods
08 p1365 A69-20552

Microwave scattering from longitudinal plasma waves propagating in collisionless plasma column
08 p1276 A69-20798

Plasma column of free burning electric arc, deriving temperature, electron concentration and electric field radial distributions
09 p1545 A69-21431

Electrons velocity-space instability in plasma column, analyzing unstable wave and dispersion characteristics
09 p1552 A69-22041

Slow electromagnetic wave propagation along cold collisionless cylindrical plasma in axial magnetic field, noting surface wave metamorphosis into bulk waves
10 p1739 A69-23659

Electromagnetic wave propagation along longitudinally magnetized plasma column surrounded by isotropic dielectric medium, without making quasi-static assumption
10 p1658 A69-24061

Coupling coefficient and impedance for excitation of isotropic plasma column by ring of magnetic current outside plasma, noting surface wave resonance effect
10 p1659 A69-24064

Electrostatic wave dispersion relation in uniformly rotating plasma cylinder used in interpreting Q machine experiments
11 p1924 A69-24300

Toroidal theta pinched plasma column collapse, using snowplow model for study of column position shift and cross section deformation
11 p1924 A69-24303

Tonks-Dattner resonances in plasma column, using linearized Vlasov equation for coupling to plasma waves of time varying electric fields
11 p1929 A69-25266

LF waves and instabilities on positive column in axial magnetic field, noting axisymmetric and asymmetric ion acoustic and electron wave modes and current convective instability
11 p1929 A69-25268

Centrifugal instability of plasma column generated by cyclotron absorption of microwave power in magnetic mirror field
11 p1931 A69-25366

Positive column contraction in Ar and Ar-Cs mixtures, developing theory for nonisothermal local collision arc
11 p1932 A69-25539

Microwave oscillations amplitude spatial distribution in gas discharge plasma excited by electron beam
11 p1933 A69-25542

Low power gradient uniform electric arc column in cross flow and transverse magnetic field, analyzing temperature, velocity, pressure and magnetic field distribution
11 p1933 A69-25556

Flute oscillation instability of dense plasma cylinder under nonuniform electric field, analyzing oscillation spectrum properties
11 p1934 A69-25707

Electromagnetic field penetration into plasma cylinder having electron mean free path comparable with plasma diameter, noting anomalous skin effect
12 p1233 A69-25833

Dynamic characteristics of plasma fluxes across magnetic field of diverter inside plasma cylinder formed during injection
12 p2134 A69-25977

Dynamic energy balance in positive column of electric arc, integrating expression to determine temperature time dependence
12 p2137 A69-26535

Surface dissipation effect induced by end electrodes on drift instabilities in cold ion plasma column described by differential equation with constant coefficient
12 p2138 A69-26710

Field patterns for wave radiation from electric dipole immersed in anisotropic plasma column excited by longitudinal DC magnetic field
12 p2034 A69-27103

Current carrying cylindrical plasma column oscillations surrounded by electric excitation with multiple feedback radio, discussing stabilization possibility
13 p2311 A69-28106

Convective-current instability in finite length plasma column, analyzing spectrum of unstable harmonics
13 p2314 A69-28441

Screw instability in glowing discharge plasma column in longitudinal magnetic field generalized to instabilities in low pressure arc, Penning and high current discharges
13 p2315 A69-28526

MHD waves and oscillations in cylindrical plasma column contained by longitudinal magnetic field, noting dispersion equations
14 p2489 A69-28732

Neutral gas pressure in positive column plasma between two coaxial insulated cylinders as function of cylinders radii
14 p2490 A69-29036

Balance equations for axial separation in anisothermal plasma columns with radial variation of neutral gas temperature applied to argon discharge with mercury vapor addition
14 p2493 A69-29690

Magnitude and type of wall losses from small opening in discharge tube for positive plasma column of low pressure glow discharge in hydrogen
14 p2493 A69-29691

Ionospheric inhomogeneity model for motion of infinite elliptical cylinder of cold plasma in neutral particle flow and ambient electrostatic and magnetostatic fields
14 p2500 A69-29864

Dynamic dispersion relation for bounded cylindrical beam plasma with temperature correction, including hot beam interaction
14 p2502 A69-29957

Calorimetric measurement of electron temperature in collisionless shock wave propagating in plasma column, discussing role of H beta line Stark broadening
15 p2657 A69-30104

Scattering by cylindrical post of complex permittivity /plasma/ in rectangular waveguide, calculating reflection, transmission and absorption coefficients by computer
16 p2756 A69-31578

Wide argon plasma column by axial current density measurements, confirming existence of instability and determining critical magnetic field
16 p2819 A69-31680

Electromagnetic wave diffraction in plasma cylinder of small nonuniform radius, analyzing interior field and radio wave reflection
16 p2751 A69-32031

Correlation coefficient of light fluctuations measured in Ar plasma in positive column of glow discharge, noting ionization wave appearance at critical gas pressure
16 p2822 A69-32039

Trapped modes in cold magnetoplasma slabs and rods in free space analyzed by Maxwell equation, assuming DC magnetic field and homogeneous electrons distribution
17 p2926 A69-33850

Microwave propagation inside hollow cylinder using model plasma as dielectric, deriving relationship between phase shift and free electron density
17 p2932 A69-34218

Microwave reflection and noise emission from cylindrical rare gas afterglow plasmas in axial magnetic field measured near electron cyclotron resonance
18 p3127 A69-34436

Anomalous absorption of electromagnetic wave in collisionless dense cylindrical plasma beam in circular waveguide, noting electric field strength for energy transfer
18 p3101 A69-34621

Scattering of electromagnetic waves obliquely incident on inhomogeneous plasma column of parabolic radial density distribution, noting applications to ionospheric irregularities
18 p3102 A69-34963

Plasma capture in stellarator diverter aperture with asynchronous plasma jets injection through diverter magnetic slots, discussing plasma cylinder density effect
21 p3776 A69-38585

Self induced magnetic field influence on plasma positive column stability in longitudinal magnetic field
24 p4356 A69-43366

PLASMA DECAY

Contact phenomena theory in decaying plasma applied to deionizing mercury vapor diode gas discharge plasma diagnostics
03 p0404 A69-13547

Plasma decay at high pressure in helium and argon with cesium vapor admixture and pure cesium vapor, using Saha equation
03 p0480 A69-14052

Time resolved electron number density and electron temperature in decaying plasma using laser interferometer
03 p0432 A69-14187

Double microwave interferometer for measuring hydrogen plasma decay
04 p0600 A69-15024

Theoretical population inversion in decaying nitrogen plasma column free from external fields and confined motionless in circular cylinder
[AIAA PAPER 69-48] 06 p0971 A69-18145

Nitrogen ion number density time dependence by mass spectrometric probing of decaying nitrogen plasmas, noting molecular ion production by colliding metastable nitrogen molecules
07 p1184 A69-19141

Free fall theory for afterglow decay of average electron density and temperature in pulsed cylindrical mercury vapor discharge plasma
08 p1358 A69-19811

Loss rate of plasma from stellarator due to binary Coulomb collisions scattering particles in loss region, discussing diffusion coefficients
08 p1364 A69-20520

Temperature dependence of dissociative recombination and molecular ion formation in decaying He, Ne and Ar plasmas in discharge tube energized with capacitor bank
08 p1356 A69-20741

Alfven oscillations in inhomogeneous decaying plasma from pulsed discharge with oscillating electrons
09 p1550 A69-22020

Plasma decay coefficient, charge recombination coefficient and electron scattering in cooling electron gas of quasi-steady cesium discharge plasma under high pressure
10 p1733 A69-23448

Flares development in form of loop tunnel, discussing role of filaments
11 p1945 A69-24238

Toroidal theta pinched plasma column collapse, using snowplow model for study of column position shift and cross section deformation
11 p1924 A69-24303

Collisional radiative electron-ion recombination rates measured in decaying rare gas plasmas produced by transient discharge
12 p2134 A69-25981

Alfven and slow and fast magnetoacoustic waves excited during decay instability of initial Alfven wave, noting dissipation effect on stability
14 p2489 A69-28735

Decaying arc discharge Cs plasma luminosity anomalous behavior due to combined effect of intrinsic monotonic and complex nonmonotonic emissions
14 p2490 A69-28996

Laser induced gas breakdown covering breakdown mechanism and plasma expansion and decay, with bibliography
17 p2980 A69-33026

Plasma decay at high pressure in helium and argon with cesium vapor admixture and pure cesium vapor, using Saha equation
18 p3181 A69-35045

Slot antenna radiation patterns in presence of aperture RF plasma breakdown sheath measured for various gas pressures and breakdown power levels
23 p4116 A69-41595

PLASMA DENSITY

Dense plasma with plasma frequency greater than cyclotron frequency, discussing flow past slender bodies
01 p0126 A69-10226

Plasma density dynamic measurements by Fabry-Perot microwave resonator, discussing resonator and coupling problems
01 p0080 A69-10318

Density gradient measurement method for plasma column with propagation and electric field perpendicular to external magnetic field
01 p0128 A69-10390

Dense plasmas produced by explosions of wires and mercury filaments, discussing plasma conductivities
01 p0128 A69-10391

Recombination reactions during postdischarge in helium plasma produced by laser beam, deriving equation for density evolution
01 p0128 A69-10394

Spectroscopic investigation of high density plasma from Li exploded wires
01 p0129 A69-10662

High temperature plasmas generation by exploding gold wires in vacuum, using time of flight technique for plasma densities and flow velocities
01 p0129 A69-10667

Relaxation processes and radiation stimulation in dense low temperature ionized plasma can lead to population inversion of several levels
01 p0131 A69-10789

End holes and glass tube effects in TM 010 mode measurements of average electron number density in cylindrical plasmas
01 p0131 A69-10812

Plasma wave properties relation to creation of electron plasma densities above critical density, discussing splitting of cold plasma resonance
01 p0131 A69-10818

Magnetospheric plasma distribution determination based on analysis of structured elements in micropulsations
01 p0076 A69-11229

Gaussian type microfield formation in plasma by placing constraints on plasma particles displacements
02 p0285 A69-11568

Screening of high density plasma from penetration by neutral gas, discussing prevention of high energy losses by charge exchange collisions
02 p0288 A69-12170

Barium plasma density measurements by Langmuir, microwave probes and resonance fluorescence scattering compared in Q device
02 p0288 A69-12172

Plasma column density profile measurement by means of two resonant cavity modes for low pressure discharge in small diameter tubes
02 p0290 A69-12403

Dense plasma temperature determination by gamma ray resonance scattering
02 p0291 A69-12481

Average plasma electron density measurement by feedback oscillator to determine dielectric constant
03 p0473 A69-13103

Electron fluid compression coefficient from simultaneous measurement and correlation of absolute magnitudes of ion acoustic wave potential and accompanying plasma density perturbation
03 p0475 A69-13148

Plasma density spatial distribution determined from HF electromagnetic wave phase shifts without assuming axisymmetry
03 p0480 A69-14138

Charged particle density of unsteady plasma from Stark broadening of Balmer H beta line, using time scanning image converter
03 p0481 A69-14145

HF gas discharges, discussing plasma temperature and density, plasmoid length and spectroscopic applications
03 p0482 A69-14217

Dense plasma radiation, analyzing spectrographically initial stages of wire explosion in vacuum
03 p0482 A69-14227

HF interaction of relativistic electron beam and plasma extended to include arbitrary variation of plasma density
04 p0637 A69-15046

Nondegenerate dense plasma thermodynamic stability by nonclassical methods, discussing atomic concentration dependence on ionic concentration
05 p0802 A69-15892

Langmuir probe to determine helium plasma density effect on electron temperature from relation between spectral line intensities
05 p0804 A69-16376

Theta pinch plasma electron density and temperature distributions measured using Thompson scattering of laser light and plasma bremsstrahlung
06 p0972 A69-18220

Plasma diagnostics using scattering of laser electromagnetic radiation by plasma density function, discussing plasma species collision effect on line profiles
07 p1131 A69-18485

Plasma column radial density profile measurement by electron plasma waves propagation in presence of strong magnetic field
07 p1194 A69-19323

Microwave scattering by turbulent plasma column noting effects of plasma density
07 p1194 A69-19411

Rarefied plasma self similar motion qualitatively analyzed, particularly penetration and expansion, taking into account electric/magnetic field effects
08 p1359 A69-19951

High density plasma dynamic stability in magnetic containment using variational calculations
08 p1359 A69-19984

Highly ionized low density plasmas production by strong UV radiation
08 p1360 A69-20080

Current fluctuations in Langmuir probe in turbulent plasma measured for various pressures, frequency bands, etc, noting plasma density fluctuations role
08 p1364 A69-20517

Warm plasma magnetic interactions, discussing density waves, pair correlation function and transport coefficients
08 p1366 A69-20749

Symmetric Alfvén waves propagation in hydrogen plasma with nonuniform density distribution, deriving dispersion relations for fully ionized plasma
08 p1367 A69-20794

Plasma oscillation modes perpendicular to magnetic field used to study energy conversion by wave coupling across density discontinuity
08 p1367 A69-20795

Flute instabilities in rarefied plasma with intrinsic electric field, discussing plasma density profile and uncompensation degree effects on plasma magnetic field stability
08 p1370 A69-21013

High temperature high density theta-pinch plasma refraction measurements by interference refractometer with beam perpendicular to plasma axis
09 p1544 A69-21302

Dispersion corrected three wavelength laser heterodyne system for plasma electron density and neutral density measurements
09 p1544 A69-21331

Mariner 2 data on large scale variations in magnetic field, solar wind density and temperature in interplanetary plasma
09 p1592 A69-21540

Equilibration potentials between dense thrust beam and dilute space plasma measured in wind tunnel [AIAA PAPER 69-263]
09 p1568 A69-21728

Time dependent plasma density variations studies by microwave interferometer having reflector for modulated or nonmodulated microwaves
09 p1496 A69-22030

Refraction errors in plasma density measurement by microwave interferometry
09 p1496 A69-22031

High density plasma in resonant cavity obtained by frequency shifting power source
10 p1727 A69-22955

Pressure and temperature effects on electrical conductivity of dense plasma ejected from Laval nozzle
10 p1739 A69-23492

Properties of superdense NaCl plasmas as model working substance for MHD generator, discussing ion concentration and collisions, charge reversal and conductivities
10 p1739 A69-23493

Thermodynamic stability of dense plasma consisting of electrons and charged ions, plotting ionization potential as function of electron density and temperature
11 p1922 A69-24232

Spectral broadening measurements of ruby laser light scattered by density fluctuations in theta pinch plasma
11 p1924 A69-24304

External modulated currents induced electromagnetic field effect on density distribution of bounded plasma, discussing fluctuations in various configurations
11 p1927 A69-24910

Dense gas equilibrium plasma thermodynamic stability in case of high electrostatic interaction energy of charged particles, analyzing phase transition possibility
11 p1928 A69-25234

Anisotropic plasma density measurement by launching circularly polarized plane electromagnetic wave at small angles to magnetic field direction
11 p1930 A69-25286

Ruby laser light scattered at 90 degrees by dense plasma focus, analyzing signal detection
11 p1899 A69-25324

Critical condition for electromagnetic radiation generation by energetic electrons gyrating in dense

magnetized plasma, proposing plasma instability mechanism
11 p1931 A69-25363

Temperatures and densities of atoms and electrons from spectroscopic methods in gas discharge plasma used for CW ion-argon lasers, evaluating inversion mechanism
12 p2106 A69-26319

Dense plasma flow across transverse inhomogeneous magnetic field, proving adiabatic nature of motion
12 p2137 A69-26528

Optical and spectral properties of dense plasma expanding after exploding electric wire in vacuum using high speed photography
12 p2137 A69-26533

Isoperimetric plasma thermodynamics problems, including plasma free energy and relativistic plasma density fluctuations energy
12 p2138 A69-26603

Population densities, pumping rates, lifetimes, etc, of singly ionized krypton ion laser
12 p2109 A69-26638

Ionospheric plasma density vertical profile by measuring reflected radio waves phase frequency characteristics
12 p2070 A69-26685

Soviet book on plasma thermionic energy conversion covering operation modes, transport processes, current-voltage characteristics, density, temperature, electric field distribution
12 p2017 A69-26850

Carbon dioxide laser as light source in Michelson interferometer for plasma electron density measurement
12 p2100 A69-27177

Alternating electric field parametric effects on inhomogeneous plasma in magnetic field, obtaining electrostatic wave coupling dispersion relation by density gradients considerations
13 p2304 A69-27298

Magnetic curvature effect on collisionless plasma density gradient drift instabilities, covering mean ion larmor radius and Alfvén modes
13 p2305 A69-27375

Stable geomagnetic pulsations related to plasma density shock position in magnetosphere and to magnitude of diurnal variations
13 p2253 A69-27692

Spatial density distribution and local values of attenuation of pulsed reflex discharge plasma determined from measured attenuation of microwave beam
13 p2312 A69-28112

Collective scattering of light from ruby laser by cold dense deuterium plasma produced by electrical discharge, deducing density and electron temperature
13 p2273 A69-28366

Laser radiation absorption in xenon plasma, noting dependence on intensity due to atoms ionization
13 p2314 A69-28442

Voltage drop of ignited mode related to current density in cesium diode, noting plasma zones
14 p2401 A69-29232

Probe and spectroscopic study of dense plasma thermionic converters noting parameters
14 p2404 A69-29256

Plasma potential and density distribution in near-electrode plasma sheath of thermionic converter
14 p2491 A69-29257

Nonlinear generation of sum and difference frequencies in ionized plasma current densities by nonuniform microwave fields noting electron scattering
14 p2507 A69-29350

Multiple scattering of electromagnetic waves in underdense plasma, deriving transport equation for radar backscatter
14 p2412 A69-29453

Polychromator measurement of hydrogen plasma electron density produced by normal ionizing shock wave, using Stark broadening study of H beta line
14 p2494 A69-29767

High speed streak cameras applicability to low density theta pinch studies, describing image converters design, operation and block diagrams
14 p2496 A69-29787

Stark effect applicability to charged particle concentration in nonstationary plasma
14 p2497 A69-29790

Spatial distribution of plasma density from phase shift measurement in millimeter waves based on microwave multichannel probes
14 p2497 A69-29792

Multifrequency interferometer for inhomogeneous plasma density soundings
14 p2497 A69-29795

Plasma density and conductivity radio interferometry during ultrarapid disturbances based on electromagnetic wave phase shift dependence on density
14 p2498 A69-29803

Plasma ion temperature measurement based on integral neutron yield, noting density determination
14 p2498 A69-29808

Relativistic corrections to particle distribution functions for high temperature plasma in thermodynamic equilibrium by integrating Gibbs distribution
14 p2499 A69-29847

Density fluctuations effect on fully ionized plasma electrical conductivity in large or zero frequency external electric fields
14 p2502 A69-29990

Sc X-1 fluctuating optical and X ray emission observed simultaneously, determining total energy flux and plasma radius and density
15 p2676 A69-30885

Te waves propagation along plasma sheet between conducting plates, determining vertical plasma density distribution
15 p2569 A69-30939

High beta theta pinch stability against tearing modes, determining necessary magnetic field conditions for slab and cylindrical cases
16 p2819 A69-31681

Temperature gradients effect on ion flute mode in low beta plasma having density gradients in x direction, obtaining instability condition
16 p2819 A69-31689

Holographical interferometry with laser spark radiation containing fundamental and second harmonic wavelengths, confirming heavy particle densities decrease in plasma with time
16 p2789 A69-31771

Mariner 2 data on large scale variations in magnetic field, solar wind density and temperature in interplanetary plasma
16 p2864 A69-32535

Magnetized solar wind model to evaluate temperature, density, velocity and magnetic field for various boundary conditions
17 p3041 A69-33812

Wave propagation in plasma filled cylindrical waveguide in axial magnetic field, approximating plasma density profile by WKB method
17 p2926 A69-33848

Artificial plasma properties at microwave frequencies, determining plasma electron density and effects on horn antenna radiation characteristics
18 p3100 A69-34271

High electron density in transient mercury vapor plasma determined using He-Ne laser interferometer measurements
18 p3153 A69-35307

Plasma density and potential distributions along circular cylinder surface in weakly ionized high speed low pressure gas flow, noting boundary layer separation point
19 p3380 A69-35839

Plasma density in magnetosphere by measuring geomagnetic pi 2 micropulsations in direction related to polar aurora oval southern boundary, determining period of pi 2 oscillations
19 p3303 A69-36205

Plasma concentration in nondipole magnetosphere model from pc 5 pulsations periods for high geomagnetic latitudes, noting solar winds effect
20 p3521 A69-37043

Mathematical model of nonlinear microwave breakdown for overdense and underdense plasma outside reentry vehicle, predicting nonlinear pulse transmission through high temperature plasma
20 p3495 A69-37853

Relaxation processes and radiation stimulation in dense low temperature ionized plasma leading to population inversion of several levels
20 p3582 A69-38006

Equatorial plasma sheet role in magnetotail assessed from Vela satellite data, noting diurnal density variations
21 p3711 A69-38512

Plasma capture in stellarator diverter aperture with asynchronous plasma jets injection through diverter magnetic slots, discussing plasma cylinder density effect
21 p3776 A69-38585

Parameters of DC discharge between concentric cylinders calculated for plasma probes by pressure theory, noting ion neutral collisions and magnetic field effects
21 p3776 A69-38712

- Microwave power coupling to high density plasmas for electrons heating, using dielectric plates
21 p3779 A69-39746
- Birefringent element within Fabry-Perot cavity for identification of direction of electron density change in z-pinch discharge
22 p3946 A69-40438
- Coherent MHD waves propagation in presence of plasma density fluctuations, applying perturbation technique to solve stochastic wave equation
22 p3990 A69-40529
- Rocket measurements of plasma densities and temperatures in visual aurora using electrostatic onboard and ejected Langmuir probes, observing hyperthermal electron
23 p4167 A69-42334
- Measurement method for relative phase shift between density and potential oscillations in Cs plasma
24 p4354 A69-42676
- Hydrogen plasmoids in axisymmetric magnetic field with acute angle geometry produced by opposing coils, measuring induction current field and plasmoid density distribution
24 p4358 A69-43473
- PLASMA DIAGNOSTICS**
- RF characteristics of electrodes immersed in magnetoplasma, discussing potential distribution around point charge and RF probe measurement of plasma parameters
01 p0029 A69-10550
- Time resolved spectroscopy of exploding wire plasmas in visible spectrum of various elements, determining plasma characteristics
01 p0119 A69-10671
- Power spectrum for energy transfer region in HF turbulent plasma by nonlinear equations, with results applied to subsonic ray acceleration
01 p0145 A69-10790
- End holes and glass tube effects in TM 010 mode measurements of average electron number density in cylindrical plasmas
01 p0131 A69-10812
- Rapid scan spectrometer design and calibration, noting application to diagnostics of high density transient Xe and H plasmas
01 p0082 A69-10838
- Soviet book on high temperature plasma diagnostics methods covering measurement errors, holographic interferometers and light scattering
01 p0132 A69-11199
- Electron distribution function of isotropic homogeneous Lorentzian plasma subjected to frequency modulated electric field calculated by successive approximation method
02 p0285 A69-11543
- Alkali metal quadrupole spectral doublets used as diagnostic for determining alkali-metal plasma electron temperature
02 p0286 A69-11584
- Lithium hydride microplasma expansion in vacuum using charge collectors, time of flight detectors and spectroscopy of light emission
02 p0286 A69-11704
- Statistical analysis of polarization of two component nonisothermal electron-ion Coulomb gas plasma containing microflukes
02 p0286 A69-11707
- Barium plasma density measurements by Langmuir, microwave probes and resonance fluorescence scattering compared in Q device
02 p0288 A69-12172
- Plasma physics experiments and theoretical studies, discussing plasma heating by magnetic compression and irreversible expansion, Cs plasmas, plasma diagnostics, etc
02 p0289 A69-12200
- Electron density measurement technique for dense thick steady state plasmas using swept microwave interferometer
02 p0290 A69-12349
- Plasma column density profile measurement by means of two resonant cavity modes for low pressure discharge in small diameter tubes
02 p0290 A69-12403
- Critical values of laser formed solid angle determined in plasma diagnostics of scattering spectrum density distribution
02 p0251 A69-12416
- Dense plasma temperature determination by gamma ray resonance scattering
02 p0291 A69-12481
- Plasma diagnostics in magnetic field with thin cylindrical probe based on Langmuir method
02 p0292 A69-12556
- Average plasma electron density measurement by feedback oscillator to determine dielectric constant
03 p0473 A69-13103
- Scattering of energetic charged particles in weakly unstable plasma for integrated spectrum of plasma electric field autocorrelation function
03 p0475 A69-13151
- Contact phenomena theory in decaying plasma applied to deionizing mercury vapor diode gas discharge plasma diagnostics
03 p0404 A69-13547
- Electromagnetic properties of bounded isotropic plasma in kinetic approximation
03 p0477 A69-13712
- Space charge plasma acceleration in axially nonuniform magnetic field
03 p0477 A69-13760
- Electric potential distribution in coaxial quasi-stationary plasma injector
03 p0478 A69-13838
- Electron emission from metal foils used to study lifetime, concentration and mean ion energy of hot plasma
03 p0481 A69-14211
- Absorption coefficients of plasmas in capillary discharge tubes, discussing measurement using gas laser light source
03 p0442 A69-14218
- Wave number frequency dependent spectral function and space-time correlation function in turbulent plasma, noting utility for probes and scattering analysis
03 p0483 A69-14255
- Radial profile measurement technique for individual emission line intensities in plasma applied to populations of excited atomic and ionic Ar in capillary discharges
04 p0634 A69-14441
- Microwave Fabry-Perot resonator for anisotropic plasma diagnostics in presence of static magnetic field
04 p0635 A69-14757
- Diagnostic techniques for high speed low density DVL plasma wind tunnel noting problems of pressure, temperature, hot-wire and calorimetric measurements [DVL-849]
04 p0584 A69-14823
- Ultrahigh speed holographic interferometry for studying plasmas produced by focused laser beam, noting electron density evolution in deuterium plasma
05 p0760 A69-15587
- Electron density measurement in rapidly varying plasma, using improved Mach-Zehnder interferometer
05 p0760 A69-15613
- Plasma refractive index determination by holographic interferometry with double pulse ruby laser
05 p0761 A69-15620
- Electrical properties of xenon pulse plasmas with high power dissipation, measuring discharge pressure and radiation distribution as function of voltage drop
05 p0801 A69-15746
- Microchemical analysis for diffusion measurement of laser produced lithium plasma in uniform magnetic field
05 p0762 A69-15960
- Low dispersion spectrograph for temperature and electron density determination in plasma beam
05 p0803 A69-15997
- Time resolved measurements, microwave interferometer and pulsed double probe for studying collision dominated plasma expansion in inductive HF He discharge
05 p0804 A69-16535
- Formulas describing reflection and transmission coefficients of plasma for plane electromagnetic wave, using Maxwell equations in variable medium
05 p0805 A69-16608
- Plasma characteristics in thermionic converter operating under low voltage arc conditions obtained by computer, probes and spectral techniques
06 p0963 A69-16910
- Electron concentration in pulsed plasma measured with Fabry-Perot interferometer and laser radiation source
06 p0963 A69-16911
- Coupled cavity carbon dioxide laser interferometer with feedback for measurement of transient plasma density in theta pinch, noting sensitivity
06 p0935 A69-17706
- Probe noise in quiescent plasmas investigated using back diffusion type discharge tubes producing low density plasmas and positive plasma columns
06 p0967 A69-17715
- Plasma diagnostics using scattering of laser electromagnetic radiation by plasma density function, discussing plasma species collision effect on line profiles
07 p1131 A69-18485
- Focused electromagnetic beam interferometers and antenna parameters for measuring electron density in plasma diagnostics
07 p1132 A69-18865
- Photoionization cross section measurements for sodium line by analyzing electron-ion recombination radiation from sodium seeded plasma, determining electron temperatures and concentrations
07 p1184 A69-19164
- Franck-Condon factors for high rotational levels of nitrogen calculated in Morse potential approximation for application to plasma diagnostics
07 p1185 A69-19169
- Argon plasma characteristics calculated from 8 mm interferometer data, interpreting transmission coefficients of dielectric film with permittivity gradient
07 p1194 A69-19324
- Complex transmission and reflection coefficients of dielectric film with permittivity gradient computed by modified Runga-Kutta method, noting plasma diagnostics application
07 p1194 A69-19334
- Plasma electron density and collision frequency determination, using CW maser interferometer
08 p1359 A69-19987
- Nonlinear interaction of electromagnetic waves in bounded plasma, optimizing second order fields with reference to diagnostic applications
08 p1273 A69-20030
- Axial striograms of noncylindrical focusing discharge for plasma structure in front of interior electrode of coaxial gun
08 p1362 A69-20279
- Collection of papers on plasma diagnostics
08 p1363 A69-20462
- Thermal and nonthermal radiation of hot gases using spectroscopic plasma diagnostics
08 p1363 A69-20463
- Quantitative spectroscopy methods for determining data on chemical constitution of plasmas, treating optically thin LTE plasmas
08 p1363 A69-20465
- Spectroscopic diagnostics for determining temperatures, electron densities and line shapes in optically thick plasmas
08 p1363 A69-20466
- Plasma diagnostics in X ray region, determining electron and ion temperatures and densities and energy losses by radiation
08 p1315 A69-20469
- Microwave plasma diagnostics, discussing electromagnetic radiation and wave propagation measurements
08 p1316 A69-20470
- Plasma diagnostics by use of lasers, discussing Thomson scattering and problems arising from light scattering applications
08 p1326 A69-20471
- Spatial distribution and temporal variation measurements of magnetic fields in plasma, emphasizing pulsed discharges
08 p1364 A69-20472
- Spacecraft applications of Langmuir probes, obtaining data from current-voltage characteristics for electron/ion concentrations, ion mass spectra and charged particle energy distribution
08 p1316 A69-20474
- Mass spectrometer application to plasma diagnostics, discussing mass spectra, particle extraction, low and high pressure discharges, supersonic flow, ion detection methods, etc
08 p1316 A69-20475
- Plasma diagnostics methods for evaluating collision and transport cross sections, discussing resonance fluorescence, steady state discharge and afterglow measurements
08 p1364 A69-20476
- Evaluation methods for DC electrical conductivity, heat conductivity and viscosity in plasmas
08 p1364 A69-20477
- Ar-H plasma arc radial temperature distribution determined by photoelectric spectroscopy in visible range
08 p1366 A69-20758
- Fluid equations for collisionless plasma including finite ion Larmor radius and finite beta effects
08 p1368 A69-20802
- SERT 2 mercury vapor fed hollow cathode operated in bell jar, determining volt-ampere characteristics and flow rates for plasma diagnostics [AIAA PAPER 69-258]
09 p1561 A69-21221
- Moderately ionized plasma electrical conductivity calculated by generalized Ohm law and measured along with other plasma properties [AIAA PAPER 69-277]
09 p1543 A69-21264

Electron multiplication during ionized H plasma exposure to annular electric field and magnetic field, including microwave diagnostics

09 p1543 A69-21299

High temperature high density theta-pinch plasma refraction measurements by interference refractometer with beam perpendicular to plasma axis

09 p1544 A69-21302

Dispersion corrected three wavelength laser heterodyne system for plasma electron density and neutral density measurements

09 p1544 A69-21331

Dominant ionic species in cesium plasma through mass spectrometer analysis, measuring total ion and electron currents

09 p1544 A69-21335

Low current arc discharge plasma diagnostics by light probe, analyzing deviation of resonance level population from equilibrium described by Saha equation

09 p1546 A69-21586

Diagnostic techniques to identify flow regimes of high enthalpy shock tunnel
[AIAA PAPER 68-729]

09 p1477 A69-21970

Electron concentration at front of anisotropic plasma expanding in axial direction in electrodeless induction discharge from measurements of reflected microwaves

09 p1550 A69-22027

Temperature pulsations radial distribution in plasma jet using plasmatron without mixing chamber

10 p1729 A69-23432

Electron density and collision frequency of MHD plasma determined directly by measuring phase shift and attenuation of propagating laser microwave signal

10 p1731 A69-23436

Interplanetary plasma subsequent to July 7, 1966 flare monitored by detectors on Pioneer 6 and Explorer 33

10 p1783 A69-23775

Laser applications to high temperature, gas dynamical and plasma phenomena

10 p1741 A69-23809

Heat propagation in discharge plasma heated by magnetosonic wave, constructing transverse temperature profile

10 p1741 A69-23896

Plasma concentration diagnostics in magnetosphere based on hydromagnetic whistlers/pearls dispersion

10 p1688 A69-23934

Ion and electron temperature and density measurement by Thomson scattering with low resolution monochromator for Salpeter parameter near unity

11 p1925 A69-24310

Plasma microwave diagnostics by multifrequency probes in geometric optics approximation, assuming inhomogeneous and semiinfinite plasmas with sharp boundaries and nonunity permittivities

11 p1926 A69-24602

Pulsed laser holography for recording interferograms of laser created plasma, discussing laser source properties, spatial and spectral coherence, double pulse mode, etc

11 p1895 A69-24683

Electrostatic probe measurements in gas warmer than probe, demonstrating applicability of continuum theory for highly negative probe

11 p1930 A69-25274

Positive column contraction in Ar and Ar-Cs mixtures, developing theory for nonisothermal local collision arc

11 p1932 A69-25539

Current increase and voltage decrease in high voltage low pressure Penning discharge ascribed to hollow cathode effect

11 p1933 A69-25544

Ar plasma diagnostics in pinch-discharge laser, determining electron temperature by spectroscopy and measuring plasma conductivity and ion concentration and temperature

11 p1933 A69-25548

High temperature plasma quasi-classical pseudopotential, binary function and free energy derived, using displacement and collective variable methods

11 p1934 A69-25701

Optical diagnostics methods for fast processes in rarefied plasma, using Michelson interferometers with ruby and Nd lasers as light sources

12 p2089 A69-26186

Plasma instability in magnetic and HF electric fields, observing aperiodic short wave and oscillatory instabilities

12 p2136 A69-26526

Low pressure arc discharge plasma, studying ion-acoustic oscillations development in magnetic field

12 p2136 A69-26527

Dense plasma flow across transverse inhomogeneous magnetic field, proving adiabatic nature of motion

12 p2137 A69-26528

Plasma-electron beam interaction induced HF oscillations, obtaining nearly noise free oscillations

12 p2137 A69-26529

Multi-electrode plasma probe with potential negative with respect to plasma, noting effect of microoptical features of probe on accuracy of I-V measurements

12 p2138 A69-26538

Multi-electrode probe performance in plasma diagnostics, considering effects of plasma pressure, probe geometry and space charge on current-voltage characteristics

12 p2138 A69-26539

Holographic plasma diagnostics covering phase, amplitude variations images, laser spark, theta pinch studies, etc

12 p2094 A69-26707

Plasma properties when carrying periodic magnetoacoustic wave expressed in terms of periodic functions, discussing small perturbation propagation

12 p2138 A69-26708

Solar wind plasma observations in geomagnetospheric wake compared at 1000 and 500 earth radii, considering ion energy spectra and geomagnetic tail

12 p2151 A69-26943

High pressure arc discharge diagnostics with spectroscopic method relating spectral profiles to central temperature, pressure and temperature distribution

12 p2094 A69-26968

Input impedance of quarter wavelength antenna in anisotropic plasma, discussing plasma parameters role and use of probe antenna in plasma diagnostics

12 p2044 A69-27071

Soviet book on microwave methods of plasma investigation based on electromagnetic wave interaction, covering microwave probes and plasma radiation

12 p2139 A69-27073

Soviet monograph on plasma diagnostics by lasers, describing interferometry, optical field visualization, schlieren and shadow photography

12 p2139 A69-27075

Parameter measurement technique for low pressure helical pulse plasma discharges, determining spatial distribution of HF electric and magnetic fields and current density

12 p2140 A69-27124

Field distribution in HF flame discharges by measuring electrical and geometrical parameters of discharge channel

12 p2140 A69-27128

Carbon dioxide laser as light source in Michelson interferometer for plasma electron density measurement

12 p2100 A69-27177

Inhomogeneous and anisotropic cold plasma filled plane capacitor resonance in steady magnetic field applied to plasma diagnostics, using calculus of variations

13 p2304 A69-27240

Optical maser induced electrical breakdown interaction with superhigh pressure ionized gases, using optical interferometry and holography

13 p2273 A69-28464

Electric field frequency effect on cyclotron resonance during gas discharge, establishing causes of discrepancy between theory and experiments

13 p2315 A69-28577

Solar wind quiet state thermal properties and chemical composition compared with coronal expansion hydrodynamic model predictions

14 p2513 A69-29098

RF impedance method for electron density and collision frequency in plasma

14 p2492 A69-29352

Plasma scanner in obtaining current cross sections and current-voltage characteristics of hollow cathode magnetically confined arc plasma in argon

14 p2450 A69-29568

Electron density, temperature and dimensions of helium breakdown induced by Q switched ruby laser beam as function of space and time

14 p2492 A69-29636

Balance equations for axial separation in anisothermic plasma columns with radial variation of neutral gas temperature applied to argon discharge with mercury vapor addition

14 p2493 A69-29690

Soviet papers on plasma diagnostics covering optical, microwave, corpuscular, correlation and bolometric methods

14 p2494 A69-29775

Michelson interferometers with large interference fields for plasma diagnostics emphasizing structural rigidity, monochromatic light pulse power, instruments vibrations resistance, etc

14 p2496 A69-29776

Fabry-Perot interferometer for studying spatial distribution of plasma electron concentration, discussing resolution using solid state gas laser light source

14 p2451 A69-29777

Laser spark plasma initial development phase showing high electron temperature and concentration, continuous spectrum emission, line broadening and shock wave formation

14 p2461 A69-29777

Helium plasma electron temperature and concentration measured in arc in magnetic field by laser light scattering at electrons

14 p2496 A69-29780

Plasma diagnostics facilities design, circuit diagrams and operation based on Q switched ruby laser and optical recording system

14 p2461 A69-29782

Plasma electron temperatures from electron bremsstrahlung spectra measurements in X ray region

14 p2496 A69-29783

High speed photographs of plasma emission spectra in UV and soft X radiation spectrum regions, discussing theory, design and operation of facilities

14 p2496 A69-29784

Electron temperature and concentration in plasma determined by measuring diamagnetic signal and IR radiation intensity, emphasizing usefulness in plasmoid head portion

14 p2496 A69-29785

Millimeter and submillimeter microwave spectrometric studies of high temperature plasmas and noise emission, discussing instrumentation and absolute measurements

14 p2451 A69-29786

Plasma surface HF harmonic oscillations amplitude determined by comparing side frequencies intensities of reflected microwave signal

14 p2497 A69-29794

Plasma electron density measurement from phase shifts of electromagnetic wave groups propagation

14 p2497 A69-29796

Plasma diagnostics FM phase meter circuits tests, considering raster phase indicators, phase detectors and frequency integrators

14 p2497 A69-29797

Design and operation of two frequency phase meter for plasma diagnostics, using frequency modulation of microwave oscillator and waveguide bridge

14 p2451 A69-29798

Microwave interferometer with digital-logic elements for phase shift measurements in pulsed plasmas without frequency range limitations

14 p2452 A69-29802

Direct phase measuring and measured phase compensating microwave devices designed for plasma diagnostics applications

14 p2452 A69-29804

Phase measurements at IF in microwave plasma diagnostics, examining phase stabilization processes

14 p2452 A69-29805

Three component fast neutral beam for hydrogen plasma ion density and electron temperature determination, improving accuracy and reliability

14 p2452 A69-29812

Time of flight mass spectrometers for plasmoids generated by theta pinch and discharge over organic glass, showing ion and electron currents oscillograms

14 p2498 A69-29813

Bibliography on laser applications in plasma physics covering plasma diagnostics and production

14 p2498 A69-29842

Electron densities measurement in plasmas in magnetic fields from profiles of spectral lines, noting Stark and Zeeman effect

15 p2657 A69-30027

Calorimetric measurement of electron temperature in collisionless shock wave propagating in plasma column, discussing role of H beta line Stark broadening

15 p2657 A69-30104

Plasma diagnostics in magnetic field with thin cylindrical probe based on Langmuir method

15 p2658 A69-30253

Electronic density of collisional cesium plasma, comparing measurements made by Langmuir and HF spherical probes

15 p2659 A69-30300

Steady state solutions for parametric excitations in various limits in plasmas, allowing for higher order mode coupling

15 p2661 A69-30919

Recording arrangement aperture effect on plasma scattering spectrum during plasma parameter determination by light scattering technique
15 p2664 A69-30996

Scattering of line focused electromagnetic waves by infinite cylinders obtained by modification of plane wave theory
15 p2664 A69-31478

Boltzmann equation for Lorentzian plasma in elliptic magnetic field solved by expanding distribution function in Legendre polynomials
17 p3009 A69-32827

Langmuir probe to determine space vehicle orientation in ionospheric or interplanetary plasma, discussing apparatus, accuracy and application
17 p3001 A69-33222

Test apparatus for determining radiative properties of Ar plasma as function of high temperature and pressure
[AIAA PAPER 69-601] 17 p3010 A69-33310

He-Ne laser plasma behavior, establishing parameters for electron gas, cross sections of formation and annihilation and excited states lifetimes
17 p2982 A69-33390

Collisionless cylindrical Langmuir probe response in turbulent plasma for mean and statistical properties
[AIAA PAPER 69-698] 17 p3010 A69-33438

RF high pressure plasma discharges contained within radial inflow vortex, measuring radiation efficiencies, power densities and radiation fluxes
[AIAA PAPER 69-695] 17 p3010 A69-33442

Collision free earth shock wave gross and fine structure deduced from OGO 5 plasma diagnostics
[AIAA PAPER 69-676] 17 p2961 A69-33452

VLF and ULF whistler propagation in magnetosphere for remote sensing magnetospheric plasma parameters, exhibiting characteristic patterns and interaction with plasma
17 p2962 A69-33712

Collisionless shock wave structure in plasmas, noting plasma and shock wave generation mechanisms
17 p3013 A69-33822

Trapped modes in cold magnetoplasma slabs and rods in free space analyzed by Maxwell equation, assuming DC magnetic field and homogeneous electrons distribution
17 p2926 A69-33850

Artificial plasma properties at microwave frequencies, determining plasma electron density and effects on horn antenna radiation characteristics
18 p3100 A69-34271

Plasma parameters relationship with double electrostatic probe volt-ampere characteristics, applying corrected formulas for temperature, ion density, etc., to flame diagnostics
18 p3137 A69-34932

Atmospheric whistlers and ion acoustic waves interaction in nonisothermal plasma, determining damping frequencies, decrements and wave polarization
18 p3180 A69-35024

Power spectrum for energy transfer region in HF turbulent plasma by nonlinear equations, with results applied to subcosmic ray acceleration
20 p3591 A69-38008

Parameters of DC discharge between concentric cylinders calculated for plasma probes by pressure theory, noting ion neutral collisions and magnetic field effects
21 p3776 A69-38712

Negative ion concentrations in plasma by flash photodissociation, using Q switched laser for irradiation
21 p3778 A69-39574

Magnetoplasma with Maxwellian velocity distribution, investigating quantitatively longitudinal dielectric function
22 p3988 A69-40066

Boltzmann equation analysis used to study near surface electron temperature for weakly ionized plasmas, showing nonequilibrium absorption layer governing electron temperature profile
22 p3989 A69-40528

Density, ion temperature, electron temperature and ion drifts in Ba or Ba doped plasmas determined by resonance fluorescence and optical pumping
22 p3962 A69-40532

Multifrequency dispersion interferometers applicability in plasma diagnostics, considering integral electron concentration measurements
22 p3947 A69-40959

Coupled set of differential equations describing generalized Volterra problem of conflicting populations and application to plasma oscillations
22 p3976 A69-41260

Electron energy measurement accuracy in carbon dioxide laser plasma by S band radiometer
24 p4327 A69-42613

Soviet collection of articles on plasmoids covering plasma accelerators and plasma interactions with magnetic fields
24 p4356 A69-43467

Conical induction plasma accelerator design for studying acceleration process characteristics
24 p4357 A69-43468

PLASMA DIFFUSION

Microinstabilities of plasma confined by magnetic trap, discussing stabilization, drift waves and anomalous diffusion of plasma by turbulence
01 p0125 A69-10048

Plasma stability criterion for universal mode, discussing cusp curvature stability
01 p0127 A69-10279

Diffusion effect on particle buildup in deionizing steady plasma flux linked to plasma concentration in presence of electron temperature gradients
02 p0291 A69-12483

Diffusion across magnetic field of unstable plasma with highly inhomogeneous density
03 p0478 A69-13840

Microchemical analysis for diffusion measurement of laser produced lithium plasma in uniform magnetic field
05 p0762 A69-15960

Magnetoplasma waves in semiconductor, discussing cold plasma dispersion, helicons, carrier densities, lattice dielectric constant and acoustic domain propagation
07 p1197 A69-18465

Plasma diffusion in toroidal stellarator using integrals of drift equations for particle trajectories, determining distribution function
07 p1191 A69-18985

Magnetosonic wave evolution in inhomogeneous dispersive plasma created by magnetic piston, discussing equation solution
07 p1181 A69-19001

Cross modulation of amplitude modulated wave propagating in nonlinear dispersive plasma, obtaining electric vector
07 p1086 A69-19228

Cold plasma stability during traversing by microwave beams in presence of external magnetic field, obtaining dispersion relations for longitudinal and transverse modes
07 p1195 A69-19465

HF wave propagation in unbounded electron-plasma systems using moment equations, discussing collisions effect and dispersion relation
07 p1086 A69-19468

Recombination coefficients for dense weakly ionized cesium plasma, treating recombination process as diffusion generated by electron collisions
08 p1359 A69-19844

Ambipolar diffusion in electron concentration inhomogeneities of weakly ionized plasma in magnetic field analyzed by linearized quasi-hydrodynamic equations
08 p1362 A69-20426

Cylindrical antenna input impedance in isotropic plasma, assuming weak three dimensional plasma diffusion
08 p1285 A69-20428

Quasi-linear theory of hydromagnetic waves in nonrelativistic collisionless plasma, noting resonant diffusion effect on plasma heating mode
08 p1367 A69-20797

Kaufman thruster with predominant radial field, noting electron mobility across ion extraction screen and advantages of uniform plasma distribution
[AIAA PAPER 69-259] 09 p1569 A69-21877

Plasma diffusion in toroidal stellarator, calculating collisional diffusion and diffusion constants
09 p1552 A69-22294

Nonequilibrium ionization in central regions of low temperature plasma, describing charged particle drift by using diffusion time concept
10 p1732 A69-23440

Electrostatic wave dispersion relation in uniformly rotating plasma cylinder used in interpreting Q machine experiments
11 p1924 A69-24300

Pfirsch-Schluter factor calculation for stationary toroidal plasma diffusion enhancement due to current along magnetic field over diffusion over that associated with diamagnetic current
11 p1925 A69-24312

Beam-plasma dispersion relations, obtaining dispersion equation for plasma waves and dispersion curves for longitudinal waves
11 p1925 A69-24366

HF instability of low pressure discharge in magnetic field, discussing plasma diffusion and oscillations
11 p1927 A69-24912

Backward plasma waves in region of anomalous dispersion indicated by opposite directions of RF wave phase and group velocities
11 p1927 A69-25116

Current carrying inhomogeneous dense plasma instabilities confined in magnetic field, deriving dispersion relations in geometric optics approximation
11 p1932 A69-25537

Ions and electrons in ionosphere diffusion tensor components and ambipolar diffusion coefficient expressions derived for nonisothermal plasma
12 p2071 A69-26700

Longitudinal electric field penetration into semibounded plasma using kinetic approximation, assuming diffusive plasma particles reflection from plasma boundary
12 p2138 A69-26711

Magnetospheric plasma instabilities, discussing pitch angle diffusion instabilities, auroral precipitation boundary location, radial diffusion and maximum dissipation limit
12 p2072 A69-26748

Diffusion and mass flow in steady state magnetically stabilized helium arc plasma effects on spectroscopic determinations of electron temperature, discussing degree of ionization
12 p2141 A69-27146

MHD generator analysis, formulating boundary value problem for ion diffusion and Fourier series solution for end effect of electrodes pair
13 p2208 A69-27613

Linearized dispersion equation for electron oscillations in isotropic plasma with known electron velocity distribution function
13 p2313 A69-28328

Magnetized plasma waveguide dispersion characteristics using Maxwell equations, stressing interaction of electron beam with wave modes
13 p2315 A69-28571

Potassium plasma drift instability suppression by applied external HF electric field, noting plasma diffusion decrease toward container wall
14 p2489 A69-28740

Electron and ion separation as function of plasma potential drop in Langmuir cathode layer in arc regime
14 p2490 A69-29237

Dynamic dispersion relation for bounded cylindrical beam plasma with temperature correction, including hot beam interaction
14 p2502 A69-29957

Ambipolar to free diffusion transition in magnetized slab plasmas, discussing basic equations, iterative numerical procedure, characteristic parameters and H plasma
15 p2657 A69-30023

Turbulent diffusion and ion heating in plasmas in presence of current instability
15 p2662 A69-30959

Covariant dispersion relations for relativistic plasma oscillations for many component plasma in external magnetic field
16 p2816 A69-31633

Electromagnetic wave propagation in unbounded compressible plasma under drift velocity and magnetic field, obtaining dispersion equation for current density
18 p3179 A69-34261

Applicability and limitations of diffusive equilibrium in topside ionosphere, noting plasma density distribution along magnetic field line
20 p3531 A69-37887

Linearized dispersion equation for isotropic electron plasma without external fields solved by harmonic function model
21 p3775 A69-38564

Electron plasma velocity distribution function determined from dispersion equation by harmonic function analog
21 p3776 A69-38565

Plasma dielectric constant and RF wave energy and power absorption in anomalous dispersion region, noting plasma permittivity inverse relation to absorption band frequency
23 p4195 A69-41385

PLASMA DIODES

Electron temperatures and densities in interelectrode plasma of close spaced high current cesium plasma diode
19 p3380 A69-36415

Plasma thermionic diode figure of merit based on Hatzopoulos model altered to include thermal conduction and electrical resistance

22 p3869 A69-40134

PLASMA DYNAMICS

Hydrodynamic model of laser produced solid particle plasma, giving distributions of pressure, density, temperature and velocity

01 p0132 A69-11210

One dimensional Vlasov plasma nonlinear response to external electric field varying in space and time

01 p0133 A69-11214

Anisotropic two component plasma relaxation taking into account dynamic shielding collective effects

01 p0134 A69-11419

Symmetric tensor of time averaged stresses for collisionless plasma in oscillating field derived by Maxwell equations

02 p0286 A69-11588

Lithium hydride microplasma expansion in vacuum using charge collectors, time of flight detectors and spectroscopy of light emission

02 p0286 A69-11704

Plasma production by laser irradiation of solid, calculating numerically time variations of temperature distribution, laser intensity and evaporated layer depth

02 p0256 A69-11935

Model for fast randomization of electron gas by trapped electroacoustical waves

02 p0289 A69-12236

Free fluid hydrodynamics equations applied to weakly ionized plasma stability, considering drift oscillations excitation

02 p0291 A69-12553

Density gradient driven collisional drift waves, discussing identification, stabilization and enhanced plasma transport

03 p0474 A69-13145

Plasma equation of motion in external electromagnetic field analyzed as generalization of Bernoulli equation in relativistic MHD

03 p0476 A69-13385

French research on electric propulsion dealing with plasma dynamics, discussing traveling wave accelerators, pulsed plasma guns, ion thrusters, etc [AIAA PAPER 67-740]

03 p0496 A69-13995

Distribution functions for fast electrons near anode calculated by kinetic theory, assuming weakly ionized plasma with smaller Debye length than collision mean free path

04 p0635 A69-14764

Kinetic model equation for electron plasma incorporating collision terms for model scattering

04 p0636 A69-15042

Curvilinear plasma motions in ionosphere same as cyclones and anticyclones in troposphere, solving ionospheric unstable wind as function of pressure gradients

06 p0919 A69-17722

Dynamics of Q spoiled neodymium laser created plasma expanding in vacuum magnetic field

06 p0970 A69-17952

Thickness of resistivity controlled hydromagnetic shock wave, using classical one fluid equations and generalized Ohm law

06 p0970 A69-17956

Design and performance of large vacuum system with central control desk to study plasma dynamics, discussing visual monitoring at desk

07 p1116 A69-18261

Quasi-static theory of antenna in magnetoactive plasma subjected to resonance, solving boundary value problem

07 p1099 A69-18522

Stabilization of plasma filament with alternating current by quadrupole magnetic field

07 p1191 A69-18987

Rarefied plasma self similar motion qualitatively analyzed, particularly penetration and expansion, taking into account electric/magnetic field effects

08 p1359 A69-19951

High density plasma dynamic stability in magnetic containment using variational calculations

08 p1359 A69-19984

Kinetic theory for plasma, considering electric field fluctuations time evolution simultaneously with one particle distribution time evolution and Landau damping in wave equation

08 p1360 A69-19991

Behavior of bounded and free arc discharges under action of transverse magnetic fields and gas flows

08 p1366 A69-20767

Plasma kinetic equation obtained by method similar to Chapman-Enskog method

08 p1369 A69-20816

Self focusing of plasma whistler wave along magnetic field at small threshold power

09 p1546 A69-21577

Electron drainage currents from dilute streaming plasmas to positively biased silicon and cadmium sulfide solar cell arrays [AIAA PAPER 69-262]

09 p1436 A69-21726

Integrodifferential equations describing longitudinal oscillation properties in nonlinear region of electron Maxwellian plasma waves and two cold electron beams

09 p1550 A69-22026

Two dimensional flat geometry for initial solar flare development stage, discussing tearing mode energy source for solar flares and plasma compressibility effects

09 p1583 A69-22757

Dynamics, stability and approach to equilibrium of bounded one dimensional collisionless plasma representing minimum energy states with nonlinear Vlasov equation solutions

11 p1924 A69-24305

Streamer based on model of perfectly conducting plasma produced on boundaries by entering and departing electrons, discussing streamer thickness and propagation velocity

11 p1935 A69-25759

Plasma velocity measurement by Doppler shifts of spectral lines with photoelectric recording, using Fabry-Perot interferometer

12 p2079 A69-26021

Dynamic growth of positive ion sheath on plane electrode in mercury plasma, measuring sheath thickness and current

12 p2134 A69-26099

Steady equilibrium collisionless plasma in oscillating electromagnetic field, describing formalism for linear relation between perturbation and charges and currents induced in plasma

12 p2135 A69-26284

Isoperimetric plasma thermodynamics problems, including plasma free energy and relativistic plasma density fluctuations energy

12 p2138 A69-26603

Boundary layer between cold plasma and vacuum magnetic field, considering transverse velocity component perpendicular to field

12 p2139 A69-26944

Theoretical model describing electrodynamic plasma properties of HF flame discharge in air, heating discharge envelopes by heat diffusion from discharge channel surface

12 p2140 A69-27125

Transport equation describing drift, diffusion and reaction of iron swarm influenced by electric field in gas

13 p2306 A69-27457

Vlasov equations solved for electrons and ions in electromagnetic field, coupling electric field to density oscillation modes of plasma

13 p2306 A69-27461

Ionization fraction as independent variable in plasma transport correlation, noting role in pressure effect increase

13 p2313 A69-28241

Magnetic field intensity, plasma pressure and energy density relations for macroscopic plasma motion inside neutral sheet from two dimensional model

14 p2440 A69-29119

Dynamic dispersion relation for bounded cylindrical beam plasma with temperature correction, including hot beam interaction

14 p2502 A69-29957

Free fluid hydrodynamics equations applied to weakly ionized plasma stability, considering drift oscillations excitation

15 p2658 A69-30250

Coupled kinetic equations for inhomogeneous systems treated as simultaneous equations in time, obtaining solutions by successive approximation

15 p2660 A69-30913

Interchange stability and drift motion of plasma with loss from ends of axisymmetric magnetic bottle, using hydromagnetic equations

15 p2664 A69-31100

Analytic expressions for motion of collisionless plasma created with isotropic velocities within uniform magnetic field, assuming equal electron and ion masses

16 p2818 A69-31673

Equivalent dielectric tensor for warm drifting electron plasma using model

16 p2820 A69-31701

Precurator plasma electron number densities calculations for blunt reentry vehicles, analyzing extreme UV radiation emanating from bow shock [AIAA PAPER 69-718]

17 p2893 A69-33487

Ionized plasma motion under plane piston action by self similar solution of Navier-Stokes equations

22 p3991 A69-41021

Interaction between two temperature plasma flux and electrodes in MHD channel with crossed electric and magnetic fields, studying boundary layer dynamics

22 p3991 A69-41022

Fokker-Planck plasma collision equation derived from Boltzmann equation, Markov process and Liouville equation

23 p4195 A69-41516

Stationary equilibrium of two dimensional plasmas with motion perpendicular to uniform magnetic field and gravitational field, considering resistive diffusion role

24 p4356 A69-43365

Hydrogen plasma-axisymmetric magnetic field interaction, studying plasmoid motions during exit from field

24 p4358 A69-43472

Crossed inhomogeneous electric and magnetic fields effect on H plasma fluxes dynamic behavior, deriving plasma motion formula

24 p4358 A69-43475

Actuator disk model for study of azimuthally nonuniform MPD arc plasma dynamics [AIAA PAPER 68-714]

24 p4359 A69-43570

PLASMA ELECTRODES

Bilateral plasma outflow plasmatron with variable electrode diameter, discussing efficiency, current-voltage characteristics and size

01 p0125 A69-10102

RF characteristics of electrodes immersed in magnetoplasma, discussing potential distribution around point charge and RF probe measurement of plasma parameters

01 p0029 A69-10550

Electron gun with plasma cathode consisting of gas discharge chamber, electron ejecting component and focusing system

04 p0598 A69-14857

Surface parameters influence on energy transfer to arc jet anode, discussing work function, accommodation coefficient and diffuse reflection coefficient of electrons [AIAA PAPER 69-107]

06 p1039 A69-18185

Current and voltage distribution in electromagnetic compressor channel with solid electrodes of finite resistance, noting error analysis

07 p1059 A69-19029

Power losses in MHD channel due to longitudinal end effects related to finite dimensions of electrodes and terminal insulators

07 p1193 A69-19030

Lithium vapor fueled applied field MPD arc jet performance using open end heat pipe vaporizer and hollow cathode [AIAA PAPER 69-241]

09 p1561 A69-21222

Plasma acceleration by induced Hall currents, discussing Hall-to-current ratio maximum at critical magnetic field [AIAA PAPER 69-280]

09 p1562 A69-21228

Quasi-steady state plasma acceleration in coaxial electrode geometry during synchronized application of tailored pulses of mass flow and current [AIAA PAPER 69-267]

09 p1563 A69-21234

Segmented anode, carbon dioxide-hydrogen performance and hollow cathode erosion tests on low power MPD arc thruster, noting current measurements [AIAA PAPER 69-242]

09 p1563 A69-21236

Predicting electrode geometry effect on saturation ion currents in diode exposed to ionizable vapor in equilibrium with liquid Ce

09 p1440 A69-21832

Plasma dissipative drift instability and nonlinear wave interaction from discharge with oscillating electrodes, investigating LF plasma oscillations

09 p1550 A69-22019

Current-voltage characteristics of combustion driven shock tube generated argon plasma

10 p1737 A69-23466

MHD generators with segmented electrodes at high Hall parameters, noting electron density, conductivity and Hall field reduction factor

10 p1637 A69-23476

Heat flux toward electrodes measured under high current discharge, showing conductive heat transfer and erosion effect

11 p1928 A69-25227

Porous cermet electrodes thermochemical protection by blowing neutral gas into electrode boundary layer, examining effect on volt-ampere characteristics

11 p1826 A69-25232

Current and voltage distribution around normal shock in MHD duct using conformal transformation,

considering continuous and segmented electrode boundary conditions

11 p1931 A69-25359

Angular distribution of electrons leaving plasma at electrode boundary, using kinetic Boltzmann equation with scattering function and specular reflection

11 p1933 A69-25546

Electrical breakdown between cold electrodes in contact with flowing plasma produced by electromagnetic shock tube

12 p2134 A69-26098

Multielectrode probe performance in plasma diagnostics, considering effects of plasma pressure, probe geometry and space charge on current-voltage characteristics

12 p2138 A69-26539

Surface dissipation effect induced by end electrodes on drift instabilities in cold ion plasma column described by differential equation with constant coefficient

12 p2138 A69-26710

Voltage characteristics in MHD generator with water cooled segmented electrodes using potential probes, considering forced convection heat transfer

12 p2017 A69-27178

MHD generator analysis, formulating boundary value problem for ion diffusion and Fourier series solution for end effect of electrodes pair

13 p2208 A69-27613

Conducting liquid boundary layer flow and heat flux on electrodes of MHD generator, including one dimensional flow outside boundary layer

13 p2309 A69-28028

Near electrode layer calculation in low temperature plasma, solving kinetic ion equation for quasi-neutral and Poisson equation for space charge regions

13 p2312 A69-28117

Mass transfer due to plasma recombination, ambipolar diffusion and electrode erosion and resistance forces effects on electrodynamic accelerated plasma

13 p2315 A69-28555

Low voltage arc in thermionic cesium vapor diode with lengthy electrodes and temperature variations along emitter, discussing plasma and current density distributions

14 p2402 A69-29244

Knudsen arcs kinetic theory with cesium/inert gas mixtures in narrow gap between parallel plate electrodes, discussing fast particle beams and electron scattering

14 p2491 A69-29245

Electron energy distribution function and nonequilibrium ionization rate in near cathode layer of thermionic converter

14 p2404 A69-29255

MHD channel flow calculations by quasi one dimensional approximation, considering potential drops at electrodes

14 p2500 A69-29904

Longitudinal pressure distribution in MHD channel with electrodes parallel to applied transverse magnetic field

14 p2501 A69-29918

Plasma three electrode source ion-optical characteristics, noting beam angular divergence dependence on spacing between discharge cavity and intermediate electrode

15 p2658 A69-30240

Current distribution and Hall voltage in crossed fields discharge with split electrodes in nonequilibrium Ar and Cs plasmas

15 p2663 A69-30980

Integral charge neutrality effect on local space charge density of MHD generator channel, examining electrode couple for Faraday generators

15 p2664 A69-31055

Regulating setup for controlling AC voltage surrounding polarization of magnetic electrode in plasma

15 p2664 A69-31094

I-V characteristics of caloelectric plasma converter with concentric electrodes measured for various hot electrode temperatures and mercury vapor flow rates

16 p2822 A69-32065

One dimensional viscous magnetofluidynamic flow in annulus formed by concentric cylindrical electrodes, reducing problem to linear partial differential equation set

[AIAA PAPER 69-725]

17 p3012 A69-33493

Self induction of conical electrode type plasma accelerator with and without allowance for magnetic scattering field, investigating acceleration process

19 p3379 A69-35821

Electron temperatures and densities in interelectrode plasma of close spaced high current cesium plasma diode

19 p3380 A69-36415

Gas velocity and pressure influence on electrical breakdown potential of Ar, N and He between parallel flat plate and concentric electrodes

24 p4359 A69-43693

PLASMA-ELECTROMAGNETIC INTERACTION

Absorption of linearly polarized light in reflecting surface layer of collisionless plasma, calculating layer lifetime for reflection of light

01 p0127 A69-10283

Artificial visible plasma clouds in space interacting with electric and magnetic fields around earth

01 p0151 A69-10533

Thermonuclear fusion program, discussing plasma instabilities suppression, toroidal installations, magnetic trap systems, plasma heating and dynamic stabilization

01 p0156 A69-11065

Resistive spherical plasma expansion into external magnetic field noting magnetic stream function

01 p0132 A69-11211

Moderately strong electromagnetic wave propagation in fully ionized plasma, noting nonlinear effects for frequency near plasma frequency

01 p0133 A69-11213

Normally incident linearly polarized electromagnetic wave reflection and transmission by semifinite longitudinally drifting magnetoplasma in static magnetic field

01 p0134 A69-11290

Electromagnetic waves propagation in cylindrical waveguide containing plasma column along axis in absence of constant magnetic field

02 p0285 A69-11463

Magnetic confinement of electric arc in alkali metal vapor containing gas flow, considering degree of ionization

02 p0286 A69-11585

Impedance sheet approximation to plasma slab, considering plane wave propagation, plasma covered slot antenna and transmission loss

02 p0209 A69-12348

Inert gas nonequilibrium MHD power generation in shock tube

02 p0196 A69-12425

Electromagnetic oscillations in ionized plasma, assuming higher oscillation frequency than collision frequency

02 p0292 A69-12643

Diffraction of cylindrical waves at half plane in cold anisotropic plasma, using Fresnel integrals

02 p0293 A69-12842

Helium plasma ion oscillations damping by external RF electric field at sheath-plasma resonance condition

03 p0476 A69-13323

Nonlinear interaction of steady state circularly polarized electromagnetic wave with cold plasma in constant longitudinal magnetic field

03 p0476 A69-13381

Energy partition between mechanical and magnetic modes in turbulent plasma in external field

03 p0476 A69-13384

Statistical description of nonelastic processes in nonequilibrium plasma in transverse magnetic field, using kinetic equations for distribution functions

03 p0476 A69-13412

Cold plasma motion caused by electromagnetic wave pressure propagating along uniform magnetic field

03 p0477 A69-13413

Electromagnetic wave passage through plane gyrotropic layer of magnetized plasma, analyzing polarization and energy transfer

03 p0397 A69-13709

Electromagnetic properties of bounded isotropic plasma in kinetic approximation

03 p0477 A69-13712

Helicon waves in nonresistive cylindrical and spherical plasmas

03 p0479 A69-13961

Nonmagnetic plasma deceleration in quasi-stationary magnetic field with coaxial injector and barrier field

03 p0481 A69-14212

Charged particles motion in spatially modulated magnetic field solved using modification of Krylov-Bogoliubov asymptotic method

04 p0633 A69-14297

Asymptotic method for studying charged particle motion in spatially modulated magnetic field

04 p0634 A69-14298

Nonlinear damping of circularly polarized electromagnetic wave propagating in plasma along magnetic field, noting particle motion in resonance region

04 p0558 A69-14982

Electromagnetic wave propagation in uniform anisotropic plasma, considering wave vectors perpendicular to magnetic field

04 p0637 A69-15048

Nonlinear demodulation of amplitude modulated wave propagating in plasma

04 p0559 A69-15210

Deuterium plasma heating by means of high power focused pulsed laser beam, noting initial energy of laser and pulse duration

05 p0769 A69-15583

Laser light scattering by plasma using theory of ionospheric scattering of radar signals, determining scattered spectrum

05 p0798 A69-15586

Interactions in classical relativistic plasmas, discussing Lorentz invariant statistical mechanical formalism and phenomenological electrodynamics

05 p0801 A69-15770

Electron plasma interaction with transverse EM wave propagating along magnetic field, calculating permittivity, density, field strength and applied frequency

05 p0805 A69-16699

Kinetic equation for plasma in external inhomogeneous nonstationary electromagnetic field, noting perturbation theory and Vlasov approximation

05 p0805 A69-16700

Spatial and temporal characteristics of two component electron-ion nonisothermal plasma and penetration of external LF electric field into plasma

05 p0806 A69-16745

Wave dispersion analysis for amplification in cold plasma filled cylindrical waveguide penetrated by electron beam of same radius

05 p0736 A69-16790

Electromagnetic waves transformation and scattering in plasma in electric field, showing abrupt increase at certain critical value

06 p0886 A69-16894

Spatial dispersion of electromagnetic waves reflection from moving plasma layer in magnetic field, determining transmission and energy absorption coefficients

06 p0886 A69-16895

Bounded and spatially separated plasmas wave oscillations stability in magnetic field, observing hydrodynamic slipping and drift instability

06 p0963 A69-16903

Equation for charged particle motion in electromagnetic wave field propagated along magnetic field applied to nonlinear wave propagation in plasma near cyclotron resonance

06 p0963 A69-16905

Propagation constant and radiation of center fed linear antenna with feed points displaced transverse to antenna axis and immersed in warm compressible plasma

06 p0896 A69-17476

Harmonic generation of S band signal inside plasma column at resonance

06 p0965 A69-17488

Arc phenomena and gas dynamic effects during shock heated plasma interaction with magnetic field

07 p1188 A69-18273

High power microwave interactions in pulsed electron beam plasma klystron

07 p1095 A69-18433

Energy losses of clusters of charged particles moving through unbounded isotropic plasma manifesting nonlinearity in interaction of particle generated fields

07 p1189 A69-18528

Shot noise in dipole antenna immersed in hot plasma related to antenna input resistance, using Maxwellian velocity distribution

07 p1079 A69-18920

Conducting gas acceleration in strong unsteady electromagnetic field, discussing channel flow in relation to time and pressure gradient

07 p1191 A69-18988

Cylindrical and spherical waves propagation in weakly inhomogeneous plasma treated by geometrical optics, noting caustic surfaces

07 p1195 A69-19747

Electromagnetic wave reflection from moving plasma characterized by conductivity for slow waves, calculating reflection and absorption factors

07 p1196 A69-19748

Self focusing of TM type electromagnetic waves in isotropic plasma and formation of waveguide channel

07 p1196 A69-19749

Nonlinear interaction of electromagnetic waves in bounded plasma, optimizing second order fields with reference to diagnostic applications
08 p1273 A69-20030

Coupled wave equation solution based on spectral resolution for longitudinal components of electric and magnetic fields when source currents are present in compressible anisotropic plasma
08 p1274 A69-20031

Plane electromagnetic wave reflection and transmission by semiinfinite moving compressible plasma fluid, noting interaction of transmitted H wave
08 p1360 A69-20097

Time-averaged value of forces of electromagnetic wave falling from vacuum and acting on magnetoactive plasma
08 p1361 A69-20200

Positive column in longitudinal magnetic field in helium and neon, noting agreement with collision diffusion theory and Kadomtsev perturbation theory
08 p1361 A69-20212

HF electromagnetic wave scattering at small scale plasma turbulence in magnetic fields, discussing interactions in frequent collisions region
08 p1275 A69-20435

Radiation field patterns of linear antennas immersed in weakly ionized plasma evaluated for propagation constants of current distribution
08 p1285 A69-20551

Complex microwave transmission coefficient of nominal cut-off plasma for several different types of electron distribution, noting discharge characteristics for cut-off
08 p1366 A69-20759

Wave interaction in magnetically confined plasma taking into account body and surface waves
08 p1370 A69-21014

Hall current influence on plasma jet interaction with space periodic magnetic field created by system of coaxial coils with alternating current directions
08 p1370 A69-21017

Longitudinal polarization behind front of plasma flow interacting with transverse magnetic field, showing electric potential and magnetic field exhibit structural fluctuations
08 p1370 A69-21018

Approximate solution of nonlinear differential equation describing interaction between galactic cosmic rays and solar wind, obtaining four domains
09 p1575 A69-21524

Amplitude modulated radio wave interaction with rarefied plasma in magnetic field, considering possible ionospheric heating by mechanism
09 p1453 A69-21543

Scientific data acquisition and interpretation effects on electric spacecraft plasmas and field directions, noting electron interchange reactions effect
[AIAA PAPER 69-276] 09 p1568 A69-21727

Radio frequency signal transmission between orbiting spacecraft and vehicle entering VM-10 model atmosphere, examining near wake approximations and plasma-electromagnetic interaction
09 p1455 A69-22002

Kinetic theory of electromagnetic wave passage through magnetoactive plasma, discussing dispersion and specular and diffuse reflection
09 p1550 A69-22022

Kinetic theory of electromagnetic wave propagation in infinite laminated plasma with different dielectrics, determining attenuation
09 p1550 A69-22023

Resonant interaction between traveling charge with superimposed magnetic field and Alfvén wave in plasma cylinder, showing cyclotron orbit variations
09 p1551 A69-22035

Charge and traveling wave interaction in circular waveguide in resonance regime solved by Krylov-Bogoliubov asymptotic method
09 p1551 A69-22037

Electromagnetic wave propagation direction in vacuum for reflection from semiinfinite plasma, noting effects of nonlinear transverse wave excitation
09 p1459 A69-22529

Plasma cavity shape formed by magnetic field effect due to several parallel line currents
[ISAS-433] 09 p1553 A69-22569

Second harmonic generation by electromagnetic wave incident on inhomogeneous plasma, determining power output
10 p1653 A69-23133

Plasma ions turbulent heating during electron-acoustic instability in field of circularly polarized electromagnetic wave at ion cyclotron frequency
10 p1728 A69-23137

Electromagnetic wave transmission through anisotropic plasma, discussing incident wave field strength effects near cyclotron frequency
10 p1728 A69-23167

Beam displacement at plasma under magnetic field connected with polarized electromagnetic wave reflections
10 p1740 A69-23724

Field effect on positive column plasma of glow discharge in air, analyzing near wall potential and conductivity
10 p1741 A69-23946

Landau type interaction between electron beam and whistler/helicon wave electric field within semiconductor/InSb/
10 p1742 A69-24107

Nonlinear confining and deconfining forces of laser light interaction with inhomogeneous plasma, analyzing macroscopic motion based on ponderomotive force description
11 p1923 A69-24297

Electric shock tube for measurement of plasma magnetic fields induced by shock plasma moving through DC magnetic field transverse to flow
11 p1925 A69-24311

Pfirsch-Schluter factor calculation for stationary toroidal plasma diffusion enhancement due to current along magnetic field over diffusion over that associated with diamagnetic current
11 p1925 A69-24312

Beam-plasma dispersion relations, obtaining dispersion equation for plasma waves and dispersion curves for longitudinal waves
11 p1925 A69-24366

Transient signal propagation through cold inhomogeneous plasma with electron density decreasing exponentially in direction of propagation
11 p1836 A69-24990

Tonks-Dattner resonances in plasma column, using linearized Vlasov equation for coupling to plasma waves of time varying electric fields
11 p1929 A69-25266

Normal mode representation of HF properties of inhomogeneous plasma, analyzing Vlasov equation for free oscillations under external driving field
11 p1929 A69-25269

Nonlinear HF conductivity of fully ionized plasma, considering applied electromagnetic field frequency close to electron plasma frequency
11 p1929 A69-25271

Electric field penetration into homogeneous plasma at frequencies near Langmuir frequency and current at surface of thin cylindrical antenna in plasma
11 p1853 A69-25551

Electromagnetic wave propagation cut-off in slightly noncompensated electron hole plasma, discussing wave evanescence above critical magnetic field value
12 p2133 A69-25926

Cyclotron harmonic waves/CHW/ nonlinear decay instability and parametric amplification, considering applicability to practical amplifiers
12 p2135 A69-26314

Plane transient electromagnetic wave from cold lossless plasma half space and slab
12 p2033 A69-26865

Interplanetary scintillation and angular spectrum of radio waves scattered by solar plasma, noting magnetospheric tail and solar wind
12 p2161 A69-26942

Soviet book on microwave methods of plasma investigation based on electromagnetic wave interaction, covering microwave probes and plasma radiation
12 p2139 A69-27073

Stationary magnetic field effect on sum and difference frequency generation due to nonuniform RF electric fields applied externally to plasma
13 p2305 A69-27376

Plasma lens device for focusing ion or plasma beams with closed electron drift
13 p2307 A69-27658

Waves propagating along rotating electron beam and interacting with magnetized plasma waveguide slow waves
13 p2312 A69-28118

Whistler type electromagnetic waves excitation by electron beam in plasma, noting intensity dependence on electron frequency
13 p2314 A69-28443

Magnetic and electric field effects on undamped electron-hole LF frequency plasma oscillations in spatially homogeneous nonpolar semiconductor
13 p2323 A69-28581

Reflection and absorption coefficients analyzed for obliquely incident electromagnetic wave from magnetoactive plasma in constant parallel magnetic field
14 p2411 A69-28997

Monochromatic plane waves propagation in anisotropic homogeneous cold plasmas, treating dispersion surface, reflection, refraction and waveguide applications
14 p2492 A69-29399

Longitudinal electric field penetration into plasma slab in constant magnetic field
14 p2493 A69-29665

Si III and O II spectral lines distortion in pulse HF plasma in rotating electromagnetic field, showing particle rotational speed dependence on discharge chamber radius
14 p2497 A69-29791

Passive electric microwave probe with balancing capacitance for studying waveguide fields at high microwave power levels in radiative plasma accelerators
14 p2498 A69-29807

Collisionless plasma slab drift mode stabilization at uniform temperature by oscillating electromagnetic field
14 p2499 A69-29851

MHD interaction between plasma and transverse magnetic field in shock tube, noting unsteady shock wave propagation in interaction zone
14 p2501 A69-29919

Plasma temperature measurement by resonant laser radiation absorption, assuming Saha-Boltzmann relation
14 p2501 A69-29954

Fermi acceleration of energetic electrons trapped within dipole magnetic field analyzed to obtain quantitative results for wave-particle interaction within complex magnetospheric configuration
15 p2594 A69-30095

Nonlinear effects and turbulent behavior in beam plasma instability, studying interactions in magnetic field
15 p2660 A69-30917

Thermodynamic Green function for Compton scatter cross section of photons by electrons in hot plasma
15 p2664 A69-31479

Weakly ionized plasma electron heating by interaction with HF electromagnetic field calculated using Boltzmann transport equation
15 p2665 A69-31480

Electromagnetic echo generation in collisionless spatially homogeneous plasma dependence on velocity distribution and magnetic interaction
16 p2818 A69-31677

Laser radiation absorption by inhomogeneous overdense plasma, discussing effects of plasma expansion on energy coupling efficiency
16 p2818 A69-31679

Particle-wave interaction in weak turbulent plasma in presence of uniform magnetic field, applying perturbation theory arbitrary order
16 p2819 A69-31683

Microwave field-plasma slab nonlinear interaction in rectangular waveguide, analyzing current and electron density and second harmonic TE and TM power
16 p2749 A69-31703

Nonlinear mixing of Ar plasma ion wave and externally applied electromagnetic wave
16 p2820 A69-31769

Single particle and collective excitations of plasmas in solids and interactions with acoustic and electromagnetic waves in magnetic field
16 p2821 A69-31820

Incident energy transfer to particles due to nonlinear interactions during passage of intense light beam through plasma, considering decay into plasma waves
16 p2822 A69-32046

Plasma cluster interaction with axially symmetric magnetic field, deriving plasma diamagnetic current, inductance and resistance from measured coil flux dependence on distance
16 p2823 A69-32365

Increase or decrease in light absorption by plasma particles found dependent on laser intensity level
16 p2797 A69-32382

Polarization characteristics of electromagnetic waves obliquely reflected from inhomogeneous isotropic plane stratified plasma
16 p2752 A69-32391

Approximate solution of nonlinear differential equation describing interaction between galactic cosmic rays and solar wind, obtaining four domains
16 p2851 A69-32519

Amplitude modulated radio wave interaction with rarefied plasma in magnetic field, considering possible ionospheric heating by mechanism

16 p2754 A69-32538

Wave front resistivity in laser produced plasma interacting with magnetic field enhanced by two stream instability

16 p2823 A69-32564

Polar substorms resulting from interaction between magnetized plasma stream and geomagnetic field in magnetosphere

16 p2852 A69-32620

Nonlinear interaction of plane electromagnetic wave with inhomogeneous plasma layer, noting concentration and electric field discontinuity

17 p2922 A69-33693

VLF and ULF whistler propagation in magnetosphere for remote sensing magnetospheric plasma parameters, exhibiting characteristic patterns and interaction with plasma

17 p2962 A69-33712

Electroacoustic-electromagnetic waves nonlinear coupling in compressible isotropic plasma, comparing slowly varying and resonant interaction approaches

17 p2928 A69-33870

Microwave propagation inside hollow cylinder using model plasma as dielectric, deriving relationship between phase shift and free electron density

17 p2932 A69-34218

HF electromagnetic waves penetration into slightly ionized plasma analyzed by Maxwell and kinetic equations, giving penetrating electric field by WKB formula

17 p2932 A69-34220

Electromagnetic wave propagation in unbounded compressible plasma under drift velocity and magnetic field, obtaining dispersion equation for current density

18 p3179 A69-34261

Artificial plasma properties at microwave frequencies, determining plasma electron density and effects on horn antenna radiation characteristics

18 p3100 A69-34271

Anomalous absorption of electromagnetic wave in collisionless dense cylindrical plasma beam in circular waveguide, noting electric field strength for energy transfer

18 p3101 A69-34621

Atmospheric whistlers and ion acoustic waves interaction in nonisothermal plasma, determining damping frequencies, decrements and wave polarization

18 p3180 A69-35024

Microwave background angular fluctuations investigated for relationship between whirl motion velocity and temperature dispersion, noting role of scattering by moving plasma

18 p3188 A69-35208

Radar design for target detection, tracking and identification, modeling plasma effects on radar cross section of reentry vehicles based on wave-plasma interactions

20 p3485 A69-36925

Negative energy waves presence, showing qualitative difference on the theoretically derived parametric amplification in plasmas

20 p3582 A69-38244

Matter and radiation interaction in hot model universe, investigating residual radiation spectrum deviation from Planck curve

21 p3797 A69-38536

Electromagnetic wave reflection and transmission from boundary between semiinfinite plasma and air by applying static magnetic field

21 p3672 A69-38743

Langmuir probe immersed in plasma RF response over range of signal amplitude and frequency and plasma electron density, showing sheath capacitance role

21 p3723 A69-38939

Jupiter magnetospheric radio emissions, discussing magnetic field and plasma-magnetic interactions

21 p3812 A69-39517

Microwave absorption by Ar plasma of positive column discharge in waveguide under inhomogeneous magnetic field

21 p3778 A69-39547

Homogeneous conducting moon-solar wind interactions, describing time dependent lunar magnetic and electric fields induced by interplanetary magnetic field variations

22 p4023 A69-40518

Prolate spheroidal antennas operation in isotropic plasmas, studying effects of collision frequency, electron temperature and antenna length on admittance, radiation and current distribution

22 p3914 A69-40702

Aperture distortions and spectral line shapes of electromagnetic radiation diffused by plasma

22 p3982 A69-40799

Radio wave scattering cross section in wake of body moving in ionosphere, using simplified procedure with asymptotic expressions

22 p3901 A69-41094

Electromagnetic wave propagation instabilities in semiconductor magnetoplasmas no diffusion limited to LF, using dispersion equation

22 p3902 A69-41223

Plane EM wave transmission and reflection by semiinfinite isotropic plasma moving in arbitrary direction parallel to boundary, using Lorentz transformation

23 p4114 A69-41360

Plasma dielectric constant and RF wave energy and power absorption in anomalous dispersion region, noting plasma permittivity inverse relation to absorption band frequency

23 p4195 A69-41385

Plane electromagnetic wave scattering on turbulent fluctuations in electron density of finite volume ionized plasma, evaluating Booker-Gordon relation

23 p4116 A69-41587

Slot antenna radiation patterns in presence of aperture RF plasma breakdown sheath measured for various gas pressures and breakdown power levels

23 p4116 A69-41595

Electromagnetic waves scatter propagation in isotropic plasma in plane waveguide, noting electron charge density fluctuations role

23 p4125 A69-42040

Electromagnetic scattering by small plasma ellipsoid moving in vacuum through external steady magnetic field, analyzing resonance phenomena

24 p4282 A69-42979

Rocket exhaust plume models for signal attenuation predictions, considering inhomogeneous plasma medium with varying electron density and collision frequency

24 p4408 A69-43253

Crossed inhomogeneous electric and magnetic fields effect on H plasma fluxes dynamic behavior, deriving plasma motion formula

24 p4358 A69-43475

Steady state interaction between collisionless plasma flow and immersed stationary magnetized or unmagnetized objects by inserting Cs ion accelerator into plasma wind tunnel

24 p4359 A69-43646

PLASMA ENGINES

Telemetered data obtained by Iantar 1 automatic ionospheric laboratory, detailing argon-ion plasma engine performance

05 p0830 A69-16056

Pulsed plasma microthruster propulsion system for synchronous orbit LES 6 satellite [AIAA PAPER 69-298]

09 p1562 A69-21227

Background pressure and magnetic field shape effect on MPD thruster performance, testing radiation cooled thrusters [AIAA PAPER 69-243]

09 p1564 A69-21239

Ion thrusters and various microthrusters/electron bombardment ion and pulsed plasma/ for proposed European missions [AIAA PAPER 69-274]

09 p1565 A69-21250

Segmented anode current and heat distribution in MPD engine measured with current shunts and calorimetric methods [AIAA PAPER 69-244]

09 p1566 A69-21260

MPD engine plasma flow investigated by Langmuir probe measurement of ion saturation current [AIAA PAPER 69-233]

09 p1567 A69-21266

Electric current spike in MPD operation, using segmented anode and image converter methods with argon and helium propellant gases

09 p1548 A69-21962

Ion spacecraft propulsion systems, discussing components and characteristics of reaction type rocket engines and electrical thrust devices

11 p1944 A69-25593

Axial velocities in ammonia MPD thruster exhaust by measuring Doppler shifts of spectral lines emitted by plasma constituents

16 p2835 A69-31890

Electric propulsion, discussing plasma research, MPD thruster and arcs, ion thruster research and spacecraft integration [AIAA PAPER 69-497]

16 p2838 A69-32655

Electric propulsion systems for manned planetary exploration flights, discussing arc jet, ion and plasma engines

18 p3185 A69-35108

Telemetered data obtained by Iantar 1 automatic ionospheric laboratory, detailing argon-ion plasma engine performance

20 p3618 A69-37966

Rotational arc motion in MPD accelerators with strong axial fields predicted by plasma physics equations

23 p4201 A69-41909

Radial pressure distribution in steady state rotationally symmetrical plasma jet subjected to axial magnetic field, emphasizing mass entrainment effect [DGLR-69-024A]

23 p4202 A69-41924

Spectroscopic azimuthal and axial measurement of jet velocity in MPD X9 rocket engine by spectrograph and Fabry-Perot interferometer [DGLR-69-024B]

23 p4202 A69-41925

Rocket engine plasma jet radial velocity measurement by induction-velometric method using moving probe [DGLR-69-024C]

23 p4202 A69-41926

Performance test of German MPD plasma rocket engine with augmented magnetic field and 5-10 kw output, describing integral measurement procedure and observed phenomena [DGLR-69-024D]

23 p4202 A69-41927

HF ion engine RIT 10, Kaufman ion engine ESKA, Hall effect ion engine HIT and MPD engine compared for state of development [DGLR-69-021]

23 p4202 A69-41928

PLASMA FLOW

U MAGNETOHYDRODYNAMIC FLOW

PLASMA FLUX MEASUREMENTS

Plasma flux measurements by charged particle traps in Venus vicinity by space vehicle Venus 4, discussing low concentration of charged particles

07 p1222 A69-19613

Electric shock tube for measurement of plasma magnetic fields induced by shock plasma moving through DC magnetic field transverse to flow

11 p1925 A69-24311

Electrical conductivity radial distribution in plasma flux from changes in Q factor and circuit inductance in presence and absence of skin effect

11 p1928 A69-25221

Dynamic characteristics of plasma fluxes across magnetic field of diverter inside plasma cylinder formed during injection

12 p2134 A69-25977

Slow theta pinch helium plasma measurements by Mach-Zender interferometer with Q switched laser

12 p2091 A69-26394

Low energy plasma fluxes in magnetosphere, discussing plasmopause position dependence on geomagnetic activity

12 p2150 A69-26747

Interplanetary plasma measurements by Luna, Mars 1, Zond 2 and Venera 3 probes, including solar plasma flux energy spectra diagram

13 p2336 A69-27354

Hydrogen plasmas motions in multipole magnetic fields, discussing plasma polarization, double vortex flow patterns and field line configurations

15 p2661 A69-30924

PLASMA FREQUENCIES

Dense plasma with plasma frequency greater than cyclotron frequency, discussing flow past slender bodies

01 p0126 A69-10226

Electromagnetic wave propagation across magnetic field under relative streaming motion, noting plasma frequency cut-off

01 p0134 A69-11247

Microwave oscillations during interaction between electron beam and plasma in electron tube

07 p1189 A69-18504

Plasma frequency resonances observed by topside sounders interpreted as slowly propagating waves suffering oblique reflection, noting effects of nonhorizontal magnetic field

07 p1124 A69-18837

Longitudinal electrostatic oscillations in plasma with Fermi distribution of energies, noting oscillation frequency dependence on electron density

08 p1359 A69-19985

Nondispersive LF mode in magnetized plasma with frequencies lower than ion cyclotron frequency, discussing plasma stability in presence of electron drift

08 p1366 A69-20750

Communication problems due to natural and artificial plasmas in spacecraft vicinity, discussing plasma effect theory

09 p1451 A69-21292

Transverse density nonuniformity effect on electromagnetic wave propagation in cylindrical plasma waveguide immersed in magnetic field, noting frequency increase
09 p1545 A69-21348

Soviet papers on high frequency properties of plasma, including microwave diagnostics, magnetohydrodynamic and shock waves
09 p1548 A69-22015

Theta pinch plasma microwave emission from electrodeless inductive discharge at low pressures recorded at near plasma frequencies
09 p1549 A69-22017

Plasma oscillation intensities at combination frequencies under assumption of plasma wave and ion acoustic wave propagating along z axis
09 p1550 A69-22024

High density plasma in resonant cavity obtained by frequency shifting power source
10 p1727 A69-22955

Normal mode dispersion at upper hybrid frequency propagating parallel to uniform magnetic field in spatially inhomogeneous plasma
11 p1924 A69-24302

Normal mode representation of HF properties of inhomogeneous plasma, analyzing Vlasov equation for free oscillations under external driving field
11 p1929 A69-25269

Nonlinear HF conductivity of fully ionized plasma, considering applied electromagnetic field frequency close to electron plasma frequency
11 p1929 A69-25271

Stationary magnetic field effect on sum and difference frequency generation due to nonuniform RF electric fields applied externally to plasma
13 p2305 A69-27376

Microwave and LF oscillations interactions in plasma beam system, showing oscillation amplitude dependence on frequency relationships
13 p2312 A69-28111

Nonlinear generation of sum and difference frequencies in ionized plasma current densities by nonuniform microwave fields noting electron scattering
14 p2507 A69-29350

Si III and O II spectral lines distortion in pulse HF plasma in rotating electromagnetic field, showing particle rotational speed dependence on discharge chamber radius
14 p2497 A69-29791

Energy absorption by cold nonuniform plasma from externally driven electric field, noting relation between plasma and driving frequencies
15 p2661 A69-30922

F region stratification during solar minimum and maximum, discussing regularities of plasma frequencies and diurnal variations
17 p2959 A69-33005

Oscillations excitation between ion cyclotron and electron plasma frequency in He ion beam generated plasma
17 p3014 A69-33830

PLASMA GENERATORS NT DUOPLASMATRONS NT PLASMATRONS

Heat transfer between arc column and discharge chamber wall of vortex linear plasmatron, using approximate similitude method
01 p0125 A69-10091

Recombination reactions during postdischarge in helium plasma produced by laser beam, deriving equation for density evolution
01 p0128 A69-10394

High temperature plasmas generation by exploding gold wires in vacuum, using time of flight technique for plasma densities and flow velocities
01 p0129 A69-10667

Thermonuclear fusion program, discussing plasma instabilities suppression, toroidal installations, magnetic trap systems, plasma heating and dynamic stabilization
01 p0156 A69-11065

Arc discharge in axially turbulent airflow producing equilibrium air plasma
02 p0285 A69-11571

Formation mechanism for heterogeneous structure of interplanetary plasma based on plasma instability from temperature anisotropy
02 p0314 A69-11638

Plasma production by laser irradiation of solid, calculating numerically time variations of temperature distribution, laser intensity and evaporated layer depth
02 p0256 A69-11935

Deuterium plasma evolution and creation modes obtained by short pulse laser discharge in gases,

discussing detonation and phase wave ionization mechanisms
02 p0288 A69-12040

Plasma generation in universe from temperature and pressure effects, ionizing radiation and stellar ejection of ionized particles
02 p0293 A69-12781

Electromechanical retracting pedestal for solid target injection into vacuum system and ionization by focused Q switched laser beam
03 p0439 A69-13105

Ionizing action of radiation due to heating substance in laser beam focus, discussing highly ionized plasma production
03 p0479 A69-13998

Breakdown plasmoids produced by lasers
03 p0480 A69-14058

Coaxial plasma accelerator for generation of pure injection plasmas, noting stability of propagating current sheath
03 p0481 A69-14213

Dense plasma radiation, analyzing spectrographically initial stages of wire explosion in vacuum
03 p0482 A69-14227

UHF discharge plasma, electron distribution over bound states and ionization stages
04 p0634 A69-14442

Toroidal gas discharge in waveguide by coupling of microwave power into gas to heat gas, noting plasma confinement [IMPI PAPER A4]
04 p0636 A69-14999

Plasma production by ultrashort pulse Q switched laser beam, discussing avoidance of initiation of breakdown wave
05 p0770 A69-15584

Mode locked laser as stroboscopic light source potential by investigating expansion of laser produced plasma by schlieren photography [IEEE PAPER H-1]
05 p0774 A69-16315

Plasma heating in two step theta pinch with coaxial coils yielding high temperature plasma at low capacitor storage charge
05 p0804 A69-16549

Mass spectrometric studies of plasmas produced by laser beam interaction with solid materials
06 p0932 A69-16921

Secondary emission and hollow cathode effects in low pressure hot cathode thyratron filled with hydrogen and with shield surrounded thermionic cathode
06 p0896 A69-17475

X rays detection from laser produced deuterium plasma through calibrated absorbers, presenting electron temperatures
06 p0964 A69-17479

Cesium plasma produced inside hot cylindrical tantalum cavity at 1400 K by contact ionization at wall while obtaining electrons from internal filament
06 p0927 A69-17707

Probe noise in quiescent plasmas investigated using back diffusion type discharge tubes producing low density plasmas and positive plasma columns
06 p0967 A69-17715

Plasma ionization enhancement by laser line radiation matched to specific atomic transitions [AIAA PAPER 69-47]
06 p0972 A69-18186

Radiation pressure effects on laser produced carbon plasma in vacuum, discussing target surface superheating, plume boundary, plume density precursor and electron and ion temperature merging
07 p1190 A69-18902

Stationary supersonic nonequilibrium plasma source in gas vacuum expansion and nozzle flows
07 p1191 A69-18986

Laser induced gas breakdown by focusing nanosecond pulses in air and deuterium [IEEE PAPER U-3]
07 p1155 A69-19085

Statistical theory of ionization for magnetoactive plasma with nonequilibrium concentration level and nonequilibrium energy distribution
07 p1193 A69-19142

Atomic flux from Cs and K ion recombination on hot end plates of Q machine measured, noting contribution to total plasma end loss rate
08 p1358 A69-19810

Highly ionized low density plasmas production by strong UV radiation
08 p1360 A69-20080

Arc jet generation and control noting application to hyperthermal aerospace environment studies, wind tunnels and materials heating and fabrication
08 p1371 A69-21128

Plasma generator for maintenance of space vehicle electrical neutrality during ejection of high velocity electron pulses [AIAA PAPER 69-273]
09 p1567 A69-21263

Discharge plasmas produced from solid materials at low pressures and temperatures and compressed against wall by magnetic field
09 p1547 A69-21594

Fission fragment generated plasma applicability to thermionic energy converters from electron density, temperature and transport studies
09 p1440 A69-21829

Enthalpy distribution in plasma tube arc heater inlet flow region with hot and cold gas core boundary in presence of electric field
09 p1553 A69-22538

Pulsed plasma production when focusing Q switched laser on solid target surface, noting high temperature effects and optical diagnostics methods
09 p1520 A69-22656

High temperature electron component of plasma produced by strong electron beam in adiabatic magnetic trap, deriving turbulent diffusion coefficient dependence
09 p1553 A69-22657

High density plasma in resonant cavity obtained by frequency shifting power source
10 p1727 A69-22955

Current-voltage characteristics of combustion driven shock tube generated argon plasma
10 p1737 A69-23466

Quasi-neutral plasma formation in hydrodynamic channel flow, discussing ignition and breakdown processes in preionized gaseous flow
10 p1737 A69-23467

Electrostatic wave dispersion relation in uniformly rotating plasma cylinder used in interpreting Q machine experiments
11 p1924 A69-24300

Cesium plasma confinement time improvement in symmetrically heated tungsten end plates of Q machine
11 p1925 A69-24314

Pulsed laser holography for recording interferograms of laser created plasma, discussing laser source properties, spatial and spectral coherence, double pulse mode, etc
11 p1895 A69-24683

Spectrum space-time characteristics of electrically produced plasma discharges magnetically compressed to discharge tube wall, using spectrochromograph and spectrographs
11 p1927 A69-25217

Temperature and electron concentration in plasma spark obtained in air by focusing Q switched laser radiation
11 p1928 A69-25235

Microwave analysis of plasmas produced by laser beam on aluminum spheres, noting expansion velocity and electron density
11 p1930 A69-25287

Neutron emission anisotropies in capacitor discharge produced plasma focus, detailing coaxial plasma gun energy spectrum and flux measurement
11 p1930 A69-25321

Current-voltage characteristics and ionization equilibrium of low voltage arc plasma in narrow gap of thermionic converter at high current density
11 p1933 A69-25554

Kinetics of air plasma formation in wake of shock wave propagating in air, taking into account nonequilibrium ionization
12 p2062 A69-26674

Load factor role in nonequilibrium ionization process in Faraday-type generator, determining relationship with conductivity
13 p2314 A69-28361

Time of flight mass spectrometers for plasmoids generated by theta pinch and discharge over organic glass, showing ion and electron currents oscillograms
14 p2498 A69-29813

Bibliography on laser applications in plasma physics covering plasma diagnostics and production
14 p2498 A69-29842

Synthesized plasma from neutralized mercury ion beam ejected from electron bombardment source, analyzing temperature, plasma sheath and stability
14 p2502 A69-29959

Longitudinal inhomogeneities in plasma of Q machines caused by ion emission from hot plate at different radial positions
15 p2661 A69-30925

Hot electron plasma formation by injecting megaelectron volt ion beams followed by Lorentz trapping, noting advantages of DC operation
15 p2661 A69-30925

Spectroscopic measurements of charged particle concentrations in jet produced by pulsed plasma generator
15 p2663 A69-30991

Electric arc plasma generator efficiency analysis including supply voltage, working current, current-source impedance, ballast resistor and optimum voltage-current selection
15 p2664 A69-31177

Laser radiation absorption by inhomogeneous overdense plasma, discussing effects of plasma expansion on energy coupling efficiency
16 p2818 A69-31679

I-V characteristics of caloroelectric plasma converter with concentric electrodes measured for various hot electrode temperatures and mercury vapor flow rates
16 p2822 A69-32065

Laboratory plasma produced by electromagnetically generated shock front propagation through ionized hydrogen
[AIAA PAPER 69-693] 17 p2945 A69-33447

Collisionless shock wave structure in plasmas, noting plasma and shock wave generation mechanisms
17 p3013 A69-33822

Turbulent heating of ions and electrons by interaction between magnetically collimated electron beam and electron beam self generated plasma
17 p3014 A69-33827

Plasma generation and heating by electron beam-plasma interactions, discussing HF fields excitation and absorption
17 p3014 A69-33828

Oscillations excitation between ion cyclotron and electron plasma frequency in He ion beam generated plasma
17 p3014 A69-33830

Heated Hg shock tube construction and operation, application to high electron density plasmas and problem of shock bifurcation in Hg monatomic gas
18 p3116 A69-34453

Fissioning plasma generated in shock tube with 235 uranium hexafluoride gas, selecting tube diameter, reflector depth and initial gas density for specific neutron multiplication
18 p3180 A69-34455

Semiconductor plasma production effects and pinching and microwave radiation in InSb plasma, discussing impact ionization, two photon absorption and plasma lifetime
19 p3389 A69-36545

Coherent radiation short pulses from mode locked laser permitting schlieren photography of plasma growth
21 p3736 A69-38795

Induction plasma device of continuous operation to simulate NASA designed gas core space propulsion reactor
[AIAA PAPER 68-712] 22 p3979 A69-40548

Electron beam injection into magnetic trap, obtaining plasma by ionization of supersonic argon flow passing through system
22 p3990 A69-40791

Spectrum characteristics of plasma generated by pulses of solid state laser radiation on metals and alloys in regular and quasi-stable regimes of emission
22 p3964 A69-40793

Nonlinear intensity transitions involving order of magnitude increases in visible luminosity of RF generated plasmas, noting inductive field and electron density influence
23 p4196 A69-41546

Eddy current plasmoids formation in potential magnetokinematic plasma flux found economical in terms of energy requirements
23 p4214 A69-41834

High temperature plasma generation by high power laser beam irradiation on small solidified gas particle, detailing experimental equipment and procedures
24 p4354 A69-42645

DC argon plasma generator operation, studying effects of gas flow direction and rate
24 p4255 A69-43077

PLASMA GUNS

Gas flow model of coaxial electromagnetic plasma gun front profiles and speeds for operation with positive central electrode
02 p0288 A69-12032

Optimum magnetic field axial component and plasma gun discharge voltage for high velocity plasma injection into symmetrical cusp field
05 p0805 A69-16655

Forward velocity of Bostick plasmoids demonstrated proportional to mean surge current through button source
06 p0964 A69-17480

Axial striograms of noncylindrical focusing discharge for plasma structure in front of interior electrode of coaxial gun
08 p1362 A69-20279

Pyrex spheres accelerated to 15 km/sec by plasma rail gun to study hypervelocity impact in thin stainless steel and Al targets
[AIAA PAPER 69-378] 13 p2368 A69-28308

Xenon atom and ion densities downstream from coaxial plasma gun measured using vacuum UV emission, absorption spectroscopy and Langmuir probe
16 p2819 A69-31690

Shock wave propagation through collisionless magnetized plasma, using gun driven, laser and cesium plasma flow methods
19 p3379 A69-35759

Time-variable pulsed transverse magnetic field used to cut off tails of plasmoids ejected from conical Plexiglas plasma gun into curvilinear magnetic field
24 p4358 A69-43476

PLASMA HEATING

Excitation heating energy pumping mechanism for explaining dynamic equilibrium in C rich arc plasmas with high ion temperature/electron temperature ratio
01 p0126 A69-10276

Thermonuclear fusion program, discussing plasma instabilities suppression, toroidal installations, magnetic trap systems, plasma heating and dynamic stabilization
01 p0156 A69-11065

Nonlinear interaction between longitudinal Langmuir waves and parallel wave vectors in heated plasma study, based on Cauchy problem of kinetic equation for electron distribution
02 p0285 A69-11461

Overheated semiconductor plasma instability in crossed electric and magnetic fields, deriving condition for occurrence
02 p0298 A69-12099

Heating of nonuniform plasma cylinder in constant magnetic field by magnetic pumping with oscillating magnetic field, determining energy absorption
02 p0288 A69-12167

Plasma physics experiments and theoretical studies, discussing plasma heating by magnetic compression and irreversible expansion, Cs plasmas, plasma diagnostics, etc
02 p0289 A69-12200

Collisionless plasma heating by hydromagnetic waves in solar wind
02 p0309 A69-12714

Electron emitter cooling and plasma heating of thermionic converters noting effects of plasma density, diode spacing, etc
03 p0368 A69-13127

Equilibrium and stability of strong current discharge in dense optically transparent plasma, determining cause of instability
04 p0636 A69-14983

Deuterium plasma heating by means of high power focused pulsed laser beam, noting initial energy of laser and pulse duration
05 p0769 A69-15583

Solid phase particle motion in plasmatron with colliding jets, measuring W particle heating by optical method
05 p0802 A69-15975

RF electron heating by beam-plasma interaction in uniform magnetic field
05 p0804 A69-16458

Plasma heating in two step theta pinch with coaxial coils yielding high temperature plasma at low capacitor storage charge
05 p0804 A69-16549

Transverse magnetic field effect on ohmic plasma heating in Tuman apparatus
06 p0963 A69-16906

Arc phenomena and gas dynamic effects during shock heated plasma interaction with magnetic field
07 p1188 A69-18273

Thermonuclear neutron emission from high temperature deuterium plasma produced by focusing high power laser radiation on lithium deuteride surface
[IEEE PAPER O-11] 07 p1153 A69-19072

Plasma heating dynamics by straight turbulent discharge current influenced by initial plasma parameters
07 p1195 A69-19592

Electron energy distribution function in plasma heated by electron-cyclotron resonance in adiabatic trap determined from bremsstrahlung spectrum
08 p1365 A69-20547

Quasi-linear theory of hydromagnetic waves in non-relativistic collisionless plasma, noting resonant diffusion effect on plasma heating mode
08 p1367 A69-20797

Heating of collisionless plasma in magnetic mirror by random electric field transverse to magnetic field
08 p1368 A69-20805

Numerical integration of motion equations of electrons subject to electrostatic waves, considering turbulent heating
08 p1368 A69-20806

Amplitude modulated radio wave interaction with rarefied plasma in magnetic field, considering possible ionospheric heating by mechanism
09 p1453 A69-21543

Plasma mixed ion heating by small scale HF turbulent electron sound pulsations
09 p1548 A69-21673

Semiempirical relation for electron cooling modified by plasma heating of thermionic converters, including effects of plasma density, diode spacing and surface potential difference
09 p1440 A69-21831

Electrons resonant heating in beam plasma discharge, discussing ion cyclotron wave excitation in hot electron plasma produced by electron beam
09 p1549 A69-22016

Stochastic model of electron cyclotron heating, calculating energy gain during transit of magnetic mirror field in presence of microwave electric field
09 p1551 A69-22038

Plasma wave excitation and dissipation in fast thetatron discharge, indicating electron nonadiabatic inductive acceleration without equilibrium orbit
09 p1552 A69-22046

Collisionless plasma heating by damping hydromagnetic waves applied to solar wind qualitative model, discussing magnetoacoustic wave energy
09 p1607 A69-22426

Plasma ion heating by external stochastic HF field, noting avoidance of special thermalization processes
09 p1553 A69-22527

Increased energy losses and microwave emission at cyclotron frequency harmonics during plasma electron heating at cut-off plasma concentrations in magnetic trap
10 p1728 A69-23130

Plasma ions turbulent heating during electron-acoustic instability in field of circularly polarized electromagnetic wave at ion cyclotron frequency
10 p1728 A69-23137

Nonequilibrium electron heating effect on inert gas plasma conductivity during shock wave movement across magnetic field
10 p1737 A69-23470

Heat propagation in discharge plasma heated by magnetosonic wave, constructing transverse temperature profile
10 p1741 A69-23896

Magnetospheric plasma heating by magnetosheath generated electromagnetic waves
11 p1950 A69-25149

Turbulent heating of toroidal plasma system with current contained in ceramic vacuum chamber with copper housing
11 p1935 A69-25752

Energy loss during turbulent plasma heating by current in open magnetic trap, attributing heating to ion-acoustic instability in plasma
11 p1935 A69-25753

Enhanced plasma heating in absorption zone of laser-induced gas breakdown at spherical blast wave shock front
14 p2460 A69-29604

Hydrogen plasma heating by fast large amplitude magnetoacoustic wave, measuring resonance excitation and absorption of wave
14 p2493 A69-29643

Turbulent diffusion and ion heating in plasmas in presence of current instability
15 p2662 A69-30959

Stochastic heating of protons by random magnetosonic wave propagating normal to magnetic field to explain proton energy excess in magnetotail plasma sheet
16 p2848 A69-31969

Electrostatic heating of solar wind ions from instability in two fluid solar wind model leading to preferential heating of protons over electrons
16 p2848 A69-31971

Amplitude modulated radio wave interaction with rarefied plasma in magnetic field, considering possible ionospheric heating by mechanism
16 p2754 A69-32538

Shock structure in RF heated partially ionized Ar plasma jet, using cylindrical free molecule Langmuir probe
[AIAA PAPER 69-697] 17 p3011 A69-33466

Collisionless plasma heating mechanisms from current layer turbulence in theta pinch experiment and shock wave front structure as function of initial magnetic field
17 p3013 A69-33824

Collisionless shock waves in plasma and ion and electron turbulent heating in high voltage theta pinches, noting magnetic disturbance
17 p3013 A69-33825

Turbulent heating of ions and electrons by interaction between magnetically collimated electron beam and electron beam self generated plasma
17 p3014 A69-33827

Plasma generation and heating by electron beam-plasma interactions, discussing HF fields excitation and absorption
17 p3014 A69-33828

Semiconductor plasma DC overheating instability in electric and magnetic fields, determining growth increments of oscillation amplitude
18 p3182 A69-35022

Propagation, damping, power coupling and plasma heating characteristics of harmonic ion cyclotron waves, noting temperature effects
21 p3777 A69-39455

Microwave power coupling to high density plasmas for electrons heating, using dielectric plates
21 p3779 A69-39746

PLASMA INSTABILITY

U MAGNETOHYDRODYNAMIC STABILITY

PLASMA INTERACTIONS

NT PLASMA-ELECTROMAGNETIC INTERACTION

Soviet book on atomic collisions and elementary processes in plasma covering atomic interactions, elastic and inelastic collisions, negative ions, autoionization, ion mobility and recombination
01 p0132 A69-11200

Rarefied plasma flow interactions with conductors having cross sections equal to Debye radius, noting production of self consistent electrostatic potential
01 p0134 A69-11307

Cosmic ray propagation in interplanetary space taking into account reverse effect on solar wind, deriving integrodifferential equation
02 p0306 A69-11657

Interactions of moving solar plasmas and solar magnetic fields, discussing solar velocity fields and fine structure observations
02 p0329 A69-12784

Solar wind interaction with moon, discussing core/surface layer conductivity and lunar limb shock wave formation
03 p0502 A69-14006

Transparency decrease in plexiglass during interaction with dense plasma, noting absorption independence of plasma pressure and dependence on wavelength
03 p0482 A69-14222

Quantum electrodynamics of radiation scattering from ionized interacting plasma, considering electron interactions
04 p0636 A69-15044

HF interaction of relativistic electron beam and plasma extended to include arbitrary variation of plasma density
04 p0637 A69-15046

RF electron heating by beam-plasma interaction in uniform magnetic field
05 p0804 A69-16458

Magnetosonic waves absorption in plasmas, studying collisions leading to HF energy resonant absorption at lower hybrid frequency
06 p0963 A69-16904

Shock formation in supersonic plasma flow guided by magnetic channel up to magnetic barrier
06 p0966 A69-17524

Supersonic plasma flow interaction with two dimensional magnetic dipole
06 p0967 A69-17738

Weakly ionized gas flow past discontinuous wall potential used to study edge effects and interaction problems for single and multiple flush electrostatic probes
[AIAA PAPER 69-80] 06 p0972 A69-18191

Electron bombardment ion source generated Ar plasma beam to study wakes of disks and spheres, considering plasma interaction with bodies
[AIAA PAPER 69-79] 06 p0865 A69-18200

Plasma diagnostics using scattering of laser electromagnetic radiation by plasma density function, discussing plasma species collision effect on line profiles
07 p1131 A69-18485

Model experiment on plasma flow about obstacle to simulate solar wind interaction with moon
07 p1205 A69-18851

Magnetospheric plasma probe results with Pioneer 6 and 7, discussing plasma fluctuations and solar wind interaction with geomagnetic field
07 p1128 A69-19364

Nonlinear interactions of positive and negative energy electrostatic modes of plasma immersed in magnetic field, discussing instability criterion and Landau damping
[IAEA PAPER CN-24/E-13] 07 p1196 A69-19768

Warm plasma magnetic interactions, discussing density waves, pair correlation function and transport coefficients
08 p1366 A69-20749

Nonlinear behavior of two stream instability between cold electron and ion streams
08 p1367 A69-20800

Plasma sheath-boundary interactions, analyzing emission, reflection and surface ionization effects on current densities and heat fluxes for cesium and argon
08 p1369 A69-20818

Plasma flow motion and polarizing interaction in multipole magnetic field
08 p1370 A69-21015

Frequency shift and Q change of microwave cavity caused by lossy dielectrics and plasmas, examining perturbing volume requirements for conductor behavior
09 p1544 A69-21323

Electric arc interaction with turbulent boundary layer in vortex stabilized plasmatron, noting variation in arc intensity
09 p1545 A69-21432

Mariner 2 measurements of geomagnetic field and interplanetary plasma parameters for analyzing interaction between interplanetary medium and magnetosphere during decreased solar activity
10 p1769 A69-23900

Magnetic lines of force penetration into magnetosphere accompanied by plasma insertion generating ring current responsible for main phase of magnetic storm
10 p1687 A69-23923

Voltage drop measurement across plasma anodized germanium film to determine anodization constant
10 p1742 A69-24004

Reflection of moving rarefied AR plasma from surface of nickel cylinder inserted into gas discharge tube
11 p1934 A69-25710

Trapping of plasmoids injected from two coaxial plasma sources through magnetic gaps of diverter, discussing alternate and simultaneous injection
12 p2133 A69-25976

Dynamic characteristics of plasma fluxes across magnetic field of diverter inside plasma cylinder formed during injection
12 p2134 A69-25977

Solar wind interaction with geomagnetic field simulation practically unrealizable, discussing partial simulation covering neutral magnetic layer formation on night side
12 p2149 A69-26681

Solar wind interaction with geomagnetic field, considering bow shock, field confinement in magnetosphere and stretching out of lines of force
12 p2072 A69-26735

Solar plasma flow around magnetosphere, discussing plasma velocity, density and temperature and magnetic field space and time variations
12 p2150 A69-26736

Laboratory models for solar wind and magnetosphere interactions with similarity laws of Vlasov theory as reference system
12 p2150 A69-26737

Magnetosphere model for plasma pressure by solar wind, discussing plasma drift from neutral sheet into geomagnetic tail
12 p2076 A69-27106

Incompressible conducting fluid turbulent flow velocity distribution in transverse magnetic field at small magnetic Reynolds numbers and constant MHD interaction frequency
13 p2246 A69-27498

Comet interaction with solar wind, assuming field tail coupling of ionized comet material to solar wind ions
13 p2349 A69-27817

Dissipative drift instability due to electron density gradient and dissipative mechanism /neutral-electron and ion-electron collisions/ in plasma in constant magnetic field
13 p2308 A69-27979

Collisions effect on wave propagation in homogeneous plasma, calculating permittivity tensor and electron equilibrium current using Boltzmann kinetic equation
13 p2311 A69-28104

Power output of ruby laser stimulated by strong pinch discharge plasma flux at 4000-7000 A in He
13 p2273 A69-28530

Cosmic ray propagation in interplanetary space taking into account reverse effect on solar wind, deriving integrodifferential equation
13 p2333 A69-28688

Interaction between shock tube gas discharge plasma and fast electrons ionized stationary gas, noting luminous discontinuities propagation
14 p2490 A69-28998

Magnetospheric plasma motion associated with Alfvén mode time fluctuations of magnetic field in solar wind
14 p2521 A69-29382

Ionospheric inhomogeneities models for plasma motions, considering electron-ion collisions
14 p2443 A69-29865

Conductivity tensor of collisional plasma in magnetic field, basing method on iterative procedure
14 p2503 A69-29999

Electrical conductivity tensor of many component collisional relativistic plasma in magnetic field and near equilibrium, expressing collisional part as momentum integral
14 p2503 A69-30000

Plasma-cyclotron interaction wave coupling mechanism in symmetrical double beam system in uniform magnetic field leading to unstable wave excitation along beam
17 p3015 A69-33831

Gas dynamics of interactions of tenuous ionosphere with moving satellites and diagnostic probes, using collision-free plasma kinetics methods
18 p3132 A69-35409

Microwave-plasma interaction instrumentation for supersonic channel constructed to investigate turbulent boundary layers formed over ablating heat shield materials
19 p3294 A69-35754

Electron-plasmon interaction in degenerate semiconductors, using mathematical model for rectifying metal contacts tunneling characteristics
19 p3382 A69-36049

Hydromagnetic wave-charged particle resonant interaction described by diffusion equation in momentum space, deriving diffusion coefficients and time evolution ultrarelativistic particle energy spectrum
19 p3424 A69-36335

Landau damping and echo in plasma, discussing theory, Van Kampen waves, finite amplitude wave attenuation, spin, cyclotron and plasma wave echoes
20 p3582 A69-38012

N and H plasmas and N-H plasma mixtures thermodynamic properties calculation, discussing numerical methods and corrections for electrostatic interactions
21 p3847 A69-38421

Solar atmosphere radio emission generation by hydrodynamic shock wave interaction with coronal plasma, treating corona as ideal gas consisting of protons and electrons
22 p4009 A69-39984

Josephson currents interaction with LF surface plasmons in superposed thin dielectric and superconducting metal films, noting I-V characteristics
22 p3992 A69-40420

Coupling coefficients and excitation increments determined for nonlinear interactions of surface waves in nonisothermal semibounded plasma
22 p3990 A69-40790

Interaction between two temperature plasma flux and electrodes in MHD channel with crossed electric and magnetic fields, studying boundary layer dynamics
22 p3991 A69-41022

Nonlinear plasma physics, discussing nonequilibrium effects, wave-wave coupling, wave-particle interactions, single nonlinear wave behavior, etc
23 p4197 A69-42312

Solar wind collisionless hydromagnetic flow interaction with planetary atmosphere, using mathematical model to determine bow shock position limits in atmosphere
24 p4368 A69-43178

Critique of magnetic response model for interaction of moon and interplanetary plasma magnetic field proposed by Blank and Sill
24 p4384 A69-43190

Magnetic and electron temperature interaction effects in fast MHD shock waves in slightly ionized plasma
24 p4356 A69-43361

Hydrogen plasma-axisymmetric magnetic field interaction, studying plasmoid motions during exit from field
24 p4358 A69-43472

Hydrogen plasmoids in axisymmetric magnetic field with acute angle geometry produced by opposing coils, measuring induction current field and plasmoid density distribution
24 p4358 A69-43473

PLASMA JET WIND TUNNELS

DC arc plasma torch as heat source in plasma tunnel, discussing nonuniformity of plasma flame
02 p0291 A69-12424

Diagnostic techniques for high speed low density DVL plasma wind tunnel noting problems of pressure, temperature, hot-wire and calorimetric measurements [DVL-849]
04 p0584 A69-14823

Continuous supersonic plasma wind tunnel obtained using magnetic Laval nozzle made by modification of Q device normal magnetic field configuration
15 p2589 A69-30909

Steady state plasma wind tunnel for flow around ionospheric satellites, studying wakes of cylinders and spheres [AIAA PAPER 69-673]
17 p2893 A69-33488

Free stream velocity in high enthalpy arc heated wind tunnel by measuring imposed temperature modulation apparent phase shift, describing circuit diagrams
22 p3926 A69-40444

Arc-heated hypersonic wind tunnel for simulated spacecraft reentry environment, aerodynamic heating characteristics and research applications
22 p3927 A69-40595

Arc-heated plasma jet wind tunnel flow properties in plenum chamber by spectroscopic techniques, measuring electron excitation, temperature and densities
22 p3990 A69-40596

PLASMA JETS

Faraday rotation of plane polarized microwave beam for measuring precursor ionization from exploding wire discharge in various gases
01 p0129 A69-10663

Plane MHD jets with variable conductivity, showing effective mixing length as function of distance
01 p0130 A69-10773

Structure of shock waves from MHD jet injected into zero viscosity, finite thermal and electrical conductivity medium analyzed by nonlinear differential equation system
01 p0130 A69-10774

Plasma discharge energy balance analysis to determine discharge power and temperature as function of electric field parameters
02 p0286 A69-11572

Thermal radiation effects on two dimensional steady MHD jet of conducting ionized gas confined by magnetic field
02 p0287 A69-11831

Quasi-one dimensional analysis of MPD arcs with nonequilibrium ionization taking into account finite rate processes and variable area [AIAA PAPER 68-87]
02 p0291 A69-12505

Radiation effect enhancement in supersonic plasma jet cooled by rapid expansion, giving energy equation for electron cooling rates to analyze electron temperature
02 p0292 A69-12557

Plasma jet motion in time constant and time variable magnetic fields noting particle deflection, polarization loss, capture and cut-off
02 p0292 A69-12558

Plasma jet mass structure investigated for decomposition during passage through vacuum by spectrometer and probe techniques
03 p0478 A69-13841

Pulsed arc source using plasma jet to obtain intense hydrogen ion beam
03 p0412 A69-13842

Frequency conversion in sheath capacitance of glow discharge plasma contained within metallic coaxial cylinders
04 p0634 A69-14456

LF electrical resonance oscillations in nonisothermal plasma jet flow, noting pressure and magnetic field effects on amplitude and frequency
04 p0638 A69-15174

Electron temperature time variation measurement in plasma-beam discharge by method based on single spectral line
04 p0638 A69-15368

Low temperature plasma electric arc source operation describing current voltage characteristics and potential distribution
05 p0802 A69-15902

Solid phase particle motion in plasmatron with colliding jets, measuring W particle heating by optical method
05 p0802 A69-15975

Energy balance of plasma radiation arcs based on mean pinch pressure and mean flow speed
05 p0802 A69-15996

Hall effect current influence on conductance of high current arcs
05 p0803 A69-15999

Doppler shift measurements of axial and rotational velocities in MPD arc, using reference lines from iron arc [AIAA PAPER 69-110]
06 p0972 A69-18171

Soviet collection of papers on turbulent jets of air, plasma and real gas
07 p1049 A69-18392

Electron acceleration in microtron through injection from low pressure gas discharge plasma
08 p1279 A69-19803

Spectroscopic analysis of hydrogen spark plasma discharge parameters at small PD values, discussing shock wave initiation accounting for transition to quasi-stable phases
08 p1360 A69-20100

Ar-H plasma arc radial temperature distribution determined by photoelectric spectroscopy in visible range
08 p1366 A69-20758

Electroslag welding using plasma jets with powdered material, discussing various parameters
08 p1321 A69-20766

Partially ionized argon plasma stagnation flow past blunt body using multifluid theory, obtaining flow profiles
08 p1369 A69-20817

Impurity elimination from hydrogen plasma jets injected from coaxial source normal to octupole magnetic field
08 p1370 A69-21016

Hall current influence on plasma jet interaction with space periodic magnetic field created by system of coaxial coils with alternating current directions
08 p1370 A69-21017

Plasma flow from hot cathode discharge in magnetic field increases ion flux intensity and prevents flow divergence in vacuum
08 p1370 A69-21075

Arc jet generation and control noting application to hyperthermal aerospace environment studies, wind tunnels and materials heating and fabrication
08 p1371 A69-21128

Rotating spoke in unstable pulsed MPD arc, noting rotation frequency and resemblance to plasma rotation [AIAA PAPER 69-234]
09 p1561 A69-21219

SERT 2 mercury vapor fed hollow cathode operated in bell jar, determining volt-ampere characteristics and flow rates for plasma diagnostics [AIAA PAPER 69-258]
09 p1561 A69-21221

Lithium vapor fueled applied field MPD arc jet performance using open end heat pipe vaporizer and hollow cathode [AIAA PAPER 69-241]
09 p1561 A69-21222

Hall effect and mass flow influence on MPD arc jet radial pressure profile calculated as function of pressure and magnetic field [AIAA PAPER 69-246]
09 p1562 A69-21226

Experimental and theoretical investigation of mass injection effect on high current MPD arc [AIAA PAPER 69-266]
09 p1564 A69-21242

Discharge plasmas produced from solid materials at low pressures and temperatures and compressed against wall by magnetic field
09 p1547 A69-21594

Carbon dioxide-nitrogen-helium laser with RF excitation of discharge plasma, noting high power per unit length
09 p1516 A69-21678

Fast Ba ion filament cloud injection into ionosphere using explosive shaped charge technique, noting application to ionospheric electric field measurement
09 p1539 A69-21752

Nonthermal microwave emission from cold cathode PIG discharge plasma, noting wide spectrum of electron cyclotron frequency harmonics
09 p1549 A69-22018

Plasma dissipative drift instability and nonlinear wave interaction from discharge with oscillating electrodes, investigating LF plasma oscillations
09 p1550 A69-22019

Alfven oscillations in inhomogeneous decaying plasma from pulsed discharge with oscillating electrons
09 p1550 A69-22020

Ionization and current growth in discharge in rotating plasma device with mirror shaped magnetic field
09 p1552 A69-22042

Rotating plasma gravitational instability during discharge as function of centrifugal acceleration, noting Coriolis and Larmor effects
09 p1552 A69-22043

Plasma wave excitation and dissipation in fast thetatron discharge, indicating electron nonadiabatic inductive acceleration without equilibrium orbit
09 p1552 A69-22046

Temperature pulsations radial distribution in plasma jet using plasmatron without mixing chamber
10 p1729 A69-23432

Ionization front propagation rate in crossed electric and magnetic fields in Ar-Cs, Hg-Cs and Ne-Xe discharge plasmas
10 p1733 A69-23447

Discharge plasma ionized waves, determining mechanism of wave propagation and instabilities
10 p1740 A69-23699

Neon discharges, discussing similarities in type p plasma ionization waves generated by pulsing
10 p1740 A69-23721

Explosive and reversible onset of helical instability in weakly ionized discharge plasmas, noting ambient noise level role
11 p1924 A69-24299

Radial distribution profiles of charge carriers in low temperature gas discharge plasma accounted for in terms of volume recombination
11 p1925 A69-24330

Expansion velocity of discharge plasma in exploding wires measured by X ray flash and streak photography, noting discrepancy
11 p1926 A69-24472

Dwell time of sample particles in plasma excitation zone, noting effect on spectral analysis of sample materials injected into spark discharge plasma
11 p1926 A69-24624

Spectrum space-time characteristics of electrically produced plasma discharges magnetically compressed to discharge tube wall, using spectrochromograph and spectrographs
11 p1927 A69-25217

Charged particle concentration near electrodes in high current pulsed discharge with separated flames at atmospheric pressure determined by measuring quadratic Stark effect
11 p1927 A69-25219

Temperature and electron concentration in plasma spark obtained in air by focusing Q switched laser radiation
11 p1928 A69-25235

Monograph on schlieren-optical technique for plasma beam temperature measurements using photoelectric scanning device
12 p2134 A69-26120

Electron concentrations in steady Ar and Ar-He plasma jets measured with microwave Fabry-Perot interferometer and Stark broadening of H beta line
12 p2317 A69-26537

Model, assuming electron thermal conductivity contribution, applied to studying solar plasma discharge characteristics in presence of three dimensional thermal sources in solar corona
12 p2149 A69-26680

Parameter measurement technique for low pressure helical pulse plasma discharges, determining spatial distribution of HF electric and magnetic fields and current density
12 p2140 A69-27124

Dense plasma jets in flowing HF flame discharges, discussing energy balance and longitudinal and radial temperature distribution
12 p2140 A69-27127

Oscillator parameter matching to flame discharge parameters to obtain optimal power for powering flame discharge for plasma jet source
12 p2140 A69-27129

Arc plasma jets radial velocity profiles measured by two probes in cyclic movement between jet edge and middle, including error estimation
13 p2307 A69-27611

Deuterium plasma jets passage through pulsed magnetic field by means of thermal and diamagnetic probes, noting magnetic field strength effect
13 p2311 A69-28107

Plasma jets tangential injection into toroidal magnetic field, discussing polarization interaction and depolarization effect
13 p2311 A69-28108

Alternating current plasma arc coaxial flow stabilization [AIAA PAPER 68-706] 13 p2313 A69-28232

Plasma jets from MPD accelerators, analyzing swirl, entrainment and pressure distribution using gasdynamic probes 13 p2313 A69-28242

LF wave propagation in DC discharge hydrogen plasma, noting self and artificial wave excitation 13 p2316 A69-28584

Interaction between shock tube gas discharge plasma and fast electrons ionized stationary gas, noting luminous discontinuities propagation 14 p2490 A69-28998

Electron and ion separation as function of plasma potential drop in Langmuir cathode layer in arc regime 14 p2490 A69-29237

Rasor phenomenological theory of space ionization in arc mode regime of Cs thermionic converter 14 p2402 A69-29242

Experimental and theoretical data correlation on low voltage arc in thermionic converters using cesium vapor, describing discharge plasma by solving differential equation system 14 p2404 A69-29254

Linear polarization achieved in He-Ne laser by applying external transverse magnetic field to plasma discharge 14 p2459 A69-29569

Pulsed HF discharge analysis in hydrogen based on laser light scattering at plasma electrons, noting presence of satellites 14 p2451 A69-29781

Light emission intensity correlation functions associated with LF oscillations in beam plasma discharge 14 p2498 A69-29814

Plasma energy and energy replacement time dependent on discharge pulse shape and magnitude 14 p2499 A69-29848

Flow phenomena associated with electrically conducting boundary layer jet injection through slot into uniform slipstream in presence of transverse magnetic field 14 p2501 A69-29917

Spectroscopic determination of temperature fields in water and transpiration cooled constricted Ar arc jets at atmospheric pressure 15 p2657 A69-30155

Semiautomatic recording device to determine gas discharge ion and electron sources operation modes optimum parameters 15 p2658 A69-30237

Radiation effect enhancement in supersonic plasma jet cooled by rapid expansion, giving energy equation for electron cooling rates to analyze electron temperature 15 p2658 A69-30254

Plasma jet motion in time constant and time variable magnetic fields noting particle deflection, polarization loss, capture and cut-off 15 p2658 A69-30255

Plasma arc characteristic and radiation at high pressure and temperature showing strong electrical field strength and radiation increases with pressure 15 p2659 A69-30377

Single and two phase subsonic plasma jets temperature and velocity distribution, noting reduction by condensed phase and use of Schlichting curves 15 p2663 A69-30989

Metal particles evaporation kinetics in plasma arc, determining total and unsteady evaporation time by spectroscopy and absorption radiography 15 p2663 A69-30990

Spectroscopic measurements of charged particle concentrations in jet produced by pulsed plasma generator 15 p2663 A69-30991

Iron and stone meteorites ablation using electrodeless plasmatron and filmed onto IR films 15 p2697 A69-31252

Electrical and thermal conductivities of high pressure arc plasmas from I-V characteristics and radial temperature profile 16 p2817 A69-31644

Temperature profiles in laminar boundary layer with endothermal reaction investigated using nitrogen plasma jet in rarefied gas wind tunnel 16 p2821 A69-31833

Micrometeorite simulation by wire explosion plasma, discussing energy requirements and simulator performance 16 p2821 A69-31839

High temperature ionized turbulent argon jet gasdynamics noting electron density 16 p2770 A69-31889

Electron temperature time variation measurement in plasma-beam discharge by method based on single spectral line 16 p2822 A69-32115

Discharge chamber plasma processes in electron bombardment ion thrusters, considering factors affecting thruster performance [AIAA PAPER 69-494] 16 p2845 A69-32735

Particles maximum diameter numerical values for melting during injection into plasma jet calculated for various metals and refractory dielectrics 17 p3009 A69-32825

RF high pressure plasma discharges contained within radial inflow vortex, measuring radiation efficiencies, power densities and radiation fluxes [AIAA PAPER 69-695] 17 p3010 A69-33442

Shock structure in RF heated partially ionized Ar plasma jet, using cylindrical free molecule Langmuir probe [AIAA PAPER 69-697] 17 p3011 A69-33466

LF electrical resonance oscillations in nonisothermal plasma jet flow, noting pressure and magnetic field effects on amplitude and frequency 18 p3180 A69-34716

Plasma arc systems and applications, noting transferred and nontransferred jets with emphasis on plasma spraying, surfacing, welding and cutting [SBAC PAPER 18] 20 p3550 A69-37453

Luminous tenuous collimated electron beam from plume of MPD arc in fiberglass vacuum tank, examining beam trajectory in geomagnetic fields 20 p3582 A69-38236

Plasma capture in stellarator diverter aperture with asynchronous plasma jets injection through diverter magnetic slots, discussing plasma cylinder density effect 21 p3776 A69-38585

Polymer films damage due to supersonic plasma jets, comparing fracture relief of oriented and unoriented polymers 21 p3752 A69-39081

Coronal jet resulting from chromospheric burst observed during 22 September 1968 total solar eclipse 22 p4028 A69-40716

Polymer film breakdown under impact of supersonic plasma beam pulses from capillary discharge chamber, including photomicrographs of cavities and structural defects 22 p3974 A69-41031

Argon plasma jet spectral radiation properties, considering electron density, recombination, excitation, argon density, etc 22 p3991 A69-41052

Radial pressure distribution in steady state rotationally symmetrical plasma jet subjected to axial magnetic field, emphasizing mass entrainment effect [DGLR-69-024A] 23 p4202 A69-41924

Spectroscopic azimuthal and axial measurement of jet velocity in MPD X9 rocket engine by spectrograph and Fabry-Perot interferometer [DGLR-69-024B] 23 p4202 A69-41925

Rocket engine plasma jet radial velocity measurement by induction-velometric method using moving probe [DGLR-69-024C] 23 p4202 A69-41926

Actuator disk model for study of azimuthally nonuniform MPD arc plasma dynamics [AIAA PAPER 68-714] 24 p4359 A69-43570

Error sources in magnetic field measurements using magnetic probes in high temperature plasmas, discussing detection, correction and elimination [AIAA PAPER 68-727] 24 p4316 A69-43571

Electrothermal waves in nonequilibrium electrical discharge in potassium seeded argon plasma 24 p4359 A69-43645

Electron density fluctuations in transition region of turbulent plasma jet, noting spiky waveform [AIAA PAPER 68-685] 24 p4360 A69-43697

PLASMA LAYERS

Stability of gravitating fluid layer of infinite extent but finite thickness including Hall effect 01 p0128 A69-10342

Coupled wave equations for propagation transverse to magnetostatic field in horizontally stratified and magnetized gyrotropic warm plasma 01 p0129 A69-10611

Horn antenna far field radiation pattern distortion by isotropic plasma slab, noting attenuation variation with electron density 02 p0218 A69-12335

Plasma pause and relation to ion composition in topside ionosphere, using Bohm coefficient for turbulent diffusion 02 p0246 A69-12741

Electromagnetic wave passage through plane gyrotropic layer of magnetized plasma, analyzing polarization and energy transfer 03 p0397 A69-13709

Fast time r moving striations in plasmas and dependence of ionization frequency on electron mean energy 03 p0477 A69-13801

Plasma rotation in current layer of pulsed inductive accelerator [AIAA PAPER 68-86] 04 p0635 A69-14702

Field strength, electron temperature and ion concentration fluctuations in axial direction determined from measurements between homogeneous and stratified plasma columns 05 p0800 A69-15736

High resolution electron and proton energy measurements by sounding rockets indicating plasma sheet as source of energetic auroral electrons 05 p0756 A69-16273

Spatial dispersion of electromagnetic waves reflection from moving plasma layer in magnetic field, determining transmission and energy absorption coefficients 06 p0886 A69-16895

Electromagnetic wave transmission and reflection at boundary of relativistic collisionless plasma, using Laplace transformation 06 p0968 A69-17783

Ion-acoustic wave excitation in plasma layer affected by incident p-polarized magnetic wave, deriving expressions for reflection, transmission and energy absorption coefficients 08 p1370 A69-21025

Kinetic theory of electromagnetic wave passage through magnetoactive plasma, discussing dispersion and specular and diffuse reflection 09 p1550 A69-22022

Kinetic theory of electromagnetic wave propagation in infinite laminated plasma with different dielectrics, determining attenuation 09 p1550 A69-22023

Excitation of plane plasma layer in magnetic field perpendicular to wave vector of excitation wave in gyrotropic waveguide 11 p1927 A69-24916

Te waves propagation along plasma sheet between conducting plates, determining vertical plasma density distribution 15 p2569 A69-30939

Low density cold plasma effect on stability of cylindrical layer of charged particles against electrostatic perturbations in uniform magnetic field 16 p2816 A69-31635

Electron temperature and number density measured at atmospheric pressure in plasma thermal laminar boundary layer adjacent to cooled wall [AIAA PAPER 69-692] 17 p3011 A69-33446

Nonlinear interaction of plane electromagnetic wave with inhomogeneous plasma layer, noting concentration and electric field discontinuity 17 p2922 A69-33693

Plane electromagnetic wave diffraction on conducting sphere situated in absorbing nonuniform plasma layer 19 p3275 A69-36340

Electromagnetic radiation from slot excited ground plane covered by inhomogeneous plasma layer, considering far field radiation pattern 20 p3495 A69-37852

Auroral zone Birkeland currents in magnetosphere, analyzing particle trajectories for plasma sheet energy distribution and Alfvén layer position 21 p3792 A69-39567

Reflection and transmission coefficients for harmonic electromagnetic wave incident at parabolic layer of stratified isotropic plasma 22 p3901 A69-41020

Thermal radiation diffraction of dielectric cylinder /cold plasma model/ containing N plus one layers with arbitrary temperatures and permittivities 23 p4123 A69-42028

PLASMA LIFETIME

Plasma lifetime in spherical multipole magnetic field trap compared to cusp trap 08 p1360 A69-20082

Time rates for growth and damping of resistive instability in gaseous plasma in crossed electric and magnetic fields 08 p1369 A69-20886

Lifetime and radial oscillations of magnetically confined laser produced plasma, solving hydrodynamical equations 09 p1545 A69-21493

Cesium plasma confinement time improvement in symmetrically heated tungsten end plates of Q machine 11 p1925 A69-24314

- Plasma experiments with TM-3 apparatus under stable discharge conditions in H, discussing energy loss mechanisms, transport coefficients, reciprocal lifetime, etc
16 p2820 A69-31795
- Semiconductor plasma production effects and pinching and microwave radiation in InSb plasma, discussing impact ionization, two photon absorption and plasma lifetime
19 p3389 A69-36545
- PLASMA LOSS**
- Atomic flux from Cs and K ion recombination on hot end plates of Q machine measured, noting contribution to total plasma end loss rate
08 p1358 A69-19810
- Warm plasma addition to mirror confined hot plasma stabilizing convective loss cone mode
09 p1551 A69-22040
- Equilibrium loss in closed cycle MHD generator using rare gases binary mixtures as working fluid
10 p1737 A69-23468
- Thermal balance of intergalactic gas, discussing plasma energy losses due to He emission and reverse Compton electron scattering and rapid cooling effect
11 p1954 A69-24381
- Back scattered electron inelastic LEED spectra of cesium plasma in W/100/-Cs system, noting strong loss peak
12 p2132 A69-26116
- Magnitude and type of wall losses from small opening in discharge tube for positive plasma column of low pressure glow discharge in hydrogen
14 p2493 A69-29691
- Interchange stability and drift motion of plasma with loss from ends of axisymmetric magnetic bottle, using hydromagnetic equations
15 p2664 A69-31100
- Thermal balance of intergalactic gas, discussing plasma energy losses due to He emission and reverse Compton electron scattering and rapid cooling effect
24 p4389 A69-43771
- PLASMA OSCILLATIONS**
- Inhomogeneous magnetically confined plasma stability, examining dissipative effects on spectra of drift oscillations with kinetic theory
01 p0126 A69-10187
- Asymptotic method for analyzing small long wave perturbations in plasma, showing instability with respect to perturbations propagating at angles to ion-acoustic wave
01 p0131 A69-10788
- Landau damping in plasma, noting competing effects of nonlinearities and collisions on formation of plateau in spatially homogeneous distribution function
01 p0133 A69-11215
- Ion acoustic wave dispersion in highly ionized Ar plasma in longitudinal magnetic field, noting effects of several phenomena
01 p0133 A69-11216
- Nonlinear interaction between longitudinal Langmuir waves and parallel wave vectors in heated plasma study, based on Cauchy problem of kinetic equation for electron distribution
02 p0285 A69-11461
- Plasma ion oscillation suppression by intensified electron plasma oscillations
02 p0287 A69-11934
- Nonlinear large amplitude electrostatic and electromagnetic oscillations in cold plasma having one dimensional spatial variations and fixed neutralized ion background
02 p0288 A69-12171
- Equations for studying plasma stability in sheared magnetic field examined for normal mode and wave packet perturbations
02 p0289 A69-12173
- Free fluid hydrodynamics equations applied to weakly ionized plasma stability, considering drift oscillations excitation
02 p0291 A69-12553
- Thermodynamic stability of plasma with strong interaction, discussing relationship to simultaneous oscillation forms
02 p0292 A69-12635
- Electromagnetic oscillations in ionized plasma, assuming higher oscillation frequency than collision frequency
02 p0292 A69-12643
- Radar observations of sun, determining reflected radio signal component formed by combination scattering in coronal plasma oscillation
03 p0505 A69-13082
- Relationship between instabilities and turbulence in plasma, using spectrum of plasma fluctuations
03 p0474 A69-13115
- Electrostatic acoustic wave mode with plasma motion in magnetic surfaces perpendicular to field in toroidal systems with geodesic curvature
03 p0475 A69-13147
- Dipole and quadrupole bremsstrahlung and damping of electron plasma oscillations, finding negative k-square collisional electron-ion contribution
03 p0475 A69-13149
- Helium plasma ion oscillations damping by external RF electric field at sheath-plasma resonance condition
03 p0476 A69-13323
- Frequency of damped oscillations in plasma in DC field, noting variation with electron density and DC field
03 p0479 A69-14050
- Dispersion equation for electron-ion and electron-hole plasma linear oscillations in crossed electric and magnetic fields
03 p0480 A69-14134
- Electron plasma oscillations diffusion due to scattering by large amplitude ion wave background, noting electron wave spectrum evolution
03 p0483 A69-14256
- Nonlinear electron oscillations in plasma, deriving asymptotic expression for plasma perturbation
04 p0635 A69-14552
- Electric field and energy dispersion law effects on plasma oscillations in semiconductors, calculating composite oscillation frequency
04 p0642 A69-14554
- Nonequilibrium ionization rate in arc discharge, studying perturbations effect in near cathode Langmuir layer
04 p0635 A69-14763
- Nonlinear damping of circularly polarized electromagnetic wave propagating in plasma along magnetic field, noting particle motion in resonance region
04 p0558 A69-14982
- LF electrical resonance oscillations in nonisothermal plasma jet flow, noting pressure and magnetic field effects on amplitude and frequency
04 p0638 A69-15174
- Perturbed wake behind spherical models in rarefied plasma flow, noting effects of electron temperature and electric potential of models
05 p0803 A69-16048
- Fluctuations in multipole confined plasmas explained by solving general integral equation, yielding hydromagnetic and frequency modes
05 p0804 A69-16385
- Ion plasma oscillations harmonics in helium plasma produced by back diffusion source, relating harmonics amplitude to electron density
05 p0804 A69-16459
- Electromagnetic waves transformation and scattering in plasma in electric field, showing abrupt increase at certain critical value
06 p0886 A69-16894
- Bounded and spatially separated plasmas wave oscillations stability in magnetic field, observing hydrodynamic slipping and drift instability
06 p0963 A69-16903
- Resonant four wave interaction for nonlinear energy transfer in electron plasma oscillations
06 p0963 A69-17143
- Resonance particle effects on flute oscillation kinetic stability when resonance particles drift under influence of magnetic field inhomogeneity
06 p0965 A69-17516
- Integrodifferential equation for plasma oscillations solved for effect of ion Larmor radius size and intrinsic electric field on flute instability of axially symmetric plasma
06 p0966 A69-17520
- Surface plasmons microscopic theory based on modified random phase approximation
06 p0967 A69-17711
- Dispersion relation for longitudinal oscillations of one component weakly ionized plasma without intercarrier collisions in uniform constant electric field
06 p0970 A69-17957
- Microwave oscillations during interaction between electron beam and plasma in electron tube
07 p1189 A69-18504
- Geometrical optics method for differential equations of fourth order in applications to LF plasma oscillations
07 p1190 A69-18697
- Periodic pulling mechanism for explaining transition to turbulence in bounded plasma with weakly unstable drift modes
07 p1194 A69-19400
- Longitudinal electrostatic oscillations in plasma with Fermi distribution of energies, noting oscillation frequency dependence on electron density
08 p1359 A69-19985
- Exact solution to kinetic equation for resonant three wave coupling in weakly turbulent plasmas, assuming only single triplet of modes interaction
08 p1360 A69-19989
- Collisionless shock waves in rarefied plasma, discussing dispersion effect and oscillatory shock wave structure
08 p1303 A69-19996
- Longitudinal excitations, discussing plasma equilibrium distributions
08 p1362 A69-20286
- Plasma oscillation modes perpendicular to magnetic field used to study energy conversion by wave coupling across density discontinuity
08 p1367 A69-20795
- LF electric potential oscillation of discharge plasma, describing oscillation behavior by theory of dissipative drift instability of weakly ionized plasma
08 p1370 A69-21020
- Partially ionized plasma oscillations in crossed magnetic and electric fields, noting role of LF particle collisions
08 p1370 A69-21079
- Scattering and transformation of electromagnetic waves in plasma in crossed electric and magnetic fields showing radiation spectrum maxima due to ion-acoustic oscillations propagation
08 p1277 A69-21080
- Rotating plasma disturbances onset in MPD arc, determining magnetic field dependence on mass flow, background pressure and propellant
[AIAA PAPER 69-232]
09 p1562 A69-21225
- Lifetime and radial oscillations of magnetically confined laser produced plasma, solving hydrodynamical equations
09 p1545 A69-21493
- Inhomogeneous collisionless plasma drift-oscillation stability in magnetic field augmented by E wave HF field
09 p1546 A69-21564
- Localized plasmons and optical phonons occurrence on local plasma levels, noting role of impurity atom in localized exciton-plasma resonance
09 p1548 A69-21674
- Plasma dissipative drift instability and nonlinear wave interaction from discharge with oscillating electrodes, investigating LF plasma oscillations
09 p1550 A69-22019
- Alfven oscillations in inhomogeneous decaying plasma from pulsed discharge with oscillating electrons
09 p1550 A69-22020
- Raman microwave scattering with low frequency oscillations caused by plasma drift instabilities
09 p1550 A69-22021
- Plasma oscillation intensities at combination frequencies under assumption of plasma wave and ion acoustic wave propagating along z axis
09 p1550 A69-22024
- Nonlinear longitudinal oscillations in nonisothermal electron plasma with Maxwellian distribution in velocity space and different temperatures of electrons and ions
09 p1550 A69-22025
- Unstable transverse potential oscillations in plasma with beam anisotropy and initial density modulation and analogy with known electrostatic oscillations
10 p1727 A69-23092
- Asymptotic method for analyzing small long wave perturbations in plasma, showing instability with respect to perturbations propagating at angles to ion-acoustic wave
10 p1653 A69-23107
- HF magnetic field effect on oscillations and instabilities of plasma confined by fixed magnetic field
10 p1739 A69-23623
- Transport of matter in nonisothermal weakly ionized plasma due to traveling ion-acoustic wave propagation, noting plasma oscillations and instability
10 p1741 A69-23945
- Density modulated charged particle beam interaction with plasma under paramagnetic resonance, analyzing longitudinal oscillations and parametric instability zone
10 p1741 A69-23947
- One dimensional electrostatic plasma oscillations in alternating external electric field, noting plasma stability and electron-electron two stream instability
11 p1924 A69-24298
- Electric field fluctuations in inhomogeneous plasma calculated by test particle method, interpreting results in convective modes terms in plasma control and stability
11 p1924 A69-24301

Electron number density LF oscillations for ionized gas identified with periodic solutions to neutral and charged particle plasma continuity equations
11 p1925 A69-24315

Local potential method extended to study plasma oscillations inhomogeneous kinetic equations in presence of linear or nonlinear collision operators
11 p1925 A69-24316

Hydromagnetic instability onset in dissipative flow of electrically conducting fluid between rotating permeable perfectly conducting cylinders, noting oscillatory axisymmetric critical modes
11 p1926 A69-24895

HF instability of low pressure discharge in magnetic field, discussing plasma diffusion and oscillations
11 p1927 A69-24912

Normal mode representation of HF properties of inhomogeneous plasma, analyzing Vlasov equation for free oscillations under external driving field
11 p1929 A69-25269

Natural oscillations excitation in magnetoactive plasma by modulated electron beam ascribed to Doppler or Cerenkov effects
11 p1932 A69-25535

Natural oscillations excitation instabilities by modulated ion beams in magnetoactive plasma ascribed to anomalous Doppler effect
11 p1932 A69-25536

Microwave oscillations amplitude spatial distribution in gas discharge plasma excited by electron beam
11 p1933 A69-25542

Flute oscillation instability of dense plasma cylinder under nonuniform electric field, analyzing oscillation spectrum properties
11 p1934 A69-25707

Correlation functions and spectral density of current fluctuations in weakly ionized plasma flows
11 p1934 A69-25715

Steady equilibrium collisionless plasma in oscillating electromagnetic field, describing formalism for linear relation between perturbation and charges and currents induced in plasma
12 p2135 A69-26284

Low pressure arc discharge plasma, studying ion-acoustic oscillations development in magnetic field
12 p2136 A69-26527

Plasma-electron beam interaction induced HF oscillations, obtaining nearly noise free oscillations
12 p2137 A69-26529

LF oscillations nonlinear excitation increment in plasma by electron beam found proportional to reciprocal of wave potential
12 p2138 A69-26709

Electron motion effects along magnetic field lines on axisymmetric torsional hydromagnetic oscillations in inhomogeneous low beta plasma, discussing resonance trapping
12 p2076 A69-27107

Plasma ion oscillations excited in plasma consisting of ion beam and thermal electrons produced by back diffusion sources
13 p2304 A69-27301

Vlasov equations solved for electrons and ions in electromagnetic field, coupling electric field to density oscillation modes of plasma
13 p2306 A69-27461

Laser light scattered from arc discharge, observing enhanced plasma oscillations
13 p2307 A69-27629

Semiconductor luminescent devices and laser pumping by solar radiation modulated to interact resonantly with solid state plasma oscillations and electric field in crystal
13 p2272 A69-27969

Collisions effect on wave propagation in homogeneous plasma, calculating permittivity tensor and electron equilibrium current using Boltzmann kinetic equation
13 p2311 A69-28104

Current carrying cylindrical plasma column oscillations surrounded by electric excitation with multiple feedback radio, discussing stabilization possibility
13 p2311 A69-28106

Microwave and LF oscillations interactions in plasma beam system, showing oscillation amplitude dependence on frequency relationships
13 p2312 A69-28111

Unstable weakly ionized HF magnetoplasma fluctuations with no axial drift, noting phase velocity parametric dependence
13 p2312 A69-28197

Linearized dispersion equation for electron oscillations in isotropic plasma with known electron velocity distribution function
13 p2313 A69-28328

Electromagnetic field induced plasma oscillation amplitude dependence on field frequency as function of field amplitude and discharge current at low N pressures
13 p2313 A69-28332

Variational method for time invariant states of collisionless plasma in oscillating electromagnetic field
13 p2314 A69-28365

Whistler type electromagnetic waves excitation by electron beam in plasma, noting intensity dependence on electron frequency
13 p2314 A69-28443

Magnetic and electric field effects on undamped electron-hole LF frequency plasma oscillations in spatially homogeneous nonpolar semiconductor
13 p2323 A69-28581

MHD waves and oscillations in cylindrical plasma column contained by longitudinal magnetic field, noting dispersion equations
14 p2489 A69-28732

Microwave oscillations in low pressure arc noting long gas discharge in small transverse dimensions
14 p2489 A69-28739

Radar observations of sun, determining reflected radio signal component formed by combination scattering in coronal plasma oscillation
14 p2515 A69-28764

Electron plasma oscillations and electron whistler of solar wind near Jupiter orbit
14 p2513 A69-29115

Secular terms for parallel component of electric current parallel to permanent magnetic field in toroidal MHD oscillations
14 p2492 A69-29369

Quasi-linear approximation for spectrum analysis of LF plasma wave oscillations in steady electric field
14 p2492 A69-29468

Plasma surface HF harmonic oscillations amplitude determined by comparing side frequencies intensities of reflected microwave signal
14 p2497 A69-29794

Plasma density and conductivity radio interferometry during ultrarapid disturbances based on electromagnetic wave phase shift dependence on density
14 p2498 A69-29803

Light emission intensity correlation functions associated with LF oscillations in beam plasma discharge
14 p2498 A69-29814

Collisionless Ce and K plasmas measurements to determine steady state parameters and LF oscillations, noting noise relationship to drift instability
14 p2499 A69-29849

Nonlinear longitudinal plasma oscillations, treating resonant particles, single mode and wave interactions
14 p2501 A69-29953

LF electrostatic oscillations of inhomogeneous solid state plasma with small number of current carriers in parallel external electric and magnetic fields
15 p2665 A69-30042

Free fluid hydrodynamics equations applied to weakly ionized plasma stability, considering drift oscillations excitation
15 p2658 A69-30250

Incident electromagnetic waves Raman scattering at turbulent plasma oscillations, obtaining plasma intrinsic radiation spectrum
15 p2659 A69-30728

Hydromagnetic stability calculations applied to umbral models, showing overstable oscillations relation to thermal hydromagnetic wave generation occurrence in sunspots
15 p2693 A69-30780

MHD stability and equilibrium of toroidal high beta configurations achieved by superimposing oscillating magnetic field on linear plasma column
15 p2660 A69-30877

Mode-mode coupling calculation for finite amplitude collisional drift waves demonstrating inherently nonlinear phenomena
15 p2660 A69-30916

Steady state solutions for parametric excitations in various limits in plasmas, allowing for higher order mode coupling
15 p2661 A69-30919

High order plasma wave echoes formulation and relation to initial perturbations based on Landau solution of initial value problem for Vlasov equation
15 p2661 A69-30926

Steady oscillations of active nonlinear system of nonisothermal plasma and charged particle flux, noting steady ion-acoustic waves
15 p2662 A69-30947

Ion-acoustic oscillations effect on weakly ionized plasma electrical conductivity, using BGK collision integral model
15 p2662 A69-30970

Small perturbations propagation in plasma at Newtonian acoustic velocity, determining temperature, pressure and current densities
15 p2663 A69-30993

Plasma modes, critical fluctuations and optical properties electric field dependence in two valley model of Gunn instability semiconductors
15 p2581 A69-31240

Covariant dispersion relations for relativistic plasma oscillations for many component plasma in external magnetic field
16 p2816 A69-31633

Stationary phase method of integration for growth and decay of resonant plasma oscillations excited by small pulsed dipole, noting Landau damping
16 p2817 A69-31641

Linearized kinetic equation for perturbed electron distribution function, detailing plasma oscillations along magnetic field by Landau collision term
16 p2818 A69-31674

Perturbation theory for nonlinear oscillations in ionized plasma, treating electron-neutral collisions effect by Boltzmann-Vlasov equation relaxation term, noting distribution function
16 p2820 A69-31702

Parametric amplification of ion-acoustic oscillations in plasma with LF electric field, noting suppression and resonance
16 p2821 A69-31797

Electromagnetic wave propagation in plasmas and plasma instabilities due to oscillations, deriving equations for frequency distributions in various plasma compositions
16 p2823 A69-32243

Discharge parameters modulation caused by acoustic wave propagating in partially ionized plasma, deriving perturbation current density and irradiated light intensity
16 p2752 A69-32364

Triple probes behavior in plasmas under AC electric field perturbations
17 p2920 A69-33592

Oscillations excitation between ion cyclotron and electron plasma frequency in He ion beam generated plasma
17 p3014 A69-33830

Damping of plane sinusoidal wave in cold collisionless plasma, studying supercritical amplitude oscillatory process
18 p3180 A69-34703

LF electrical resonance oscillations in nonisothermal plasma jet flow, noting pressure and magnetic field effects on amplitude and frequency
18 p3180 A69-34716

Plasma density in magnetosphere by measuring geomagnetic pi 2 micropulsations in direction related to polar aurora oval southern boundary, determining period of pi 2 oscillations
19 p3303 A69-36205

Plasma ion and electron concentration perturbations in wake of body moving at high velocity in collisionless plasma under steady magnetic field
20 p3459 A69-37659

Plasma oscillations of electrons of atomic system, using simple hydrodynamic model
20 p3580 A69-37818

Perturbed wake behind spherical models in rarefied plasma flow, noting effects of electron temperature and electric potential of models
20 p3581 A69-37957

Asymptotic method for analyzing small long wave perturbations in plasma, showing instability with respect to perturbations propagating at angles to ion-acoustic wave
20 p3582 A69-38005

Particle trapping and plasma oscillations in satellite disturbed ionosphere observed from Ariel and Aouette measurements, discussing frequency and wavelength relation
21 p3787 A69-38357

Nonlinear interaction of electron-acoustic oscillations in plasma, allowing for decay and inductive scattering in equation derivation for wave packet intensity
21 p3776 A69-38584

Nonlinear oscillations of inhomogeneous cold plasma in hybrid resonance region
21 p3672 A69-38588

Thermal effects of resonant coupling hydromagnetic oscillations in inhomogeneous finite-beta plasmas, ob-

taining equations for coupling modes between Alfvén and magnetosonic waves
21 p3776 A69-38710

Dispersion relations for surface plasma oscillations in normal metals for single and multiple films taking into account retardation effects, noting dielectric function
22 p3992 A69-40419

LF oscillations in electron number density of ionized deuterium, Ne and He identified from particle continuity equation
22 p3986 A69-40759

Diffuse reflection of electromagnetic longitudinal wave from magnetoactive plasma in oblique incidence
22 p3990 A69-40788

Homogeneous magnetoactive plasma longitudinal oscillations stability with fast monoenergetic ions addition, noting ion temperature increase stabilizing effect
22 p3990 A69-40789

Bernstein modes initial value-boundary value problem for half space of plasma bounded by wall and parallel unperturbed magnetic field
23 p4196 A69-41875

Rotational arc motion in MPD accelerators with strong axial fields predicted by plasma physics equations
23 p4201 A69-41909

Measurement method for relative phase shift between density and potential oscillations in Cs plasma
24 p4354 A69-42676

Moving striations as plasma oscillations arising from transit time delays of neutral and charged particles moving through ionized gas, using continuity equation
24 p4356 A69-43122

Polarization induced oscillations in forward portion of plasma flux crossing magnetic field, showing variations in maximum longitudinal potential of plasmoid
24 p4358 A69-43471

PLASMA-PARTICLE INTERACTIONS

Semiclassical wave emission and absorption theory applied to charged particles interaction with waves in magnetized plasmas
01 p0126 A69-10123

Plasma waves and particle interaction in nonuniform magnetosphere, considering propagation across sheets of steep density gradient and auroral precipitation
02 p0235 A69-11429

Screening of high density plasma from penetration by neutral gas, discussing prevention of high energy losses by charge exchange collisions
02 p0288 A69-12170

Synchrotron radiation excitation in system of relativistic monoenergetic electrons rotating in cold magnetoactive plasma
03 p0476 A69-13383

Nonlinear interaction between waves in relativistic plasma, determining probability between transverse and longitudinal waves with different phase velocities
03 p0397 A69-13710

Interaction between surface waves propagating along plane plasma boundary and parallel low density electron beam, noting wave amplification and excitation
03 p0480 A69-14135

Ion beam interaction with plasma in presence of charge exchange and zero external magnetic field, studying stability of system
03 p0481 A69-14200

Electron temperature time variation measurement in plasma-beam discharge by method based on single spectral line
04 p0638 A69-15368

Electrostatic waves interaction to electrons in plasma characterized by bump-in-tail distribution function, deducing mechanism of wave particle interaction
06 p0966 A69-17521

Backscattering due to collisions for electrons from emitter accelerated through positive ion sheath into plasma in thermionic diodes
06 p0898 A69-17773

Microwave oscillations during interaction between electron beam and plasma in electron tube
07 p1189 A69-18504

Electromagnetic waves excitation during interaction between density modulated beam and plasma in magnetic field, analyzing instabilities
07 p1189 A69-18508

Energy losses of clusters of charged particles moving through unbounded isotropic plasma manifesting nonlinearity in interaction of particle generated fields
07 p1189 A69-18528

Kinetic model describing collisions in nonequilibrium multicomponent plasma, studying pair collisions effect on stability of plasma-beam system
07 p1189 A69-18539

Wave propagation on cylindrical electron beam in vacuum and in plasma background, including relativistic effects
07 p1189 A69-18657

Comparative models of magnetoplasma, discussing wave propagation in cold plasma, warm plasma and microscopic model
07 p1190 A69-18919

Monoenergetic relativistic electrons stream gyrating along cold magnetoactive plasma with pitch angle radiatively unstable with respect to synchrotron radiation
07 p1191 A69-18958

HF wave propagation in unbounded electron-plasma systems using moment equations, discussing collisions effect and dispersion relation
07 p1086 A69-19468

High energy particles obtained by accelerating plasma with frozen-in magnetic field to relativistic velocities during scattering of fast electron beam
08 p1358 A69-19805

Plasma electron density and collision frequency determination, using CW maser interferometer
08 p1359 A69-19987

Electron cyclotron resonance absorption of injected radiation magnetic mirror, noting effect of RF heating on plasma electron distribution
08 p1364 A69-20519

Inhomogeneous collision plasma drift instabilities in strong magnetic field analyzed by solving nonlinear equations
08 p1365 A69-20549

Particle-wave interactions in weakly turbulent collisionless plasma, discussing ensemble average distribution function, diffusion, nonlinear Landau damping and nonlinear instabilities
08 p1368 A69-20803

Approximate solution of nonlinear differential equation describing interaction between galactic cosmic rays and solar wind, obtaining four domains
09 p1575 A69-21524

Charged particle acceleration in interplanetary medium, discussing protons and plasma oscillations interactions
09 p1575 A69-21541

High temperature electron component of plasma produced by strong electron beam in adiabatic magnetic trap, deriving turbulent diffusion coefficient dependence
09 p1553 A69-22657

Thermodynamic potential of rarefied plasma from Coulomb interactions of atoms with electrons and ions
10 p1728 A69-23134

Plasma electron beam nonlinear interaction, considering equations of motion of electron distribution function, plasma wave spectrum and mode coupling effects
10 p1729 A69-23407

Cosmic protons interaction with interplanetary plasma, analyzing beam energy loss due to excitation of longitudinal electrostatic oscillations
10 p1760 A69-23617

Parametric amplification in beam plasma system, analyzing amplification of electron current component dependent on second order terms of velocity and charge density
10 p1740 A69-23791

Density modulated charged particle beam interaction with plasma under parametric resonance, analyzing longitudinal oscillations and parametric instability zone
10 p1741 A69-23947

Rotational discontinuity in plasma, noting behavior for particle reflection off front side or back side of MHD wave
11 p1923 A69-24293

Dwell time of sample particles in plasma excitation zone, noting effect on spectral analysis of sample materials injected into spark discharge plasma
11 p1926 A69-24624

Linear interaction of electron beam and plasma in magnetic field noting convective wave instability, wave dispersion and properties behavior
11 p1929 A69-25267

Synchrotron radiation amplification by monoenergetic electron stream helically gyrating in static magnetic field of cold plasma, discussing amplification rate frequency dependence
11 p1931 A69-25361

Critical condition for electromagnetic radiation generation by energetic electrons gyrating in dense magnetized plasma, proposing plasma instability mechanism
11 p1931 A69-25363

Surface instabilities at tangential discontinuity between media caused by beam-plasma interaction, deriving dispersion relation
11 p1931 A69-25365

Natural oscillations excitation in magnetoactive plasma by modulated electron beam ascribed to Doppler or Cerenkov effects
11 p1932 A69-25535

Natural oscillations excitation instabilities by modulated ion beams in magnetoactive plasma ascribed to anomalous Doppler effect
11 p1932 A69-25536

Microwave oscillations amplitude spatial distribution in gas discharge plasma excited by electron beam
11 p1934 A69-25542

Convective wave instability resulting from modulated electron beam injection into plasma, noting amplitude restraint due to collisional damping effect
11 p1934 A69-25576

Plasma-electron beam interaction induced HF oscillations, obtaining nearly noise free oscillations
12 p2137 A69-26529

Average ionization cross sections of atomic and molecular H and He beams ionized by plasma electrons with Maxwellian velocity distribution
12 p2138 A69-26542

Clouds-in-clouds and clouds-in-cells method /CIC/ for many body nonlinear plasma problems, calculating density and force of particles
12 p2138 A69-26625

Longitudinal electric field penetration into semibounded plasma using kinetic approximation, assuming diffusive plasma particles reflection from plasma boundary
12 p2138 A69-26711

Plasma ion oscillations excited in plasma consisting of ion beam and thermal electrons produced by back diffusion sources
13 p2304 A69-27301

Electrical DC conductivity of turbulent plasma decreased in presence of ion waves
13 p2305 A69-27302

Microwave and LF oscillations interactions in plasma beam system, showing oscillation amplitude dependence on frequency relationships
13 p2312 A69-28111

Electron velocity distribution function in gaseous plasma with known collective oscillations and frequency/wave number relationship
13 p2313 A69-28327

Tensor analysis of four photon interaction in rarefied plasma in magnetic field, determining cubic current of plasma wave self action
13 p2314 A69-28444

Magnetized plasma waveguide dispersion characteristics using Maxwell equations, stressing interaction of electron beam with wave modes
13 p2315 A69-28571

Beam-plasma interactions by nonlinear Vlasov equation, describing amplification of longitudinal waves
14 p2493 A69-29692

Nonlinear longitudinal plasma oscillations, treating resonant particles, single mode and wave interactions
14 p2501 A69-29953

Wave regeneration by resonant particles interaction in inhomogeneous plasma of electrons confined in quadratic potential solved in WKB approximation
15 p2660 A69-30918

Collisional emission and absorption of longitudinal waves due to particle encounters in numerical experiments on one dimensional one species plasma
15 p2661 A69-30921

Steady oscillations of active nonlinear system of nonisothermal plasma and charged particle flux, noting steady ion-acoustic waves
15 p2662 A69-30947

Radial self focusing of low density electron beam by interaction with plasma in presence of beam plasma instability
15 p2662 A69-30964

Nonlinear wave scattering at plasma particles and weak plasma inhomogeneity effects on plasma current instability
15 p2662 A69-30965

Parametric amplification of ion-acoustic oscillations in plasma with LF electric field, noting suppression and resonance
16 p2821 A69-31797

Electron temperature time variation measurement in plasma-beam discharge by method based on single spectral line
16 p2822 A69-32115

Approximate solution of nonlinear differential equation describing interaction between galactic cosmic rays and solar wind, obtaining four domains
16 p2851 A69-32519

Charged particle acceleration in interplanetary medium, discussing protons and plasma oscillations interactions
16 p2851 A69-32536

Turbulent heating of ions and electrons by interaction between magnetically collimated electron beam and electron beam self generated plasma
17 p3014 A69-33827

Plasma generation and heating by electron beam-plasma interactions, discussing HF fields excitation and absorption
17 p3014 A69-33828

Time resolved beam distribution functions resulting from cyclotron instability and harmonics in electron injection machine during beam-plasma experiment
17 p3014 A69-33829

Book on nonlinear plasma theory covering nonlinear wave, wave-particle and wave-particle nonlinear interactions and weak plasma turbulence
18 p3180 A69-34930

Particle precipitation into auroral zone and plasma-energetic particle relationship in geomagnetic tail, discussing plasma sheet extent, energetic electron fluxes, etc
21 p3711 A69-38510

Kinetic model describing collisions in nonequilibrium multicomponent plasma, studying pair collisions effect on stability of plasma-beam system
21 p3776 A69-38691

Drag effect on plasma motion in high current pulsed plasma accelerators of Marshall type, calculating current variations, voltage, particle velocity, efficiency and impulse
21 p3778 A69-39548

Radiation fields from energetic electron moving in helical orbit in magnetoactive plasma, using Maxwell equations
22 p4008 A69-39965

Homogeneous magnetoactive plasma longitudinal oscillations stability with fast monoenergetic ions addition, noting ion temperature increase stabilizing effect
22 p3990 A69-40789

Infinites in statistical theory of radiative processes when applied to plasmas containing charged particles and radiation
22 p3991 A69-41055

Outer anisotropic galactic cosmic particle flux distortion in interplanetary space, analyzing scattering in solar wind by isotropic diffusion equations
23 p4205 A69-41837

Moving striations as plasma oscillations arising from transit time delays of neutral and charged particles moving through ionized gas, using continuity equation
24 p4356 A69-43122

PLASMA PHYSICS

Heat transfer situations in plasma flow indicates very high heat fluxes per unit area on surfaces with electric current
[ASME PAPER 68-HT-38] 01 p0175 A69-10314

Electron thermal relaxation length in positive column determined by plasma parameters variations in small amplitude moving striations
01 p0127 A69-10341

Numerical solution method for equation of electric field affected by permanent flux of identical ions
01 p0128 A69-10364

Soviet book on atomic collisions and elementary processes in plasma covering atomic interactions, elastic and inelastic collisions, negative ions, autoionization, ion mobility and recombination
01 p0132 A69-11200

Hydrodynamic model of laser produced solid particle plasma, giving distributions of pressure, density, temperature and velocity
01 p0132 A69-11210

Electric field in plasma half space determined by longitudinal wave normal mode analysis, using BKG particle conserving collision model
01 p0134 A69-11287

Anisotropic two component plasma relaxation taking into account dynamic shielding collective effects
01 p0134 A69-11419

Holtzmark plasma microfield, discussing neglect of term comparable to dipole moment during Fourier transform development for long range Coulomb field
02 p0287 A69-11871

Plasma physics experiments and theoretical studies, discussing plasma heating by magnetic compression and irreversible expansion, Cs plasmas, plasma diagnostics, etc
02 p0289 A69-12200

Transient signal propagation in lossless isotropic and homogeneous plasma for Gaussian pulse modulated carrier, discussing amplitude change and carrier phase distortion
02 p0290 A69-12351

Characteristic time on motion of magnetic lines of force in medium with Hall effect
02 p0290 A69-12399

Power radiated in magnetoionic mode by electron spiraling in magnetoplasma
02 p0309 A69-12720

Plasma astrophysics - Conference, Varenna, Italy, July 1966
02 p0328 A69-12780

Plasma generation in universe from temperature and pressure effects, ionizing radiation and stellar ejection of ionized particles
02 p0293 A69-12781

Plasma instabilities covering astrophysical phenomena, Rayleigh-Taylor instability, anisotropic and LF MHD, electrostatic and electromagnetics, warm plasmas, etc
02 p0293 A69-12783

Radiation due to collective effects in plasma physical aspects of astrophysics, discussing synchrotron radiation and bremsstrahlung
02 p0310 A69-12792

Plasma model of quasars and radio galaxies for observations of high energy radiation
02 p0329 A69-12794

Ion cyclotron wave generation in RF self sustained mode improved by installing grid structures in plasma near magnetic mirrors
03 p0474 A69-13113

Active and reactive impedance components of plane capacitor immersed in plasma and at LF noting dependence on plasma conductivity
03 p0477 A69-13713

Breakdown plasmoids produced by lasers
03 p0480 A69-14058

Natural and laboratory plasmas behavior and properties emphasizing particle interactions, MHD model and Boltzmann, Fokker-Planck and Vlasov equations
03 p0482 A69-14234

Discontinuities in plasma situated in magnetic field, noting drift of quasi-neutral inhomogeneities of electron and ion density
04 p0634 A69-14431

Model for predicting characteristics of short duration intense microwave pulse propagating in heated high temperature air
04 p0634 A69-14453

Quantum electrodynamics of radiation scattering from ionized interacting plasma, considering electron interactions
04 p0636 A69-15044

Electromagnetic wave propagation in uniform anisotropic plasma, considering wave vectors perpendicular to magnetic field
04 p0637 A69-15048

Hydromagnetic analogs calculated for Rayleigh-Taylor problem with Hall effect, confirming introduction of plasma instabilities
04 p0637 A69-15050

Hydrogen plasma transport properties for semiclassical quantum potential calculated by Chapman-Enskog-Hilbert theory
05 p0799 A69-15735

Electrical properties of xenon pulse plasmas with high power dissipation, measuring discharge pressure and radiation distribution as function of voltage drop
05 p0801 A69-15746

Interactions in classical relativistic plasmas, discussing Lorentz invariant statistical mechanical formalism and phenomenological electrodynamics
05 p0801 A69-15770

Evolutionarity of equations of MHD with Hall effect allowance for nondissipative plasma two dimensional flow
05 p0801 A69-15788

Hall effect current influence on conductance of high current arcs
05 p0803 A69-15999

Collision induced instability of partially ionized gases having large Ramsauer effect in external magnetic field, analyzing nonlinear characteristics
05 p0804 A69-16441

Plasma physics in space research, discussing solar wind, planetary atmosphere bow shock and convective motions of magnetosphere plasma
[ISAS-431] 06 p1000 A69-17026

Physics of plasmas, Volume 2, Weakly ionized gas, covering inelastic collision, free electron scattering, intermediary plasmas, etc
06 p0963 A69-17165

Surface plasmons microscopic theory based on modified random phase approximation
06 p0967 A69-17711

Variational solutions of one dimensional nonlinear Poisson-Boltzmann boundary value problems in theory of colloids and plasmas
06 p0968 A69-17784

Soviet collection of papers on MHD method of obtaining electrical energy, noting plasma properties in MHD generators
06 p0870 A69-17905

Ion-cyclotron instabilities in hot-ion cold-electron plasma resulting from left-hand circularly polarized wave propagating parallel to magnetic field
06 p0969 A69-17955

Harmonic ion cyclotron waves shown to possess stop and passband characteristics, supporting quasi-static ion cyclotron mode theory
06 p0970 A69-17953

Axisymmetric poloidal vacuum magnetic fields in low pressure plasmas in MHD equilibrium
06 p0972 A69-18230

Kinetic description of inhomogeneous plasma in ring approximation, discussing Vlasov equation and velocity distribution function
07 p1193 A69-19034

Cross sections for inelastic interactions of electrons with atoms and heavy impurity ions and processes of atomic excitation
07 p1195 A69-19652

Plasma spectral line shifting and broadening under ion and electron impact
07 p1187 A69-19720

Shock-like solutions of electrostatic Vlasov and Poisson equations, assuming zero temperature of positive ions and increasing electrostatic potential
08 p1359 A69-19982

Collective interactions of electromagnetic waves in plasma, discussing light scattering from electron fluctuations, stimulated emission and anomalous absorption
08 p1361 A69-20220

Radiative capture of electrons by chlorine, bromine and iodine atoms in shock heated plasma seeded with sodium halides from absolute intensities in continuous emission
08 p1355 A69-20735

Photon momentum distribution role and relation to thermal radiation spectrum in fully ionized gases
08 p1357 A69-20747

Discharge structure and stability of nonequilibrium plasma undergoing supersonic flow through linear MHD channel
08 p1366 A69-20788

Loss cones effect of anisotropic Maxwellian velocity distribution on EM waves propagating perpendicular to magnetic field in infinite plasma
08 p1369 A69-20820

Bose condensation and shock waves in photon spectrum during scattering for equilibrium state of ionized plasma and radiation
09 p1546 A69-21574

MHD stability of straight multipoles with shear, considering scalar-pressure perfectly conducting two dimensional MHD equilibria
09 p1546 A69-21576

Soviet papers on high frequency properties of plasma, including microwave diagnostics, magnetohydrodynamic and shock waves
09 p1548 A69-22015

Asymptotic toroidal equilibrium for guiding center plasma model based on stellarator expansion, considering toroidal curvature, helical currents and plasma pressures
09 p1552 A69-22044

Plasma transport properties derived from Boltzmann equation using Debye shielded Landé potential to represent collisions, noting viscosity and thermal conductivity
09 p1553 A69-22539

Finite Larmor radius, finite conductivity, rotation and Hall current effects on Jeans criterion for gravitational instability of plasma
10 p1729 A69-23408

Two temperature plasma model applicability in analyzing nonequilibrium MHD generator
10 p1731 A69-23438

Plasma ionization instability linear growth problem analyzed in bounded region
10 p1735 A69-23461

Boundary conditions for nonlinear equations of MHD for vicinity of zero magnetic field line, considering plasma pinch and current density
10 p1739 A69-23626

Charge transport in high pressure RF glow discharge in air at atmospheric pressure based on model plasma
10 p1740 A69-23662

One dimensional nonlinear model of anisotropic plasma instability with respect to Alfvén waves growth, noting applicability to solar wind processes
10 p1741 A69-23961

Charged particle motion in periodic electromagnetic field, constructing dynamic variables describing motion
11 p1927 A69-25100

Particle, momentum and heat balance of static and rotating magnetized plasmas in terms of macroscopic equations
11 p1928 A69-25248

Positive column contraction in Ar and Ar-Cs mixtures, developing theory for nonisothermal local collision arc
11 p1932 A69-25539

Plasma physics of electric arc transition from conducting plasma to insulating gas in electric circuit interruption, noting interrupter interaction with power system
12 p2133 A69-25905

Microwave harmonic generation in plasma capacitor, considering power resonances dependence on electron temperature and density
12 p2037 A69-25939

Relativistic hydrodynamic equations for charged particles interacting in external scalar and gravitational fields, considering particle motion and scalar plasma dispersion
12 p2130 A69-26462

Clouds-in-clouds and clouds-in-cells method /CIC/ for many body nonlinear plasma problems, calculating density and force of particles
12 p2138 A69-26625

Plasmapause, plasma sheet and energetic trapped electrons in earth magnetosphere, considering slot, peak intensity and trapping boundary
12 p2151 A69-26953

Soviet papers on physics of gas discharge plasma covering helical discharges, plasma jets, flame discharges, etc
12 p2139 A69-27121

Radiative energy losses in nonequilibrium plasmas, considering plasma geometries and distributions of Planck's function
13 p2305 A69-27374

Nose bluntness and model scale effect on radial and axial variation of wake fluid and plasma properties by hypervelocity shock tunnel
[AIAA PAPER 69-330] 13 p2242 A69-28266

Plasma screening effect on energy spectra of electrons localized at surface charges in weakly doped unipolar n-type semiconductor
14 p2505 A69-29170

Reflection of electromagnetic wave from magnetoactive plasma at inclined incidence, finding reflection and absorption coefficients
14 p2417 A69-29661

Bibliography on laser applications in plasma physics covering plasma diagnostics and production
14 p2498 A69-29842

Radio propagation in upper atmosphere and ionosphere noting rocket and satellite experiments including plasma physics research, tropospheric studies and space science services
14 p2526 A69-29854

Nonlinear longitudinal plasma oscillations, treating resonant particles, single mode and wave interactions
14 p2501 A69-29953

Longitudinal inhomogeneities in plasma of Q machines caused by ion emission from hot plate at different radial positions
14 p2502 A69-29959

Plasma instabilities due to anisotropic velocity distributions computer analyzed to study nonlinear phenomena and validity limits of linear theory
15 p2661 A69-30920

Stationary phase method of integration for growth and decay of resonant plasma oscillations excited by small pulsed dipole, noting Landau damping
16 p2817 A69-31641

Steady state density profile dependence on electron density dependence of net volume ionization rate by analyzing ambipolar diffusion in RF excited magnetized plasmas
16 p2818 A69-31672

Linearized Boltzmann equation in kinetic theory for weakly ionized plasma electrons under alternating electric and circularly polarized magnetic field, noting higher harmonics generation
16 p2820 A69-31752

Electron distribution function for weakly ionized plasma under alternating electric and circularly polarized rotating magnetic field, noting cyclotron resonance
16 p2820 A69-31753

Plasma physics and controlled nuclear fusion research - Conference, Novosibirsk, U.S.S.R., August 1968, Volume 1
17 p3012 A69-33817

Plasma physics and controlled nuclear fusion research - Conference, Novosibirsk, U.S.S.R., August 1968, Volume 2
17 p3014 A69-33826

Book on nonlinear plasma theory covering nonlinear wave, wave-particle and wave-particle nonlinear interactions and weak plasma turbulence
18 p3180 A69-34930

Evolutionarity of equations of MHD with Hall effect allowance for nondissipative plasma two dimensional flow
18 p3181 A69-35039

Time dependent equations for non-LTE occupation numbers of lower bound levels of hot gas or plasma outer layer atoms and ions
18 p3231 A69-35242

Equilibrium state of diamagnetic plasma configuration in inhomogeneous magnetic fields with complex potential near neutral point, noting solar flares and magnetic traps
19 p3380 A69-36467

Dielectric recombination in plasma, considering role in populating highly excited levels
20 p3580 A69-38016

Computer experiment on 9000 particle plasma to test temporal echo theoretical prediction
21 p3777 A69-38713

Laboratory experiments applicability to interplanetary plasma physics, describing simulations of solar wind interactions, magnetosphere, collisionless shock waves, etc
22 p4028 A69-40689

Classical path approximation in line broadening theory to derive impact and one-electron theories, with application to Stark broadening of Lyman series in hydrogen
23 p4193 A69-41379

Kinetic processes in gases and plasmas covering molecular transport equations, transport coefficients, chemical reactions as collision processes, etc
23 p4193 A69-41511

Kinetic equations for fully ionized plasmas and approximate derivation method for generalized Fokker-Planck equation including nonadiabatic effect
23 p4195 A69-41515

Soviet high temperature plasma physics research, discussing magnetic plasma containment by Tokamak traps
23 p4196 A69-42167

High temperature relatively dilute plasmas, discussing equations of motion, plasma oscillations, Landau damping, plasma confinement, etc
23 p4197 A69-42311

Nonlinear plasma physics, discussing nonequilibrium effects, wave-wave coupling, wave-particle interactions, single nonlinear wave behavior, etc
23 p4197 A69-42312

Boltzmann equation for electron distribution function of Lorentzian plasma traversed by transverse traveling wave, showing existence and uniqueness of solution
24 p4354 A69-42675

Nonthermal phenomena of astrophysics in relation to plasma physics, considering planetary and stellar regions, supernova envelopes, interstellar medium, cosmic rays, radio galaxies, etc
24 p4377 A69-42682

LF instability in plasmas and hydromagnetic fluids, discussing MHD equations, Rayleigh-Taylor instability, interchange mode, Kelvin-Helmholtz instability, etc
24 p4355 A69-42683

MHD tearing mode, considering most unstable wavelength, energetics and stability in two dimensional equilibria
24 p4355 A69-42684

PLASMA PINCH
NT THETA PINCH

Numerical estimates for degenerate pinch in InSb, determining pinch parameters
02 p0300 A69-12638

Tearing mode instability in Bessel function model preliminary to study of tearing mode in diffuse pinches
05 p0799 A69-15615

Energy balance of plasma radiation arcs based on mean pinch pressure and mean flow speed
05 p0802 A69-15996

Plasma impedance effect on time variation of inverse pinch
06 p0967 A69-17716

Energy transfer from pulse network to mass associated with propagating current sheet in linear pinch discharge, discussing pulsed plasma accelerator efficiency
[AIAA PAPER 69-113] 06 p0971 A69-18123

Continuum emission and forbidden lines in helium plasma in linear Z-pinch tube, noting plasma electron density
08 p1369 A69-20887

Pressure distribution in propagating current sheet structure in dynamic Z pinch discharge in argon, evaluating particle density, velocity and temperature profiles
[AIAA PAPER 69-264] 09 p1564 A69-21243

Formation and acceleration of luminescent current layer in Z pinch discharge, noting density and electron mean free path in cold gas
09 p1552 A69-22397

Boundary conditions for nonlinear equations of MHD for vicinity of zero magnetic field line, considering plasma pinch and current density
10 p1739 A69-23626

Ar plasma diagnostics in pinch-discharge laser, determining electron temperature by spectroscopy and measuring plasma conductivity and ion concentration and temperature
11 p1933 A69-25548

Axisymmetric instabilities by Z-pinch and reverse axial current discharges in plasmas of arbitrary conductivity
13 p2315 A69-28449

Power output of ruby laser stimulated by strong pinch discharge plasma flux at 4000-7000 Å in He
13 p2273 A69-28530

Electron and ion density distributions in propagating current sheet in Z pinch discharge in argon obtained by microwave reflection interferometer
16 p2816 A69-31639

Screw pinch stability explained by strong force free current carried by magnetic field around central plasma column
16 p2821 A69-32037

Collisionless shock wave generation and structure in zeta and theta pinches
17 p3013 A69-33819

Coherent emission from injection electron-hole plasma in indium antimonide without magnetic field, noting roles of crystal thickness and pinch effects
19 p3387 A69-36532

Semiconductor plasma production effects and pinching and microwave radiation in InSb plasma, discussing impact ionization, two photon absorption and plasma lifetime
19 p3389 A69-36545

Collisional shocks in inverse pinch MHD shock producing device, discussing position in current sheet and effect on conductivity and diffusion
21 p3776 A69-38709

PLASMA POTENTIALS

Electron density and temperature, ion density, composition and temperature and plasma space potential relative to space vehicle potential measured by spherical probe assembly
01 p0065 A69-10549

Statistical analysis of polarization of semiinfinite electron/ion plasma bounded by dielectric or conducting solid wall, deriving steady state and space potential
02 p0286 A69-11706

Space charge layer thickness determination in plasma filled capacitor by capacitance measurement, noting thickness dependence on plasma potential
03 p0477 A69-13714

Relation between energy spectrum and potential drop in plasma expelled from hot cathode tube into vacuum derived by electrostatic analyzer
06 p0963 A69-16899

Plasma flute instability in magnetic trap with wall/plasma interface, using system of sensors and amplifiers
06 p0966 A69-17544

Space plasma potential measurement based on RF impedance of plasma sheath/probe system
07 p1130 A69-18300

Shock-like solutions of electrostatic Vlasov and Poisson equations, assuming zero temperature of positive ions and increasing electrostatic potential
08 p1359 A69-19982

Metallic single and double plasma probes, discussing floating potential and ion saturation current
08 p1316 A69-20473

Integrated charged particle energy spectra from gridded electrostatic analyzers, relating retarding

potential curve to particle floating potential, kinetic temperature, etc
08 p1364 A69-20521

Debye potential for effective interaction between electron and proton of hydrogen atom in partially ionized plasma
08 p1365 A69-20746

Emissive probes for measuring plasma potentials over different ion density ranges on SERT spacecraft, detailing calibration and mechanical and electronic configurations
[AIAA PAPER 69-272] 09 p1492 A69-21217

Extraction and acceleration mechanism in RF ion motors, fixing plasma potential with extraction anode
[AIAA PAPER 69-284] 09 p1564 A69-21237

Nonlinearity of Hall voltage induced in plasma by external magnetic field under various assumptions
09 p1548 A69-21683

Thermodynamic potential of rarefied plasma from Coulomb interactions of atoms with electrons and ions
10 p1728 A69-23134

Moving striations in plasmas, presenting measurements of relative phases of electron temperature, plasma potential and luminous intensity near Pupp current limit
10 p1741 A69-23859

Field effect on positive column plasma of glow discharge in air, analyzing near wall potential and conductivity
10 p1741 A69-23946

Arc mode thermionic Cs converter nonlinear I-V characteristics explained by current-dependent temperature and potential fields in plasma
11 p1827 A69-25400

High temperature plasma quasi-classical pseudopotential, binary function and free energy derived, using displacement and collective variable methods
11 p1934 A69-25701

Rarefied plasma potential fluctuations when bounded by surface having complex conductivity and dispersing properties
12 p2139 A69-26712

Electron current, space potential and ionic composition obtained by Langmuir type probes on Explorer 31 for disturbance region dependence on ionic composition
14 p2518 A69-29122

Electron and ion separation as function of plasma potential drop in Langmuir cathode layer in arc regime
14 p2490 A69-29237

Plasma potential and density distribution in near-electrode plasma sheath of thermionic converter
14 p2491 A69-29257

Plasma energy and energy replacement time dependent on discharge pulse shape and magnitude
14 p2499 A69-29848

Hydrogen plasmas motions in multipole magnetic fields, discussing plasma polarization, double vortex flow patterns and field line configurations
15 p2661 A69-30924

Plasma density and potential distributions along circular cylinder surface in weakly ionized high speed low pressure gas flow, noting boundary layer separation point
19 p3380 A69-35839

Measurement method for relative phase shift between density and potential oscillations in Cs plasma
24 p4354 A69-42676

Polarization induced oscillations in forward portion of plasma flux crossing magnetic field, showing variations in maximum longitudinal potential of plasmoid
24 p4358 A69-43471

PLASMA POWER SOURCES

Gas discharge tubes and waveguide mounts as reference noise accuracy standards for S, C and X bands in WR284, WR137 and WR90 waveguides
02 p0210 A69-12439

Kaufman thruster with predominant radial field, noting electron mobility across ion extraction screen and advantages of uniform plasma distribution
[AIAA PAPER 69-259] 09 p1569 A69-21877

Soviet book on plasma thermionic energy conversion covering operation modes, transport processes, current-voltage characteristics, density, temperature, electric field distribution
12 p2017 A69-26850

Thermionic electrical power generation from reentry plasmas with nose cone as emitter and vehicle afterbody as collector
14 p2399 A69-29194

PLASMA PROBES

NT ELECTROSTATIC PROBES
NT MICROWAVE PLASMA PROBES

RF characteristics of electrodes immersed in magnetoplasma, discussing potential distribution around point charge and RF probe measurement of plasma parameters
01 p0029 A69-10550

Spherical and cylindrical probes emitting electrons and ions in unbounded plasma, deriving I-V characteristics equations
02 p0247 A69-11569

Plasma diagnostics in magnetic field with thin cylindrical probe based on Langmuir method
02 p0292 A69-12556

Probe and spectral techniques compared for investigation of low voltage arc of cesium plasma thermionic converter
03 p0478 A69-13836

Electrodeless conductivity probe impedance in anisotropic plasma computed on basis of Maxwell equation
03 p0483 A69-14252

Wave number frequency dependent spectral function and space-time correlation function in turbulent plasma, noting utility for probes and scattering analysis
03 p0483 A69-14255

Monograph on electron waves and resonances in bounded plasmas covering theoretical and experimental methods, metallic and dielectric resonance probes, etc
04 p0633 A69-14296

Charge carrier concentration determination by double probe in plasma with Druyvesteyn distribution of incident electron flow
05 p0800 A69-15737

Solar wind electron component detection by plasma experiment on Pioneer 6, particularly class 2B flare and quiet period
05 p0816 A69-16275

Explorer 35 measurements of low energy plasma in lunar orbit made by planar multigrid sensor programmed as retarding potential analyzer
05 p0825 A69-16278

Plasma characteristics in thermionic converter operating under low voltage arc conditions obtained by computer, probes and spectral techniques
06 p0963 A69-16910

Plasma flute instability in magnetic trap with wall/plasma interface, using system of sensors and amplifiers
06 p0966 A69-17544

Probe noise in quiescent plasmas investigated using back diffusion type discharge tubes producing low density plasmas and positive plasma columns
06 p0967 A69-17715

Space plasma potential measurement based on RF impedance of plasma sheath/probe system
07 p1130 A69-18300

Magnetospheric plasma probe results with Pioneer 6 and 7, discussing plasma fluctuations and solar wind interaction with geomagnetic field
07 p1128 A69-19364

Electron emission of probe caused by impinging ions and photons, discussing model for low plasma densities
08 p1361 A69-20232

Metallic single and double plasma probes, discussing floating potential and ion saturation current
08 p1316 A69-20473

Evaluation methods for DC electrical conductivity, heat conductivity and viscosity in plasmas
08 p1364 A69-20477

Emissive probes for measuring plasma potentials over different ion density ranges on SERT spacecraft, detailing calibration and mechanical and electronic configurations
[AIAA PAPER 69-272] 09 p1492 A69-21217

Low current arc discharge plasma diagnostics by light probe, analyzing deviation of resonance level population from equilibrium described by Saha equation
09 p1546 A69-21586

Saturation electron emission characteristics from incompletely outgassed Ta wire emitters immersed in Cs vapor using plasma anode technique, noting oxygen effects
09 p1437 A69-21812

Upper hybrid and modified plasma resonance on basis of rocket-borne gyroplasma probe data
10 p1726 A69-22807

Multielectrode plasma probe with potential negative with respect to plasma, noting effect of microoptical features of probe on accuracy of I-V measurements
12 p2138 A69-26538

Multielectrode probe performance in plasma diagnostics, considering effects of plasma pressure, probe

geometry and space charge on current-voltage characteristics
12 p2138 A69-26539

Parameter measurement technique for low pressure helical pulse plasma discharges, determining spatial distribution of HF electric and magnetic fields and current density
12 p2140 A69-27124

Arc plasma jets radial velocity profiles measured by two probes in cyclic movement between jet edge and middle, including error estimation
13 p2307 A69-27611

Deuterium plasma jets passage through pulsed magnetic field by means of thermal and diamagnetic probes, noting magnetic field strength effect
13 p2311 A69-28107

Plasma jets from MPD accelerators, analyzing swirl, entrainment and pressure distribution using gasdynamic probes
13 p2313 A69-28242

Coaxial three coil probe measuring local electrical conductivity and velocity in plasma streams, discussing operations in electrolytes and axisymmetric plasma stream
[AIAA PAPER 69-327] 13 p2313 A69-28264

Probe and spectroscopic study of dense plasma thermionic converters noting parameters
14 p2404 A69-29256

Plasma diagnostics in magnetic field with thin cylindrical probe based on Langmuir method
15 p2658 A69-30253

Gyroplasma probe data from rocket observations, determining winter ionospheric electron density profiles, electron temperature and electrostatic cyclotron waves effect
15 p2606 A69-31446

Maximum likelihood methods applied to device performing ion swarm experiments, measuring positive ion mobility in hydrogen
16 p2788 A69-31670

Electron trap behavior on charged spacecraft, obtaining expressions for current to aperture and internal retarding electrodes for all apertures and spacecraft potentials
16 p2849 A69-31976

Warm plasma probe, describing transit electrons interaction with electric field and generation of electroacoustic waves radiation
16 p2824 A69-32611

Electron heat transfer and spherical probe characteristics in moving nonequilibrium plasma analyzed at stagnation region as function of solid surface potential
[AIAA PAPER 69-699] 17 p3011 A69-33475

Triple probes behavior in plasmas under AC electric field perturbations
17 p2920 A69-33592

Gas dynamics of interactions of tenuous ionosphere with moving satellites and diagnostic probes, using collision-free plasma kinetics methods
18 p3132 A69-35409

Multiple electrode probe characteristics in rarefied plasma flow created by ion source, noting electrode potential role
19 p3314 A69-36622

Shock wave effect on ionization of detonation waves in propane-O mixtures producing stable high velocity plasma, measured by double probe method
21 p3853 A69-39745

Distribution function of output energies of polycrystalline metal surface used as plasma probe, considering homogeneous plasma flow and isotropic particle velocity distribution
23 p4196 A69-41696

Solar wind kinetic energy density using geomagnetic field horizontal component daily variation, treating earth as plasma probe
24 p4308 A69-42968

PLASMA PROPULSION

Mercury ion thrusters and facilities automatic controls durability testing, discussing vacuum chamber systems, unattended operation and control
[AIAA PAPER 68-576] 02 p0229 A69-12385

Electric propulsion research in Japan, considering cesium ion thruster, plasma acceleration and thrust by electric explosion of fine wires
06 p0984 A69-17629

Electron bombardment mercury ion thruster plasma properties and performance, computing ion beam current, discharge losses and propellant utilization efficiency
[AIAA PAPER 69-256] 09 p1560 A69-21214

Lithium vapor fueled applied field MPD arc jet performance using open end heat pipe vaporizer and hollow cathode
[AIAA PAPER 69-241] 09 p1561 A69-21222

- Rotating plasma disturbances onset in MPD arc, determining magnetic field dependence on mass flow, background pressure and propellant
[AIAA PAPER 69-232] 09 p1562 A69-21225
- Segmented anode, carbon dioxide-hydrogen performance and hollow cathode erosion tests on low power MPD arc thruster, noting current measurements
[AIAA PAPER 69-242] 09 p1563 A69-21236
- Electrothermal instabilities for explanation of MPD arc thruster rotating spoke phenomenon, noting agreement with experimental results
[AIAA PAPER 69-231] 09 p1566 A69-21254
- Kaufman thruster performance dependence on transmission of ion extraction optics and magnetic field shape
[AIAA PAPER 69-257] 09 p1569 A69-21878
- Electric and chemical rocket propulsion systems
13 p2325 A69-28255
- Induction plasma device of continuous operation to simulate NASA designed gas core space propulsion reactor
[AIAA PAPER 68-712] 22 p3979 A69-40548
- ### PLASMA RADIATION
- Light scattering from plasmas embedded in homogeneous magnetic field, discussing solid state and high temperature gas plasmas
01 p0125 A69-10015
- Light emission and transmission generated from laser interaction with lithium hydride in vacuum, noting laser energy variations effects
01 p0127 A69-10281
- LF radiation intensity oscillations of pulsed HF discharge in helium plasma, showing time dependence
01 p0128 A69-10347
- Relaxation processes and radiation stimulation in dense low temperature ionized plasma can lead to population inversion of several levels
01 p0131 A69-10789
- Pulsars features explained by model based on binary system of neutron stars, discussing associated stellar plasmas as directional HF radio wave source
01 p0156 A69-10981
- Ionized plasma radiation near plasma frequency, deriving formula for bremsstrahlung coefficient from Born approximation
02 p0286 A69-11589
- Lithium hydride microplasma expansion in vacuum using charge collectors, time of flight detectors and spectroscopy of light emission
02 p0286 A69-11704
- Integral spectral emissivity of gas arc plasmas at high temperatures and atmospheric pressure
02 p0291 A69-12484
- Laser produced sparks in 200 kG magnetic field in air, butane and helium at atmospheric pressure
02 p0260 A69-12659
- Procedure and apparatus for integral microwave and X ray and spectral measurements of quasi-steady plasma radiation
03 p0473 A69-12897
- Natural microwave radiation generation and propagation and wideband signal detection in problems connected with radio wave propagation, geophysics, radiometeorology and plasma physics
03 p0420 A69-12919
- Outer space electromagnetic radiation transfer in turbulent plasma with allowance for polarization effects, describing polarization induced changes in Stokes parameters
03 p0506 A69-13083
- Enhanced bremsstrahlung from supraluminous and subluminal waves in thermal isotropic homogeneous Maxwellian electron plasma, noting applicability to Crab Nebula
03 p0507 A69-13150
- Radiation intensity from system of monoenergetic relativistic electrons in plasma, discussing maser effect in coherent synchrotron radiation
03 p0500 A69-13407
- Dense plasma radiation, analyzing spectrographically initial stages of wire explosion in vacuum
03 p0482 A69-14227
- Plasma radiation, including atomic processes and radiation by variation of constituent kinetic energy
03 p0483 A69-14237
- Radial profile measurement technique for individual emission line intensities in plasma applied to populations of excited atomic and ionic Ar in capillary discharges
04 p0634 A69-14441
- High temperature air plasma total radiant intensity measurements in shock tube
04 p0685 A69-14719
- Gas laser pulse induced attenuated and nonattenuated plasma radiation recording, determining absorption coefficients
05 p0762 A69-15900
- Energy balance of plasma radiation arcs based on mean pinch pressure and mean flow speed
05 p0802 A69-15996
- Spectral line shapes broadened by electron impacts, taking into account contribution of radiation produced by perturbing electrons
06 p0961 A69-17136
- Continuous emission spectrum and continuous plasma absorption spectral coefficients for optically dense quasi-steady state electrical discharge plasma in sulfur capillary
06 p0964 A69-17251
- Radial electron concentration profile determination by spectroscopic examination of continuous plasma radiation of pulsed discharge in capillary
06 p0964 A69-17253
- X rays detection from laser produced deuterium plasma through calibrated absorbers, presenting electron temperatures
06 p0964 A69-17479
- Pulsar model based on rapidly rotating neutron star with radiating attached plasma, discussing test of radiation mechanism by means of coherence of emission
06 p1012 A69-18226
- Radiation transfer in resonance lines and in recombination continuum in plasma, discussing frequency redistribution during reradiation and optically dense systems
07 p1188 A69-18282
- Nitrogen plasma thermal radiation in spectral region from 0.5 to 1.1 micron, noting plasma state near local thermodynamic equilibrium
07 p1189 A69-18283
- Spectroscopic investigation of emission of air plasma in HF electrodeless plasmatron, analyzing near IR, UV and visible spectra
07 p1191 A69-18995
- Highly ionized plasma acceleration by intrinsic radiation achieved by deep cooling of free electrons
07 p1195 A69-19595
- Green function method for atomic line broadening in plasma radiation, including electron correlations and quantum effects
08 p1361 A69-20147
- Spectral distribution and energy of luminous radiation emitted during theta pinch in Ar plasma, noting energy maximum as function of pressure
08 p1362 A69-20280
- Transmission and reflection properties of materials for vacuum UV spectroscopy, using LTE plasmas for calibrating UV intensities
08 p1315 A69-20468
- Plasma diagnostics in X ray region, determining electron and ion temperatures and densities and energy losses by radiation
08 p1315 A69-20469
- Continuum emission and forbidden lines in helium plasma in linear Z-pinch tube, noting plasma electron density
08 p1369 A69-20887
- Epithermal microwave radiation from plasma produced by PIG Reflex in magnetic field with mirror geometry, discussing radiation at harmonics of electron cyclotron frequency
08 p1370 A69-21019
- Bose condensation and shock waves in photon spectrum during scattering for equilibrium state of ionized plasma and radiation
09 p1546 A69-21574
- Total radiation of dense low temperature argon arc discharge plasma measured by bolometer, showing increase with arc current and pressure
09 p1547 A69-21595
- Theta pinch plasma microwave emission from electrodeless inductive discharge at low pressures recorded at near plasma frequencies
09 p1549 A69-22017
- Nonthermal microwave emission from cold cathode PIG discharge plasma, noting wide spectrum of electron cyclotron frequency harmonics
09 p1549 A69-22018
- Helium-like ion resonance satellite lines in laboratory and solar plasmas, noting coincidence between solar satellite energy and energy level interval
09 p1598 A69-22158
- Stark broadening of Balmer H alpha, H beta, H gamma and H delta lines in plasma region in strong magnetic fields
09 p1542 A69-22248
- Neutron proton plasma properties in massive stars and supernovae, discussing neutrino emission
10 p1756 A69-22814
- Incoherent synchrotron radiation by relativistic electrons gyrating in cold magnetoactive plasma rederived, correcting errors
10 p1741 A69-23858
- Nitrogen plasma total radiation intensity under pressure and at high temperatures calculated from radiation spectrum
11 p1922 A69-24231
- Recombination emission spectrum relation to plasma recombination coefficient, determining plasma electron temperature from continuous spectrum intensity
11 p1934 A69-25566
- Plasma velocity measurement by Doppler shifts of spectral lines with photoelectric recording, using Fabry-Perot interferometer
12 p2079 A69-26021
- Plasmas role in emission mechanisms active in celestial sources of radiation, discussing sun and quasars
12 p2159 A69-26619
- Soviet book on microwave methods of plasma investigation based on electromagnetic wave interaction, covering microwave probes and plasma radiation
12 p2139 A69-27073
- Electromagnetic flux from nonlinear self interaction of electron plasma waves in far field of perturbation under anisotropic electron pressures
12 p2141 A69-27147
- Radiative energy losses in nonequilibrium plasmas, considering plasma geometries and distributions of Plancks function
13 p2305 A69-27374
- Cerenkov radiation from point charge uniformly moving along external magnetostatic field in warm anisotropic plasma, noting excitation modes and propagation frequencies
13 p2307 A69-27964
- Hypervelocity impact flash resolved into sub-microsecond continuum radiation pulse succeeded by slow rising long duration light pulse from neutral atomic line emission
[AIAA PAPER 69-364] 13 p2313 A69-28296
- Outer space electromagnetic radiation transfer in turbulent plasma with allowance for polarization effects, describing polarization induced changes in Stokes parameters
14 p2515 A69-28765
- Plasma arc characteristic and radiation at high pressure and temperature showing strong electrical field strength and radiation increases with pressure
15 p2659 A69-30377
- Radiative luminescence of gas discharge plasmas in channel with substantial radial heat transfer determined from energy balance measurement
15 p2662 A69-30978
- Electron temperature relaxation in shock heated Ar plasma, measuring plasma microwave radiation
15 p2663 A69-30995
- Macroscopic quasi-linear theory of HF radiation in cold electron-proton plasma allowing direct use of plasma and Maxwell equations
16 p2819 A69-31684
- Plasma magnetic field and electron density measured by Faraday rotation using resonant gas laser radiation
16 p2822 A69-32041
- Discharge parameters modulation caused by acoustic wave propagating in partially ionized plasma, deriving perturbation current density and irradiated light intensity
16 p2752 A69-32364
- Test apparatus for determining radiative properties of Ar plasma as function of high temperature and pressure
[AIAA PAPER 69-601] 17 p3010 A69-33310
- Radiation cooling behind strong shock in Kr as function of plasma luminosity near end of relaxation zone
18 p3171 A69-34450
- Coherent emission from injection electron-hole plasma in indium antimonide without magnetic field, noting roles of crystal thickness and pinch effects
19 p3387 A69-36532
- Semiconductor plasma production effects and pinching and microwave radiation in InSb plasma, discussing impact ionization, two photon absorption and plasma lifetime
19 p3389 A69-36545
- Radio wave propagation in anisotropic plasma consisting of oxygen ions and protons, deriving expressions for radio wave refractive index
20 p3486 A69-37052

- Relaxation processes and radiation stimulation in dense low temperature ionized plasma leading to population inversion of several levels
20 p3582 A69-38006
- Radiation sources fields and propagation in homogeneous lossy magnetoplasma, deducing wave equations for electric and magnetic current electron flux and mechanical body force sources
21 p3775 A69-38434
- Emissivity of nitrogen, oxygen and air plasmas in vacuum UV region of spectrum by photographic measurement, using He recombination radiation as brightness standard
21 p3774 A69-38944
- Differential approximation for radiant energy loss in nonequilibrium plasma generated from truncated Taylor series expansion of radiation source function
22 p3988 A69-40102
- Polymer film breakdown under impact of supersonic plasma beam pulses from capillary discharge chamber, including photomicrographs of cavities and structural defects
22 p3974 A69-41031
- Argon plasma jet spectral radiation properties, considering electron density, recombination, excitation, argon density, etc
22 p3991 A69-41052
- Infinites in statistical theory of radiative processes when applied to plasmas containing charged particles and radiation
22 p3991 A69-41055
- Classical path approximation in line broadening theory to derive impact and one-electron theories, with application to Stark broadening of Lyman series in hydrogen
23 p4193 A69-41379
- Nonlinear intensity transitions involving order of magnitude increases in visible luminosity of RF generated plasmas, noting inductive field and electron density influence
23 p4196 A69-41546
- IR radiation transmission in pulsed carbon dioxide discharge as function of time, proposing pumping and relaxation mechanism model
23 p4174 A69-42196
- Thermal continuum radiation from coronal plasmas at soft X ray wavelengths, investigating variations effect in element abundances
23 p4207 A69-42406
- Hydromagnetic radiation characteristics of electric and magnetic dipoles in homogeneous anisotropic cold plasma, obtaining field components and wave propagation modes
24 p4307 A69-42905
- PLASMA RESONANCE**
- Electron cyclotron harmonic waves in magnetoplasma irradiated by external microwaves
01 p0127 A69-10335
- Plasma wave properties relation to creation of electron plasma densities above critical density, discussing splitting of cold plasma resonance
01 p0131 A69-10818
- Ionospheric plasma electrostatic resonances from Alouette satellite signal observations
01 p0067 A69-10983
- Theoretical prediction for modified and hybrid plasma resonances discrimination, noting sensor axis angle to geomagnetic field
02 p0241 A69-11731
- Helium plasma ion oscillations damping by external RF electric field at sheath-plasma resonance condition
03 p0476 A69-13323
- Disintegration spectrum of Langmuir wave excited in plasma column by antenna, discussing conditions of resonance and parametric amplification
03 p0480 A69-14113
- Monograph on electron waves and resonances in bounded plasmas covering theoretical and experimental methods, metallic and dielectric resonance probes, etc
04 p0633 A69-14296
- Electron density variation in region of change of regime in gas discharge excited by HF capacitance and external electrode
04 p0637 A69-15060
- LF electrical resonance oscillations in nonisothermal plasma jet flow, noting pressure and magnetic field effects on amplitude and frequency
04 p0638 A69-15174
- Resonant four wave interaction for nonlinear energy transfer in electron plasma oscillations
06 p0963 A69-17143
- Harmonic generation of S band signal inside plasma column at resonance
06 p0965 A69-17488

- Quasi-static theory of antenna in magnetoactive plasma subjected to resonance, solving boundary value problem
07 p1099 A69-18522
- Period fluctuations in ionospheric plasma resonance amplitude, proposing hypothesis in terms of quasi-electrostatic surface waves guided by antenna wire
07 p1125 A69-18847
- Cylindrical antenna in uniaxial resonant plasmas, calculating current distribution and input admittance on basis of Wiener-Hopf technique
07 p1107 A69-19227
- Resonances in plasma column monitored by frequency and current modulation methods
08 p1365 A69-20552
- Electromagnetic wave attenuation propagating along external magnetic field ascribed to cyclotron wave energy absorption by resonant plasma particles
08 p1277 A69-21077
- Cold plasma magnetoacoustic resonance, showing nonlinear exciting magnetic field dependence on polarity and energy
09 p1548 A69-21668
- Localized plasmons and optical phonons occurrence on local plasma levels, noting role of impurity atom in localized exciton-plasma resonance
09 p1548 A69-21674
- Resonant interaction between traveling charge with superimposed magnetic field and Alfvén wave in plasma cylinder, showing cyclotron orbit variations
09 p1551 A69-22035
- Upper hybrid and modified plasma resonance on basis of rocket-borne gyroplasma probe data
10 p1726 A69-22807
- Ground wave propagation attainment of electron plasma resonance of F region, stressing need of wave vector orientation toward magnetic north
10 p1684 A69-23828
- Conductivity and permittivity for ion and electron resonance region of ionospheric plasma model calculated in quasi-hydrodynamic approximation
10 p1686 A69-23908
- Tonks-Dattner resonances in plasma column, using linearized Vlasov equation for coupling to plasma waves of time varying electric fields
11 p1929 A69-25266
- Resonance radiation output effect on electron distribution according to energies and concentration in low temperature plasma, solving relevant kinetic equations
11 p1935 A69-25757
- Energy exchange between LF waves and magneto-spheric energetic particle population by bounce resonant interaction
12 p2073 A69-26946
- Satellite observation of intensity and distribution of VLF emission at medium latitude during magnetic storm interpreted by transverse resonance plasma instability
12 p2073 A69-26947
- Nonlinear longitudinal plasma oscillations, treating resonant particles, single mode and wave interactions
14 p2501 A69-29953
- Resonance cones in angular distribution of short antenna RF electric field in anisotropic plasma noting variation with incident, cyclotron and plasma frequency
15 p2659 A69-30876
- Stationary phase method of integration for growth and decay of resonant plasma oscillations excited by small pulsed dipole, noting Landau damping
16 p2817 A69-31641
- Collisionless drift plasma wave instability growth rate calculation noting destabilization from resonant electrons
16 p2820 A69-31691
- Parametric amplification of ion-acoustic oscillations in plasma with LF electric field, noting suppression and resonance
16 p2821 A69-31797
- Noise emission and Landau damping of plasma resonances related by network theory including Nyquist formula, discussing noise temperature in free fall region
16 p2822 A69-32038
- Plasma electroacoustic resonance in reentry sheath of Trailblazer 2 vehicle excited by nonradiating coaxial antenna, deducing electron density gradient at vehicle surface
17 p3010 A69-32915
- Electroacoustic-electromagnetic waves nonlinear coupling in compressible isotropic plasma, comparing slowly varying and resonant interaction approaches
17 p2928 A69-33870

- LF electrical resonance oscillations in nonisothermal plasma jet flow, noting pressure and magnetic field effects on amplitude and frequency
18 p3180 A69-34716
- RF plasmoid properties, discussing bounded plasma resonance theory, basic experiments, resonance sustained discharges, role of negative ions, etc
18 p3181 A69-35487
- Cold plasma approximation of whistler excitation of lower hybrid resonance at wake of body moving through ionosphere, comparing results with Alouette satellite observations
20 p3519 A69-37025
- Ionospheric topside plasma resonances observed by fixed and swept frequency satellite-borne sounders
20 p3531 A69-37884
- Ionospheric resonances due to plasma nonlinearities near spacecraft, noting effects on radio signal propagation
20 p3495 A69-37886
- Frequency shifts observed in Alouette 2 cyclotron harmonic plasma resonances, noting antenna length and direction
20 p3496 A69-37892
- Landau damping and echo in plasma, discussing theory, Van Kampen waves, finite amplitude wave attenuation, spin, cyclotron and plasma wave echoes
20 p3582 A69-38012
- Nonlinear oscillations of inhomogeneous cold plasma in hybrid resonance region
21 p3672 A69-38588
- Resonant perturbation response of Vlasov magnetoplasma to source below electron gyrofrequency, explaining fractional resonances in Alouette 2 topside data
22 p4023 A69-40516
- Plasma resonances driven into nonlinear regime, using models of cold plasma driven by wave source and unmagnetized Vlasov plasma by two grid source
23 p4197 A69-42418
- Electromagnetic scattering by small plasma ellipsoid moving in vacuum through external steady magnetic field, analyzing resonance phenomena
24 p4282 A69-42979
- PLASMA RINGS**
- U TOROIDAL PLASMAS**
- PLASMA SHEATHS**
- Carbon monoxide ion dynamics in envelopes of comets exhibiting fountain behavior, discussing electron-collisional ionization within envelopes as main plasma production mechanism
02 p0310 A69-11423
- C and S band waveguide impedance measurements taken in flight in reentry plasma, noting results for plasma
02 p0218 A69-12333
- Reflection of plane electromagnetic wave from conducting plane covered with moving uniaxial sheath
02 p0209 A69-12334
- Kinetic theory model of plasma sheath transition, analyzing sheath structure in unignited mode of thermionic converter
03 p0368 A69-13125
- Helium plasma ion oscillations damping by external RF electric field at sheath-plasma resonance condition
03 p0476 A69-13323
- Reentry plasma sheath simulation in wind tunnel by injection of nitrogen plasma from model vehicle nose
03 p0412 A69-13679
- Coaxial plasma accelerator for generation of pure injection plasmas, noting stability of propagating current sheath
03 p0481 A69-14213
- Frequency conversion in sheath capacitance of glow discharge plasma contained within metallic coaxial cylinders
04 p0634 A69-14456
- Nonequilibrium ionization rate in arc discharge, studying perturbations effect in near cathode Langmuir layer
04 p0635 A69-14763
- Numerical values for cylindrical antenna admittance in uniaxial plasma, considering plasma compressibility and vacuum sheath
06 p0965 A69-17513
- Wall space charge layer effect on ion extraction from weakly ionized plasma, using quadrupole mass spectrometer
07 p1188 A69-18276
- Dynamics of pulsed microwave breakdown in nonuniform field at waveguide fed mica aperture, noting electric field distribution change due to initial plasma configuration
07 p1107 A69-19448

Plasma sheath-boundary interactions, analyzing emission, reflection and surface ionization effects on current densities and heat fluxes for cesium and argon
08 p1369 A69-20818

Electromagnetic field of infinite helical sheath, basing calculations on previous helical antenna studies
09 p1463 A69-21682

DC electrical resistance of magnetosphere between two satellites with sheaths and current-voltage relation of satellite sheath
09 p1489 A69-21710

Kinetic theory model of plasma sheath transition applied to sheath structure in unignited mode of thermionic converter
09 p1440 A69-21828

Ion-acoustic wave experiments for disturbance travel in plasma sheath, obtaining ion number density
11 p1929 A69-25272

Electric field penetration into homogeneous plasma at frequencies near Langmuir frequency and current at surface of thin cylindrical antenna in plasma
11 p1853 A69-25551

Dynamic growth of positive ion sheath on plane electrode in mercury plasma, measuring sheath thickness and current
12 p2134 A69-26099

Laminar MGD electrode boundary layer of thermal nonequilibrium plasma from collisionless Langmuir sheath and continuum theories
13 p2310 A69-28031

Inverse current in ignited mode diode linearly related to spacing, noting emitter sheath
14 p2401 A69-29230

Plasma potential and density distribution in near-electrode plasma sheath of thermionic converter
14 p2491 A69-29257

Ion and electron distributions in chemical nonequilibrium boundary layer flow over hypersonic reentry vehicle, discussing plasma sheath and boundary layer thickness relations
16 p2769 A69-31874

Plasma electroacoustic resonance in reentry sheath of Trailblazer 2 vehicle excited by nonradiating coaxial antenna, deducing electron density gradient at vehicle surface
17 p3010 A69-32915

Swept frequency microwave measurements in simulated reentry environments using dielectric layers, glow discharge plasma and aperture antenna-plasma layer model
[AIAA PAPER 69-701] 17 p2920 A69-33461

Electrical characteristics of equilibrium plasma sheaths at stagnation point of blunt body in high speed air, considering current collection regimes
[AIAA PAPER 69-702] 17 p3011 A69-33473

Severe magnetosphere distortions in north-south direction with parallel/antiparallel magnetosheath to magnetospheric field ascribed to solar wind property changes from Explorer 12 observations
18 p3128 A69-34947

Small continuum electrostatic probes calibration and operation in ionized plasma flow with sheath dimensions larger than boundary layer dimensions
19 p3304 A69-35719

HF backscattering characteristics of infinite conducting cylinder with radially inhomogeneous plasma sheath, using Bessel functions, geometrical optics and graphs
20 p3494 A69-37843

Langmuir probe immersed in plasma RF response over range of signal amplitude and frequency and plasma electron density, showing sheath capacitance role
21 p3723 A69-38939

Slot antenna radiation patterns in presence of aperture RF plasma breakdown sheath measured for various gas pressures and breakdown power levels
23 p4116 A69-41595

PLASMA SLABS

Horn antenna far field radiation pattern distortion by isotropic plasma slab, noting attenuation variation with electron density
02 p0218 A69-12335

Impedance sheet approximation to plasma slab, considering plane wave propagation, plasma covered slot antenna and transmission loss
02 p0209 A69-12348

Plasma slab acceleration along magnetic dipole guard field null, noting lack of equilibrium and no decrease of plasma losses
03 p0475 A69-13157

Particle measurements by Vela nuclear test detection satellites 7A and 2B/ noting plasma sheet in center of magnetotail
07 p1208 A69-19362

Ion Landau damping and finite Larmor radius effects on dispersion relation of Kelvin-Helmholtz instability due to shear in ion fluid velocity
08 p1367 A69-20799

Plane transient electromagnetic wave from cold lossless plasma half space and slab
12 p2033 A69-26865

Plane TM surface waves supported by plane ungrounded magnetoplasma slab with magnetostatic field parallel to two parallel interfaces and perpendicular to propagation direction
13 p2308 A69-27966

Longitudinal electric field penetration into plasma slab in constant magnetic field
14 p2493 A69-29665

Collisionless plasma slab drift mode stabilization at uniform temperature by oscillating electromagnetic field
14 p2499 A69-29851

Ambipolar to free diffusion transition in magnetized slab plasmas, discussing basic equations, iterative numerical procedure, characteristic parameters and H plasma
15 p2657 A69-30023

Microwave field-plasma slab nonlinear interaction in rectangular waveguide, analyzing current and electron density and second harmonic TE and TM power
16 p2749 A69-31703

Trapped modes in cold magnetoplasma slabs and rods in free space analyzed by Maxwell equation, assuming DC magnetic field and homogeneous electrons distribution
17 p2926 A69-33850

Parametric excitation theory involving Langmuir and ion-acoustic waves for homogeneous plasma slab with specular particle reflection at slab walls
20 p3582 A69-38245

PLASMA SOUND WAVES

U MAGNETOHYDRODYNAMIC WAVES

PLASMA SPECTRA

Rapid scan spectrometer design and calibration, noting application to diagnostics of high density transient Xe and H plasmas
01 p0082 A69-10838

Integral spectral emissivity of gas arc plasmas at high temperatures and atmospheric pressure
02 p0291 A69-12484

Probe and spectral techniques compared for investigation of low voltage arc of cesium plasma thermionic converter
03 p0478 A69-13836

Dense plasma radiation, analyzing spectrographically initial stages of wire explosion in vacuum
03 p0482 A69-14227

Relaxation method for separation of continuous electron/ion recombination spectrum from electron spectrum in nonequilibrium gas discharge plasma
04 p0639 A69-15369

Emission continuum intensity of negative nitrogen ion in nitrogen and air plasmas
04 p0639 A69-15370

Plasma characteristics in thermionic converter operating under low voltage arc conditions obtained by computer, probes and spectral techniques
06 p0963 A69-16910

Radial electron concentration profile determination by spectroscopic examination of continuous plasma radiation of pulsed discharge in capillary
06 p0964 A69-17253

Potassium seeded argon plasma conductivity in induced electric field at static gas temperature for MHD generator model
06 p0871 A69-17909

Spectroscopic investigation of emission of air plasma in HF electrodeless plasmatron, analyzing near IR, UV and visible spectra
07 p1191 A69-18995

Green function method for atomic line broadening in plasma radiation, including electron correlations and quantum effects
08 p1361 A69-20147

Thermal and nonthermal radiation of hot gases using spectroscopic plasma diagnostics
08 p1363 A69-20463

Quantitative spectroscopy methods for determining data on chemical constitution of plasmas, treating optically thin LTE plasmas
08 p1363 A69-20465

Spectroscopic diagnostics for determining temperatures, electron densities and line shapes in optically thick plasmas
08 p1363 A69-20466

Boltzmann plots derived from spatially integrated spectral line intensities emitted from nonuniform gaseous plasmas, discussing Boltzmann temperature
09 p1552 A69-22251

Spectrum analysis of aluminum plasma excited by giant pulse ruby laser radiation, discussing temperature and density
12 p2134 A69-26027

Back scattered electron inelastic LEED spectra of cesium plasma in W/100-Cs system, noting strong loss peak
12 p2132 A69-26116

Optical and spectral properties of dense plasma expanding after exploding electric wire in vacuum using high speed photography
12 p2137 A69-26533

High pressure arc discharge diagnostics with spectroscopic method relating spectral profiles to central temperature, pressure and temperature distribution
12 p2094 A69-26968

Convective-current instability in finite length plasma column, analyzing spectrum of unstable harmonics
13 p2314 A69-28441

Langmuir HF turbulence effect on anisotropic plasma oscillation spectra, determining instability conditions
13 p2315 A69-28448

Decaying arc discharge Cs plasma luminosity anomalous behavior due to combined effect of intrinsic monotonic and complex nonmonotonic emissions
14 p2490 A69-28996

Probe and spectroscopic study of dense plasma thermionic converters noting parameters
14 p2404 A69-29256

Quasi-linear approximation for spectrum analysis of LF plasma wave oscillations in steady electric field
14 p2492 A69-29468

Laser spark plasma initial development phase showing high electron temperature and concentration, continuous spectrum emission, line broadening and shock wave formation
14 p2461 A69-29779

Plasma electron temperatures from electron bremsstrahlung spectra measurements in X ray region
14 p2496 A69-29783

High speed photographs of plasma emission spectra in UV and soft X radiation spectrum regions, discussing theory, design and operation of facilities
14 p2496 A69-29784

Si III and O II spectral lines distortion in pulse HF plasma in rotating electromagnetic field, showing particle rotational speed dependence on discharge chamber radius
14 p2497 A69-29791

Electron densities measurement in plasmas in magnetic fields from profiles of spectral lines, noting Stark and Zeeman effect
15 p2657 A69-30027

Recording arrangement aperture effect on plasma scattering spectrum during plasma parameter determination by light scattering technique
15 p2664 A69-30996

Relaxation method for separation of continuous electron/ion recombination spectrum from electron spectrum in nonequilibrium gas discharge plasma
16 p2822 A69-32116

Emission continuum intensity of negative nitrogen ion in nitrogen and air plasmas
16 p2822 A69-32117

Electron impact broadening of isolated spectral lines emitted by neutral atoms in plasma
16 p2823 A69-32468

Spectrum characteristics of plasma generated by pulses of solid state laser radiation on metals and alloys in regular and quasi-stable regimes of emission
22 p3964 A69-40793

Thermal average derived with classical path treatment for line broadening theories of gases or plasmas
23 p4192 A69-41378

Spectroscopic azimuthal and axial measurement of jet velocity in MPD X9 rocket engine by spectrograph and Fabry-Perot interferometer [DGLR-69-024B]
23 p4202 A69-41925

PLASMA SPRAYING

Plasma arc welding, discussing transferred and non-transferred arc systems application to spraying and welding techniques, including automated microplasma welding
04 p0608 A69-15482

Tungsten coatings applied on stainless steel and titanium alloy surfaces by plasma jet
07 p1165 A69-18931

Zirconium and niobium carbide behavior during plasma spray coating, noting optimum oxygen content and mean carbide particle diameter in spray

07 p1165 A69-18933

Density distribution vs thickness in sprayed ZrC, NbC and aluminum oxide coatings obtained by plasma jet

12 p2118 A69-26258

Plasma spray quenched Al-V alloys resulting in dispersion strengthening of material

13 p2277 A69-27409

Electrical resistivity of aluminum oxide films deposited on tubular substrates by plasma and gas flame spraying, noting dependence on film thickness and substrate

15 p2630 A69-31179

Bonding strength of plasma coatings with substrate, testing aluminum oxide on steel

15 p2630 A69-31189

Particles maximum diameter numerical values for melting during injection into plasma jet calculated for various metals and refractory dielectrics

17 p3009 A69-32825

Residual tensile stress distribution during plasma spraying determined as function of temperature field in blank

20 p3548 A69-37328

Plasma coating formation mechanisms and parameters, studying metal surface and deposited particles temperatures, spraying time effects, etc

20 p3549 A69-37374

Plasma arc systems and applications, noting transferred and nontransferred jets with emphasis on plasma spraying, surfacing, welding and cutting [SBAC PAPER 18]

20 p3550 A69-37453

Plasma metal spray coating for Al and Mg alloy aircraft components adhesive bonding repair technique compared to welding and electroplating

21 p3728 A69-38462

Tungsten coatings applied on stainless steel and titanium alloy surfaces by plasma jet

21 p3746 A69-39152

PLASMA STABILITY

U MAGNETOHYDRODYNAMIC STABILITY

PLASMA TEMPERATURE

Plasma discharge energy balance analysis to determine discharge power and temperature as function of electric field parameters

02 p0286 A69-11572

Capillary arc source spectroscopy, determining plasma temperature and pressure dependence on capillary geometry and discharge current

02 p0286 A69-11573

Temperature and electron density distribution during late phase of wire explosion, analyzing optically thin plasma column by quantitative spectroscopy

02 p0286 A69-11711

Dense plasma temperature determination by gamma ray resonance scattering

02 p0291 A69-12481

Second virial coefficient of plasma at arbitrary temperature, noting small Coulomb interaction

02 p0292 A69-12639

Thermionic emission and dispersion of plasma created by monopulse of laser radiation focused on solid target, discussing plasma temperature determination methods

03 p0441 A69-14141

High temperature measurement based on spectral line displacement and broadening due to Stark effect, noting diagrams for O, Na, Mg, Al and Si at various temperatures

03 p0481 A69-14146

HF gas discharges, discussing plasma temperature and density, plasmoid length and spectroscopic applications

03 p0482 A69-14217

Electron temperature time variation measurement in plasma-beam discharge by method based on single spectral line

04 p0638 A69-15368

Flow characteristics and sound velocity in two temperature plasma

05 p0802 A69-15796

Free electron kinetic equation including inelastic electron-atom collisions derived for nonequilibrium low temperature plasma, showing interrelated electronic and atomic energy distribution

05 p0802 A69-15889

Spectroscopic charged particle concentration determination, discussing error and limits of applicability in low temperature plasma

05 p0762 A69-15899

Low dispersion spectrograph for temperature and electron density determination in plasma beam

05 p0803 A69-15997

Radial temperature profile in induction coupled argon plasmas at low and atmospheric pressures

06 p0964 A69-17193

Arc cloud thermal conductivity effects on discharge temperature and radiation intensity, solving energy balance equation

06 p0964 A69-17254

Transport properties of partially ionized low temperature plasmas, considering viscosity, electrical and heat conductivity of argon and nitrogen at high temperatures

06 p0969 A69-17907

Zeta discharge in low density regime characterized by strong turbulence, rapid loss of plasma, resistance higher than predicted and high ion temperature

06 p0970 A69-17955

Shock layer microwave radiation measurements during reentry flight of spherical nose cone, determining effective plasma temperature

[AIAA PAPER 69-183]

06 p0865 A69-18201

Nonequilibrium of electron and gas temperatures and reaction process for force-free plasma parallel beam produced in burner by expansion of argon plasma [DVL-875]

07 p1188 A69-18277

Hydrogen arc in axially parallel magnetic field produces higher plasma temperatures by reduced thermal conductivity coefficient

07 p1189 A69-18489

Simplification of equations for two temperature plasma composed of electrons, singly charged ions and neutral atoms, noting effect of viscosity and thermal force

07 p1190 A69-18693

Geomagnetic field line stretching outward due to energy entry in form of large number of charged particles or increase in particle temperature/inflation

07 p1127 A69-19357

Spectroscopic diagnostics for determining temperatures, electron densities and line shapes in optically thick plasmas

08 p1363 A69-20466

Recombination rate of electrons in high pressure helium-like plasma with gas temperature fixed at 300 K and electron temperature varied between 300-2000 K

08 p1356 A69-20742

Ar-H plasma arc radial temperature distribution determined by photoelectric spectroscopy in visible range

08 p1366 A69-20758

Plasma column of free burning electric arc, deriving temperature, electron concentration and electric field radial distributions

09 p1545 A69-21431

Mariner 2 data on large scale variations in magnetic field, solar wind density and temperature in interplanetary plasma

09 p1592 A69-21540

Local enthalpy measurements in atmospheric argon arc plasma jet at various arc currents, comparing calorimetric and spectrometric methods

09 p1547 A69-21602

Spectroscopic measurements of electron density and temperature for quasi-saturation region of ignited mode plasma in planar thermionic converter

09 p1439 A69-21826

Shock heated helium plasma temperature measurements by spectroscopy compared to Rankine-Hugoniot calculations including ionization effect

09 p1548 A69-21963

Boltzmann plots derived from spatially integrated spectral line intensities emitted from nonuniform gaseous plasmas, discussing Boltzmann temperature

09 p1552 A69-22251

Temperature pulsations radial distribution in plasma jet using plasmatron without mixing chamber

10 p1729 A69-23432

Low temperature optically thick boundary layers influence on spectroscopic temperature measurements in plasma MHD channels

10 p1731 A69-23434

Two temperature plasma model applicability in analyzing nonequilibrium MHD generator

10 p1731 A69-23438

Ionization instability in low temperature magnetized plasma, analyzing electron concentration perturbation caused by Joule heating during electron-ion collisions

10 p1741 A69-23962

Xenon pulse discharge plasma temperature distribution, spectral brightness density and light absorption across quartz tube section, noting temperature drop near wall

10 p1742 A69-24081

Electron-ion temperature relaxation near interface of two seminfinite nonmagnetized different temperature plasmas brought into thermal contact

11 p1923 A69-24296

Radiative cooling rates of bounded plasma of hydrogen isotopes, comparing dense deuterium plasma analytical results with brightness measurement

11 p1927 A69-25218

Temperature and electron concentration in plasma spark obtained in air by focusing Q switched laser radiation

11 p1928 A69-25235

Arc mode thermionic Cs converter nonlinear I-V characteristics explained by current-dependent temperature and potential fields in plasma

11 p1827 A69-25400

Temperatures and densities of atoms and electrons from spectroscopic methods in gas discharge plasma used for CW ion-argon lasers, evaluating inversion mechanism

12 p2106 A69-26319

Electromagnetic waves directional velocity, plasma temperature and particle density determined from analyzing electric field fluctuations amplification near body in plasma

12 p2137 A69-26531

Temperature measurement of plasma consisting of combustion products in MHD duct, measuring spectral line contours by Fabry-Perot interferometer for accuracies

13 p2309 A69-28023

Near electrode layer calculation in low temperature plasma, solving kinetic ion equation for quasi-neutral and Poisson equation for space charge regions

13 p2312 A69-28117

Cesium plasma electron temperature in narrow electrode space of thermionic converter determined using electrode and changeable space diode

14 p2491 A69-29243

Work function measurements of polycrystalline W, Re and Ni disks in high pressure cesium plasma for low probe temperature range

14 p2506 A69-29266

Plasma electron temperature determination by line intensity ratio of beryllium-like ions, noting excitation functions

14 p2496 A69-29789

Plasma ion temperature measurement based on integral neutron yield, noting density determination

14 p2498 A69-29808

Low beta fusion research in open end magnetic mirrors covering scope, end losses, fusion economics, flute instability, stabilization, etc

14 p2498 A69-29843

Convective and nonconvective two stream instability for hot plasmas, approximating equilibrium distribution function for given temperature by resonance functions

14 p2499 A69-29844

Plasma temperature measurement by resonant laser radiation absorption, assuming Saha-Boltzmann relation

14 p2501 A69-29954

Dynamic dispersion relation for bounded cylindrical beam plasma with temperature correction, including hot beam interaction

14 p2502 A69-29957

Electron concentration in low temperature nonequilibrium steady state plasma, including Saha equation applicability criterion

15 p2662 A69-30975

Single and two phase subsonic plasma jets temperature and velocity distribution, noting reduction by condensed phase and use of Schlichting curves

15 p2663 A69-30989

Iron and stone meteorites ablation using electrodeless plasmatron and filmed onto IR films

15 p2697 A69-31252

Propagation and linear transformation of HF electrostatic waves in hot magnetoactive radially inhomogeneous plasma, noting wavelength shortening

16 p2816 A69-31638

Electron temperature time variation measurement in plasma-beam discharge by method based on single spectral line

16 p2822 A69-32115

Mariner 2 data on large scale variations in magnetic field, solar wind density and temperature in interplanetary plasma

16 p2864 A69-32535

Magnetized solar wind model to evaluate temperature, density, velocity and magnetic field for various boundary conditions

17 p3041 A69-33812

Spectrum and cross section of radio wave scattering in two temperature plasma, relating differential

backscattering cross section to ionospheric electron density fluctuations 17 p2930 A69-33895

Radiation cooling behind strong shock in Kr as function of plasma luminosity near end of relaxation zone 18 p3171 A69-34450

Time variation of laser flare plasma temperature related to pulse parameters, using soft X radiation from plasma 18 p3154 A69-35496

Solar wind temperature, using distribution function for solar wind ions in anisotropic Maxwell distribution form 19 p3396 A69-36631

Plasma temperature and ion concentration profiles determined from simultaneous measurements by Alouette 2 and Explorer 31 satellites of electron density, temperature and ion abundance 20 p3532 A69-37896

Temperature gradient effect on plasma stability in maximum J configuration 21 p3776 A69-38711

Ionization formula linking nitrogen ion charge density ratio to plasma temperature 22 p3990 A69-40714

Interaction between two temperature plasma flux and electrodes in MHD channel with crossed electric and magnetic fields, studying boundary layer dynamics 22 p3991 A69-41022

Rocket measurements of plasma densities and temperatures in visual aurora using electrostatic onboard and ejected Langmuir probes, observing hyperthermal electron 23 p4167 A69-42334

Electron temperature distribution across shock wave in weakly ionized plasma, noting variable ionization across wave 24 p4356 A69-43362

PLASMA TURBULENCE

Microinstabilities of plasma confined by magnetic trap, discussing stabilization, drift waves and anomalous diffusion of plasma by turbulence 01 p0125 A69-10048

Generalized pair of space correlation and wave number spectrum functions applied to plasma electron density fluctuations and velocity fluctuations of background fluid 01 p0127 A69-10339

Power spectrum for energy transfer region in HF turbulent plasma by nonlinear equations, with results applied to subcosmic ray acceleration 01 p0145 A69-10790

Electromagnetic wave scattering by turbulent plasma pulsations in external magnetic field 02 p0289 A69-12174

Goldberg-Unno method for determining Doppler width, microturbulence velocity and convection errors, considering photosphere as hot ascending and cold descending columns 02 p0328 A69-12752

Outer space electromagnetic radiation transfer in turbulent plasma with allowance for polarization effects, describing polarization induced changes in Stokes parameters 03 p0506 A69-13083

Relationship between instabilities and turbulence in plasma, using spectrum of plasma fluctuations 03 p0474 A69-13115

Coulomb collision and microturbulence effect on plasma wave echo, noting echo dependence on perturbations in particle distribution 03 p0474 A69-13144

Energy partition between mechanical and magnetic modes in turbulent plasma in external field 03 p0476 A69-13384

Transport equation for electromagnetic waves multiple scattering by turbulent plasma 03 p0478 A69-13959

Electrodynamics of turbulent conducting media based on nonrelativistic MHD 03 p0479 A69-13972

Solar wind turbulence properties deduced from radio astronomical measurements 03 p0502 A69-14001

Electron viscosity coefficient in weakly turbulent plasma in strong magnetic field, noting electrical and thermal conductivity 03 p0480 A69-14136

Wave number frequency dependent spectral function and space-time correlation function in turbulent plasma, noting utility for probes and scattering analysis 03 p0483 A69-14255

Smeared out electron beam generation for experiments on weak plasma turbulence by passing beam through aluminum foils 04 p0636 A69-15020

Effective collision frequency deduced from ratio of microwave conductivity to electron density in PIG discharge plasma 05 p0804 A69-16442

Zeta discharge in low density regime characterized by strong turbulence, rapid loss of plasma, resistance higher than predicted and high ion temperature 06 p0970 A69-17955

Collisionless shock waves in high beta plasmas and in cold plasmas 07 p1194 A69-19366

Periodic pulling mechanism for explaining transition to turbulence in bounded plasma with weakly unstable drift modes 07 p1194 A69-19400

Microwave scattering by turbulent plasma column noting effects of plasma density 07 p1194 A69-19411

Exact solution to kinetic equation for resonant three wave coupling in weakly turbulent plasmas, assuming only single triplet of modes interaction 08 p1360 A69-19989

HF electromagnetic wave scattering at small scale plasma turbulence in magnetic fields, discussing interactions in frequent collisions region 08 p1275 A69-20435

Current fluctuations in Langmuir probe in turbulent plasma measured for various pressures, frequency bands, etc, noting plasma density fluctuations role 08 p1364 A69-20517

Particle-wave interactions in weakly turbulent collisionless plasma, discussing ensemble average distribution function, diffusion, nonlinear Landau damping and nonlinear instabilities 08 p1368 A69-20803

Longitudinal and transverse wave propagation in compressible isotropic turbulent plasma, noting mode coupling effect [AFCL-69-0289] 10 p1729 A69-23424

Turbulent plasma near stability limit in MHD generator with constant load coefficients, noting effective conductivity and effects of gas temperature 10 p1735 A69-23460

Spontaneous magnetic field excitation in turbulent plasma noting possible instability 10 p1740 A69-23715

Low energy cosmic rays and plasma turbulence in heating and ionizing interstellar gas, discussing acceleration and galactic sources 11 p1945 A69-24380

Electric field measurements for turbulence in collision-free shocks, noting power spectra of magnetic and electric fluctuations and electron density 11 p1930 A69-25276

Radio emission of fast cosmic ions by plasma wave conversion to electromagnetic waves, using nonlinear mechanism in turbulent plasma 12 p2149 A69-26209

Electrical DC conductivity of turbulent plasma decreased in presence of ion waves 13 p2305 A69-27302

Langmuir HF turbulence effect on anisotropic plasma oscillation spectra, determining instability conditions 13 p2315 A69-28448

Outer space electromagnetic radiation transfer in turbulent plasma with allowance for polarization effects, describing polarization induced changes in Stokes parameters 14 p2515 A69-28765

Kinetic theory of fluctuations in turbulent plasmas based on construction of many particle distribution functions 14 p2502 A69-29989

Incident electromagnetic waves Raman scattering at turbulent plasma oscillations, obtaining plasma intrinsic radiation spectrum 15 p2659 A69-30728

Ballistic wake structure and jump conditions for plane plasma shock waves with electrostatic turbulence 15 p2660 A69-30914

Particle diffusion and wave spectrum in unstable plasma calculated using Feynman diagrams, considering quasi-linear growth, resonant three wave coupling and nonlinear Landau damping 15 p2660 A69-30915

Nonlinear effects and turbulent behavior in beam plasma instability, studying interactions in magnetic field 15 p2660 A69-30917

Critical study of Tidman model for turbulent electrostatic shock wave structure in plasmas, noting velocity distribution function role 15 p2661 A69-30927

Turbulent diffusion and ion heating in plasmas in presence of current instability 15 p2662 A69-30959

Particle-wave interaction in weak turbulent plasma in presence of uniform magnetic field, applying perturbation theory arbitrary order 16 p2819 A69-31683

Plasma turbulence effect on magnetosonic wave attenuation, noting increased electron and ion collision frequency and appearance of anomalous resistance 16 p2820 A69-31794

Charge density irregularities of midlatitude ionospheric E region related to cross field plasma instability noting turbulence 16 p2773 A69-31972

Collisionless cylindrical Langmuir probe response in turbulent plasma for mean and statistical properties [AIAA PAPER 69-698] 17 p3010 A69-33438

Collisionless shock wave front turbulence in diluted plasma, including thickness, electron and ion component measurements 17 p3012 A69-33818

Collisionless plasma heating mechanisms from current layer turbulence in theta pinch experiment and shock wave front structure as function of initial magnetic field 17 p3013 A69-33824

Collisionless shock waves in plasma and ion and electron turbulent heating in high voltage theta pinches, noting magnetic disturbance 17 p3013 A69-33825

Signal wave scattering and transmission by ionized medium disturbed by high power pumping wave, studying wave interactions with Born approximation for bounded medium 17 p2928 A69-33871

Solar wind model for studying long wavelength turbulence as heat source for alpha particles and protons in solar plasma 18 p3186 A69-34299

Book on nonlinear plasma theory covering nonlinear wave, wave-particle and wave-particle nonlinear interactions and weak plasma turbulence 18 p3180 A69-34930

Spectral line scattering during propagation of radiation in turbulent plasma 19 p3396 A69-36573

Solar flares plasma turbulence mechanisms suggested from magnetic energy release studies of Petschek model of magnetic field annihilation 20 p3589 A69-37549

Power spectrum for energy transfer region in HF turbulent plasma by nonlinear equations, with results applied to subcosmic ray acceleration 20 p3591 A69-38008

Resonant perturbation response of Vlasov magnetoplasma to source below electron gyrofrequency, explaining fractional resonances in Alouette 2 topside data 22 p4023 A69-40516

Plane electromagnetic wave scattering on turbulent fluctuations in electron density of finite volume ionized plasma, evaluating Booker-Gordon relation 23 p4116 A69-41587

Optimization of Faraday MHD generators with nonequilibrium ionization and plasma turbulence, assuming electrons at Saha equilibrium at elevated temperatures 24 p4256 A69-43682

Electron density fluctuations in transition region of turbulent plasma jet, noting spiky waveform [AIAA PAPER 68-685] 24 p4360 A69-43697

Low energy cosmic rays and plasma turbulence in heating and ionizing interstellar gas, discussing acceleration and galactic sources 24 p4375 A69-43770

PLASMA WAVES

NT ELECTROSTATIC WAVES

Electron plasma wave dispersion along cylindrical plasma column in magnetic field 01 p0126 A69-10277

Quasi-monochromatic wave dispersion relation and energy transfer in inhomogeneous anisotropic medium 01 p0126 A69-10278

Transverse plasma mode excitation by nonlinear interaction analyzed by Hamiltonian function 01 p0127 A69-10280

Waves in inhomogeneous warm magnetoplasmas with static pressure gradients, applying dyadic to planar stratified plasma case 01 p0129 A69-10561

Plasma wave properties relation to creation of electron plasma densities above critical density, discussing splitting of cold plasma resonance

01 p0131 A69-10818

Electromagnetic waves trajectory distortion in moving plasma due to additional time delay noting propagation of pearl pulsations, whistling atmospherics and proton whistlers

01 p0068 A69-11114

Numerical method for determining group velocity of waves in homogeneous anisotropic medium, using implicit function from dispersion relation

01 p0131 A69-11117

Ionospheric irregularities and cross field plasma instability, analyzing nonlinear behavior of latter with two dimensional model

01 p0073 A69-11179

Stability of weakly inhomogeneous plasmas with free energy available for nonlinear resonant three wave interactions

01 p0133 A69-11212

VLF electric field measurements from 1 AU heliocentric orbit, noting field oscillations in solar wind and large amplitude HF noise bursts

01 p0035 A69-11224

Electric field in plasma half space determined by longitudinal wave normal mode analysis, using BKG particle conserving collision model

01 p0134 A69-11287

Plasma waves and particle interaction in nonuniform magnetosphere, considering propagation across sheets of steep density gradient and auroral precipitation

02 p0235 A69-11429

Book on propagation characteristics of various wave modes in ionized gas plasmas

02 p0285 A69-11518

Instability of longitudinal plasma waves propagating across magnetic field in plasma with electrons and ions drifting with different velocities across field

02 p0286 A69-11830

Total energy of plasma wave from second order energy, showing close approximation to wave packet energy

02 p0287 A69-11876

Plasma ion oscillation suppression by intensified electron plasma oscillations

02 p0287 A69-11934

Magnetoplasma wave propagation in periodic conducting solid, calculating electron drift effect on space harmonics

02 p0287 A69-11945

Standing ion-acoustic wave excitation in weakly ionized plasma, noting isothermal compression of electron gas

02 p0292 A69-12555

Acoustic plasma waves propagation in thin films in case of film quantization, showing phase velocities close to Fermi velocities of electrons

02 p0300 A69-12649

Wave analysis for energy propagation in plasma, discussing excitation spectrum and stability properties

02 p0293 A69-12782

Diffraction of cylindrical waves at half plane in cold anisotropic plasma, using Fresnel integrals

02 p0293 A69-12842

Wave fields and coupling of RF power to ion cyclotron waves in finite length thermal collisional plasma column

03 p0474 A69-13114

Existence and stability of periodic waves in cold collisionless plasma in magnetic field

03 p0474 A69-13143

Coulomb collision and microturbulence effect on plasma wave echo, noting echo dependence on perturbations in particle distribution

03 p0474 A69-13144

Density gradient driven collisional drift waves, discussing identification, stabilization and enhanced plasma transport

03 p0474 A69-13145

Enhanced bremsstrahlung from supraluminous and subluminal waves in thermal isotropic homogeneous Maxwellian electron plasma, noting applicability to Crab Nebula

03 p0507 A69-13150

Decay stability of large amplitude neutral wave into two ion acoustic waves in weakly ionized plasma

03 p0475 A69-13158

Magnetosonic wave propagation across magnetic field in warm collisionless Maxwellian multicomponent plasma studied for small electron cyclotron and ion cyclotron radii

03 p0479 A69-14020

Langmuir wave disintegration, analyzing instability criterion and growth rate

03 p0480 A69-14057

Disintegration spectrum of Langmuir wave excited in plasma column by antenna, discussing conditions of resonance and parametric amplification

03 p0480 A69-14113

Interaction between surface waves propagating along plane plasma boundary and parallel low density electron beam, noting wave amplification and excitation

03 p0480 A69-14135

Electron plasma oscillations diffusion due to scattering by large amplitude ion wave background, noting electron wave spectrum evolution

03 p0483 A69-14256

Monograph on electron waves and resonances in bounded plasmas covering theoretical and experimental methods, metallic and dielectric resonance probes, etc

04 p0633 A69-14296

Nonlinear electron oscillations in plasma, deriving asymptotic expression for plasma perturbation

04 p0635 A69-14552

Propagation velocity upper limits for plasma waves during state of equilibrium transition determined from nonlinear wave equation

04 p0630 A69-14553

Nonlinear demodulation of amplitude modulated wave propagating in plasma

04 p0559 A69-15210

Particles nonlinear motion in plasma in magnetic field with arbitrary electron velocity distribution, discussing wave discontinuity patterns

05 p0804 A69-16370

Coupled waves in ferromagnetic and antiferromagnetic semiconductors in constant electric and magnetic fields, discussing spin, electromagnetic and plasma waves dispersion

05 p0809 A69-16548

Hydrodynamic and lattice vibrations equations for coupled waves in ion semiconductors in external electric and magnetic fields, observing sound amplification

06 p0978 A69-16897

Equation for charged particle motion in electromagnetic wave field propagated along magnetic field applied to nonlinear wave propagation in plasma near cyclotron resonance

06 p0963 A69-16905

Power flow in cyclotron and plasma modes propagating in waveguide filled with cold collisionless axially magnetized plasma

06 p0897 A69-17760

Electrostatic waves in inhomogeneous plasma in finite magnetic field, noting dispersion relation for cold plasma and stabilization of instability

06 p0967 A69-17761

Nonlinear interaction between cyclotron harmonic waves propagating perpendicular to static magnetic field in warm magnetoplasma, noting parametric amplification and mode conversion

06 p0968 A69-17766

Surface plasma waves excitation by light and decay into photons applied to nonradiative modes

07 p1188 A69-18278

Nonlinear interaction between cyclotron harmonic waves, demonstrating synchronism conditions for traveling wave parametric amplification and passive mode conversion

07 p1189 A69-18439

Magnetoplasma waves in semiconductors, discussing cold plasma dispersion, helicons, carrier densities, lattice dielectric constant and acoustic domain propagation

07 p1197 A69-18465

Nonisothermal wave propagation in n-type indium antimonide in orthogonal static and magnetic fields, considering instabilities and acoustic and polar optical phonon scattering

07 p1197 A69-18467

Structure of plane shock wave of arbitrary force propagating across magnetic field in hot rarefied plasma

07 p1190 A69-18692

Comparative models of magnetoplasma, discussing wave propagation in cold plasma, warm plasma and microscopic model

07 p1190 A69-18919

Magnetosonic wave evolution in inhomogeneous dispersive plasma created by magnetic piston, discussing equation solution

07 p1181 A69-19001

Plasma column radial density profile measurement by electron plasma waves propagation in presence of strong magnetic field

07 p1194 A69-19323

Plasma waveguide parameter changes due to additional gas ionization from microwave field

07 p1196 A69-19750

Landau damping of long wavelength ion acoustic waves in collision-free one dimensional plasma with gravity field

08 p1359 A69-19983

Phase velocities and polarizations of linear waves in infinite uniform high beta plasma

08 p1359 A69-19986

Fresnel formulas for surface plasma waves excitation by light in thin metal foil embedded between dielectric layers, discussing transmissive and absorptive resonances

08 p1372 A69-20290

Nonlinear interactions between plasma waves of various intensities, noting changes in particle distribution

08 p1362 A69-20427

Cylindrical antenna input impedance in isotropic plasma, assuming weak three dimensional plasma diffusion

08 p1285 A69-20428

Energy density and transport velocity of RF wave in plasma in damped oscillations region, discussing resonance

08 p1365 A69-20553

Warm plasma magnetic interactions, discussing density waves, pair correlation function and transport coefficients

08 p1366 A69-20749

Collisional theory of longitudinal wave propagation for two fluid viscous ionized plasmas formulated from coupled Maxwell and Boltzmann equations

08 p1367 A69-20796

Microwave scattering from longitudinal plasma waves propagating in collisionless plasma column

08 p1276 A69-20798

Wave interaction in magnetically confined plasma taking into account body and surface waves

08 p1370 A69-21014

Electromagnetic wave attenuation propagating along external magnetic field ascribed to cyclotron wave energy absorption by resonant plasma particles

08 p1277 A69-21077

Cyclotron waves interaction when propagating in solid state plasma in magnetic field, determining amplification zones and factors

08 p1374 A69-21078

Plasma wave coupling in absence of magnetic field in revolving system containing dielectrics and circular waveguide

08 p1371 A69-21150

Inhomogeneous collisionless plasma drift-oscillation stability in magnetic field augmented by E wave HF field

09 p1546 A69-21564

Self focusing of plasma whistler wave along magnetic field at small threshold power

09 p1546 A69-21577

Quantum oscillations of magnetization, undamped magnetoplasma waves development and sound amplification by electron drift in crossed fields observed in semimetals

09 p1556 A69-21615

Plasma oscillation intensities at combination frequencies under assumption of plasma wave and ion acoustic wave propagating along z axis

09 p1550 A69-22024

Shock wave structure problems in plasma, including plasma particles random motion in term representing electric field

09 p1551 A69-22032

Electrons velocity-space instability in plasma column, analyzing unstable wave and dispersion characteristics

09 p1552 A69-22041

Plasma wave excitation and dissipation in fast thetatron discharge, indicating electron nonadiabatic inductive acceleration without equilibrium orbit

09 p1552 A69-22046

Second harmonic generation by electromagnetic wave incident on inhomogeneous plasma, determining power output

10 p1653 A69-23133

Correlation produced magnetoplasma mode in potassium confirmed by measurement of real part of surface impedance

10 p1728 A69-23168

Plasma electron beam nonlinear interaction, considering equations of motion of electron distribution function, plasma wave spectrum and mode coupling effects

10 p1729 A69-23407

Longitudinal and transverse wave propagation in compressible isotropic turbulent plasma, noting mode coupling effect

10 p1729 A69-23424

[AFCLR-69-0289]

- Discharge plasma ionized waves, determining mechanism of wave propagation and instabilities
10 p1740 A69-23699
- Transport of matter in nonisothermal weakly ionized plasma due to traveling ion-acoustic wave propagation, noting plasma oscillations and instability
10 p1741 A69-23945
- Plasma wave conversion into electromagnetic waves in strong magnetic field, studying nonlinear coalescence and scattering on thermal and epithermal ions
11 p1922 A69-24245
- Normal mode dispersion at upper hybrid frequency propagating parallel to uniform magnetic field in spatially inhomogeneous plasma
11 p1924 A69-24302
- Beam-plasma dispersion relations, obtaining dispersion equation for plasma waves and dispersion curves for longitudinal waves
11 p1925 A69-24366
- Backward plasma waves in region of anomalous dispersion indicated by opposite directions of RF wave phase and group velocities
11 p1927 A69-25116
- Landau dispersion relation solutions, noting higher order Landau poles and coupling of spatial Landau modes and least damped wave
11 p1929 A69-25265
- Tonks-Dattner resonances in plasma column, using linearized Vlasov equation for coupling to plasma waves of time varying electric fields
11 p1929 A69-25266
- Convective wave instability resulting from modulated electron beam injection into plasma, noting amplitude restraint due to collisional damping effect
11 p1934 A69-25576
- Transformation of longitudinal plasma wave into electromagnetic wave during collision with dielectric in plasma
11 p1934 A69-25708
- Acoustic wave generation in neutral particle component of weakly ionized gas by variation of electron temperature with low power RF signal
12 p2134 A69-26096
- Radio emission of fast cosmic ions by plasma wave conversion to electromagnetic waves, using nonlinear mechanism in turbulent plasma
12 p2149 A69-26209
- LF oscillations nonlinear excitation increment in plasma by electron beam found proportional to reciprocal of wave potential
12 p2138 A69-26709
- High speed photographic study of plasma luminescence front and charged particle concentration front counter to electrodynamic force in crossed electric and magnetic fields
12 p2141 A69-27130
- Electromagnetic flux from nonlinear self interaction of electron plasma waves in far field of perturbation under anisotropic electron pressures
12 p2141 A69-27147
- Nonlinear periodic wave propagation at angle to magnetic field in collisionless plasma studied by two fluid plasma equations
13 p2304 A69-27297
- Wave damping in plasma, developing Boltzmann analysis of electron mode dispersion relations involving momentum transfer and relaxations of electron-ion temperature and anisotropy
13 p2305 A69-27377
- MHD induction converters operational characteristics calculations with simultaneous considerations for finite length and channel width
13 p2207 A69-27496
- Finite Larmor radius effects on gravitational instability of rotating anisotropic plasma for transverse wave propagation mode
13 p2346 A69-27704
- Electromagnetic and plasma waves scattering by space vehicle excited by ground source in isotropic warm plasma, obtaining radar cross sections
13 p2221 A69-27965
- Collisions effect on wave propagation in homogeneous plasma, calculating permittivity tensor and electron equilibrium current using Boltzmann kinetic equation
13 p2311 A69-28104
- Waves propagating along rotating electron beam and interacting with magnetized plasma waveguide slow waves
13 p2312 A69-28118
- Unstable weakly ionized HF magnetoplasma fluctuations with no axial drift, noting phase velocity parametric dependence
13 p2312 A69-28197
- Whistler type electromagnetic waves excitation by electron beam in plasma, noting intensity dependence on electron frequency
13 p2314 A69-28443
- Tensor analysis of four photon interaction in rarefied plasma in magnetic field, determining cubic current of plasma wave self action
13 p2314 A69-28444
- LF wave propagation in DC discharge hydrogen plasma, noting self and artificial wave excitation
13 p2316 A69-28584
- Temperature effects on propagation of HF internal and surface waves in bounded plasma, deriving dispersion equations
14 p2410 A69-28733
- Quasi-linear approximation for spectrum analysis of LF plasma wave oscillations in steady electric field
14 p2492 A69-29468
- Radiative instability problem of stream plasma system in kinetic regime, discussing Fung letter
14 p2502 A69-29960
- Standing ion-acoustic wave excitation in weakly ionized plasma, noting isothermal compression of electron gas
15 p2658 A69-30252
- Particle diffusion and wave spectrum in unstable plasma calculated using Feynman diagrams, considering quasi-linear growth, resonant three wave coupling and nonlinear Landau damping
15 p2660 A69-30915
- Mode-mode coupling calculation for finite amplitude collisional drift waves demonstrating inherently nonlinear phenomena
15 p2660 A69-30916
- Wave regeneration by resonant particles interaction in inhomogeneous plasma of electrons confined in quadratic potential solved in WKB approximation
15 p2660 A69-30918
- Collisionless emission and absorption of longitudinal waves due to particle encounters in numerical experiments on one dimensional one species plasma
15 p2661 A69-30921
- High order plasma wave echoes formulation and relation to initial perturbations based on Landau solution of initial value problem for Vlasov equation
15 p2661 A69-30926
- Te waves propagation along plasma sheet between conducting plates, determining vertical plasma density distribution
15 p2569 A69-30939
- Nonlinear interaction between three monochromatic waves propagating parallel to magnetic field in plasma, considering relativistic drift motions of particles
16 p2816 A69-31640
- Quasi-linear theory of waves in collisionless plasma in absence of external fields, relating wave energy growth and decay to plasma stability
16 p2817 A69-31646
- Temporal damping rate for small amplitude linearly polarized TEM mode in plasma, using Landau equation
16 p2818 A69-31675
- Radar Thomson scatter from nonthermal steady state level of plasma waves in ionosphere measured, studying role of angle between wave vector and magnetic field
16 p2818 A69-31678
- Collisionless drift plasma wave instability growth rate calculation noting destabilization from resonant electrons
16 p2820 A69-31691
- Nonlinear mixing of Ar plasma ion wave and externally applied electromagnetic wave
16 p2820 A69-31769
- Plasma turbulence effect on magnetosonic wave attenuation, noting increased electron and ion collision frequency and appearance of anomalous resistance
16 p2820 A69-31794
- Incident energy transfer to particles due to nonlinear interactions during passage of intense light beam through plasma, considering decay into plasma waves
16 p2822 A69-32046
- Wave damping in current sheet in geomagnetic tail by radiating energy from sheet sides by electrostatic waves
16 p2781 A69-32318
- Plasma wave echoes concept extended to transverse electromagnetic wave excitation propagating parallel to external magnetic field
16 p2823 A69-32467
- Wave front resistivity in laser produced plasma interacting with magnetic field enhanced by two stream instability
16 p2823 A69-32564
- Waveforms analyzer for mixtures of exponentially damped sine waves, noting application to interferometer curves in plasma wave propagation
17 p2970 A69-32852
- Weak nonlinear hydromagnetic waves in cold collisionless plasma, using nonlinear perturbation method
17 p3010 A69-32866
- Collisionless shock wave front turbulence in diluted plasma, including thickness, electron and ion component measurements
17 p3012 A69-33818
- Collisionless shock wave structure in plasmas, noting plasma and shock wave generation mechanisms
17 p3013 A69-33822
- Plasma-cyclotron interaction wave coupling mechanism in symmetrical double beam system in uniform magnetic field leading to unstable wave excitation along beam
17 p3015 A69-33831
- Geomagnetic field latitudinal variation effect on cut-off frequencies of proton whistlers, discussing LF electromagnetic wave propagation in cold multicomponent plasma
18 p3100 A69-34253
- Longitudinal plasma waves collision damping calculations using Rostoker test particle method
18 p3179 A69-34439
- Microfluctuations frequency and wavelength of electromagnetic, electric and magnetic field distributions in plasma shock wave front found consistent with ion-acoustic origin hypothesis
18 p3180 A69-35017
- Electromagnetic and cyclotron waves interaction across opaque boundary in moving plasma in one dimensional approximation
18 p3181 A69-35027
- Transverse electromagnetic wave propagation in cylindrically stratified axially magnetized plasma, obtaining plasma properties profiles from method for isotropic media
19 p3266 A69-35619
- OGO 5 spacecraft detector instrumentation for measuring electrostatic and electromagnetic waves electric fields with coupled antennas, describing in-flight operation
19 p3315 A69-36683
- Sideband structure of transmitted frequency spectrum exhibited by plasma wave features on topside ionograms, noting harmonic resonances
20 p3496 A69-37891
- Induced Compton scattering of plasma and electromagnetic waves under astrophysical conditions, discussing HF radio emission spectra from cosmic objects and quasar
20 p3607 A69-38035
- Parametric excitation theory involving Langmuir and ion-acoustic waves for homogeneous plasma slab with specular particle reflection at slab walls
20 p3582 A69-38245
- Thermal effects of resonant coupling hydromagnetic oscillations in inhomogeneous finite-beta plasmas, obtaining equations for coupling modes between Alfvén and magnetosonic waves
21 p3776 A69-38710
- Coupled acoustic and spiral EM waves drift instabilities in bounded plasma of solid body found to be convective
21 p3782 A69-39556
- Relativistic solution by Landau procedure of initial value problem for one dimensional electron plasma wave coexisting with charged immobile background
21 p3778 A69-39579
- Monograph on whistler mode waves in plasma covering apparatus for studying gyroresonant interaction between whistler radiation and fast electrons
21 p3779 A69-39868
- Pitch angle distribution of cosmic ray electrons in decreasing magnetic field for waves in ionized plasma, noting anisotropy due to synchrotron radiation
22 p4006 A69-40642
- Coupling coefficients and excitation increments determined for nonlinear interactions of surface waves in nonisothermal semibounded plasma
22 p3990 A69-40790
- Collisionless damping of large amplitude ion acoustic waves excited externally in thermally ionized Cs plasma
22 p3991 A69-41008
- Electromagnetic wave propagation instabilities in semiconductor magnetoplasmas not diffusion limited to LF, using dispersion equation
22 p3902 A69-41223
- Electromagnetic radiation characteristics from vibrating electrons or electric dipole moving in com-

pressible isotropic plasma and from stationary dipole in moving medium, emphasizing Doppler effects
23 p4114 A69-41359

Plasma dielectric constant and RF wave energy and power absorption in anomalous dispersion region, noting plasma permittivity inverse relation to absorption band frequency
23 p4195 A69-41385

Nonlinear interaction between extraordinary waves propagating perpendicular to static magnetic field in cold homogeneous magnetoplasma
23 p4195 A69-41538

Acoustic wave propagation in plasma, analyzing ionic and electron sound caused by oscillation and relaxation processes using Landau and Vlasov kinetic equations
23 p4196 A69-41726

Transverse plasma waves propagating along parallel static electric and magnetic fields may lead to instabilities regardless of carriers sign
24 p4355 A69-42923

Electromagnetic waves incident upon anisotropic plasma, determining transmission and power reflection coefficients
24 p4282 A69-42978

Whistlers nonlinear interaction during cold magnetoplasma propagation, considering energy exchanges between waves
24 p4309 A69-43174

Surface wave terms found in long wavelength limit during solution of initial value problem for semiinfinite hot plasma
24 p4356 A69-43364

PLASMAGUIDES

Electromagnetic waves propagation in cylindrical waveguide containing plasma column along axis in absence of constant magnetic field
02 p0285 A69-11463

Plasma waveguide properties during high intensity electromagnetic wave propagation, discussing microwave waveguide coupling
03 p0482 A69-14228

Dispersive properties of axial and annular longitudinally magnetized plasma waveguides
05 p0802 A69-15925

Wave dispersion analysis for amplification in cold plasma filled cylindrical waveguide penetrated by electron beam of same radius
05 p0736 A69-16790

Self focusing of TM type electromagnetic waves in isotropic plasma and formation of waveguide channel
07 p1196 A69-19749

Plasma waveguide parameter changes due to additional gas ionization from microwave field
07 p1196 A69-19750

Broadband plasma waveguide switch application extended to 26-40 GHz range, discussing isolation, cold loss, switching time, trigger signal and ionized plasma
12 p2036 A69-25938

Waves propagating along rotating electron beam and interacting with magnetized plasma waveguide slow waves
13 p2312 A69-28118

Magnetized plasma waveguide dispersion characteristics using Maxwell equations, stressing interaction of electron beam with wave modes
13 p2315 A69-28571

Wave propagation in warm uniaxial plasma filled waveguide, analyzing TE modes, TM mode splitting and power transfer
16 p2756 A69-31576

Electromagnetic wave propagation in transversely magnetized warm plasma filled rectangular waveguide, analyzing TE and TM modes
16 p2756 A69-31581

Wave propagation in plasma filled cylindrical waveguide in axial magnetic field, approximating plasma density profile by WKB method
17 p2926 A69-33848

Helicon wave dimensional resonance in n-Nb plasma waveguides at different wavelengths relative to wall thickness
19 p3383 A69-36479

PLASMAS (PHYSICS)

NT ARGON PLASMA
NT BETA PARTICLES
NT CESIUM PLASMA
NT COLD PLASMAS
NT COLLISIONLESS PLASMAS
NT COSMIC PLASMA
NT DEUTERIUM PLASMA
NT ELECTRON PLASMA
NT HELIUM PLASMA
NT HIGH TEMPERATURE PLASMA
NT HYDROGEN PLASMA

NT METALLIC PLASMAS
NT NITROGEN PLASMA
NT NONEQUILIBRIUM PLASMAS
NT NONUNIFORM PLASMAS
NT RAREFIED PLASMAS
NT RELATIVISTIC PLASMAS
NT ROTATING PLASMAS
NT SOLAR WIND
NT STELLAR WINDS
NT THERMAL PLASMAS
NT TOROIDAL PLASMAS

Magnetoplasma wave propagation in periodic conducting solid, calculating electron drift effect on space harmonics
02 p0287 A69-11945

Plasmas in galaxies, spiral structures and radio galaxies, discussing quasar line and continuum spectra
02 p0329 A69-12790

Generation of UHF space charge waves by nonlinear interaction of two microwave signals in magnetoplasma, predicting optical mixing
03 p0475 A69-13146

Electron flow in stable negative electrostatic potential well produced by electronic injection at center of hollow open spherical anode
03 p0475 A69-13153

Charged particle density of unsteady plasma from Stark broadening of Balmer H beta line, using time scanning image converter
03 p0481 A69-14145

Current nature on infinite cylindrical antenna in compressible anisotropic lossy plasma medium, noting characteristic waves on infinite cylinder
04 p0578 A69-15215

Free energy of low density quantum plasmas derived statistically from exact two particle scattering phase shifts
05 p0799 A69-15629

Equations for frequency portions of electron-velocity distribution function in Lorentz plasma under influence of time periodic electromagnetic fields with two fundamental frequencies
05 p0800 A69-15743

Deceleration of conducting plasmoids moving in channels in nonuniform magnetic field
05 p0801 A69-15781

Forward velocity of Bostick plasmoids demonstrated proportional to mean surge current through button source
06 p0964 A69-17480

Modified truncation for BBGKY hierarchy for plasma, obtaining kinetic equation identical with Balescu-Lenard equation
08 p1360 A69-19990

Ion cyclotron resonance acceleration and higher harmonic acceleration in axially nonuniformly magnetized plasma under influence of RF electric field
08 p1360 A69-20079

Time dependent velocity distribution functions for carriers calculated in weakly ionized plasma in external electric field
08 p1362 A69-20265

Slow distribution function of magnetoactive plasma, deriving kinetic equation in quasi-linear approximation for analyzing particle-HF electromagnetic wave interactions
08 p1365 A69-20550

Time rates for growth and damping of resistive instability in gaseous plasma in crossed electric and magnetic fields
08 p1369 A69-20886

Communication problems due to natural and artificial plasmas in spacecraft vicinity, discussing plasma effect theory
09 p1451 A69-21292

Magnetoactive plasma containing fast monoenergetic ions noting stability at drift frequencies and in terms of Alfvén wave buildup
09 p1546 A69-21566

Free carrier magnetoplasma effect used for far IR phase matched difference frequency generation in semiconductors, discussing carbon dioxide laser transitions
09 p1556 A69-21578

Scientific data acquisition and interpretation effects on electric spacecraft plasmas and field directions, noting electron interchange reactions effect
[AIAA PAPER 69-276] 09 p1568 A69-21727

Plasma cavity shape formed by magnetic field effect due to several parallel line currents
[ISAS-433] 09 p1553 A69-22569

Solar system plasmas and X ray astronomy - Conference, Adelaide, Australia, August 1968
09 p1581 A69-22742

Radio wave generation in astrophysical plasmas, discussing various emission mechanisms
09 p1608 A69-22743

Correlation produced magnetoplasma mode in potassium confirmed by measurement of real part of surface impedance
10 p1728 A69-23168

High temperature gas mixture plasmas thermodynamical properties, emphasizing Debye electrostatic interactions and electron states
10 p1810 A69-23794

Trapping of plasmoids injected from two coaxial plasma sources through magnetic gaps of diverter, discussing alternate and simultaneous injection
12 p2133 A69-25976

Kinetics of air plasma formation in wake of shock wave propagating in air, taking into account nonequilibrium ionization
12 p2062 A69-26674

Magnetic field fluctuations of interplanetary plasma, considering anisotropic temperature instabilities
14 p2517 A69-29064

Rocket and satellites topside sounding of earth ionosphere, determining magnetoplasma structure and resonance
14 p2438 A69-29101

Time averaged stress tensor for ionized plasma in HF electromagnetic field, considering collisions
14 p2493 A69-29649

Fabry-Perot interferometer employing gas laser for plasmoid electron concentrations measurement at 3.39 micron wavelength
14 p2451 A69-29778

Particle drift velocity distribution of fully ionized plasma in magnetic field calculated by integration of Boltzmann equation
15 p2659 A69-30707

Time resolved Stark broadened spectral profiles for Na I 5682-88 Å and 4978-82 Å lines of plasma, comparing electron densities
15 p2656 A69-31155

Nonlinear generation of sum and difference frequency components in magnetoplasma current density due to alternating electric fields, electron density and temperature gradients
16 p2821 A69-32036

Continuity conditions for drifting magnetoplasmas without ionic effects, discussing eigenvalue equation of refractive index and electromagnetic modes propagation
17 p2926 A69-33851

Deceleration of conducting plasmoids moving in channels in nonuniform magnetic field
18 p3181 A69-35033

RF plasmoid properties, discussing bounded plasma resonance theory, basic experiments, resonance sustained discharges, role of negative ions, etc
18 p3181 A69-35487

Soviet collection of articles on plasmoids covering plasma accelerators and plasma interactions with magnetic fields
24 p4356 A69-43467

Time-variable pulsed transverse magnetic field used to cut off tails of plasmoids ejected from conical Plexiglas plasma gun into curvilinear magnetic field
24 p4358 A69-43476

PLASMATRONS

NT DUOPLASMATRONS

Heat transfer between arc column and discharge chamber wall of vortex linear plasmatron, using approximate similitude method
01 p0125 A69-10091

Solid phase particle motion in plasmatron with colliding jets, measuring W particle heating by optical method
05 p0802 A69-15975

Spectroscopic investigation of emission of air plasma in HF electrodeless plasmatron, analyzing near IR, UV and visible spectra
07 p1191 A69-18995

Electric arc interaction with turbulent boundary layer in vortex stabilized plasmatron, noting variation in arc intensity
09 p1545 A69-21432

DC plasmatron for heating argon with potassium additions at high temperatures and at near atmospheric pressure to obtain argon flow
09 p1547 A69-21596

Temperature pulsations radial distribution in plasma jet using plasmatron without mixing chamber
10 p1729 A69-23432

Electrodeless plasmatron coupled with oscillator operating at 5-30 kHz, discussing parameters effect on operation mode and performance
12 p2140 A69-27123

Current, magnetic field, flow velocity and plasmatron dimensions effects on arc voltage in coaxial plasmatron
13 p2306 A69-27388

Operating conditions influence on thermal stability of DC plasmatron arc to obtain high temperature source
15 p2663 A69-30994

PLASMOIDS
U PLASMAS [PHYSICS]

PLASMOLYSIS
Escherichia coli B/r cells plasmolyzed in sucrose observed under phase contrast, noting plasmolysis reduction in ions presence
19 p3257 A69-35973

PLASMONS
Surface plasmons microscopic theory based on modified random phase approximation
06 p0967 A69-17711

Surface plasma waves excitation by light and decay into photons applied to nonradiative modes
07 p1188 A69-18278

Surface plasmon excitation by tunneling electrons in GaAs-Pb junctions, discussing conductance at bias voltages, plasmon energy and concentration
07 p1200 A69-19402

Plasmon superconductivity mechanism in degenerate semiconductors and semimetals, noting interaction effect between electrons and plasma sound
09 p1556 A69-21573

Localized plasmons and optical phonons occurrence on local plasma levels, noting role of impurity atom in localized exciton-plasma resonance
09 p1548 A69-21674

Raman scattering by coupled plasmon-cyclotron-harmonic modes in semiconducting plasmas in homogeneous static magnetic field
16 p2824 A69-32604

Electron-plasmon interaction in degenerate semiconductors, using mathematical model for rectifying metal contacts tunneling characteristics
19 p3382 A69-36049

Dispersion relations for surface plasma oscillations in normal metals for single and multiple films taking into account retardation effects, noting dielectric function
22 p3992 A69-40419

Josephson currents interaction with LF surface plasmons in superposed thin dielectric and superconducting metal films, noting I-V characteristics
22 p3992 A69-40420

PLASTIC AIRCRAFT STRUCTURES
Glass fiber reinforced plastic in aircraft construction, considering cellular weight and economy
03 p0454 A69-13821

Light passenger aircraft of glass fiber reinforced plastic, using hose construction technique
03 p0454 A69-13822

Helicopter rigid rotor system with blades of glass fiber reinforced plastic
04 p0548 A69-14817

LFU 205 light aircraft design and construction with fiberglass reinforced plastic
08 p1321 A69-20867

Boron filaments reinforced epoxy aircraft landing gear structure prototype, discussing development, fabrication, and testing
09 p1508 A69-22340

Glass reinforced plastic molding compounds for OV-10A airplane structural components, noting cost savings [SAE PAPER 690342]
11 p1890 A69-24497

Composite airframe structural joint design and weight considerations for boron and glass fiber reinforced plastic materials [ASM PAPER W9-23.1]
14 p2535 A69-29448

Sailplanes design, discussing structural flexibility, deformations, acroclastic effects and plastics and man-made fibers
15 p2551 A69-30899

Fatigue properties and test procedures for glass reinforced plastic rotor blades used in twin engine helicopter [AHS PAPER 370]
17 p3060 A69-33518

Design and fabrication of plane and trapezoidal fiberglass wings with laminar plastic profiles for aerodynamic tests, including wing rigging and slotted wing
19 p3324 A69-35831

Helicopter rotor blade construction and developments, discussing mass balance, fatigue life, fail-safe characteristics, cost and weight ceiling and plastic materials
19 p3329 A69-36768

Boron fiber reinforced composite materials in aircraft structures, comparing rigidity with glass fiber plastics and weight gains
23 p4179 A69-42155

Redesigned Al wing structure using B-epoxy composite applied to pressurized fuel carrying section, including material, fabrication and test data
24 p4323 A69-43418

RTV silicone rubber for corrosion control coatings, high strength adhesives and low density sealants in aircraft structures
24 p4338 A69-43457

PLASTIC ANISOTROPY
Anisotropic plasticity in sheet metals under uniaxial and balanced biaxial tension
05 p0837 A69-16030

Plastic flow anisotropy and texture shifting by rolling in Ti-Mo-V alloy, analyzing slip rotation, grain boundary shear and deformation mode
17 p2987 A69-33078

PLASTIC COATINGS
Mechanical behavior of synthetic layer coatings for damping instrumental vibration and noise
01 p0168 A69-10399

Plastic backing films removal from carbon electron microscope replicas by maintaining specimens in horizontal position
09 p1495 A69-21651

Epoxy encapsulated transistors reliability, data from long term maximum rated life and accelerated tests
18 p3145 A69-34498

Wear resistance and antifriction measurement device for polymer coatings in high vacuum, various gases and during exposure to electron radiation
23 p4169 A69-41599

PLASTIC DEFORMATION
Shear accommodation kinking at second order twin bands in critically deformed magnesium investigated for dislocation mechanism
01 p0093 A69-10063

Repeated elastoplastic deformation of polycrystalline body analyzed by dynamic model
01 p0164 A69-10082

Yield condition of polycrystalline hcp metal, considering slip characteristics of hcp crystals
01 p0094 A69-10304

Fretting effect on fatigue of press fitted axle assemblies, analyzing relative slip amplitude dependence on size, shape, clamping pressure, nominal stress and cycles
01 p0167 A69-10305

Nb-W alloy solution hardening and deformation, noting flow stress dependence on strain rate and temperature plus activation energy of deformation
01 p0095 A69-10488

Deformation in aged Fe-Cr alloy studied for rate-controlling solid solution mechanism as function of stress
01 p0095 A69-10601

Interlayer slip in layered wood beams with nail joints analyzed in terms of small deflection theory
01 p0169 A69-10638

Plastic zone generation by slots cut in tensile test specimens before and during loading, discussing redistribution
01 p0098 A69-10762

Microfacets of metal surface cracks studied for plastic deformation and atomic separation mechanisms by electron diffraction
01 p0098 A69-10763

Strain distribution for fracture initiation and steady state crack propagation in plane strain tension of plastic materials
01 p0169 A69-10764

Mechanical finishing abrasion induced plastic deformation microtwinning observed in thin stainless steel films by transmission electron microscopy
02 p0251 A69-11542

Critical internal pressure induced plastic instability in membrane shells of revolution determined by graphical numerical method
02 p0338 A69-11719

Deformation thermodynamics, discussing mechanics and thermokinetics of continuous media and wave propagation problem
02 p0339 A69-11990

Kinetic features of martensitic transformation of nickel steels dependent on plastic deformation degree at 525 C
02 p0267 A69-12190

Finite deformation mode stability for finite amplitude first diameter nonlinear plastic wave initiation and growth at impact face in long rods
02 p0342 A69-12279

Plastic deformation wave propagation and heat generated near yield point of annealed aluminum
02 p0342 A69-12280

Aluminum deformation at various strain rates and temperatures under combined stress, comparing results with theoretical predictions
02 p0343 A69-12282

Constitutive equations for dynamic material behavior permit consideration of large deformations in direct manner
02 p0343 A69-12286

Plastic fatigue life of steel under rotary bending, proposing fracture criterion based on strain amplitude for low cycle stress levels
02 p0346 A69-12421

Finite difference numerical integration technique for large elastoplastic deformation transient and permanent deflection responses of thin shells
02 p0347 A69-12518

Elastic-plastic and creep deformation calculations of cylindrical shell, providing better estimate of critical time at higher stress levels by including plasticity
02 p0348 A69-12539

Friction induced plastic deformation of Be-Co-Zn single crystals with HCP structure
02 p0254 A69-12627

Aging and cold work hardening effect on deformability of aluminum-magnesium-silicon-copper alloy
02 p0254 A69-12677

Strain rate effect of large deflections of clamped circular viscoplastic plates subject to rigid mass impact
02 p0349 A69-12798

Asymptotic constitutive approximations for rapid finite deformation of general viscoelastic materials, noting isotropic solids and fluids
03 p0523 A69-13020

Plastically twisted prismatic bars with transverse discontinuous inhomogeneity, using sand hill analogy to determine stress field and limiting torque
03 p0524 A69-13021

Creep relaxation and kinking of aluminum-nickel whiskers at elevated temperature, noting permanent plastic deformation after heat treatment
03 p0443 A69-13119

Strain induced deformational instability of aluminum alloys
03 p0447 A69-13818

Model of creep in solids based on Markov process, discussing dislocation movement by means of thermal activation
03 p0529 A69-13942

Elastic-plastic boundaries velocities for combined longitudinal and torsional plastic wave propagation in thin walled tube during unloading [ASME PAPER 68-WA/APM-7]
04 p0670 A69-14403

Yield curve softening in hard Al subject to cyclic torsional loading, noting deformation resistance, surface hardness and yield strength
04 p0671 A69-14411

Resistance wire strain gages for measuring elastoplastic deformations in zones with high stress concentrations of strained machine elements
04 p0671 A69-14433

Impurity-dislocation interaction in Al alloy by vacancy mechanism and repeated yielding phenomenon, establishing activation energy
04 p0613 A69-14440

Alloying elements and cold rolling deformation effects on formation of texture in Ti alloys, noting inhomogeneity
04 p0617 A69-15077

Cold working considered for decreasing fatigue crack propagation rate in thin duraluminum sheets with various plastic deformations
04 p0681 A69-15170

Plastic deformation effect on structure, yield point and tensile strength of aged austenitic alloy containing Ni, Cr and Ti
04 p0618 A69-15177

Book on thermal time independent plastic and time dependent creep strains in structures through analogy permitting inelastic structures analysis
04 p0681 A69-15200

Truncated solid cones plastic yielding under quasi-static and dynamic axial loads at various strain rates
04 p0682 A69-15301

Exact geometrical equations and internal equilibrium for elastoplastic deflections of orthotropic shells of revolution using thin shell theory
05 p0831 A69-15680

Course slip during cyclic deformation of copper single crystals, discussing strain bursts dependence on stress amplitude rate, unidirectional prestrain and orientation
05 p0779 A69-15905

Elastic-plastic analysis of flat plates in membrane stretching and flexure, using method of initial strains [ASME PAPER 68-WA/PVP-10]

05 p0840 A69-16191

Book on plastic deformation of metals in terms of dislocation theory covering single crystals, alloying solid solutions, aggregates, annealing, etc

05 p0841 A69-16369

Crack nucleation in high strain fatigue based on plastic instability model

05 p0780 A69-16430

Plastic yield on inclined slip planes at tip of crack deformed in antipane strain

05 p0842 A69-16436

Crack tip displacements and strains in plastically yielded region measured with replica technique

05 p0780 A69-16437

Finite elastic-plastic deflections of orthotropic shells of revolution, deriving exact geometrical relations and equilibrium equations

05 p0842 A69-16642

Statically indeterminate elastoplastic problem under condition of complex shear

05 p0843 A69-16691

Magnetoplasticity induced in metal by high magnetic fields, examining stationary flow in two dimensional deformation

05 p0844 A69-16804

Plastic deformation, aging, heat treatment and machining effect on structure of thin films of AlMg11 alloy

05 p0783 A69-16814

Plastic yielding and strain distribution in Al reinforced with stainless steel wires determined by electron microscopy

06 p0940 A69-16947

Aluminum-stainless steel wire reinforced metal matrix composites, analyzing strain hardening and plastic deformation

06 p0940 A69-16950

Calculation of thin shell or beam structures with plasticity and isothermal creep based on linearization and local kinematic behavior [ONERA-TP-667]

06 p1020 A69-17099

Plastic deformation and bursting pressure of thin rupture disk as related to tensile strength

06 p1020 A69-17129

Plastic deformation in hypoeutectoid and hypereutectoid Ni-Ti alloys studied by compressive stress-strain analysis and transmission electron microscopy

06 p0941 A69-17222

Deformation and fracture of Be bicrystals grown by seeding and floating zone melting method from Be single crystal

06 p0942 A69-17225

Deformation and stresses in biaxially loaded stretched thin plate with central small hole during stress redistribution caused by creep

06 p1022 A69-17368

Numerical method for stress function of elastic-plastic torsion of hollow bars during quasi-static monotonic twist compared with relaxation method solution

06 p1023 A69-17370

Initially imperfect axially compressed cylindrical shells strength using variational principle, shell theory and deformation theory of plasticity [AIAA PAPER 69-91]

06 p1028 A69-18181

Plastic deformation of internally oxidized dispersion strengthened silver magnesium alloys, noting hardening effect dependence on oxidation temperature

07 p1159 A69-18627

Production technology of sheets, forgings and drop forgings from Ti and Ti alloys, discussing gas saturation prevention and plastic deformation

07 p1164 A69-18786

Section pressing from Ti alloy, noting procedure and temperature dependent deformation parameters effect on microstructure and properties

07 p1164 A69-18788

Transient heat evolution response to reappplied stress of alloys plastically predeformed at 4.2 K attributed to thermally softened defect structures

07 p1165 A69-18906

Plastic deformation in bcc, fcc and hcp metals as function of initial impact load energy, noting strain hardening effects

07 p1166 A69-19144

Fatigue gauge for plastic deformation based on plastic strain rates, cycles, temperature, etc

07 p1135 A69-19216

Minimum theorems in elastoplastic theory extended to continua for plastic strains governed by holonomic and nonholonomic stress-strain laws

07 p1235 A69-19442

Plasticity theories for nonisothermal loading, considering plastic strain

07 p1237 A69-19681

Accuracy of deformation theory in case of simple loading, analyzing external forces under conditions not satisfying loading theorem

07 p1237 A69-19684

Short cylinder of perfectly plastic Coulomb yield conditions compressed between rigid plates, discussing cylinder-plate interface frictions, angles of internal friction and cohesion

08 p1410 A69-19890

Free surface strain increment components on high carbon steel compression specimens to estimate tensile plastic instability onset, noting ductile fracture criterion

08 p1328 A69-19891

Heat generation effects by plastic deformations at tip of propagating crack in quasi-brittle materials, considering elastic stress field and crack velocity

08 p1412 A69-20144

Temperature dependence of polymethylmethacrylate deformation, yield and fracture in constant strain rate compressive and tensile tests

08 p1335 A69-20215

Continuum stress/plastic strain relations from Schmid Law of plastic slip in individual crystal grains

08 p1414 A69-20525

Incremental and corresponding total strain theories of plasticity used to analyze hydrostatic bulging of circular diaphragm

08 p1418 A69-20826

Cylindrically deformed fiber reinforced material, obtaining kinematics and constitutive equations

08 p1418 A69-21002

Elastoplastic response of intersecting hemispherical/cylindrical shell structures compared with plastic deformation predictions

09 p1615 A69-21922

Finite inelastic deformations under transverse impulsive loading of clamped thin rectangular platform shells idealized as membranes, using incremental plasticity theory

09 p1616 A69-21939

Complete solution for punching smooth interface double layer Tresca material in plane deformation, including Coulomb material

09 p1617 A69-22048

Heat resistant alloys plastic deformation, studying stress/strain systems, strain divisibility, strain rate and temperature effects, etc

09 p1504 A69-22145

Histogram approximation of plastic deformation of metals, analyzing tube under internal load and sandwiched layer compression

10 p1793 A69-22850

Deformation of thermoplastics under tensile loading, discussing types of loading

10 p1716 A69-22942

Negative creep in austenitic steel samples explained as possible redistribution of elements inside austenite grains at high temperatures

10 p1708 A69-22999

Strain fatigue mechanism of crack propagation in ductile metals, considering distribution of plastic cohesive stresses at crack tip

10 p1795 A69-23059

Plastic energy dissipation and crack surface displacement of penny shaped crack in elastoplastic material

10 p1803 A69-24030

Thermomechanical treatment effect on VT15 Ti alloy properties and welds after deformation, attaining high tensile strength and plastic properties

11 p1889 A69-24277

Strength analysis of revolving shallow shell with jumpwise thickness variations under axisymmetric distributed load, considering rigidity and plastic deformation

11 p1968 A69-24318

Alloying additions effect on plastic deformation anisotropy in GaAs single crystals, determining dislocation activation energies from creep tests

11 p1936 A69-24537

Two dimensional contained plastic deformation in asymmetrical elasticity theory based on Cosserat medium, examining boundary value problems, stress concentration and elastic wave propagation at holes

11 p1973 A69-24659

Stress-strain relation in crystalline media for pure tension and elongation epsilon several times conventional elastic limit, verifying by testing Al alloy [ONERA-TP-695]

11 p1975 A69-24754

Direct measurement device for metallic material response to mechanical stresses from stress force and global displacement/including material deformation/

11 p1884 A69-24757

Permanent displacement relationship to shell thickness following snap-through of loaded rigid boss in spherical metal shell

11 p1980 A69-24822

Residual thermal stresses and plastic strains at hole edges in perforated plates, considering heating and rapid cooling

11 p1982 A69-24947

Plastic strains in aluminum alloy under biaxial tensile and combined tensile and torsion tests, discussing small elastoplastic deformation theory

11 p1905 A69-24948

Analytical expressions for Gaussian constraint of continuum, using continuity conditions as equations of internal geometric couplings

11 p1984 A69-25170

Elastic and elastoplastic strains in materials under various loadings, determining temperature variations by thermoelectric method and verifying by tensile tests

11 p1985 A69-25178

Comparison of errors obtained by using linearly gliding and rotating strengthening moduli in stress-strain state on basis of linear stepwise approximation

11 p1986 A69-25342

Fcc metals cyclic deformation and fatigue dependence on cross slip of screw dislocations, considering strain hardening and crack propagation

11 p1906 A69-25389

Dynamic plastic response of finite bar subject to axial impact load noting reflected waves, stress-strain time histories and residual strain

11 p1991 A69-25512

Thermodynamics of strain rate sensitive elastoviscoplastic solids, considering kinematic description of plastic deformation and choice of state variables

11 p1994 A69-25601

Nimonic alloy single crystals strengthening during plastic deformation, analyzing jump phenomenon at high and low temperatures

12 p2112 A69-26038

Lattice defects in annealed and plastically deformed cobalt, showing increase with increasing martensite transformations

12 p2113 A69-26042

Large plastic deformation of two metallic cylindrical flat ended missiles in mutual longitudinal impact

12 p2179 A69-26217

Large deflection elastic-plastic analysis of axisymmetric shells of revolution indicating role of plastic yielding in buckling pressure reduction

12 p2186 A69-26839

Moire and gridwork methods of plastic strain analysis with application to plane strain and axisymmetric extrusion

13 p2359 A69-27256

Perturbation theory of antiplane elastoplastic deformations based on plasticity theory, considering circular hole in body under uniform shear

13 p2359 A69-27263

Molybdenum dislocation velocity and macrodeformation, noting thermal double kink mechanism inconsistencies and strain role in strain-rate relationship

13 p2276 A69-27392

Matrix grain size relation to dispersed particle size distribution and Zener-McLean equation description of microduplex structure in superplastic Ni-Fe-Cr alloy

13 p2278 A69-27411

Plastic deformation effects by hydrostatic fluid extrusion on mechanical properties of Ni maraging steels

13 p2278 A69-27414

Stress and plastic deformation influence on allotropic transformation of cobalt-nickel single crystals studied by X ray diffraction

13 p2279 A69-27761

Polycrystalline Re high temperature plastic deformation during creep, including activation energy and substructure dislocation study

13 p2280 A69-27767

Torsional testing facility for delayed elastic and non-recoverable strains in materials, noting application to diffraction limited reflecting optics

13 p2240 A69-27955

Classical plasticity theory modified to include finite elastic and plastic strain components by considering thermoelasticity and plastic work irreversible processes

13 p2362 A69-28119

Small strain plasticity theory for planar slip in specific nickel base alloy deformation

13 p2362 A69-28120

Discrete element plastic analysis of long prismatic bars under transverse loading in longitudinal direction, based on matrix displacement method

13 p2365 A69-28237

Grain size and deformation velocities effects on plasticity of dispersion hardened alloy

13 p2283 A69-28489

Minimum theorems for plastic strain rates and plastic strains governed by holonomic elastoplastic theory utilizing quadratic functions
13 p2370 A69-28629

Elastoplastic deformations of thin axisymmetric shells of revolution with variable thickness, exemplifying shell with piecewise constant thickness
14 p2533 A69-28982

Machine for measuring creep deformation of polytetrafluoroethylene under uniaxial compressive loads, discussing stress-strain relationship
14 p2469 A69-29412

Elastoplastic continua fire resistance at high temperatures, establishing plasticity condition and stress-strain relationships
14 p2536 A69-29598

Cold worked high purity Mo wire recovery after plastic deformation at room temperature, considering electrical resistivity decrease as function of annealing temperature
15 p2636 A69-30082

Experimental determination of strain /or strain rate/ tensor in plastic deformation analysis
15 p2707 A69-30639

Plastic strains at crack tips in thin plate under concentrated forces, analyzing slip bands during initial deformation
15 p2708 A69-30659

Interferometric technique for studying fracture specimens plastic zone using laser holography
15 p2609 A69-30681

Interface friction and adhesion of alloys workpieces and die materials under pressure and temperatures typical of plastic deformation
15 p2629 A69-30902

Similarity criteria for plastic deformation theory of body under pressure and nonuniform temperature field, considering strength calculations
15 p2714 A69-31200

Strain hardening experiments on single crystals of AlZn and AlAg alloys noting plastic behavior
16 p2800 A69-31776

Plastic expansion in metals due to alternating torsional and static tensile loading
16 p2875 A69-32291

Plastic failure under internal pressure of aluminum spherical shells with single radial or oblique nozzle based on limit analysis theory
17 p3052 A69-32983

Attitude and simple stability of deformable earth pointing satellite
17 p3047 A69-33229

Structure of meteorite Gibson section containing taenite grains and annealing twins indicating plastic deformation of taenite followed by recrystallization and grain growth
17 p3034 A69-33586

Loading path criterion for total strain /deformation/ plasticity theory based on Sanders loading function, discussing case of thermally loaded bar
17 p3062 A69-33711

Prestrained material plastic behavior experiments and deformation lines of influence analysis, noting importance in cold working
17 p3067 A69-34146

Craze formation and shear yielding considered for glassy polymers in terms of stress field requirements
17 p2993 A69-34169

Plastic energy dissipation rate during stable crack growth in sheet under uniaxial tension
18 p3212 A69-34345

Bending of rigid freely supported plastic plates under local axisymmetric dynamic load, discussing rectangular pulse effects and velocity fields
18 p3217 A69-34593

Sandwich beams optimal design determined for case of constraint on elastic deflection and for load factor at plastic collapse
18 p3218 A69-34623

Martensite transformation, C content and work hardening relations in stainless steels studied for magnetic detection of embrittlement during deformation
18 p3138 A69-35117

Nickel solid solutions strengthening under cold deformation studied by X ray, noting screw and edge dislocations role
18 p3157 A69-35246

Fiberglass-reinforced plastics longitudinal and transverse strain relations at various temperatures
18 p3163 A69-35366

Electron beam welds orientation effects on tensile and deformation properties of strengthened and welded austenitic stainless steels
18 p3151 A69-35432

Alpha Ti-Al and Ti alloys plastic deformation at low temperatures, noting slip and twin mechanisms role
18 p3158 A69-35444

Preliminary plastic deformations effect on dispersion hardened nimonic-80 alloy creep properties
18 p3159 A69-35446

Metal purity effect of nickel and Ni-Mo alloy on nucleation and recrystallization nuclei growth following 80 percent plastic deformation
18 p3159 A69-35449

Collection of articles on physical nature of plastic deformation and failure of metals
18 p3159 A69-35451

Nb single crystals plastic deformation influencing tensile strength, noting rolling directions
18 p3160 A69-35454

Preprogrammed deformation temperature influence on Ni creep strength, emphasizing smoothly changing loads effects
18 p3160 A69-35455

Yield condition of maximum constant distortion strain energy for anisotropic material without incompressibility assumption
18 p3227 A69-35494

Residual deformation of elastoplastically bent thin circular plate after perfect unloading from large deflection, considering equilibrium and compatibility conditions
19 p3438 A69-36306

Nondestructive test method using transducer action of flow in stress field causing plastic deformation with energy release as acoustic emission
19 p3314 A69-36634

Reducibility conditions of flow theory for smooth and piecewise smooth yield surfaces to relations of small elastoplastic deformations
19 p3443 A69-36794

Plastic deformation effect on dynamic buckling of elastic-plastic simple shallow truss subjected to step and impulsive loading
19 p3446 A69-36836

Stress and strain concentration factors under initial stages of elastoplastic deformation for circular hole in infinite medium, using method of successive approximation
19 p3447 A69-36860

Plane membranes finite deformation, deriving energy theorems for potential U bounds estimation
20 p3624 A69-37588

Thin cylindrical pressure vessels with circular cutouts and radial branches, observing limit pressures during plastic deformation
20 p3629 A69-38027

Stress strain state in thin circular elastoplastic disks under axially symmetric transient temperature distribution, noting moving annular plastic deformation region
20 p3629 A69-38028

B fiber reinforced Ni failure characteristics at high temperature, discussing plastic deformation and matrix role in crack inhibition
21 p3743 A69-38616

Plastic deformation and dislocation damping of cemented WC-Co alloys studied by compressive testing at room temperature
21 p3744 A69-38736

Depth dependent variations in texture in Nb due to inhomogeneous plastic deformation during cold rolling
21 p3744 A69-38737

Slip band etching procedure revealing Ni-base superalloy plastic deformation, accentuating slip bands and subgrain boundaries by electropolishing
21 p3744 A69-38741

Plastic bending of thin walled pipes taking into account cross section flattening
21 p3835 A69-38868

Creep measurements in Al alloy during uniaxial tensile stresses between 200-350 C, determining deformation dependence on time and stress
21 p3744 A69-38871

Plastic deformation combined effect with aging on mechanical properties of phase-hardened austenitic Fe-Ni-Ti alloys
21 p3746 A69-38956

Plastic deformation in hardened Ti alloys with thermally unstable beta phase under static compression and tensile loads by electron microscope
21 p3746 A69-39161

Levy-Mises equations for ideal plastic material derived from relationship between stress and rate of deformation tensors
21 p3840 A69-39287

Generalized strain-measure application to linearization of stress-strain curves of compressive, shear and tensile nature, discussing plastic deformations
21 p3844 A69-39321

Deformation localization and slip functions in statistical theory of plasticity, discussing approximations and untenability of Yosimura theory criticism
22 p4044 A69-40742

Creep at 400 degree C in Ti alloy sheets in short period plastic deformation due to work hardening by stepwise drawing in extensometric device
22 p3971 A69-41032

Energy equilibrium for crack growth in elastoplastic media, analyzing crack behavior during plastic deformation concentrated at edge of propagating crack
22 p4046 A69-41060

Plastic deformation by uniaxial tension during transition from dynamic to static loading from microscopic and macroscopic standpoint, noting slip lines
22 p4047 A69-41081

Rigid/plastic solids subjected partly to uniform fluid pressure and partly to general boundary conditions, analyzing uniqueness and stability criteria
23 p4235 A69-42460

PLASTIC FILMS

U POLYMERIC FILMS

PLASTIC FLOW

NT TRESCA FLOW

Plastic zone generation by slots cut in tensile test specimens before and during loading, discussing redistribution
01 p0098 A69-10762

Compaction kinetics in continuous quasi-viscous medium having plastic flow material under applied load, discussing hot pressing of nichrome powders
04 p0618 A69-15389

Crack tip plastic flow effect on strain energy release rate, considering Dugdale model for yielded crack [ASME PAPER 68-WA/MET-17]
05 p0838 A69-16155

Complementary variational principles for boundary value problems in continuum mechanics of solids, obtaining generalized Hamilton canonical formalism
07 p1232 A69-19173

Impurities effect on plastic flow stress and activation volume as functions of strain, strain rate and temperature in molybdenum crystals
10 p1710 A69-23089

Elongational viscosity coefficient determined from tensile measurements of materials under applied stress
10 p1681 A69-23976

Macroscopic states of stress criteria for plastic flow initial yielding, plastic flow and brittle fracture of ductile and brittle metals
11 p1975 A69-24671

Gas turbine disk calculation and plastic flow theory, considering loading conditions and elastoplastic strains due to centrifugal forces and nonuniform heating
11 p1982 A69-24945

Incompressible elastic-plastic solid flow through rough converging conical channel analyzed using Mises yield condition and Prandtl-Reuss equations
12 p2063 A69-27114

Physical limit model of fatigue in metals and alloys to determine stress producing plastic flow in surface layer
14 p2461 A69-28913

Necked tension specimens profiles for rigid-plastic nonhardening materials determined from compatibility equation for displacements and unloading rate
15 p2704 A69-30292

Monograph on stress fields in plane plastic flow as solutions to boundary value problems
15 p2711 A69-30932

Plastic tension of axisymmetric sample involving necking and small inhomogeneity, assuming Tresca yield condition and associated flow law
19 p3446 A69-36847

Fe crystals dislocations dynamic behavior during plastic flow development, describing stress and temperature effects on dislocations propagation and interactions
21 p3833 A69-38569

Axial through-cracks extension criteria in cylindrical pressure vessels, considering fracture toughness and plastic flow stress [ASM PAPER W9-13.3]
21 p3833 A69-38658

Creep theory with anisotropic hardening during early creep stages based on analogy with plastic flow theory
21 p3839 A69-39196

Axial through-cracks extension criteria in cylindrical pressure vessels, considering fracture toughness and plastic flow stress
22 p4046 A69-41040

PLASTIC MATERIALS

U PLASTICS

PLASTIC MEMORY

Material memory effect in plastically prestrained thin walled brass tubes analyzed on basis of kinematic strain hardening theory

02 p0336 A69-11551

Thermodynamics of viscoplastic materials under dynamic loads within framework of continuum mechanics of materials with memory

02 p0343 A69-12281

Controllable motions of compressible homogeneous isotropic solids, anisotropic solids and fluids with memory under constant body force

12 p2189 A69-27118

Mechanical properties associated with 55-Nitinol memory effect, presenting stress-strain and electrical resistivity as function of temperature

19 p3340 A69-35523

PLASTIC PROPELLANTS

Glass fiber reinforced plastic /GFRP/ roving end grains in rocket combustion chambers, discussing design and structural parameters

02 p0305 A69-12748

Elastomeric solid propellant grains viscoelastic flow, analyzing stresses and strains under various operating conditions and rocket engine geometry effect

10 p1801 A69-23702

Compositional and oxidizer particle size effects on combustion instability of plastic propellant based on ammonium perchlorate and polyisobutene [AIAA PAPER 69-478]

16 p2834 A69-32734

Flame propagation mechanism on plastic fuel in oxygen-nitrogen atmospheres with variable pressures and at different initial fuel temperatures, discussing safety and ignition problems

17 p3074 A69-33662

PLASTIC PROPERTIES

NT ELASTOPLASTICITY
NT THERMOPLASTICITY
NT VISCOPLASTICITY
NT YIELD POINT

Limit load analysis of three dimensional rigid perfectly plastic continua by approximate variational method

02 p0338 A69-11721

Dynamical strength of solid cylinder under axial loads increasing in time at given rate, using constitutive equations of thermodynamic theory

02 p0342 A69-12278

Surfaces role in superplasticity, demonstrating rate of neck growth dependence on surface irregularities

03 p0449 A69-13879

Laminar two dimensional free jet outflow of incompressible nonNewtonian pseudoplastic fluid from orifice into mass of same fluid

04 p0586 A69-14406

Plasticity of metals under isothermal conditions at elevated temperatures

04 p0671 A69-14454

Integration method for equations of plastic two dimensional stressed state with Mises yield condition, noting stress concentration at hole with pressure on contour

04 p0679 A69-14924

Soviet handbook on elasticity, plasticity and creep theories, emphasizing stresses and strains in solid thin walled shells and plates under bending, tension and torsion

04 p0683 A69-15499

Microplastic properties of arc-cast and Ti-Zr- Mo molybdenum sheet in tension at room temperature, measuring plastic strains with resistance strain gages

05 p0778 A69-15759

Thermodynamic theory of strain rate sensitive plastic material within framework of thermodynamics of materials with internal state variables

05 p0834 A69-15792

Anisotropic plasticity in sheet metals under uniaxial and balanced biaxial tension

05 p0837 A69-16030

Plastic moments calculation of continuous steel beams under various loading patterns

05 p0837 A69-16035

Elastic plastic stress distribution in compressed ring determined with postyield strain gages and stress-strain relationship from uniaxial tensile test

05 p0837 A69-16063

Book on continuum mechanics covering elasticity, fluid mechanics, plasticity and viscoelasticity, emphasizing basic concepts

05 p0843 A69-16713

Theoretical and experimental results on annealed tapered aluminum rods to assess one-dimensional rate independent theory of plastic wave propagation from longitudinal impact

06 p1022 A69-17365

Ti alloys thermomechanical treatment effect on strength and plasticity characteristics, noting single and double phase alloys and rupture

07 p1161 A69-18766

Complementary plastic work theorems in piecewise-linear elastoplasticity applied to plastic and nonlinear elastic problems

08 p1414 A69-20528

Minimum weight plastic design of circular and annular sandwich plates with piecewise constant cross section, discussing cost reduction

08 p1417 A69-20823

Compatibility theorem extension to three dimensional rigid plastic bodies with stress and velocity discontinuities, noting isotropic bodies with convex yield surface

08 p1418 A69-20845

Plastic yielding of tensile V-notched aluminum alloys elements with intermediate thickness and various shoulder ratios, studying thickness effect on yield load

09 p1612 A69-21499

Stresses and waves in highly conducting magnetoplastic metals as analogy of MHD processes in plasma

09 p1551 A69-22033

Plastic strain intensity distribution in aluminum alloy specimen with central hole measured with marked orthogonal lattice

09 p1617 A69-22221

Superplasticity in W-Re alloys, noting tensile properties, grain size and strain rate sensitivity for various Re contents at high temperatures

10 p1707 A69-22990

Plastic crack propagation in nonstrain hardening doubly grooved bending specimens with two surface slip, discussing crack angles, crack ductilities and fatigue striations

10 p1797 A69-23077

Dissolved gases and carbon effect on transition temperature from plastic to brittle state of high melting metals including niobium and vanadium

10 p1715 A69-24011

Polymer fatigue model from low cycle analysis of dynamic and thermal properties in structural plastics

10 p1717 A69-24217

Conformal mappings for solving boundary value problems in elasticity and plasticity theories for regions having singular points

11 p1973 A69-24662

Thin plastic shell theory based on static and geometrical relations for shallow and circular cylindrical shells

11 p1978 A69-24807

Plastic analysis of shallow spherical rigid plastic shell, using shell deflection equations to establish load-deflection relationship

11 p1980 A69-24823

Indentation of inhomogeneous rigid plastic solid by flat punch under plane strain conditions analyzed by perturbation method

11 p1986 A69-25244

Plasticity increase of molybdenum alloys during precipitation of second phase at high temperatures due to lattice defects redistribution and plastic deformation

11 p1906 A69-25685

Boundary determination for separating elastic and plastic regions of infinite perforated sheet with triangular network of circular holes

11 p1996 A69-25736

Stress discontinuity surface of three dimensional rigid plastic body arbitrary yield condition, considering equilibrium of regular four sided pyramid

11 p1996 A69-25738

Time and temperature dependence of plastic properties of fiber reinforced phenolic heat shield materials

12 p2119 A69-26825

Allowable thermodynamic processes and constitutive equation restrictions determined by Clausius-Duhem inequality, noting applications to plasticity theory and linear viscous fluids

13 p2371 A69-27319

Axisymmetric plastic buckling of complete spherical shells subjected to external hydrostatic pressure

13 p2361 A69-27439

Classical plasticity theory modified to include finite elastic and plastic strain components by considering thermoelasticity and plastic work irreversible processes

13 p2362 A69-28119

Small strain plasticity theory for planar slip in specific nickel base alloy deformation

13 p2362 A69-28120

Phenomenological macrorheology, discussing mechanical models designed for studying relation between stresses and strains in materials

13 p2369 A69-28562

Plasticity theory approximation variants for complex loading, analyzing strain trajectories using Prandtl-Reiss theory

14 p2532 A69-28978

Elastic-plastic bending of rectangular plates with asymmetrically inhomogeneous material in plastic range, using modified Ritz method

14 p2533 A69-28984

Maraging steel tensile strength increased, plasticity and toughness properties decreased with Ti content increase

15 p2639 A69-30630

Nonnewtonian solid propellant viscosity and pseudoplasticity utilizing rheological characterization for optimal casting and pot life determination [AIAA PAPER 69-518]

16 p2833 A69-32665

Aircraft and missile dynamic characteristics for heavy loads and large heat flux, noting small harmonic vibrations of heated structures in plastic domain [ICAS PAPER 68-38]

17 p3061 A69-33589

Loading path criterion for total strain /deformation/ plasticity theory based on Sanders loading function, discussing case of thermally loaded bar

17 p3062 A69-33711

Displacement bounding principle for work hardening plasticity theory based on Drucker inequality and stress space path existence [ASME PAPER 69-APM-7]

18 p3213 A69-34385

Soviet collection of papers on strength and plasticity of Ni and Ti and alloys covering high temperature internal friction, deformation and creep characteristics

18 p3158 A69-35442

Pure plastic bending of wide strip, determining stress strain state and plastic strain energy during constrained bending, noting application to corrugated panels

19 p3324 A69-35833

Boron thermal diffusion effects on plastic properties of pure Mo subjected to recrystallization

19 p3328 A69-36160

Collection of papers on mechanics including quantum theory, mechanics of micropolar continua, elasticity and plasticity, rheology, etc

20 p3623 A69-37580

Optimal plastic design of circular sandwich ring assuming symmetric loading, minimum plastic resistance and cost justification of stronger cross section

20 p3262 A69-37590

Analog method for determining structural creep displacement by setting up boundaries for linear elasticity and perfect plasticity

20 p3628 A69-37915

Soviet book on fundamentals of theory of plasticity and creep covering stress-strain state, bending, torsion, pressure, plane deformation, etc

20 p3630 A69-38206

Metals plastic behavior including strain hardening and Bauschinger effect

21 p3832 A69-38466

Phase plasticity in Ti-O alloy as function of temperature in alpha Ti and TiO, noting role of increased oxygen diffusion mobility

21 p3746 A69-38959

Variational problem for nonlinear functionals connected with finite plasticity, extending existence and uniqueness theorems to limit analysis

21 p3837 A69-39157

Plasticity of tubular steel annealed in vacuum furnace and subjected to complex tension and torsion under deformation trajectories containing salient point

21 p3839 A69-39197

Dynamic plasticity of nonsymmetrical free flight collision impact of crystalline solids, using linear temperature dependent stress-strain function and finite amplitude wave expansion

21 p3840 A69-39298

Bifurcation and hardening rate of rigid-plastic bodies presented on buckling of rectangular plate with lateral restraint

21 p3840 A69-39299

Single crystals dislocation dynamics and plasticity theory, discussing current tensor, conservation equation, slip systems, etc

21 p3845 A69-39676

Soviet collection of papers on static and dynamic problems in elasticity and plasticity theory covering plates, shells, beams, etc

22 p4038 A69-39911

Deformation localization and slip functions in statistical theory of plasticity, discussing approximations and untenability of Yosimura theory criticism

22 p4044 A69-40742

Time and plasticity effects on fracture determining solids strength as function of crack dimension

23 p4236 A69-42530

- Orthotropic aircraft materials plasticity theory, deriving stress-strain relationships in three mutually perpendicular symmetry planes for use in engineering calculations 24 p4400 A69-43083
- Plastic inhomogeneity effects on yield stress of isotropic spherical shell and long cylindrical tube under internal pressure 24 p4405 A69-43672

- Symmetrical bending of laterally loaded circular micropolar plates 04 p0682 A69-15291

Vibration analysis of plates with discrete mass distribution based on Galerkin approach
04 p0682 A69-15293

Soviet handbook on elasticity, plasticity and creep theories, emphasizing stresses and strains in solid thin walled shells and plates under bending, tension and torsion
04 p0683 A69-15499

Pointwise limitation of field dislocation and bending moments in elastic plates
05 p0831 A69-15599

Book on plate formulas and tables for designing structure components of various geometrical shapes and thickness covering bending, compression, loading, etc
05 p0833 A69-15726

Clamped rectangular plate under lateral load stress analyzed by extended Kantorovich method to include bending moments and shearing forces
05 p0835 A69-15872

Vibration response of thin elastic plates to random loads
05 p0844 A69-16741

Dynamic behavior of three layer plates in supersonic gas flow
06 p1024 A69-17552

Initial defects influence on equilibrium states of compressed elastoplastic plates
06 p1025 A69-17684

Plate theories of linearly elastic materials under free undamped vibration, giving 500 references
[AIAA PAPER 69-24] 06 p1027 A69-18061

Initial stage of motion in Rayleigh problem, calculating time variable velocity of tangential stress on and velocity of gas near plate
07 p1118 A69-18701

Antisymmetric cross ply and angle ply laminated plates deflection under transverse loading with coupling between bending and middle-plane extension
07 p1231 A69-18711

Plane anisotropic rectangular plates with various boundary conditions, analyzing stability, natural frequencies, mode shapes and displacement under lateral loads
07 p1232 A69-18719

Fundamental problems of plate elastostatics with stress couples reduced to solution of integral equations, noting uniqueness theorem in plate bending theory
07 p1233 A69-19328

Explicit transverse bending stiffness and mass matrices for triangular finite plate element with linear thickness variation, using matrices for natural frequencies of vibration
08 p1414 A69-20526

Differential equation reduction for vibrational motion of rectangular plates subjected to variable tangential forces, discussing dynamic stability
08 p1415 A69-20666

Minimum weight plastic design of circular and annular sandwich plates with piecewise constant cross section, discussing cost reduction
08 p1417 A69-20823

Plane and three dimensional stress concentration studies involving asymmetrical stress tensors, noting contributions to moment theory of elasticity
08 p1419 A69-21177

Asymptotic two dimensional moment theory of elasticity, analyzing stress concentration at curvilinear holes and fluctuating boundary loads
09 p1614 A69-21884

Error estimates of stress concentration at free hole determined by two dimensional elasticity theory of thick plates
09 p1614 A69-21885

Plates stability and corner stress-strain state under variable loads calculated by method analogous to structural mechanics
10 p1792 A69-22849

Linear viscoelastic bending of anisotropic plates based on equation for Voigt plate, considering elliptic and rectangular plates
10 p1793 A69-22881

Eddy current nondestructive tests of nonmagnetic thin metallic sheets and plates from single surface
10 p1698 A69-23046

Crack propagation in plates and shells subjected to bending and direct loading, noting plate analysis modification for crack touching on compression side
10 p1795 A69-23061

Stress intensity magnification factors in surface flawed tension plates and notched round tension bars, evaluating fracture toughness
10 p1797 A69-23080

Elastic Cosserat plate and shell theory, considering constitutive equations imitating transversely isotropic material and elastic deformations
10 p1798 A69-23147

Large amplitude free vibration of isosceles right angled triangular plate with simply supported edges
10 p1800 A69-23236

Statistical theories of turbulence applied to thermal convection between infinite slippery plates at large Prandtl number
11 p1997 A69-24283

Elastic unbounded isotropic plane weakened by doubly periodic system of identical holes, noting solution involving Cauchy type integral
11 p1972 A69-24652

Three dimensional bending problem for thick isotropic plate with curvilinear hole and normal and tangential stress applied to edge of hole
11 p1973 A69-24657

Limiting equilibrium of plate weakened by curvilinear hole stress raiser with one or two cusps, obtaining stress-strain diagrams
11 p1973 A69-24658

Two dimensional elasticity and plate bending theories for calculating elastic isotropic panels and thin reinforced plates
11 p1974 A69-24664

Dynamic and fatigue crack propagation theories for brittle and quasi-brittle solids and plates
11 p1975 A69-24672

Free vibration modes of infinite uniform plate in linear coupled theory of thermoelasticity, considering heat transfer conditions
11 p1976 A69-24793

Limit loads for circular and annular plates of smoothly varying profile under uniformly distributed transverse loads
11 p1982 A69-24946

Linear differential equation solution for elastic systems stability problems, discussing applications to heated rectangular plates
11 p1982 A69-24950

Nodal lines shape in individual flats for long plates in combined shear and compression with sinusoidal edge rotations in longitudinal direction
11 p1983 A69-25137

Shear buckling of simply supported infinitely long plates orthogonally reinforced by stiffeners with flexural and torsional rigidity
11 p1984 A69-25142

Bent plates elastoplastic stress-strain state determination by elastic solution and finite differences, considering linear strengthening under uniform distribution of load
11 p1985 A69-25175

Free vibration frequencies of simply supported parallelogramic plates, noting skew angle splitting of degenerate frequencies and frequency crossing of modes
11 p1987 A69-25379

Modal coupling in thermally stressed plates, obtaining solution for frequencies and stiffness
11 p1990 A69-25509

Flutter analysis of plates with inplane boundary support flexibility exposed to transverse pressure loading or buckled by uniform thermal expansion
11 p1992 A69-25523

Plane stress state in plate with different glide moduli during tension and compression, considering axisymmetrical deformations
12 p2178 A69-26003

Aerodynamic field around symmetric profile two dimensional plates, visualizing velocity fields with Al particles
12 p2011 A69-26288

Mathematical bending theory for three layer elastic plates containing light or rigid fillers
12 p2182 A69-26678

Linear plate theory deficiency for large plate deflections, considering approximation of nonlinear behavior permitting changes in form without additional terms
12 p2185 A69-26822

Perturbation method for nonlinear panel flutter at high Mach numbers, using von Karman large deflection plate theory and quasi-steady aerodynamic theory
13 p2364 A69-28204

Rectangular plate buckling analyzed by finite element method with deflection function
13 p2364 A69-28225

Dynamic characteristics of Clough-Tocher triangle for natural frequency of simply supported plate, noting bending elements
13 p2365 A69-28246

Stress-strain state of circular annular plate with varying thickness subjected to concentrated axisymmetric load and shearing force applied to internal perimeter
13 p2369 A69-28563

Buckling of unsymmetric cross-ply rectangular plates under uniform shear, considering hinge-support boundary conditions
13 p2371 A69-28679

Finite thickness plate heat equation using Legendre polynomials
14 p2537 A69-28970

Stress concentration around rhombic hole in nonlinear isotropic plate under pure shear
14 p2533 A69-28981

Bending of elastic triangular plates with free and supported corners under uniformly distributed transverse load determined using Ritz method
14 p2535 A69-29410

Postbuckling of rectangular plates with exponential variation in thickness, analyzing large deflection equations using dynamic relaxation method
15 p2704 A69-30291

Finite element and iteration method for large deflection of rectangular plate, considering stiffness matrix for bending
15 p2706 A69-30435

Bending theory of orthotropic plates with variable elastic modulus under transverse loads, utilizing stress-strain relations and Kirchhoff-Love hypothesis
15 p2708 A69-30661

Minimum vibration frequency and compressive force for freely supported rectangular, triangular and circular plates simulated on analog computer
15 p2708 A69-30665

Equations for bending of elastic cantilever plate with parallelogram shape in oblique angle coordinate system, constructing functions satisfying Poisson conditions at contour
15 p2710 A69-30861

Elastic anisotropic panels mechanics analyzed using differential equations stressing transverse displacements, anisotropic thermal expansion, shape imperfections and slip deformations
15 p2711 A69-30904

Stress calculation for thermoelastic mixed boundary value problem in infinite isotropic plate with cylindrical stress free cavity
15 p2712 A69-31013

Bending theory for two layer plate made of isotropic material under sinusoidal load obtained by elasticity and classical theory based methods
15 p2714 A69-31198

Analogy between Timoshenko plate theory and moment theory of elasticity achieved by reducing Timoshenko equations to biharmonic and Helmholtz equation
15 p2715 A69-31205

Linear piezoelectric plate vibrations, Elements of linear theory of piezoelectricity and vibrations of piezoelectric plates, covering differential equations, boundary conditions, etc
16 p2826 A69-31720

Natural vibration of isotropic plates in temperature field with nonuniform distribution over plate
16 p2871 A69-31891

Parabolic and cardioid plates bending under uniform load by using point matching technique
16 p2874 A69-32166

Compressibility of material in stability problems of elastoplastic plates and shells
16 p2875 A69-32292

Bending problem of anisotropic/nonorthotropic plates solved by method of small parameter
16 p2875 A69-32294

Two dimensional plate theory with moment stress considerations derived from three dimensional elasticity theory, discussing reduction of equilibrium and compatibility equations
16 p2876 A69-32786

Stress-strain state analysis for brittle plate with circular holes of equal radius performed in cylindrical system of coordinates
17 p3055 A69-33127

Error estimation in thin elastic plate bending problem approximate solution by equal deflection lines method, constructing two sided bound for boundary value problems
17 p3062 A69-33713

Laminated anisotropic plate equations from thin plate theory including nonlinear terms, inertia and thermal stresses
[ASME PAPER 69-APM-15]

18 p3213 A69-34390

Uniform thickness rectangular plates bending with rigidly clamped or freely hinged edges solved by refined version on digital computer
18 p3215 A69-34535

Quadratic programming method for equations of elastic perfectly plastic solid applied to stress distribution in plate torsion and bending
18 p3218 A69-34661

Crack analysis in stiffened vibrating plate based on dynamic stress distribution, showing high bending stresses at intersection
18 p3223 A69-35168

Two dimensional theory for anisotropic plates motion derived, using asymptotic integration of three dimensional elasticity equations
18 p3224 A69-35297

Plate dynamics generalized equations independent of plate theory hypotheses, discussing algorithm and initial and boundary conditions
18 p3226 A69-35376

Secondary flow consisting of longitudinal vortices superposed on convection flow on inclined plate, obtaining flow pattern through flow visualization
18 p3124 A69-35383

Elliptic system of twelfth order equations describing elastic equilibrium of plate with kinematic functions analyzed by integration procedure
19 p3438 A69-36203

Plate material Poisson ratio determined by application of photoelastic interferometry to plate pure bending deformation contour lines
19 p3312 A69-36206

Von Karman equations for large deflection of simply supported square plates solved using dynamic relaxation method, recommending optimum mesh spacing
20 p3619 A69-36938

Clamped skew plates natural frequencies analysis using Galerkin method, expressing deflections as double series of beam characteristic functions, stating eigenvalues and eigenvectors
20 p3621 A69-37201

Composite laminates in cylindrical bending, discussing classical laminated plate theory limitations by comparing boundary value problems to corresponding theory of elasticity solutions
20 p3626 A69-37760

Unbalanced cross-ply elliptic laminated plates with bending membrane coupling, analyzing membrane boundary conditions with clamping assumed
20 p3626 A69-37762

Energy formulation extended for plane anisotropic rectangular plates, handling nonuniform properties and loadings
20 p3627 A69-37766

Stress and displacement in thin circular plates of ductile materials under axisymmetric loading predicted by nonlinear analysis
20 p3628 A69-37787

Asymptotic integration method of nonlinear elasticity equations for first approximation theory of anisotropic plates moderately large deflections
20 p3630 A69-38129

Rectangular plates bending boundary value problems, deriving formulas for plates with free edges
20 p3630 A69-38291

Plate bending theory modified for applying successive linear conjugates method to partially clamped isotropic plate and plate with circular hole
21 p3834 A69-38721

Composites elastic behavior, considering stress-strain in anisotropic lamina, composite plates and shells theory, thermal stresses and buckling for improving heterogeneous structures design
21 p3836 A69-38931

Approximate solution of unsteady thermal conductivity for plate with unlimited number of layers
21 p3851 A69-39083

Velocity and temperature distribution curves in turbulent boundary layer formed by natural convection on isothermal vertical plate, using Prandtl and Nusselt numbers
21 p3852 A69-39430

Concentration distribution of admixture in semibounded jet propagating along nonheat conducting plate, obtaining concentration profiles for various thermal and diffusion Prandtl numbers
21 p3854 A69-39844

Mathematical modeling techniques applied to thermoelastic cooling for plate without clamping and mechanical loads, examining integrator schematic diagram
21 p3680 A69-39851

Cosserat theory on couple stresses applied to stress distribution in semiinfinite plate, using Fourier transform method
22 p4038 A69-39902

Curvilinear planform plates natural oscillations, assuming small elastic bending strain obeying Hookes law
22 p4038 A69-39912

Stress analysis fundamental equation for variable thickness plate under concentrated load, using two dimensional Dirac delta function
22 p4041 A69-40144

Ambartsumian deflection theory applied to asymmetric bending problem for transversely isotropic circular plates
22 p4049 A69-41278

Mach 42 test measuring surface pressures, surface heat transfer rates and shock wave shapes in strong interaction regime for sharp and blunt plates
[AIAA PAPER 68-720] 23 p4059 A69-41886

Plates and shells under concentrated loads, analyzing stress-strain state
23 p4228 A69-41986

Green formula and fundamental solution for determining displacements and stresses in contour integral form for plate bending problems
23 p4230 A69-42002

Network method for stability of thin nonlinearly elastic compressible material plates, noting difference operators for rigidly clamped plates
23 p4230 A69-42003

Triangular plate bending element using Herrmann variational method, deriving matrices for finite elements
24 p4404 A69-43591

Single series solution for rectangular plate deflection under arbitrarily loaded concentrated load, considering monolithic slab beam connection case
24 p4404 A69-43593

Transverse shear influence on circular plates small displacement theory determined from coupled linear partial differential equations of plates
24 p4405 A69-43655

Buckling of thick homogeneous rectangular plates subjected to constant normal stress, noting error for thin plate approximation
24 p4406 A69-43696

PLATELETS

Platelet role in decompression sickness pathology from experiments upon rats subjected to decompression after injection of antiplatelet serum
21 p3655 A69-38918

PLATES

Heat flux applied to infinite plate contacting semiinfinite body determined from plate unsteady temperature, allowing for calorimeter heat losses
24 p4407 A69-42589

Boundary layer of MHD flow past semifinite plate, using Navier-Stokes equations
01 p0130 A69-10771

Bending of freely supported plates of polygonal planforms under transverse load with aid of R functions
02 p0341 A69-12140

TUBA family of plate elements, discussing kinematically equivalent load matrices, initial loads due to initial strains, geometrical stiffness and square plates
03 p0530 A69-14090

Elastoplastic bending of plates with nonlinear stress-strain diagram
04 p0667 A69-14269

Flexural waves passage through obstacles in infinite plate, determining vibration arresting properties of rigid ribs, elastic inserts and hinged couplings
04 p0678 A69-14902

Flexural wave reflection from corner joint between plates, establishing reflection coefficient dependence on wave frequency
04 p0679 A69-14903

Absolute viscosity measurements from translational undamped oscillations of plate in liquid, considering viscosimeter walls effect
04 p0679 A69-14905

Monochromatic flexural waves passage through elastic insert between plates, determining wave absorptivity dependence on wave frequency
04 p0679 A69-14906

Laminated plates vibrational characteristics calculations by transition matrices, relating stresses and displacements under load
04 p0679 A69-14907

Numerical analysis for stresses in finite or infinite plate with arbitrary holes, considering boundary value problems
10 p1793 A69-22882

Reissner algorithms for displacements of bent plate represented in finite series form as solutions of Euler equations
10 p1793 A69-22883

Semibrittle material decompaction influence on stress distribution in infinite plate with edge loaded circular hole, noting stress-strain relation nonlinearities
11 p1972 A69-24656

Numerical analysis of natural oscillations of three layer sandwich plates of rectangular planform, considering end conditions
11 p1976 A69-24773

Finite difference method for transient and steady state response of vibrating plates, considering explicit and implicit formulas
11 p1983 A69-25020

Flexural waves passage through obstacles in infinite plate, determining vibration arresting properties of rigid ribs, elastic inserts and hinged couplings
12 p2182 A69-26655

Flexural wave reflection from corner joint between plates, establishing reflection coefficient dependence on wave frequency
12 p2182 A69-26656

Absolute viscosity measurements from translational undamped oscillations of plate in liquid, considering viscosimeter walls effect
12 p2182 A69-26658

Monochromatic flexural waves passage through elastic insert between plates, determining wave absorptivity dependence on wave frequency
12 p2182 A69-26659

Laminated plates vibrational characteristics calculations by transition matrices, relating stresses and displacements under load
12 p2182 A69-26660

Finite deflection discrete element analysis of sandwich plates and cylindrical shells with unbalanced laminated faces
12 p2185 A69-26821

Finite element displacement method extension to include geometric nonlinearity applied to arbitrary plate element, shallow cylindrical shell and shallow hyperbolic paraboloid
13 p2361 A69-27441

Spherical plate electrostatic analyzer transmission characteristics, emphasizing angular response to external particle sources as functions of angular coordinates and particle energy
14 p2449 A69-29560

Theory, function generator routine and testing for six node 18 degree of freedom triangular element for plate bending
15 p2706 A69-30430

Stiffness matrix for refined triangular plate bending finite element, considering Kirchhoff theory
15 p2706 A69-30434

Aluminum models of single cell simply supported folded plates to study instability phenomena possibly occurring in actual structure
15 p2709 A69-30679

Stiffness matrix of polygonal finite plate bending element derived using assumed stress distribution
15 p2710 A69-30867

Plane stress solution for stresses due to concentrated couple acting at any point on elliptic plate with fixed edge
15 p2712 A69-31014

Plate bending problems, comparing various approximate analytical methods including point matching, Galerkin, Ritz, Kantorovich and least squares techniques
16 p2874 A69-32160

Mixed plate element application to vibration and buckling eigenvalue problems based on Reissner variational principle, considering quadrilateral elements
16 p2874 A69-32176

Transient stress waves due to inputs of various types and time dependence in plates and revolving shells, discussing applications of elasticity theory analysis methods
16 p2876 A69-32785

Transverse bending of asymmetric sandwich plates with rigid filler taking into account stresses and strains in filler

17 p3055 A69-33129

Prestressed beams, columns and plates nonlinear response, statistical behavior and transverse cracking under axial compression, describing strength and stiffness

17 p3060 A69-33568

Transverse shear deformation and rotatory inertia effects on large amplitude lateral free vibrations of transversely isotropic plates
[ASME PAPER 69-APM-10]

18 p3213 A69-34386

Bending of rigid freely supported plastic plates under local axisymmetric dynamic load, discussing rectangular pulse effects and velocity fields

18 p3217 A69-34593

Heat transfer coefficient approximation under thermal instability conditions complicated by radiant heat exchange at plate surface, noting aircraft design applications

18 p3230 A69-34984

Isotropic plate critical strength measurements, evaluating role of material shear modulus

18 p3225 A69-35361

Viscous incompressible fluid flow around semi-infinite oscillating plate and skin friction on infinite cylinders oscillating parallel to length

19 p3237 A69-35620

Homogeneous heat flux effect on limit load of isotropic plate with rectilinear through crack, noting conditions for crack propagation

19 p3441 A69-36744

Number of forms of stability of plates and shells derived from eigenvalues of nonlinear boundary value problem containing generalized von Karman equations

19 p3445 A69-36816

Critical buckling loads for uniform compression of clamped or simply supported parabolic and semielliptic plates

20 p3622 A69-37223

Fourier heat equations functional corrections for determining temperatures of plate and cylinder heated simultaneously by radiation and convection

21 p3848 A69-38641

Curved shell elements in shell and plate analysis, discussing quadratic and cubic elements for space structures design

21 p3845 A69-39329

Thermal buckling of skew plates clamped along all edges under radiant heating, measuring various characteristics, solving differential equations by difference method

22 p4044 A69-40599

Dynamics of viscous electrically charged gas using Navier-Stokes equation

22 p3931 A69-40686

Photoelastic technique of stress-freezing and slicing to determine bending stresses in transversely loaded plate supported at corners

22 p4045 A69-40900

Unsteady thermal conductivity calculated by approximate analytical method in simple shape bodies/infinite plate, long cylinder, sphere/cooled or heated by thermal radiation

23 p4238 A69-41333

Plate and shell structures static and dynamic analysis by generalized variational principles in finite element method, discussing element displacement functions
[AIAA PAPER 68-290]

23 p4227 A69-41882

Computer program for natural oscillations of plates and shells, deriving differential equations of motion for thin elastic shell by variational method

23 p4230 A69-42004

Heated three layer plates stability under finite deflections in supersonic gas flow, deriving aerothermoelasticity equations

24 p4395 A69-42590

Three layer plate transverse bending in linear presentation, reducing problem to two displacement functions determination

24 p4395 A69-42594

Interlaminar shear stresses in cross-ply three ply symmetric laminated composite plate, analyzing interlaminar stress distribution under simple tension

24 p4399 A69-43052

Forced parametrically excited periodic vibration of finite length plate in plane supersonic flow, considering periodic forces applied at edges

24 p4407 A69-43733

Electroless deposition of various metals with emphasis on nickel, discussing mechanism, plating solutions, substrates, deposit properties and applications

01 p0099 A69-11060

Optimum conditions for producing Ti-V alloy sheet plated on one side with Nb by hot rolling

18 p3155 A69-34652

PLATINUM

Shock tube equilibrium method for determining vapor pressure of platinum submicron particles by suspension in xenon-argon carrier gas at high temperatures

03 p0532 A69-13319

Electrocatalysts for direct electrochemical oxidation on n-octane in fuel cells, discussing platinum consumption reduction
[ECS PAPER 8]

03 p0368 A69-13856

Treatment and testing of thin platinum and gold alloy wires used in thermoelements for studying liquid fuel vaporization in combustion chambers

07 p1130 A69-18258

Potential effect on wetting of platinum electrodes in acid electrolytes noting drainage role

08 p1268 A69-20362

Adsorption kinetics of hydrocarbon oxidation on platinum electrode

08 p1268 A69-21052

Spectral Pt II lines in Ap stars of Hg class observed during analysis of double lined spectroscopic binary HR 4072

15 p2695 A69-30891

Electrochemical oxidation of hydrocarbons on platinum electrode, discussing adsorption kinetics

16 p2740 A69-32423

Pt wire detector for flow regulation of atomic hydrogen beam, noting hydrogen maser application

22 p3950 A69-41232

PLATINUM ALLOYS

Room temperature lattice spacings of PdIn, PtIn and PtSn alloys including magnetic susceptibility

05 p0779 A69-15832

PLATINUM COMPOUNDS

Platinum based metal binary catalysts as anodes for hydrogen/carbon monoxide fuel mixtures oxidation, discussing alloy surface chemisorption of CO

12 p2026 A69-25937

PLAYBACKS

Buffer shift register with feedback control during tape recorder playback to obtain variable delay to compensate for recorder time base error

19 p3312 A69-36284

PLENUM CHAMBERS

Integrated lift, propulsion and control in Aeromobile air cushion vehicle, considering ram wing and gimbal fan plenum chamber vehicles

13 p2201 A69-27543

Plenum chamber obstructions influence on hovercraft lift fan performance, discussing tests and losses due to flat plate at impeller outlet

13 p2202 A69-27546

Multicell air cushion vehicle technology based on 1/4 scale and full scale tests, noting comparison with plenum systems and costs

13 p2202 A69-27547

Spectroscopic measurements of weakly ionized Ar plasma premixed with diatomic N in plenum chamber, demonstrating role of competitive reactions for metastable Ar atom

21 p3779 A69-39794

Arc-heated plasma jet wind tunnel flow properties in plenum chamber by spectroscopic techniques, measuring electron excitation, temperature and densities

22 p3990 A69-40596

PLETHYSMOGRAPHY

NT ELECTROPLETHYSMOGRAPHY
Nonsurgical methods of cardiac output measurement in aerospace medicine, considering simultaneous recording of carotid and femoral pulses and impedance plethysmography

23 p4088 A69-41813

Analog computer used to correct body plethysmographic chamber signal distortion due to inspired/expired air temperature and humidity differences

23 p4111 A69-42081

PLEURAE

Alveolar and pleural pressures affecting pulmonary interstitial pressure in anesthetized dogs, applying Starling law of transcapillary exchange

24 p4257 A69-42627

PLEXIGLASS [TRADEMARK]

U POLYMETHYL METHACRYLATE

PLOTTERS

NT X-Y PLOTTERS

Automatic plotting devices for graphic readouts in analog and digital computers

12 p2091 A69-26303

Data distortion elimination by improved superimposition of sinusoidal audio frequency signal on DC voltage of automatic Langmuir probe second derivative plotters

17 p2970 A69-32852

CRT graphic display/plotter for small digital computers, describing device operation, control and applications

21 p3679 A69-39608

Optical interpolation for GZ-I orthoprojector in storage mode, noting electronic contour plotter

22 p3951 A69-41247

PLOTTING

Radar range height angle charts for plotting earth based radio or radar system vertical plane coverage diagrams

01 p0031 A69-10632

Automatic heteroatomic plotting of high resolution mass spectral data, presenting relative intensity vs elemental composition in bar form

01 p0024 A69-10905

Hazard plot analysis of incomplete data involving times to failure for failed units and running times on unfailed units

18 p3147 A69-34515

Multiplexed censored data plotting on various type hazard papers for engineering information on time to failure distribution

20 p3567 A69-38288

Automatic contour plotting for orthoprojector based on adjacent profiles and linear interpolation

22 p3951 A69-41248

PLOTTING INSTRUMENTS

U PLOTTERS

PLUG NOZZLES

Interactions between outer and inner jets behind maximum cross section of jet engine nozzle
[ONERA-TP-600]

02 p0187 A69-11620

PLUM BROOK REACTOR

Beryllium reflector distortion in Plum Brook Reactor due to neutron embrittlement and gas formation, noting material surveillance, replacement, etc

03 p0465 A69-13131

PLUMBANE

U LEAD COMPOUNDS

U METAL HYDRIDES

PLUMES

NT ROCKET EXHAUST

Contaminants formation during pulse mode operation of liquid bipropellant attitude control rocket engine, discussing exhaust plume effects
[AIAA PAPER 69-574]

16 p2870 A69-32774

Current distribution and scattering cross section of missile with plume/ionized trail/ of tapered conductivity due to plane wave electromagnetic excitation

17 p2921 A69-33671

Buoyant plumes and thermals defined as vertical motions produced under gravity by density or temperature contrast between incompressible source fluid and environment

18 p3122 A69-34917

Carbon dioxide free jet expanding from conical nozzle into low density atmosphere, using freeze up method

22 p4000 A69-40594

Mixing spread of hydrogen plumes and air pollutants exhausted into open atmosphere, predicting subsonic free round jets air entrainment

24 p4300 A69-43257

PLUTO [PLANET]

Pluto mass from observations of perturbation of motion of Neptune

02 p0315 A69-11808

Pluto mass from Neptune orbital longitude, comparing observations and theory

04 p0663 A69-15385

Pluto mass and density accuracy, questioning values derived from Neptune observations

19 p3403 A69-35969

Pluto positions /1930-1965/ from photographic observations, ascribing declination errors to atmospheric dispersions

22 p4025 A69-40612

PLUTONIUM ISOTOPES

Pu 244 and 1 129 abundances in early solar system and continuous galactic synthesis model of element formation in stars

08 p1397 A69-20695

PLATING

NT ELECTROPLATING

NT NICKEL PLATE

Plutonium-244 existence in early solar system concluded from relative abundance ratios of excess meteoritic heavy Xe isotopes
08 p1401 A69-20900

Pu/U ratio from fossil track studies bearing on extinct Pu 244 in Campo del Cielo and Kodaikanal meteorites
19 p3407 A69-36077

PLUTONIUM 238

Pu-238 isotope organic Rankine cycle system analyzed for one year manned space station, using modified H-521 Space Power computer program
23 p4188 A69-42264

PLUVIOGRAPHS

U RECORDING INSTRUMENTS

PNEUMATIC CIRCUITS

Fluidic acceleration sensor based on vibrating string principle, discussing design, suspension system, driving-oscillator circuit, beat frequency circuit and detection circuits
02 p0249 A69-12091

Breadboard technique and interconnection for fluidic circuits in large systems
05 p0705 A69-16009

Hazards in pneumatic fluidic sequential circuits caused by delays in pneumatic tubing [ASME PAPER 68-WA/AUT-18]
05 p0706 A69-16174

Pneumatic instrumentation line transfer function approximated by system model for simplifying reactor control system analysis [IEEE PAPER 2D-6]
07 p1059 A69-19190

Second order system equations to approximate transfer function of homogeneous pneumatic instrumentation line terminated with pressure transducer
10 p1692 A69-23267

German monograph on theoretical and experimental investigations of tubes and lumped fluidic elements covering equivalent circuit
17 p2903 A69-33573

Pneumatic control circuits design based on logic functions and truth tables, noting fluid logic application
19 p3256 A69-36714

PNEUMATIC CONTROL

Pneumatics for aircraft systems integration, proposing engine bleed air use for high power short term duties, heat recovery from cabin air conditioning, etc
01 p0012 A69-10594

Pneumatic pressure ratio sensing element and associated high pressure switches and amplifiers for gas turbine engine control systems
02 p0249 A69-12088

Pneumatic elements, discussing development from process control via modules systems to logic elements and fluid sensors
02 p0197 A69-12795

Fluidic numerical controls of linear or rotating motors, discussing pneumatic, hydraulic, hybrid logic components and amplifiers
04 p0550 A69-15082

Hybrid electropneumatic and electrohydraulic servosystem for actuation of gas jet nozzles of sounding rocket automatic pointing system
04 p0550 A69-15182

Nonlinear lumped parameter model for long gas filled pressure sensing lines covering steady state, laminar or turbulent gas flow [AIAA PAPER 69-117]
06 p0913 A69-18106

AC fluidics for pressure pulse frequency control and monitoring in flow, discussing design and application to steam turbine speed control
07 p1058 A69-18938

Design criteria for pneumatic servo controls with fluidic elements stressing final transient, pilot circuits and amplifier elements
08 p1256 A69-20305

Book on industrial control engineering covering mathematics, semiconductor devices, feedback amplifier theory, closed loop systems, frequency response diagrams
12 p2051 A69-26244

Brake system components automatic testing for pneumatic or hydraulic integrity essential to safe system performance
17 p2978 A69-33377

Fluidic logic for high speed pneumatic stepping motor for high radiation environments, discussing belows pressure sequencing by open-loop counter, signal conversions and performance
18 p3092 A69-34310

Analytical, graphical and graph-analytical methods for synthesis of passive circuits ensuring air removal

from chambers of pneumatic logic control and servomechanisms
18 p3093 A69-34831

Pneumatic control circuits design based on logic functions and truth tables, noting fluid logic application
19 p3256 A69-36714

High temperature pneumatic systems for missile and space vehicle control, describing pressure regulators, flow controls, thrusters and analog valves
22 p3870 A69-41240

Pneumatic driving system for heart assist or total replacement pumps, discussing design features and performance characteristics
24 p4273 A69-42983

Nonlinear lumped parameter model for long gas filled pressure sensing lines covering steady state, laminar or turbulent gas flow [AIAA PAPER 69-117]
24 p4301 A69-43259

PNEUMATIC EQUIPMENT

NT GAS VALVES

Pneumatic stepping motor actuation system with pure fluid valves and signal processing and minimum number of moving mechanical parts for high g and temperature environments
02 p0196 A69-12086

Pneumatic analog to digital and digital to analog converters, noting diaphragm force balance capsules, converters using stepping motors and factors affecting accuracy [ASME PAPER 68-WA/AUT-16]
05 p0706 A69-16176

Self damped pneumatic vibration isolators by modifying characteristics throughout frequency range, noting inertia block for improving HF behavior
08 p1301 A69-20398

Pneumatic diode function generator for simulating nonlinear control systems, discussing operating characteristics and programming methods
11 p1858 A69-24580

Fluidic curved-wall electropneumatic converter optimization, presenting steady state, step and pulse mode responses for various positions and lengths of resistive heaters
15 p2553 A69-31298

Quasi-plastic impact resulting from incomplete elastic collision of two material points in presence of dry Coulomb friction, noting engineering role in pneumatic equipment
18 p3215 A69-34568

Discharge coefficient and opening time of pneumatic and hydraulic systems incorporating disks, nozzles and valves
18 p3094 A69-34981

Nomograph for rapid estimation of pressure drops across orifices in pneumatic systems using real gas data with illustration for nitrogen
20 p3467 A69-38186

Digital computers used in error calculation in calibration curves of turboengines and other pneumatic devices
21 p3724 A69-39100

Design features comparison and operation principles of gas strain gauges in application to structures, emphasizing independence of temperature variations in pneumatic circuits
21 p3725 A69-39324

Small signal amplitude/frequency response or transfer gain of volume-terminated pneumatic lines with circular and rectangular cross sections
24 p4301 A69-43288

PNEUMOGRAPHY

U PNEUMOGRAPHY

PNEUMOGRAPHY

Power spectral analysis feasibility for data reduction for medical interpretation of changes in pulmonary impedance pneumograph in remote monitoring
12 p2024 A69-26558

Venturi low resistance flowmeter for ventilatory measurements during rest and exercise on humans, noting suitability for analog integrator computation of tidal volumes
22 p3894 A69-40979

PNEUMONIA

Resistance to bacterial pneumonia and influenza infection in space cabin environment tested on mice in simulation chamber
07 p1067 A69-19432

PNEUMOTHORAX

Inflight spontaneous pneumothorax case of civilian pilot lung collapse experience during exposure to reduced ambient pressure, discussing etiology, incidence, treatment and disposition
17 p2909 A69-33183

POCKELS EFFECT

U BIREFRINGENCE

POCKET MICE

Diurnal pressure cycles found as zeitgeber to entrain body temperature endogenous circadian rhythm in pocket mice under constant environmental temperature and light
16 p2745 A69-32447

POIKILOTHERMIA

U FROGS

U LIZARDS

U TURTLES

POINCARÉ PROBLEM

Periodic solutions of autonomous system oscillations with many degrees of freedom based on Poincaré method applied to Liapunov systems
07 p1183 A69-19680

POINCARÉ SPHERES

Poincaré sphere representation of polarized light used to predict rotation effect on optical observations in photoelastic shell analysis
04 p0683 A69-15495

Poincaré sphere properties representing birefringent behavior of materials and qualitative measurement technique for elliptically polarized light
21 p3844 A69-39318

POINT DEFECTS

NT FRENKEL DEFECTS

NT VACANCIES [CRYSTAL DEFECTS]

Elastic constants of point defects for bcc and fcc crystals with vacancies and interstitials calculated by Born-Huang method for nonprimitive lattices
02 p0267 A69-12186

Ammonium perchlorate thermal decomposition, studying point defects role
03 p0494 A69-12896

Impurities effect on defects in oxygen deficient niobium, tantalum and zirconium oxide scales at high oxygen pressures, noting relationship to metal oxidation
03 p0444 A69-13312

Point defects in body centered cubic transition metals, discussing thermal equilibrium, irradiation cold work, high and low temperature recovery, etc
03 p0447 A69-13817

Interaction between point defects and magnesium atoms in aluminum irradiated by neutrons, analyzing magnesium concentration effect on recovery
05 p0781 A69-16613

Internal friction, Young modulus and resistivity measurements for stage I interstitials in electron irradiated tungsten
13 p2284 A69-28682

Book on defects and radiation damage in metals covering collision cascades, point defects clustering and impurities behavior
14 p2503 A69-28889

Point defect structure to control ammonium perchlorate burning rate, discussing thermal analysis data correlations, isothermal decomposition, etc [WSCI PAPER 69-17]
16 p2831 A69-32355

POINT IMPACT

Point load subjected deflections of cantilevers and circular rings found using electronic analog computers
03 p0522 A69-12865

Two dimensional wavefront shape induced in finitely strained elastic body by impulsive point body force
11 p1969 A69-24338

Quasi-plastic impact resulting from incomplete elastic collision of two material points in presence of dry Coulomb friction, noting engineering role in pneumatic equipment
18 p3215 A69-34568

POINT MATCHING METHOD [MATHEMATICS]

U BOUNDARY VALUE PROBLEMS

POINT SOURCES

Atmospheric diffusion measurement based on analysis of thoron emitted continuously from point source, permitting study of diffusion in atmospheric boundary layer
01 p0144 A69-10043

Green functions associated with electromagnetic radiation in moving medium, finding time dependent and harmonic Green functions
03 p0466 A69-13352

Flow pattern induced by oscillatory point source in rotating inviscid liquid
04 p0591 A69-15279

Reciprocal theorem for displacements of solid skeleton caused by fluid sources action in infinite consolidating space
05 p0835 A69-15869

Expression derived for correlation function and power spectrum of bearing of set of point radiators, taking into account receiver internal noise

05 p0719 A69-16219

Nonscattered, singly and multiply scattered light of beam from point source analyzed at boundary layer of turbid medium

05 p0789 A69-16640

IR radiation at 10.6 micron from two point sources mixed with collimated ruby laser radiation in proustite, obtaining visible image

06 p0928 A69-17904

Ray-optical description for point source excited surface waves in stratified anisotropic media

07 p1079 A69-18918

Minimal angle of resolution /MAR/ between point and extended circular source and between point source and simulated horizon, studying irradiation effects on manual navigation

07 p1177 A69-19208

Discrete extragalactic X ray sources model for explanation of diffuse X ray background, noting evolutionary aspects

07 p1206 A69-19255

Angular separation of two point sources measured through expressing antenna resolving power by a posteriori probability laws

08 p1288 A69-20961

Temperature and displacement fields in unbounded elastic space due to instantaneous point heat source action

09 p1621 A69-21495

Compressible gas flow problem in point body gravitational field solved with reference to sun and interstellar gas

09 p1577 A69-21769

Statistical estimation theory giving angular resolution of imaging systems in terms of noise characteristics and modulation transfer function

10 p1725 A69-24048

Holograms reconstructing images of points with diameters approximated by width of autocorrelation functions

11 p1886 A69-25058

Model for shock propagation from point energy source into cold atmosphere with exponential density variation

11 p1871 A69-25123

Nonscattered, singly and multiply scattered light of beam from point source analyzed at boundary layer of turbid medium

14 p2482 A69-28796

Point discharge measuring based on pulsed nature of discharge current, outlining field experiment results

15 p2610 A69-30698

Linear heat flux in thin composite plate with internal point source, assuming no heat transfer at surface and neglectable temperature changes

17 p3068 A69-33126

Shock waves propagation in inhomogeneous gases, considering time development and energy flux during point explosion in plane layers by quasi-stationary approximation

17 p2952 A69-33383

Spectral parameters effect on IR instrument SNR, discussing range equations of point and extended sources and radiation-noise-limited detectors

19 p3310 A69-36061

Plane, cylindrical and spherical point explosions in combustible gas mixtures for different gas motion models, formulating scaling law for detonation wave model

19 p3449 A69-36353

Holograms capable of multiple imaging or reconstructing point images, using extended and correlated signal and reference sources in recording process

21 p3727 A69-39777

Microwave background radiation in steady state cosmological model, attempting interpretation as discrete extragalactic radio sources population

22 p4029 A69-40765

High energy gamma rays point source in Sagittarius indicated from evidence obtained by high altitude balloon flights

24 p4365 A69-42606

Transmission functions probabilistic model for solving radiative transfer problems in spherical shell medium surrounding emitting black core or point source, using integrodifferential equations

24 p4415 A69-43637

POINT TO POINT COMMUNICATIONS

Point to point millimeter wave communication system design, discussing propagation and data transmission

03 p0405 A69-13723

Spectrum analysis of pulse signals by point to point measurements of magnitude and phase of pulse-like time functions, using narrow band filter output

03 p0399 A69-13939

Communication satellites applied to broadcasting, considering point to point satellite link and distribution systems

08 p1272 A69-19925

Satellite and terrestrial point-to-point communication circuit costs, considering multiple access and small antenna earth stations

19 p3456 A69-36822

POINTS [MATHEMATICS]

A priori and a posteriori estimates of direct methods accuracy in solving linear algebraic equations

01 p0105 A69-10727

Optimum addition of abscissas in quadrature formulas by expansion of abscissas equation in Legendre polynomials

03 p0455 A69-13372

Integration formulas based on set of Gauss or Lobatto points

03 p0455 A69-13374

Conformal mappings for solving boundary value problems in elasticity and plasticity theories for regions having singular points

11 p1973 A69-24662

Necessary and sufficient conditions for boundary point regularity in Dirichlet problem for heat conduction equation assuming Holder condition

15 p2716 A69-30047

POISEUILLE FLOW

U LAMINAR FLOW

POISONING [TOXICOLOGY]

U TOXIC DISEASES

POISONS

U CURARE

U DICHLORODIPHENYLTRICHLOROETHANE

U STRYCHNINE

U URETHANES

POISSON DENSITY FUNCTIONS

Fluctuation voltage mean square value at polar dielectric capacitor terminals determined by applying stochastic properties of Poisson point processes to statistical model

08 p1295 A69-21151

Poisson formula in double logarithmic approximation for photon emission cross section in analysis of bremsstrahlung involving high energy particles

11 p1922 A69-25758

Cumulative probability distribution of positive random variable from moment generating function, exemplifying exponential and Poisson functions

12 p2120 A69-25927

Huffman minimum redundancy coding extension to run-length information based on Poisson distribution, including optimization and data compression applications

19 p3272 A69-36262

M-ary detection for optical communication investigated for maximum likelihood detection of one of M Poisson processes in background noise

19 p3276 A69-36486

POISSON EQUATION

Liouville and Poisson equations solutions for locally ellipsoid stellar velocity distributions with constant coefficients

02 p0310 A69-11455

Cauchy-Poisson problem for viscous liquid, calculating free liquid surface response to point impulse or initial displacement

03 p0414 A69-13015

Field distribution in insulated gate FET determined by numerical solution of Poisson equation

10 p1662 A69-23170

Near electrode layer calculation in low temperature plasma, solving kinetic ion equation for quasi-neutral and Poisson equation for space charge regions

13 p2312 A69-28117

Green functions for Laplace, Poisson and transient heat diffusion equations solved by matrix multiplication

15 p2710 A69-30870

Iteration process by difference scheme for numerical solution to Dirichlet problem of two dimensional Poisson equation

18 p3164 A69-34701

Convergence properties of finite difference approximations to solutions of Dirichlet problem for Poisson equation

18 p3164 A69-34840

POISSON PROCESS

U STOCHASTIC PROCESSES

POISSON RATIO

Strain dependent modulus and Poisson ratio behavior of CTPB propellant, performing stress relaxation tests

04 p0646 A69-15510

Fiberglass reinforced plastics modulus of elasticity and Poisson ratio determined by strain gauges and frequency and resistivity measurements

08 p1335 A69-20330

Radial and tangential stresses in double glass fiber assuming different Poisson coefficients, determining conditions for axial stress redistribution prevention

09 p1614 A69-21741

Poisson ratio determination with bonded electrical resistance strain rosettes

11 p1995 A69-25652

Perturbation formula for frequencies as function of Poisson coefficient, considering vibration modes of elastic body subject to boundary conditions

15 p2713 A69-31097

Plate material Poisson ratio determined by application of holographic interferometry to plate pure bending deformation contour lines

19 p3312 A69-36206

Graphical representation of friction stresses produced on mechanical parts surface layers, using mathematical model based on Poisson ratio and friction coefficient

19 p3329 A69-36723

Structural flexure center position from shear stress analysis showing nondependence on Poisson ratio

20 p3622 A69-37213

Radial and tangential stresses in double glass fiber assuming different Poisson coefficients, determining conditions for axial stress redistribution prevention

20 p3630 A69-38217

Negative Poisson ratio of isotropic heat shield material pyrolytic graphite, noting thermodynamic validity

24 p4338 A69-43599

POLAND

Hot plasma research at Polish Institute of Nuclear Research at Swierk

06 p0964 A69-17174

Polish report on space sciences activities to COSPAR covering satellite position observations, geodesy, space physics, mechanics, computations, meteorology, etc

15 p2724 A69-31433

POLAR AURORAS

U AURORAS

POLAR CAP ABSORPTION

Polar cap event detected at low latitudes by effect on VLF propagation, noting VLF technique sensitivity to low proton fluxes

05 p0816 A69-16276

Energy dissipation of solar particles in atmosphere for 3914 and 5577 A bands, computing light emissions associated with PCA

08 p1378 A69-20186

Variable solar X ray emission from subflare activity in plage region producing polar cap absorption proton flare of July 7, 1966

10 p1764 A69-23745

Solar X ray emission and decay during proton flare of July 7, 1966 noting start of polar cap absorption

10 p1766 A69-23755

Time history of July 7-10 1966 PCA event analyzed using 16 riometers and concurrent satellite observations of solar cosmic radiation

10 p1683 A69-23770

VLF observations of July 7 1966 solar flare and PCA event

10 p1657 A69-23772

Sudden cosmic noise absorption /SCNA/ in polar cap during July 7, 1966 solar proton flare, estimating SCNA latitudinal distribution and protons magnetic cut-off boundary

10 p1770 A69-23907

Polar cap absorption riometer recorded during 2-6 September 1966 event compared to satellite measurements of solar protons, discussing diurnal variations and oxygen role in associative detachment reactions

14 p2440 A69-29126

Polar cap absorption effects on VLF transmission phase and amplitude in tabular form

18 p3103 A69-35185

Solar proton flare June 1968 analysis, discussing geophysical effects and possible polar cap absorption

20 p3587 A69-37332

Morphology of discrete polar cap and polar glow auroras, noting diurnal variations correlation with magnetic activity changes at low latitude

21 p3707 A69-38487

- Auroral absorption relation to visual aurora and measured particle fluxes 21 p3707 A69-38488
- Incident proton flux atmospheric altitude profile during PCA period, comparing balloon observations with preliminary satellite data 23 p4204 A69-41485
- Cosmic radio emission anomalous absorption measurements during PCA following July, August, September 1966 proton flares 23 p4156 A69-41845
- Solar energetic particle effects during polar cap absorption observed in earth upper atmosphere and at ground level 24 p4373 A69-43618
- Polar cap ionospheric response to solar cosmic ray events observed by Mariners 2 and 4 solar proton measurements used to test magnetosphere models 24 p4373 A69-43621
- POLAR CAPS**
- Magnetosphere studies in France noting magnetosphere characteristics, wave propagation, charged particles, particle precipitation mechanisms in auroral zones and polar caps 02 p0242 A69-11904
- Geoelectric field over polar cap based on proton flux detection 04 p0648 A69-14682
- Meteorological observations of Mars northern polar cap and Southern Hemisphere from northern summer solstice to early autumn 05 p0825 A69-16302
- Mars polar cap ice cap and dry ice theories, discussing dark wave and cloud distribution meteorological observations 07 p1212 A69-18603
- Ionization in lower ionosphere over polar cap under solar corpuscular fluxes measured by radio wave absorption 10 p1759 A69-22838
- Martian polar caps dimensions as function of planet heliocentric longitude examined from photographic observations, noting compatibility with spectroscopic data 11 p1959 A69-24728
- Polar cap sporadic E investigation with backscatter at 28 MHz, noting geographic distribution, annual and diurnal variations 12 p2069 A69-26464
- Kinetic energy balance equation of mean zonal flow in symmetrical polar cap derived from basic concepts of mechanics, discussing relative coordinate system rotation 15 p2595 A69-30219
- ESRO 2 satellite observations of solar proton event of 9 June 1968, comparing flux profile variations across polar cap with magnetic changes at earth surface 15 p2677 A69-31347
- Mars 1969 opposition observations, discussing extremes in north and south hemispherical polar cap behavior, frosty deposit colorings and polar vapor/clouds 17 p3043 A69-34141
- Jupiter observations /1966-1967/, discussing variations in size and position of polar caps and tropical belts 18 p3203 A69-35337
- Mariner 6 TV pictures with description of craters and south polar cap, noting moon-like crater abundance, form, arrangement and crater sizes 21 p3803 A69-38981
- Diurnal variations of electron flux based on balloon observations near polar cap consistent with geomagnetic cut-off variations of magnetospheric models 22 p4005 A69-40511
- Long term computer produced multiple image satellite photomosaics for Southern Hemisphere, analyzing circulation, meridional bands, polar ice, cloud cover variations, etc 22 p3977 A69-40733
- POLAR COORDINATES**
- Areas of expectation for single radar automatic tracking of flying objects derived on basis of equation of circle in polar coordinates 01 p0035 A69-11296
- Diurnal nutation and periodic terms of local coordinates using OPL model of Danjon astrolabe, presenting harmonic and Fourier analysis 09 p1596 A69-22059
- Saint Venant torsion and flexure of prismatic bars analysis in polar coordinates, discussing boundary errors 09 p1621 A69-22770
- Shock polar equation in polar coordinates, showing shock polar shape dependence on Mach number 16 p2772 A69-32178
- Earth polar coordinates determined from latitude observations, discussing weighting functions for determining polar motion 17 p2959 A69-32869
- Polar coordinates in Euclidean space applied to theory of satellite moving in gravitational field of spherically symmetrical body, introducing equipotential surfaces 19 p3397 A69-35610
- Numerical integration for continuously thrusting spacecraft optimal trajectory, considering rectangular Cartesian and polar cylindrical coordinates characteristics [AIAA PAPER 69-903] 21 p3798 A69-38546
- POLAR GASES**
- Polar molecule rotational excitation diffusion cross sections for electron scattering 06 p0961 A69-17139
- Viscosity, thermal conductivity and diffusion predicted for dilute nonpolar, polar and mixed gases, discussing methods for rotational relaxation collision numbers and resonant correction 21 p3850 A69-38951
- Computer made movies and time history plots for ion-dipole collisions involving polar molecules /CO, HCL and acetone/trile/ 24 p4352 A69-43124
- POLAR IONOSPHERE BEACON**
- U BEACON SATELLITES
- POLAR METEOROLOGY**
- Characteristics of electrovortices and auroral electrojets of polar disturbance field, discussing dynamics during geomagnetic storms 02 p0240 A69-11723
- Polar geomagnetic disturbance development and decay during solar quiet and moderately disturbed periods 02 p0240 A69-11724
- POLAR ORBITS**
- Circumpolar satellite orbits under lunar and solar perturbations based on two fixed centers problem, considering large amplitude disturbances 10 p1780 A69-23616
- Improved spheroidal method for calculation of almost polar orbit of artificial satellites, bypassing right ascension 12 p2152 A69-25799
- Solar and lunar effects on motions of polar orbiting satellites, discussing variable intermediate orbits 14 p2521 A69-29460
- POLAR RADIO BLACKOUT**
- Polar auroral region cosmic radio noise absorption bays diurnal variations attributed to drift of electrons captured in magnetosphere 03 p0423 A69-13520
- Auroral absorption distribution from arctic riometric observations mapped for evaluating radio communications reliability 17 p2967 A69-33990
- POLAR REGIONS**
- NT ANTARCTIC REGIONS
- NT ARCTIC REGIONS
- Micropulsations at magnetoconjugate points in Arctic and Antarctic, noting diurnal and seasonal variations and latitude dependence 01 p0068 A69-11112
- Solar protons observations by Satellite 1963 38C in polar regions at high altitude during spring 1966 01 p0146 A69-11123
- Polar wind, describing upward plasma expansion of topside polar ionosphere and acceleration of positive H and He ions 01 p0077 A69-11239
- Helium isotopes escape mechanism from earth atmosphere related to polar wind ionospheric plasma flow from earth 01 p0077 A69-11240
- Polar ionosphere heating by spill-over electron energy during strong geomagnetic disturbances, giving mathematical representation 02 p0237 A69-11664
- Relationship between polar geomagnetic disturbances and DR variations value of geomagnetic field 02 p0238 A69-11672
- Anomalous radio wave absorption in polar aurora region ionosphere, discussing disturbance characteristics 02 p0207 A69-11688
- Polar aurorae fine scale structure interpretation based on plasma instabilities characteristics 02 p0239 A69-11693
- Geophysical effects observed in Northern Hemisphere during low solar activity, discussing polar auroral intensities and positions 02 p0239 A69-11694
- Ionospheric current systems for various selected very quiet and slightly disturbed international quiet days based on Northern Hemisphere observatories data 03 p0423 A69-13518
- High latitude electrons boundary dependent on geomagnetic axis orientation, noting role of coupling between solar wind and magnetosphere 03 p0502 A69-14003
- High latitude outer zone electrons boundary region during geomagnetically quiet periods 03 p0502 A69-14004
- Energetic electron fluxes measured at 2000 km over auroral and polar regions and at 17 earth radii in magnetotail plasma sheet 03 p0503 A69-14013
- Equatorial semiaxis of magnetospheric tail at distances between 10 and 80 earth radii for various intensities of polar magnetic disturbances 05 p0753 A69-16050
- Field aligned Birkeland currents generation at auroral latitudes 05 p0755 A69-16266
- Magnetic disturbance vector distribution during polar magnetic substorm 05 p0755 A69-16271
- Satellite scintillation at high latitudes and possible relation to soft particle precipitation 05 p0757 A69-16406
- Book on polar and magnetospheric substorms including daily variation data, satellite observations, etc 06 p0915 A69-16832
- Radiation bursts in subpolar stratosphere recorded by gas discharge counters on board sounding balloons 06 p0921 A69-17744
- Electron density distribution stationary with respect to sun determined by Alouette 1 measurements over winter pole, noting relation to high density plasma 06 p0922 A69-18224
- Magnetospheric and high latitude ionospheric disturbances, bulk motion /convective/ flow pattern and electric field distribution 07 p1128 A69-19370
- Polar auroral far UV spectra using Ebert-Fastie monochromator flanked by photometers with same visual field 08 p1311 A69-21026
- Scientific report of Rockwell polar flight, November 14-17, 1965 09 p1484 A69-21401
- Aerial chronophotography of Southern Hemisphere conducted on around world polar flight analyzed for meteorological and geographical aspects and compared with satellite data 09 p1534 A69-21405
- Polar flight navigation charts showing feasibility of three dimensional celestial positioning 09 p1538 A69-21406
- Electron fluxes energy spectra determined from simultaneous photometric and riometric observations in polar regions 09 p1485 A69-21530
- Auroral oval boundary and median line variations with increasing magnetic storm time intensity, noting ring current effect on polar aurora location 09 p1485 A69-21532
- Charged particles equations of motion in earth magnetosphere in polar storms, considering auroral zone, diurnal variations and electron and proton velocities 09 p1485 A69-21535
- Solar flare energetic electron access to polar zones from measurements made by nine channel magnetic spectrometer on polar orbiting vehicle 09 p1577 A69-21709
- VLF polar chorus emission and geomagnetic variations caused by compressions or expansions of magnetosphere 10 p1681 A69-22803
- Polar geomagnetic disturbances global current systems representation by prototypes of equivalent current systems 10 p1688 A69-23937
- Various glacial periods mechanism ascribed to combination of long term solar activity cycle and polar migration 11 p1877 A69-24409
- Auroral infrasonic waves morphology related to temporal and spatial distributions of supersonic auroral motions during polar magnetic storms 11 p1878 A69-25152
- Theories for universal time controlled polar F region reevaluated in light of satellite low energy charged particle observations 12 p2065 A69-26103

Auroral arcs drift as function of polar storm initial phase, noting agreement with satellite data on plasma motion in magnetosphere

12 p2071 A69-26694

Electron concentration in polar ionosphere measured by coherent scattering method

12 p2071 A69-26703

Dynamics of magnetosphere, discussing auroral oval position, ring currents, plasma density and magnetic field variations in near polar region

12 p2072 A69-26741

Auroral and polar zone ionosphere effects on propagation in HF through low VHF spectrum, considering nongreat circle mode, sporadic E ionization, etc

12 p2032 A69-26859

Solar polar faculae observations, discussing relation to general solar magnetic field and coronal properties, solar high latitude rotation and susceptibility to atmospheric conditions

12 p2160 A69-26897

Unified model for spatial distribution of transpolar exospheric electron density for polar plasma study

12 p2151 A69-26952

Polar ionosphere heating by spill-over electron energy during strong geomagnetic disturbances, giving mathematical representation

13 p2257 A69-28695

Relationship between polar geomagnetic disturbances and DR variations value of geomagnetic field

13 p2257 A69-28703

Anomalous radio wave absorption in polar aurora region ionosphere, discussing disturbance characteristics

13 p2224 A69-28719

Polar aurorae fine scale structure interpretation based on plasma instabilities characteristics

13 p2258 A69-28724

Geophysical effects observed in Northern Hemisphere during low solar activity, discussing polar auroral intensities and positions

13 p2258 A69-28725

Electron concentration enhancement in upper atmosphere at polar latitudes, noting three independent zones and relation to magnetic local time

14 p2510 A69-28938

Magnetic storm time variations of electron concentrations in upper ionosphere near north geomagnetic pole, discussing magnetic time, altitude and latitude dependence

14 p2510 A69-28939

Suprathermal electrons energy distributions as function of magnetic latitude in polar ionosphere obtained by Explorer 31 satellite observation

14 p2512 A69-28963

Ionospheric effect sudden commencement parameters of magnetic storm related to distance from origin in polar regions

14 p2435 A69-29051

Ionized gas height scale changes in polar ionosphere obtained, assuming Chapman type ionization distribution

14 p2436 A69-29052

Correlation function of auroral reflection radio signals with allowance for polar ionospheric scattering and pulse signal transmission and reception

14 p2436 A69-29055

Polar auroral region displacement ascribed to distant magnetic field disturbances, proposing calculation method

14 p2436 A69-29059

Horizontal electric fields relations to charged particle fluxes in polar auroral ionosphere

14 p2437 A69-29070

Polar aurora rays mean length diurnal variations determined from photographic and visual observations in Tiksi bay

14 p2437 A69-29077

September 14, 1966 magnetic storm observation by Explorer 33 in geomagnetic tail and by polar stations, studying relation in magnetosphere and on earth

14 p2438 A69-29078

Sporadic electron flux contribution to high latitude geomagnetic disturbances at outer radiation belt boundary estimated from Elektron 1 and 2 observations

14 p2438 A69-29079

Polar aurora spectroscopic studies, discussing main spectral features, influence of observation time and location, analysis methods, etc

14 p2518 A69-29100

Magnetic field variations in magnetosphere and interplanetary space correlated with polar magnetic disturbances from dynamic morphology data

14 p2441 A69-29387

Solar corona magnetic field and polar rays, emphasizing field topology and local magnetic structure

14 p2525 A69-29718

Polar auroras temporal and spatial variations and relation to solar activity

14 p2442 A69-29719

Ozone concentration changes in polar regions and tropical zone due to meridional atmospheric circulation

14 p2442 A69-29830

Auroral displays observed in combined field of view of polar all sky camera networks, considering simultaneous geomagnetic disturbances over Alaska

15 p2595 A69-30215

Polar exosphere near solar maximum investigation by Explorer 19 and Explorer 24 drag satellites, considering density and atomic oxygen concentration measurements

15 p2600 A69-31351

Nighttime, twilight and daytime rocket experiments for ion composition of polar ionosphere at 100-180 km

15 p2604 A69-31414

Temperature measurements of neutral polar atmosphere at 120-170 km using artificial Na clouds

15 p2606 A69-31448

Solar protons nonuniformity over polar caps observed by OGO 2 ionization chamber during 24 March 1966 solar proton events

16 p2848 A69-31967

Electron fluxes energy spectra determined from simultaneous photometric and riometric observations in polar regions

16 p2783 A69-32525

Auroral oval boundary and median line variations with increasing magnetic storm time intensity, noting ring current effect on polar aurora location

16 p2783 A69-32527

Charged particles equations of motion in earth magnetosphere in polar storms, considering auroral zone diurnal variations and electron and proton velocities

16 p2783 A69-32530

Polar substorms resulting from interaction between magnetized plasma stream and geomagnetic field in magnetosphere

16 p2852 A69-32620

Polar ionosphere investigation based on vertical sounding and riometric observations, earth electromagnetic field and polar auroras spectrum intensity variations

17 p2963 A69-33950

Polar auroral zone boundaries from C-180 camera photographs related to magnetic disturbance level, noting evening-morning asymmetry

17 p2963 A69-33951

U shaped polar auroras development, examining relation with magnetic activity and current system configuration in lower ionosphere

17 p2963 A69-33952

Magnetic activity influence on polar auroras height

17 p2963 A69-33953

Polar auroras pulsation attributed to background brightness fluctuations, discussing intensity diurnal variation

17 p2963 A69-33954

Polar auroras appearance at solar activity maximum /IGY/ and minimum /ISQY/ at oval zone latitudes

17 p2963 A69-33955

Ionospheric processes associated with changes in polar aurora height, noting glow in E layer and soft electron emission into earth atmosphere

17 p2964 A69-33957

High latitude geomagnetic field quiet solar diurnal variations during magnetically quiet IGY winter days, relating type and amplitude at low and midlatitudes

17 p2964 A69-33960

Reexamination of polar F region electron density diurnal variation data contradicting King-Kohl theory of rotating neutral winds role

18 p3125 A69-34255

Anomaly of F region electron content vs polar geographic latitude and local mean time

18 p3126 A69-34257

Ion depletion in high latitude exosphere, considering OGO 2 simultaneous observations of positive ion concentration, VLF signal propagation and whistlers

18 p3187 A69-34939

Cosmic ray approach directions computation for high latitude stations, discussing results for low rigidity galactic cosmic rays and solar corpuscular events detection

18 p3187 A69-34940

Hydrogen bulge above springtime pole indicated by Lyman alpha radiation in earth geocorona, discussing

hydrogen horizontal transport and hydrogen compounds dissociation as causes

18 p3129 A69-34956

Ionospheric electric current systems dynamics in polar latitude in relation to 1966 geomagnetic storms

18 p3130 A69-35188

Earth ellipsoid determination by satellite observations, noting accuracy of polar flattening measurement on basis of perturbation or perigee argument

18 p3131 A69-35195

Jupiter swingby flight mode application to probe missions requiring solar polar regions overflight at close perihelion distances

19 p3401 A69-35915

Plasma density in magnetosphere by measuring geomagnetic pi 2 micropulsations in direction related to polar aurora oval southern boundary, determining period of pi 2 oscillations

19 p3303 A69-36205

Electron density distribution in northern and southern polar regions ionosphere based on 1958 and 1959 observations at high geomagnetic relatively low geographic latitudes

20 p3526 A69-37664

F 2 region critical frequencies obtained during winter at Northern and Southern Hemisphere stations located in auroral and polar zones, correlating changes with ionization

20 p3526 A69-37665

High latitude stations vertical ionograms in absence of ionospheric reflections due to low solar activity periods, discussing interpretation methods

20 p3529 A69-37690

High latitude ionosphere data from Alouette- ISIS program, describing various F, E and D regions parameters

20 p3530 A69-37868

High latitude limit of closed geomagnetic field lines indicated by high latitude electron boundary in outer radiation zone during Alouette satellite energy particle experiment

20 p3531 A69-37875

Equatorial semiaxis of magnetospheric tail at distances between 10 and 80 earth radii for various intensities of polar magnetic disturbances

20 p3532 A69-37959

Three dimensional current systems constructed semiquantitatively for polar magnetic substorms based on magnetic field distribution on earth surface

20 p3533 A69-38085

Mass spectrometric investigation of thermosphere at high latitudes, measuring number densities for nitrogen, Ar and molecular and atomic oxygen

20 p3533 A69-38086

Atmospheric gravity waves amplitude generated in equatorial electrojets and polar regions

20 p3593 A69-38107

Circulation near turbopause effect on lower thermosphere composition changes, noting heat source for warmth over winter polar region

21 p3704 A69-38366

Polar upper atmospheric phenomena interpreted as magnetospheric substorm manifestations, discussing role of asymmetric ring current formation

21 p3710 A69-38504

Low energy plasma escape flow from polar region /polar wind/, examining H, He and O ions participation in expansion

21 p3713 A69-38528

Cosmic ray proton cut-off increase at high latitudes during magnetospheric substorms, using balloon time observations of nuclear gamma ray flux

22 p4005 A69-40509

Daily variation of trajectory derived high latitude vertical cut-off rigidities in magnetospheric model consistent with proton and electron experiments

22 p4005 A69-40513

Spectral characteristics of structured areas of luminosity in polar cap region, reporting spatial and time variations plotted from NASA airborne survey

22 p3940 A69-40522

Ionospheric perturbations generation by time variable alternating electrical currents at polar latitudes, constructing radiation patterns for gravitational waves

23 p4155 A69-41842

Anomalies of isotropic cosmic ray secular variations at high latitudes based on superimposed neutron data

23 p4206 A69-41854

Geomagnetic ring current effect on position of auroral absorption zone in northern polar region, noting storm time part of disturbance

23 p4157 A69-41859

Concurrent geomagnetic micropulsations at equatorial and high latitude stations, discussing magnetospheric sources of Pi and Pc types
23 p4161 A69-42439

Equator-to-pole temperature gradient relation with planetary pressure belts, comparing observational data with theoretical circulation criterion
24 p4345 A69-43149

Solar protons delayed access into polar regions during 2 November 1967 solar particle event, discussing north-south asymmetry
24 p4368 A69-43183

POLARIMETERS

Partially polarized light and polarization degree measured by photoelectric polarimeter, obtaining scattering indicatrices and polarization degree dependences
01 p0075 A69-11190

Photometric-polarimetric observations of planetary surfaces, discussing geological environment interpretation and spacecraft reconnaissance system mission planning
03 p0421 A69-13394

Airborne polarimeter to measure Stokes parameters of linearly polarized visible atmospheric radiation in four narrow spectral regions
06 p0923 A69-16924

Photoelectric polarimeter to record sky light intensity in form of polarized components, detailing construction and operation
12 p2078 A69-25892

Electronic nonimaging polarimeter/photometer for aircraft observations of pure red pine stand, suggesting application to terrestrial, airborne and satellite remote sensing
12 p2096 A69-26983

Two channel polarimeter capable of eliminating atmospheric scintillation effects used for observation of magnetic stars and eclipsing binary U Herculis
13 p2347 A69-27713

Balloon for in situ measurements of atmospheric optical parameters using two axis sun pointer, spectropolarimeter and airborne telemetry
15 p2615 A69-31288

Solar radio bursts polarization measured with microwave correlation polarimeter, noting output recording rate
18 p3188 A69-35213

Polarimeter using 45 degree Bragg angle reflection applied to rocket payload design for determining polarization of celestial sources X rays
23 p4207 A69-42382

POLARIMETRY

Late type variable stars time dependent photometry and polarimetry in blue and violet, noting correlation for stellar brightness and degree of polarization
01 p0158 A69-11326

Instrumental Stokes vector calculating method involving light flow transformation matrix elements determination
04 p0601 A69-15248

Transistorized electrophotometer for polarimetric and photometric analysis of weak light fluxes, noting pulse amplifying and shaping circuits
11 p1884 A69-24735

Photometric and polarimetric properties of Mars, discussing powder covering, chemical composition and particle size of bright and dark areas and blue haze
12 p2171 A69-27145

Polarimetric observations of polarization percentage and position angle changes in T Tauri stars, confirming stellar polarization association with emission spectra
15 p2694 A69-30882

Balloon-borne UV polarimetry of stars and planets, studying linear polarization between 2000 and 3000 Å
15 p2616 A69-31380

Mars surface and atmospheric properties from polarization degree measurements, discussing optical properties of soil and detection of veils, mists and clouds
16 p2854 A69-31655

Martian surface and atmosphere interpretation through polarimetric and photometric simulation
20 p3614 A69-38253

POLARIS MISSILES

Polaris and Poseidon nuclear missile systems, considering efficiency and launching depth from nuclear submarine
19 p3432 A69-36687

POLARISCOPES

Isoclines determination from fringe patterns, obtaining continuous principal stress direction data for photoelastic model in bonded polariscope
24 p4396 A69-42738

POLARITY

Geomagnetic response asymmetry related to solar direction of polarity in interplanetary magnetic field
01 p0077 A69-11236

Myocardial repolarization changes in healthy persons with restricted motor activity
07 p1066 A69-18984

Indium antimonide crystals polarity effect on photoeffect, analyzing quantum yields and energy spectrum
15 p2667 A69-30076

Interplanetary and photospheric magnetic fields polarities observed by Mariner 4 and with solar magnetograph, noting noncorrelated data along latitudinal strip
18 p3205 A69-35399

Reversal rate of earth magnetic field deduced from observed and theoretical polarity interval length using hydraulic transmission line theory
19 p3304 A69-36869

Myocardial repolarization changes in healthy persons with restricted motor activity
20 p3480 A69-38232

POLARIZATION

Labyrinth polarization effect on stimulation and neuron activity in visual cortex of cats, using electroencephalograph
20 p3469 A69-37244

POLARIZATION [CHARGE SEPARATION]

NT DIELECTRIC POLARIZATION

NT ELECTROLYTIC POLARIZATION

Nonreciprocal tunable yttrium-iron garnet microstrip filter design through generation of circularly polarized field
01 p0041 A69-10202

Statistical analysis of polarization of semiinfinite electron/ion plasma bounded by dielectric or conducting solid wall, deriving steady state and space potential
02 p0286 A69-11706

Shock wave produced polarization effects in dielectrics, noting reflected shock waves and experimental results for polymethyl methacrylate and carbon tetrachloride
04 p0589 A69-14988

Tunnel diode univibrator, noting polarization influence on recovery time and pulse length stabilization dependence on resistive load
04 p0578 A69-15069

Electrical polarization effect on electroluminescence brightness waves in zinc sulfide films
05 p0807 A69-16213

Polarization effect on electroluminescent properties of zinc sulfide films
05 p0807 A69-16214

Repolarization processes in barium titanate single crystals by variable sinusoidal voltage pulses
05 p0808 A69-16215

Passive current maxima during anodic polarization of stainless steel in sulfuric acid, using electrochemical and electron microprobes
06 p0944 A69-17853

Thermodynamics and polarization of zinc electrode in alkaline media, discussing anodic dissolution and passivation
08 p1268 A69-21048

Microstructural analysis, determining junction orientation polarity effect on draw junction structure in GaSb crystals at room temperature
10 p1745 A69-23330

Plasma jets tangential injection into toroidal magnetic field, discussing polarization interaction and depolarization effect
13 p2311 A69-28108

Two center Coulomb integrals expressed in terms of center separation, noting applications to molecular calculations
14 p2471 A69-29926

Structure of solitary waves propagating in collisionless plasma perpendicular to magnetic field, considering soliton wavefronts charge separation and relativistic velocity
17 p2922 A69-33696

Polarizable ions effect on glass fibers strength retention, noting fatigue tests for hydrolytic stress corrosion
20 p3567 A69-37769

Repolarization processes in barium titanate single crystals by variable sinusoidal voltage pulses
20 p3584 A69-37785

Corrosion kinetics in metals using electrochemistry, stressing polarization techniques
21 p3749 A69-39494

Radio pulse emission from ionized disk of cosmic ray extensive air showers, noting importance of charge

separation in geomagnetic field and selective positron absorption
21 p3792 A69-39614

Spontaneous polarization onset in perovskite ferroelectrics, analyzing influence of Curie point, Jahn-Teller effect and atomic structure
22 p3995 A69-41159

Dielectric polarization of barium titanate and barium strontium titanate in pulsed fields in paraelectric phase, analyzing coefficient B in free energy function and equilibrium state
22 p3996 A69-41165

Moving plasma partial capture in transverse magnetic field in experimental plasma source, noting influence of repulsion effect of plasma polarization volume charge
24 p4357 A69-43469

POLARIZATION [SPIN ALIGNMENT]

Asymmetry of polarized protons scattered from He 4 at 540 Mev for laboratory angles between 4 and 42 degrees
04 p0632 A69-14966

Optical pumping at high temperatures using spin exchange signals for RF spectroscopy
07 p1148 A69-18893

Orientation of diamagnetic ground state Pb 207 atoms with nonzero orbital angular momentum by means of optical pumping and determination of nuclear moment
07 p1156 A69-19399

Relation between electron spin-spin interactions and polarization and relaxation of ruby nuclei at He temperatures
08 p1372 A69-20541

Planar ribbon winding for buildup control of material near polar openings of filament wound vessels, discussing ribbon width and density
09 p1507 A69-22328

Atomic and molecular spins dynamic orientation in anisotropic radiation field, examining medium properties and astrophysical consequences
13 p2350 A69-27861

Differential cross section and polarization measurements for elastic scattering of high energy protons from light nuclei
24 p4352 A69-43125

Many body perturbation theory with time dependent perturbations applied to frequency dependent polarizability of atomic oxygen
24 p4354 A69-43816

POLARIZATION [WAVES]

NT CIRCULAR POLARIZATION

NT ELLIPTICAL POLARIZATION

NT OPTICAL POLARIZATION

Faraday angle of rotation of radio signals polarization plane from satellites and celestial bodies
01 p0030 A69-10574

Analytical expressions for transfer function matrices of four terminal signal shaping networks, assuming rational matrix spectral density of randomly polarized signal
01 p0031 A69-10880

Normally incident linearly polarized electromagnetic wave reflection and transmission by semiinfinite longitudinally drifting magnetoplasma in static magnetic field
01 p0134 A69-11290

Quantum theory of electrical birefringence of noninteracting diamagnetic molecules /Kerr effect/ subjected to static electric field and polarized plane wave
02 p0279 A69-11538

Polarization rotation and phase delay effects as function of frequency for ionospherically propagated HF signals
02 p0208 A69-12331

Alfven wave propagation designations in terms of polarization and propagation velocity, resolving contradictory aspects
02 p0290 A69-12400

Linear polarization measurements of variable radio sources
02 p0325 A69-12592

Linear polarization measurements at 2.07 cm for 29 radio sources
02 p0326 A69-12705

Transverse magnetic field influence on power and polarization of helium-neon laser emission
02 p0260 A69-12844

Scattering matrices of complex configuration specified by cross polarized radar cross sections based on Green function, noting wire loop and wedge scatterers
03 p0384 A69-12904

Optical narrow bandpass filter designed for precision solar corona observations, utilizing interferential polarization and thermo-optical compensation
03 p0506 A69-13085

Polarization diversity analysis to avoid fading in microwave scatter links in D and E layers
03 p0394 A69-13378

Light polarization of night sky components scattered by troposphere
04 p0595 A69-15247

Extensive air shower radio pulse polarization, using log periodic EW- and NS-arm antennas
04 p0595 A69-15425

Resonance rotation of polarization plane in circular waveguide with ferrite resonator
05 p0718 A69-15640

Polarization-albedo relationship for selected lunar maria, highlands and mountains in five passbands suggest optical path length function of effective refractive index and particle size
05 p0829 A69-16663

Multimode direction tracking with polarization tracker used simultaneously, analyzing cross coupling and conical horn/reflector antenna
06 p0888 A69-17652

Output polarization rotation sensitivity to axial magnetic field varied by variable angle quartz flat inside He-Ne laser resonator
07 p1198 A69-18646

Polarization of ionospherically propagated HF radio waves for various times, frequencies and path azimuths applied to distortion in radio communication
07 p1078 A69-18916

Radiation resistance of short dipole immersed in cold magnetoionic medium, using polarized wave modes
07 p1107 A69-19226

Radioelectric axis deviation of radome in front of monopulse radar antenna
07 p1111 A69-19524

Phase velocities and polarizations of linear waves in infinite uniform high beta plasma
08 p1359 A69-19986

Log periodic antenna with vertically polarized omnidirectional radiation constant over bandwidth
08 p1281 A69-20033

Radar scattering cross section of finite perfectly conducting wedge for case of illumination by polarized plane wave
08 p1274 A69-20047

Radio observations of gamma Cygni source in Cygnus X complex showing nonthermal nature of source, noting weak but significant polarization
08 p1387 A69-20090

Plasma flow motion and polarizing interaction in multipole magnetic field
08 p1370 A69-21015

Longitudinal polarization behind front of plasma flow interacting with transverse magnetic field, showing electric potential and magnetic field exhibit structural fluctuations
08 p1370 A69-21018

Ion-acoustic wave excitation in plasma layer affected by incident p-polarized magnetic wave, deriving expressions for reflection, transmission and energy absorption coefficients
08 p1370 A69-21025

Polarization changes of R Coronae Borealis Star RY Sagittarii, tabulating percentage polarization and position angles
09 p1603 A69-22265

Level degeneracy effect on nonlinear interactions between traveling waves of different planes of polarization
10 p1705 A69-23815

Perturbation theory applied to emitting density matrix in nonlinear polarization of resonance media, considering gas laser in coaxial magnetic field
11 p1895 A69-24630

Polarized Hartree-Fock model computing photoionization cross sections for Li isoelectronic sequence, listing phase shifts for partial waves of scattered electrons
11 p1922 A69-25260

System switch, separating RF bands according to frequency and polarization for simultaneous transmission from parabolic horn antenna
11 p1854 A69-25618

Analytical expressions for transfer function matrices of four terminal signal shaping networks, assuming rational matrix spectral density of randomly polarized signal
12 p2031 A69-26644

Reflection coefficient of polarized radio waves at ionized meteoric trails obtained by numerical integration of differential equations
12 p2031 A69-26691

Chromospheric heating and polarization in late stars, considering association with Ca II K line emission cores
13 p2340 A69-27579

Optical narrow bandpass filter designed for precision solar corona observations utilizing interferential polarization and thermo-optical compensation
14 p2515 A69-28767

Polarization diversity analysis to avoid fading in microwave scatter links in D and E layers
14 p2410 A69-28829

Plane wave reflection and transmission by unidirectionally conducting screen, considering oblique incidence and two polarizations
14 p2421 A69-29547

Inhomogeneities effect on polarization of radio waves reflected from ionosphere, based on permittivity tensor
14 p2417 A69-29862

Faraday angle of rotation of radio signals polarization plane from satellites and celestial bodies
15 p2568 A69-30744

Regulating setup for controlling AC voltage surrounding polarization of magnetic electrode in plasma
15 p2664 A69-31094

Lunar radio emission linear polarization radial dependence at 0.8-cm wavelength using radio telescope, determining dielectric constant of emitting layer
15 p2697 A69-31251

VLF and particle rocket experiment for group delay time between rocket and ground, discussing wave polarization and energy flows meaning
15 p2571 A69-31424

Temporal damping rate for small amplitude linearly polarized TEM mode in plasma, using Landau equation
16 p2818 A69-31675

Resonance rotation of polarization plane in circular waveguide with ferrite resonator
16 p2762 A69-32498

Active admittance, realized gain and linear polarization degradation vs scan angle for infinite periodic phased arrays of circular apertures
20 p3507 A69-37844

Multimode He-Ne laser radiation polarization modulation as function of magnetic field, cavity anisotropy and frequency, using Macaluso-Corbino effect
21 p3739 A69-39447

Electron collisions effect on polarization of waves reflected from ionosphere
22 p3941 A69-40922

Fluctuations of polarization induced fading periods in short wave transmissions of Soviet earth satellites, showing relation to ionospheric inhomogeneities
22 p3942 A69-41095

Radiation characteristics of dipole on wedge edge with sinusoidal current, discussing spatial phase and polarization calculations by computer
23 p4138 A69-41937

POLARIZATION CHARACTERISTICS

Dynamic polarizability at imaginary frequencies, deriving upper and lower variational bounds with functionals containing trial functions
01 p0122 A69-10284

Low polarization error HF loop antenna array direction finder performance tests, comparing measured bearings with polarimeter and conventional crossed loops data
01 p0048 A69-11006

Solar corona electron density, polarization, temperature and monochromatic emission during November 1966 eclipse
02 p0310 A69-11457

Electromagnetic field interaction with polarizable elastic medium in gravitation theory resolves definition of electromagnetic energy in matter
02 p0279 A69-11537

Statistical analysis of polarization of two component nonisothermal electron-ion Coulomb gas plasma containing microfluctuations
02 p0286 A69-11707

Rocket released probe orientation determination from polarization measurements on telemetry signal
02 p0207 A69-11813

Polarization stability improvement of helical beam antenna by increased turns, smaller pitch angle and decreased transverse electromagnetic mode amplitude
02 p0219 A69-12345

Linear polarization measurements of variable radio sources
02 p0325 A69-12592

Unsteady phenomena during light pulses interaction in media with polarization, considering group delay, dispersion spreading and space-time analogy
02 p0259 A69-12646

Polarized orbital method for calculating electron-atom scattering amplitudes, noting discontinuous wave function, nonvariational technique and strong dependence on parameter
02 p0284 A69-12702

Linear polarization measurements at 2.07 cm for 29 radio sources
02 p0326 A69-12705

Light wave propagation in gyrotropic crystals, examining laser frequency shift circularly polarized by modulating field
03 p0436 A69-13037

Second order frequency dependent polarizabilities calculated by double perturbation theory
03 p0472 A69-13314

Double perturbation theory, deriving interchange theorem for polarizabilities at complex valued frequencies and formulation without assumption of existence of unperturbed Hamiltonian
03 p0472 A69-13315

Microwave solar burst data, analyzing flux intensity and polarization distributions
04 p0652 A69-14417

Lunar surface IR polarization measurements compared to visible and UV polarization
04 p0656 A69-14669

Polarization enhancements in solar microwave radiation, noting correlation with other solar events and geophysical effects
05 p0813 A69-15761

Mean number of polarization coefficient modulus zero crossings for field reduced at reception point to uncorrelated orthogonally polarized components
05 p0720 A69-16445

Domain structure of barium titanate single crystals during polarization reversal by sinusoidal AC field
06 p0981 A69-17893

Nonlinear interaction effects on frequency and polarization characteristics of dual polarization gas laser, discussing weak cavity anisotropies
07 p1145 A69-18473

Nonpolarized single frequency gas laser radiation produced by interferential effects in complex resonator
07 p1149 A69-18936

Linear polarized emission from pulsar CP 0328 dependent on frequency, discussing model for source with constant Faraday rotation
08 p1382 A69-19817

Validity of formula for oscillation frequency of nearly sinusoidal tunnel diode oscillator extended to operation in nonsinusoidal regime
08 p1279 A69-19924

Computer aided design program for testing equivalent circuits of bipolar transistors in static regime under various polarization conditions
08 p1280 A69-19972

Distributed type bipolar transistor model construction, considering methods of development and computer tests for transient conditions
08 p1280 A69-19976

Geometric optics and polarization properties of spherical reflector for integral representation of focal region fields, discussing stationary phase and field points
08 p1272 A69-20017

Lower ionosphere and earth-ionosphere waveguide effects on polarization characteristics of transmitted radio whistlers
08 p1306 A69-20181

Interferometric measurement of polarization distributions in Crab Nebula and 3C 315 radio sources by Fourier synthesis, discussing complex brightness
08 p1390 A69-20389

Spherical harmonic analysis of Stokes parameters for polarization of stars, discussing magnetic field of Galaxy
08 p1390 A69-20390

Lunar radio emission polarization characteristics, considering knife-edge type radiation pattern effect of antenna array
08 p1391 A69-20423

Focal antennas and receivers of Nancy radio telescope to measure flux density and incoming waves polarization, noting circular polarization in quasars
08 p1392 A69-20567

Polarization variations in radio pulses from pulsar CP 0328, noting possible origin in synchrotron radiation from collimated electron beam
08 p1397 A69-20694

Microwave absorption by free carriers in c domain barium titanate crystals inserted in waveguide during polarization reversal
08 p1374 A69-21189

Vela pulsar polarization and periodicity observations supporting rotational model vs radial pulsations as radio emission source
09 p1592 A69-21461

Lower ionosphere effect on LF electromagnetic disturbances, comparing propagation and damping of clockwise and counterclockwise polarized waves
09 p1487 A69-21637

Polarization changes of R Coronae Borealis Star RY Sagittarii, tabulating percentage polarization and position angles
09 p1603 A69-22265

Quadrupole splitting of Na 23 nuclear magnetic resonance /NMR/ to investigate spontaneous polarization, coercive field and domain characteristics in Rochelle salt ferroelectric phase
09 p1559 A69-22283

Book on thermodynamics of charged and polarized layers covering matter in electric fields, general framework theory, applications, etc
10 p1724 A69-23159

Polarization to extinction ratio criterion to choose interstellar cloud model, discussing magnetic field strength requirements
10 p1781 A69-23673

Spectroscopic, photometric and polarimetric observations of magnetic stars, discussing magnetic curves of periodic variables
11 p1954 A69-24362

Solar radio bursts observations with multielement compound interferometers, noting polarization distribution and magnetic field change
11 p1946 A69-24428

Radar transmitter and receiver antennas polarization parameters selection for obtaining maximum SNR at reception point
11 p1833 A69-24442

Hydrogen peroxide electrode cathodic polarization studied for liquid oxidant use in methanol fuel cells
11 p1825 A69-24523

Polarization effects of scattered coherent light on laser imagery, determining surface roughness and angle of incidence effects photographically on basis of Fung theory
11 p1896 A69-24849

Calcite crystals stability anisotropy to ruby laser radiation, studying threshold power as function of beam polarization
11 p1900 A69-25553

Microstructure of pc 3 and pc 4 geomagnetic pulsations, investigating polarization direction, period duration and latitude dependence
12 p2063 A69-25782

Atmospheric optics by spacecraft and high altitude probes concerning ozone and aerosol distributions, scattering indicatrix polarization and dust cloud inhomogeneities
12 p2055 A69-25815

Virtual power principles applied to solving force acting on fluid consisting of colloidal suspension of polarized particles in neutral vehicle
12 p2136 A69-26404

Surface waves effect on electromagnetic waves incoherent reflection from plasma-vacuum boundary, describing polarization and angular and spectral distributions
12 p2031 A69-26530

Laser active media polarization in strong electromagnetic fields, solving boundary value problems
12 p2110 A69-26907

Two photon and resonance parametric lasers nonlinear polarization theory, deriving equations for electromagnetic field oscillations
12 p2110 A69-26910

Polarization and structure of magnetic fields of quasars, E galaxies, normal galaxies and other extragalactic radio sources
12 p2165 A69-27034

Alloying effect on surface oxides determined from photoelectric polarization measurements for Ti-Nb and Ti-Ni
13 p2275 A69-27292

Jupiter polarization wavelength dependence noted in observations of 5 seconds diameter regions near poles and equator related to Rayleigh-Chandrasekhar molecular scattering theory
13 p2348 A69-27805

Polarization stabilization times dependence on risetime of external field pulse leading edge for semiconductor crystal, determining field concentration
13 p2317 A69-27880

Core polarization effects in inelastic scattering cross sections for several nuclei in 2s-1d shell, using Hartree-Fock wave functions and Born approximation
14 p2487 A69-29007

Coherence-polarization in remote sensing by microwave and laser means, analyzing scattering functions of rough surfaces
14 p2448 A69-29532

Linear polarization achieved in He-Ne laser by applying external transverse magnetic field to plasma discharge
14 p2459 A69-29569

Polarization characteristics of quasars, radio galaxies and galactic objects suggesting separate evolutionary processes
14 p2526 A69-29771

Polarimetric observations of polarization percentage and position angle changes in T Tauri stars, confirming stellar polarization association with emission spectra
15 p2694 A69-30882

Thermal radiation polarization in anisotropic and gyrotropic media described by Hermitian permittivity tensor, noting linearity
15 p2653 A69-30940

Wavelength dependence of linear polarization of sunlight scattered by Venus, noting temporal variations in UV
16 p2860 A69-32236

Amplitude distribution and correlation functions of signals reflected from precipitations at various polarizations of waves emitted and received
16 p2807 A69-32269

Depolarization degree of angel echo signals measured by radar station, indicating insects and other foreign particles in atmosphere as reflection sources
16 p2779 A69-32274

Polarization characteristics of electromagnetic waves obliquely reflected from inhomogeneous isotropic plane stratified plasma
16 p2752 A69-32391

Mean number of polarization coefficient modulus zero crossings for field reduced at reception point to uncorrelated orthogonally polarized components
16 p2753 A69-32478

Polarization, frequency and energy characteristics of lasers with resonators containing polarization transforming elements
17 p2983 A69-33967

Antarctic VLF emissions polarization and direction determination, using combination of antennas with planes lying in geomagnetic E-W and N-S directions
18 p3102 A69-34965

Microwave absorption by free carriers in c domain barium titanate crystals inserted in waveguide during polarization reversal
18 p3183 A69-35158

Solar disk edge polarization rate determined by applying Feautrier method to transfer equations for polarized radiation
19 p3427 A69-36728

Solar corona photographic study during 1961 total eclipse using quadruple camera, providing intensities, amount and direction of polarization
22 p4001 A69-40001

Linearly polarized electromagnetic wave diffraction during oblique incidence on crossed strip arrays, describing crossing angle effects on reflection, transmission and polarization conversion coefficients
23 p4124 A69-42030

Polarization characteristics of He-Ne ring laser emission with circularly anisotropic resonator, analyzing ellipticity as function of half wave cavity plate
24 p4328 A69-43160

POLARIZATION CHARTS
U GRAPHS [CHARTS]

POLARIZED ELASTIC WAVES

Forced recombination scattering of light on Rayleigh polarization waves in isotropic solid body with small elastooptical constants
21 p3770 A69-38963

POLARIZED ELECTROMAGNETIC RADIATION
NT SYNCHROTRON RADIATION

Linear polarization measurements at 2.07 cm for 29 radio sources
02 p0326 A69-12705

Electron concentration in lower ionosphere based on measurement of Faraday rotation of polarization plane of radio waves scattered by meteor trail
03 p0423 A69-13535

Strain effects on transverse electromagnetic modes of anisotropic dielectric waveguides at p-n junctions
03 p0406 A69-13830

Radiation properties of spherical phased array of 16 flat spiral antennas and radiation field polarization characteristics
04 p0573 A69-14331

Nonlinear damping of circularly polarized electromagnetic wave propagating in plasma along magnetic field, noting particle motion in resonance region
04 p0558 A69-14982

Polarization degree of type solar radio bursts dependent on heliographic longitude
04 p0649 A69-15242

Polarization enhancements in solar microwave radiation, noting correlation with other solar events and geophysical effects
05 p0813 A69-15761

Mean number of polarization coefficient modulus zero crossings for field reduced at reception point to uncorrelated orthogonally polarized components
05 p0720 A69-16445

Polarization tensor variation due to Faraday effect and differential absorption of ordinary and extraordinary waves for radiation propagating in magnetoactive cosmic plasma
05 p0805 A69-16650

Ion-cyclotron instabilities in hot-ion cold-electron plasma resulting from left-hand circularly polarized wave propagating parallel to magnetic field
06 p0969 A69-17951

Polarization of ionospherically propagated HF radio waves for various times, frequencies and path azimuths applied to distortion in radio communication
07 p1078 A69-18916

Electromagnetic multipole left- and right-hand circularly polarized modal fields for multiarm log spiral antennas, discussing current distributions, multipole coefficients and field patterns
08 p1281 A69-20018

Plane H polarized electromagnetic wave diffraction incident on array of rectangular rods described by linear algebraic equations
08 p1275 A69-20433

Orbiter and rotator models of pulsating radio sources, considering relationship between lack of Faraday rotation and similar polarization in decametric radiation from Jupiter
08 p1397 A69-20688

Electromagnetic microinstabilities of plasmas associated with transverse waves propagating perpendicular to external uniform magnetic induction, noting allowable frequencies
08 p1368 A69-20804

Passive electromagnetic circuit elements for laser light control such as circulators, isolators and phase shifters, discussing coherent light and polarization
09 p1518 A69-22127

Optimal receiving circuit determined for elliptically polarized signals in randomly polarized noise by deriving integral equation
09 p1456 A69-22285

Far IR radiation from water vapor laser, noting monochromaticity and strong linear polarization
10 p1702 A69-23160

Beam displacement at plasma under magnetic field connected with polarized electromagnetic wave reflections
10 p1740 A69-23724

Polarized electromagnetic waves phase shift during total reflection from stratified dielectric region found dependent on transition zone width in addition to permittivity
10 p1657 A69-23862

Polarized brightness distributions of supernova remnants IC 443 and W44 at 6-cm wavelength from observations with 6 minute resolution
10 p1787 A69-24113

Radiation emission by scalar particle in field of two plane linearly polarized electromagnetic waves propagating toward each other
11 p1900 A69-25568

Circular polarization of solar microwave radio emission in Southern and Northern Hemispheres due to solar magnetic field
13 p2326 A69-27550

Linear polarization measurements at 6 cm, determining rotation period associated with Jupiter cm radiation
13 p2343 A69-27623

Electric field distribution in focal region of finite offset paraboloid reflector illuminated by linearly polarized plane wave
13 p2234 A69-28427

Eclipsing close binary stars orbital planes spatial position determined from stellar emission polarization
15 p2688 A69-30560

- Balloon-borne UV polarimetry of stars and planets, studying linear polarization between 2000 and 3000 Å
15 p2616 A69-31380
- Scattering of time harmonic linearly polarized plane electromagnetic wave by uniformly axially moving cylinder, analyzing first order velocity effects
16 p2748 A69-31579
- Polarimetric observations of Be stars, noting dependence and self absorption by hydrogen of polarization produced by electron scattering
16 p2863 A69-32397
- Mean number of polarization coefficient modulus zero crossings for field reduced at reception point to uncorrelated orthogonally polarized components
16 p2753 A69-32478
- Monochromatic linearly polarized electromagnetic beam generator for submillimeter band, discussing applications
17 p2932 A69-34162
- Polarization operator and Green function of photon for propagation of plane electromagnetic waves in constant crossed field, noting refractive indices
18 p3103 A69-35128
- Mathematical relations for ring laser beams polarization conditions, using slanted isotropic plate and phase circulator to separate polarization plane
20 p3553 A69-37606
- Polarized radiation resonance scattering in weak uniform magnetic field, using Monte Carlo method to trace and count photons
20 p3577 A69-38157
- Diffraction of plane polarized electromagnetic wave incident on dielectric wedge formulated as singular integral equation, discussing electric field amplitude
22 p3903 A69-41258
- Linearly polarized electromagnetic wave diffraction during oblique incidence on crossed strip arrays, describing crossing angle effects on reflection, transmission and polarization conversion coefficients
23 p4124 A69-42030
- Plane electromagnetic waves coherence properties, considering linear and arbitrary degree of polarization
24 p4350 A69-42982
- POLARIZED LIGHT**
- Gas laser amplifier nonlinear behavior in axial magnetic fields and operating with two polarized light signals of strong or weak intensities
01 p0088 A69-10010
- Absorption of linearly polarized light in reflecting surface layer of collisionless plasma, calculating layer lifetime for reflection of light
01 p0127 A69-10283
- Light polarization properties in atmosphere noting aerosols effect
01 p0075 A69-11189
- Partially polarized light and polarization degree measured by photoelectric polarimeter, obtaining scattering indicatrices and polarization degree dependences
01 p0075 A69-11190
- Lunar surface composition, hardness, porosity, microstructure and transparency based on polarization of reflected light
04 p0658 A69-14958
- Angle of incidence influence on unpolarized and linear polarized light of solar cell short circuit current
04 p0551 A69-15312
- Poincare sphere representation of polarized light used to predict rotation effect on optical observations in photoelastic shell analysis
04 p0683 A69-15495
- Electric and magnetic fields of narrow coherent polarized light beam in free space, noting longitudinal field components due to beam narrowness
05 p0777 A69-16789
- Airborne polarimeter to measure Stokes parameters of linearly polarized visible atmospheric radiation in four narrow spectral regions
06 p0923 A69-16924
- Dayglow determination from aerosol spectrum obtained through data of brightness and polarization of day sky
07 p1211 A69-18545
- Fluorescent light polarization of neon atoms subjected to gas discharge, static magnetic field and laser beam
[IEEE PAPER T-9]
07 p1155 A69-19084
- Night sky surface brightness and polarization measurements as basis for zodiacal dust cloud particle density distribution normal to ecliptic plane
07 p1222 A69-19588
- Polarized light microscope for application to metallic crystallographic studies noting grain orientation, hcp grain basal pole orientation and etched fcc metals
09 p1499 A69-22302
- Light wave reconstruction including polarization, using single reference beam with depolarizing diffuser as source
10 p1690 A69-22951
- Stimulated emission of trivalent Nd ions in glass base, explaining connection between efficiency and emission polarization by interaction of laser modes with ions
10 p1703 A69-23618
- Interstellar dust distribution ideas to explain observed variability in starlight polarization and similar phenomena
10 p1785 A69-24050
- Airborne Q switched ruby laser for studying upper atmosphere meteoric formations optical characteristics and kinetics against background of underlying surface
12 p2125 A69-25955
- Sky polarization neutral points around sunset /spring-summer 1968/ at Bedford, Mass., inferring continuation and variations of enhanced stratospheric turbidity
12 p2067 A69-26343
- Polarimetric and photometric observations of comet Ikeya-Seki 1965f, plotting isophotes of head and polarized light distribution in tail
15 p2685 A69-30525
- Remote polarized light source photometric observation on background of polarized light scattered horizontally, considering atmosphere optical state effect on laser communications
15 p2649 A69-30655
- Mars surface and atmospheric properties from polarization degree measurements, discussing optical properties of soil and detection of veils, mists and clouds
16 p2854 A69-31655
- Lunar surface characteristics, discussing light polarization, lunar radiation, solar radiation and meteorite impact effects, etc
16 p2856 A69-32069
- Wavelength dependence of polarization of sunlight scattered by Venus atmosphere, including Rayleigh and Mie scattering mechanisms
16 p2860 A69-32237
- Light polarization diffusely reflected by earth atmosphere measured from balloon, using gain compensated photoelectric polarimeter
16 p2781 A69-32320
- Polarization of light from atmospheres of Mira variables, suggesting temperature variations over stellar surface
16 p2866 A69-32820
- Two polarization light interference scattered by moving and fixed atoms, obtaining forward scattered light intensity
17 p3005 A69-33109
- Lunar surface composition, hardness, porosity, microstructure and transparency based on polarization of reflected light
18 p3196 A69-34721
- Photoelastic materials stressed state analysis by inserting analyzer and polarizer into sandwich medium, obtaining polarized light field
18 p3138 A69-35152
- Gamma ray flux from processes associated with high energy electrons from pulsar NP 0532, noting light polarization
20 p3588 A69-37410
- Singular electromagnetic field rectilinear and elliptical polarization in general relativity, calculating light plane rotation in Schwarzschild space
20 p3576 A69-37431
- Polarization fluctuations of starlight indicating turbulent structure of interstellar medium, noting pulsar signal dispersion and Faraday rotation
22 p4030 A69-40771
- Human eye modulation transfer function in reflected light by analyzing depolarized and polarized components emerging from eye
22 p3884 A69-40888
- Mars light polarization observations noting unsatisfactory surface pressure determinations
23 p4212 A69-41615
- POLARIZED RADIATION**
- NT SYNCHROTRON RADIATION**
- Polarization of nightglow, line vs continuum
02 p0235 A69-11428
- Polarized low temperature laser excited Raman spectra of thulium gallium garnet
02 p0256 A69-11925
- OSO-B2 satellite zodiacal light observations at constant 90 degree elongation, measuring polarized component as function of time
02 p0245 A69-12718
- Outer space electromagnetic radiation transfer in turbulent plasma with allowance for polarization effects, describing polarization induced changes in Stokes parameters
03 p0506 A69-13083
- Polarized radio emission from Jupiter, giving hypothesis of radiation belts deformation by solar wind
03 p0512 A69-13703
- Linear polarization of cosmic radio emission measured near galactic anticenter at centimetric wavelengths
03 p0501 A69-13704
- Linear polarization of cosmic radio emission, discussing original measurement method and revised version based on discrimination of useful signal
03 p0501 A69-13705
- Polarization errors in phase type direction finder caused by antenna
04 p0561 A69-15404
- Polarization of diatomic molecular line radiation excited by electron impact
06 p0961 A69-17140
- Airborne S-band telemetry antennas for omnidirectional patterns of polarization component, discussing design, pattern measurements and application
07 p1106 A69-19112
- Electron density measurement in solar flare spray using discrepancy between measured and theoretical polarization
08 p1378 A69-20244
- Polarization and intensity distribution of extended supernova remnant in Centaurus, discussing remnant effect on galactic magnetic field
09 p1598 A69-22184
- Linearly polarized radiation from supernova remnants 3C 10, Taurus A, 3C 358 and Cassiopeia A, determining distributions by synthesizing fan beam
09 p1598 A69-22185
- Green and red coronal line nonpolarization observed during solar eclipses, discussing nonpolarization of red line and observation instrument error
09 p1600 A69-22204
- Photoelectric effects produced by polarized radiation in isotropic optical media, discussing photo EMF and photoconductivity in multivalley semiconductors and plasmas
10 p1701 A69-23138
- Position and polarization of 1720 MHz OH emission from W28, W44 and galactic center, considering unresolved concentrations of shell type nonthermal sources
10 p1776 A69-23220
- Polarization measurements of July 1966 proton flare, considering electron scattering and density
10 p1764 A69-23740
- Polarization observation of star BL Lac continuum by multichannel scanner, noting photoelectric UVB observations and identification with radio source
10 p1785 A69-24090
- Type 3 solar flare circular and linear polarization at 23.5 MHz frequency
11 p1945 A69-24244
- Condensation sources of maser radiation observed in W3 hydroxyl lines, discussing polarization and designation as protostars
11 p1954 A69-24379
- Wavelength dependence of polarization and UVRI photometry of highly polarized stars, correlating IR interstellar extinction with maximum polarization wavelength
12 p2153 A69-25809
- Frequency spectrum, time variations and polarization of source of synchrotron radio emission with expanding components flying apart at relativistic velocities
12 p2155 A69-26207
- Continuous polarized electron beam produced from spin conversion in ionizing reactions involving optically pumped metastable atoms in He discharge
12 p2130 A69-26312
- X ray polarization from Sco X-1, noting spurious instrumental polarization due to cosmic ray anisotropy using X ray polarimeter
12 p2149 A69-26315
- Blue, UV and yellow spectral observations of M 82 /NGC 3034/, obtaining polarization dependence on reciprocal of wavelength, polarization and color characteristics
12 p2169 A69-27057
- Galactic magnetic field along Orion arm from dispersion and rotation measures of linearly polarized radiation from pulsar psr 0833-45
13 p2335 A69-27311

Polarization of continuum background of planetary nebulae in window in visible spectrum from scattering of nucleus star radiation by electron gas
13 p2339 A69-27567

Two channel polarimeter capable of eliminating atmospheric scintillation effects used for observation of magnetic stars and eclipsing binary u Herculis
13 p2347 A69-27713

Gas ring lasers, discussing optimal parameters, colliding waves interference, nonmutual effect and radiation polarization
13 p2272 A69-28175

Vela pulsar PSR 0833-45 optical observations and Crab pulsar NP 0532 linear and circular polarization measurements by telescope- photomultiplier
13 p2354 A69-28470

Outer space electromagnetic radiation transfer in turbulent plasma with allowance for polarization effects, describing polarization induced changes in Stokes parameters
14 p2515 A69-28765

Laser beam discrete deflection method using Wollaston prism and electro-optical switch for changing polarization plane
14 p2459 A69-29391

Nonlinear interactions of linearly polarized carbon dioxide laser signals in sulfur hexafluoride measured as function of angle between polarization planes
14 p2460 A69-29602

Linear polarization of quasars, radio or normal spiral galaxies, galactic objects, etc, observed by Parkes telescope
14 p2526 A69-29770

Activity in Crab Nebula from 200-inch continuum and polarization plates, discussing nature and motion of wisps
15 p2691 A69-30758

Linear polarization in pulsating radio sources observed by galvanometric recordings, using Mark I radio telescope
17 p3036 A69-33635

Radio telescope observations at 11.13 cm for polarized E vector intensities of Saturn and disk temperature of Uranus and Neptune
17 p3039 A69-33731

Polarized emission from Nd activated glass, establishing S and P polarization component energy dependence on pumping energy
17 p2984 A69-33974

Irregularities distribution in antarctic ionosphere from polarization angle fluctuations of satellite S-66 radio signals, discussing diurnal magnetic and solar cycle effects
18 p3125 A69-34249

Extragalactic radiation depolarization through Milky Way transit determined from linear polarization and flux density measurements of discrete radio sources at 21.2 cm
18 p3190 A69-34287

Venus brightness and polarization distributions measurement at centimeter wavelengths using two element interferometer, suggesting Venus atmosphere as main source of radiation
18 p3191 A69-34302

Periodic fading in 42 MHz auroral backscatter by high speed polarization measurements, discussing scatter bursts and pulsating primary electron flux relationship
18 p3102 A69-34950

Solar radio bursts polarization measured with microwave correlation polarimeter, noting output recording rate
18 p3188 A69-35213

Pulsar PSR 0833-45 polarization structure frequency dependence measurement leading to model implying radiation emanated from magnetic poles neighborhood
18 p3202 A69-35215

Solar disk edge polarization rate determined by applying Feautrier method to transfer equations for polarized radiation
19 p3427 A69-36728

Modified geometrical diffraction theory applied to determination of vertically polarized radar backscattering from rear of cylinders and frustums
20 p3495 A69-37851

Linear and circular integrated polarization of extragalactic radio sources measured by two element interferometer at Owens Valley Radio Observatory
20 p3610 A69-38139

Polarization effect on diffusion equations of radiative transfer, noting anisotropy in Rayleigh scattering
21 p3847 A69-38473

Extragalactic radio sources linear polarized radiation distribution at 1418 MHz indicating ordered magnetic fields often oriented differently
22 p4015 A69-40155

Polarization measurement of slowly varying component of sun by pencil-beam antenna at 8.6 mm, analyzing data by magnetoionic theory
22 p4027 A69-40660

Pulsar magnetic models, coherent radio emission mechanisms, radiation polarization, data summary and astrophysical nature
22 p4030 A69-40905

Far IR gas laser with linearly polarized radiation output obtained by using echelette reflection grating in place of end mirror
23 p4172 A69-41400

Radiation scattering by thick planetary atmosphere according to Rayleigh law, considering luminance variation and absorption ray polarization
23 p4213 A69-41698

Plane polarized electromagnetic wave diffraction incident on skewed metal ribbons array
23 p4125 A69-42043

Ground antenna array for ionospheric physics experiments, consisting of wire dipoles connected to receive circular or linear polarization
24 p4286 A69-42607

Anisotropic carrier distribution effect on polarization of spontaneous recombination radiation during GaAs breakdown in electric field
24 p4362 A69-43736

Diagonal tunneling and radiation polarization in doped heterojunctions and p-n junctions of GaAs, using electroluminescence spectrum analysis
24 p4362 A69-43737

Condensation sources of maser radiation observed in W3 hydroxyl lines, discussing polarization and designation as protostars
24 p4389 A69-43769

POLARIZERS
Glan-Thompson and Rochon prisms modified by replacing one of two calcite halves of cemented oriented birefringent crystals with glass
02 p0280 A69-11924

Wideband device for rotating polarization plane of waves in waveguide between antennas, receivers and transmitters without affecting field linearity
09 p1469 A69-22643

Ellipsometric dimensions calculations with aid of laser radiation, stressing formulas for compensator and polarizer assemblies
15 p2636 A69-31474

Lummer-Gehrcke plate type polarizer made of birefringent material for Nd glass laser, discussing reflection coefficients in quartz crystals
21 p3739 A69-39541

POLAROGRAPHS
U POLAROGRAPHY

POLAROGRAPHY
Analytical determination of traces of metals caused by wear in aircraft liquid fuels, hydraulic fluids and lubricants, noting polarography and coulometry
03 p0435 A69-14101

POLARONS
Hall effect in semiconductors with polarons as majority carriers, noting variation with temperature of magnetic field dependence on Lorentz force
03 p0484 A69-13281

Hall effect in semiconductors with polarons as majority carriers, noting variation with temperature of magnetic field dependence on Lorentz force
14 p2508 A69-29654

Polarons large to nearly small transitions, studying ground state mass dependence on bare electron mass, electron-phonon interactions model, superconducting strontium titanate, etc
20 p3583 A69-37280

POLES
Earth polar wanderings attributed to rotation axis angular displacements generated by density redistribution on geologic time scale
20 p3535 A69-38192

North Pole trajectories and geomagnetic fields assuming motion of earth mantle and interior
22 p3942 A69-41120

POLICIES
Federal Government policies analysis, discussing disadvantages of planning-programming-budgeting system /PPBS/
10 p1811 A69-23353

POLISHED METALS
U METAL POLISHING

POLISHING
U ELECTROPOLISHING
U METAL POLISHING

POLITICS
Federal Government systems politics and budgeting, noting dichotomies, time dependence, taxonomy, etc
10 p1811 A69-23352

POLLUTANTS
U CONTAMINANTS

POLLUTION
NT AIR POLLUTION
Space controlled microbiology, discussing telemetry control of waste material conversion in air and water pollution
[UN PAPER 68-95861] 01 p0014 A69-10456

Fiddler crab absorption of DDT residues from organic detritus in estuaries, discussing DDT residue entrance into diverse food chains
14 p2406 A69-28872

POLONIUM ISOTOPES
Polonium 210 production for radiothermal propulsion via bismuth irradiation in graphite gas power reactor
05 p0791 A69-15594

POLYACRYLATES
U ACRYLIC RESINS

POLYAMIDE RESINS
Dynamic tests of mechanical properties of polyamide Tarlon X-A using free and resonant vibrations methods
09 p1528 A69-21496

Heat resistant polyamides and polyimides for electrical insulation, discussing properties and applications under extreme temperatures and basic reactions
13 p2286 A69-27988

Unlubricated wear characteristics of polyimide resin sliding against carbon steel in air, noting effects of surface temperature, bearing pressure and velocity
[ASLE PREPRINT 69AM 5C-2] 15 p2619 A69-30473

Low endurance fatigue in aluminum, Nylon 66 and epoxy resin compared, considering stress-strain relationships, fatigue damage, failure mechanisms and crack propagation
18 p3155 A69-34633

Nylon wear curves and friction coefficients for steel-on-nylon pairs determined as function of normal load
19 p3329 A69-36495

POLYATOMIC GASES
NT DIATOMIC GASES
Chapman-Enskog method applied to Boltzmann equations for transport coefficients for low density polyatomic gases
01 p0123 A69-10388

Thermodynamics of ideal multiatomic gases in local nonequilibrium, approximating real gas system by ergodic subsystems grouped by degrees of freedom
02 p0350 A69-11552

Dissociation and recombination of moderately complex molecules, using master equation with transition probabilities and decay rates obtained from reaction rates statistical theory
02 p0283 A69-12181

IR radiation heat transfer in polyatomic gases in limit of large path lengths
05 p0844 A69-15579

Kinetic equations for polyatomic gases obtained by extending 13 moment approximation to solve inelastic Boltzmann equation, resulting in 17 moment approximation
08 p1357 A69-20784

Plane wave solutions for acoustic propagation in polyatomic gas by using Sirovich-Thurber method for polyatomic kinetic models
11 p1920 A69-24287

Relaxation time influence on discharge coefficient of sonic nozzle of revolution, considering expanding polyatomic gas problem
19 p3241 A69-36721

Relaxing polyatomic gases transport properties from Boltzmann equations obtained without knowing excitation probabilities of internal molecular degrees of freedom
19 p3300 A69-36787

Relaxation time for rotational transitions of linear polyatomic carbon dioxide calculated by using Brout theory for diatomic H rotational relaxation calculations
20 p3581 A69-38121

Kinetic theory for macroscopic transport phenomena in N-component polyatomic gas mixtures with internal degrees of freedom under nonlocal thermodynamic equilibrium
23 p4238 A69-41435

POLYATOMIC MOLECULES
NT DIATOMIC MOLECULES

NT TRIATOMIC MOLECULES

Inverse population of vibrational levels generation in polyatomic molecules

02 p0259 A69-12647

Radiative decay of polyatomic molecules, applying Green function form for transition probability to decay of manifold of closely spaced coupled levels

14 p2488 A69-29924

POLYBENZIMIDAZOLE

High temperature structural adhesives at temperatures of 350 F and higher including epoxies, polyimides, amide-imides and polybenzimidazoles

15 p2642 A69-30329

Polyimides and polybenzimidazoles mechanical strength, heat resistance, electrical properties, radiation resistance and industrial applications

19 p3358 A69-35901

Low density polybenzimidazole composites as ablative heat shields, discussing arc-heated wind tunnel tests of linear and crosslinked structures

23 p3179 A69-41715

POLYCARBONATES

Welding of thermoplastic polycarbonate films, noting dryness requirement for satisfactory weld strength

06 p0930 A69-17094

Photographic observations of fatigue fracture of heat treated polycarbonate

06 p0946 A69-17205

Polycarbonate surface stiffness increase associated with fatigue induced by repetition of loads

06 p0946 A69-17206

Fatigue fracture due to heat generation in polycarbonate subjected to pulsating tensile load, presenting temperature change per unit stress increase

18 p3163 A69-35498

High speed brittle fracture of polycarbonate resin subjected to static bending in liquid nitrogen determined from crack propagation speed of surface coating

19 p3358 A69-35776

Tension tests of polycarbonate plates grooved at various angles, demonstrating necking dependence on mechanical instability

21 p3753 A69-39809

Polycarbonate and polysulfone thermoplastic bonding of Al and Ti in aircraft structures, discussing peel strength and stress crazing tests

24 p4326 A69-43459

POLYCRYSTALS

Hydrostatic pressure effects on mechanical properties of hot pressed, extruded and rolled polycrystalline beryllium sheet

01 p0092 A69-10059

Repeated elastoplastic deformation of polycrystalline body analyzed by dynamic model

01 p0164 A69-10082

Polycrystalline corundum thermal conductivity coefficients determination, describing measuring procedures at low temperatures

01 p0101 A69-10108

Yield condition of polycrystalline hcp metal, considering slip characteristics of hcp crystals

01 p0094 A69-10304

Strain hardening of alpha titanium studied for effects of grain size, strain rate, temperature and purity

01 p0095 A69-10610

Electrical conductivity of sintered polycrystalline cubic and monoclinic europium sesquioxide from DC current-voltage characteristics obtained in air at various pressures

02 p0296 A69-11874

Pressure and temperature dependence of isotropic elastic moduli of polycrystalline alumina, noting Gruisen parameter, equation of state and Debye temperature

02 p0268 A69-12407

Spontaneous emission of gadolinium ferrite polycrystals, discussing temperature dependence

03 p0487 A69-13731

High temperature physical, mechanical and thermal properties of polycrystalline graphites, relating properties to manufacturing techniques and processing [AIAA PAPER 68-297]

04 p0621 A69-15329

Dynamic measurements of modulus of elasticity for polycrystalline nickel-tungsten alloys at elevated temperatures

06 p0943 A69-17232

Polycrystalline Mg-Th-Zr alloy precipitation hardening investigated by tensile and hardness tests and transmission electron microscopy

07 p1167 A69-19265

Polycrystalline beryllium specimens fabricated from powders, discussing initial powder particle size and distribution effects on microyield strength

07 p1168 A69-19598

Ductile to brittle transition shown in tensile stress-strain curves of polycrystalline body centered cubic and hexagonal close packed materials

10 p1795 A69-23063

Thin polycrystalline film structure and formation, using electron beam instrument

11 p1936 A69-24601

Plasma anode technique for work functions measurements of polycrystalline W and Re wires in cesium vapor with cesium oxide additive

14 p2507 A69-29274

Polycrystalline BeO sound velocities determined as function of pressure and temperature using pulse superposition method

16 p2802 A69-32338

Creep tests on polycrystalline Be and Be alloy at various temperatures and stresses

17 p2986 A69-32912

Temperature and pressurization effects on tensile and compressive properties of polycrystalline arc-cast W

18 p3154 A69-34273

Dislocation structure of pure polycrystalline nickel subjected to high temperature creep, using electron microscopy following cold working and room temperature annealing

18 p3157 A69-35254

Polycrystalline diborides fabrication technology, discussing additives, thermal, physical and mechanical properties, specific applications, etc

19 p3355 A69-35526

Radiative heat transfer in polycrystalline corundum, studying photon thermal conductivity influence on lattice thermal resistivity

20 p3565 A69-36975

Model of isotropic polycrystal generalized to composite materials including mechanical mixtures, calculating macroscopic constants in heat conduction, diffusion and elasticity

21 p3752 A69-39193

Electron spin resonance /ESR/ of polycrystalline Mo(V) complexes with dipyrityl and phenanthroline, observing hyperfine interaction due to odd numbered isotopes

22 p3897 A69-40971

Polycrystalline ferroelectrics dielectric dispersion region in decimeter-centimeter wavelength range using waveguide resonance method employing wideband strip line

22 p3997 A69-41167

Distribution function of output energies of polycrystalline metal surface used as plasma probe, considering homogeneous plasma flow and isotropic particle velocity distribution

23 p4196 A69-41696

Polycrystalline ceramics chemical and microstructural control through thermomechanical and thermochemical hot forming techniques, discussing pressure sintering, hot extrusion, strain annealing, etc

24 p4321 A69-43338

Polycrystalline ammonium cyanide IR absorption spectrum as function of temperature, discussing ammonium ion hydrogen bonding to C or N atoms

24 p4280 A69-43809

POLYESTER RESINS

Fatigue properties and failure mechanisms of glass reinforced plastics based on chopped strand mat-polyester resin laminates

02 p0269 A69-11795

Long term weather and radar transmission effects on three ply fabric cloth fire-retardant polyester resin radome panel

08 p1414 A69-20485

Polymer structure effect on chemical resistance of reinforced plastics, sulfuric acid and sodium hydroxide corrosion of polyester resins and model copolymers

08 p1338 A69-20490

Flame resistant chlorine containing polyester resins, discussing preparation, curing characteristics, physical properties and reinforced plastics application

08 p1340 A69-20505

Creep strength of fiberglass reinforced polyester resins measured on structural components in long term tests under torsion

19 p3358 A69-35830

Glass fiber with epoxy resins compared to polyester resins, discussing chemical reactions, bonding and strength relations

19 p3358 A69-35902

POLYESTERS

Permittivity and loss tangent of unsaturated styrolene polyester copolymers at various temperatures and frequencies

[ONERA-TP-662]

04 p0621 A69-15114

Bromine containing unsaturated polyesters for fire retardancy and physical strengths, noting use in reinforced plastics for laminates, molding and corrosion

08 p1340 A69-20504

Polyesters reaction with dimethyl p-phenylene diamine compared under UV exposure from carbon arc and natural sunlight

10 p1716 A69-23978

Polyester/ammonium perchlorate combustion, determining degradation rate by loss in weight method at different intervals

13 p2324 A69-28234

Syntactic foam low density thermoplastic microspheres as hollow spherical filler in polyester matrix, noting applications

14 p2467 A69-29285

Reversion resistant polyether and polyester type urethanes, discussing applications, testing methods and material processing

19 p3357 A69-35566

Linear aliphatic polyesters preparation by acid chloride synthesis, acid exchange and ester exchange, stressing products purification

19 p3265 A69-36372

Gel permeation chromatography of nominally linear aliphatic polyesters, using tetrahydrofuran solvent at 37 degrees C

21 p3670 A69-39806

POLYETHYLENE TEREPHTHALATE

Mechanical anisotropy of polyethylene terephthalate and relation to molecular structure and cold drawing

05 p0785 A69-16489

Film processing effects on cryogenic mechanical properties of polyethylene terephthalate

05 p0785 A69-16490

Mechanical behavior of polyethylene terephthalate at cryogenic temperatures

05 p0785 A69-16494

Ultrahigh molecular weight polyethylene terephthalate synthesis from commercial solid state materials, noting effects of several parameters

05 p0797 A69-16496

POLYETHYLENES

NT POLYETHYLENE TEREPHTHALATE

High speed automatic osmometer applied to measurements of diffusible branched polyethylene samples, discussing apparent molecular weight observations

01 p0024 A69-10933

Inhomogeneous dielectric filling to simulate curvature in model earth-ionosphere waveguide

05 p0732 A69-16346

Polydiethylene glycol-bis-allyl carbonate /PBAC/ Hugoniot equation of state, reporting shock data, discussing applications to propellant testing

16 p2879 A69-32179

Polyethylene stainless steel lap joints and polyethylene samples yield strengths measurements at high temperature, suggesting yield mechanism based on dislocation loops

16 p2794 A69-32573

Fast neutron spectrum for subcritical section of homogeneous U 235-polyethylene thermionic critical assembly measured by pulsed source time-of-flight method

18 p3170 A69-34313

Spherulite boundaries and interspherulite breakdown in polyethylene, considering structure control by varying macromolecular microstructure

22 p3973 A69-40740

High energy oxygen-free hybrid propulsion system using polyethylene propellant and F oxygen mixture as oxidizer [DGLR-69-017]

23 p4202 A69-41930

POLYMERIZATION

Polymerization and strengthening effects simultaneous action at grain boundaries increased thermal stability of thermomechanically treated Ni-Cr alloy

17 p2991 A69-33940

POLYGONS

U PARALLELOGRAMS

U RECTANGLES

U SQUARES [MATHEMATICS]

U TRIANGLES

POLYHEDRONS

NT OCTAHEDRONS

NT PARALLELEPIPEDS

NT TETRAHEDRONS

Nonholonomic congruences of trihedrons in metric theory of straight line complex

03 p0457 A69-13865

POLYIMIDE RESINS

Polyimide glass fabric laminates with nonflammable characteristics for high O concentration spacecraft environments applications

09 p1531 A69-22366

Polyimide resin system for glass reinforced laminates, noting processing characteristics and curing

19 p3353 A69-35505

Mechanical properties and thermal aging of laminated specimens of collimated B monofilament reinforced composites preimpregnated with polyimide resin

19 p3354 A69-35514

High performance void free carbon fiber laminates preparation using polyimide resins, describing flexural strengths, moduli and interlaminar shear strengths

24 p4325 A69-43445

Postcured low void content graphite fiber reinforced polyimide resin composites fabrication including shear, flexural and tensile strength data

24 p4337 A69-43446

POLYIMIDES

Satellite, spacecraft and rocket components coatings and lubricants, noting high radiation resistance of polyimides

06 p0945 A69-17046

High temperature polyimide laminates for radomes and other supersonic aircraft components, discussing index flexural strength, dielectric constant and dissipation factor

07 p1171 A69-19545

Polyimide materials, discussing lamination and applications in electronic circuitry such as interconnection cables and multilayer interconnection boards

09 p1511 A69-22354

Glass reinforced polyimide laminate fabrication, discussing metal foil laminates

09 p1530 A69-22363

High temperature organic sealants for repairing small gas leakages in vacuum devices, tabulating test results for alkyd, epoxy, silicone and polyimide resins

11 p1907 A69-24742

Heat resistant polyamides and polyimides for electrical insulation, discussing properties and applications under extreme temperatures and basic reactions

13 p2286 A69-27988

High temperature structural adhesives at temperatures of 350 F and higher including epoxies, polyimides, amide-imides and polybenzimidazoles

15 p2642 A69-30329

Nuclear environment irradiation effects on materials, emphasizing radiation chemical processes affecting polyimide and copolymer of styrene and alpha-methylstyrene

19 p3356 A69-35530

Flexible-rigid hybrid polyimide-epoxy glass multilayer board to fill gap between all flexible and all rigid circuit boards

19 p3319 A69-35545

560 W deployable solar array consisting of very thin Si solar cells mounted on polyimide film, initiating deployment by duplicated pyrotechnic actuators

19 p3253 A69-35707

Polyimides and polybenzimidazoles mechanical strength, heat resistance, electrical properties, radiation resistance and industrial applications

19 p3358 A69-35901

Vacuum cured glass-reinforced polyimide laminate tests for use at elevated temperatures on F-111 aircraft

24 p4335 A69-42933

Damage repair techniques of polyimide honeycomb sandwich panels constructed with polyimide and Ti face sheets, using precured plugs, prepreg disks, sealants, etc

24 p4323 A69-43420

POLYISOPRENES

Geochemical synthesis of branched chain acyclic polymers from irradiated isoprene

24 p4269 A69-43750

POLYMER CHEMISTRY

Photodegradation of organic polymers by UV radiation exposure, emphasizing polyvinyl chloride photochemistry and radiation stabilization

01 p0102 A69-10861

Dispersion in gel permeation chromatograph, noting contributions of injection and detection systems to peak broadening and retention time

04 p0555 A69-14884

Ultrahigh molecular weight polyethylene terephthalate synthesis from commercial solid state materials, noting effects of several parameters

05 p0797 A69-16496

Polymeric Schiff bases synthesis, thermal stability and nature of pyrolytic decomposition of polyazines and derived polystilbenes

07 p1074 A69-18628

Binding of lysine-rich proteinoids to organismic or thermally synthesized polynucleotides, noting polyanhydramino acid interactions with polynucleotides

07 p1074 A69-18635

Polymer structure effect on chemical resistance of reinforced plastics, sulfuric acid and sodium hydroxide corrosion of polyester resins and model copolymers

08 p1338 A69-20490

Cross-linked polymers obtained by direct reaction of aryl polycarbonyls with aryl polyamines, studying char yields effect

08 p1269 A69-21059

Cross-links effect on char yields of azomethine polymers produced by aryl diamines with aryl diketones

08 p1269 A69-21060

Schiff base cross-links effect on synthesis of polymeric azomethines produced by bis exchange reactions, carbonyl and amine

08 p1269 A69-21061

Explosive acrylic polymers properties and preparation methods, noting chemical reactions and structure

08 p1376 A69-21152

Polyimide materials, discussing lamination and applications in electronic circuitry such as interconnection cables and multilayer interconnection boards

09 p1511 A69-22354

Experimental research concerned with origin of life, studying synthesis of precursor polymers and self assembly into protocells

10 p1641 A69-23035

Poly A-poly U synthesized by Azotobacter Vinelandi RNA polymerase in unprimed reaction containing ATP and UTP, following short lag period

10 p1647 A69-24185

Self assembly relation to origin of life and spontaneous generation applied to precellular polymers, biopolymers and cellular structures

12 p2018 A69-25776

Thermally stable polymers for high stress aerospace applications, noting chemical stability and structure of high polymers

12 p2117 A69-25853

Block tractable azomethine copolymers prepared by reaction of insoluble oligomers with monomers or of two different fusible oligomers, noting high thermal stability

13 p2217 A69-28317

Binder polymer network and microstructure effects on solid rocket propellant properties, emphasizing choice of polymer ingredients

17 p3017 A69-33668

Polyperfluoroalkylencimidoylperfluoroalkylene-amidine synthesized by reaction of perfluoroalkane dinitriles with ammonia or diamidine, giving elastomers of varying strength and elongation, noting thermal stability

19 p3264 A69-35535

High temperature structural adhesives developed from thermoplastic aromatic-heterocyclic polymers

19 p3357 A69-35560

Linear aliphatic polyesters preparation by acid chloride synthesis, acid exchange and ester exchange, stressing products purification

19 p3265 A69-36372

Molecular engineering of high organic polymers, discussing molecular weight, crystallization, elastomers, fiber formers and building construction materials

20 p3566 A69-37598

Model compounds and polymers solubility parameters correlated with refractive index data

21 p3751 A69-38552

Thermally stable polymers chemical and structural properties, discussing polymer use in aerospace technology

21 p3751 A69-38789

Cell origin in self organizing natural polymers in terms of molecular evolutionary priority of polynucleotides and poly alpha amino acids

22 p3896 A69-40781

Monograph on thermally stable polymeric azomethines synthesis by polycondensation reactions

23 p4113 A69-42019

Geochemical synthesis of branched chain acyclic polymers from irradiated isoprene

24 p4269 A69-43750

POLYMER PHYSICS

Stress-strain behavior of crazes in glassy polymers, discussing crack propagation, craze formation and failure and molecular weight effects

01 p1012 A69-10915

High speed automatic osmometer applied to measurements of diffusible branched polyethylene samples, discussing apparent molecular weight observations

01 p0024 A69-10933

Mechanical anisotropy of polyethylene terephthalate and relation to molecular structure and cold drawing

05 p0785 A69-16489

Polymer glasses low temperature transitions, relating structure and transition temperature

05 p0717 A69-16493

Temperature dependence of laser induced damage in plastic Q switch made of polyethylmethacrylate and vanadyl phthalocyanine for ruby laser

06 p0936 A69-17777

Ionic and nonionic mineral oxide powder fillers influence on stereopolymers lattices formed from phenolformaldehyde oligomers, discussing mechanical properties

08 p1335 A69-20331

Electromagnetic fields and magnetic and dielectric constants in fiberglass reinforced polymers determined by treating polymers as ideal dielectrics

08 p1336 A69-20336

Explosive acrylic polymers properties and preparation methods, noting chemical reactions and structure

08 p1376 A69-21152

Transversely isotropic elastic solid approximation for oriented fibers of polyethylene, nylon, polyethylene terephthalate and polypropylene, measuring elastic compliances

09 p1528 A69-21504

Network rupture hypothesis and molecular structure considerations used in obtaining constitutive equations for flow of polymer melts and solutions

10 p1800 A69-23369

Electrical properties of tetracyanoquinodimethane /TCNQ/ complexes representing unit segments of non-conjugated and conjugated polymers

11 p1832 A69-25675

Polymer structure relationship to thermal, mechanical and chemical properties of electrical insulating materials

13 p2285 A69-27986

Polyfluoroethylene resin breakdown under uniaxial tension, considering continuity disruption

13 p2286 A69-28321

Polymer molecular structure influence on physical and mechanical properties, considering regularity, chain flexibility, crosslinking and intermolecular forces

18 p3099 A69-34606

Polymer fibers tensile strength improved using sectional orientation strengthening at controlled temperature and tension conditions

19 p3358 A69-35984

Linear high polymer heat capacities by adding contributions from chain segments, deriving table of heat capacity contributions of polymer constituents

19 p3359 A69-36287

Thermally stable polymers chemical and structural properties, discussing polymer use in aerospace technology

21 p3751 A69-38789

Exposure rate influence on mechanical properties of polymer binder cross-linked by gamma radiation exposure from cobalt isotope source

23 p4179 A69-41711

POLYMERIC FILMS

Sulfide addition agents for diester lubricating grease and organic resin solid film lubricants, noting formulation and tests for steel and molybdenum

01 p0102 A69-10907

Polymeric film properties related to metal substrate interface corrosion, considering effects of stress concentration, surface cleanliness and adsorbed gases

02 p0265 A69-11896

Polymer films tensile properties after exposure to gamma radiation in vacuum, noting chain scission and cross linking

05 p0783 A69-16160

Cryogenic flexibility of thin polymeric film plies for use as spacecraft positive expulsion bladders

05 p0769 A69-16486

Film processing effects on cryogenic mechanical properties of polyethylene terephthalate

05 p0785 A69-16490

Welding of thermoplastic polycarbonate films, noting dryness requirement for satisfactory weld strength

06 p0930 A69-17094

Polyvinyl chloride coating for reducing aerodynamic skin friction drag, noting water saturation effect on polyurethane foam
[AIAA PAPER 69-165] 06 p0912 A69-18043

Polymers and organic optical cements transparent in 1 to 13 micron IR region, noting organosilicon resin
08 p1336 A69-20387

Plastic backing films removal from carbon electron microscope replicas by maintaining specimens in horizontal position
09 p1495 A69-21651

Methyl 2-cyanoacrylate adhesive bonding characteristics, noting importance of film thickness
09 p1529 A69-22316

Monograph on molecular structure and polymer properties, covering coherent adhesive layer of polymeric material for paint film in protective coatings
10 p1717 A69-24187

Polymeric insulation materials, discussing intrinsic properties dependence on temperature and atmosphere, stressing effect on aging
13 p2285 A69-27985

Corrosion at polymeric film-metal substrate interfaces, noting roles of film properties, bond strengths and primer coats
14 p2466 A69-29938

Dry lubricant films of soft metals, self lubricating plastics and crystalline powders, noting design and tests
15 p2642 A69-30328

Thin foil penetration measurements for Fe microparticle impacts on metal and Mylar foils in space
15 p2641 A69-31339

560 W deployable solar array consisting of very thin Si solar cells mounted on polyimide film, initiating deployment by duplicated pyrotechnic actuators
19 p3253 A69-35707

Polymer films damage due to supersonic plasma jets, comparing fracture relief of oriented and unoriented polymers
21 p3752 A69-39081

Stress analysis during solidification of binders in glass fiber reinforced plastic materials, using resin coated glass film simulation
22 p3973 A69-40746

Polymer film breakdown under impact of supersonic plasma beam pulses from capillary discharge chamber, including photomicrographs of cavities and structural defects
22 p3974 A69-41031

POLYMERIZATION

Radiation processed wood-plastic materials produced by impregnating natural wood with liquid monomer followed by ionizing radiation induced polymerization
04 p0605 A69-14582

Monograph on crystallization during polymerization, discussing categories, monomers capable of step reaction, chain reaction, nucleation crystal growth and perfection
05 p0783 A69-15967

Polymerization of monomers considered for direct synthesis of iminobenzylidene
10 p1651 A69-23308

Residual stresses and strains in wound reinforced plastic fiber cylinders subjected to polymerization by heat treating
11 p1907 A69-25679

Hologram recording on photosensitive material based on photoinduced polymerization showing good resolution and diffraction efficiencies
13 p2258 A69-27199

Silicone polymers and polymer formations for electrical applications including silicones for molded devices and components, potting resins, dielectric gel, RTV rubbers, etc
13 p2286 A69-27990

Time of heating effect on thermal polymerization of L-lysine free base
13 p2218 A69-28439

Molecular engineering of high organic polymers, discussing molecular weight, crystallization, elastomers, fiber formers and building construction materials
20 p3566 A69-37598

Sequence preparation of protected peptide polymer bond with amino exchange resin using solid phase transesterification
24 p4279 A69-42713

POLYMERS

Twisted yarns composed of continuous viscoelastic filaments dynamic response under periodic strain effect on dynamic modulus
04 p0619 A69-14686

Cryogenic properties of polymers - NASA/Case Conference, Cleveland, April 1967
05 p0784 A69-16485

Thermal expansion of polymers at cryogenic temperatures
07 p1172 A69-19730

Solid state laser radiation damage in polymers during tensile and compression loads using microstructural analysis
08 p1328 A69-21190

Shell theories for polymer and reinforced plastic shells, giving revised temperature and creep problem solutions due to mechanical behavior
09 p1611 A69-21481

Mass spectrometric determination of pyrolysis products generated from heated polymer samples
09 p1448 A69-22314

Book on strength and failure of viscoelastic materials covering linear and three dimensional polymers or polymer-based materials, flexibility and temperature effects
11 p1970 A69-24610

Origin of life in terms of polymers synthesis under thermodynamic and geological conditions
12 p2017 A69-25764

Origin of life data, discussing self ordered polymers, propagative cell-like systems, protozooids, cellular evolution, etc
12 p2018 A69-25781

Fiber polymer composite flexible insulating materials properties and applications stressing synthetic organic fibers
13 p2286 A69-27989

Outgassing behavior of polymers in spacecraft by thermal-vacuum weight-loss and contamination tests
13 p2286 A69-28089

Heterocyclic-aromatic organic polymer adhesives used for high temperature structural purposes, discussing processing, testing, formulating and impact on basic research
14 p2469 A69-29346

Polymers stress-strain behavior and corresponding birefringence within limited temperature range and strain rates
15 p2642 A69-30678

Nonlinear theoretical derivation of creep equations for three dimensional processes in polymers, based on Boltzmann-Volterra creep heredity concept using stress-strain summation
16 p2803 A69-32290

Luminescence spectra of aromatic polymers, monomers and dimers under high energy electron excitation using molecular resonance model
16 p2828 A69-32792

Machine for testing vibration stability of polymer samples subject to tension or compression, noting stability of plastic during vibration lower than during static loading
17 p2972 A69-33043

Turbulence measurements and roughness effects on viscous drag reduction with polymer solution in pipe flow, discussing friction factor, wall velocity profile, etc
17 p2951 A69-33252

Constitutive equation variation effect on near wall flow pattern of dilute polymer solutions
17 p2951 A69-33257

Polymer selection and plastics contribution to technologies, noting trend toward improved performance at elevated temperatures
18 p3161 A69-34610

Composite polymers thermophysical properties at thermal destruction temperatures, noting increased heating rate effect on kinetic curves
18 p3161 A69-34696

Solid state laser radiation damage in polymers during tensile and compression loads using microstructural analysis
18 p3152 A69-35159

Polymers in high performance applications - Conference, London, June 1969
18 p3150 A69-35420

Unfilled Pyrrone prepared from powder into molded parts for flexural tests at elevated temperatures observed for stability to electron irradiation in air
19 p3356 A69-35529

Integral fuel tank sealant based on various hydrofluorocarbon polymers prepared, tested and compared for physical properties
19 p3356 A69-35533

Nonlinear viscoelastic material properties evaluation from experimental data with illustration for polymers, deriving equations from thermodynamic principles
20 p3626 A69-37719

Automated rebound resilience apparatus for polymer dynamic mechanical properties studies over wide temperature range, using photoelectric device
21 p3689 A69-38593

Metal-polymer-metal and metal-polymer-silicon thin film structures analysis for polymers bulk properties and insulator-silicon interface, noting dipole-like relaxation
21 p3782 A69-39464

Flexible channel multiplier made of electron conductive polymer, noting secondary yield and feedback effect
22 p3917 A69-41234

Wear resistance and antifriction measurement device for polymer coatings in high vacuum, various gases and during exposure to electron radiation
23 p4169 A69-41599

Dynamic equilibrium of making and breaking adhesion bonds between polymer segments and dissimilar surfaces through water, allowing thermal stresses relaxation
24 p4326 A69-43458

POLYMETHYL METHACRYLATE

Polymethyl methacrylate irradiated by laser in vacuum to study mechanism responsible for gas formation
02 p0270 A69-11980

Transparency decrease in plexiglass during interaction with dense plasma, noting absorption independence of plasma pressure and dependence on wavelength
03 p0482 A69-14222

Fracture propagation in organic glasses, considering density of hyperbolic markings in polymethyl methacrylate and Dugdale model
05 p0784 A69-16429

Temperature dependence of polymethylmethacrylate deformation, yield and fracture in constant strain rate compressive and tensile tests
08 p1335 A69-20215

Liquid surface active media /kerosene, water, castor oil/ effect on strength of V notched polymethyl methacrylate specimens
09 p1528 A69-21852

Polymethyl methacrylate rupture time under stress determined from short and long time strength tests, noting relation to crack propagation time
09 p1528 A69-21853

Crack propagation properties of polymethyl methacrylate during bending and tension, noting temperature and loading time effect on crack size
09 p1529 A69-21854

Temperature effects on phosphorescence lifetimes and intensities of aromatic hydrocarbons in polymethyl methacrylate, estimating activation energy for thermally activated nonradiative decay mode
10 p1652 A69-23523

Biaxial stress effect on creep properties of thin walled tubes of polymethyl methacrylate at controlled temperature and humidity
10 p1717 A69-24216

Thermal expansion coefficients of Nb-Zr-Ti alloy and plexiglass at 10-300 K from dilatometric measurements
11 p1905 A69-24917

Polymethyl methacrylate burning rates in mixture with ammonium perchlorate or in hybrid systems when mixed with ammonium chloride
13 p3234 A69-28503

Simulated gravitational lens made of Plexiglass for demonstrating stellar gravitational lens phenomena, presenting partial cross section
15 p2653 A69-31163

Acoustic velocities in polymethylmethacrylate measured as functions of frequency, temperature and pressure, comparing data obtained with equation of state high pressure determinations
16 p2825 A69-31695

Linear pyrolysis of polymethyl methacrylate to verify Cantrell model and surface temperature determination method
17 p3017 A69-33132

Total gasification heat measurement during pyrolysis of polymethyl methacrylate and paraformaldehyde, discussing method and calorimetric equipment
17 p3069 A69-33133

Fracture kinetics of biaxial oriented polymethyl methacrylate, discussing crack development and propagation as compared to unoriented polymer
18 p3162 A69-35354

Mach reflection limiting parameters of conical shock wave in Plexiglas cylinders, showing head wave curvature radius linear relationship to cylinder diameter
19 p3302 A69-36845

Transparency and luminescence yield of plastic scintillators prepared from polymethyl methacrylate, comparing naphthalene and benzene compound additions with polystyrene 21 p3724 A69-39073

POLYMORPHISM

Polymorphic characteristics of titanium pentoxide prepared by reducing titania, examining oxidation products with X ray diffraction 07 p1168 A69-19601

Atomic size and outer electron effect on Fe, Co and Mn polymorphism, noting change in crystal lattices 15 p2638 A69-30321

Pressure and temperature effects on reversal transitions of stishovite, noting meteoritic impact formation at Meteor Crater, Arizona 22 p4021 A69-40412

POLYNOMIALS

NT DYADICS

NT HERMITIAN POLYNOMIAL

Ultraspherical potential approximation in nonlinear symmetric free oscillations applied to systems with hardening and softening cubic nonlinearities 01 p0107 A69-11418

Eigenvalue problem solutions for ordinary differential equations, discussing coefficient replacement, Ritz polynomial substitution and error limits 02 p0271 A69-12057

Mathematical analysis to determine complete characteristic of functions tolerating polynomial approximation in mean in crescent type noncaratheodory domains 02 p0272 A69-12164

Primitive trinomials of high degree for use in pseudorandom sequence generation of zeros and ones 03 p0455 A69-13373

Stability test functions for characteristic polynomials with real coefficients and even powers 05 p0833 A69-15710

Book on computer evaluation of mathematical functions, discussing errors, square and cube root, Chebyshev polynomials, approximation, rational function, asymptotic expansions, etc 05 p0723 A69-15955

Linear differential equations with sinusoidal coefficients analyzed with aid of trinomial recursions 05 p0787 A69-16464

Existence of minimal solutions of doubly infinite trinomial linear recursions of Poincare-Perron type 05 p0787 A69-16465

Polynomial representations of mirror cusp fields produced by combination of mirror coils and Ioffe /multipole/ bars 06 p0966 A69-17522

Current-voltage characteristic of tunnel diodes, with curve approximation by even degree polynomials of voltage, discussing quasi-linear analysis 06 p0898 A69-17802

Algorithms for polynomial resultants computation, considering extraneous factors, truncation errors, memory and computing speed 06 p0892 A69-17884

Quadratic form representation of multivariable polynomials expressing sufficient condition for positive definiteness of real multivariable polynomial 07 p1173 A69-18641

Iterative method for least square polynomial curve fitting with abscissas and ordinates subject to error 08 p1343 A69-20827

Least squares local smoothing by polynomials of noisy data in n dimensions 08 p1344 A69-20830

Optimal control approximate synthesis partial differential equation solution in form of interpolation polynomial for functions of many variables 08 p1299 A69-21068

Optimum number of terms in approximation of realizations of random process by polynomials 09 p1475 A69-22667

Filter network synthesis for realization of rational functions, discussing numerator polynomial inclusion by choice of divisor polynomial and branch introduction and parallel systems 10 p1667 A69-24038

Extremal controlled plants identification by Chebyshev orthogonal polynomials, comparing results with regression analysis 11 p1861 A69-25713

Modified scheme for simulation of delay with transient period independent of amount of delay, considering polynomial input 12 p2120 A69-25922

Polynomial coefficients multiplication by weighted damping factors for increased conformal mapping and boundary value problems solutions accuracy for doubly connected regions 12 p2178 A69-25998

Higher root loci of polynomials for multivariable systems with coefficients polynomials of real parameter 12 p2048 A69-26073

Polynomial and nonlinear equations of state for solids and liquids analyzed using uncommon statistical and least squares methods 14 p2486 A69-29470

Semidefinite Peano kernels of stable forms 15 p2644 A69-30450

Continued fraction inversion to rational fraction of two polynomials based on state space formulation and Routh algorithm 16 p2805 A69-32470

Optimal control approximate synthesis partial differential equation solution in form of interpolation polynomial for functions of many variables 16 p2765 A69-32483

Orthogonal polynomials for solving plane elasticity theory boundary value problems without constructing mapping functions, noting applications 17 p3067 A69-34144

Integration formulas involving integrand derivatives simplified by decreasing integrating power in terms of polynomials 18 p3164 A69-34615

Polynomial bases for orthogonal group irreducible representations, rederiving Wigner coefficients 18 p3164 A69-34807

Polynomial approximations in perturbational navigation and guidance schemes including Chebyshev and least square approximations 19 p3368 A69-35664

Dirichlet polynomials double sequences and double series with positive exponents, defining conditions for convergence in bicylinder 19 p3361 A69-36639

Trigonometric polynomials representing perturbation function and derivatives in three body problem 20 p3596 A69-37315

Algorithms testing characteristic polynomials and differential equation classical stability relations 21 p3755 A69-38925

Orthogonal polynomials in three dimensional contact problems without friction, discussing construction of kernels over finite and semiinfinite intervals 22 p4041 A69-40113

Geomagnetic zenith calculation at given point based on geomagnetic field model, using polynomial development 24 p4311 A69-43505

POLYPHENYL ETHER

Steel ball bearing high temperature fatigue life tested with synthetic paraffinic oil, fluorocarbon and polyphenyl ether [ASME PAPER 69-LUBS-18] 18 p3140 A69-34378

Polyphenyl ether lubricants and self lubricating materials compared for antifriction ball bearings in thrust reversing actuator gear box [SAWE PAPER 68-LC-1] 18 p3148 A69-35003

POLYPROPYLENE

Silane coupling effect on composite properties of glass fiber filled injection molded polypropylene, noting interface phenomenon 08 p1337 A69-20482

POLYSACCHARIDES

U CELLULOSE

U STARCHES

POLYSTYRENE

Monograph on heat transfer coefficients of polystyrene foams noting contribution of gas conduction, convection and radiation to total heat transfer 08 p1421 A69-20716

Polystyrene melt tensile viscosity prediction from shearing viscosities, using rheological network rupture theory 21 p3753 A69-39730

POLYTETRAFLUOROETHYLENE

Sliding surface tracks from hardened steel sliders on flat PTFE examined for molecular orientation with electron microscope 01 p0085 A69-10369

Molecular motion in polytetrafluoroethylene crystals at cryogenic temperatures, noting crystal defect permitting angular displacements of chain segments 05 p0797 A69-16495

Machine for measuring creep deformation of polytetrafluoroethylene under uniaxial compressive loads, discussing stress-strain relationship 14 p2469 A69-29412

Glass fiber filled polytetrafluoroethylene materials for piston seals in high pressure oil-free reciprocating air compressors, discussing manufacturing and non-destructive tests 19 p3323 A69-35579

Polytetrafluoroethylene ablation in high temperature argon, nitrogen, air and oxygen jets, discussing electric heater and heat flux measurement 20 p3632 A69-37522

Beryllium fluoride heat of formation from heat of combustion of Be-polytetrafluoroethylene mixture in fluorine 21 p3853 A69-39703

POLYTROPES

Spherical shock wave propagation in polytrope with poloidal magnetic field, noting application to shock waves in magnetic stars 04 p0664 A69-15438

Three dimensional gas flows near characteristic surface extended over homogeneous polytropic gas at rest 11 p1876 A69-25729

Water bag spherically symmetrical universe model, discussing system stability, distribution function representation and polytrope equivalency 16 p2866 A69-32813

Slow rotation of relativistic polytropes with linear corrections, showing inertia moment distribution and metric component 19 p3426 A69-36576

Equilibrium and stability of axisymmetric gaseous polytropes in toroidal magnetic fields, calculating harmonic oscillations by virial tensor method 21 p3797 A69-38534

POLYTROPIC PROCESSES

Generalization of characteristic relations for steady supersonic 3D motion of polytropic gas, obtaining complex screw motions 03 p0412 A69-12847

Two dimensional unsteady flow of inviscid polytropic gas using analysis of similarity solutions in homentropic flow 04 p0590 A69-15191

Solar supergranules and hydrogen convection zone analysis based on polytropic atmosphere convection physics 07 p1211 A69-18408

Solitary waves in stratified polytropic atmosphere allowing for convection and disregarding viscosity and turbulence 18 p3167 A69-35338

Polytropic gas unsteady motion in dihedral piston wake by solving mixed boundary value and Goursat problems 22 p3861 A69-41025

POLYURETHANE FOAM

Creep behavior of nonlinear rigid polyurethane foam under combined stress and applicability of multiple integral and modified superposition principle 04 p0680 A69-15155

Frictional losses in straight tubing and effect of system on ball type valve, using polyurethane foam damped flexible silastic tube 04 p0608 A69-15331

Low density polyurethane foam with and without honeycomb as ablative material for reentry vehicles, discussing oxidation resistance 04 p0688 A69-15513

Heat treatments in inert gas atmosphere improve elastic foam polyurethane by reducing capability of toxic outgassing 10 p1716 A69-23503

Airflow through open foam cellular structure, discussing mathematic model for predicting pressure buildup and foam response in shock and vibration isolation [ASME PAPER 69-VIBR-46] 10 p1803 A69-24144

Polyurethane foam high velocity deformation properties, discussing results of dynamic uniaxial stress tension and compression tests 11 p1907 A69-25648

Polyurethane with additives for fuel fire control in aircraft structures, achieving desired protection without impairing foams mechanical properties 15 p2561 A69-30311

Cellular carbon castings fabrication by carbonization of polyurethane polyfurfuryl alcohol foam for high temperature applications, noting properties 17 p2992 A69-33373

Bird impact resistance of polyurethane foam filled tailplane
17 p2901 A69-33648

Rigid PVC, urethanes and thermosets processing for high performance, noting injection molding and machine developments role
18 p3148 A69-34611

Friction coefficient and elastic deformation magnitudes relation in polyurethane during sliding friction in various liquids /lubricants/
18 p3149 A69-35362

Ablative materials thermal protection characteristics at low heating rates evaluated by convective heating tests, stressing polyurethane foam composite
19 p3357 A69-35536

Sprayable polyurethane foam lightweight insulation for Saturn s-2 booster tanks holding liquid H an liquid O at wide temperature ranges
21 p3732 A69-38967

Polyurethane foam composites for low heating rate thermal protection, noting astroquartz fiber additive effect on performance
21 p3753 A69-39236

Open cell ester-base polyurethane foam effect on fuel-utilizing microorganisms growth in jet fuel- water systems
24 p4271 A69-42700

Sprayable polyurethane foam external insulation for liquid hydrogen and oxygen storage aboard Saturn S-2 booster
24 p4337 A69-43453

POLYURETHANE RESINS

Ammonium perchlorate base propellant and polyurethane binder heat stability, dangers of aging under abnormal conditions and reaction products for components and tolylene diisocyanate
02 p0303 A69-11529

Fluorinated polyurethanes synthesis for liquid oxygen environments and cryogenic structural utility, noting structural effects on LOX compatibility
05 p0717 A69-16498

Shock attenuation and equation of state of polyurethane based on aquarium technique and free surface velocity measurement
16 p2828 A69-31810

Polyurethane corrosion resistance in various liquids determined from changes in sample hardness, weight, volume and deformation
18 p3162 A69-35360

Reversion resistant polyether and polyester type urethanes, discussing applications, testing methods and material processing
19 p3357 A69-35566

Device determining dynamic mechanical properties of tissues and various transducers, evaluating elastic properties of polyurethane, Hevea rubber and descending thoracic aorta
22 p3890 A69-40204

Polymeric polyurethane protective coatings for radar radome covers with improvement in service life, discussing performance, properties and production method
24 p4338 A69-43456

POLYVINYL CHLORIDE

Photodegradation of organic polymers by UV radiation exposure, emphasizing polyvinyl chloride photochemistry and radiation stabilization
01 p0102 A69-10861

Polyvinyl chloride coating for reducing aerodynamic skin friction drag, noting water saturation effect on polyurethane foam
[AIAA PAPER 69-165] 06 p0912 A69-18043

Rigid PVC, urethanes and thermosets processing for high performance, noting injection molding and machine developments role
18 p3148 A69-34611

PONDEROMOTIVE FORCES

Min B magnetic trap, discussing induction coils, ponderomotive forces and mechanical stresses sustained by coils
04 p0634 A69-14299

Ponderomotive forces and irregularities in earth rotation, considering core and lower mantle as closed system with respect to periodic electromagnetic and mechanical effects
09 p1487 A69-21636

Nonlinear confining and deconfining forces of laser light interaction with inhomogeneous plasma, analyzing macroscopic motion based on ponderomotive force description
11 p1923 A69-24297

Ponderomotive forces and sudden irregularities in earth rotation, discussing core-mantle electromagnetic coupling and toroidal field induction effects
19 p3302 A69-35769

Laser beam self focusing in plasma in terms of ponderomotive acceleration due to light intensity gradient
22 p3961 A69-40417

PONTRYAGIN PRINCIPLE

Dynamic programming to demonstrate sufficient conditions of optimality in maximum principle when regular control synthesis is realized
02 p0225 A69-11975

Minimum fuel attitude control of spacecraft by Pontryagin principle and extended steepest descent method
03 p0522 A69-14100

Pontryagin maximum principle used to solve optimal control problems on analog computer
05 p0739 A69-16473

Sensitivity coefficients to solve two point boundary value problem arising from Pontryagin principle, with application to time optimal control studies
08 p1296 A69-20297

Optimal rendezvous for two propelled spacecraft obtained by Pontryagin principle assuming small distance between vehicles compared to distances from center of gravity
10 p1791 A69-22923

Dynamic programming to demonstrate sufficient conditions of optimality in maximum principle when regular control synthesis is realized
10 p1666 A69-23884

Pontryagin principle application to incorporation of singular sections into optimal trajectories of controlled systems, considering conjugation of singular and nonsingular extremals
11 p1960 A69-24764

Nonlinear bang-bang optimal control problems solution based on differential dynamic programming, noting use of Pontryagin adjoint variables
11 p1860 A69-25444

Cantilever beam profile optimization methods using iterative analog computation to achieve minimum deflection, showing application of Pontryagin maximum principle
15 p2709 A69-30671

Pontryagin maximum principle applied to time optimal control of autonomous second order system with constant coefficients and differentiation in transfer function numerator
15 p2583 A69-31059

Adaptive random search algorithm utilizing boundary cost-function hypersurfaces measurement to implement Pontryagin maximum principle, discussing hybrid computer use, iterative solution and convergence properties
17 p2933 A69-33745

Optimal control theory applications for controllers not characterized by bang bang time responses using Pontryagin maximum principle
18 p3090 A69-34681

Optimal nutation damping of spin stabilized bodies, using Pontryagin maximum principle to optimize time, consumption and linear time-consumption combination
18 p3208 A69-34774

Law for time variations of modulus-restricted control action at trajectory end, two point boundary value problem solution and use of Pontryagin principle
18 p3175 A69-35324

Optimal fuel transfers between coplanar and non-coplanar coaxial elliptical orbits determined by Pontryagin maximum principle, using digital program for Hamiltonian equations solutions
19 p3399 A69-35670

Minimum impulse transfer between circular and nearby noncoplanar elliptic orbit, applying Pontryagin principle
19 p3400 A69-35675

Soviet monograph on mathematical methods of optimal control, discussing models and synthesis of optimal quick response systems by Pontryagin principle
21 p3757 A69-39524

Optimal pursuit control at constant moving velocity and limited angular velocities, using Pontryagin principle
21 p3825 A69-39629

POPULATION INVERSION

Relaxation processes and radiation stimulation in dense low temperature ionized plasma can lead to population inversion of several levels
01 p0131 A69-10789

Inverse population of vibrational levels generation in polyatomic molecules
02 p0259 A69-12647

Q switched Ruby laser metastable state population kinetics and resonator losses, discussing internal energy redistribution with subsequent absorption spectrum changes
04 p0610 A69-14381

Time dependence of laser output in C and N atoms following dissociative excitation transfer explained in terms of measured populations of excited states
05 p0795 A69-15663

Gas lasers involving gas-discharge collisions, selective pumping or chemical reactions to produce necessary inversion, giving theoretical analysis of excitation mechanisms
05 p0772 A69-16226

Critical population inversion for xanthene dye solution laser, analyzing optical loss due to triplet state concentration
[IEEE PAPER A-2] 05 p0773 A69-16307

Finite cross relaxation rate effect on spectral distribution in CW laser oscillator output with inhomogeneous broadening, noting population inversion distribution
[IEEE PAPER T-2] 05 p0776 A69-16327

Active element inverse population distribution effects on laser radiation angular divergence during lower and higher oscillation modes
06 p0932 A69-16913

Cross relaxation and spin-lattice relaxation probabilities determination in ruby crystal based on inversion coefficients
06 p0980 A69-17458

Radio recombination lines in populations of highly excited states of hydrogen, discussing collisional transition effects
06 p1010 A69-17970

Gas lasers principles of operation, discussing population mechanism, lifetime conditions, excitation processes, electron velocity distribution and types of discharges
06 p0937 A69-18008

Theoretical population inversion in decaying nitrogen plasma column free from external fields and confined motionless in circular cylinder
[AIAA PAPER 69-48] 06 p0971 A69-18145

Atomic, ionic and molecular gas lasers applications, population reversal conditions and processing technology
07 p1143 A69-18250

Tandem amplifier system of glass and selenium- oxychloride liquid lasers, discussing input power/output pulse relation and population inversion density measurement
07 p1147 A69-18487

Relaxation equations for oscillatory degrees of freedom of molecular supersonic binary gas flow in Laval nozzle, obtaining population inversion
07 p1118 A69-18540

Helium-neon laser output power dependence on spark-gap cross section geometry, analyzing diffusion equation and population inversion
07 p1147 A69-18541

Radiative lifetime for nitrous oxide 001-100 transition, laser level absolute population densities and saturation parameter measured in nitrous oxide-nitrogen-He laser
[IEEE PAPER G-10] 07 p1151 A69-19057

Population inversion of vibrational levels due to molecular collisions in carbon dioxide lasers, calculating transition probabilities, laser parameters and gain profile
[IEEE PAPER G-15] 07 p1151 A69-19061

Population inversion mechanism based on electron collisional excitation cross sections for molecular vibrational levels in carbon dioxide lasers
07 p1157 A69-19655

Degree of population inversion and inverse temperature measurement in medium
07 p1137 A69-19761

Molecular beam gas laser operating at transitions between ground state and resonance excited state of inert gas atom, obtaining population inversion
08 p1325 A69-20325

Population inversion in semiconductors obtained by applying electric field through dielectric sphere /field effect/
08 p1374 A69-21082

Heat transfer effect on population inversion time variation in pulsed carbon dioxide laser and molecules excitation rates dependence on gas mixture composition
09 p1519 A69-22289

Population inversion distribution and wave processes in optical amplifier, showing beam transformation of constant section and dependence on crystal characteristics
11 p1893 A69-24447

Population inversion in ground state sublevels of ruby laser, deriving required conditions
11 p1900 A69-25572

Temperatures and densities of atoms and electrons from spectroscopic methods in gas discharge plasma used for CW ion-argon lasers, evaluating inversion mechanism

12 p2106 A69-26319

Water vapor laser, discussing water vapor molecular structure, population inversion mechanism, perturbation model, etc

12 p2106 A69-26325

Standard phenomenological laser rate equations for population inversion and light intensity generalized by considering intensity dependent losses and Einstein coefficients

12 p2110 A69-27014

Q switched ruby laser metastable state population kinetics and resonator losses, discussing internal energy redistribution with subsequent absorption spectrum changes

14 p2456 A69-28754

Carbon dioxide laser inversion kinetics, combining pulse pumping with Q switching to observe rise, life and decay times

14 p2457 A69-28926

Lasing kinetics, emission spectrum and directivity of ruby laser with spatially homogeneous population inversion

15 p2634 A69-30729

Maser emission in interstellar OH ground state produced by IR pumping, noting population inversion mechanism

15 p2691 A69-30762

Power coupling among modes in semiconductor lasers in presence of spontaneous or forced microwave modulation of population inversion

15 p2634 A69-30875

Maser amplification of 9.5 GHz longitudinal elastic waves in divalent nickel impurity ions doped sapphire by stimulated emission from inverted spin population

16 p2795 A69-31554

Inversion coefficient for two orientations of ruby crystal with respect to external magnetic field perpendicular and push-pull orientations

16 p2795 A69-31570

Molecular beam gas laser operating at transitions between ground state and resonance excited state of inert gas atom, obtaining population inversion

17 p2981 A69-33315

Laser eigenmodes determined iteratively from eigenvalue equation including spatial inversion inhomogeneities, atomic density and local loss

17 p2984 A69-34046

Laser action in quantum system, analyzing absorption constant relation to spontaneous/ stimulated emission constants, energy level population inversion, pumping, etc

17 p2984 A69-34150

Population inversion in carbon dioxide laser related to pumping frequency, discussing molecular dissociation effect in gas mixture

18 p3151 A69-34620

Continuous explosion laser study of stationary detonation waves to determine conditions leading to partial population inversion and critical population density

19 p3336 A69-36360

Electroreflection study of inversion asymmetry and warping induced interband magneto-optical transitions in InSb, employing low temperature electric field modulation technique

19 p3386 A69-36521

Differential equations for field amplitude and level populations applicable to solid state lasers output power pulsations

20 p3554 A69-37726

Cross relaxation and spin-lattice relaxation probabilities determination in ruby crystal based on inversion coefficients

20 p3584 A69-37941

Relaxation processes and radiation stimulation in dense low temperature ionized plasma leading to population inversion of several levels

20 p3582 A69-38006

Optical pumping and selective population applications, considering double magneto-optic resonance and inelastic interatomic collisions

21 p3735 A69-38454

Ammonia inversion radiation in Sgr B2 region, observing distribution of density, velocity and rotational excitation

21 p3799 A69-38647

Relaxation equations for oscillatory degrees of freedom of molecular supersonic binary gas flow in Laval nozzle, obtaining population inversion

21 p3693 A69-38692

Helium-neon laser output power dependence on spark-gap cross section geometry, analyzing diffusion equation and population inversion

21 p3735 A69-38693

Protostar chemical processes responsibility for population inversion and properties in OH and water masers

22 p4018 A69-40267

POPULATIONS

Statistical equilibrium equations solution for thermodynamic equilibrium variations of populations of very high energy levels in hydrogen and complex atoms

01 p0150 A69-10395

Electron temperature relation to population ratio in Gunn effect

05 p0810 A69-16576

Temperature profile and power density distribution in metastable level of ruby laser rod during pumping in air

07 p1150 A69-18937

Wing of solar line H-alpha for levels population of hydrogen atom in solar photosphere, discussing excitation temperature, absorption coefficient and thermodynamic equilibrium

08 p1390 A69-20394

Time dependent statistical equilibrium equations solutions for describing time development of atomic populations by means of ergodic Markov chain

09 p1542 A69-22218

Energy level population of carbon dioxide molecules, noting intensity of spontaneous emission

13 p2274 A69-28580

Population feedback control in planarians by fission suppression by brain near other planarians

14 p2406 A69-28871

Population and excitation rates of working levels of carbon dioxide laser calculated on basis of emission power, amplification coefficient and spontaneous emission intensity

22 p3964 A69-40795

PORCELAIN

Corrosion prevention in beryllium, testing conversion coatings and low fired porcelain enamels under various humidity and temperature conditions

14 p2466 A69-29939

PORES

U POROSITY

POROSITY

Sheet steel composition effect on gas-tungsten arc welds porosity

04 p0607 A69-15219

Compressional and shear wave velocities vs porosity for sintered perlitic bricks

06 p1000 A69-17009

Titanium surface impurities effect on porosity in welds, proposing machining immediately before welding as solution

06 p0945 A69-17894

Titanium alloy interaction porosity with fillers during diffusion brazing, discussing joint strength as function of time, temperature and pressure

06 p0945 A69-17896

Surface treatment effect on weld porosity causes and removal in VT5-1 Ti alloy argon arc welding

06 p0945 A69-17897

Welding defects, processes, inspection and personnel training problems

10 p1700 A69-23372

Porosity sources in Ti alloy welds, discussing increased gas content and silica, edge surface finish and gas hose contaminants

11 p1892 A69-25668

Gas bubble formation in Ti welding associated with gas nuclei in metal, molten dwell time, gas diffusion coefficients, joint edge conditions, etc

11 p1892 A69-25669

Characteristic temperature, Young modulus and rms atomic displacement in metal borides of various porosities, using dynamic method based on ultrasonic oscillations measurement

12 p2115 A69-26615

Metallo-ceramic materials strength as function of porosity calculated for tension, shear, bending and torsion deformations

15 p2638 A69-30283

Magnetic anisotropy and porosity from approach to saturation of polycrystalline ferrites based on magnetization measurement

16 p2825 A69-31700

Weld porosity in Al alloys as function of composition variations, discussing water vapor contamination of welding arc

22 p3956 A69-40461

Porosity and composition effects on thermal conductivity of glass fiber reinforced plastics, noting tests of multilayer textolite sheets

22 p3973 A69-40747

Pumping pore size and permeability of wicks as part of heat pipes design

23 p4074 A69-42298

H concentration and pore formation in Ti fusion welds

24 p4319 A69-42885

Porosity and inclusions effects on Al arc weld fatigue properties at ambient and cryogenic temperatures

24 p4331 A69-42940

POROUS BOUNDARY LAYER CONTROL

Viscous liquid layer flow down inclined plane under boundary conditions, taking into account drag and penetration at porous bed surface

02 p0234 A69-12774

Van Driest-Bradshaw model for calculating sublayer function for self preserving laminarescent boundary layers, discussing porous surface suction or acceleration effects

[ASME PAPER 69-HT-12] 24 p4304 A69-43557

POROUS MATERIALS

NT POLYURETHANE FOAM

Gas flow analysis for externally pressurized porous journal gas bearing, considering circumferential flow in bearing clearance and porous bushing

01 p0085 A69-10312

Porous ceramic heat shields for lifting reentry vehicles, noting crack propagation resistance and load redistribution

[SAE PAPER 680643] 03 p0453 A69-13457

Coefficient of friction variations for MHD flow of electrically conducting liquid across porous medium under transverse magnetic field

03 p0480 A69-14112

Porous gas diffusion electrodes design for electrochemical energy converters, noting contribution of theory of electrode kinetics

04 p0551 A69-15309

Hardenability of ShKh-15 steel, establishing relationship of porosity to sintering method

04 p0619 A69-15390

Griffith biaxial fracture criterion for porous brittle materials based on continuum model with random infinitely sharp cracks

[ASME PAPER 68-WA/MET-12] 05 p0838 A69-16152

Thermal transpiration for performance prediction and development of gas pump

[ASME PAPER 68-WA/ENER-4] 05 p0706 A69-16162

Heat transfer performance of porous nozzle blade cascade represented by two dimensional mathematical model

05 p0812 A69-16400

Viscous electrically conducting liquid flow through insulating porous medium in presence of transverse magnetic field in region of validity of Darcy law

05 p0805 A69-16603

Properties of electrolytic and reduced titanium powders and sinterability of porous compacts

05 p0782 A69-16795

Compressional and shear wave velocities vs porosity for sintered perlitic bricks

06 p1000 A69-17009

Effects of multidimensional flow through porous matrices in mass transfer cooling, analyzing one dimensional model for blunt axisymmetric surfaces

[AIAA PAPER 69-149] 06 p1038 A69-18179

Ti metallurgy and production, discussing vacuum separation of sponge Ti, Ti melting in arc furnaces, Mg thermal reduction and chlorine processing method

07 p1161 A69-18761

Hydromagnetic steady forced flow against porous rotating disk, integrating equations of motion by Karmann-Pohlhausen and series methods

08 p1370 A69-21005

Fluid injection into flowfield from porous forward portion of blunt body in stagnation region flow, determining reservoir pressure and mass flow rate

09 p1430 A69-21973

Porous structures, using spherical tungsten powders, discussing metallurgy, sintering, temperature effects and performance characteristics in ion engines

10 p1710 A69-23166

Molybdenum fiber sintering activation by adding nickel, noting decrease in impact viscosity

10 p1711 A69-23336

Hartmann problem for motion of electroconductive fluid in homogeneous porous medium, modifying clas-

sical MHD equations by introduction of velocity of filtration

11 p1925 A69-24324

Diffusive flow with isopycnic lateral boundaries in porous medium and density distribution of diffusive motion, noting exact solution equivalence to previous solution

11 p1869 A69-24887

Porous cermet electrodes thermochromic protection by blowing neutral gas into electrode boundary layer, examining effect on volt-ampere characteristics

11 p1826 A69-25232

Cesium sorption in materials for thermionic converters reservoirs, discussing dimensional stability of porous alumina, W and C samples

14 p2463 A69-29220

Heat and mass transfer in porous medium with bulk flow in thin adjacent channel, applying Green function analysis to hydrogen-oxygen fuel cell

15 p2552 A69-31115

Boron effect on sintered porous Ni friction at high sliding velocities and temperatures, analyzing oxide film destruction restraint by decreased Ni plasticity

15 p2641 A69-31187

Tensile, bending and impact strengths of materials produced by metal porous blank impregnation with molten glass, noting metal density and sintering effects

15 p2643 A69-31188

Hydrogen oxygen fuel batteries with hydrophobic porous film electrodes and alkaline electrolyte

16 p2740 A69-32426

Similitude applied to dynamics of disperse media, discussing role of dimensionless numbers in mechanics of suspensions and two phase flows in porous media

19 p3300 A69-36775

Temperature and fluid distribution in porous solid subjected to large suction, convective heating and radiative cooling on one surface

20 p3514 A69-37225

Porous hydrophilic oxygen electrodes behavior, showing electrochemical reaction influence on shape of current density vs voltage curves

20 p3484 A69-38071

Heat resistance and strength properties of porous Ni-base cermet materials with mica additions under high temperature oxidation

21 p3751 A69-38615

Book on porous bodies hydrodynamics covering motion equations for free, filtration, perfect and Newtonian fluids

23 p4150 A69-41501

High pressure hydrogen-oxygen reversible fuel cells using calcia stabilized porous zirconia as membrane and aqueous KOH as electrolyte

23 p4076 A69-42308

Van Driest-Bradshaw model for calculating sublayer function for self preserving laminar boundary layers, discussing porous surface suction or acceleration effects

[ASME PAPER 69-HT-12] 24 p4304 A69-43557

POROUS PLATES

Two dimensional unsteady Rayleigh flow velocity of conducting and nonconducting viscous fluid past porous plate, analyzing suction and magnetic field effects

02 p0232 A69-12156

Heat transfer of steady laminar flow of incompressible, viscous and electrically conducting fluid between parallel porous plates

02 p0289 A69-12235

Transpiration cooling of porous flat plate by injection of carbon dioxide or air into carbon dioxide and air free streams

03 p0413 A69-12996

Heat transfer through turbulent boundary layer on porous plate with blowing and suction, determining Stanton numbers

04 p0586 A69-14356

Flow of two conducting immiscible liquids between parallel porous moving plates under transverse magnetic field

05 p0743 A69-15600

Decreasing secondary flows in spatial boundary layer on porous plate by boundary layer control /BLC/ through suction or blowing, using Prandtl partial differential equations

06 p0909 A69-17185

Laminar source flow of viscous incompressible liquid between two parallel coaxial rotating porous disks

06 p0909 A69-17243

Chemical reactions in boundary layer on porous plate in oxygen stream, discussing similar solution of laminar boundary layer equations with flame front

07 p1119 A69-18735

Radiative-convective heat transfer in gray gas plane layer blown into turbulent flow past permeable plate

07 p1242 A69-18991

Heat and mass transfer in laminar boundary layer on porous flat plate with variable suction or injection velocity and constant wall temperature

12 p061 A69-25947

Steady incompressible MHD laminar flow between parallel porous disks solved for large Reynolds and Hartmann numbers

15 p2662 A69-30968

Compressible flow over finite porous plate in supersonic stream with massive injection over surface analyzed using inviscid vortical flow model

16 p2770 A69-31884

Turbulent boundary layer gas mixture flow incident to porous plate surface

20 p3513 A69-37093

Unsteady boundary layer with distributed injection or suction on porous plate, determining acceleration and flow parameter functions from velocity profiles

21 p3692 A69-38609

Optimal boundary layer control ensuring minimum heat transfer to porous plate from incompressible flow of hot gas of cooling system

21 p3849 A69-38846

Thermal boundary layer formed during laminar jet flow over flat porous plate, discussing temperature distribution and mass transfer at plate surface

21 p3854 A69-39846

Corrosion of Ni through porous Au plate in humid sulfur dioxide atmospheric environments, analyzing product deposits and contact properties

23 p4176 A69-41534

Gas concentration measurement during injection into laminar boundary layer streaming along porous plate, using quadrupole resonance mass spectrometer

23 p4058 A69-41695

Anisotropic porous media model for fluid motion in rectangular fuel cell cavities, analyzing pressure, velocity, stream functions and purge time

23 p4075 A69-42300

POROUS WALLS

Frictional and heat transfer characteristics of laminar flow in porous tubes, using numerical solutions to flow and energy equations

01 p0177 A69-11408

Steady laminar flow in two dimensional channel with different permeability porous walls and large injection at both walls

03 p0417 A69-13795

Relaminarization of turbulent flow, studying velocity profiles at various axial cross sections in porous wall tube with fluid injection

04 p0586 A69-14409

Laminar flow of isotropic binary gas mixture in circular cylindrical tube with porous walls, determining concentration field variation with wall suction Reynolds number

05 p0744 A69-15618

Laminar and turbulent regimes of flame propagation studied by blowing explosive gas mixture through porous wall, determining Reynolds number by hot-wire anemometer

06 p1034 A69-17626

Unsteady MHD convective flow with suction of viscous incompressible electrically conducting fluid above vertical porous wall, noting horizontal magnetic field effect

07 p1195 A69-19477

MHD oscillatory flow along infinite plane porous wall with variable suction velocity, obtaining expressions for velocity and magnetic fields in boundary layer

09 p1547 A69-21607

Laminar elasticoviscous flow of liquid with short memory in two dimensional channel with porous walls

10 p1680 A69-23668

Differential equation for laminar flow of nonNewtonian fluid in annulus with porous walls of nonuniform permeability, considering inelastic and suction Reynolds numbers

10 p1680 A69-23690

Velocity distributions and skin friction coefficients in turbulent boundary layers over flat plate with injection or suction through porous wall

11 p1871 A69-25027

Temperature variations at porous wall surface as function of transpiration coolant flow rate

11 p2002 A69-25334

Steady flow field for viscous incompressible fluid in rotating pipe with porous walls determined from Navier-Stokes equations

11 p1875 A69-25481

Viscous incompressible conducting fluid flow through porous coaxial nonconducting cylinders under radial magnetic field with pressure gradients functions of time

12 p2062 A69-26275

Hydromagnetic flow of viscous conducting fluids through porous coaxial cylinders in radial magnetic field solved by Laplace transform

12 p2135 A69-26276

Model to study viscous flow characteristics in channel with porous walls and constant suction, noting non-monotonic velocity profile

14 p2429 A69-29015

Similar solution for free convective flow past vertical porous wall and unsteady flow past porous wall with dissipation term, using group transforms

15 p2592 A69-31010

Hele-Shaw and porous medium fuel tank systems behavior in simulated low gravity environment, studying sloshing, wetting, funnelling and fuel-driver gas interface stability

[AIAA PAPER 69-678] 17 p3021 A69-33444

Plane shock wave interaction with plane rigid net-like wall, obtaining Mach numbers for reflected and penetrating shock waves

17 p2957 A69-33719

Gas core reactor curved porous walls geometry tested with clear and smoky air injection, noting mass flow ratio in reactor cavity

18 p3171 A69-35181

Hydrodynamic stability of incompressible fluid boundary layer flow during blowing or suction through porous surface, determining Reynolds number lower bounds

18 p3124 A69-35381

Local heat transfer coefficients determined from temperature distribution on porous walls, deriving mathematical expressions for various surface geometries and transfer modes

20 p3630 A69-36977

Axial velocity and static pressure for incompressible fluid flow through straight smooth porous tube

[ASME PAPER 69-FE-44] 20 p3517 A69-38000

Law of wall parameters for compressible turbulent boundary layer with air injection through wall determined by analyzing data for hypersonic speeds

21 p3692 A69-38685

Temperature distribution determined for leading edge, convex and concave parts of turbine blade porous wall with effusion cooling

21 p3850 A69-38860

Heat transfer characteristics in evaporative, transpiration cooled porous systems

21 p3851 A69-39037

Viscoelastic fluid steady flow in porous walled channel, examining mass flow solution continuity

22 p3930 A69-40118

Laminar MHD flow in porous walled channel in transverse magnetic field, determining velocity distributions, induced fields and current over channel cross section

22 p3989 A69-40256

Laminar flow in porous circular pipe with constant suction or injection applied at wall

24 p4298 A69-42618

Turbulent flow in circular porous tube laminarized by uniform mass injection through tube wall, measuring velocity and turbulence intensity by impact probe

[ASME PAPER 69-HT-57] 24 p4303 A69-43537

Van Driest-Bradshaw model for calculating sublayer function for self preserving laminar boundary layers, discussing porous surface suction or acceleration effects

[ASME PAPER 69-HT-12] 24 p4304 A69-43557

PORPHYRINS

NT CHLOROPHYLLS

Biochemiluminescent luminol-peroxide reaction to detect iron porphyrin proteins in microorganisms for extraterrestrial life search, discussing reaction kinetics

15 p2556 A69-31325

Meteorites pigments identification as porphyrins for extraterrestrial life evidence, noting sample analyses of Orgueil, Murray, Cold Bokkeveld and Mokoia carbonaceous chondrites

22 p4008 A69-39889

Detection and spectral examination of trace porphyrin complexes by demetallation with methanesulfonic acid and spectrofluorometry, compared to absorption spectrophotometry

24 p4279 A69-42557

PORTABLE EQUIPMENT

Design aspects of 20 ft air transportable satellite earth station

08 p1272 A69-19926

Portable integrating sphere reflectometer, describing optical system, construction, etc
[AIAA PAPER 69-599] 17 p2973 A69-33264

Lithium peroxide utilization feasibility for oxygen supply and carbon dioxide control in extravehicular portable life support systems
[AIAA PAPER 69-620] 17 p2914 A69-33303

Portable piezoelectric acceleration sensor, describing characteristics and principles of operation
17 p2975 A69-33594

Self contained hand held battery operated aerosol particle analyzer, measuring aerosol concentration and size distribution for laboratory and space flight applications
18 p3136 A69-34691

Betatrions for nondestructive quality control for materials and products under special conditions
18 p3136 A69-34779

Portable electric lamp for work and photographic purposes in manned spacecraft, describing circuitry, construction and applications
[IES PREPRINT 30] 18 p3138 A69-35173

Electrostatic control for portable clean rooms, describing fabrication, assembly and checkout problems with Instrument Unit /IU/ control center for Saturn launch vehicles
19 p3428 A69-35550

Portable multiunit low pressure chamber with locks, permitting water replenishment, feeding of animals under continuous pressure and gas mixtures
22 p3891 A69-40217

Monopulse telemetry tracking system, describing equipment and mobile operation
22 p3900 A69-40681

Portable UHF telemetry receiving station for medium range surface-to-air missiles testing, analyzing antenna coverage over water and system prediction allowing variable parameters
23 p4122 A69-41780

Portable He-Ne laser design featuring positional adjustment for use in aligning optical systems
24 p4327 A69-42924

PORTS

Limitations of N-port concept in microwave technology, proposing definitions to avoid contradictions
11 p1841 A69-25624

POSITION [LOCATION]
NET SOLAR POSITION

Icarus asteroid position measurements by astronomical photography, noting comparison for two South African observatories
01 p0150 A69-10373

Optical identifications for 17 Ohio survey sources with peaked or flat spectra
01 p0153 A69-10854

Icarus positions from photographic observations with astrophot
01 p0159 A69-11331

Errors arising from inaccurate insertion of initial conditions in autonomous determination of coordinates of object moving along surface of spherical earth
02 p0281 A69-12137

Submicron particles spatial location in three dimensional volume detected by Fraunhofer holography
04 p0596 A69-14292

Galactic X ray sources noncoincident with conspicuous visible or radio objects, identifying visible and radio counterparts by determination of accurate celestial coordinates
05 p0813 A69-15845

Lunar occultations of radio source Sagittarius A observed at various frequencies between 230 and 2400 MHz, obtaining diameter, position and decimeter band flux densities
06 p1009 A69-17960

Predictor determining future position of TDMA /Time Division Multiple Access/ synchronous satellite communications system satellite from previously received bursts
07 p1076 A69-18553

Radio galaxies, quasars and radio stars between declinations plus 20 and plus 27 degrees, obtaining accurate positions and optical identifications
07 p1218 A69-19273

Crab Nebula pulsar NPO527 position measurement with split beam antenna, noting proximity and similar dispersion with NPO532
07 p1221 A69-19405

Vestibular analyzer role in spatial orientation under weightlessness conditions during aircraft flights, discussing underestimations of rotation angle of Barany chair
08 p1262 A69-19840

Time difference position determination system for space, surface and airborne vehicles, describing application to satellite navigation and air traffic control
08 p1348 A69-21066

Radio location system based on measuring distance between object and two stationary satellites, noting application to air traffic over North Atlantic
09 p1537 A69-21269

Polar flight navigation charts showing feasibility of three dimensional celestial positioning
09 p1538 A69-21406

Celestial X ray source positions from rotating modulation collimator, predicting performance of collimator
10 p1722 A69-23328

True position dimensioning and tolerancing /TPDT/ system usage in aerospace industry
10 p1700 A69-23355

Position of OH sources near seven galactic radio sources determined with two element variable-baseline interferometer, noting strong circular polarization
10 p1787 A69-24114

Radio sources optical positions for independent calibration sources
11 p1958 A69-24465

Plasmapause position measurements by ion mass spectrometers and broadband VLF receivers on OGO 1 and OGO 3 and by broadband recordings at Antarctica
11 p1878 A69-25153

Artificial noctilucent clouds or meteor trails positions determined by transforming photogrammetric coordinates
12 p2154 A69-25822

Inertial navigation platform principles including acceleration and position of vehicle, single axis platforms and stabilized element coordination
12 p2078 A69-25872

Large mirror support systems definition in terms of axial location and radial position
12 p2057 A69-26414

Spatial direction determination from simultaneous photographs of Echo 2 at Nikolaev and Helwan stations, using circle of simultaneity
12 p2068 A69-26427

Computer program solving for station coordinates and dynamical parameters at Smithsonian Astrophysical Observatory from optical data, laser range and range rate
12 p2068 A69-26428

Gustaffson pattern for variations in position of quiet homogeneous arcs, noting diurnal variations from visual observations at antarctic station
12 p2073 A69-26951

Satellite positions measurements by laser compared with radar and photographic methods, considering measurement errors
12 p2110 A69-27149

Optical identification of radio source 3C 230, suggesting removal from quasar list
12 p2173 A69-27171

Photographic observations of quasi-stellar objects for position determination
13 p2334 A69-27308

Spacecraft orientation from onboard stellar photographs, calculating absolute and relative elements, accuracy and camera parameters
13 p2296 A69-27696

Positions, spectral types and B magnitudes for possible field horizontal-branch stars at high galactic latitudes, selected from faint A star list
13 p2348 A69-27807

Photoelectric yellow and blue observations of variable V502 Ophiuchi, noting influence of partial eclipses on orbital determination reliability
13 p2348 A69-27809

Position determination from radio bearings using complex numbers, noting application to reconnaissance flight path
14 p2479 A69-29499

Cepheid variable 1 Carinae position in H-R diagram suggested from microturbulent velocity role in pulsational instability
14 p2522 A69-29590

Navy Navigation Satellite System /NAVSAT/ applications, considering nonmilitary marine and air all-weather navigation and positioning
14 p2479 A69-29856

Error assessment for 20 May 1966 annular eclipse observation point and observation time determination
15 p2686 A69-30533

Rescue locator beacons and airborne search equipment of VHF and UHF capabilities available to international civil aircraft operations
15 p2552 A69-30852

Orientation in proximity of moon and on moon surface utilizing maria, craters, etc
16 p2855 A69-31929

Exact positions of Ceres, Pallas, Juno and Vesta from 1941 to 1995 determined taking into account planets influence
16 p2859 A69-32224

Accurate optical position of quasars determined by plate overlap for radio interferometer calibration
16 p2859 A69-32229

Accurate positions at 2700 MHz and optical identification of radio sources with galaxies and quasi-stellar objects
17 p3035 A69-33611

CP 0950 and CP 1133 pulsating stars position, using radio telescope at two frequencies
17 p3036 A69-33639

Navigation and guidance systems for low altitude aircraft flight safety noting position determination, cockpit environment and fail-safe operation
17 p3002 A69-34080

Graphic representation of time dependence of sub-satellite points and orbital azimuths for relating satellite photographs to locality
18 p3128 A69-34818

Minor planets positions computer calculated and tabulated from Tashkent 1963 and 1964 astrophot observations, stating time and equatorial coordinates
20 p3596 A69-37312

Minor planets positions computer calculated and tabulated from 1966 and 1967 Crimean astrophot observations, using Yale catalog reference stars
20 p3570 A69-37313

Comet tails orientation determination for solar wind and interplanetary plasma investigation, considering geometrical difficulties and suggesting computation procedure
20 p3599 A69-37467

Space vehicle space-time position fiducial distribution and future location determinations based on inference theory
20 p3617 A69-37528

Tabulated results of photographic plate measurements of minor planets positions at Leiden observatory /1938-1964/
20 p3605 A69-37789

DIA satellite Doppler observations, noting effect of observation grouping on ground stations mutual position
21 p3701 A69-38336

Time difference position determination system for space, surface and airborne vehicles, describing application to satellite navigation and air traffic control
22 p3977 A69-39874

Compressor type cascade experiments to find closest possible traverse position to blade trailing edge
22 p3859 A69-40065

Airport location effect on facilities supply factors including atmospheric, environmental and economic conditions
22 p3926 A69-40431

Harmonia and Parthenope /minor planets/ positions, establishing time dependence of relation between image diameter and planet magnitude
22 p4025 A69-40614

Most probable position determination in astronomical navigation by tracing lines on nautical chart
23 p4186 A69-42025

Maritime navigation hyperbolic charts for aircraft position determination
23 p4186 A69-42026

Geographical position coordinates of radio operator determined by distance difference measurement using Loran and digital computer methods
23 p4186 A69-42027

Magnetic dip equator position at E layer and gradient with time and altitude, using geomagnetic field models
23 p4160 A69-42428

POSITION ERRORS

Ship navigation by altitude and azimuth measurements of artificial earth satellite, discussing position and reference errors and synchronous satellite advantages
[UN PAPER 68-95247] 01 p0112 A69-10461

Error reduction in initial azimuth alignment and azimuth and level axis gyro drifts in long range air transport gyro accelerator inertial systems
02 p0278 A69-12361

Probable errors in FK4 catalog of star positions and proper motions determined by Scott method
05 p0823 A69-16041

OMEGA position location equipment /OPLE/ test data to demonstrate feasibility of using OMEGA navigational system in conjunction with synchronous satellites

07 p1176 A69-19135

Hybrid OMEGA inertial system for following vehicle maneuver without lag developed by combining Schuler tuned inertial data and radio position data

07 p1177 A69-19209

Errors estimation in determination of radio signal source flux density, position and recorded half power widths

07 p1088 A69-19722

Pointing calibration of Haystack parabolic antenna by using radiometric measurements of cosmic ray sources

08 p1281 A69-20032

Range difference air navigation equations solution, discussing error updating of satellite position and constellation geometry

09 p1538 A69-21996

Stars astronomical positions elimination from photographic plates because of errors, discussing elimination criteria and picture taking method

10 p1784 A69-24034

Satellite position errors due to atmospheric instability, discussing altitude-temperature relation and stellar scintillation synchronism for stars at small angular distances

12 p2158 A69-26445

Navy Navigational Satellite System for position location accuracy in marine and oceanographic exploration applications [AIAA PAPER 68-471]

13 p2295 A69-27247

Fluidic attitude control systems performance prediction from conventional control analysis emphasizing steady state positioning accuracy

17 p2904 A69-34069

VOR/DME information augmentation by air data /airspeed/ for positional accuracy improvement, describing error sources, optimum data filter and system sensitivity and performance [AIAA PAPER 69-841]

21 p3762 A69-39372

Cumulative error in flight vehicle position determination by inertial navigation system, showing dependence on constant acceleration components

22 p3978 A69-40252

Pluto positions /1930-1965/ from photographic observations, ascribing declination errors to atmospheric dispersions

22 p4025 A69-40612

Mars positions determined from photographic observations by zone astrophotograph, establishing rms errors and objective centering error

22 p4025 A69-40613

Air traffic control transoceanic satellite system for minimizing navigation errors forcing wide separations, providing VHF voice communication and position surveillance

22 p3901 A69-41147

Terrain slope estimation of position errors of differential corrections in orthophoto production

22 p3951 A69-41245

Statistical analysis of position errors inherent in position-finding system utilizing position fixing planes in three dimensional space

22 p3979 A69-41253

Antenna pointing and tracking accuracy by identifying error sources in servo, structural, mechanical and alignment factors

23 p4125 A69-42126

Ionospheric irregularities effect on accurate satellite position determination in near real time

23 p4132 A69-42549

POSITION INDICATORS

NT PLAN POSITION INDICATORS

NT SPACECRAFT POSITION INDICATORS

Fluidic pulse time modulated angular position sensor for two axis hydrostatically supported gyroscope

02 p0249 A69-12087

High speed compression waves, rarefaction waves and gas interface regions position and velocity measurement in shock tube by sensing electrical impedance

03 p0428 A69-13104

Predictive logic control of on-off system with one position sensor [ASME PAPER 68-WA/AUT-14]

05 p0830 A69-16134

Phantom disk encoder for arc second digital position transducers

05 p0766 A69-16748

OMEGA position location equipment /OPLE/ test data to demonstrate feasibility of using OMEGA

navigational system in conjunction with synchronous satellites

07 p1176 A69-19135

Fluidic digital position sensor consisting of fluidic monostable amplifier, analyzing operation by characteristics method

15 p2554 A69-31301

Position sensitive sensors design of optical tracking systems with emphasis on amplitude, phase, frequency and pulse-time sensors

16 p2790 A69-32111

Electromagnetic accelerometer with symmetrically placed photocells detecting small steel ball position

17 p2971 A69-32897

Aircraft electromagnetic position finding system based on Doppler shift of CW carriers

17 p3002 A69-34078

Light aircraft emergency downed position indicators installation program, discussing transmitter minimum performance standards, listening watch insurance, etc

17 p2931 A69-34102

Artificial horizon indicator design modifications to facilitate maintaining horizontal aircraft position, discussing automatic pilot advantages in turbulence and flight simulators

17 p2903 A69-34214

Interpolated position and orientation perception by vision and active touch

24 p4275 A69-43116

POSITION SERVOS

U SERVOMOTORS

POSITIONING

Rib positioning effect on mechanical behavior of cantilevered rectangular plate in gas flow, considering critical flow velocities and rigidity relationships

01 p0165 A69-10085

Celestial navigation, discussing position fixing on rotating earth, time input, navigation aids and sextant angle

03 p0463 A69-13207

Optical sighting method for determining orientation of rocket on launch pad by laser collimator, noting lining up of Cassiopeia system

06 p0930 A69-17104

Optimum inertial/Doppler satellite navigation system, discussing position fixes application in resetting

08 p1349 A69-21199

Frequency domain stability criteria accuracy for application to fourth order nonlinear position control system

09 p1475 A69-22591

POSITIONING DEVICES [MACHINERY]

NT BOOMS [EQUIPMENT]

NT CAMS

Hydraulic-powered self propelled six degree of freedom loading vehicle moving tests assembly to test chamber with high accuracy positioning

20 p3511 A69-38181

Precision of gas turbine compressor blade positioning devices during machining, analyzing causes of inaccuracies

21 p3731 A69-38880

POSITIVE FEEDBACK

Positive feedback of spring mass system for mirror control on spectroheliometer of Apollo Telescope Mount flight

02 p0248 A69-11738

Dynamic mode locking of CW He-Ne laser by external regenerative feedback using RF beats between axial modes

02 p0260 A69-12657

Natural amplitude and phase fluctuations of originally monochromatic oscillations at output of regenerative frequency divider with thermal and shot noise

07 p1099 A69-18526

Signal processing regenerative technique used for multichannel predetection combining, including carrier suppressed signals

09 p1458 A69-22472

Regenerative amplifier to counteract cable damping due to narrow bandwidth in PCM systems

16 p2755 A69-31860

Regenerative Josephson effect detector with feedback-narrowed far IR response as tunable millimeter and submillimeter wave radiation detector

19 p3313 A69-36417

POSITRON ANNIHILATION

Positron annihilation in As, Sb, Bi, diamond, Ge, Si, S, Te and Se, noting contribution of valence electrons

03 p0485 A69-13295

Cosmic ray showers electron, positron and photon energy distribution functions calculated, considering

positron annihilation, Compton effect and relativistic electrons formation

13 p2303 A69-28413

POSITRONIUM

Positronium formation in positron-helium scattering, including polarizability in potentials appearing in final equations

24 p4353 A69-43815

POSITRONS

Gravitational force measurement on electrons and positrons in free fall through vertical metal tubes at low temperatures

01 p0125 A69-10979

Galactic halo chronology determination by positron component flux measurement in primary cosmic rays

08 p1386 A69-20084

Cosmic ray negatron and positron spectra using balloon-borne magnetic spectrometer, obtaining absolute solar modulation of positron flux

08 p1380 A69-20728

Annihilation gamma ray spectra from equilibrium spectra of secondary galactic positrons

14 p2514 A69-29948

Low energy positrons in cosmic radiation due to beta decay of carbon, nitrogen and oxygen isotopes, estimating positron fluxes and energy spectra

15 p2676 A69-30887

Electron-positron pair formation in electromagnetic field created by coherent laser light focused into vacuum with ideal lens

22 p3965 A69-41116

Positronium formation in positron-helium scattering, including polarizability in potentials appearing in final equations

24 p4353 A69-43815

POSTURE

Human postural muscle activity, motor reactions and dexterity during gravitational changes

07 p1063 A69-18593

Posture role in physiological effects of acceleration on motor activity, discussing gravitational importance to vital processes

13 p2211 A69-28593

Sensorimotor coordination of man performing graphic assignments in upright, reclining and prone position, discussing interaction of vestibular, visual and motor analysors

20 p3470 A69-37246

Diurnal rhythms of heart rate and blood pressure reactions to posture changes on tilt table, finding orthostatic lability maxima

23 p4094 A69-42072

POTABLE WATER

Analytical techniques for in-flight monitoring of aerospace water supplies for potability, emphasizing rapidity, sensitivity and reproducibility

01 p0019 A69-11339

POTASSIUM

NT LIQUID POTASSIUM

Alkali metal quadrupole spectral doublets used as diagnostic for determining alkali-metal plasma electron temperature

02 p0286 A69-11584

Potential energy functions based on electronegativities instead of spectroscopic parameters for Li and K molecules

03 p0472 A69-13805

Temperature dependence of isotope thermotransport in liquid K and Rb using steel capillary cells

03 p0533 A69-13970

Argon-K plasma electrical conductivity as function of electric current density at 1400-2400 K

05 p0798 A69-15614

Spectroscopy of potassium vapor using laser induced fluorescence, noting laser line coincides with several molecular transitions

05 p0771 A69-15907

Potassium ion resonant charge exchange, determining relation between effective cross section and ion velocity, using retarding field method

06 p0959 A69-16909

Enhanced two photon emission between 6S and 4S levels of K, discussing stimulated three photon Raman scattering and four photon parametric coupling processes

07 p1154 A69-19080

Barkhausen oscillator for LF domain by substituting Cs and K positive ions for electrons, giving oscillation curves and spectral analysis

08 p1280 A69-19981

Redistribution of potassium and argon in meteorites and rock samples, discussing thermal diffusion and grain size

08 p1405 A69-20926

DC plasmatron for heating argon with potassium additions at high temperatures and at near atmospheric pressure to obtain argon flow
09 p1547 A69-21596

Work function and desorption energy measurements of alkali metals from metallic substrates with modulated molecular beam, noting surface contamination
09 p1558 A69-21808

Correlation produced magnetoplasma mode in potassium confirmed by measurement of real part of surface impedance
10 p1728 A69-23168

Potassium vapor radiative perturbation by ruby laser radiation in glass cell with end windows, studying emission line structure
13 p2271 A69-27656

K and Ar 40 determination in iron meteorites by neutron activation for K/Ar dating
19 p3412 A69-36106

Ion production in K/diatom Br system by high energy K beam, obtaining total ionization cross section as function of energy
19 p3378 A69-36187

Drift velocity and lateral diffusion of positive hydronium, hydrogen and K ions in hydrogen with zero field mobilities
20 p3580 A69-38026

Pumping model for analyzing stimulated and enhanced potassium multiphoton emission primed by ruby laser-stimulated Raman electronic radiation
23 p4171 A69-41391

Electrothermal waves in nonequilibrium electrical discharge in potassium seeded argon plasma
24 p4359 A69-43645

POTASSIUM BROMIDES

Low temperature grinding technique for IR spectra of propellants and binders in potassium bromide disks
01 p0082 A69-10892

Laser holography using colored KBr crystals subjected to hard gamma radiation as photosensitive material
04 p0598 A69-14855

Laser holography using colored KBr crystals subjected to hard gamma radiation as photosensitive material
15 p2608 A69-30247

Velocity and angular distributions of KBr formed in reactive collisions between crossed molecular beams of K and thermal HBr/DBr/
18 p3178 A69-35476

POTASSIUM CHLORIDES

Paraelectric resonance spectroscopy on KCl, using bistable dipole model
06 p0982 A69-18235

PbTe single crystal films growth on KCl studied by electron microscope, observing vapor crystal mechanism without coalescence of contacting crystals
10 p1745 A69-23323

Multiphoton luminescence and photocurrent excitation by ruby and neodymium laser beams of KCl-Eu single crystals, noting brightness dependence on laser beam power
19 p3335 A69-36165

POTASSIUM CHROMATES

Catalytic effect of potassium bichromate and chromic oxide additives on burning of ammonium perchlorate and mixtures
08 p1375 A69-19997

Raman effect in potassium dichromate single crystal, discussing symmetrical and antisymmetrical internal vibrations of free ions
12 p2105 A69-26285

POTASSIUM COMPOUNDS

NT NEPHELINE
Subsolidus equilibrium study in potassium tantalate K niobate system for dry and hydrothermal runs, using X ray powder diffraction and petrography
08 p1332 A69-20373

POTASSIUM HYDROXIDES

Nonpolar gases solubilities in aqueous KOH solutions in temperature range 25 to 100 C, noting activity coefficients, salting out coefficients and heats of solution
10 p1651 A69-22937

POTASSIUM ISOTOPES

Early disturbances in active migration of potassium 42 ions in irradiated erythrocytes in rats, showing relation between influx and energy exchange in cells
10 p1647 A69-23966

POTASSIUM PERCHLORATES

Component ratio effect on pressure dependence of burning rate in ammonium and potassium perchlorate mixed with organic compounds, graphite and tungsten
12 p2027 A69-26474

POTASSIUM PHOSPHATES

Electro-optical device using KDP crystal for laser beam deflection at temperatures near Curie point
03 p0435 A69-12984

Parametric light generation employing KDP nonlinear crystals with mechanically tuned frequency
03 p0437 A69-13045

Second optical harmonic generation in uniaxial negative potassium dihydrogen phosphate, noting influence of generating process on angular structure and output power
03 p0439 A69-13057

Laser radiation influence on effectiveness of frequency doubling in KDP crystal
04 p0612 A69-15375

Second harmonic generation conversion efficiencies at 5300 A with KDP and lithium niobate crystals, using Nd-glass laser of high radiance and narrow bandwidth
09 p1514 A69-21333

Gas laser modulation steady state characteristics with KDP crystal in cavity, noting output power dependence on applied electric field
13 p2273 A69-28432

Laser radiation influence on effectiveness of frequency doubling in KDP crystal
16 p2797 A69-32122

Second harmonic emission in KDP crystal using ruby rod as active material, discussing difficulties encountered by diffused reflector
20 p3552 A69-36970

Electrocaloric effect from 78-130 K on crystalline potassium dihydrogen phosphate, showing quadratic dependence on applied field /and polarization/ in paraelectric phase
20 p3583 A69-37343

Nonmonochromatic laser emission frequency characteristics, studying second harmonic generation in nonlinear KDP crystal
20 p3554 A69-37727

Beam divergence and multimode laser visible emission influence on power and angular structure of second optical harmonic generated in KDP crystals
24 p4328 A69-43161

POTASSIUM 40

Body composition of USAF flying personnel, evaluating obesity by using radioactive potassium /K-40/ method
14 p2409 A69-29295

POTATOES

Radiosensitivity of potatoes to gamma ray and proton irradiation applied to whole tubers and to isolated eyes before planting
05 p0709 A69-16511

Sweet potatoes productivity and nutritive value as carbohydrates source in manned spaceflights
13 p2216 A69-28619

Radiosensitivity of potatoes to gamma ray and proton irradiation applied to whole tubers and to isolated eyes before planting
18 p3095 A69-34730

POTENTIAL

Completeness and relations between potentials and stress functions in micropolar elasticity and thermoelasticity
19 p3439 A69-36476

Retarding potential analyzers determining ionospheric structure, noting linearization of analysis
22 p3940 A69-40523

POTENTIAL ENERGY

NT BIOELECTRIC POTENTIAL

NT CONTACT POTENTIALS

NT COULOMB POTENTIAL

NT ELECTRIC POTENTIAL

NT GEOPOTENTIAL HEIGHT

NT IONIZATION POTENTIALS

NT LIENARD POTENTIAL

NT LOW VOLTAGE

NT PHOTOVOLTAGES

NT PLASMA POTENTIALS

NT SPIKE POTENTIALS

Potential energy functions based on electronegativities instead of spectroscopic parameters for Li and K molecules
03 p0472 A69-13805

Increasing vortex tubes energetic cooling efficiency for cooling aircraft components by using potential energy of gas emitted from tubes
04 p0684 A69-14488

Alkali metals thermoelectric power and energy dependence of Heine-Abarenkov pseudopotential, taking into account anisotropy effects
05 p0809 A69-16507

Vacancy relaxations in bcc crystals using energy dependence on radial displacements from defect of nearest neighbor sets, discussing crystal size and shape
05 p0809 A69-16529

Unsymmetrically laminated simply supported plates approximate solutions, considering potential energy and reduced stiffness matrix
07 p1232 A69-18725

Atmospheric circulation intensity measurement, using potential energy conversion to kinetic or kinetic energy dissipation by friction
07 p1175 A69-18947

Optical potentials for rotational and vibrational transitions in inelastic molecular collisions, considering adiabatic and sudden approximations
08 p1358 A69-21008

Plasma transport properties derived from Boltzmann equation using Debye shielded-Lande potential to represent collisions, noting viscosity and thermal conductivity
09 p1553 A69-22539

Total planet interaction energy of comets passing through solar system, showing non-Gaussian shape of distribution
10 p1774 A69-22970

Linearized atmosphere model above flat earth, applying variational principle to energy between geostrophic equilibrium and reestablished states
12 p2125 A69-25954

Exact solutions for two state potential curve crossing in subexcitation molecular collisions in terms of various decoupling schemes
12 p2131 A69-25983

Atmospheric energy budget of latent and sensible heat and potential energy between equator and 60 degree N
12 p2066 A69-26132

Energy budget equations applicable to limited atmospheric region using available potential energy concept, discussing relation to global energy
15 p2648 A69-30221

Temperature dependence of intermolecular interaction averaged potentials with respect to vibrational states
15 p2655 A69-30982

Potential and kinetic energy of cylindrical thin shell with cutout approximated by two dimensional finite difference methods, obtaining eigenvalue problem [AIAA PAPER 68-318]
16 p2874 A69-32158

Iterative potential between alkali ions and rare gas atoms, using model accounting for repulsive and attractive exchange forces
16 p2815 A69-32464

Elastic sandwich structures design for maximum strength, using potential energy functional to derive governing equations
17 p3062 A69-33708

Floating body attitude and stability analysis based on system potential energy balance, considering Archimedes principle, torques, equilibrium conditions, body shape, etc [SAWE PAPER 773]
18 p3172 A69-34874

Buckling stresses in thin walled box girder under bending determined using stationary potential energy criterion
18 p3224 A69-35344

Earth gravitational potential energy changes in examining expanding earth theory
22 p3936 A69-40180

Self consistent field molecular orbital method in LCAO/linear combination of atomic orbitals/ approximation applied to LiH ground state for potential energy curve
22 p3985 A69-40721

Energy equilibrium for crack growth in elastoplastic media, analyzing crack behavior during plastic deformation concentrated at edge of propagating crack
22 p4046 A69-41060

Stress-strain relations for materials with variable modulus of elasticity applied to internal work, obtaining potential strain energy
22 p4047 A69-41171

Potential energy modeling method for optimal design of structural systems with diverse performance criteria, giving truss design example
23 p4228 A69-41923

Integral transformation applicability to inverse problems concerning interaction potential energy between particle pairs in n-dimensional Euclidean space
23 p4182 A69-41960

Differential operators representing potential energy of thin shell, discussing self conjugacy of boundary value problems
23 p4229 A69-41999

POTENTIAL FIELDS

Positive ion beam probe for approximate static electric field distribution in low pressure RF discharges, analyzing deflection data for potential distributions

02 p0287 A69-11838

Stability margin difficulties in equilibrium application to continuum mechanics

03 p0418 A69-13816

Two dimensional magnetosphere with tail and neutral sheet, using Chapman-Ferraro approximation by mapping in potential plane

03 p0425 A69-14011

Closed analytic expressions for vector potential and magnetic field generated by axisymmetric multipole line currents

06 p0965 A69-17518

Quasi-random properties of dynamic system generated by solutions of second order differential equations

06 p0948 A69-17657

Quasi-integral operator applicability to analytical continuation of potential field into complex region arising during gravitational and magnetic anomalies interpretation

10 p1689 A69-24082

Stability of uniform rotations of gyrost at fixed point in potential force field, considering Routh rule

11 p1918 A69-24786

Knudsen arcs in argon showing potential well presence with anode barrier and cathode potential drop, establishing slow electrons thermal equilibrium

12 p2137 A69-26536

Waveguide higher order modes solved by finite-difference method, using successive overrelaxation to compute field potentials at discrete points in arbitrary guide shapes

13 p2228 A69-27670

Quasi-integral analytic continuation operator applicability to potential field approximated by certain truncated series expansion

14 p2470 A69-29032

Electron current, space potential and ionic composition obtained by Langmuir type probes on Explorer 31 for disturbance region dependence on ionic composition

14 p2518 A69-29122

Integrable cases of equations of motion of solid body around fixed point located in potential field of elastic supports

15 p2653 A69-31194

Steady state sunlit lunar surface electrostatic charge and potential distributions, noting electrons photoemission and solar wind particles collection

20 p3609 A69-38077

Motion of body with cavity completely filled with viscous fluid about center of mass in potential mass-force field, applying small parameter method

22 p3980 A69-40109

Geomagnetic multipole parameters changes using spherical harmonic coefficients of geomagnetic potential, relating to secular variation field

23 p4158 A69-42171

Continuous potential fields modeling based on electrohydrodynamic analogy extended to flows involving stream separation

24 p4300 A69-43089

POTENTIAL FLOW

NT EQUIPOTENTIALS

Potential flow of stream interaction with two dimensional thin jet, discussing jet penetration depth

01 p0007 A69-11019

Forced convection heat transfer coefficient invariance to flow reversal in Stokes and potential streaming flows past isothermal particles of arbitrary shape

04 p0590 A69-15274

Equations of motion derived for incompressible and irrotational viscous fluids in special relativity

05 p0792 A69-15682

Lift and drag coefficients for circular cylinder immersed in time dependent flow analyzed using potential flow model

[ASME PAPER 68-FE-15] 05 p0747 A69-16072

Unsteady potential flow and wake near oscillating circular cylinder noting velocity, pressure and correlation measurements

[ASME PAPER 68-WA/FE-23] 05 p0749 A69-16099

Integral method for backward boundary layers, developing third order polynomials for two dimensional potential flow toward opening

05 p0752 A69-16737

Numerical method for attacking-lifting problems of general three dimensional wing executing arbitrary motion in potential flow

[AIAA PAPER 69-23] 06 p0862 A69-18040

Circular turbulent air jet from flat plate into deflecting stream analyzed with potential flow model, noting applicability to V/STOL aircraft technology

[AIAA PAPER 69-223] 07 p1051 A69-19557

Flow rates characteristic of trapezoidal geometries encountered after schematization of noncylindrical ducts involving irrotational flow, leakage, heat exchanges and electrical conduction phenomena

08 p1303 A69-20270

Arbitrary stationary foil in perfect incompressible fluid moving at constant velocity at infinity assuming plane, steady and irrotational flow

08 p1303 A69-20272

Irrotational plane subsonic flow of compressible fluid about obstacle, reducing problem to integration of linear partial differential equation with boundary conditions

09 p1480 A69-21735

Finite difference numerical solutions to free stream-line axisymmetric potential fluid flow, noting independent and dependent variables consideration in boundary value problem

09 p1481 A69-21920

Incompressible two dimensional potential flow analysis with compressibility effects for thick highly cambered multibodies in cascade, noting slotted compressor blade performance

[ASME PAPER 69-GT-6] 09 p1432 A69-22507

Incompressible fluid flow engine spiral casing, considering flow as potential flow

10 p1632 A69-22914

Asymptotic boundary curves for two dimensional and axisymmetric incompressible irrotational flows into throat of convergent duct

10 p1680 A69-23893

Three dimensional compressible potential flow in curved circular duct analyzed by perturbation method

11 p1867 A69-24607

Large amplitude symmetric and asymmetric irrotational motion of inviscid incompressible fluid with liquid-vapor interface in accelerating cylindrical container of revolution

11 p1871 A69-25124

Thin deformable body motion in disturbed potential flow of ideal incompressible fluid

11 p1876 A69-25488

Potential triple traveling space waves in barotropic gas with arbitrary equation of state, analyzing adjacent and three dimensional self similar flows

12 p2061 A69-25889

Velocity fluctuation amplitude in potential cone of plane jet compared to properties of irrotational fluctuations induced by flow boundaries

13 p2247 A69-27736

Transonic ideal gas flow past semiinfinite bodies, determining flow potentials from body perturbations and surface boundary conditions

14 p2390 A69-29476

Book on mechanics of deformable media covering fluid and solid mechanics and applications to irrotational flows of compressible and incompressible fluids

16 p2813 A69-32789

Bag type deformation of incompressible viscous convective and nonevaporating droplets immersed in Stokes or potential flow pressure distributions, including Weber number

[AIAA PAPER 69-669] 17 p2954 A69-33456

Three dimensional potential surface flow past rotor blade in hover, accounting for compressibility and blade element theory limitations

[AHS PAPER 324] 17 p2895 A69-33537

Pressure distribution in two dimensional incompressible potential flow on Joukowski airfoils with normal upper surface spoilers, emphasizing potential flow theory

[AIAA PAPER 69-737] 18 p3083 A69-34402

Force on circular plate near screen due to incident potential incompressible jet flow

19 p3297 A69-35816

Generalized series solutions of boundary layer flows over pointed and blunt noses axisymmetric bodies, noting general potential flow extending Mangler transformation usefulness

20 p3514 A69-37211

Potential flow theory applied to determination of airfoil separated vortex flow and maximum lift and Reynolds number dependence

20 p3459 A69-37421

Second circle theorem for two dimensional irrotational flow of incompressible inviscid fluid in z plane

20 p3518 A69-38316

Potential flow interaction effects between blade rows in axial flow compressor stage, emphasizing inlet guide vane-rotor interaction

21 p3643 A69-38439

Potential flow past plane array of thin blades, analyzing perturbed dynamic behavior

21 p3696 A69-39243

Nonlinear incompressible potential flow with unbounded free surfaces, analyzing singularities in finite part of space

21 p3696 A69-39295

Plasma pause form in equatorial plane in presence of magnetospheric tail subsonic potential convective flow

22 p3942 A69-41103

Perturbation velocity potential of unsteady potential flow of barotropic gas past cascade of thin blades oscillating harmonically

24 p4244 A69-42716

Gas flow past bodies, deriving solution method without partial differential equations for flows with momentum potential

24 p4244 A69-43071

Unsteady axisymmetric potential flow of ideal incompressible fluid with free surfaces, deriving differential equations for gas bubble dynamics and surface geometry

24 p4302 A69-43500

POTENTIAL GRADIENTS

Critique of paper on theory of gradient instability in semiconductor currents, questioning boundary value problems solution validity

03 p0487 A69-13728

Potential distribution approximations for junction semiconductor devices, noting application to barrier layers and electron tunneling

03 p0408 A69-14107

Surface potential measurements for flat conductors or semiconductors using scanned electron beam probe

04 p0601 A69-15115

Potential gradient, small ion density and space charge density measurements for atmosphere on Atlantic Ocean during 1965

04 p0594 A69-15159

Low temperature plasma electric arc source operation describing current voltage characteristics and potential distribution

05 p0802 A69-15902

Solar flare influence on potential gradient and air-earth current properties at high mountain stations

05 p0759 A69-16634

Thermal EMF in epitaxial films, analyzing potential distribution in p-n junction with temperature gradients and film thickness effects

09 p1555 A69-21473

Increases of Newtonian potential, gradient and second derivative on gravitating body, considering positive and negative masses

13 p2300 A69-28545

Potential distribution between point in interelectrode gap and thermionic converter cathode in collisionless mode under transverse magnetic field

14 p2401 A69-29235

Thermal EMF in epitaxial films, analyzing potential distribution in p-n junction with temperature gradients and film thickness effects

15 p2669 A69-30718

Retarding potential analyzers to measure rocket vehicle potentials and ambient electric fields in active auroras

20 p3542 A69-37793

POTENTIAL THEORY

Vector potential used to express equations of incompressible fluid motion in form suitable for digital solution, discussing boundary conditions

01 p0058 A69-10228

Tensor character of fictitious potential function introduced to approximate locally tangent actual potential function, discussing planetary gravitational anomaly observation from orbiting vehicles

[AAS PAPER 68-198] 02 p0312 A69-11476

Cauchy problem and mixed boundary value problem for parabolic system solved with thermal potential theory

03 p0455 A69-13259

Vector potentials for Dirac equation derived assuming time independent external magnetic field without scalar potential

04 p0638 A69-15273

Thermal potential P and Q smoothness on surfaces, proving relevant theorems

05 p0849 A69-16452

Transverse motion of embedded or free semiinfinite beam with given initial displacement and velocity, using potentials leading to integral equations

[ONERA-TP-653] 07 p1230 A69-18264

Dirichlet and Neumann problems solvability using potential theory methods, limiting study to three dimensional domains

07 p1173 A69-18496

Gas breakdown in HF uniform electric field without steady transverse magnetic field

07 p1194 A69-19415

Metallic single and double plasma probes, discussing floating potential and ion saturation current

08 p1316 A69-20473

Intermolecular potential function relation to individual macroscopic properties extended to simultaneous fit of all possible pair combinations

10 p1652 A69-23391

Numerical orthonormalized system of functions for formulating functional equations in potential and elasticity theory, considering boundary value problems

10 p1801 A69-23687

Circle theorem for iterated equation of generalized axisymmetric potential theory, noting Stokes flow of viscous liquid

10 p1680 A69-23718

Equivalence of initial boundary value problem and integral equations obtained by regularization using potential theory

10 p1721 A69-23959

Boundary value problems of thermoelasticity, discussing existence and uniqueness theorems, ellipticity, thermoelastopotentials, Liapunov-Tauber theorem, Fredholm theorems, etc

12 p2182 A69-26726

Finite difference solution to TEM mode transmission line cross section for defining continuous potential function leading to capacitance upper bound

13 p2221 A69-28064

Potential functions applications to three dimensional static elasticity problems of parallelepipeds, using general stress solution

15 p2715 A69-31216

Monograph on ring airflow theory with nonuniform incidence covering steady flow and shear flow transition into boundary value problem of potential theory

17 p2889 A69-32995

Plane membranes finite deformation, deriving energy theorems for potential U bounds estimation

20 p3624 A69-37588

Equivalence of initial boundary value problem and integral equations obtained by regularization using potential theory

21 p3756 A69-39150

Protoelastic materials defined in terms of protopotential function, discussing stress tensor dependency on displacement gradients within body

22 p4042 A69-40452

POTENTIOMETERS [INSTRUMENTS]

Potentiometer transient contact resistance determined as function of contacts physical parameters

23 p4166 A69-41996

POTTING COMPOUNDS

Potting material reinforcing honeycomb structures for fastener installation prior to bonding face sheets to core, noting mechanical properties

24 p4326 A69-43466

POWDER [PARTICLES]

NT FINES
NT METAL POWDER
NT POWDERED ALUMINUM

Powders and explosives - Conference, Brussels, September 1966

02 p0301 A69-11519

Ionic and nonionic mineral oxide powder fillers influence on stereopolymers lattices formed from phenolformaldehyde oligomers, discussing mechanical properties

08 p1335 A69-20331

IR emissivities of powdered silicates and cloudy atmosphere model of spectral emission for radiative transfer in condensed powder

10 p1778 A69-23414

Pressure calcinering process in production of fine grained ceramics at low temperatures

12 p2119 A69-26832

Conformally plane solutions to Einstein equations derived with energy momentum tensor characteristic of pulverized material representing gravitational fields

13 p2298 A69-27796

Shear flow, cohesion and internal friction measurements of low bulk density particulate silicates of complex shape, noting significance for lunar comparison

24 p4383 A69-43040

POWDER METALLURGY

Substructural void formation in tungsten powder metallurgy as function of annealing temperature for doped, undoped and electron beam melted material

01 p0093 A69-10061

Nichrome bars production dispersion hardened by alumina and zirconia inclusions, noting extrusion temperature influence

01 p0085 A69-10397

Creep behavior of chemical vapor deposited tungsten at high temperatures by creep-rupture tests compared with powder metallurgy tungsten

01 p0097 A69-10647

Preparation of refractory alloys in powders, fibers and sintered billets by thermochemical method [ONERA-TP-636]

02 p0251 A69-11625

Lattice deformation relationship to dislocation density in vanadium carbide powders

02 p0265 A69-12001

Sintered molybdenum deoxidation effect with C, B and Si, analyzing hardness, tensile strength and ductility

02 p0265 A69-12002

Chromium bronze blanks compacted from granules for hardness and electrical conductivity, noting improved high strength characteristics over conventional production methods

02 p0266 A69-12127

Exothermal effects during sintering of nickel-aluminum powder mixture

02 p0269 A69-12838

Exothermal effects during sintering of nickel-aluminum powder mixture, showing role of liquid phase decomposition and intermetallics

02 p0269 A69-12843

Powder metallurgy, fusion and chemical vapor deposition techniques in manufacturing tungsten base alloys

07 p1165 A69-18792

Polycrystalline beryllium specimens fabricated from powders, discussing initial powder particle size and distribution effects on microyield strength

07 p1168 A69-19598

Physical properties control in nickel powders obtained by hydrogen reduction of nickel diamine sulphate solutions

08 p1334 A69-21057

Complicated power metallurgical shapes fabricated by hydrostatic pressing, noting spheres, cones, rods, tubes and combinations

09 p1511 A69-22353

Porous structures, using spherical tungsten powders, discussing metallurgy, sintering, temperature effects and performance characteristics in ion engines

10 p1710 A69-23166

Beryllium cermet compositions, discussing beryllium oxide content, mechanical strength and elastic and shear moduli

10 p1711 A69-23334

Fiber reinforced metals, discussing crystalline whiskers, metallic and ceramic fibers and mechanical characteristics

10 p1711 A69-23335

Slip casting powder mixture of zirconium carbide and tungsten, discussing optimum composition

10 p1716 A69-24056

Sintered metal powder process for metal-to-ceramic seals for thermionic converters, giving results for tensile strength, thermal cycling and cesium corrosion

14 p2454 A69-29211

Be billets fabrication from powders by cold hydrostatic pressing and pressureless sintering, noting hardness, density and grain size dependence on temperature

14 p2465 A69-29681

Yttrium effect on rate of thermal decomposition of silver carbonate powder and pressed pellets by isothermogravimetric analysis, examining water vapor, Co 60 gamma radiation and temperature effects

15 p2561 A69-30442

Powder properties effect on rolled strip thickness and compactness, angles, pressure at roll and torsion during rolling, analyzing Fe, Ni and Cu powders

15 p2630 A69-31183

Creep rate-stress-temperature relations for powder metallurgy rhenium, discussing activation energy

17 p2991 A69-34186

Re and Re alloy powder metallurgy, noting fabrication of Re coated W particles

20 p3562 A69-37749

H release, pressure and oxide layer formed by reaction during ball milling Cr in water

21 p3728 A69-38567

Powder metallurgy all inert processing method for producing nickel base superalloys forgings, discussing microstructure, reproducibility, mechanical properties, etc

[ASM PAPER GG-8-3-3] 21 p3745 A69-38929

Recrystallization during sintering of free flowing Nb and Ti carbide powders, determining grain growth dependence on temperature and activation energy

22 p3970 A69-40636

Surface chemistry effect on physical properties of pressure sintered Be metal, suggesting surface alloying approach by powder metallurgical techniques

24 p4332 A69-42963

POWDERED ALUMINUM

Aluminum corrosion and inhibition mechanisms in ethylene glycol/water solutions, using controlled powder immersion tests

02 p0265 A69-11895

High speed photographic study of finely dispersed Al particles combustion and ignition in high temperature gas flows, noting dependence on oxidizers concentration

08 p1375 A69-20341

Explosive compacting of aluminum powder, describing operational and experimental techniques, compacts hardness and density, mass production feasibility, etc

16 p2793 A69-31790

Combustion of isolated aluminum particles ignited by laser and burning in controlled gas mixture observed by cinephotomicrography [WSCIPAPER 69-3]

16 p2830 A69-32344

Nonsteady propellant burning theory for Al melting role in suppressing combustion instability in solid propellant rocket motors

19 p3393 A69-36814

POWDERED METALS

U METAL POWDER

POWER AMPLIFIERS

Solid state broadband RF power amplifier for airborne HF radio, eliminating total servosystem and all higher voltage components

17 p2942 A69-34114

One kw HF ground grid wideband untuned power amplifier in transformer coupled cascade stages

20 p3488 A69-37286

Carbon dioxide laser amplifiers gain saturation time dependence characteristics by theoretical model taking rotational relaxation into account

21 p3736 A69-38941

Thermal design of power amplifier for airborne HF transceiver, discussing component layout, air cooling and materials

22 p3909 A69-39942

POWER CONDITIONING

Power converter design for electrically propelled spacecraft, discussing weight, reliability, and thruster load requirements

[AIAA PAPER 69-240] 09 p1568 A69-21732

Aerospace NiCd batteries charge control, discussing depth of discharge, limiting voltage and environmental temperature interrelationship

23 p4071 A69-42282

Modularized static AC and DC inverters and converters for aerospace electrical power conditioning systems, discussing circuit functions and performance tests

23 p4073 A69-42292

Power conditioner for use with SERT II mercury ion thruster, describing electrical and mechanical design and operation

23 p4075 A69-42301

POWER CONVERSION

U ELECTRIC GENERATORS

POWER DENSITY

U FLUX DENSITY

POWER EFFICIENCY

Maximum power efficiency of pulsed injection laser with Fabry-Perot cavity expressed in terms of two dimensionless geometric variables

01 p0089 A69-10119

Gunn generator efficiency dependence on diode and regime parameters using computer model

01 p0042 A69-10319

Low and high power pi-mode Ladderton oscillator design operation and performance characteristics

03 p0405 A69-13726

Output power, efficiency and gain of two stage magnetron-type cascade amplifier

03 p0407 A69-13978

Bleaching of absorption hologram diffraction gratings for improved light efficiency, discussing bleaching materials results

04 p0596 A69-14284

High efficiency microwave oscillations in Si p-n and p-n-n positive avalanche diodes under pulsed conditions 04 p0580 A69-15491

High voltage mercury electron bombardment ion thruster power efficiency [ECS PAPER 170D] 05 p0812 A69-16233

High efficiency ion lasers without additional axial magnetic field 06 p0938 A69-18221

High power coupled cavity traveling wave tube for satellite communication, noting design techniques and performance characteristics 07 p1094 A69-18427

Streaming gas effect on carbon dioxide-nitrogen-helium laser power, discussing gas renewal phenomenon and evacuation rate 07 p1145 A69-18476

Epitaxial GaAs IMPATT diodes for generating CW X band power, noting high efficiencies and low noise characteristics 07 p1102 A69-18660

Space harmonics effect on helical TWT design, discussing operating voltage, beam radius, perveance and maximum allowable gain 07 p1105 A69-18950

Low density Hall ion thruster with application to Van Allen probe and orbit-to-orbit transfer [AIAA PAPER 69-281] 09 p1562 A69-21229

Radiation cooled MPD arc thruster design and performance, noting specific impulse relation to arc spoke rotation frequencies 09 p1566 A69-21259 [AIAA PAPER 69-245]

Cylindrical thermionic converter with vapor deposited rhenium emitter and niobium collector, measuring efficiency and power density 09 p1438 A69-21817

Out-of-core thermionic reactor power increase by using central heat pipe in coaxial cavity 09 p1441 A69-21836

Communication satellite power utilization optimized by matching final amplifiers to solar cell array [AIAA PAPER 68-437] 09 p1442 A69-21990

Turbine blade cooling research programs, discussing effects of increased trailing edge thickness and cooling air on turbine efficiency [ASME PAPER 69-GT-15] 09 p1432 A69-22501

Photocell base thickness for optimal power to weight ratio, noting photons spectral distribution and absorption coefficient dependence on frequency 09 p1443 A69-22719

Power conversion efficiency of diverging channel nonequilibrium MHD generator with small electrode losses, examining influence of channel design 10 p1637 A69-23472

Photoelectric, calorimetric and photon-momentum methods for measuring laser output energy and power emphasizing liquid, wire and pyroelectric calorimeters 11 p1899 A69-25196

Thermoelectric power generators energy output efficiency, discussing thermal and electric contact resistances influence for optimizing parameters 12 p2016 A69-26364

Power losses of varactor frequency multipliers with series connected circuits including open circuit tuned to second harmonic 12 p2043 A69-26888

Wet steam injector power losses in nozzle as function of humidity, noting compensation of nozzle throat diameter and fluid flow rates 13 p2246 A69-27490

Single wavelength design with compensation compared to multiwavelength design without compensation for liquid metal MHD induction converter, discussing optimization 13 p2207 A69-27504

Traveling wave tubes for high efficiency and extreme environments, discussing power output and RF drive 13 p2232 A69-28055

High power voltage tunable magnetron, discussing operating characteristics, life and applications 13 p2232 A69-28056

Traveling wave tubes with broadband CW power, discussing energy dissipation 13 p2232 A69-28057

Magnetically shielded O type backward wave oscillators for military and commercial applications 13 p2232 A69-28059

Nonlinear distortions in TWT for communication satellites applications, discussing relationship with efficiency 13 p2232 A69-28060

Error analysis in efficiency measurement of gas turbines, considering thermodynamics and power output 14 p2509 A69-29509

Power conversion efficiency of frequency doubler using ideal nonlinear capacitance with arbitrary output phase angle 14 p2421 A69-29537

Neutron irradiation effect on efficiency and other parameters of IMPATT diode 14 p2423 A69-29761

Resonance measurement of power percentage in single spurious mode of overmoded waveguide, using back to back transducers and reflection at input 15 p2577 A69-30611

Logic family with low power consumption subjected to 1 Mev electrons analyzed within telemetry circuit concept for space application 15 p2625 A69-30830

Equatorial mounted solar energy concentrator efficiency compared to unconcentrated sunlight and artificial UV-visible light source in reducing Pb tetraacetate solution in acetic acid 16 p2736 A69-31814

Zinc diffused GaAs avalanche diode high CW power and efficiency in normal mode 16 p2760 A69-32015

Solar cell characteristics at low temperatures, noting efficiency increase with decreasing temperature 19 p3251 A69-35691

Attitude control rocket exhaust plume impingement effect on electrical performance and mechanical damage of commercial silica covered silicon solar cells 19 p3252 A69-35700

Thermoelectric power generator with variable thermal conductivity and electrical resistivity, obtaining steady state temperature distribution, power output and thermal efficiency 22 p3868 A69-40131

Aperture efficiency, weight and control power requirements for hybrid matrix arrays in synchronous satellite applications, calculating residual array gains 22 p3915 A69-40707

Jet condenser at very low pressure in organic Rankine cycle power conversion system noting role in power efficiency 23 p4068 A69-42238

Mush cathode fabrication and characteristics for high power klystrons, comparing efficiency to oxide cathodes 23 p4144 A69-42532

POWER GAIN

On-axis gain of parabolic reflector antennas with rough reflecting surfaces as function of surface deviation, correlation distance, area and wavelength 01 p0041 A69-10246

Directional antennas gain loss on ground sections calculated on basis of difference-phase measurements data 02 p0214 A69-11612

Output power, efficiency and gain of two stage magnetron-type cascade amplifier 03 p0407 A69-13978

Reflections from input and output ducts influence on gain of TWT strophotron amplifier with/without allowance for back radiation 03 p0407 A69-13980

Rear gain control of dielectric rod antenna in airborne Doppler system with choke at feed point 04 p0576 A69-14770

Laser power increase noting influence of Mandelstam-Brillouin induced backscattering 04 p0612 A69-15414

Emitter base lateral diode carrier injection effect on current gain properties of small area double diffused planar transistors 05 p0728 A69-15808

Buildup modes of He-Ne laser in presence of other strongly oscillating modes, noting gain interaction effects 05 p0773 A69-16289

Gain degradation under applied voltage and injection current during low dose gamma irradiation by Co-60 source for bipolar transistors 06 p0977 A69-16880

Compact hydraulic power transfer units in aircraft with common connecting shaft for pump/motor elements, discussing integrated power package 06 p0930 A69-17168

X band CW traveling wave tube developed for communications, ECM and plasma research, discussing design, performance and gain ripple diminution 07 p1094 A69-18425

Power traveling wave tubes in ground stations for IN-TELSAT 3 direction finding system 07 p1094 A69-18426

Pumping power effect on He-Ne laser amplification factor dependence on temperature and discharge currents 07 p1149 A69-18935

Continuous wave and pulsed IR signals amplification on carbon dioxide laser amplifiers, discussing design, construction and performance of transmitter [IEEE PAPER J-1] 07 p1152 A69-19064

Beam distortion in low order Gaussian-Laguerre modes propagating through saturable laser amplifier, noting uniform and Bessel small signal gain distributions [IEEE PAPER J-3] 07 p1152 A69-19065

Miniature power amplifier stage for telemetry transmitters, discussing equipment size and weight reduction methods and hermetic envelope 07 p1106 A69-19115

Logic circuit for semiconductor current gain sensing switch 07 p1113 A69-19744

Cascaded avalanche diodes in negative resistance amplifying mode for increased output power and extended dynamic range 09 p1462 A69-21408

Gain, output power and radiation directivity of He-Ne traveling wave laser with nonresonant feedback 09 p1517 A69-21796

Gain stabilization of parametric amplifier, using pumped conduction current of varactor diode 09 p1467 A69-22585

High gain proportional and bistable fluidic amplifier design, noting high impedance role in pressure sensing and computer circuits in aircraft engine control 10 p1638 A69-23555

Antenna gain increase, using matched pair of Cassegrain reflectors with one primary source 10 p1664 A69-23799

Space charge waves amplification in semiconductors on coupling with forward circuit wave by transmission line analog, noting application to electromagnetic and acoustic waves 10 p1748 A69-24053

Directional antennas gain loss on ground sections calculated on basis of difference-phase measurements data 11 p1847 A69-24719

Maximum voltage and power gain of modulator-demodulator type nonresonant parametric amplifiers 11 p1849 A69-24956

Parametric amplifier gain, deriving expressions for diode pumping power and nonlinear circuit element resistance 11 p1849 A69-24957

Laser gain medium dispersion expressions applied to modulator ring laser operation with mode spacing less than pressure broadened atomic linewidth 12 p2106 A69-26324

Far field radiation pattern, radiation resistance, power gain, directivity and effective aperture for center fed dipole antenna with feed points displaced arbitrarily 12 p2039 A69-26352

Single frequency sealed off carbon dioxide amplifier, giving saturated gain 12 p2109 A69-26640

Power gain in TWT attenuators with linear tapered ends, considering conversion loss due to tapering 12 p2044 A69-27102

Gain optimization for dipole endfire array through orthogonalization of element directivity noting effects of element spacing, element gain and mutual coupling 13 p2226 A69-27186

Emitter self bias in power stages of transistor transmitters, considering transistor parameters dispersion 13 p2226 A69-27217

He-Ne laser transition line shape and gain curve through width, considering spectral frequency characteristics, output power and gas temperature and concentration 13 p2272 A69-28115

Crossed field backward wave tubes gain with stepwise varying interaction space found greater than with constant height interaction space 13 p2237 A69-28583

Avalanche diodes as high power pulsed microwave sources, noting power yields and efficiencies 14 p2418 A69-28890

High gain broadband amplifiers with triple tuned coaxial resonators and gridded power tubes, discussing phase stability 14 p2418 A69-28892

Polarization dependent gain saturation and nonlinearity induced anisotropy in He-Ne laser amplifier 14 p2457 A69-28931

Elastic collision effect on gas laser atoms velocity distribution and gain factor determined for strong collision model
14 p2459 A69-29388

VHF surface acoustoelectric amplifier investigated in DC drift field using composite spatially adjacent structure of lithium niobate and silicon film
14 p2422 A69-29559

Continuous IR parametric signal amplification in saturable absorber caused by carbon dioxide laser pumping
14 p2459 A69-29601

Varactors for frequency conversion circuits, discussing efficiency and output power
15 p2578 A69-30797

Traveling wave tube amplifier for wideband radio in SHF range containing periodically integrated magnetized system, discussing output power variation range
16 p2759 A69-31863

Frequency and time dependent gain characteristics of dye lasers, using computer program for rate equations for populations
17 p2980 A69-33025

Gain measurement of two element phased array aperture antenna during ATS-C tracking
19 p3272 A69-36254

Rotational-vibrational relaxation and molecular diffusion effect on saturation parameter of carbon dioxide laser, measuring gain as function of input power
19 p3338 A69-36692

Active admittance, realized gain and linear polarization degradation vs scan angle for infinite periodic phased arrays of circular apertures
20 p3507 A69-37844

Negative energy waves presence, showing qualitative difference on theoretically derived parametric amplification in plasmas
20 p3582 A69-38244

Carbon dioxide laser development, discussing gain, static amplifier and high pressure operations
22 p3962 A69-40474

GaAs laser diodes differential external quantum efficiency and gain per unit length dependence on laser reflectivity, taking into account optical losses
24 p4330 A69-43766

GaAs laser diodes differential external quantum efficiency and gain per unit length dependence on laser resonator length, taking into account optical losses
24 p4330 A69-43767

GaAs junction laser total stimulated light power dependence on resonator length taking into account optical losses
24 p4330 A69-43768

POWER GENERATORS

U ELECTRIC GENERATORS

POWER LIMITERS

Input signal random amplitude fluctuations suppression by parametric power limiter, discussing limiting frequency determination and dependence on signal amplitude
13 p2236 A69-28573

POWER LINES

Electromagnetic radiation below 1 GHz from gap type electrical discharges on electric power distribution lines
23 p4126 A69-42218

POWER PLANTS

Satellite solar power station proposed for power generation for future requirements, discussing world energy needs and finiteness of fossil fuel reserves
16 p2867 A69-31817

Aerodynamic characteristics of power plant installation, discussing nacelle design from viewpoint of aircraft performance and economic efficiency
17 p2898 A69-33215

POWER SERIES

NT TAYLOR SERIES

Diode mixer power series coefficients for spurious response prediction in superheterodyne receiver
03 p0399 A69-13905

Stability and weak oscillations of systems with distributed parameters, using method based on representation of characteristic equation in power series
06 p0956 A69-16822

Power series solutions of MHD boundary layer equations for flat plate with transverse magnetic field and arbitrary pressure gradient, discussing skin friction
09 p1545 A69-21396

Homogeneous parabolic differential equation for heat transfer of two finite bodies in thermal contact solved by power series
09 p1532 A69-21628

Consistent elastic shell theory based on expansion of sought solutions in power series over distance between point and middle surface
11 p1978 A69-24806

London-van der Waals interaction energy of symmetric molecular pair calculated in perturbation theory second order as infinite series in negative powers of separation
12 p2131 A69-26606

Two point boundary value problem converted into Cauchy problem, deriving power series solution method and algorithms for nonlinear problems
14 p2430 A69-29362

Asymptotic power series solutions of viscous solar wind equations
14 p2515 A69-29969

Power law fluids boundary layer near flat plate studied by series expansion and steepest descent methods, determining velocity gradient and skin friction coefficient
15 p2589 A69-30002

Double diffused transistor with Gaussian impurity distribution analyzed by power series for carrier density distribution and frequency response
16 p2758 A69-31616

Plasma flow structure near frontal point in earth magnetosphere, using quasi-hydrodynamic two dimensional model to obtain power series solution
20 p3594 A69-37019

First approximation stability of triangular Lagrange solutions of restricted elliptical three body problem, formulating power series for orbital eccentricity
20 p3575 A69-37318

POWER SPECTRA

Power spectral indices of March 6, 1968 solar radio burst, suggesting Razin effect
01 p0148 A69-10054

Power spectral density method of random loads analysis applied to V/STOL aircraft structural analysis, discussing statistical distribution
01 p0168 A69-10407

Power spectrum for energy transfer region in HF turbulent plasma by nonlinear equations, with results applied to subcosmic ray acceleration
01 p0145 A69-10790

Power saturation in isochronal traveling wave tube explained by motion of electron bunches relative to waves
01 p0047 A69-10882

Atmospheric turbulence power spectra for design criteria of future low altitude aircraft from LO-LOCAT program, analyzing turbulence scale lengths [AIAA PAPER 68-216]
01 p0011 A69-11023

Numerical filtering procedures for gust spectrum analyses compared for gain and phase lag frequency response characteristics, discussing gust acceleration spectra
01 p0084 A69-11052

Liquid lasers compound range of organic type, circulating system of inorganic type and power peaks
01 p0092 A69-11194

Solar cosmic rays diffusion relationship to interplanetary magnetic field power spectrum from high energy proton and electron observations
01 p0147 A69-11243

Radar cross section data interpretation, discussing calibration, unwanted signals, averaging, scattering matrix and power spectra
03 p0385 A69-12913

Pulsar CP 1919 pulse intensity fluctuations intensity with time scales could be strong scintillations
03 p0513 A69-13770

Time averaged products and squares of fluid turbulence signals at LF, using Hall effect multiplier device and integrating voltmeter
04 p0601 A69-15116

Standard Leningrad-2 photoexposure meter applied to measurement of power of laser continuously operating in visual spectral range
04 p0602 A69-15405

Static pressures, profiles of local longitudinal velocity, fluctuating wall pressures and power spectra of wall pressures measured for subsonic turbulent flow [ASME PAPER 68-WA/FE-36]
05 p0750 A69-16109

Expression derived for correlation function and power spectrum of bearing of set of point radiators, taking into account receiver internal noise
05 p0719 A69-16219

Statistical analysis of Radiorad/radar digitizing and recording/clutter and signal spectra and moving target detection by pulse radar
05 p0721 A69-16619

Atmospheric turbulence flight tests random data analysis to stimulate power spectra and transfer functions
05 p0767 A69-16756

Digital spectra analysis by Fourier transform and comb filter for determination of voltage and power spectra
05 p0722 A69-16762

Error probability vs SNR and power spectrum of PCM/PM signal with small phase deviation, noting applications in satellite tracking
06 p0889 A69-17656

Statistical frequency analysis of power spectrum of geomagnetic pulsations, discussing time and latitude dependence
07 p1122 A69-18297

Mode power spectra observations for ring and normal He-Ne lasers at 6328 A
07 p1155 A69-19087

Electronic optical system to process time-varying signals as optical spectrum analyzer for measuring power spectral density of input time function
08 p1317 A69-21086

Power spectral analysis of upper wind data of equatorial lower stratosphere noting quasi-biennial oscillation
09 p1537 A69-22297

Solar flare relation to interplanetary scintillation indices and power spectra
09 p1582 A69-22751

Earth currents and magnetic field variations recording in period range 10-200 sec, computing power density spectra on analog computer
10 p1682 A69-23593

Power spectrum analysis of photometric observations of white dwarf stars for measuring variability of stellar luminosity
10 p1788 A69-24124

Power spectrum of object flux transmittance using Fourier transform type holographic system compared to systems similar to correlator
12 p2090 A69-26254

Potential mechanisms of electron acceleration inside magnetosphere, measuring power spectrum of X rays by electron braking in upper atmosphere
12 p2066 A69-26295

Statistical characteristics of stationary stochastic pulse train specified by probability generating function, noting power density
12 p2030 A69-26383

Power spectral analysis feasibility for data reduction for medical interpretation of changes in pulmonary impedance pneumograph in remote monitoring
12 p2024 A69-26558

Power saturation in isochronal traveling wave tube explained by motion of electron bunches relative to waves
12 p2041 A69-26646

Statistical distribution of instantaneous frequency and power of signal associated with Doppler spectrum for exponentially distributed and determinate frequencies
12 p2032 A69-26863

Scattering characteristics of planet Venus at 3.8 cm wavelength, discussing frequency power spectra and radar cross section
13 p2349 A69-27818

Output power and loss analysis of 2 n injection locked oscillators combined through magic tee hybrids
13 p2232 A69-28061

High energy ionization bursts in cosmic ray showers electron photon component, obtaining bursts power spectrum and component energy dependence
13 p2332 A69-28404

Power spectrum of random process from discrete sequence of instantaneous values, assessing error
13 p2239 A69-28514

Power spectrum analysis and linear filtering for 27 day variation amplitude of geomagnetic disturbance subject to semiannual amplitude modulation
14 p2434 A69-28955

FORTAN program for calculation of magnitude and phase of digital filter transfer functions and power spectra of periodic waveforms
15 p2567 A69-30612

Power spectrum analyzer of weak periodic signal obscured by white noise by zero interactions count of signal and noise mixture
15 p2579 A69-30945

Power spectral density response of uniform beams to random pressures, evaluating joint acceptance of systems with pressure field [ASA PAPER SVT2]
15 p2713 A69-31143

POWER SUPPLIES

- Acoustic flow calorimeter for evaluating power transducers under loaded conditions
16 p2790 A69-32079
- Complex mechanical vibrations causes determined by sensor signals analysis
16 p2876 A69-32434
- Time variation of optical intensity of Sco X-1 X ray source, evaluating photometric data by power spectral analysis
16 p2852 A69-32805
- Power spectral analysis of chromospheric inhomogeneities in July 1967 and June 1968, tabulating mean heights of formation in solar atmosphere
17 p3040 A69-33811
- Solar cycle line in horizontal force of earth magnetic field resolved by power spectrum analysis suggesting 80 year cycle
18 p3205 A69-35414
- Vertical wind shears, structure functions, turbulence and power spectra for transverse velocity fluctuations in troposphere and stratosphere, noting clear air turbulence
20 p3570 A69-37506
- Power spectra of interplanetary magnetic field fluctuations determined from Pioneer 6 satellite data, relating results to galactic cosmic rays modulation
20 p3603 A69-37554
- Power spectrum for energy transfer region in HF turbulent plasma by nonlinear equations, with results applied to subcosmic ray acceleration
20 p3591 A69-38008
- Ionospheric scintillation power spectrum measurements from radio star and satellites related to F region radio refractive index fluctuations
20 p3534 A69-38093
- Output power spectra of Pb-Sn-Te diode laser above threshold of oscillation, demonstrating inverse dependence of line width on laser power
21 p3734 A69-38326
- Statistical analysis of wind velocity measurements at floating buoy stations, presenting velocity power spectra for different frequency bands
21 p3758 A69-39111
- Fourier spectrum analysis of solar line oscillation sequences, discussing power spectra and lifetime of oscillation phase
22 p4019 A69-40286
- Energy density distribution in power spectra of turbulence in long wave region in free atmosphere
24 p4346 A69-43155

POWER SUPPLIES

- Magnetic core logic circuit system for bidirectional stepping motor drive voltage power supply control in proper phase and time sequence
01 p0047 A69-11000
- Caterpillar diesel electric sets for powering NASA tracking station in Australia during Apollo 8 flight
07 p1117 A69-19632
- Power requirements for tracking, telecommand and telemetry of spacecraft over interplanetary distances, considering transmission problems, equipment weight and reliability
10 p1652 A69-22984
- Power sources - U.S. Army Conference, Atlantic City, May 1968
10 p1639 A69-23990
- Real time/process computer interface with electric power systems, discussing compatibility, reliability, etc, problems in connection with management and engineering personnel
11 p2004 A69-25302
- Operational amplifier integrated circuits applications, discussing simple and transducer amplifiers, operational circuits, wave shapers and generators and power supplies
11 p1857 A69-25665
- Oscillator parameter matching to flame discharge parameters to obtain optimal power for powering flame discharge for plasma jet source
12 p2140 A69-27129
- Square wave generator for junction laser power supply
13 p2274 A69-28643
- Ultrarelativistic electron acceleration in Crab Nebula maintaining synchrotron spectrum, obtaining power from compressional motion damping, gyrorelaxation effect and pitch angle anisotropy removal
19 p3424 A69-36336
- Rankine power cycle for fluid evaluation, discussing radiating area, thermodynamics, etc
23 p4239 A69-42276
- Seam welding processes and power supply effects on control efficacy based on electrode displacement for Al-Mg alloys
24 p4319 A69-42919

POWER SUPPLY CIRCUITS

- Pulsed ruby laser power supply incorporating facilities for variable output, automatic cutoff for fully charged capacitors and automatic manual triggering
02 p0256 A69-12095
- Circulator power splitting and isolating function in integrated microwave network
02 p0222 A69-12475
- Microwave energy generation with solid state equipment, noting Gunn effect diodes, avalanche diodes and limited space charge accumulation/LSA devices
03 p0402 A69-12971
- Solid state power supplies for turbine control and instrumentation, discussing control system manufacturer requirements and reliability specifications
03 p0368 A69-13432
- X ray proportional counter, analog to digital converter and power supply for gamma ray spectrometry used in satellite applications
07 p1134 A69-19194
- Thermal instability in power transistor structures, considering effects of design, emitter and base resistance at high currents
08 p1373 A69-20858
- Storage varactors and frequency dependent diode input power for multiplier cascades control, discussing series connections and limitations by thermal noise
11 p1841 A69-25607
- Electron-optical image converter camera for wide time intervals, considering nanosecond electronic control and high voltage stabilized power supply
12 p2083 A69-26140
- Single phase bidirectional AC/DC power convertor based on back-to-back SCR hybrid bridge
13 p2209 A69-28178
- Power supplies for ruby, YAG and glass lasers, emphasizing design equations and component selection
15 p2636 A69-31527
- Power supply circuits in spacecraft, DC voltage control systems, transistor and thyristor regulators and modulators, etc
17 p2937 A69-33582
- Overload protection guidelines for power subsystems, discussing source and protective device characteristics emphasizing spacecraft requirements
17 p2904 A69-34088

POWER TRANSMISSION

- Circulator power splitting and isolating function in integrated microwave network
02 p0222 A69-12475
- Production history of Model UH-1/Huey helicopter power transmission, discussing producibility
03 p0433 A69-13450
- Adaptive primary feed system for wide angle beam scanning from parabolic reflector antenna, using Fourier transformation to obtain uniform power distribution
08 p1279 A69-19908
- Radiant power flow, transmittance and absorbance of absorbing thin film multilayer in terms of characteristic matrix and admittance of surrounding media
11 p1896 A69-24850
- High speed shafting design for helicopter power transmission systems, discussing shaft in OH-6A Cayuse light observation helicopter
14 p2453 A69-28837
- Microwave power transmission to high or low altitude balloon systems for stationkeeping, describing flexible diode array rectifier antenna
22 p3870 A69-40809

POYNTING THEOREM

- Ray path geometry derived by Poynting vector to calculate surface fields due to creeping waves in sphere planes
08 p1274 A69-20046
- Polar elastic media pure torsion solved, noting couple-stresses influence on Poynting effect
08 p1414 A69-20527

PPI [POSITION INDICATORS]

U POSITION POSITION INDICATORS

PRANDTL-MEYER EXPANSION

- Stationary shock wave formation onset in Meyer-Prandtl flow, obtaining Marchal number for plane flow
09 p1429 A69-21688
- Leeward side of delta wing with sharp leading edges at hypersonic speeds, noting Prandtl-Meyer expansion
09 p1431 A69-21992
- Steady Prandtl-Meyer expansion of shock heated gases for recombination studies, measuring static pressure, stagnation point heat transfer, IR emission and optical absorption
18 p3228 A69-34466

PRANDTL NUMBER

- Transverse pressure gradient and streamwise derivatives effect on free convection laminar heat transfer on isothermal vertical plate at low Prandtl numbers
01 p0177 A69-11409
- Hydrodynamic analysis for determining steady flow region with closed separation area for Reynolds numbers to describe viscous mixing by Prandtl equations
02 p0190 A69-12570
- Heat transfer through vertical plane layer for various Prandtl numbers, discussing velocity and temperature profiles and effects of aspect ratio, Grashof and Rayleigh numbers
05 p0846 A69-16115
- Prandtl brittle fracture model modified for semi-finite crack in infinite body, discussing microscopic and macroscopic relation and crack propagation kinetics
07 p1237 A69-19682
- Wall temperature and Prandtl number effects on turbulent boundary layer thicknesses and shape factors for subsonic compressible gas flow over flat plate
09 p1432 A69-22513
- Statistical theories of turbulence applied to thermal convection between infinite slippery plates at large Prandtl number
11 p1997 A69-24283
- Steady incompressible fluids flow around stationary wings and through rotating blades cascades based on Prandtl airfoil theory of bound vortices
11 p1873 A69-25202
- Buoyancy-driven system instability mechanism, showing Prandtl number increment effect and relation to Coriolis-driven instability of rotating fluids
11 p1876 A69-25559
- Numerical solutions of equations for high Prandtl number boundary layers in two dimensional flat plate incompressible flow with mass injection
13 p2249 A69-28238
- Monograph on Prandtl number effect on heat transfer and pressure loss in artificially roughened channels
15 p2717 A69-30934
- Compressible laminar boundary layer equations solutions for nonunit Prandtl number by direct numerical integration
16 p2772 A69-32173
- Two term expansion for Nusselt number for laminar natural convection about isothermal horizontal cylinder in fluid with vanishingly small Prandtl number
17 p0368 A69-33014
- Coupling conditions by distinct equations for two laminar flow regions, studying near wake and considering Euler, Navier-Stokes and Prandtl correlations
19 p3299 A69-36649
- Free convection boundary layer singular character at low Prandtl numbers, deriving expression for Nusselt-Grashof relation
21 p3849 A69-38772
- Concentration distribution of admixture in semibounded jet propagating along nonheat conducting plate, obtaining concentration profiles for various thermal and diffusion Prandtl numbers
21 p3854 A69-39844
- Prandtl number influence on heat transfer and pressure drop characteristics of roughened channels, determining friction factor
24 p4407 A69-42915

PRASEODYMIUM

- Low temperature specific heat of praseodymium magnesium nitrate
12 p2026 A69-25784
- Praseodymium germanides resistivity and thermal EMF temperature dependence determined, discussing Hall effect, thermal expansion coefficient, melting point microhardness, etc
23 p4199 A69-42467
- Ultrasonic paramagnetic resonance investigations of Pr ions ground state energy levels in calcium fluoride
24 p4360 A69-42790

PREAMPLIFIERS

- Simultaneous measurement of gain and noise of linear two port device using noise generators as signal sources
02 p0210 A69-12430
- Low noise microwave amplifiers for radio astronomy and satellite communications receiving system preamplification
03 p0402 A69-13017
- Traveling wave maser and cooled parametric amplifier for ultralow noise preamplification in satellite communication earth terminal installations
05 p0728 A69-15670

Helium cooled low noise high gain parametric preamplifier for satellite communication by stagger tuning stages
07 p1098 A69-18460

Tunnel diode amplifiers for amplifying weak microwave signals, discussing low noise wideband preamplifier for communication satellites
07 p1099 A69-18464

PRECAMBRIAN PERIOD

Geomagnetic field strength in early Precambrian, discussing thermoremanent normal remnant and saturation inverse remnant magnetization studies of Botswana Modipe gabbro
08 p1309 A69-20580
